PURCHAS

HIS

PILGRIMES.

IN FIVE BOOKES.

The first, Contayning Peregrinations and Discoueries. in the remotest North and East parts of *ASIA*; called *TARTARIA and CHINA*.

The second, *Peregrinations, Voyages, Discoueries, of CHINA, TARTARIA, RVSSIA, and other the North and East parts of the World, by English-men and others.*

The third, *Voyages and Discoueries of the North parts of the World, by Land and Sea, in ASIA, EVROPE; the Polare Regions, and in the North-west of AMERICA.*

The fourth, *English Northerne Navigations, and Discoueries: Relations of Greenland, Groenland, the North-west passage, and other Arctike Regions, with later Russian OCCVRENTS.*

The fifth, *Voyages and Trauels to and in the New World, called AMERICA: Relations of their Pagan Antiquities and of the Regions and Plantations in the North and South parts thereof, and of the Seas and Islands adjacent.*

Unus Deus, Una Veritas.

LONDON

Printed by *William Stansby* for *Henry Featherstone*, and are to be sold at his shop in *Pauls Church-yard* at the signe of the *Rose*.

1625.

THE HISTORY OF THE

WEST INDIES

BY SAMUEL JOHNSON

The first, containing the History of the Discovery and Settlement of the West Indies, and the Islands adjacent to the same, from the first Discovery to the present Time.

The second, containing the History of the Discovery and Settlement of the West Indies, and the Islands adjacent to the same, from the first Discovery to the present Time.

The third, containing the History of the Discovery and Settlement of the West Indies, and the Islands adjacent to the same, from the first Discovery to the present Time.

The fourth, containing the History of the Discovery and Settlement of the West Indies, and the Islands adjacent to the same, from the first Discovery to the present Time.

The fifth, containing the History of the Discovery and Settlement of the West Indies, and the Islands adjacent to the same, from the first Discovery to the present Time.

The Third Part.

OF THE

WEST INDIES

BY

JOHN JOHNSON, Printer, in the Strand, near St. Dunstons Church.

TO
THE RIGHT
HONORABLE, AND
RIGHT REVEREND
FATHER IN
GOD:
IOHN,

Lord Bishop of LINCOLNE, Lord Keeper
of the GREAT SEALE of
ENGLAND, &c.

Right Renerend and Honourable:

These PILGRIMS deliivering a Historie of the
World in their owne Trauels by Sea and Land,
not onely needed authoritie from the Ad-
miraltie, but fearing suspition of Riot with-
out warrantable assemblie, become humble
Sutors for your Lordships fauour. So shall
they in the approbation of both (to apply by
a warrant of *Ego dixi, diu estis*, the Patriarchs
mysticall Dreame to our Historicall purpose)

Gen. 28.12.

finde a *Scala Cæli* to ascend from the ground where they are prostrate
Petitioners, to the Princes Highnesse, whence authorised they may
again *descend* and become the Commons of Common Readers.
Order requires a *Medium* betwixt Princely Height and his Lowli-
nesse, whose function is also tearmed *Holy Orders*, as further tying
him to that equall inequality; wherein hee beseecheth your Lordship

THE EPISTLE

as by speciall Office and in proprietie to owne that which hee hath presumed to offer to the Prince in *Capite*, *Quemadmodum sub optimo rege omnia Rex imperio possidet, Domini dominio. Ad reges potestas pertinet, ad singulos proprietatis.*

Sence Benef. l. 7. cap. 4.

Many are the reasons which moued the Author to obtrude his **PILGRIMS** on your Lordship; because he is deeply obliged yours for former fauours, euen then when you were initiated in the Mysteries of Honour (learning by seruice to Command) in the Discipline of that Honorable worthy Lord Chancellor **E G E R T O N**! because some conceptions of this Worke were in your Honourable Iurisdiction of *Westminster*, whither lest some traduce *Trauellers* for *Vagrants*, they returne in hope of *Sanctuarie*, or not so much trusting to ancient Liberties, as your Lordships liberall respect to literate endeauours: because these *Trauellers* aduenturing the world, seeke like *Iacob* at his going and returne, a Reuerend Fathers *Blessing* and *Confirmation*. The Author likewise being called on for his promised *Europe*, submits himselfe to your Lordships Order, heere tendring of that debt, what hee is able in readie payment. The worke it selfe also being a Librarie in this kind, presents it selfe to your Honour, the Founder of two famous Libraries; one in *Westminster*, (where the Stones renued Fabrikes speake your magnificence) the other in that famous Nurserie of Arts and Vertue Saint **I O H N S** Colledge in *Cambridge*, which sometime knew you a hopefull Sonne, but now acknowledgeth your Lordship a happie Father, where also the Author first conceiued with this *Trauell*ing *Genius*, whereof without traueiling hee hath trauelled euer since. Learning, the Aduancer of your Honour, hath secured her welwillers not to bee reiected in whatsoeuer indeauours (*Scribimus indocti, doctiq.*) to aduance Learning. The greatnesse of Nature to goodnesse of Nature, varietie of Estates to a prime Pillar of State, the Historie of Religions to a Religious Prelate, of Antiquities to an Antiquarie, cannot bee altogether vnwelcome; that I mention not the dependance of *London* Ministers Liuiings (*fined* by the Times iniquitie) on your Lordships equall Sentence. These Causes haue moued, One hath inforced; these **PILGRIMES** are your Seruants, fitly so called *à Seruando*, saued by your Lordships hand when they were giuing vp the ghost, despairing through a fatall stroke of euer seeing light.

Aug. de (D. lib. 29. cap. 5.

Most humbly therefore, sue vnto your Honour, these **PILGRIMES** for acknowledgement, esteeming your Lordships Name in fore-front a cognisance of blest Libertie and best Seruice; now when *Ianus* sends many with gratefull emulations to present their acclamations of a *New Yeere*, presenting (a word rather then worthy Present) a world, yea, a New world, in great part one Age younger to mens knowledge then *America*, sometimes stiled by that Name. I had written other Causes of my addresse to your Honour, but dare not proceed to interrupt others more weightie; In all humble earnestnesse beseebeth, now in this Festiuall time, the Author with his **PILGRIMES** to finde Hospitall

PEREGRINATIONS
AND DISCOVERIES, IN THE
REMOTEST NORTH AND EAST
PARTS OF ASIA, CALLED
TARTARIA AND
CHINA.

THE FIRST BOOKE.

CHAP. I.

The Journall of Frier. WILLIAM DE RYBRVQVIS,
a French-man, of the Order of the Minorite Friars, vn-
to the East parts of the World, Anno
Dom. 1253.

O the most Excellent and most Christian Lord, Lewis,
by Gods grace the Renowned King of France, Frier
William de Rubruk, * the meanest of the *Minorites*
Order, wisheth health and continuall Triumph in
Christ.

It is written in the Booke of *Ecclesiasticus*, concer-
ning the Wiseman: *He shall trauell into forreine Coun-*
tries, and good and euill shall hee try in all things. The
very same Action (my Lord and King) haue I atchie-
ued: howbeit, I wish, that I haue done it like a wise
man, and not like a Foole: For many there bee, that
performe the same Action which a wise man doth, not
wisely but more vndiscreetly: of which number I feare
my selfe to bee one. Notwithstanding, howsoever I
haue done it, because you commanded mee, when I de-

* Master Hak,
had published
part of this
Author, but
the whole
worke being
found in Benet
Colledge Li-
brary in Cam-
bridg, I thought
fit to commu-
nicate it to the
World; it being
neuer publi-
shed, as I
thinke, in any
Language. I
begin with the
Tartars, as be-
ing knowne to
these parts be-
fore the *Chi-
nois*: yea, *China*
or *Mang* be-
came knowne
by them.
Eccles 39. v. 3.
Cassaria, or
Gasaria.

parted from your Highnesse, to write all things vnto you, which I should see among the *Tar-*
tars, and you wished me also that I should not feare to write long Letters, I haue done as your
Maiestie enioyned me: yet with feare and reuerence, because I want words and Eloquence suf-
ficient to write vnto so great a Maiestie. Bee it knowne therefore vnto your Sacred Maiestie,
that in the yeare of our Lord 1253. about the Nones of May, wee entred into the Sea of *Pon-*
sus, which the *Bulgarians* call the great Sea. It containeth in length (as I learned of certayne
Merchants) one thousand and eight miles, and is in a manner, diuided into two parts. About
the midst thereof are two Prouinces, one towards the North, and another towards the South.
The South Prouince is called *Synopolis*, and it is the Castle and Port of the *Soldan* of *Turkie*:
but the North Prouince is called of the *Latines*, *Gasaria*: of the *Greekes*, which inhabit vpon
the Sea shoare thereof, it is called *Cassaria*, that is to say, *Casaria*. And there are certayne head-
lands stretching forth into the Sea towards *Synopolis*. Also, there are three hundred miles of di-

B

stance

stance betweene *Synopolis* and *Cassaria*. Inſomuch that the diſtance from thoſe points or places
 to *Conſtantinople*, in length and breadth is about ſeven hundred miles: and ſeven hundred miles
 alſo from thence to the Eaſt, namely, to the Countrey of *Hiberia*, which is a Prouince of
Georgia. At the Prouince of *Gafaria* or *Cassaria*, wee arriued, which Prouince is, in a man-
 ner, three ſquare, hauing a Citie on the Weſt part thereof called *Kerſoua*, wherein *Saint Cle-*
ment ſuffered Martyrdome. And ſayling before the ſaid Citie, wee ſaw an Iſland, in which a
 Church is ſaid to be built by the hands of Angels. But about the miſt of the ſaid Prouince to-
 ward the South, as it were, vpon a ſharpe Angle or Point, ſtandeth a Citie called *Soldaia*, direct-
 ly againſt *Synopolis*. And there doe all the *Turkie* Merchants, which Traffique into the North
 Countries, in their Iourney outward, arriue, and as they returne home-ward alſo from *Ruſſia*,
 and the ſaid Northerne Regions, into *Turkie*. The foreſaid Merchants transport thither Er-
 mines and gray Fures, with other rich and coſtly Skinnes. Others carrie Clothes made of Cot-
 ton or Bombaſt, and Silke, and diuers kinds of Spices. But vpon the Eaſt part of the ſaid Prouince
 ſtandeth a Citie called *Matruga*, where the Riuer *Tanaïs* diſchargeth his ſtreames into the Sea
 of *Pontus*, the mouth whereof is twelue miles in breadth. For this Riuer, before it entreth in-
 to the Sea of *Pontus*, maketh a little Sea, which hath in breadth and length ſeven hundred
 miles, and it is in no place thereof aboue ſixe paces deepe, whereupon great Veſſels cannot faile
 ouer it. Howbeit the Merchants of *Conſtantinople*, arriuing at the foreſaid Citie of * *Matruga*,
 ſend their Barkes vnto the Riuer of *Tanaïs* to buy dried fiſhes, Sturgeons, Thoſſes, Barbils,
 and an infinite number of other fiſhes. The foreſaid Prouince of *Cassaria*, is compaſſed in with
 the Sea on three ſides thereof: namely, on the Weſt ſide, where *Kerſoua*, the Citie of *Saint*
Clement is ſituate: on the South ſide the Citie of *Soldaia*, whereat we arriued: on the Eaſt ſide
Maricandis, and there ſtands the Citie of *Matruga*, vpon the mouth of the Riuer *Tanaïs*. Be-
 yond the ſaid mouth ſtandeth *Zikia*, which is not in ſubiectiõ vnto the *Tartars*: alſo the peo-
 ple called *Sueni* and *Hiberi*, towards the Eaſt, who likewiſe are not vnder the *Tartars* Domini-
 on. Moreouer, towards the South, ſtandeth the Citie of *Trapeſunda*, which hath a Gouverneur
 proper to it ſelfe, named *Guydo*, being of the Linage of the Emperours of *Conſtantinople*, and is
 ſubiect vnto the *Tartars*. Next vnto that is *Synopolis*, the Citie of the Soldan of *Turkie*, who
 likewiſe is in ſubiectiõ vnto them. Next vnto theſe lyeth the Countrey of *Vaſtaci*, whoſe
 Sonne is called *Aſtar*, of his Grand-father by the Mothers ſide, who is not in ſubiectiõ. All the
 Land from the mouth of *Tanaïs* Weſt-ward as farre as *Danubius* is vnder their Iuriſdiction. Yea,
 beyond *Danubius* alſo, towards *Conſtantinople*, *Valakia*, which is the Land of *Aſſanus*, and *Bulga-*
ria minor, as farre as *Solonia*, doe all pay Tribute vnto them. And beſides the Tribute impoſed,
 they haue alſo, of late yeares, exacted of euery houſhold an Axe, and all ſuch Corne as they
 found lying on heapes. We arriued therefore at *Soldaia*, the twelfth of the Kalends of Iune. And
 diuers Merchants of *Conſtantinople*, which were arriued there before vs, reported that certayne
 Meſſengers were coming thither from the Holy Land, who were deſirous to trauell vnto *Sar-*
tach. Notwithſtanding, I my ſelfe had publiſhly giuen out vpon Palme Sunday within the
 Church of *Sancta Sophia*, that I was not your nor any other mans Meſſenger, but that I trauelled
 vnto thoſe Infidels according to the Rule of our Order. And being arriued, the ſaid Merchants
 admoniſhed me to take diligent heed what I ſpoke: becauſe they hauing reported mee to be a
 Meſſenger, if I ſhould ſay the contrary, that I were no Meſſenger, I could not haue free paſſage
 granted vnto me. Then I ſpoke after this manner vnto the Gouvernours of the Citie, or rather
 vnto their Lieutenants, becauſe the Gouvernours themſelues were gone to pay Tribute vnto *Baa-*
tu, and were not as yet returned. We heard of your Lord *Sartach* (quoth I) in the Holy Land,
 that he was become a Chriſtian: and the Chriſtians were exceeding glad thereof, and eſpecial-
 ly the moſt Chriſtian King of *France*, who is there now in Pilgrimage, and fighteth againſt the
Saracens, to redeeme the holy places out of their hands: wherefore I am determined to goe vnto
Sartach, and to deliuer vnto him the Letters of my Lord the King, wherein hee admoniſheth
 him concerning the good and commoditie of all Chriſtendome. And they receiued vs with
 gladneſſe, and gaue vs entertaynment in the Cathedrall Church. The Biſhop of which Church
 was with *Sartach*, who told me many good things concerning the ſaid *Sartach*, which after-
 ward I found to be nothing ſo. Then put they vs to our choice, whether wee would haue Carts
 and Oxen, or packe-horſes to transport our Carriages. And the Merchants of *Conſtantinople* ad-
 uiſed me, not to take Carts of the Citizens of *Soldaia*, but to buy covered Carts of mine owne,
 (ſuch as the *Ruſſians* carry their Skinnes in) and to put all our Carriages, which I would daily
 take out, into them: becauſe, if I ſhould uſe Horſes, I muſt be conſtrayned at euery baite to take
 downe my Carriages, and to liſt them vp againe on ſundry Horſes backes: and beſides, that I
 ſhould ride a more gentle pace by the Oxen drawing the Carts. Wherefore, contenting my ſelfe
 with their euill counſell, I was trauelling vnto *Sartach* two monethes, which I could haue done
 in one, if I had gone by Horſe. I brought with me from *Conſtantinople* (being by the Merchants
 aduiſed ſo to doe) pleaſant Fruits, Muſkadell Wine, and delicate Biſket bread to preſent vnto
 the Gouvernours of *Soldaia*, to the end I might obtayne free paſſage: becauſe they looke fauou-
 rably vpon no man which commeth with an empty hand. All which things I beſtowed in one
 of

of my Carts (not finding the Gouvernours of the Citie at home) for they told me, if I could carry them to *Sartach*, that they would be most acceptable vnto him. Wee tooke our Iourney therefore about the Kalends of Iune, with foure couered Carts of our owne, and with two other which we borrowed of them, wherein we carried our bedding to rest vpon in the night, and they allowed vs five Horses to ride vpon. For there were iust five persons in our company: namely, I my selfe and mine associate Frier *Bartholomew* of *Cremona*, and *Goset* the Bearer of these Presents, the man of God *Turgemannus*, and *Nicolas* my Seruant, whom I bought at *Constantinople*, with some part of the Almes bestowed vpon me. Moreouer, they allowed vs two men, which draue our Carts and gaue attendance vnto our Oxen and Horses. There bee high Promontories on the Sea shoare from *Kersona* vnto the mouth of *Tanais*. Also there are fortie Castles betweene *Kersona* and *Soldaia*, euery one of which almost haue their proper Languages: amongst whom there were many *Goths*, who spake the *Dutch* Tongue. Beyond the said Mountaynes towards the North, there is a most beautifull Wood growing on a Plaine full of Fountaynes and Freshets. And beyond the Wood there is a mightie plaine Champian, continuing five dayes Iourney vnto the very extremitie and borders of the said Prouince North-ward, and there it is a narrow *Isthmus* or neck-Land, hauing Sea on the East and West sides thereof, insomuch that there is a Ditch made from one Sea vnto the other. In the same Plaine (before the *Tartars* sprang vp) were the *Comanians* wont to inhabit, who compelled the fore-said Cities and Castles to pay Tribute vnto them. But when the *Tartars* came vpon them, the multitude of the *Comanians* entred into the fore-said Prouince, and fled all of them, euen vnto the Sea shoare, beeing in such extreme Famine, that they which were aliue, were constrained to eate vp those which were dead: and (as a Merchant reported vnto me who saw it with his owne eyes) that the liuing men deuoured and tore with their teeth, the raw flesh of the dead, as Dogges would gnaw vpon Carrion. Towardes the Borders of the said Prouince there bee many great Lakes: vpon the Bankes whereof are Salt-pits or Fountaynes, the water of which so soone as it entred into the Lake, becommeth hard Salt like vnto Ice. And out of those Salt-pits *Baatu* and *Sartach* haue great Reuenues: for they repayre thither out of all *Russia*, for Salt: and for each Cart loade they giue two Webbes of Cotton, amounting to the value of halfe an *Xperpera*. There come by Sea also many Shippes for Salt, which pay Tribute euery one of them according to their burthen. The third day after wee were departed out of the Precincts of *Soldaia*, wee found the *Tartars*. Amongst whom beeing entred, me thought I was come into a new World. Whose life and manners I will describe vnto your Highnesse as well as I can.

Frier Bartholomew
of Cremona.The necke of
Tanica Chet-
sonum.

The Tartars.

They haue in no place any settled Citie to abide in, neither know they of the Celestiall Citie to come. They haue diuided all *Scythia* among themselues, which stretcheth from the River *Danubius* euen vnto the rising of the Sunne. And euery of their Captaines, according to the great or small number of his people, knoweth the bounds of his Pastures, and where hee ought to feed his Cattell Winter and Summer, Spring and Autumne. For in the Winter they descend vnto the warme Regions South-ward. And in the Summer they ascend vnto the cold Regions North-ward. In Winter when Snow lyeth vpon the ground, they feed their Cattell vpon Pastures without water, because then they vse Snow in stead of water. Their houses wherein they sleepe, they ground vpon a round foundation of Wickers artificially wrought and compacted together: the Roofe whereof consisteth (in like sort) of Wickers, meeting aboue into one little Roundell, out of which Roundell ascendeth vpward a necke like vnto a Chimney, which they couer with white Felt, and oftentimes they lay Morter or white Earth vpon the said Felt, with the powder of bones, that it may shine white. And sometimes also they couer it with blacke Felt. The said Felt on the necke of their house, they doe garnish ouer with beautifull varietie of Pictures. Before the doore likewise they hang a Felt curiously painted ouer. For they spend all their coloured Felt, in painting Vines, Trees, Birds, and Beasts thereupon. The said houses they make so large, that they contayne thirtie foot in breadth. For measuring once the breadth betweene the wheele-ruts of one of their Carts, I found it to bee twentie feet ouer: and when the house was vpon the Cart, it stretched ouer the wheelles on each side five feet at the least. I told two and twentie Oxen in one Teame, drawing an house vpon a Cart, eleuen in one order according to the breadth of the Cart, and eleuen more before them: the Axle-tree of the Cart was of an huge bignesse like vnto the Mast of a Ship. And a fellow stood in the doore of the house, vpon the fore-stall of the Cart driuing forth the Oxen. Moreouer, they make certayne foure square Baskets of small slender Wickers as bigge as great Chests: and afterward, from one side to another, they frame an hollow lidde or couer of such like Wickers, and make a doore in the fore-side thereof. And then they couer the said Chest or little House with black Felt, rubbed ouer with Tallow or Sheeps Milke to keep the rain from soking through, which they deck likewise with painting or with feathers. And in such Chests they put their whole Household-stuffe and Treasure. Also the same Chests they doe strongly binde vpon other Carts, which are drawne with Camels, to the end they may wade through Riuers. Neither doe they at any time take downe the said Chests from off their Carts. When they

Chap. 2.
Of the Tartars,
and of their
houses.

The benefit of
a Painter in
strange Coun-
tries.

take downe their dwelling houses, they turne the doores alwayes to the South: and next of all they place the Carts laden with their Chests, here and there, within halfe a stones cast of the House: insomuch that the House standeth betweene two rankes of Carts, as it were, betweene two Walles. The Matrones make for themselves most beautifull Carts, which I am not able to describe vnto your Maiesty but by Pictures only: for I would right willingly haue painted all things for you, had my Skill beene ought in that Art. One rich *Moal* or *Tartar* hath two hundred, or one hundred such Carts with Chests. Duke *Baatu* hath sixteene Wiues, euery one of which hath one great house, besides other little houses, which they place behind the great one, being as it were Chambers for their Maidens to dwell in. And vnto euery of the said houses doe belong two hundred Carts. When they take their houses from off the Carts, the principall Wife placeth her Court on the West Frontier, and so all the rest in their order: so that the last Wife dwelleth vpon the East Frontier: and one of the said Ladies Courts is distant from another about a stones cast. Whereupon the Court of one rich *Moal* or *Tartar* will appeare like vnto a great Village, very few men abiding in the same. One woman will guide twenty or thirty Carts at once, for their Countries are very plaine, and they binde the Carts with Camels or Oxen, one behind another. And there sits a Wench in the fore-most Cart driving the Oxen, and all the residue follow on a like pace. When they chance to come at any bad passage, they let them loose, and guide them ouer one by one: for they goe a slow pace, as fast as a Lambe or an Oxe can walke.

Chap. 3.
Of their Beds,
Puppets, Ima-
ges and drink-
ing Pots.

Idols.

HAuing taken downe their houses from off their Carts, and turning the doores South-ward, they place the bed of the Master of the house, at the North part thereof. The womens place is alwayes on the East-side, namely, on the left hand of the good man of the house sitting vpon his bed with his face South-wards: but the mens place is vpon the West-side, namely, at the right hand of their Master. Men when they enter into the house, will not in any case hang their Quiuers on the womens side.ouer the Masters head there is alwayes an Image, like a Puppet, made of Fealt, which they call the Masters Brother: and another ouer the head of the good Wife or Mistris, which they call her Brother, being fastened to the wall: and aboue betweene both of them, there is a little leane one, which is, as it were the keeper of the whole house. The good Wife or Mistris of the house placeth aloft at her beds feet, on the right hand, the Skinne of a Kid stuffed with Wooll or some other matter, and neere vnto that a little Image or Puppet looking towards the Maidens and women. Next vnto the doore also on the womens side, there is another Image with a Cowes Vdder, for the women that milke the Kine. For it is the dutie of their women to milke Kine. On the other side of the doore next vnto the men, there is another Image with the Vdder of a Mare, for the men which milke Mares. And when they come together to drinke and make merrie, they sprinkle part of their Drinke vpon the Image which is aboue the Masters head: afterward vpon other Images in order: then goeth a Seruant out of the house with a cup full of Drinke, sprinkling it thrise towards the South, and bowing his knee at euery time: and this is done for the honour of the Fire. Then performeth he the like Superstitious Idolatry towards the East, for the honour of the Ayre: and then to the West for the honour of the water: and lastly, to the North in the behalfe of the Dead. When the Master holdeth a cup in his hand to drinke, before hee tasteth thereof, hee powreth his part vpon the ground. If he drinketh sitting on Horse-backe, he powreth out part thereof vpon the necke or mane of his Horse before he himselfe drinketh. After the Seruant aforesaid hath so discharged his cups to the foure quarters of the World, hee returneth into the house: and two other Seruants stand ready with two cups, and two basons, to carrie Drinke vnto their Master and his Wife, sitting together vpon a bed. And if hee hath more Wiues then one, shee with whom he slept the night before, sitteth by his side the day following: and all his other Wiues must that day resort vnto the same house to drinke: and there is the Court holden for that day: the gifts also which are presented that day, are layd vp in the Chests of the said Wife. And vpon a bench stands a Vessell of Milke, or of other Drinke and drinking cups.

Chap. 4.
Of their
drinkes, and
how they pro-
uoke one ano-
ther to drink-
ing.

They vse the
like custome in
Florida.

IN Winter time they make excellent drinke of Rice, of Mill, and of Honey, being well and high coloured like Wine. Also they haue Wine brought vnto them from farre Countries. In Summer time they care not for any drinke, but Cosmos. And it standeth alwayes within the entrance of his doore, and next vnto it stands a Minstrell with his Fiddle. I saw there no such Citerne and Vials as ours commonly bee, but many other Muscull Instruments which are not vsed among vs. And when the Master of the house begins to drinke, one of his seruants crieth out with a loude voyce, *Ha*, and the Minstrell playes vpon his Fiddle. And when they make any great solemne feast, they all of them clap their hands, and dance to the noyse of Musicke, the men before their Master, and the women before their Mistris. And when the Master hath drunke, then cries out his seruant as before, and the Minstrell stayeth his Musicke. Then drinke they all round both men and women, and sometimes they carowse for the victorie very filthily and drunkenly. Also when they will prouoke any man, they pull him by the Eares to the drinke, and so lug and draw him strongly to stretch out his throat clapping their hands, and dancing

dancing before him. Moreouer, when some of them will make great feasting and reioycing, one of the companie takes a full Cup, and two other stand, one on his right hand, and another on his left, and so they three come singing to the man who is to haue the Cup reached vnto him, still singing and dancing before him: and when he stretcheth forth his hand to receiue the Cup, they leape suddenly backe, returning againe as they did before, and so hauing deluded him thrice or foure times by drawing backe the Cup, vntill he be merrie, and hath gotten a good appetite, then they giue him the Cup, singing and dancing, and stamping with their feet, vntill he hath done drinking.

10 **C**ONCERNING their food and victuals, be it knowne vnto your Highnesse, that they doe, without all difference or conception, eat all their dead Carions. And amongst so many droues it cannot be, but some Cattell must needs die. Howbeit in Summer, so long as their Cosmos, that is, their Mares milke lasteth, they care not for any food. And if they chance to haue an Oxe or an Horse die, they drie the flesh thereof: for cutting it into thinne slices, and hanging it vp against the Sunne and the wind, it is presently dried without Salt, and also without stench or corruption. They make better Puddings of their Horses then of their Hogs, which they eate being new made: the rest of the flesh they reserue vntill Winter. They make of their Oxe skins great bladders or bags, which they doe wonderfully drie in the smoake. Of the hinder part of their Horse hides, they make very fine Sandals and Pantofles. They giue vnto fiftie or
20 an hundred men, the flesh of one Ramme to eate. For they mince it in a bowle with Salt and Water (other Sauce they haue none) and then with the poynt of a Knife, or a little Forke which they make for the same purpose (such as we vse to take roasted Peares and Apples out of Wine withall) they reach vnto euery one of the companie a morsell or twaine, according to the multitude of Guests. The Master of the house, before the Rams flesh be distributed, first of all himselfe taketh thereof, what he pleaseth. Also, if he giueth vnto any of the companie a speciall part, the receiuer thereof must eate it alone, and must not impart ought thereof vnto any other. Not being able to eate it vp all, hee carries it with him, and deliuers it vnto his boy, if hee be present, to keepe it: if not, hee puts it vp into his Saptargat, that is to say, his foure square Budget, which they vse to carrie about with them, for the sauing of all such prouision, & where-
30 in they lay vp their bones, when they haue not time to gnaw them thoroughly, that they may burnish them afterward, to the end that no whit of their food may come to nought.

in the wind.*

*Chap. 6.
How they
make their
drinke, called
Cosmos.*

Caracosmos.

Duke Baatu.

*Store of
Mares, and
Mares milke.*

THeir drinke, called Cosmos, which is Mares milke, is prepared after this manner. They fasten a long line vnto two posts standing firmly in the ground, and vnto the same line they tye the young Foales of those Mares, which they meane to milke. Then come the Dammes to stand by their Foales gently suffering themselves to be milked. And if any of them be too vnruely, then one takes her Foale, and puts it vnder her, letting it sucke a while, and presently carrying it away againe, there comes another man to milke the said Mare. And hauing gotten a good quantitie of this Milke together (being as sweet as Cowes milke) while it is new they powre into a great bladder or bag, and they beat the said bag with a piece of wood made for the purpose, hauing a Club at the lower end like a mans head, which is hollow within: and so soone as they beat vpon it, it begins to boyle like new Wine, and to be sowre and sharpe of taste, and they beate it in that manner till Butter come thereof. Then taste they thereof, and being indifferently sharpe they drinke it: for it biteth a mans tongue like the Wine of Raspes, when it is drunke. After a man hath taken a draught thereof, it leaueth behind it a taste like the taste of Almond-milke, and goeth downe very pleasantly, intoxicating weake braynes: also it causeth vrine to be auoyded in great measure. Likewise Caracosmos, that is to say, Blacke Cosmos, for great Lords to drinke, they make on this manner. First, they beat the said Milke so long till the thickest part thereof descend right downe to the bottome like the lees of white Wine, and that which is thinne and pure remayneth aboue, being like vnto Whay or white Must. The
40 said lees and dregs being very white, are giuen to seruants, and will cause them to sleepe exceedingly. That which is thinne and cleere their Masters drinke: and in very deede it is maruellous sweet and wholsome liquor. Duke Baatu hath thirtie Cottages or Granges, within a dayes iourney of his abiding place: euery one of which serueth him daily with the Caracosmos of an hundred Mares milke, and so all of them together euery day with the Milke of three thousand Mares, besides white Milke which other of his Subjects bring. For euen as the Husbandmen of Syria bestow the third part of their fruits, and carrie it vnto the Courts of their Lords, euen so doe they their Mares milke euery third day. Out of their Cowes milke they first churne Butter, boyling the which Butter vnto a perfect decoction, they put it into Rams skins, which they reserue for the same purpose. Neither doe they salt their Butter: and yet by reason of the long seething, it putrifeth not: and they keepe it in store for Winter. The churn-
60 milke which remayneth of the Butter, they let alone till it be as sowre as possibly it may be, then they boyle it, and in boyling it is turned all into Curds, which Curds they drie in the Sun, making them as hard as the drosse of Iron: and this kind of food also they store vp in Sachels

against Winter. In the Winter season when Milke fayleth them, they put the foresaid Curds (which they call *Gry-vr*) into a bladder, and powring hot water thereinto, they beat it lustily till they haue resolued it into the said Water, which is thereby made exceedingly lowre, and that they drinke in stead of Milke. They are very scrupulous, and take diligent heed that they drinke not faire Water by it selfe.

Chap. 8.
Of the fashion
which the Tar-
tars vse in cut-
ting their
haire, and of
the attire of
their women.

Great Lords haue Cottages or Granges towards the South, from whence their Tenants bring them Miller and Meale against Winter. The poorer sort prouide themselves of such necessities, for the exchange of Rams, and of other beasts skins. The *Tartars* slaues fill their bellies with thicke water, and are therewithall contented. They will neither eat Mife with long 10
tayles, nor any kind of Mife with short tayles. They haue also certaine little beasts, called by them, *Sogur*, which lie in a Caue twentie or thirtie of them together, all the whole Winter sleeping there for the space of sixe moneths: and these they take in great abundance. There are also a kind of Conies hauing long tayles like vnto Cats: and on the outside of their tayles grow blacke and white haire. They haue many other small beasts good to eat, which they know and discern right well. I saw no Deere there, and but a few Hares, but a great number of Roes. I saw wild Asses in great abundance, which be like vnto Mules. Also I saw another kind of beast, called *Artak*, hauing in all resemblance the bodie of a Ram, and crooked hornes, which are of such bignesse, that I could scarce lift vp a paire of them with one hand: and of these hornes they make great drinking cups. They haue Faulcons, Girfaulcons, and other Hawkes in great 20
plentie: all which they carrie vpon their right hands: and they put alwaies about their Faulcons neckes a string of Leather, which hangeth downe to the midst of their gorges, by the which string, when they cast them off the fist at the game, with their left hand they bow downe the heads and breasts of the said Hawkes, lest they should be tossed vp and downe, and beaten with the wind, or lest they should soare too high. Wherefore they get a great part of their victuals by hunting and hawking. Concerning their garments and attire, be it knowne vnto your Ma-
iestie, that out of *Cataya*, and other Regions of the East, out of *Persia* also, and other Countries of to South, there are brought vnto them Stuffs of silke, Cloth of gold, and Cotton cloth, which they weare in time of Summer. But out of *Russia*, *Moxell*, *Bulgaria* the greater, and 30
Pascatir, that is, *Hungaria* the greater, and out of *Kerfis* (all which are Northerne Regions, and full of Woods) and also out of many other Countries of the North, which are subiect vnto them, the Inhabitants bring them rich and costly skins of diuers sorts (which I neuer saw in our Countries) wherewithall they are clad in Winter. And alwaies against Winter they make themselves two Gownes, one with the furre inward to their skinne, and another with the furre outward, to defend them from wind and snow, which for the most part are made of Wolves skins, or Foxe skins, or else of Papions. And when they sit within the house, they haue a finer Gowne to weare. The poorer sort make their vpper Gowne of Dogs or of Goats skins. When they goe to hunt for wild beasts, there meets a great companie of them together, and enui-
roning the place round about, where they are sure to find some game, by little and little they ap-
proach on all sides, till they haue gotten the wild beasts into the midst, as it were into a circle, 40
and then they discharge their Arrowes at them. Also they make themselves Breeches of skins. The rich *Tartars* sometimes furre their Gownes with pelluce or silke shag, which is exceeding soft, light, and warme. The poorer sort doe line their clothes with Cotton cloth, which is made of the finest wooll they can picke out, and of the courser part of the said wooll, they make Felt to couer their houses, and their chests, and for their bedding also. Of the same wooll, being mixed with one third part of Horse haire, they make all their cordage. They make also of the said Felt coverings for their stooles, and caps to defend their heads from the weather: for all which purposes they spend a great quantitie of their wooll. And thus much concerning the attire of the men.

The men shaue a plot foure square vpon the crownes of their heads, and from the two for- 50
most corners they shaue, as it were, two seames downe to their temples: they shaue also their temples, and the hinder part of their head, euen vnto the nape of the necke: likewise they shaue the fore-part of their scalpe downe to their foreheads, and vpon their foreheads they leaue a locke of haire reaching downe vnto their eye-browes: vpon the two hindmost corners of their heads, they haue two lockes also, which they twine and braid into knots and so bind and knit them vnder each eare one. Moreouer, their womens garments differ not from their mens, sauing that they are somewhat longer. But on the morrow after one of their wo-
men is married, shee shaues her scalpe from the middest of her head downe to her forehead, and weares a wide garment like vnto the hood of a Nunne, yea larger and longer in all parts then 60
a Nunnies hood, beeing open before, and girt vnto them vnder the right side. For heerein doe the *Tartars* differ from the *Turkes*: because the *Turkes* fasten their garments to their bodies on the left side: but the *Tartars* alwaies on the right side. They haue also an ornament for their heads, which they call, *Botta*, beeing made of the barke of a Tree, or of some such other ligh-
ter

ter matter as they can finde, which by reason of the thicknesse and roundnesse thereof cannot be holden but in both hands together: and it hath a square sharpe spire rising from the top thereof, being more then a cubite in length, and fashioned like vnto a Pinnacle. The said *Botta* they couer all ouer with a piece of rich Silke, and it is hollow within: and vpon the midst of the said spire or square top, they put a bunch of Quils, or of slender Canes, a cubite long and more: and the said bunch on the top thereof, they beautifie with Peacockes Feathers, and stones also. Great Ladies weare this kind of ornament vpon their heads, binding it strongly with a certaine Hat or Coyfe, which hath a hole in the crowne, fit for the spire to come through it: and vnder the foresaid ornament they couer the haire of their heads, which they gather vp round together from the hinder part thereof to the crowne, and so lap them vp in a knot or bun-
 10 dell within the said *Botta*, which afterward they bind strongly vnder their throats. Hereupon when a great company of such Gentlewomen ride together, and are beheld a farre off, they seeme to be Souldiers with Helmets on their heads, carrying their Lances vpright: for the said *Botta* appeareth like an Helmet with a Lance ouer it. All their Women sit on horse-backe, be-
 striding their Horses like men: and they binde their hoods or gownes about their waistes with a sky-coloured Silke Skarfe, and with another Skarfe they gird it about their breasts: and they binde also a piece of white Silke like a Musler or Maske vnder their eyes, reaching downe
 20 vnto their breasts. These Gentlewomen are exceeding fat, and the lesser their noses be, the fairer they are esteemed: they dawbe ouer their sweet faces with grease too shamefully: and they neuer lye in bed for their trauell of child-birth.

THe duties of Women are to driue Carts: to lay their houses vpon Carts, and to take them
 downe againe; to milke Kine, to make Butter and *Gry-vr*, to dresse skinnes, and to sew
 them, which they vsually sew with thread made of sinewes, for they diuide sinewes in slender
 threads, and then twine them into one long thread. They make Sandals and Socks, and other
 Garments. Howbeit they neuer wash any apparell: for they say, that God is then angry, and
 that dreadfull thunder will ensue, if washed garments be hanged forth to dry; yea, they beate
 such as wash, and take their garments from them. They are wonderfully afraid of thunder: for
 30 in the time of thunder they thrust all strangers out of their houses, and then wrapping them-
 selues in blacke Felt, they lye hidden therein, till the thunder be ouer-past. They neuer wash
 their dishes or bowles: yea, when their flesh is sodden, they wash the platter wherein it must
 be put, with scalding hot broath out of the pot, and then powre the said broath into the pot a-
 gaine. They make Felt also, and couer their houses therewith. The duties of the Men are, to
 make Bowes and Arrows, Scirrops, Bridles and Saddles: to build Houses and Carts, to keepe
 Horses, to milke Mares, to churme Cosmos and Mares Milke, and to make bags wherein to put
 it: they keepe Camels also, and lay burchens vpon them. As for Sheepe and Goats, they tend
 and milke them, as well the Men as the Women. With Sheeps Milke thicked and salted, they
 dresse and tan their Hides. When they will wash their hands or their heads, they fill their
 40 mouthes full of Water, and spowting it into their hands by little and little, they sprinkle their
 haire, and wash their heads therewith. As touching marriages, your Highnesse is to vnderstand,
 that no man can haue a Wife among them till he hath bought her: whereupon sometimes their
 Maids are very stale before they be married, for their Parents alwaies keepe them till they can
 sell them. They keepe the first and second degrees of Consanguinitie inuiolable, as wee doe:
 but they haue noregard of the degrees of Affinitie: for they will marrie together, or by successi-
 on, two Sisters. Their Widowes marrie not at all, for this reason; because they beleene, that all
 who haue serued them in this life, shall doe them seruice in the life to come also. Whereupon
 they are perswaded, that euery Widow after death shall returne vnto her owne Husband. And
 here-hence ariseth an abominable and filthy custome among them; namely, that the Sonne mar-
 rieth sometimes all his Fathers Wiues except his owne Mother: For the Court or House of the
 50 Father or Mother, falleth by inheritance alwaies to the younger Sonne. Whereupon he is to
 prouide for all his Fathers Wiues, because they are part of his Inheritance as well as his Fathers
 possessions. And then if he will, he vseth them for his owne Wiues: for he thinkes it no iniqui-
 tie or disparagement vnto himselfe, although they returne vnto his Father after death. Therefore
 when any man hath bargained with another for a Maid, the Father of the said Damosell makes
 him a feast: in the meane while she fleeth vnto some of her Kinsfolkes to hide her selfe. Then
 saith her Father vnto the Bridegroom: *Loe, my Daughten is yours, take her wherefoeuer you can
 finde her.* Then he and his friends seeke for her till they can find her, and hauing found her, he
 must take her by force and carry her (as it were) violently vnto his owne house.

Concerning their Lawes, or their Execution of Iustice, your Maiestie is to bee aduertised,
 that when two men fight, no third man dare intrude himselfe to part them. Yea, the Fa-
 ther dare not help his owne Sonne. But he that goes by the worst, must appeale vnto the Court
 of his Lord. And whofoeuer else offereth him any violence after appeale, is put to death. But

he must goe presently without all delay : and he that hath suffered the iniury, carrieth him (as it were) captiue. They punish no man with sentence of death, vnlesse he bee taken in the deed doing, or confesseth the same. But being accused by the multitude, they put him vnto extreame torture, to make him confesse the truth. They punish murder with death, and Carnall copulation also with any other besides his owne. By his owne, I meane his Wife or his Maid Seruant, for he may vse his Slaue as hee listeth himselfe. Hainous theft also or felony they punish with death. For a light theft, as namely, for stealing of a Ram, the partie (not being apprehended in the deed doing, but otherwise detected) is cruelly beaten. And if the Executioner layes on an hundred strokes, hee must haue an hundred staues; namely, for such as are beaten vpon sentence giuen in the Court. Also counterfeit Messengers, because they feine themselues to be Messengers, when as indeed they are none at all, they punish with death. Sacrilegious persons they vse in like manner (of which kind of Malefactors your Maiestie shall vnderstand more fully hereafter) because they esteeme such to bee Witches. When any man dyeth, they lament and howle most pittifully for him : and the said Mourners are free from paying any tribute for one whole yeare after. Also, whosoever is present at the house where any one growne to mans estate lyeth dead, he must not enter into the Court of *Mangu-Can*, till one whole yeare be expired. If it were a child deceased, hee must not enter into the said Court till the next moneth after. Neere vnto the graue of the partie deceased, they alwaies leaue one Cottage. If any of their Nobles (being of the stocke of *Chingis*, who was their first Lord and Father) deceaseth, his Sepulchre is vnkowne. And alwaies about those places where they interre their Nobles, there is one house of men to keepe the Sepulchres. I could not learne that they vse to hide Treasures in the graues of their dead. The *Comanians* build a great Toombe ouer their dead, and erect the Image of the dead partie thereupon, with his face towards the East, holding a drinking Cup in his hand before his Nauell. They erect also vpon the Monuments of rich men, Pyramides, that is to say, little sharpe houses or pinacles: and in some places I saw mightie Towers made of Bricke, in other places Pyramides made of stones, albeit there are no stones to be found thereabout. I saw one newly buried, in whose behalfe they hanged vp sixteene Horse-hides, vnto each quarter of the world foure, betweene certaine high posts: and they set besides his Graue Cosmos for him to drinke, and flesh to eate: and yet they said that he was baptized. I beheld other kinds of Sepulchres also towards the East: namely, large floores or pauements made of stone, some round, and some square, and then foure long stones pitched vpright, about the said pauement towards the foure Regions of the world. When any man is sicke, he lyeth in his bed, and causeth a signe to be set vpon his house, to signifie that there lyeth a sicke person there, to the end that no man may enter into the said house: whereupon none at all visit any sicke partie but his seruant onely. Moreouer, when any one is sicke in their great Courts, they appoint Watch-men to stand round about the said Court, who will not suffer any person to enter within the Precincts thereof. For they feare least euill spirits or winds should come together with the parties that enter in. They esteeme of Soothsayers, as of their Priests.

Sepulchres.

Chap. XI.
Of our first
entrance a-
mong the Tar-
tars, and of
their ingra-
titude.

Duke Sartach.

And being come amongst those barbarous people, me thought (as I said before) that I was entred into a new world: for they came flocking about vs on horse-backe, after they had made vs a long time to awaite for them sitting in the shadow, vnder their blacke carts. The first question which they demanded, was, whether we had euer bene with them heretofore, or no? And giuing them answere that we had not, they began impudently to beg our victuals from vs. And we gaue them some of our Bisket and Wine, which wee had brought with vs from the Towne of *Soldania*. And hauing drunke off one Flagon of our Wine, they demanded another; saying, That a man goeth not into the house with one foote. Howbeit we gaue them no more, excusing our selues that we had but a little. Then they asked vs, whence we came, and whither we were bound? I answered them with the words aboue mentioned: that wee had heard concerning Duke *Sartach*, that hee was become a *Christian*, and that vnto him our determination was to trauell, hauing your Maiesties Letters to deliuer vnto him. They were very inquisitiue to know whether I came of mine owne accord, or whither I were sent? I answered, that no man compelled me to come, neither had I come, vnlesse I my selfe had bene willing: and that therefore I was come according to mine owne will, and to the will of my Superior. I tooke diligent heed neuer to say that I was your Maiesties Embassadour. Then they asked what I had in my Carts; whether it were Gold or Siluer, or rich Garments to carrie vnto *Sartach*? I answered, that *Sartach* should see what we had brought, when we were once come vnto him, and that they had nothing to doe to aske such questions, but rather ought to conduct me vnto their Captaine, and that he, if he thought good, should cause me to be directed vnto *Sartach*: if not, that I would returne. For there was in the same Prouince one of *Baatu* his Kinsmen, called *Seacati*, vnto whom my Lord the Emperour of *Constantinople* had written Letters of request, to suffer me to passe through his Territorie. With this answere of ours they were satisfied, giuing vs Horses and Oxen, and two men to conduct vs. Howbeit, before they would allow vs the foresaid necessities for our iourney, they made vs to awaite a long while, begging our bread for their

their young Brats, wondring at all things which they saw about our Seruants, as their Kniues, Gloues, Purfes and Points, and desiring to haue them. I excused my selfe that wee had a long way to trauell, and that we must in no wise so soone deprive our selues of things necessary, to finish so long a iourney. Then they said, that I was a very varlet. True it is, that they tooke nothing by force from me: howbeit they will beg that which they see very importunately and shamelesly. And if a man bestow ought vpon them, it is but cost lost, for they are thanklesse wretches. They esteeme themselves Lords, and thinke that nothing should be denyed them by any man. If a man giues them nought, and afterwards stands in need of their seruice, they will do right nought for him. They gaue vs of their Cowes Milke to drink, after the Butter was churned out of it, being very sowre, which they call *Apram*. And so we departed from them. And in very deed it seemed to me that we were escaped out of the hands of Diuels. On the morrow we were come vnto the Captaine. From the time wherein we departed from *Soldania*, till wee arrived at the Court of *Sartach*, which was the space of two moneths, we neuer lay in House or Tent, but alwaies vnder the starry Canopie, and in the open Aire, or vnder our Carts. Neither yet saw we any Village, nor any mention of building where a Village had beene, but the graues of the *Comanians*, in great abundance. The same evening our guide which had conducted vs, gaue vs some *Cosmos*. After I had drunke thereof, I sweat most extreamely for the noueltie and strangenesse, because I neuer dranke of it before. Notwithstanding, me thought it was very sauiory, as indeed it was.

ON the morrow after we met with the Carts of *Scacatai* laden with houses, and me thought that a mightie Citie came to meete me. I wondred also at the great multitude of huge Droues of Oxen; and Horses, and at the Flockes of Sheepe. I could see but a few men that guided all these matters: whereupon I inquired how many men hee had vnder him, and they told me that he had not aboue five hundred in all, the one halfe of which number we were come past, as they lay in another Lodging. Then the Seruant which was our Guide told mee, that I must present somewhat vnto *Scacatai*: and so he caused vs to stay, going himselfe before to giue notice of our comming. By this time it was past three of the clocke, and they vnloaded their houses neere vnto a certayne water: And there came vnto vs his Interpreter, who being aduertised by vs that we were neuer there before, demanded some of our victuals, and wee yielded vnto his request. Also hee required of vs some garment for a Reward, because hee was to interpret our Sayings vnto his Master. Howbeit, we excused our selues as well as we could. Then hee asked vs, what we would present vnto his Lord: And we tooke a flagon of Wine, and filled a Maund with Bisket, and a Platter with Apples and other Fruits. But he was not contented therewith, because we brought him not some rich garment. Notwithstanding, wee entred so into his presence with feare and bashfulnesse. Hee sate vpon his bed holding a Citron in his hand, and his Wife sate by him: who (as I verily thinke) had cut and pared her Nose betweene the Eyes, that she might seeme to be more flat and saddle-nosed: for she had left her selfe no Nose at all in that place, hauing anoynted the very same place with a blacke Oyntment, and her Eye-browes also: which sight seemed most vgly in our Eyes. Then I rehearsed vnto him the same words, which I had spoken in other places before. For it stood vs in hand to vse one and the same speech in all places. For we were well fore-warned of this circumstance by some which had beene amongst the *Tartars*, that we should neuer vary in our Tale. Then I besought him, that he would vouchsafe to accept that small gift at our hands, excusing my selfe that I was a Monke, and that it was against our profession to possesse Gold, or Siluer, or precious Garments, and therefore that I had not any such thing to giue him, howbeit he should receiue some part of our victuals in stead of a blessing. Hereupon he caused our Present to be receiued, and immediately distributed the same among his men, who were met together for the same purpose, to drinke and make merry. I deliuered also vnto him the Emperour of *Constantinople* his Letters: (this was eight dayes after the Feast of Ascension) who sent them forth-with to *Soldania*, to haue them interpreted there: for they were written in *Greeke*, and he had none about him that was skilfull in the *Greeke* Tongue. He asked vs also whether we would drinke any *Cosmos*, that is to say, Mares Milke: (For those that are Christians among them, as namely, the *Russians*, *Grecians*, and *Alanians*, who keepe their owne Law very strictly, will in no case drinke thereof, yea, they account themselves no Christians after they haue once drunke of it, and their Priests reconcile them vnto the Church, as if they had renounced the Christian Faith.) I gaue him answere, that wee had as yet sufficient of our owne to drinke, and that when our drinke fayled vs, we must be constrained to drinke such as should bee giuen vnto vs. Hee enquired also what was contayned in our Letters, which your Maiestie sent vnto *Sartach*? I answered: that they were sealed vp, and that there was nothing contayned in them, but good and friendly words. And he asked what words wee would deliuer vnto *Sartach*? I answered: the words of Christian Faith. Hee asked againe what these words were? For he was very desirous to heare them. Then I expounded vnto him as well as I could, by mine Interpreter, (who had no wit nor any vtterance of speech) the Apostles Creed. Which after hee had heard, holding his peace, he shooke his head. Then hee assigned vnto vs two men, who

who should giue attendance vpon our selues, vpon our Horses, and vpon our Oxen. And hee caused vs to ride in his company, till the Messenger whom he had sent for the Interpretation of the Emperours Letters, was returned. And so wee trauelled in his company till the morrow after Pentecost.

Chap. 13.
How the Alanians came vnto vs on Pentecost or Whitsun Eue.
* Or, Akas.

Cloth is the chiefe Merchandise in Tartarie.

Vpon the Euen of Pentecost, there came vnto vs certayne *Alanians*, who are there called *Acias*, being Christians after the manner of the *Grecians*, vting *Greeke* Bookes and *Grecian* Priests: howbeit, they are not Schismatikes as the *Grecians* are, but without acception of persons, they honour all Christians. And they brought vnto vs foddren flesh, requesting vs to eat of their meate, and to pray for one of their company beeing dead. Then I said, because it was the Euen of so great and so solemne a Feast Day, that wee would not eate any flesh for that time. And I expounded vnto them the Solemnitie of the said Feast, whereat they greatly reioyced: for they were ignorant of all things appertayning to Christian Religion, except only the Name of Christ. They and many other Christians, both *Russians*, and *Hungarians* demanded of vs, whether they might be saued or no, because they were constrained to drinke *Cosmos*, and to eate the dead carcases of such things, as were slaine by the *Saracens*, and other Infidels: Which euen the *Greeke* and *Russian* Priests themselves also esteeme as things strangled or offered vnto Idols: because they were ignorant of the times of Fasting, neither could they haue obserued them albeit they had knowne them. Then instructed I them aswell as I could and strengthened them in the Faith. As for the flesh which they had brought, wee reserued it vntill the feast day. For there was nothing to be sold among the *Tartars* for Gold and Siluer, but onely for Cloath and Garments, of the which kind of Merchandize wee had none at all. When our Seruants offered them any Coyne, called *Tperpera*, they rubbed it with their fingers, and put it vnto their noses, to try by the smell whether it were Copper or no. Neither did they allow vs any food but Cowes Milke onely, which was very sowre and filthy. There was one thing most necessary greatly wanting vnto vs. For the water was so foule and muddy, by reason of their Horses, that it was not meete to be drunke. And but for certaine Bisket, which was by the goodnesse of God remaining vnto vs, we had vndoubtedly perished.

Chap. 14.
Of a Saracen which said that he would be baptised: and of certaine men which seemed to bee Lepers.

Salt-pits.
Ten dayes
Iourney.

Vpon the day of Pentecost there came vnto vs a certaine *Saracen*, vnto whom, as he talked with vs, we expounded the Christian Faith. Who (hearing of Gods benefits exhibited vnto mankind, by the Incarnation of our Sauour Christ, and the Resurrection of the dead, and the Iudgement to come, and that in Baptisme was a washing away of sinnes) said, that hee would be baptised. But when wee prepared our selues to the baptizing of him, hee suddenly mounted on horse-back, saying, that he would go home and consult with his wife what were best to be done. And on the morrow after he told vs, that he durst in no case receiue Baptisme, because then he should drinke no more *Cosmos*. For the Christians of that place affirme, that no true Christians ought to drinke thereof: and that without the said liquor hee could not liue in that Desart. From which opinion, I could not for my life remoue him. Wherefore be it knowne of a certaintie vnto your Highnesse, that they are much estranged from the Christian Faith, by reason of that opinion which hath beene broached and confirmed among them by the *Russians*, of whom there is a great multitude in that place. The same day *Scacatai* the Captaine aforesaid gaue vs one man to conduct vs to *Sartach*, and two other to guide vs vnto the next Lodging, which was distant from that place siue dayes Iourney for Oxen to trauell. They gaue vnto vs also a Goate for victuals, and a great many Bladders of Cowes Milke, and but a little *Cosmos*, because it is of so great estimation among them. And so taking our Iourney directly toward the North, mee thought that wee had passed through one of Hell gates. The Seruants which conducted vs began to play the bold Theeues with vs, seeing vs take so little heed vnto our selues. At length hauing lost much by there Theeuery, harme taught vs wisdom. And then wee came vnto the extremitie of that Prouince, which is fortified with a Ditch from one Sea vnto another: without the bounds whereof their Lodging was situate. Into the which, so soone as wee had entred, all the Inhabitants there seemed vnto vs to be infected with Leprosie: for certayne base fellowes were placed there to receiue Tribute of all such as tooke Salt out of the Salt-pits aforesaid. From that place they told vs that we must trauell fifteene dayes Iourney, before we should find any other people. With them we dranke *Cosmos*, and gaue vnto them a basket full of Fruits and of Bisket. And they gaue vnto vs eight Oxen and one Goate, to sustayne vs in so great a Iourney, and I know not how many bladders of Milke. And so changing our Oxen, we tooke our Iourney which wee finished in tenne dayes, arriuing at another Lodging: neither found we any water all that way, but onely in certayne Ditches made in the Valleyes, except two Riuer. And from the time wherein wee departed out of the foresaid Prouince of *Gasaria*, we trauelled directly East-ward, hauing a Sea on the South-side of vs, and a waste Desart on the North, which Desart, in some places, reacheth twentie dayes Iourney in breadth, and there is neither Tree, Mountayne, nor Stone therein. And it is most excellent Pasture. Here the *Comanians*, which were called *Capthac*, were wont to feed their Cattell. Howbeit by the *Dutch-*

men they are called *Valani*, and the Province it selfe *Valania*. But *Isidore* calleth all that tract of Land stretching from the River of *Tanais* to the Lake of *Maotis*, and so along as farre as *Danubius*, the Countrey of *Alania*. And the same land continueth in length from *Danubius* vnto *Tanais* (which diuideth *Asia* from *Europe*) for the space of two moneths iourney, albeit a man should ride post as fast as the *Tartars* vie to ride: and it was all ouer inhabited by the *Comanians*, called *Capthas*: yea, and beyond *Tanais*, as farre as the River of *Edil*, or *Volga*: the space betweene the two which Rivers is a great and long iourney to bee trauelled in ten daies. To the North of the same Province lyeth *Russia*, which is full of wood in all places, and stretcheth from *Polonia* and *Hungaria*, euen to the River of *Tanais*: and it hath beene wasted all ouer by the *Tartars*, and as yet is daily wasted by them.

Valani.
The length of
Comania.
Russia.

They preferre the *Saracens* before the *Russians*, because they are Christians, and when they are able to giue them no more gold nor siluer, they drive them and their Children like flocks of Sheepe into the wilderness, constraining them to keepe their Cattell there. Beyond *Russia* lyeth the Countrey of *Prussia*, which the Dutch Knights of the order of *Saint Marie* Hospitall of *Ierusalem*, haue of late wholly conquered and subdued. And in very deede, they might easily win *Russia*, if they would put to their helping hand. For if the *Tartars* should but once know that the great Priest, that is to say, the Pope did cause the Ensigne of the Crosse to be displayed against them, they would flie all into their Desart and solitarie places. Wee therefore went on towards the East, seeing nothing but Heauen and Earth, and sometimes the Sea on our right hand, called the Sea of *Tanais*, and the Sepulchres of the *Comanians*, which appeared vnto vs two leagues off, in which places they were wont to burie their kindred altogether. So long as we were traueilling through the Desart, it went reasonably well with vs. For I cannot sufficiently expresse in words the irkesome and tedious troubles which I sustained, when I came at any of their places of abode. For our Guide would haue vs goe in vnto euery Captaine with a present, and our expences would not extend so farre. For we were euery day eight persons of vs spending our wayfaring prouision, for the *Tartars* seruants would all of them eate of our victuals. We our selues were five in number, and the seruants our Guides were three, two to drive our Carts, and one to conduct vs vnto *Sartach*. The flesh which they gaue vs was not sufficient for vs; neither could we find any thing to be bought for our money. And as we fate vnder our Carts in the coole shadow, by reason of the extreame and vehement heate which was there at that time, they did so importunately and shamelesly intrude themselves into our company, that they would euen tread vpon vs, to see whatsoeuer things we had. Hauiing list at any time to ease themselves, the filthie Lozels had not the manners to withdraw themselves farther from vs, then a Beane can be cast. Yea, like vile slouens they would lay their tailes in our presence, while they were yet talking with vs: many other things they committed, which were most tedious and loathsome vnto vs. But aboue all things it grieved me to the very heart, that when I would utter ought vnto them, which might tend to their edification, my foolish interpreter would say: you should not make me become a Preacher now; I tell you, I cannot nor I will not rehearse any such words. And true it was which he said, for I perceived afterward, when I began to haue a little smattering in the language, that when I spake one thing, hee would say quite another, whatsoeuer came next vnto his witleffe tongues end. Then seeing the danger I might incur in speaking by such an Interpreter, I resolved much rather to hold my peace, and thus we trauelled with great toile from lodging to lodging, till at the length, a few daies before the Feast of *Saint Marie Magdalene*, we arriued at the banke of the mightie River *Tanais*, which diuideth *Asia* from *Europa*, euen as the River *Nilus* of *Egypt* disioyneth *Asia* from *Africa*. At the same place where we arriued, *Baatu* and *Sartach* did cause a certaine Cottage to be built vpon the Easterne banke of the River, for a companie of *Russians* to dwell in, to the end, they might transport Ambassadors and Merchants in Ferrie-boates ouer that part of the River. First, they ferried vs ouer, and then our Carts, putting one wheele into one Liter, and the other wheele into another Liter, hauiing bound both the Liters together, and so they rowed them ouer. In this place our Guide played the foole most extreamely. For he imagining that the said *Russians*, dwelling in the Cottage, should haue provided vs Horses, sent home the Beasts which wee brought with vs, in another Cart, that they might returne vnto their owne Masters. And when we demanded to haue some beasts of them, they answered, that they had a priuiledge from *Baatu*, whereby they were bound to none other seruice, but onely to ferrie ouer Goers and Commers: and that they receiued great tribute of Merchants in regard thereof. Wee staid therefore by the said Rivers side three daies. The first day they gaue vnto vs a great fresh Turbut: the second day they bestowed Rye bread, and a litle flesh vpon vs, which the Purueyer of the Village had taken vp at euery house for vs: and the third day dried Fishes, which they haue there in great abundance. The said River was euen as broade in that place, as the River of *Sein* is at *Paris*. And before wee came there, wee passed ouer many goodly waters, and full of Fish: howbeit the barbarous and rude *Tartars* know not how to take them: neither doe they make any reckoning of any Fish, except it bee so great, that they may prey vpon the flesh thereof, as vpon the flesh of a Ram.

The breadth of
Tanais.

This

He is much deceived.

About the beginning of August, the Tartars returne Southward.

This Riuer is the limit of the East part of *Russia*, and it springeth out of the Fennes of *Maoris*, which Fennes stretch vnto the North Ocean. And it runneth Southward into a certaine great Sea seuen hundred miles about, before it falleth into the Sea called *Pontus Euxinus*. And all the Riuer which we passed ouer, ran with full streame into those quarters. The foresaid Riuer hath great store of wood also growing vpon the West side thereof. Beyond this place the *Tartars* ascend no farther vnto the North: for at that season of the yeere, about the first of August, they begin to returne backe vnto the South. And therefore there is another Cottage somewhat lower where Passengers are ferried ouer in Winter time, and in this place we were driuen to great extremitie, by reason that we could get neither Horses, nor Oxen for any money. At length, after I had declared vnto them, that my comming was to labour for the common good of all Christians, they sent vs Oxen and Men; howbeit wee our selues were faine to trauell on foot. At this time they were reaping their Rye. Wheate prospereth not well in that soile. They haue the seed of Millium in great abundance. The *Russian* women attire their heads like vnto our women. They embroide their Safegards or Gownes on the outside, from their feet vnto their knees with partie-coloured or grey stuffe. The *Russian* men weare Caps like vnto the *Dutch* men. Also they weare vpon their heads certaine sharpe and high-crowned Hats made of Felt, much like vnto a Sugar-loafe. Then trauided we three daies together, not finding any people. And when our selues and our Oxen were exceeding wearie and faint, not knowing how farre off we should find any *Tartar*, on the sudden there came two Horses running towards vs, which we tooke with great ioy, and our Guide and Interpreter mounted vpon their backs, to see how farre off they could descrie any people. At length, vpon the fourth day of our iourney, hauing found some Inhabitants, we reioyced like Sea faring men, which had escaped out of a dangerous Tempest, and had newly recovered the Hauens. Then hauing taken fresh Horses, and Oxen, we passed on from lodging to lodging, till at the last, vpon the second of the Kalends of August, we arrived at the habitation of Duke *Sartach* himselfe.

Chap. 17.
Of the Court of Sartach, and of the magnificence thereof.
Coiat, the Nestorian.

THE Region lying beyond *Tanais*, is a very goodly Countrey, hauing store of Riuer and Woods toward the North part thereof. There are mightie huge Woods which two sorts of people doe inhabit. One of them is called *Moxel*, being meere Pagans, and without Law. They haue neither Townes nor Cities, but onely Cottages in the Woods. Their Lord and a great part of themselves were put to the Sword in high *Germanie*. Whereupon they highly commend the braue courage of the *Almans*, hoping as yet to be deliuered out of the bondage of the *Tartars*, by their meanes. If any Merchant come vnto them, hee must prouide things necessary for him, with whom hee is first of all entertained, all the time of his abode among them. If any lyeth with another mans wife, her husband, vlesse he be an eye-witnesse thereof, regardeth it not: for they are not iealous ouer their wiues. They haue abundance of Hogs, and great store of Honie and Waxe, and diuers sorts of rich and costly Skins, and plentie of Faulcons. Next vnto them are other people called *Merclas*, which the *Latines* call *Merdui*, and they are *Saracens*. Beyond them is the Riuer of *Etilia*, or *Volga*, which is the mightiest Riuer that euer I saw. And it issueth from the North part of *Bulgaria* the greater, and so trending along Southward, disimboqueth into a certaine Lake, containing in circuit the space of foure moneths trauell, whereof I will speake hereafter. The two foresaid Riuer, namely, *Tanais* and *Etilia*, otherwise called *Volga*, towards the Northerne Regions, through the which we trauided, are not distant asunder aboue ten daies iourney, but Southward they are diuided a great space one from another. For *Tanais* descendeth into the Sea of *Pontus*: *Etilia* maketh the foresaid Sea or Lake, with the helpe of many other Riuer, which fall thereinto out of *Persia*. And wee had to the South of vs huge high Mountaines, vpon the sides thereof towards the said Defart, doe the people called *Cergis*, and the *Alani* or *Acas* inhabit, who are as yet Christians, and wage warre against the *Tartars*. Beyond them, next vnto the Sea or Lake of *Etilia*, there are certaine *Saracens* called *Lesgi*, who are in subiection vnto the *Tartars*. Beyond these is *Porta ferrea*, or the Iron gate, now called *Derbent*, which *Alexander* built to exclude the barbarous Nations out of *Persia*. Concerning the situation whereof, your Maiestie shall vnderstand more about the end of this Treatise: for I trauided in my returne by the very same place. Betweene the two foresaid Riuer, in the Regions through the which we passed, did the *Comanians* of old time inhabit, before they were overrun by the *Tartars*.

AND wee found *Sartach* lying within three daies iourney of the Riuer *Etilia*: whose Court seemed vnto vs to be very great. For he himselfe had six wiues, and his eldest sonne also had three wiues: euery one of which women hath a great house, and they haue each one of them about two hundred Carts. Our guide went vnto a certaine *Nestorian* named *Coiat*, who is a man of great authoritie in *Sartachs* Court. He made vs to goe very farre vnto the Lords gate. For so they call him who hath the Office of entertayning Ambassadors. In the euening, *Coiat* commanded vs to come vnto him. Then our Guide began to enquire what wee would present him withall, and was exceedingly offended, when hee saw that wee had nothing ready to present.

Chap. 18.
How they were
giuen in
charge to goe
vnto Baatu the
Father of Sar-
tack.

THE next morning betimes came vnto vs a certayne Priest, who was brother vnto Coiat, requesting to haue our boxe of Chrisme, because Sartach (as he said) was desirous to see it: and so we gaue it him. About Euentide Coiat sent for vs, saying: My Lord your King wrote good words vnto my Lord and Master Sartach. Howbeit there are certayne matters of difficultie in them, concerning which he dare not determine ought, without the aduice and counsell of his Father. And therefore of necessitie you must depart vnto his Father, leauing behind you the two Carts, which you brought hither yesterday with Vestments and Bookes, in my custodie: because my Lord is desirous to take more diligent view thereof. I presently suspecting what mischief might ensue by his couetousnesse, said vnto him: Sir, we will not onely leaue those with you, but the two other Carts also, which we haue in our possession, will wee commit vnto your custodie. You shall not (quoth he) leaue those behind you, but for the other two Carts first named, wee will satisfie your request. I said that this could not conueniently bee done: but needs we must leaue all with him. Then he asked, whether we meant to tarrie in the Land? I answered: If you thoroughly vnderstand the Letters of my Lord the King, you know that we are euen so determined. Then he replied, that we ought to bee patient and lowly: and so wee departed from him that Euening. On the morrow after he sent a Nestorian Priest for the Carts, and wee caused all the foure Carts to be deliuered. Then came the foresaid brother of Coiat to meet vs, and separated all those things, which we had brought the day before vnto the Court, from the rest, namely, the Bookes and Vestments, and tooke them away with him. Howbeit Coiat had commanded, that we should carrie those Vestments with vs, which we wore in the presence of Sartach, that we might put them on before Baatu, if need should require: but the said Priest tooke them from vs by violence, saying: thou hast brought them vnto Sartach, and wouldest thou carrie them vnto Baatu? And when I would haue rendred a reason, hee answered: bee not too talkatiue, but goe your wayes. Then I saw that there was no remedie but patience: for wee could haue no access vnto Sartach himselte, neither was there any other, that would doe vs Iustice. I was afraid also in regard of the Interpreter, least he had spoken other things then I said vnto him: for his will was good, that wee should haue giuen away all that we had. There was yet one comfort remayning vnto mee: for when I once perceiued their couetous intent, I conueyed from among our Bookes the Bible, and the Sentences, and certayne other Bookes which I made speciall account of. Howbeit, I durst not take away the Psalter of my Soueraigne Ladie the Queene, because it was too well knowne, by reason of the Golden Pictures therein. And so we returned with the two other Carts vnto our Lodging. Then came hee that was appointed to be our Guide vnto the Court of Baatu, willing vs to take our Iourney in all post-haste: vnto whom I said, that I would in no case haue the Carts to goe with me. Which thing he declared vnto Coiat. Then Coiat commanded, that wee should leaue them and our Seruant with him: And we did as he commanded. And so traouelling directly East-ward towards Baatu, the third day we came to Etilia or Volga: the streames whereof when I beheld, I wondred from what Regions of the North such huge and mightie waters should descend. Before we were departed from Sartach, the foresaid Coiat, with many other Scribes of the Court said vnto vs: doe not make report that our Lord is a Christian, but a Moal. Because the name of a Christian seemeth vnto them to be the name of some Nation. So great is their pride, that albeit they beleeue perhaps some things concerning Christ, yet will they not be called Christians, being desirous that their owne name, that is to say, Moal should be exalted aboue all other names. Neither will they be called by the name of Tartars. For the Tartars were another Nation, as I was informed by them.

They are
come as farre
as Volga.

The Tartars
will be called
Moal.

Chap. 19.
How Sartach,
and Mangucan,
and Ken-Can doe reuerence vnto Christians:
This Historie
of Presbyter Iohn in the
North-east, is
alleged at
large by Gerardus Mercator in
his generall
Map.
From whence
the Turkes first
sprang.
An Ocean Sea.
Nayman.
Presbyter Iohn.

AT the same time when the Frenchmen tooke Antioch, a certayne man named Con Can, had Dominion ouer the Northerne Regions, lying thereabouts. Con is a proper name: Can is a name of authoritie or dignitie, which signifieth a Diuiner or Sooth-sayer. All Diuiners are called Can amongst them. Whereupon their Princes are called Can, because that vnto them belongeth the gouernment of the people by Diuination. We doe read also in the Historie of Antiochia, that the Turkes sent for ayde against the Frenchmen, vnto the Kingdome of Con Can. For out of those parts the whole Nation of the Turkes first came. The said Con was of the Nation of Kara-Catay. Kara signifieth blacke, and Catay is the name of a Countrey. So that Kara-Catay signifieth the blacke Catay. This name was giuen to make a difference betweene the foresaid people, and the people of Catay inhabiting East-ward ouer against the Ocean Sea: concerning whom your Maiestie shall vnderstand more hereafter. These Catayans dwelt vpon certayne Alpes, by the which I trauelled. And in a certayne plaine Countrey within those Alpes, there inhabited a Nestorian shephard, being a mightie Gouernour ouer the people called Tayman, which were Christians, following the Sect of Nestorius. After the death of Con Can, the said Nestorian exalted himselte to the Kingdome, and they called him King Iohn, reporting ten times more of him then was true. For so the Nestorians which come out of those parts, vse to doe. For they blaze abroad great rumours, and reports vpon iust nothing. Whereupon they gaue out concerning Sartach, that he was become a Christian, and the like also they reported

ted concerning *Mangu Can*, and *Ken Can*: namely, because these *Tartars* make more account of Christians, then they doe of other people, and yet in very deed, themselves are no Christians. So likewise there went forth a great report concerning the said King *Iohn*. Howbeit, when I trauelled along by his Territories, there was no man that knew any thing of him, but onely a few *Nestorians*. In his Pastures or Territories dwelleth *Ken Can*, at whose Court Frier *Andrew* was. And I my selfe passed by it at my returne. This *Iohn* had a Brother, being a mightie man also, and a Shepheard like himselfe, called *Vut*, and he inhabited beyond the *Alpes* of *Cara Catay*, being distant from his Brother *Iohn*, the space of three weekes iourney. He was Lord ouer a certaine Village, called *Cara Carum*, hauing people also for his Subjects, named *Crit*, or *Merkis*, who were Christians of the Sect of *Nestorius*. But their Lord abandoning the worship of Christ, following after Idols, retaining with him Priests of the said Idols, who all of them are Worshippers of Devils and Sorcerers. Beyond his Pastures, some tenne or fiftene dayes iourney, were the Pastures of *Moal*, who were a poore and beggerly Nation, without Gouvernor, and without Law, except their Sooth-sayings, and their Diuinations, vnto the which detestable studies, all in those parts doe apply their minds. Neere vnto *Moal* were other poore people, called *Tartars*. The foresaid King *Iohn* dyed without Issue Male, and thereupon his Brother *Vut* was greatly enriched, and caused himselfe to be named *Can*: and his Droues and Flockes raunged euen vnto the Borders of *Moal*. About the same time there was one *Cyngis*, a Blacke-Smith, among the people of *Moal*. This *Cyngis* stole as many Cattell from *Vut Can*, as he could possibly get: insomuch, that the Shepheards of *Vut* complained vnto their Lord. Then prouided he an Armie, and marched vp into the Countrey of *Moal*, to seeke for the said *Cyngis*. But *Cyngis* fled among the *Tartars*, and hid himselfe amongst them. And *Vut* hauing taken some spoiles both from *Moal*, and also from the *Tartars*, returned home. Then spake *Cyngis* vnto the *Tartars*, and vnto the people of *Moal*, saying: Sirs, because we are destitute of a Gouvernor and Captaine, you see how our Neighbours doe oppresse vs. And the *Tartars* and *Moals* appointed him to be their Chieftaine. Then hauing secretly gathered together an Armie, hee brake in suddenly vpon *Vut*, and ouercame him, and *Vut* fled into *Cataya*. At the same time was the Daughter of *Vut* taken, which *Cyngis* married vnto one of his Sonnes, by whom she conceived, and brought forth the great *Can*, which now reigneth, called *Mangu-Can*. Then *Cyngis* sent the *Tartars* before him in all places where he came: and thereupon was their name published and spread abroad: for in all places the people would cry out: *Loe, the Tartars come, the Tartars come*. Howbeit, through continuall warres, they are now, all of them in a manner, consumed and brought to nought. Whereupon the *Moals* in deuour what they can, to extinguish the name of the *Tartars*, that they may exalt their owne name. The Countrey wherein they first inhabited, and where the Court of *Cyngis Can* as yet remaineth, is called *Mancherule*. But because *Tartaria* is the Region, about which they haue obtained their Conquests, they esteeme that as their royall and chiefe Citie, and there for the most part doe they elect their great *Can*.

40 **N**OW, as concerning *Sartach*, whether hee beleuees in Christ or no, I know not. This I am sure of, that he will not be called a Christian. Yea, rather he seemeth vnto mee to deride and skoffe at Christians. He lyeth in the way of the Christians, as namely, of the *Russians*, the *Valachians*, the *Bulgarians* of *Bulgaria* the lesse, the *Soldaians*, the *Kerkis*, and the *Alaniens*: who all of them passe by him, as they are going to the Court of his Father *Baatu*, to carrie gifts: whereupon he is more in league with them. Howbeit, if the *Saracens* come, and bring greater gifts then they, they are dispatched sooner. He hath about him certaine *Nestorian* Priests, who pray vpon their Beades, and sing their deuotions. Also, there is another vnder *Baatu*, called *Berta*, who feedeth his Cattell toward *Porta Ferrea*, or *Derbent*, where lyeth the passage of all those *Saracens* which come out of *Persia*, and out of *Turkie* to goe vnto *Baatu*, and passing by, they giue rewards vnto him. And he professeth himselfe to be a *Saracen*, and will not permit Swines flesh to be eaten in his Dominions. Howbeit, at the time of our returne, *Baatu* commanded him to remooue himselfe from that place, and to inhabite vpon the East side of *Volga*: for he was vnwilling that the *Saracens* Messengers should passe by the said *Berta*, because he saw it was not for his profit. For the space of foure daies while wee remained in the Court of *Sartach*, wee had not any victuals at all allowed vs, but once onely a little *Cosmos*. And in our iourney betweene him and his Father, wee trauelled in great feare. For certaine *Russians*, *Hungarians*, and *Alaniens*, being Seruants vnto the *Tartars*, (of whom they haue great multitudes among them) assemble themselves twentie or thirtie in a company, and so secretly in the night conueying themselves from home, they take Bowes and Ar-
60 rows with them, and whomsoever they finde in the night season, they put him to death, hiding themselves in the day time. And hauing tyred their Horses, they goe in the night vnto a company of other Horses feeding in some Pasture, and change them for new, taking with them also one or two Horses besides, to eate them when they stand in neede. Our guide therefore was sore afraid, least we should haue met with such companions.

Of the Rus-
sians, Hungari-
ans, and Alani-
ans: and of the
Caspian Sea.

Or, Berta.
Berta.

In this Iourney we had dyed for Famine, had wee not carryed some of our Bisket with vs. At length we came vnto the mightie Riuer of *Etilia*, or *Volga*. For it is foure times greater, then the Riuer of *Sein*, and of a wonderfull depth: and issuing forth of *Bulgaria* the greater, it runneth into a certayne Lake or Sea, which of late they call the *Hircan* Sea, according to the name of a certayne Citie in *Persia*, standing vpon the shoare thereof. Howbeit *Isidore* calleth it the *Caspian* Sea. For it hath the *Caspian* Mountaynes and the Land of *Persia* situate on the South-side thereof: and the Mountaynes of *Musibet*, that is to say, of the people called *Assassini* towards the East, which Mountaynes are conioyned vnto the *Caspian* Mountaynes: but on the North-side thereof lyeth the same Desart, wherein the *Tartars* doe now inhabit. Howbeit heretofore there dwelt certayne people called *Changla*. And on that side it receiueth the streames of *Etilia*, which Riuer increaseth in Summer time, like vnto the Riuer *Nilus* in *Egypt*. Vpon the West part thereof, it hath the Mountaynes of *Alani*, and *Lesgi*, and *Porta ferrea*, or *Derbent*, and the Mountaynes of *Georgia*. This Sea therefore is compassed in on three sides with the Mountaynes, but on the North-side with plaine ground. Frier *Andrew* in his Iourney trauelled round about two sides thereof, namely, the South and the East-sides: and I my selfe about other two, that is to say, the North-side in going from *Baatu* to *Mangu-Can*, and in returning likewise: and the West-side in comming home from *Baatu* into *Syria*. A man may trauell round about it in foure moneths. And it is not true which *Isidore* reporteth, namely, that this Sea is a Bay or Gulfe comming forth of the Ocean: for it doth, in no part thereof, ioyne with the Ocean, but is enuironed on all sides with Land.

signifieth the
midst.

At the Region extending from the West shoare of the foresaid Sea, where *Alexanders* Iron-gate, otherwise called the Citie of *Derbent*, is situate, and from the Mountaynes of *Alania*, all along by the Fennes of *Maotis*, whereinto the Riuer of *Tanais* falleth, and so forth, to the North Ocean, was wont to be called *Albania*. Of which Countrey *Isidore* reporteth, that there bee Dogges of such an huge stature, and so fierce, that they are able in fight to match Buls, and to master Lions. Which is true, as I vnderstand by diuers, who told me, that there towards the North Ocean, they make their Dogges to draw in Carts like Oxen, by reason of their bignesse and strength. Moreouer, vpon that part of *Etilia* where we arriued, there is a new Cottage built, wherein they haue placed *Tartars* and *Russians* both together, to ferrie ouer, and transport Messengers going and comming, to and fro the Court of *Baatu*. For *Baatu* remaineth vpon the farther side towards the East. Neither ascendeth hee in Summer time more Northward then the foresaid place where we arriued, but was euen then descending to the South. From January vntill August, both he and all other *Tartars* ascend by the banks of Riuers, towards cold and Northerly Regions; and in August they begin to returne backe againe. Wee passed downe the streame therefore in a Barke, from the foresaid Cottage vnto his Court. From the same place vnto the Villages of *Bulgaria* the greater, standing toward the North, it is fise dayes Iourney. I wonder what Deuill carried the Religion of *Mahomet* thither. For, from *Derbent*, which is vpon the extreme borders of *Persia*, it is aboue thirtie dayes Iourney to passe ouerthwart the Desart, and so to ascend by the banke of *Etilia*, into the foresaid Countrey of *Bulgaria*. All which way there is no Citie, but onely certayne Cottages neere vnto that place where *Etilia* falleth into the Sea. Those *Bulgarians* are most wicked *Saracens*, more earnestly professing the damnable Religion of *Mahomet*, then any other Nation whatsoeuer. Moreouer, when I first beheld the Court of *Baatu*, I was astonied at the sight thereof: for his Houses or Tents seemed as though they had beene some huge and mightie Citie, stretching out a great way in length, the people ranging vp and downe about it for the space of some three or foure leagues. And euen as the people of *Israel* knew euery man, on which side of the Tabernacle to pitch his Tent: euen so euery one of them knoweth right well, towards what side of the Court hee ought to place his house when he takes it from off the Cart. Whereupon the Court is called in their Language *Horda*, which signifieth, the midst: because the Gouvernour or Chieftaine among them dwells alwayes in the midst of his people: except onely that directly towards the South no subiect or inferior person placeth himselfe, because towards that Region the Court gates are set open: but vnto the right hand, and the left hand they extend themselves as farre as they will, according to the conueniencie of places, so that they place not their houses directly opposite against the Court. At our arrivall wee were conducted vnto a *Saracen*, who provided not for vs any victuals at all. The day following, we were brought vnto the Court: and *Baatu* had caused a large Tent to be erected, because his house or ordinary Tent could not contayne so many men and women as were assembled. Our Guide admonished vs not to speake, till *Baatu* had giuen vs commandement so to doe, and that then we should speake our minds briefly. Then *Baatu* demanded whether your Maiestie had sent Ambassadors vnto him, or no? I answered, that your Maiestie had sent Messengers to *Khan-Can*, and that you would not haue sent Messengers vnto him, or Letters vnto *Sartach*, had not your Highnesse beene perswaded that they were become Christians: because you sent not vnto them for any feare, but onely for congratulation, and courtesies sake, in regard that you heard they were conuerted to Christianitie. Then led he vs vnto his Pavilion: and we were charged

charged not to touch the cords of the Tent, which they account in stead of the threshold of the houle. There we stood in our habit bare-footed, and bare-headed, and were a great and strange spectacle in their eyes. For indeed Frier *John de Plano Carpini*, had beene there before my coming: howbeit, because he was the Popes Messenger, he changed his habit that hee might not be contemned. Then wee were brought into the very midst of the Tent, neither required they of vs to doe any reuerence by bowing our knees, as they vse to doe of other Messengers. Wee stood therefore before him for the space wherein a man might haue rehearsed the Psalme, *Miserere mei Deus*: and there was great silence kept of all men. *Baatu* himselfe sate vpon a seat long and broad like vnto a Bed, gilt all ouer, with three staires to ascend thereunto, and one of his Ladies sate beside him. The men there assembled, sate downe scattering, some on the right hand of the said Lady, and some on the left. Those places on the one side which the women filled not vp (for there were only the Wiues of *Baatu*) were supplied by the men. Also, at the very entrance of the Tent, stood a bench furnished with Cosmos, and with stately great cups of Silver and Gold, being richly set with Precious Stones. *Baatu* beheld vs earnestly, and wee him: and he seemed to me to resemble in personage, *Monsieur John de Beaumont*, whose soule resteth in peace. And he had a fresh ruddie colour in his countenance. At length hee commanded vs to speake. Then our Guide gaue vs direction, that we should bow our knees and speake. Wherevpon I bowed one knee as vnto a man: then he signified that I should kneele vpon both knees: and I did so, being loth to contend about such circumstances. And againe, hee commanded me to speake. Then I thinking of Prayer vnto God, because I kneeled on both my knees, beganne to pray on this wise: Sir, we beseech the Lord, from whom all good things doe proceed, and who hath giuen you these earthly benefits, that it would please him hereafter to make you partaker of his heavenly blessings: because the former without these are but vaine and unprofitable. And I added further. Be it knowne vnto you of a certaintie, that you shall not obtayne the ioyes of Heauen, vnlesse you become a Christian: for God saith, *Whosoever beleueth and is baptized, shall be saved: but he that beleueth not, shall be condemned.* At this word he modestly smiled: but the other *Moals* began to clap their hands, and to deride vs. And of my silly Interpreter, of whom especially I should haue receiued comfort in time of need, was himselfe abashed and vtterly dashed out of countenance. Then, after silence made, I said vnto him, I came vnto your Sonne, because we heard that he was become a Christian: and I brought vnto him Letters on the behalfe of my Souereigne Lord the King of France: and your Sonne sent me hither vnto you. The cause of my comming therefore is best knowne vnto your selfe. Then he caused me to rise vp. And he enquired your Maiesties Name, and my name, and the name of mine Associate and Interpreter, and caused them all to be put downe in writing. He demanded likewise (because hee had beene informed, that you were departed out of your owne Countries with an Armie) against whom you waged warre? I answered: against the *Saracens*, who had defiled the House of God at *Ierusalem*. He asked also, whether your Highnesse had euer before that time sent any Messengers vnto him, or no? To you Sir? (said I) neuer. Then caused he vs to sit downe, and gaue vs of his Milke to drinke, which they account to be a great fauour, especially when any man is admitted to drinke Cosmos with him in his owne houle. And as I sate looking downe vpon the ground, he commanded me to lift vp my countenance, being desirous as yet to take more diligent view of vs, or else perhaps for a kind of Superstitious obseruation. For they esteeme it a signe of ill lucke, or a prognostication of euill vnto them, when any man sits in their presence, holding downe his head, as if he were sad: especially, when hee leanes his cheeke or chin vpon his hand. Then we departed forth, and immediately after came our Guide vnto vs, and conducting vs vnto our Lodging, said vnto mee: Your Master the King requesteth that you may remayne in this Land, which request *Baatu* cannot satisfie without the knowledge and consent of *Mangu-Can*. Wherefore you, and your Interpreter must of necessitie goe vnto *Mangu-Can*. Howbeit your associate, and the other man shall returne vnto the Court of *Sartach*, staying there for you, till you come backe. Then began the man of God mine Interpreter to lament, esteeming himselfe but a dead man. Mine Associate also protested, that they should sooner chop off his head, then withdraw him out of my company. Moreouer, I my selfe said, that without mine Associate I could not goe: and that we stood in need of two Seruants at the least, to attend vpon vs, because, if one should chance to fall sick, we could not be without another. Then returning vnto the Court, he told these Sayings vnto *Baatu*. And *Baatu* commanded, saying: let the two Priests and the Interpreter goe together, but let the Clerke returne vnto *Sartach*. And comming againe vnto vs, hee told vs euen so. And when I would haue spoken for the Clerke to haue had him with vs, he said: No more words: for *Baatu* hath resolved, that so it shall bee, and therefore I dare not goe vnto the Court any more. *Goset* the Clerke had remaying of the Almes money bestowed vpon him, twentie sixe *Yperperas*, and no more; ten whereof he kept for himselfe and for the Lad, and sixteene hee gaue vnto the man of God for vs. And thus were we parted asunder with teares: he returning vnto the Court of *Sartach*, and our selues remaying still in the same place.

Vpon Assumption Euen our Clerke arriued at the Court of *Sartach*. And on the morrow at-
ter, the *Nestorian* Priests were adorned with our Vestments in the presence of the said
Sartach. Then wee our selues were conducted vnto another Host, who was appointed to pro-
uide vs house-roume, victuals, and Horses. But because wee had not ought to bestow vpon
him, hee did all things vntowardly for vs. Then wee rode on forward with *Baatn*, des-
cending along by the bancke of *Etília*, for the space of fíue weekes together: Some-
times mine Associate was so extreemly hungry, that hee would tell mee in a manner wee-
ping, that it fared with him as though hee had neuer eaten any thing in all his life before.
There is a Faire or Market following the Court of *Baatn* at all times: but it was so farre di-
stant from vs, that wee could not haue recourse thereunto. For wee were constrained to
walke on foote for want of Horses. At length certaine *Hungarians* (who had sometime beene
after a sort Clergie men) found vs out: and one of them could as yet sing many Songs without
booke, and was accounted of other *Hungarians* as a Priest, and was sent for vnto the Funerals of
his deceased Countrey-men. There was another of them also pretily well instructed in his
Grammar: for he could vnderstand the meaning of any thing that we spake, but could not an-
swere vs. These *Hungarians* were a great comfort vnto vs, bringing vs *Cosmos* to drinke, yea,
and sometimes flesh for to eate also: who, when they requested to haue some Bookes of vs, and
I had not any to giue them (for indeed we had none but onely a Bible, and a Breuiary) it grie-
ued me exceedingly. And I said vnto them: Bring me some Inke and Paper, and I will write
for you so long as we shall remaine here: and they did so. And I copied out for them *Horas bea-
ta Virginis*, and *Officium defunctorum*. Moreouer, vpon a certaine day, there was a *Comonian*
that accompanied vs, saluting vs in Latine, and saying: *Salute Domini*. Wondering thereat,
and saluting him againe, I demanded of him, who had taught him that kind of salutation? He
said, that he was baptized in *Hungaria* by our Friers, and that of them he learned it. Hee said
moreouer, that *Baatn* had enquired many things of him concerning vs, and that he told him the
estate of our Order. Afterward I saw *Baatn* riding with his company, and all his Subiects that
were householders or Masters of families riding with him, and (in mine estimation) they were
not fíue hundred persons in all. At length about the end of *Holy-rood*, there came a certaine
rich *Moal* vnto vs (whose Father was a Millenary, which is a great Office among them) say-
ing, I am the man that must conduct you vnto *Mangu-Can*, and we haue thither a iourney of
four moneths long to trauell, and there is such extreame cold in those parts, that stones and
trees doe euen ríue afunder in regard thereof. Therefore I would wish you thoroughly to aduise
your selues, whether you be able to indure it or no. Vnto whom I answered: I hope by Gods
helpe, that we shall be able to brooke that which other men can indure. Then hee said: if you
cannot indure it, I will forsake you by the way. And I answered him: it were not iust dealing
for you so to do, for we go not thither vpon any businesse of our owne, but by reason that we are
sent by our Lord. Wherefore, sithence we are committed vnto your charge, you ought in no
wise to forsake vs. Then he said; all shall be well. Afterward he caused vs to shew him all our
garments: and whatsoever he deemed to bee lesse needfull for vs, he willed vs to leaue it behind
in the custodie of our Host. On the morrow they brought vnto each of vs a furred Gowne,
made all of Rams skinnies, with the Wooll still vpon them, and breeches of the same, and boots
also or buskins according to their fashion, and shoes made of felt, and hoods also made of skins
after their manner. The second day after *Holy-rood*, we began to set forward on our iourney,
hauing three guides to direct vs: and we rode continually East-ward, till the feast of *All-Saints*.
Throughout all that Region, and beyond also did the people of *Changle* inhabite, who were by
parentage descended from the *Romans*. Vpon the North side of vs wee had *Bulgaria* the greater,
and on the South, the foresaid *Caspian* Sea.

HAuing trauelled twelue daies iourney from *Etília*, we found a mightie Riuer called *Iagac*:
which Riuer issuing out of the North, from the land of *Pascator*, descended into the fore-
said Sea. The language of *Pascator*, and of the *Hungarians* is all one, and they are all of them
Shepheards, not hauing any Cities. And their Countrey bordereth vpon *Bulgaria* the greater,
on the West frontier. From the North-East part of the said Countrey, there is no Citie at all.
Out of the said fore-named Region of *Pascator*, proceeded the *Hunnes* of old time, who after-
ward were called *Hungarians*. Next vnto it is *Bulgaria* the greater. *Isidore* reporteth, concer-
ning the people of this Nation, that with swift Horses they trauesed the impregnable walls
and bounds of *Alexander*, (which, together with the Rockes of *Caucasus*, serued to restraine
those barbarous and blood-thirstie people from invading the Regions of the South) insomuch
that they had tribute paid vnto them, as farre as *Egypt*. Likewise they wasted all Countreies
euen vnto *France*. Whereupon they were more mightie then the *Tartars* as yet are. And vnto
them the *Blacians*, the *Bulgarians*, and the *Vandals* ioyned themselves. For out of *Bulgaria* the
greater, came those *Bulgarians*. Moreouer, they which inhabite beyond *Danubius*, neere vnto
Constantinople, and not farre from *Pascator*, are called *Ilae*, which (sauiug the pronounciation) is
all one with *Blac*, (for the *Tartars* cannot pronounce the Letter *B*) from whom also descended
the

the people which inhabite the Land of *Assani*. For they are both of them called *Ilac*, (both thele and the other) in the languages of the *Russians*, the *Polonians*, and the *Bohemians*. The *Sclauonians* speake all one language with the *Vandals*, all which banded themselues with the *Hunnes*: and now for the most part, they vnite themselues vnto the *Tartars*: whom God hath raised vp fro the vtmost parts of the earth, according to that which the Lord saith: *I will prouoke them to enuy* (namely such as keepe not his Law) *by a people, which is no people, and by a foolish Nation will I anger them.* This prophecy is fulfilled, according to the literall sense thereof, vpon all Nations which obserue not the Law of God. All this which I haue written concerning the Land of *Pascatir*, was told me by certaine Friers *Pradicants*, which trauelled thither before euer the *Tartars* came abroad. And from that time they were subdued vnto their neighbours the

Deut. 32. v. 21.
Rom. 10. v. 19.

10 *Bulgarians* being *Saracens*, whereupon many of them proued *Saracens* also. Other matters concerning this people, may be knowne out of *Chronicles*. For it is manifest, that those Prouinces beyond *Constantinople*, which are now called *Bulgaria*, *Valachia*, and *Sclauonia*, were of old time Prouinces belonging to the *Greekes*. Also *Hungaria* was heretofore called *Pannonia*. And wee were riding ouer the Land of *Cangle*, from the feast of *Holy-rood*, vntill the feast of *All-Saints*: traouelling almost euery day (according to mine estimation) as farre, as from *Paris* to *Orleans*, and sometimes farther, as we were prouided of Post-horses: for some daies we had change of horses twice, or thrice in a day. Sometimes we trauelled two or three daies together, not finding any people, and then we were constrained not to ride so fast. Of twentie or thirtie Horses we had alwaies the worst, because we were Strangers. For euery one tooke their choice of the best Horses before vs. They prouided me alwaies of a strong Horse, because I was very corpulent and heavy: but whether he ambled a gentle pace or no, I durst not make any question. Neither yet durst I complaine, although he trotted full sore. But euery man must bee contented with his lot as it fell. Whereupon we were exceedingly troubled; for oftentimes our Horses were tyred before we could come at any people. And then we were constrained to beate and whip on our Horses, and to lay our Garments vpon other emptie Horses: yea, and sometimes two of vs to ride vpon one Horse.

Cangle an huge plaine Countrey.

30 **O**f hunger and thirst, cold and wearinesse, there was no end. For they gaue vs no victuals, but onely in the euening. In the morning they vsed to giue vs a little drinke, or some sodden Millet to sup off. In the euening they bestowed flesh vpon vs, as namely, a shoulder and breast of Rams Mutton, and euery man a measured quantitie of broath to drinke. When wee had sufficient of the flesh-broath, we were maruellously well refreshed. And it seemed to mee most pleasant, and most nourishing drinke. Euery Saturday I remained fasting vntill night, without eating or drinking of ought. And when night came, I was constrained, to my great grieve and sorrow, to eate flesh. Sometimes we were faine to eate flesh halfe sodden, or almost raw, and all for want of fewell to seethe it withall; especially, when we lay in the fields, or were benighted before we came at our iourneys end: because we could not then conueniently gather together the dung of Horses or Oxen: for other fewell we found but seldome, except 40 perhaps a few thornes in some places. Likewise vpon the bankes of some Rivers, there are woods growing here and there. Howbeit they are very rare. In the beginning our guide highly disdained vs, and it was tedious vnto him to conduct such base fellowes. Afterward, when he began to know vs somewhat better, he directed vs on our way by the Courts of rich *Moals*, and we were requested to pray for them. Wherefore, had I carried a good Interpreter with me, I should haue had opportunitie to haue done much good. The foresaid *Chingis*, who was the first great *Can* or Emperour of the *Tartars*, had foure Sonnes, of whom proceeded by naturall descent many children, euery one of which doeth at this day enioy great possessions: and they are daily multiplied and dispersed ouer that huge and vast Defart, which is in dimensions, like vnto the Ocean Sea. Our guide therefore directed vs, as we were going on our iourney, vnto 50 many of their habitations. And they maruelled exceedingly, that wee would receiue neither Gold nor Siluer, nor precious and costly garments at their hands. They inquired also, concerning the great Pope, whether he was of so lasting an age as they had heard? For there had gone a report among them, that hee was fife hundred yeares old. They inquired likewise of our Countries, whether there were abundance of Sheepe, Oxen, and Horses, or no? Concerning the Ocean Sea, they could not conceiue of it, because it was without limits or bankes. Vpon the Euen of the feast of *All-Saints*, wee forooke the way leading towards the East, (because the people were now descended very much South) and wee went on our iourney by certaine *Alpes*, or Mountaines directly South-ward, for the space of eight daies together. In the foresaid Defart I saw many *Ases* (which they call *Colan*) being rather like vnto Mules: these did our guide and his companions chase very eagerly: howbeit, they did but lose their labour, for the beasts were too swift for them. Vpon the seuenth day there appeared to the South of vs huge high Mountaynes, and we entred into a place which was well watered, and fresh as a Garden, and found Land tilled and manured. The eight day, after the feast of *All-Saints*, wee arrived at a certaine Towne of the *Saracens*, named *Kenchat*, the *Gouernour* whereof met our Guide

at the Townes end with Ale and Cups. For it is their manner at all Townes and Villages, subiect vnto them, to meete the messengers of *Baatu* and *Mangu-Can* with meate and drinke. At the same time of the yeere, they went vpon the Ice in that Countrey. And before the feast of Saint *Michael*, we had frost in the Defart. I enquired the name of that Prouince: but being now in a strange Territorie, they could not tell mee the name thereof, but onely the name of a very small Citie in the same Prouince. And there descended a great Riuer downe from the Mountaynes, which watered the whole Region, according as the Inhabitants would giue it passage, by making diuers Channels and Sluces: neither did this Riuer exonerate it selfe into any Sea, but was swallowed vp by an hideous Gulfe into the bowels of the earth, and it caused many Fennes or Lakes. Also I saw many Vines, and dranke of the Wine thereof.

The day following, we came vnto another Cottage neere vnto the Mountaynes. And I enquired what Mountaynes they were, which I vnderstood to bee the Mountaines of *Caucasus*, which are stretched forth, and continued on both parts to the Sea, from the West vnto the East: and on the West part they are conioyned vnto the foresaid *Caspian* Sea, where into the Riuer of *Volga* dischargeth his streames. I enquired also of the Citie of *Talas*, wherein were certaine *Dutch* men, seruants vnto one *Buri*, of whom Frier *Andrew* made mention. Concerning whom also I enquired very diligently in the Courts of *Sartach* and *Baatu*. Howbeit I could haue no intelligence of them, but onely that their Lord and Master *Ban* was put to death vpon the occasion following: This *Ban* was not placed in good and fertile Pastures. And vpon a certaine day being drunken, hee spake on this wise vnto his men. Am not I of the stocke and kindred of *Chingis Can*, as well as *Baatu*? (for in very deede he was brother or Nephew vnto *Baatu*.) Why then doe I not passe and repasse vpon the banke of *Etilia*, to feede my Cattell there, as freely as *Baatu* himselfe doth? Which speeches of his were reported vnto *Baatu*. Whereupon *Baatu* wrote vnto his seruants to bring their Lord bound vnto him. And they did so. Then *Baatu* demanded of him whether he had spoken any such words? And he confessed that he had. Howbeit (because it is the *Tartars* manner to pardon drunken men) he excused himselfe that he was drunken at the same time. How durst thou (quoth *Baatu*) once name mee in thy drunkenesse? And with that hee caused his head to be chopt off. Concerning the foresaid *Dutch* men, I could not vnderstand ought, till I was come vnto the Court of *Mangu-Can*. And there I was informed that *Mangu-Can* had remoued them out of the iurisdiction of *Baatu*, for the space of a moneths iourney from *Talas* Eastward, vnto a certaine Village, called *Bolac*: where they are set to dig gold, and to make armour. Whereupon I could neither goe nor come by them. I passed very neere the said Citie in going forth, as namely, within three daies iourney thereof: but I was ignorant that I did so: neither could I haue turned out of my way, albeit I had knowne so much. From the foresaid Cottage we went directly Eastward, by the Mountaines aforesaid. And from that time we traualled among the people of *Mangu-Can*, who in all places sang and danced before our Guide, because he was the messenger of *Baatu*. For this curtesie they doe afford each to other: namely, the people of *Mangu-Can* receiuing the messengers of *Baatu* in manner aforesaid: and so likewise the people of *Baatu* entertaining the messengers of *Mangu-Can*. Notwithstanding, the people of *Baatu* are more surly and stout, and shew not so much curtesie vnto the subiects of *Mangu-Can*, as they doe vnto them. A few daies after we entered vpon those *Alpes* where the *Cava Catayans* were wont to inhabit. And there we found a mightie Riuer: insomuch that we were constrained to imbarke our selues, and to saile ouer it. Afterward we came into a certaine Valley, where I saw a Castle destroyed, the walls whereof were onely of mudde: and in that place the ground was tilled also. And there wee found a certaine Village, named *Equius*, wherein were *Saracens*, speaking the *Persian* language: howbeit they dwelt an huge distance from *Persia*. The day following, hauing passed ouer the foresaid *Alpes*, which descended from the great Mountaynes Southward, wee entred into a most beautifull Plaine, hauing high Mountaynes on our right hand, and on the left hand of vs a certaine Sea or Lake, which containeth fifteene daies iourney in circuit. All the foresaid Plaine is most commodiously watered with certaine Freshets, distilling from the said Mountaynes, all which doe fall into the Lake. In Summer time we returned by the North shoare of the said Lake, and there were great Mountaines on that side also. Vpon the fore-named Plaine there were wont to bee great store of Villages: but for the most part they were all wasted, in regard of the fertile Pastures, that the *Tartars* might feede their Cattell there. We found one great Citie there, named *Coilac*, wherein was a Mart, and great store of Merchants frequenting it. In this Citie wee remained fifteene daies, staying for a certaine Scribe or Secretarie of *Baatu*, who ought to haue accompanied our Guide for the dispatching of certaine affaires in the Court of *Mangu*. All this Countrey was wont to bee called *Organum*: and the people thereof had their proper language, and their peculiar kind of writing. But it was altogether inhabited of the people, called *Contomanni*. The *Nestorians* likewise in those parts vse the very same kind of language and writing. They are called *Organa*, because they were wont to bee most skilfull in playing vpon the *Organs* or *Citherne*, as it was reported vnto mee. Here first did I see worshippers of Idols, concerning

cerning whom, bee it knowne vnto your Maiestie, that there bee many sects of them in the East Countries.

THe first sort of these Idolaters are called *Iugures*: whose Land bordereth vpon the foresaid Land of *Organum*, within the said Mountaines Eastward: and in all their Cities *Nestorians* doe inhabit together, and they are disperfed likewise towards *Persta*, in the Cities of the *Saracens*. The Citizens of the foresaid Citie of *Cailac* had three Idol-temples; and I entred into two of them, to behold their foolish superstitions. In the first of which, I found a man hauing a Crosse painted with Inke vpon his hand, whereupon I supposed him to be a Christian: for he answered like a Christian vnto all questions which I demanded of him. And I asked him, Why therefore haue you not the Crosse with the Image of Iesu Christ thereupon? And he answered, We haue no such custome. Whereupon I coniectured that they were indeed Christians: but, that for lacke of instruction they omitted the foresaid ceremonie. For I saw there behind a certaine Chest (which was vnto them in stead of an Altar, whereupon they set Candles and Oblations) an Image hauing wings, like vnto the Image of Saint *Michael*, and other Images also, holding their fingers, as if they would blesse some body. That euening I could not find any thing else. For the *Saracens* doe onely inuite men thither, but they will not haue them speake of their Religion. And therefore, when I enquired of the *Saracens* concerning such Ceremonies, they were offended thereat. On the morrow after were the Kalends, and the *Saracens* feast of Pascheuer. And changing mine Inne or lodging the same day, I tooke vp mine abode neere vnto another Idol-Temple. For the Citizens of the said Citie of *Cailac* doe courteously inuite, and louingly entertaine all messengers, euery man of them according to his abilitie and portion. And entring into the foresaid Idol-temple, I found the Priests of the said Idols there. For alwaies at the Kalends they set open their Temples, and the Priests adorne themselues, and offer vp the peoples Oblations of Bread and Fruits. First therefore, I will describe vnto you those rites and ceremonies which are common vnto all their Idol-temples: and then the superstitions of the foresaid *Iugures*, which be, as it were, a sect distinguished from the rest. They doe all of them worship towards the North, clapping their hands together, and prostrating themselves on their knees vpon the earth, holding also their foreheads in their hands. Whereupon the *Nestorians* of those parts will in no case ioine their hands together in time of prayer: but they pray displaying their hands before their breasts. They extend their Temples in length East and West; and vpon the North side they build a Chamber, in manner of a Vestrie, for themselves to goe forth into. Or sometimes it is otherwise. If it be a foure square Temple, in the midst of the Temple stand. And within the said Chamber, they place a Chest long and broade like vnto a Table, and behind the said Chest towards the South, stands their principall Idoll: which I saw at *Caracorum*, and it was as big as the Idoll of Saint *Christopher*. Also a certaine *Nestorian* Priest, which had bene in *Catay*, said that in that Countrey there is an Idoll of so huge a bignesse, that it may be seene two daies iourney before a man come at it. And so they place other Idols round about the foresaid principall Idoll, being all of them finely gilt ouer with pure gold: and vpon the said Chest, which is in manner of a Table, they set Candles and Oblations. The doores of their Temples are alwaies open towards the South, contrary to the customes of the *Saracens*. They haue also great Bells like vnto vs. And that is the cause (as I thinke) why the Christians of the East will in no case vse great Bells. Notwithstanding, they are common among the *Russians*, and *Gracians* of *Gasaria*.

Chap. 26.
How the Nestorians, Saracens, and Idolaters are ioyned together.
The people called *Iugures* Idolaters.

Frier William was at *Caracorum*.

All their Priests had their heads and beards shauen quite ouer: and they are clad in Saffron coloured garments: and being once shauen, they leade an vnmarried life from that time forward: and they liue an hundred or two hundred of them together in one Cloister or Couent. Vpon those daies when they enter into their Temples, they place two long Formes therein: and so sitting vpon the said Formes like Singing-men in a Quire, namely, the one halfe of them directly ouer against the other, they haue certaine bookes in their hands, which sometimes they lay downe by them vpon the Formes: and their heads are bare so long as they remaine in the Temple. And there they reade softly vnto themselves, not vttering any voice at all. Whereupon comming in amongst them, at the time of their superstitious deuotions, and finding them all sitting mute, in manner aforesaid, I attempted diuers waies to prouoke them vnto speech, and yet could not by any meanes possible. They haue with them also whitherfoeuer they goe, a certaine string, with an hundred or two hundred Nut-shells thereupon, much like to our bead-roll which wee carrie about with vs. And they doe alwaies vtter these words: *Ou mam Hactani*; God thou knowest: as one of them expounded it vnto me. And so often doe they expect a reward at Gods hands, as they pronounce these words in remembrance of God. Round about their Temple they doe alwaies make a faire Court, like vnto a Church-yard, which they entiron with a good wall: and vpon the South part thereof, they build a great Portall, wherein they sit and conferre together. And vpon the top of the said Portall, they pitch a long Pole right vp, exalting

ting it, if they can, about all the whole Towne besides. And by the same Pole all men may know that there stands the Temple of their Idols. These rites and ceremonies aforesaid, be common vnto all Idolaters in those parts. Going vpon a time towards the foresaid Idoll-temple, I found certaine Priests sitting in the outward Portall. And those which I saw, seemed vnto mee, by their shauen beards, as if they had beene *French* men. They wore certaine ornaments vpon their heads, made of Paper. The Priests of the foresaid *Iugures* doe vse such attire whithersoever they goe. They are alwaies in their Saffron coloured Iackets, which bee very straight, being laced or buttoned from the bosome right downe, after the *French* fashion, and they haue a Cloake vpon their left shoulder, descending before and behind vnder their right arme, like vnto a Deacon carrying the housel-box in time of Lent. Their letters or kind of writing the *Tartars* did receiue. 10
They begin to write at the top of their paper, drawing their lines right downe: and so they read and multiply their lines from the left hand to the right. They doe vse certaine papers and characters in their Magicall practices. Whereupon their Temples are full of such short scrolls hanged round about them. Also *Mangu-Can* hath sent letters vnto your Maiestie, written in the language of the *Moals* or *Tartars*, and in the foresaid hand or letter of the *Iugures*. They burne their dead according to the ancient custome, and lay vp the ashes in the top of a Pyramis. Now, after I had sate a while by the foresaid Priests, and entred into their Temple, and seene many of their Images, both great and small, I demanded of them what they beleue concerning God? And they answered: *Wee beleue that there is onely one God.* And I demanded farther: Whether doe you beleue that he is a Spirit, or some bodily substance? They said: *Wee beleue that hee is a 20 Spirit.* Then said I: Doe you beleue that God euer tooke mans nature vpon him: Then they answered; *No.* And againe I said: Sithence yee beleue that hee is a Spirit, to what end doe you make so many bodily Images to represent him: Sithence also you beleue not that hee was made man: why doe you resemble him rather vnto the Image of a man then of any other creature? Then they answered, saying: we frame not those Images whereby to represent God. But when any rich man amongst vs, or his sonne, or his wife, or any of his friends deceaseth, he causeth the Image of the dead partie to be made, and to be placed here: and we in remembrance of him doe reuerence thereunto. Then I replied. You doe these things onely for the friendship and flatterie of men. No (said they) but for their memorie. Then they demanded of mee, as it were in scoffing wise: *Where is God?* To whom I answered: Where is your soule? they said, In 30 our bodies. Then said I, Is it not in euery part of your bodie, ruling and guiding the whole bodie, and yet notwithstanding is not seene or perceiued? Euen so God is euery where, and ruleth all things, and yet is he inuisible, being vnderstanding and wisdom it selfe. Then being desirous to haue had some more conference with them, by reason that mine Interpreter was wearie, and not able to expresse my meaning, I was constrained to keepe silence. The *Moals* or *Tartars* are in this regard of their sect: namely, they beleue that there is but one God: howbeit, they make Images of felt, in remembrance of their deceased friends, couering them with fine most rich and costly garments, and putting them into one or two Carts, which Carts no man dare once touch: and they are in the custodie of their Sooth-sayers, who are their Priests, concerning whom, I will giue your Highnesse more at large to vnderstand hereafter. These Sooth-sayers or 40 Diuiners, doe alwaies attend vpon the Court of *Mangu*, and of other great personages. As for the poorer or meaner sort, they haue them not, but such onely as are of the stocke and kindred of *Chingis*. And when they are to remoue or to take any iourney, the said Diuiners goe before them, euen as the clouidie Pillar went before the Children of *Israel*. And they appoint ground where the Tents must be pitched, and first of all they take downe their owne houses: and after them the whole Court doth the like. Also vpon their festiuall daies or Kalends, they take forth the foresaid Images, and place them in order, round or circle wise within the house. Then come the *Moals* or *Tartars*, and enter into the same house, bowing themselues before the said Images and worship them. Moreouer, it is not lawfull for any stranger to enter into that house. For vpon a certaine time I my selfe would haue gone in, but I was chidden full well for my labour. 50

owne parents.
The Countrey
of *Presbyter*
Iohn.
Tangut.

Strange Oxen.

BVt the foresaid *Iugures* (who liue among the *Christians* and *Saracens*) by their sundry disputations, as I suppose, haue beene brought vnto this, to beleue that there is but one onely God. And they dwelt in certaine Cities, which afterward were brought in subiection vnto *Chingis Can*: whereupon hee gaue his daughter in marriage vnto their King. Also the Citie of *Caracorum* it selfe, is in a manner within their Territorie, and the whole Countrey of King or *Presbyter Iohn*, and of his brother *Vut*, lyeth neere vnto their Dominions: sauing that they inhabit in certaine Pastures Northward, and the said *Iugures* betweene the Mountaynes towards the South. Whereupon it came to passe, that the *Moals* receiued letters from them. And they are the *Tartars* principall Scribes: and all the *Nestorians* almost can skill of their Letters. Next 60 vnto them, betweene the foresaid Mountaynes Eastward, inhabiteth the Nation of *Tangut*, who are a most valiant people, and tooke *Chingis* in battell. But after the conclusion of a league, he was set at libertie by them, and afterward subdued them. These people of *Tangut* haue Oxen of great strength, with tailes like vnto Horses, and with long shag haire vpon their backs and

and bellies. They haue legs greater then other Oxen haue, and they are exceeding fierce. These Oxen draw the great houses of the *Moals*: and their hornes are slender, long, streight, and most sharpe pointed: insomuch that their owners are faine to cut off the ends of them. A Cow will not suffer her selfe to be coupled vnto one of them, vnlesse they whistle or sing vnto her. They haue also the qualities of a Buffe: for if they see a man cloathed in red, they runne vpon him immediately to kill him. Next vnto them are the people of *Tebet*, men which were wont to eate the carcases of their deceased parents: that for pities sake, they might make no other Sepulchre for them, then their owne bowels. Howbeit of late they haue left off this custome, because that thereby they became abominable and odious vnto all other Nations. Notwithstanding, vnto this day they make fine Cups of the Skulls of their parents, to the end, that when they drinke out of them, they may amidst all their iollities and delights, call their dead parents to remembrance. This was told mee by one that saw it. The said people of *Tebet* haue great plentie of gold in their Land. Whosoever therefore wanteth gold, diggeth til he hath found some quantitie, and then taking so much thereof as will serue his turne, hee layeth vp the residue within the earth: because, if he should put it into his Chest or Store-house, he is of opinion that God would withhold from him all other gold within the earth. I saw some of those people, being very deformed creatures. In *Tangut* I saw lusty tall men, but browne and swart in colour. The *Iugures* are of a middle stature, like vnto our *French* men. Among the *Iugures* is the originall and roote of the *Turkish*, and *Comanian* Languages. Next vnto *Tebet* are the people of *Langa* and *Solanga*, whose messengers I saw in the *Tartars* Court. And they had brought more then ten great Carts with them, euery one of which was drawne with six Oxen. They bee little browne men like vnto *Spaniards*. Also they haue lackets, like vnto the vpper Vestment of a Deacon, sauing that the sleeues are somewhat streighter. And they haue Miters vpon their heads like Bishops. But the fore-part of their Miter is not so hollow within as the hinder part: neither is it sharpe pointed or cornered at the top: but there hang downe certaine square flaps compacted of a kind of Straw, which is made rough and ragged with extreame heate, and is so trimmed, that it glittereth in the Sunne-beames, like vnto a Glasse, or an Helmet well burnished. And about their Temples they haue long bands of the foresaid matter, fastened vnto their Miters, which houer in the winde, as if two long hornes grew out of their heads. And when the wind tossed them vp and downe too much, they tie them ouer the midst of their Miter, from one Temple to another: and so they lie circle wise ouerthwart their heads. Moreouer, their principall messenger comming vnto the *Tartars* Court, had a table of Elephants tooth about him, of a cubit in length, and a handfull in breadth, being very smoothe. And whensoever he spake vnto the Emperor himselfe, or vnto any other great personage, he alwaies beheld that table, as if hee had found therein those things which hee spake: neither did hee cast his eyes to the right hand, nor to the left, nor vpon his face with whom he talked. Yea, going too and fro before his Lord, hee looketh no where but onely vpon his table. Beyond them (as I vnderstand of a certaintie) there are other people called *Muc*, hauing Villages, but no one particular man of them appropriating any Cattell vnto himselfe. Notwithstanding, there are many flocks and droues of Cattell in their Countrey, and no man appointed to keepe them. But when any one of them standeth in neede of any beast, hee ascendeth vp vnto a hill, and there maketh a shoute, and all the Cattell which are within hearing of the noyse, come flocking about him, and suffer themselves to be handled and taken, as if they were tame. And when any messenger or stranger commeth into their Countrey, they shut him vp into an house, ministring there things necessary vnto him, vntill his businesse be dispatched. For if any stranger should trauell through that Countrey, the Cattell would flie away at the very sent of him, and so would become wilde. Beyond *Muc* is great *Cataya*, the Inhabitants whereof (as I suppose) were of old time, called *Seres*. For from them are brought most excellent stufes of silke. And this people is called *Seres*, of a certaine Towne in the same Countrey. I was credibly informed, that in the said Countrey, there is one Towne hauing Walls of siluer, and Bulwarkes or Towers of gold. There bee many Prouinces in that Land, the greater part whereof are not as yet subdued vnto the *Tartars*. And the Sea lyeth betweene them and *India*. These *Catayans* are men of a little stature, speaking much through the nose. And this is generall, that all they of the East haue small eyes. They are excellent workemen in euery Art: and their Physicians are well skilled in the Vertues of Herbs, and iudge exactly of the Pulse; But vse no Vrinalls, nor know any thing concerning Vrine. This I saw, for there are many of them at *Caracorum*. And they are alwaies wont to bring vp all their children in the same trade whereof the father is. And therefore they pay so much tribute; for they giue the *Moallians* euery day one thousand and five hundred Cellines or Iascots: (Iascot is a piece of siluer weighing ten Markes) that is to say, euery day fiftene thousand Markes, beside silkes and certaine victuals, which they receiue from thence, and other seruices which they doe them. All these Nations are betweene the Mountaynes of *Caucasus*,

ters disagree, as being (I thinke) rather some Transcribers diuision then the Authors. Yet haue I followed the numbers I found, euen where they are obscurest. The Friers Latin for some barbarous words and phrases, hath bene troublesome to translate. The worke I hold a Iewell of Antiquitie, now first entirely publike.

The people of Tebet.

Abundance of gold.

The stature of the people of Tangut, and of the Iugures, Langa and Solanga.

The people of Solanga resemble Spaniards.

A table of Elephants tooth.

The people called Muc.

Great Cataya.

* From hence is supplied by Master Hache-its industrie (as he told me) out of a Manuscript in Bennet Colledge in Cambridge: the other part hee had out of an imperfect Copie of my Lord Lum-lies. The Chap.

Idolary.

on the North side of those Mountaines to the East Sea, on the South part of *Scythia*, which the Shepherds of *Moal* doe inhabit: All which are tributarie vnto them, and all giuen to Idolatry, and report many fables of a multitude of gods, and certaine Deified men, and make a pedigree of the gods as our Poets doe.

Nestorians.

Segni a Citie of Cathay.

They are so at this day.

The euill qualities of the Nestorians.

Hence by corruption of manners and ignorance of faith, seemeth

the Apostacy of the greatest

part of Asia to haue happened, furthered

by Tartarian inuasions and Saracenicall.

All Priests.

* Consider our

Author a Frier, whose trauels

we rather embrace, then (in such passages) his diuinitie.

They were later Fathers which made such Decrees, contrary to the Father of truth

which ordained marriage in *Leuies* Priest-hood, and chose married men to the Apostleship: and forewarned of another Father,

who with Doctrines of Devils should prohibite meate and marriage, vnder colour of Priests chastitie, making the Temple stews

to carnall and spirituall whoredome.

The *Nestorians* are mingled among them as Strangers; so are the *Saracens* as farre as *Cathay*. The *Nestorians* inhabit fiftene Cities of *Cathay*, and haue a Bishopricke there, in a Citie called *Segin*. But further, they are meere Idolaters. The Priests of the Idols of the said Nations, haue all broad yellow hoods. There are also among them (as I vnderstood) certaine Hermits liuing in the Woods and Mountaines, of an austere and strange life. The *Nestorians* there know nothing, for they say their Seruice, and haue holy Bookes in the *Syrian* tongue, which they know not. So that they sing as our Monkes doe, who are ignorant of Grammar; and hence it cometh, that they are wholly corrupted. They are great Usurers and Drunkards, and some of them also who liue among the *Tartars*, haue many Wiues, as the *Tartars* haue. When they enter into the Church, they wash their lower parts, as the *Saracens* doe. They eate flesh on Friday of the weeke, and hold their Feasts that day, after the manner of the *Saracens*. The Bishop comes seldome into those Countries, perchance, scarce once in fiftie yeares. Then they cause all their little Children (which are Males) to be made Priests, euen in the Cradell; so that all their men almost are Priests: and after this they marrie Wiues, which is directly against the decrees of the Fathers: they are also *Bigami*, for the Priests themselues, their first Wife being dead, marrie another. They are all Simonists, for they giue no holy thing freely. They are very carefull for their Wiues and Children, whereby they apply themselues to gaine, and not to the spreading of the Faith. Whence it cometh to passe, while some of them bring vp some of the Nobilities children of *Moal* (although they teach them the Gospell, and the Articles of the Faith) yet by their euill life and couetousnesse, they driue them further from Christianitie: Because the life of the *Moallians*, and *Tuinians* (who are Idolaters) is more harmelesse then theirs.

Chap. 26.

Of such things as befell them,

departing from Cathay, to the

Country of the Naymannes.

Extreme cold.

Decemb. 7.

A dangerous passage.

The second Sunday of Advent in the euening, we passed by a certaine place betweene very

terrible Rockes: and our Guide sent vnto me, intreating me to speake some good words, where-

with the Devils might be driuen away; because in that passage, the Devils themselues were

wont suddenly to carrie men away, so that it was not knowne what became of them. Some-

times they violently snatched a Horse and left the man; sometimes they drew out a mans bo-

wels, and left the emptie carkasse vpon the Horse. And many such things did often fall out

there. Then we sang with a loud voyce, *Credo in Deum*, &c. And by the Grace of God, wee

passed through (with all our company) unhurt. After that, they beganne to intreat me, that I

would write them Papers to carrie on their heads: and I told them, I would teach them a word

lastingly. But alwaies when I would teach them, I wanted an Interpreter: Yet I wrote them

the Creede and the Lords Prayer; saying, Heere it is written whatloeuer a man ought to be-

leeue concerning God. Here also is that prayer, wherein we begge of God whatloeuer is need-

full for a man. Whereupon beleue firmly that which is written here, although you cannot

WE departed from the foresaid Citie of *Cailac* on Saint *Andrewes* day. And there wee found almost within three leagues, a whole Castle or Village of *Nestorians*. Enttring into their Church, we sang, *Salue Regina*, &c. with ioy, as loud as we could, because it was long since we had seene a Church. Departing thence, in three daies we came to the entrance of that Prouince, in the head of the foresaid Sea, which seemed to vs as tempestuous as the Ocean, and we saw a great Iland therein. My Companions drew neere the shoare, and wet a Linnen cloath therein, to taste the Water, which was somewhat salt, but might bee drunke. There went a certaine Valley ouer against it, from betweene the great Mountaines, betweene South and East: and betweene the hils, was another certaine great Sea; and there ranne a Riuer through that Valley, from the other Sea into this. Where came such a continuall winde through the Valley, that men passe with great danger, least the wind carrie them into the Sea. Therefore wee left the Valley and went towards the North, to the great hilly Countries, couered with deepe Snow, which then lay vpon the Earth: so that vpon Saint *Nicholas* day we beganne now to hasten our iourney much, and (because we found no people, but the *Iani* themselues (to wit) men appointed from daies iourney to daies iourney together, the Messengers together. Because in many places in the hilly Countries) the way is narrow, and there are but few fields, so that betweene day and night we met with two *Iani*, whereupon of two daies iourneys we made one, and trauelled more by night then by day. It was extreame cold there, so that they lent vs their Goats skins, turning the haire outward.

The second Sunday of *Aduent* in the euening, we passed by a certaine place betweene very terrible Rockes: and our Guide sent vnto me, intreating me to speake some good words, where-with the Devils might be driuen away; because in that passage, the Devils themselues were wont suddenly to carrie men away, so that it was not knowne what became of them. Sometimes they violently snatched a Horse and left the man; sometimes they drew out a mans bowels, and left the emptie carkasse vpon the Horse. And many such things did often fall out there. Then we sang with a loud voyce, *Credo in Deum*, &c. And by the Grace of God, wee passed through (with all our company) unhurt. After that, they beganne to intreat me, that I would write them Papers to carrie on their heads: and I told them, I would teach them a word lastingly. But alwaies when I would teach them, I wanted an Interpreter: Yet I wrote them the Creede and the Lords Prayer; saying, Heere it is written whatloeuer a man ought to beleeue concerning God. Here also is that prayer, wherein we begge of God whatloeuer is needfull for a man. Whereupon beleue firmly that which is written here, although you cannot

vnder-

vnderstand it, and aske of God that he do that for you which is contained in this written Prayer: because with his owne mouth he taught it his friends, and I hope he will saue you. I could not doe any thing else, because it was very dangerous to speake the words of doctrine by such an Interpreter, nay almost impossible, because he was ignorant.

After this, wee entred into that plaine where the Court of Ken-Cham was, which was wont to be the Countrey of the *Naymans*, who were the peculiar Subiects of *Presbyter John*: but at that time I saw not that Court; but in my returne. Yet heere I declare vnto you what befell his Ancestry, his Soone and Wiues. *Ken-Cham* being dead, *Baatu* desired that *Mangu* should be *Chan*. But I could vnderstand in certaintie of the death of *Ken*. *Frier Andrew* said, that he dyed by a certaine medicine giuen him: and it was suspected that *Baatu* caused it to be made. Yet I heard otherwise, for he summoned *Baatu*, to come and doe him homage. And *Baatu* tooke his iourney speedily with great preparation; but he and his Seruants were much afraid, and sent one of his Brothers before, called *Stichin*: who when he came to *Ken*, and should waite vpon his Cup, contention arising betweene them, they slue one another. The Widow of *Stichin* kept vs a whole day, to goe into her house and blesse her, that is, pray for her. Therefore *Ken* being dead, *Mangu* was chosen by the consent of *Baatu*. And was then chosen when *Frier Andrew* was there. *Ken* had a certaine Brother, called *Siremon*, who by the counsell of *Kens* Wife and her Vassals, went with great preparation towards *Mangu*, as if he meant to doe him homage, and yet in truth he purposed to kill him, and destroy his whole Court. And when he was neere *Mangu*, within one or two daies iourney, one of his Wagons remained broken in the way. While the Wagoner laboured to mend it, in the meane space came one of the Seruants of *Mangu*, who helped him: he was so inquisitiue of their iourney, that the Wagoner reuealed vnto him what *Siremon* purposed to doe. Then turning out of the way, as if hee little regarding it, went vnto the herd of Horses, and tooke the best Horse hee could choose, and posting night and day, came speedily to the Court of *Mangu*, reporting vnto him what he had heard. Then *Mangu* quickly assembling all his subiects, caused foure rings of Armed men to compasse his Court, that none might goe in or out: the rest he sent against *Siremon*, who tooke him, (not suspecting his purpose had bene discovered) and brought him to the Court with all his followers. Who when *Mangu* lay the matter to his charge, strait-way confessed it. Then he and his eldest Sonne *Ken Chan* were slaine, and three hundred of the Nobilitie of the *Tartars* with them. The Noble Women also were sent for, who were all beaten with burning fire brands to make them confesse: and hauing confessed, were put to death. His youngest sonne *Ken*, who could not be capable or guiltie of the conspiracy, was left aliue: And his Fathers Palace was left vnto him, with all belonging vnto it, as well Men as Chattels: and we passed by it in our returne. Nor durst my Guides turne in vnto it, neither going nor comming. For the Lady of the Nations sate there in heauinesse, and there was none to comfort her.

Chap. 27.
Of the Countrey of the *Naymans*, and what befell the stock of *Ken-Chan* his sonne & wiues. *Baatu*.

Stichin and *Ken* kill one another.

Then went wee vp againe into the high Countries, going alwaies towards the North. At length on Saint *Stephens* day we entred into a great Plaine like the Sea, where there was not so much as a Mole-hill. And the next day, on the feast of *S. Iohn* the Euangelist, we came vnto the Palace of that great Lord. But when we were neere it, within fide daies iourney, our Host where we lay, would haue directed vs a way farre about, so that wee should yet trauaile more then fifteene daies. And this was the reason (as I vnderstood) that wee might goe by *Onam Kerule* their proper Countrey, where the Court of *Chingis-Chan* is. Others said, that he did it for this purpose, that he might make the way longer, and might shew his power the more. For so they are wont to deale with men comming from Countries not subiect to them. And our Guide obtained with great difficultie, that we might go the right way. For they held vs vpon this from the morning till three of the clocke. In that way also, the Secretarie (whom we expected at *Cailac*) told me, that it was contained in the Letters which *Baatu* sent to *Mangu-Chan*, that wee required an Army and ayde of *Sartach* against the *Saracens*. Then I began to wonder much, and to be greatly troubled: for I knew the Tenor of the Letters, and that no mention therof was made therein: saue that yee aduised him to be a friend to all Christians, and should exalt the Crosse, and be an enemy to all the enemies of the Crosse: and because also the Interpreters were *Armenians*, of the greater *Armenia*, who greatly hated the *Saracens*; lest perhaps they had interpreted any thing in euill part to make the *Saracens* more odious and hatefull at their pleasure, I therefore held my peace, not speaking a word with them, or against them; for I feared to gainsay the words of *Baatu*, lest I should incurr some false accusation without reasonable cause. We came therefore the foresaid day vnto the said Court. Our Guide had a great house appointed him, and we three a little Cottage, wherein wee could scarce lay our stufte, make our beds, and haue a little fire. Many came to visit our Guide, and brought him drinke made of Rice, in long strait mouthed bottles, in the which I could discerne no difference from the best *Antissiodorensian* Wine, saue that it had not the sent of Wine. We were called, and straightly examined vpon what businesse we came. I answered, that we heard of *Sartach* that he was a Christian: we came

seasons.

therefore vnto him; the *French* King sent him a Packet by vs, he sent vs to *Baatu* his Father: & his Father hath sent vs hither, hee should haue written the cause, wherevpon they demanded whether we would make peace with them? I answered, he hath sent Letters vnto *Sartach* as a Christian: and if he had knowne, he were not a Christian, hee would neuer haue sent him Letters, to treat of peace: I say, he hath done you no wrong: if he had done any, why should you warre vpon him, or his people? he, willingly (as a iust man) would reforme himselfe, and desire peace. If yee without cause will make warre with him, or his Nation, we hope that God (who is iust) will helpe them. And they wondred, alwayes repeating, why came yee, seeing yee came not to make peace? For they are now so puffed vp with pride, that they thinke the whole World should desire to make peace with them. And truly, if I might bee suffered, I would preach Warre against them to the vttermost of my power) throughout the whole World. But I would not plainly deliuer the cause of my comming, lest I should speake any thing against that which *Baatu* commanded. I told them therefore the whole cause of my comming thither, was because he sent me.

The day following we were brought vnto the Court, and I thought I could goe bare-foot, as I did in our Countrey: whereupon, I layd aside my shooes. But such as come to the Court, alight farre from the house where the Great *Chan* is, as it were a Bow-shot off: where the Horses abide, and a Boy to keepe them. Whereupon, when wee alighted there, and our Guide went with vs to the house of the Great *Chan*, a *Hungarian* Boy was present there, who knew vs (to wit) our Order. And when the men came about vs, and beheld vs as Monsters, especially because we were bare-footed, and demanded whether we did not lacke our feet, because they supposed we should strait-way haue lost them, that *Hungarian* told them the reason, shewing them the condition of our Order. Then the chiefe Secretary (who was a *Nestorian* and a *Christian*, by whose counsell and aduice almost all is done) came vnto vs, to see vs, and looked earnestly vpon vs, and called the *Hungarian* vnto him, of whom he demanded many Questions. Then we were willed to returne vnto our Lodging.

And when we returned, at the end of the Court towards the East, farre from the Court, as much as a Crosse-bow could shoot at twice, I saw a house, vpon the which there was a little Crosse, then I reioyced much, supposing there was some Christianitie there. I went in boldly and found an Altar very well furnished, for there in a Golden cloth were the Images of Christ and the blessed Virgin, and Saint *Iohn Baptist*, and two Angels, the lineaments of their bodies and garments distinguished with Pearle, and a great siluer Crosse hauing precious stones in the corners, and the middle thereof, and many other Embroyderings: and a Candle burning with Oyle before the Altar, hauing eight Lights. And there sate an *Armenian* Monke, some-what blacke and leane, clad with a rough hairen Coate to the middle legge, hauing vpon it a blacke Cloke of bristles, furred with spotted Skinnies, girt with Iron vnder his haire-cloth. Presently after wee entred in, before we saluted the Monke, falling flat vpon the ground, we sang, *Aue Regina Caelorum*, &c. and he rising, prayed with vs. Then saluting him, we sate by him hauing a little fire before him in a Pan. Therefore we told him the cause of our comming. And he began to comfort vs much, saying, that we should boldly speake, because we were the Messengers of God, who is greater then all men. Afterwards he told vs of his comming, saying, he came thither a moneth before vs, and that he was a Heremite of the Territorie of *Hierusalem*, and that the Lord appeared to him three times, commanding him to goe to the Prince of the *Tartars*: And when he deferred to goe, the third time God threatned him, and ouerthrew him vpon the ground, saying, he should dye, vnlesse he went; and that he told *Mangu Chan*, that if he would become a Christian, the whole World should be obedient vnto him; and the *French* and the Great Pope should obay him: and he aduised me to say the like vnto him. Then I answered, brother, I will willingly perswade him to become a Christian: (For I came for this purpose, to preach thus vnto all) I will promise him also, that the *French*, and the Pope will much reioyce thereat, and account him for a brother and a friend: but I will neuer promise, that they shall become his Seruants, and pay him Tribute, as these other Nations; because in so doing I should speake against my conscience, then he held his peace. We went therefore together to our Lodging, which I found a cold Harbour: and we had eaten nothing that day, so we boyled a little flesh and Millet in the broth of flesh to sup. Our Guide and his companions were drunken at the Court: and little care was had of vs. At that time the Messengers of *Vastace* were there hard by vs, which wee knew not: And the men of the Court made vs rise in great haste, at the dawning of the day. And I went bare-foot with them a little way, vnto the house of the said Messengers. And they demanded of them, whether they knew vs. Then that *Grecian* Souldier calling our Order and my companion to remembrance, because he had seene him in the Court of *Vastace*, with Frier *Thomas*, our Minister, and all his fellowes, gaue great testimony of vs. Then they demanded whether wee had peace or war with *Vastace*? we haue (said I) nor war nor peace. And they demanded, how that might be? Because (said I) their Countries are far remoued one from the other, and meddle not together. Then the Messenger of *Vastace* said wee had peace, giuing mee a caueat: so I held my tongue. That morning, my toes ends were frozen, so that I could no longer goe bare-foot: for

in

in those Countreyes the cold is extreame sharpe: and from the time when it beginneth to freeze it neuer ceaseth vntill May: nay, in the moneth of May it freezed every morning; but in the day time it thawed through the heate of the Sunne: but in the Winter it neuer thawes, but the Ice continues with every winde. And if there were any winde there in the Winter, as it is with vs, nothing could liue there; but it is alwaies milde weather vntill Aprill, and then the winds arise, and at that time when wee were there (about Easter) the cold arising with the winde killed infinite creatures. In the Winter little snow fell there: but about Easter, which was in the latter end of Aprill, there fell so great a snow, that all the streets of *Caracorum* were full; that they were fayne to carrie it out with their

Frost vntill the moneth of May.

Easter in the T end of the end of Aprill. And great Snow in the end of Aprill.

Shauing.

Respect of Priests.

From the first Easterne Land, to furthest Westerne Strand, Let vs Christ laud and sing Blest Virgins Sonne, our King

Chap. 30. Of the Admitting of the Friars to Mangu Chan, and his description, and their conference with him. The description of Mangu Chan.

Drinke of Rice is cleere, and saoury, and like to white Wine. The Indians call it Racke.

The Oration of Frier William to Mangu Chan.

The like Letters you haue of King Edw. 2. before 4. 8. c. 7. for another Friar.

Baatu

10 Carts. Then they first brought vs (from the Court) Ramskin Coats, and Breeches of the same, and Shooes, which my Companion and Interpreter receiued. But I thought I had no need of them, because I supposed my Pelt-garment (which I brought from *Baatu*) was sufficient for me.

Then the fift of Ianuarie we were brought vnto the Court: and there came *Nestorian* Priests vnto me, (I not knowing they were Christians) demanding which way we worshipped: I said, vnto the East. And this they demanded because wee had shauen our beards by the aduice of our Guide, that wee might appeare before *Chan* according to the fashion of our Countrey: whereupon, they thought wee had bene *Tuinians* (to wit) Idolaters. They made vs also expound out of the Bible. Then they demanded what reuerence wee would doe to *Chan*, whether after our owne fashion, or theirs: To whom I made answer. Wee are Priests, giuen to the service of God; Noblemen in our Countrey will not suffer Priests to bow their knees before them, for the honour of God; neuerthelesse, wee will humble our selues to all men, for the Lords sake. Wee came from a farre Countrey. If yee please, wee will first sing prayes vnto God, who hath brought vs safe hither from a farre; and after, wee will doe whatsoever pleaseth the Lord; with this exception, that he command vs nothing which may bee against the worship and honour of God. Then they entring into the house, deliuered what wee had said. So their Lord was contented. And they set vs before the gate of the house, lifting vp the Felt which hung before the gate. And because it was Christmas wee began to sing,

30 *A Solis ortu cardine,
Et usque Terræ limitem,
Christum canamus Principem,
Natum Maria Virgine.*

And when wee had sung this Hymne, they searched our legs, and our bosoms, and our armes, whether wee had Knives about vs. They made our Interpreter vngird himselfe, and leaue his Girdle and his Knife, without in the custodie of a Doore-keeper.

Then we came in. And in the entrance there stood a Bench with Cosmos, by the which they make our Interpreter stand; and caused vs to sit vpon a Forme before the Ladies. The whole house within was hanged with Cloth of Gold: and on a certaine Hearth in the middle of the house, there was a fire made of thornes and Wormewood roots (which grow there very bigge) and Oxe dung. But he sat vpon a Bed clothed with a spotted skin or Furre, bright, and shining like a Seales skin. Hee was a flat-nosed man, of a middle stature, about the age of fife and fortie yeeres: and a little pretie young woman (which was his wife) sat by him, and one of his daughters, *China* by name, (a hard-fauoured woman) marriageable, with other little ones, sat next vnto them vpon a Bed. For that was the house of a certaine Christian Ladie, whom he dearly loued, by whom he had the foresaid daughter: and hee married that young wife beside: but yet the daughter was Mistresse of all that Court, which was her Mothers. Then he made them aske vs, what we would drinke, whether Wine, or *Ceracina*, that is, drinke made of Rice, or *Caracofus*, that is, cleere Cowes milke, or Ball, that is, Mede made of Honey: for they vse these foure kinds of Drinckes in the Winter. Then I answered, Sir, wee are not men who take pleasure in drinke. What pleaseth you shall content vs. Then he commanded drinke of Rice to be giuen vs, cleere and saoury, as white Wine: whereof I tasted a little for reuerence of him. And our Interpreter (to our misfortune) stood by the Butlers: who gaue him much drinke, and hee was quickly drunke. Then *Chan* caused Falcons, and other birds to bee brought vnto him, which he tooke vpon his fist, and lookes vpon them: and after a long time he commanded vs to speake. Then we were to bow the knees. And hee had his Interpreter, a certaine *Nestorian*, whom I knew not to bee a Christian; and wee had our Interpreter, such an one as he was, who now also was drunke. Then I said, *Wee first giue thanks and praise to God, who hath brought vs from so removed parts of the World, to see Mangu Chan, to whom God hath giuen so great power vpon Earth: and wee beseech our Lord, by whose command wee liue and die, that he would grant him a long and a prosperous life.* (For this they desire, that men pray for their liues.) Then I told him: Sir, *Wee haue heard of Sartach that he was a Christian; and the Christians who*

60 *heard it, but specially the French King, reioyced: wherefore wee came vnto him, and our Lord and King hath sent him Letters by vs wherein were words of peace: and amongst other things, hee testifieth of vs, whose seruants wee are, and intreated him to suffer vs to abide in his Countrey. For it is our office to teach men to liue according to the Law of God. And hee sent vs to Baatu his father: and*

D 2

Baatu hath sent us hither unto you. You are they to whom God hath given great Dominion upon earth; We therefore intreat your Highnesse, to give vs leave to continue in your Countrey to doe the service of God for you, your Wives and Children. Wee haue neither Gold nor Siluer, nor precious stones to present vnto you, but our selues; whom we present to serue, and pray vnto God for you. At the least, give vs leave to continue while the cold be past. My Companion is so weake, that hee cannot by any meanes trauaile on Horse-backe without hazzard of his life. For my Companion willed me, and aduised me, to craue leave to stay. For we supposed we must returne to Baatu, vlesse of his speciall Grace he gaue vs leave to stay. Then he began so answer: Euen as the Sunne spreads his beames euery where, so our power and Baatues spreads it selfe euery where: so that wee haue no neede of your Siluer and Gold. Hitherto I vnderstood my Interpreter: but further, I could not perceiue any perfect sentence. Whereby I easily found hee was drunke, and Mangu Chan himselfe was drunke also, as I thought. Yet with this, (as it seemed to mee, hee ended his speach) that he was displeased that we came first to Sartach, before wee came to him. Then seeing the defect of my Interpreter, I held my peace, this onely excepted, that I intreated his Highnesse hee would not be displeased, for that which I spoke of Gold and Siluer; because I spoke it not that he had need of such things, or desired them, but because we would willingly honour him with temporall and spirituall things.

The answer of Mangu Chan, not well vnderstood and delivered by a drunken Interpreter.

Caracorum ten daies iourney from the Court of Mangu Chan, toward the North, as appeareth, Ch. 36.

Chap. 31. Of Pascha, of Mentz in Lotharingia, and William Bouchier the Goldsmith, a Parisian. Building in request.

They also reckon by Moones in East India.

Then he made vs rise, and sit downe againe; and after some few words, doing our dutie to him, we went out, and his Secretaries, and that Interpreter of his (who had the bringing vp of one of his Daughters) went together with vs. And they began to bee very inquisitiue of the Kingdome of France, whether there were many Rams, Oxen and Horses there, as if presently they should enter and take all. And oftentimes I was faine to bridle my selfe much, in dissembling anger and indignation. And I answered, There are many good things there which yee shall see, if yee happen to come thither. Then they appointed vs one, who should haue care of vs. And we went vnto the Monke: and when we came out againe, ready to goe to our lodging, the foresaid Interpreter came vnto vs; saying, Mangu Chan hath compassion on you, and giues you two moneths time to stay. Then the extreame cold will be past, and he sends to you: Here within ten daies iourney there is a good Citie, called Caracorum, if yee will go thither, he will cause necessarie things to be giuen you: but if yee will abide heere, yee may, and yee shall haue necessities: yet it will be a troublesome thing for you to follow the Court. And I answered: The Lord preserue Mangu Chan, and grant him a good and long life. We haue found this Monk heere, whom we thinke to be an holy man, and that by the good pleasure of God he came into these parts, wherefore we would willingly stay with him, because wee are Monkes, and wee would pray together for the life of Chan. Then he held his peace and departed. And we went vnto our house, which we found very cold, and without any Fuell, as yet fasting, and it was night. Then he, to whom we were recommended, provided vs Fuell, and a little meate. Our Guide was now to returne to Baatu, who desired a Carpet of vs; which (by his Commandement) we left in the Court of Baatu: which we gaue him, and he peaceably departed so, kissing our right hand, and confessing his fault, if he suffered vs to indure hunger and thirst vpon the way. We pardoned him, crauing pardon of him and his whole Family, if we had giuen them any euill example.

A Certaine Woman of Mentz in Lotharingia, called Pascha, found vs, who made vs great Acheere, according to her power, who belong to the Court of that Lady, which was a Christian, of whom I spoke before: who told vs of her strange pouertie which she indured before she came to the Court; but now she was well to liue, for she had a young Husband, a Rutenian, (by whom she had three very faire Children) who was skilfull in building, which amongst them is an excellent Art. Moreouer, she told vs, that at Caracorum, there was a certaine Goldsmith, called William, borne at Paris; whose surname was Bouchier, and his Fathers name Lawrence Bouchier, and she thinketh he hath a Brother yet vpon the Great Bridge, called Roger Bouchier. And she told me, that he had a certaine young man which he brought vp, whom hee accounted as his Son, who was an excellent Interpreter. But Mangu Chan deliuered to the foresaid Goldsmith, three hundred Iascots, that is, three thousand Markes, and fiftie Worke-men to make a piece of worke, so that she feared he could not send his Sonne vnto me. For she heard some say vnto her in the Court, The men which came from your Countrey are good men, and Mangu Chan would willingly speak vnto them, but their Interpreter is nothing worth: therefore she was carefull for an Interpreter. Then I writ vnto the foresaid Goldsmith, certifying him of my comming hither, and requesting him, that if he could, he would send me his sonne. And he wrote me answere, that he could not that Moone, but the next, his worke should bee perfected, and then he would send him vnto me. We stayed therefore with other Messengers. And it is otherwise with Messengers in Baatu's Court, then in the Court of Mangu Chan. For in the Court of Baatu, there is one Iani on the East side, who receiuet all such as come from the West, and so of other Countries of the world: But in the Court of Mangu, they are all together vnder one Iani, and they may see and visit one another. In Baatu's Court they know not one

10

20

30

40

50

60

one another, and know not one of another, whether hee be a Messenger or no; because they know not one anothers lodging, nor see one another but in the Court: and when one is called, perchance another is not called. For they goe not to the Court, vnlesse they bee sent for. Wee found there a certaine Christian of *Damascus*, who said he came in behalfe of the *Soldan of Mons Regatis*, and of *Crac*; who desired to become friend and tributarie to the *Tartars*.

Crac is a strong
fortresse of the
Templars in
the holy Land.

THE yeare also before I came thither, there was a certaine Clerke of *Acon*, who called himselfe *Raimund*, but in truth his name was *Theodolus*; and he tooke his journey from *Cyprus* with *Frier Andrew*, and went with him into *Persia*, and got him certaine Instruments of *Amoritus* there in *Persia*, who abode there after *Frier Andrew*. *Frier Andrew* returning, hee went forward with his Instruments, and came to *Mangu Chan*: who being demanded wherefore he came, said, That he was with a certaine holy Bishop, to whom the Lord sent Letters from heauen, written in golden Characters, and commanded him to send them to the Emperour of the *Tartars*, because he should bee Lord of the whole Earth, and that he should perswade men to make peace with him. Then *Mangu* said vnto him; If thou hadst brought those Letters which came from heauen, and the Letters of thy Lord, then hadst beene welcome. Then he answered, That he brought Letters, but they were with other things of his, vpon a certaine wilde and pampered Gelding, which escaping fled from him through the Woods and Mountaines, so that he had lost all. And it is very true, that many such chances often happen: wherefore a man must very warily hold his Horse when he alighteth for necessitie. Then *Mangu* demanded the name of the Bishop. He said, he was called *Odo*. Whereupon he told him of *Damascus*, and *Master William*, who was Clerke of the Lord Legat. Then *Chan* demanded in whose Kingdome it was? To whom he made answer, That it was vnder a certaine King of the *Frankes*, called *Moles*: (for he had heard of that which happened at *Mallora*; and he would haue said, that they were of your Seruants) moreover, hee told *Chan* that the *Saracens* were betweene the *Frankes* and him, who hindred his way. But if the way had beene open, he would haue sent Messengers, and willingly haue made peace with him. Then *Mangu Chan* asked him, If hee would bring his Messengers to that King, and that Bishop? He told him he would, and also to the Pope. Then *Mangu* caused an exceeding strong Bow to bee made, which two men could scarce bend, and two Arrowes, whose heads were of Siluer, full of holes, which sing when they are shot like a whistle. And he inioyned *Moal* whom hee should send with the said *Theodolus*; Thou shalt goe to that King of the *Frankes*, to whom this man shall bring thee, and thou shalt present him with these in my behalfe, And if he will haue peace with vs, we will winne the Countrey vpon the *Saracens*, euen home to him, and will grant him the rest of the Countrey vnto the West: If otherwise, bring backe the Bow and Arrowes vnto vs, and tell him we shoot farre, and smite strongly with such Bowes. Then he caused *Theodolus* to goe forth, whose Interpreter *Master Williams Sonne* was, and in his hearing, he said vnto *Moal*. Thou shalt go with this man, marke well the Waies, the Countries, and their Castles, Men and Manition. Then the young man blamed *Theodolus*, saying, He had done ill, in conducting the Messengers of the *Tartars* with him, for they went for no other cause, but to spy. Then hee answered, That he would set them on the Sea; that they should not know whence they came, or which way to returne. *Mangu* gaue also vnto *Moal* his golden Bull, or Tablet, to wit, a plate of Gold of an hand-breadth, and halfe a cubit long, wherein his commandement is ingrauen: Who so carrieth that, may command what he will, and it is done without delay. So then *Theodolus* came to *Vastacius*, determining to passe ouer to the Pope, that he might deceiue the Pope, as he had deceiued *Mangu Chan*. Then *Vastacius* demanded of him, whether he had Letters to the Pope, because he was a Messenger, and should conduct the Messengers of the *Tartars*? But, not being able to shew the Letters, he tooke him and spoiled him of all that hee had gotten, and cast him in prison. And *Moal* fell sicke and dyed there. But *Vastacius* sent backe the golden Tablet to *Mangu Chan*, by the seruants of *Moal*: whom I met at *Assaron* in the entrance into *Turkie*, who told mee what happened to *Theodolus*. Such Cosners runne through the world, whom the *Moallians* kill when they can take them. Now the *Epiphany* was at hand, and that *Armenian Monke*, *Sergius* by name, told me, That he should baptize *Mangu Chan* vpon the Holy-day. I intreated him to labour by all meanes that I might be present, that I might beare witnesse that I saw it: and hee promised he would.

Chap. 33.
Of *Mangu Chan*
holyday,
and how his
principall wife
and his eldest
sonne came to
the Diuine ce-
remonies of
the *Nestorians*,
and of their
the filthy bowings

THE feastiull day came, and the Monke called me not, but at fixe of the clocke I was sent for to the Court, and I saw the Monke with the Priests returning from the Court with his Crosse, and the Priests with the Censer and the Gospell. For that day *Mangu Chan* made a feast. And his custome is, that vpon such daies as his Sooth-sayers doe appoint vnto him feastiull, or with the *Nestorian* Priests sometimes make Holy-daies, that then he holds his Court: And vpon such daies the Christians come first with their furniture, and pray for him and blesse his Cup. They then departing, the *Saracen* Priests come and doe the like. Next after them, come the Idolatrous Priests and doe the same. And the Monke told me, that he onely beleeueth

the Christians, yet will haue all to pray for him; but he dyed, for he beleueth none, as you shall hereafter heare, yet all follow his Court, as flies doe Honey. And he giueth vnto all, and all men thinke they are his Familiars; and all prophesie prosperitie vnto him. Then wee sate before the Court a long space, and they brought vs flesh to eate. To whom I made answer, that we would not eate there, but if they would prouide vs meate, they should prouide it for vs at our house. Then they said, get yee home to your house; because you were invited for no other cause but to eate. Therefore we returned by the Monkes, who blushed at the Lye hee told me, wherefore I would not speake a word of that matter. Yet some of the *Nestorians* would affirme vnto mee, that he was baptized: to whom I said, that I would neuer beleue it, nor report it to others, seeing I saw it not.

The cold much
preuayleth.

The 13. of Ian.

Cotota Caten
the principall
Wife of Mangu
Chan.
Baliu the Son
of Mangu Chan.

We came to our cold and emptie house, they prouided vs bedding and Couerlets, they brought vs also fuell, and gaue vs three the carkasse of one little leane Ramme, meate for sixe dayes. And euery day a little Platter full of Millet, and lent vs a Caldron and a Triuet to boyle our flesh: which being sodden, we sod our Millet in the broath of the flesh. This was our meate, and it had well sufficed vs, if they had suffered vs to eate in peace. But there are so many hunger-starued, who are not prouided of meate: that, as soone as they saw vs dresse meate, they thrust in vpon vs, and must eate with vs. There I found by experience, how great a Martyrdome liberalitie is in pouertie. Then the cold began much to preuaile: and *Mangu Chan* sent vs three Pelt-coates of the Skinnes of *Papions* (*Papionum*), whose haire they turne outward; which we thankfully receiued. They demanded also, how we were prouided of necessary food? To whom I answered, that little meate sufficed vs, but we haue not an house wherein to pray for *Mangu Chan*. For our Cottage was so little, that we could scarce stand vpright in it, nor open our Bookes, as soone as wee made fire. Then they brought him word: and hee sent vnto the Monke to know, if hee would haue our company: who gladly answered, that hee would. From that time wee were prouided of a better house: and we went downe with the Monke before the Court, where none lodged but we, and their Sooth-sayers: but they lodged neerer, before the Palace of the greatest Lady: and wee in the furthest end towards the East, before the Palace of the last Lady. And that was done the day before *Ostabis Epiphania*. On the morrow (to wit) in *Ostabis Epiphania*, all the *Nestorian* Priests came together before day at the Chappell, and smote vpon a board, and sang Matines solemnely, and put on their Ornaments, preparing the Censer and the Incense.

And while they stayed wayting thus, behold, in the morning, the principall Wife *Cotota Caten* by name, (*Caten* is as much as *Ladie*, and *Cotota* her proper name) came into the Chappell with many other Ladies, and with her eldest Sonne, called *Baliu*, and other little ones of hers: And they cast themselues downe vpon the Earth, ducking after the manner of the *Nestorians*, and after this, they touched all the Images with their right hands, alwayes kissing their hands after they had touched, and after that, they gaue their right hands to all that stood about them in the Church. For this is the custome of the *Nestorians* when they come into the Church. Then the Priests sang many things, giuing the Lady Incense in her hand, and she put it vpon the fire: then they perfumed her. After this, when the day was cleere, shee began to put off the Ornament of her head, which is called *Baccha*: and I saw her bare scull, then shee commanded vs to goe forth, and as I went out, I saw a siluer Bason brought: whether they baptized her or no, I know not: but I know, they celebrate not Masse in a Tent, but in a standing Church. And in the Easter I saw them baptize, and hallow Fount with great Solemnitie, which now they did not.

And while we went into our house, *Mangu Chan* himselfe came, and went into the Church, or Oratory, and a Golden Bed was brought, on which hee sate by his Queene, ouer against the Altar. Then were we sent for, not knowing that *Mangu* was come. And the Doore-keepers searched vs, lest we should haue Knives about vs. But comming into the Oratory, hauing a Bible, and a Breuiary in my bosome, I first bowed downe vnto the Altar, and after to *Mangu Chan*: and so passing by, we stood betweene the Monke and the Altar. Then they made vs sing a Psalm after our manner, and chaunt it. But we sang of that prose, *Veni Sancte Spiritus, &c.* And *Chan* caused our Bookes to be brought vnto him, the Bible, and the Breuiarie: and diligently inquired concerning the Images, what they signified. The *Nestorians* answered him at their pleasure, because our Interpreter came not in with vs. And when I was first before him, I had the Bible in my bosome, which he commanded to be brought vnto him, who looked earnestly vpon it. Then he departed, and his Ladie remayned there, and distributed gifts to all the Christians there, shee gaue the Monke a *Iascor*, and to the Archdeacon of the Priests another: she caused a *Nassic* to be spread before vs (to wit) a piece of Cloth, as broad as a Couerlet of a Bed, very large, and a Buckeram, which when I would not receiue, they sent them to my Interpreter, who had them to himselfe. He brought the *Nassic* to *Cyprus*, which he sold for eightie Sultannies of *Cyprus*; but it was much the worle for the carriage. Then drinke was brought (to wit) drinke made of Rice and red Wine, like Wine of *Rechell*, and *Cosmos*. * Then the Ladie holding the cup full in her hand, desired blessing vpon her knees, and all the Priests sing with a loud voyce, and shee drunke

Vid. sup.*

it, vp: and I and my companion must sing. Another time, when all of them were almost drunke, then meate was brought (to wit) the carcase of one Ramme which was presently deuoured: and after that, great filhes, which are called Carpes, without Salt, or Bread: whereof I eate a little, so they passed the day, vntill the Euening. And when the Lady her selfe was drunke, she tooke her Chariot (the Priests singing) and went her way. The next Sunday, when (*There was a Marriage in Cana of Galily*) is read for the Gospell; *Chan* Sonne came (whose Mother was a Christian) and did the like, but not with so great Solemnitie. For he gaue no gifts, but made the Priests drunke, till they were drunke, and gaue them parched Millet to eate.

January 20.

Before the first Sunday in Lent, the Nestorians fast three dayes, which they call the Fast of Io-
nas, which he preached to the Niniuites. And the Armenians fast five dayes; which they call the Fast of Saint Sorkis, which is the greatest Saint amongst them.

The Nestorians beginne their Fast vpon Tuesday, and end it vpon Thursday; so that vpon Friday they eate flesh. And all that time I saw the Chancelor (to wit, the great Secretarie of State called *Bulgai*) make them a pittance of flesh vpon the Friday; and they blessed the flesh with great Solemnitie, as the Paschall Lambe is blessed: but he eate none with them, and this I learned of *Willielmus Parisiensis*, who was his very familiar friend. The Monke sent to *Mangu* to fast that weeke, which (as I heard) hee did: so that on the Sabbath of *Septuagesima* (at which time it is as it were Easter to the Armenians) wee went on Procession to the house of *Mangu*: and the Monke, and we two (being first searched whether wee had Knives) went in
20 with the Priests, before him. And while we went in, one of the Seruants went forth, carrying out the shoulder bones of Rammes, burnt to the blacknesse of Coales. Whereupon I maruelled greatly, what it should meane, whereof after I had inquired, I vnderstood, that hee neuer doth any thing, before he haue consulted with those bones. Whereupon hee doth not so much as suffer a man to enter his house, but first consulteth with that bone, which kind of Diuination, is thus done.

When he purposeth to doe any thing, he causeth three of those bones to be brought vnto him vnburnt; and holding them he thinketh of the thing, whereof he will consult, whether he may doe it or not: and then deliuereth the bones to bee burnt, and there are alwayes two little Roomes, hard by the house where he lyes, where those bones are burnt; which are diligently
30 sought for euery day thorow all the Leskar or Tent-dwelling. When they are burnt blacke, they bring them vnto him, then hee lookes vpon them, whether the bones (by the heate of the fire) be cleft right length-ways: then the way is open, that he may do it. But if the bones be cracked athwart, or round pieces flye out of them, then he doth it not; for the bone is alwayes cleft in the fire, or the thinne skin which ouer-spreadeth it. And if one of the three be cleft forth right, yet he doth it. When therefore wee went in before him (aduised before, that wee should not touch the threshold) the Nestorian Priests brought him Incenses, and he put it vpon the Censor, and they censured him. Then they sung, blessing his cup, and after them the Monke pronounced his blessing, and we must blesse last. And when he saw vs holding the Bible before our brest, he caused it to be brought vnto him, that he might see it, which hee diligently looked vpon. Then
40 after he had drunke, and the chiefe Priest had wayted on his Cup, they gaue the Priests drinke: After that, we went forth, and my companion stayed last. And when wee were without, my companion (when hee should haue gone out after vs) turned his face to *Chan*, bowing himselfe vnto him: and then, hastily following vs, he stumbled at the threshold of the house.

And when we went in haste toward the house of *Baltu* his eldest Sonne, they that obserued the threshold, layd hands on my companion, and made him stay, that hee should not follow vs, calling one, and commanding him to carrie him to *Bulgai*, who is the great Secretary of the Court, and iudgeth those that are arraigned of life and death. But I knew it not, yet when I looked backe, and saw him not comming, I thought they detayned him, to giue him some lighter garments: For he was weake, and so laden with Pelt-garments that he could scarce goe. Then
50 they called our Interpreter, and made him sit with him: but wee went to *Chan* eldest Sonnes house, who had two Wiues, and was lodged at the right side of his Fathers Court: who as soone as he saw vs comming, leaping from his bed whereon he sate, cast himselfe vpon the earth, smiting his fore-head against the ground, worshipping the Crosse, and arising, caused it to be set vpon a new cloth, in an high place by him, very honourably. He hath a Schoolemaster, a Nestorian Priest called *David*, a very Drunkard, who teacheth him. Then he made vs sit, and giue the Priests drinke, and hee also dranke, receiuing the blessing from them. Then wee went vnto the Court of the second Lady, which was called *Cora*, who followed Idolaters: whom wee found lying sicke a bed. Then the Monke made her rise out of her bed, and worship the Crosse, bowing her knees thrice, and ducking toward the ground: he standing with the Crosse at the West-
60 side of the house, and she on the East: this being done, they changed places, and the Monke went with the Crosse vnto the East, and shee vnto the West. And hee boldly commanded her (although she were so weake, that she could scarce stand vpon her feet) that shee should cast herselfe downe thrice againe, and worship the Crosse, toward the East after the manner of the Christians: which she did, and he taught her to make the signe of the Crosse vpon her forehead.

Of the Fast of the Nestorians, and Armenians, and of their Processions vnto the Court of *Mangu Chan* his eldest Son, and Wiues. Saint Sorkis. Lent. *Mangu Chan* Court visited with Processions.

How they diuine by the shoulder blades of Rammes burnt blacke. In *M. Ienkinson* Voyage among the Tartars, ye may reade of such a Diuination.

Threshold-Superstition. They doe the like in Florida.

Baltus Court who was eldest Son of *Mangu Chan*.

After

After she lay downe vpon her bed, and praying for her, we went vnto the third house, where a Christian Lady vsed to be: who being dead, a young woman succeeded her, who together with the Daughter of her Lord, ioyfully receiued vs: and all that whole house reuerently worshipped the Crosse. And she set it vpon a Veluet cloth in an high place, and shee caused meate to bee brought (to wit) the carcase of one Ramme, which being set before the Ladie, shee caused it to be distributed to the Priests. But I and the Monke were very warie of the meate and drinke, for the meate being eaten, and much drinke drunke, wee were to goe to the Damosell *Cerina*, who lodged behind that great house, which was her Mothers: who at the comming in of the Crosse, cast her selfe vpon the Earth, and worshipped it very deuoutly, because shee had bene well taught so to doe, and shee set it in a high place, vpon a piece of silke. And all those clothes 10 whereon the Crosse was set, were the Monkes.

The Court of the third Lady. The Armenians and Nestorians are ashamed to shew Christ fastned to the Crosse. *Mangu* built a Church. The Court of the fourth Lady.

Drunkenesse not reprocable among the Tartars.

Chap. 35. How Lady *Cota* was cured of *Sergius* the counterfeit Monke. Licence is granted him to carrie the Crosse aloft.

Rubarbe and the Crosse Miracle-workers with credulous Superstition. Holy water not knowne in the East.

Sergius, the Armenians Lye.

A certaine *Armenian* brought this Crosse who came with the Monke (as he said) from *Hiernsalem*; and it was of siluer, weighing about some foure markes; and it had foure Precious Stones in the corners, and one in the middle. It had not the Image of our Sauour (because the *Armenians* and the *Nestorians* are ashamed, that Christ should appeare nayled to the Crosse) and hee had presented it (by the Monke) to *Mangu Chan*. And *Mangu* demanded of him what hee desired? to whom he answered, That he was the Sonne of an *Armenian* Priest, whose Church the *Saracens* had destroyed, and craued his helpe for the building againe of that Church. Then hee asked him, for how much it might be built againe: he answered, for two hundred lascots (that is) for two thousand markes: and he commanded Letters to be giuen him, to him who receiued the 20 Tribute in *Persia*, and *Armenia* the greater, that they should pay him the said summe of siluer. This Crosse the Monke carried with him euery where. And the Priests seeing the gaine thereof, began to enuie him. Wee were therefore in the house of the said Damosell, and shee gaue the Priests much drinke. From hence wee went vnto the fourth house, which was the last in number and honour. For he vsed not to come often to that Ladie, and her house was very old, and her selfe nothing gracious. But after Easter *Chan* made her a new house, and new Chariots. She likewise as the second knew little or nothing of Christianitie, but followed Soothsayers, and Idolaters. Yet at our comming in, shee worshipped the Crosse, as the Monke and the Priests taught her. There also the Priests dranke againe. And from that place wee returned to our Oratorie, which was neere thereabouts: the Priests accompanying vs with great howling and out-cryes in their drunkenesse, which there is reprehensible neither in man nor woman. 30 Then my fellow was brought home, and the Monke sharply rebuked him because he touched the threshold. On the morrow *Bulgai* came (who was a Iustice) and diligently inquired, whether any had warned vs to take heed of touching the threshold. And I answered, Sir, wee had not our Interpreter with vs: how could we vnderstand? Then hee pardoned him. But would neuer after suffer him to come into any of the houses of *Mangu Chan*.

IT happened afterwards, that the same Ladie *Cota*, which was sicke about *Septuagesima*, was sicke almost vnto death: and diuination by Lots of the Idolaters could profit her nothing. Then *Mangu* sent vnto the Monke, demanding of him, what might bee done for her. And the Monke indiscreetly answered, that if shee were not cured, hee should cut off his head, hauing made that answere, the Monke called vs, declaring the matter vnto vs with teares, intreating to watch with him that night in Prayer: which we did. And he had a certayne Roote which is called Rubarbe; and hee cut it almost to powder, and put it in water, with a little Crucifixe which he had, wherein the Image of our Sauour was aduanced: whereof he reported, that by it he knew, when the sicke should recouer or dye. For if they should escape, it stucke to the breest of the sicke, as if it were glued, if otherwise it stucke not at all. And I still thought that Rubarbe had bene some holy Relike, which he had brought from the Holy Land of *Hiernsalem*. And he gaue all sicke persons of that water to drinke: so that it could not bee, but their bowels should be griped with so bitter a Potion: which alteration in their bodies they accounted a Miracle. Then I told him (when he was about to make such a water) that hee should prepare some of that Holy water, which is made in the Church of *Rome*, which hath great vertue to expell 50 Deuils: because I vnderstood shee was vexed of a Deuill. And at his intreatie, wee made him some Holy water, and he mingled Rubarbe, and put his Crucifixe all the whole night in the water to temper it. I said moreouer, that if hee were a Priest, that the Order of Priest-hood hath great power to expell Deuils. And he said it was very true, and yet hee lyed, because hee had no order, nor knew any one Letter: but was a Weaver, as I vnderstood after, in his Countrey, when I returned. On the morrow therefore I, and the Monke, and two *Nestorian* Priests went vnto the foresaid Ladie. And shee was in a little house, behind her greater house. When wee came in, shee late in her bed, and worshipped the Crosse, and set it honourably by her vpon a cloth of Silke, and drunke of the blessed water with Rubarbe, and washed her breest. And the Monke requested me to reade a Gospell ouer her, so I read the Passion of our Lord according vnto *Iohn*. At length she was cheered, and felt her selfe better: and shee caused foure lascots to bee brought, which she first layd at the feet of the Crosse, and after gaue me to the Monke, and reached 60

ched me one, which I would not receiue. Then the Monke stretching forth his hand, tooke it, and gaue either of the Priests one: so that, at that time shee gaue fortie Markes. Then shee caused Wine to be brought, and gaue it the Priests to drinke; and I must drinke thrice from her hand, in honour of the Trinitie. Shee began also to teach mee the Language, jesting with mee, because I was dumbe, not hauing any Interpreter.

On the morrow we returned to her againe. And *Mangu Chan* hearing that we came that way, made vs come in vnto him, because hee vnderstood that the Lady was somewhat better; and we found him with a few seruants, supping liquid Tam, to wit, meat made of paste, for comforting the head: and the burnt shoulder-blades of a Ram lay before him: and he tooke the Crosse in his hand, but that hee kissed or worshipped it, I saw not: but looked vpon it, and asked some questions, I know not what. Then the Monke craued leaue to carry the Crosse aloft vpon a Lance; because I had spoken to the Monke before concerning this. And *Mangu* answered, Carry it as you thinke best to doe it. Then doing our duty to him, wee went to the foresaid Ladie, and we found her lustie and cheerfull; and she still drunke of the blessed Water, and wee read the Passion ouer her. And those miserable Priests neuer taught her the Faith, nor aduised her to bee baptised. But I sate there mute, not able to speake any thing; but shee still taught me the Language: and the Priests neuer find fault with any kind of Sorcerie. For there I saw foure swords halfe drawne out of the sheath, one at the head of the Ladies bed, another at the feet, and two other, on either side of the doore one. I saw also there one silver Chalice, of our Chalices, which peradventure was taken or stolne out of some Church of *Hungary*; and it hung against the walls full of ashes, and vpon those ashes there was a blacke stone. And concerning such things, the Priests neuer teach them that they are euill: Nay, they themselves doe, and teach such things. We visited her three daies, so that shee was restored to perfect health. After that, the Monke made a Banner full of Crosse, and got a Cane as long as a Lance, and we carried the Crosse aloft. I honored him as my Bishop, because hee could speake the Language; yet hee did many things which pleased me not: for he caused a Chaire which may be folded to bee made for him, such as Bishops vse to haue, and Gloues, and a Cap of Peacocks feathers, and vpon it a little Crosse of gold: I was well pleased with the Crosse. Hee had scabbed feete, which hee laboured to grace with ointments, and was very presumptuous in speech. The *Nestorians* also repeated certaine Verses of the Psalter (as they said) vpon two rods, which were ioyned together, being held of two men. The Monke was present at such things. And many other vanities appeared in him, which displeased me. Yet wee ioyned our selues to his societie for the honor of the Crosse. For we carried the Crosse aduanced through all the Tents singing: *Vexilla Regis prodeunt, &c.* Wherevpon the *Saracens* were much dismayed.

Since we came to the Court of *Mangu Chan*, he rode but twice towards the South: and from that time he beganne to returne towards the North, which was toward *Caracorum*. Wherevpon I noted all the way, a thing of which Master *Baldwin* of *Hannonia* had spoken to mee at *Constantinople* (who was there) that he had seene this onely wonderfull, that he alwaies ascended in going, and neuer descended. For all Riuer came from the East into the West, either directly or indirectly (that is to say) bending towards the South or North. And I enquired of the Priests which came from *Cataya*, who testified this same. From that place where I found *Mangu Chan*, vnto *Cataya*, were twentie daies iourney, going towards the South and East. To *Onan Kerule*, which is the proper Countrey of *Moall*, where the Court of *Chingis* is, were ten daies iourney right East. And in those parts of the East there was no Citie: yet there were people which are called *Su-Moall*, that is to say, *Moall of the Waters*: for *Su* is as much to say as *Water*. These people live vpon Fish, and hunting, hauing neither Flocks nor Herds. Towards the North likewise, there is no Citie, but a poore people feeding Cattell, who are called *Kerkis*. The *Orangei* are also there, who binde smoothe filed bones vnder their feete, and thrust themselves forward vpon the congealed Snow and Ice, with such swiftnesse, that they take Birds and Beasts. And many other poore people there are on the North side, so farre as they may spread themselves for the cold. And they ioyne on the West, with the Countrey of *Pascatir*, which is *Hungaria the Greater*, whereof I haue spoken before. The bound or limit of the North corner is not knowne, for the extremitie of the cold: for in that place there are continuall spires or heapes of Snow. I was inquisitiue of the Monsters or monstrous men, whereof *Isidorus* and *Solinus* make report. They told me they neuer saw any such, whereof we much wonder, whether it bee true or no. All the Nations afore said (although but poore) yet they must serue in some trade: for it was the commandement of *Chingis*, that none should bee free from seruice, till hee were so old, that he could labour no longer, by any meanes. Vpon a time a certaine Priest of *Cataya* sate with mee, clothed with a red coloured cloth; and I demanded of him whence hee had such a colour. And he told me, that in the East parts of *Cataya* there were high craggie Rocks, wherein certaine Creatures dwell, hauing in all parts the shape of men, but that they bow not the knees, but walke (I know not how) leaping: which are not aboue one cubit long, and their whole body is couered with haire; who haue their abode in Caves which no man can come vnto. And they of Apes, or else an embleme or Apish fable, and perhaps by the *Shimon* inuented, to sell their wares the

that hunt them goe vnto them, and carry strong drinke with them, as strong as they can make, and make pirs in the Rocks like Cups, filling them with that strong drinke. For *Cataia* as yet hath no Wine (but now they beginne to plant Vineyards) for they make drinke of Rice. The Hunters therefore hide themselves, then the foresaid Creatures come out of their holes, and taste the said drinke, and crie *Chin-chin*. Then they come together in great multitudes and drinke the said drinke, and are made drunke, so that they sleepe there. Then the Hunters come, and bind them hand and feete while they are sleeping; and after, they open the Veine in their necke, and draw forth three or foure drops of bloud from euery one, and let them goe free. And that bloud (as he told me) is most precious to die purple.

He told it also for truth (which neuerthelesse I doe not beleue) that there is a Prouince beyond *Cataia*, into the which, at whatsoeuer age a man enters, he continueth in the same age wherein he entered. *Cataia* is vpon the Ocean. And Master *Willielmus Parisiensis* told me, that the same Messengers of certaine people which are called *Taute* and *Manse*, who inhabit Ilands, whose Sea is frozen in the winter, so that the *Tartars* may inuade them; who offered two thousand Tumen or Iascots yeerely, so they would let them liue in peace. Tumen is a piece of money containing ten Markes. The common money of *Cataia* is Paper made of Bombaste, the breadth and length of an hand, vpon the which they imprint lines, like the Seale of *Mangu*. They write with a Penfill wherewith Painters paint; and in one figure they make many letters comprehending one word. The people of *Thebet* write as we doe, and they haue Characters very like ours. They of *Tangut* write from the right hand vnto the left, as the *Arabians*, and multiply the lines ascending vpward. *Ingur*, as aforesaid, from aboute downeward. The common money of the *Rutenians* are little spotted and griseld skins. When we came with the Monke, hee charitably admonished vs to abstaine from flesh; and that our seruants should eate flesh with his seruants; but he would promise vs Meale, and Oyle or Butter. Which wee did, though it much grieved my Companion, by reason of his weakenesse: wherefore our foode was Millet and Butter, or Paste sodden in water with Butter, or sowre Milke, and vnleauened bread baked in Oxedung, or Horse-dung.

NOW *Quinquagesima* came, which is the Lent-time to all the people of the East. And the greatest Ladie *Cotota* with all her company, fasted that weeke, who came euery day to our Oratorie; and gaue meate vnto the Priests, and other Christians, whereof a great multitude flocked thither the first weeke, to heare their dutie. And she gaue to me and my Companion, to each a Coate and Breeches of gray. Samit (Samito) furred with course haire (Stuppa setz) because my companion complained much of the weight of his Skinnies, which I receiued for my fellowes comfort, excusing my selfe neuerthelesse, that I would not weare such clothes. I gaue to my Interpreter what belonged to me. Then the Porters of the Court seeing that so great a multitude came daily to the Church, which was within the bounds of the keepers of the Court, they sent one of their fellowes vnto the Monke, declaring vnto him, that they would not haue so great a multitude come together within the precincts of the Court. Then the Monke roughly answered, that he would know whether they commanded this from *Mangu Chan*? hee added moreouer certaine threatening speeches, as if he would accuse them to *Mangu Chan*. Then they preuenting him, accused him before *Mangu*; That he was too full of words, and that he gathered together too great a multitude to heare him speake. Afterward, the first Sunday in Lent, being called to the Court (and the Monke being shamefully demanded whether hee had a Knife, inso much that he put off his shooes) wee came in before *Chan* himselfe, who hauing the burnt shoulder-blade of a Ramme in his hand, looked vpon it, and (as it were) reading in it, began to reprove the Monke, demanding, that seeing he was a man that should pray vnto God, why hee spoke so much with men? but I stood behind with my head bare: and *Chan* saying vnto him, Why dost thou not put off thy Cap, when thou comest before me, as that *Francke* doth? and commanded me to be called neerer. Then the Monke being much abashed, put off his Cap; contrary to the custome of the *Greekes* and *Armenians*. And when *Chan* himselfe had spoken many things sharply vnto him, wee went out. Then the Monke deliuered me the Crosse to beare to the Oratorie, because he could not carry it for shame.

After a few daies he was reconciled vnto him, promising that he would goe to the Pope, and that he would bring all the Nations of the West to his obedience. Whereupon, he returning to the Oratorie after that conference had with *Chan*, began to enquire of mee touching the Pope, if I beleued he would see him if he came vnto him in the behalfe of *Mangu*, and if hee would furnish him with Horses vnto Saint *Iames*? He demanded also of you, if I thought you would send your sonne vnto *Mangu*? Then I counsailed him, that he should take heede that hee did not promise lyes to *Mangu*, because the last errour should bee worse then the first; and that God needeth not our lyes, that we should speake deceitfully for him.

At that time there arose a certaine question betweene the Monke and a Priest called *Tonas*, a Learned man, whose father was an Archdeacon, and the other Priests accounted him for a Master and an Archdeacon. For the Monke said, That man was created before Paradise, and that the

the Scripture said so. Then was I called to bee an arbitrator of that question. But I being ignorant that they contended about this, answered, that Paradise was made vpon Tuesday, when the other Trees were made, and that Man was made the sixth day. Then the Monke began to say, Did not the Deuill bring earth the first day from the foure parts of the world; and making clay made the bodie of man therewith, and God inspired his soule? Then hearing this Hæresie of the Monke, and that he so publickly and shamelesly recited it, I reprovèd him sharply, saying, he should put his finger vpon his mouth, because he knew not the Scriptures, and that he should take heed, that he said it not, whereby he might be faulty: And he began to mocke me, because I was ignorant of the Language. I departed therefore from him, going to our house. It fell out afterwards, that he and the Priests went on Proceßion to the Court, without calling mee; because the Monke spake not to me for the foresaid reproofe, nor would he carrie me with him, as he was wont. When therefore they came before *Mangu*, (I being not seene among them) hee earnestly demanded where I was, and why I came not with them? The Priests fearing, excused themselves. But returning, they told me the words of *Mangu*, and murmured at the Monke. After this, the Monke was reconciled to me, and I to him, intreating him, that he would helpe me with his Language, and I would helpe him in the holy Scripture. For a brother that is helper of a brother, is as a strong Citie. After the first weeke of fasting, the Ladie ceased to come vnto the Oratorie, and to giue meat, and drinke, which wee were wont to haue, for the Monke suffered it not to be brought, saying, that Mutton fat or Suet was put in the confection thereof: and shee gaue no Oyle, but very seldome: so that we had nothing but browne Bread, and past boyling in water, that we might suppe broath; because we had no water, but of dissolved Snow, or of Ice, which was exceeding nought. Then my Companion began to be much grieved: so I acquainted *Dauid* (the Schoole-master of *Chani* eldest sonne) with our necessities, who made report thereof to *Chan*: and he commanded to giue vs Wine, Flowre, and Oyle. Neither the *Nestorians*, nor the *Armenians*, eate fish, by any meanes, in the Lent. Then they gaue vs a bottle of Wine. The Monke said he would not eate but on the Sunday: and then the Ladie her selfe sent meat of boyled paste with vinegar to suppe. But he had a Chist by him vnder the Altar, whensoever hee was alone. Wee ate once a day, and that in great affliction: for as soone as they knew, that *Mangu Chan* had giuen vs Wine, most impudently they came in vpon vs like Dogs, both the *Nestorian* Priests, who were drunke all the day in the Court, and the *Moalians* also, and the seruants of the Monke. The Monke also, when any came vnto him, to whom he would giue drinke, he sent to vs for Wine. So that, the Wine caused our greater affliction then comfort; because wee could not denie it without offence. If wee gaue, wee wanted our selues, nor durst we, that being spent, desire any more from the Court.

Monkes, Manichean blasphemie of the Creation.

Snow-water, or water of Ice, exceeding naught. No fish eaten in Lent.

Hypocriticall feast-fast.

About mid-lent Master *Williams* sonne came, bringing with him a faire siluer Crosse, made after the French fashion, hauing the Image of Christ all of siluer fastened vpon it at the top: which the Monkes and Priests seeing, put it away: this Crosse hee was to present in the behalfe of his Master to *Bulgai*, who was the chiefe Secretarie of the Court: which when I heard, I was offended. The same young man also declared to *Mangu Chan*, that the worke which he commanded to be made, was finished, which worke I described vnto you. *Mangu* hath at *Caracatum* a great Court, hard by the walls of the Citie, enclosed with a bricke-wall; as the Priories of Monkes are enclosed with vs. In that place, there is a great Palace, wherein he holdeth his drinkings twice a yeere: once in Easter, when hee passeth that way, and once in Summer, when he returneth. And this latter is the greater: because then all the Nobles (who dwell farre some two moneths iourney off in any place) meet together at his Court. And then hee giues vnto them gifts and garments, and shewes his great glorie. There are many other houses there, as large as Granges, wherein his victuals, and treasures are stored. In the entrance of that great Palace (because it was vnseemely to bring in bottles of Milke, and other drinckes) Master *William Parisiensis* made him a great siluer Tree, at the root whereof were foure siluer Lions, hauing one Pipe sending forth pure Cowes milke, and the foure Pipes were conuayed within the Tree, vnto the top thereof: whose tops spread backe againe downward: and vpon euery one of them was a golden Serpent, whose tayles twine about the bodie of the Tree. And one of those Pipes runs with Wine, another with Caracasmus, that is, clarified Whay; another with Ball, that is, drinke made of Honey, another with drinke made of Rice, called *Teracina*. And euery drinke hath his vessell prepared of siluer, at the foot of the Tree, to receiue it. Betweene those foure Pipes in the top, he made an Angell holding a Trumpet; and vnder the Tree, he made an hollow vault, wherein a man might be hid; and a Pipe ascendeth through the heart of the Tree vnto the Angell. Hee first made Bellowes, but they gaue not wind enough. Without the Palace there is a Chamber, wherein the drinckes are layd, and there are seruants readie there to powre it out, when they heare the Angell sounding the Trumpet. And the boughes of the Tree are of siluer, and the leaues and Peares. When therefore they want drinke, the Master Butler cryeth to the Angell, that he found the Trumpet. Then he hearing (who is hid in the

Chap. 38. A Description of the worke of William Bonchier, and of the Palace of *Mangu Chan* at *Caracatum*, into which Citie they entred on Palm-sunday.

Two moneths iourney.

The Description of a most artificiall siluer Tree.

the Vault) blowes the Pipe strongly, which goeth to the Angell. And the Angell sets his Trumpet to his mouth, and the Trumpet soundeth very shrill. Then the Seruants hearing, which are in the chamber, euery of them powre forth their drink into their proper Pipe, and the Pipes powre it forth from aboue, and they are receiued below in Vessels prepared for that purpose: Then the Butlers draw them, and carry them through the Palace, to men and women.

The description
of the Pa-
lace.

And the Palace is like a Church, hauing the middle Ile, and the two sides beyond the two reues of Pillars, and three gates on the South. And within before the middle gate stands the tree. And *Chan* himselfe sitteth in the North front, in an high place, that hee may bee seene of all. And there are two degrees of steps ascending vnto him, by the one, he that carryeth his cup commeth vp vnto him, and by the other he descendeth. That space which is in the middle, betwene the tree and the steps whereby they ascend vnto him, is voyde. For there standeth hee that wayteth on his Cup, and the Messengers, which bring Presents. And hee sitteth there aboue like a God. On the right side (to wit) toward the West are the men: on the left women. For the Palace stretcheth it selfe out in length from North to South by the Pillars. On the right side are places full of seates lifted vp, like the Sellar of an house, whereon his Sonnes and Brethren sit. On the left side is the like, where his Wiues and Daughters sit. One only woman sitteth there aboue by him, but not so high as hee. When therefore hee had heard, that the Worke was finished, hee commanded the chiefe Workeman to set it in his place, and make it fit.

The Sunday in
the Passion he
goeth towards
Caracorum.

And about Passion Sunday, hee went before with small houses, leauing his greater houses behind: And the Monke and we followed him; and he sent vs another Bottle of Wine. And hee passed betwene the hilly Countries, where there was great wind, and an extreame cold, and there fell a great Snow. Whereupon hee sent about mid-night to the Monke and vs, intreating vs to pray vnto God, that hee would mitigate that wind and cold, because all the beasts which were in the trayne were in ieopardie, especially because all that time they were with young and readie to bring forth. Then the Monke sent him Incense, requiring him to put it on the coales and offer it to God: which, whether he did, I know not. But the Tempest ceased, which had now continued two dayes, and now the third day drew neere. On Palme Sunday we were neere *Caracorum*: In the dawning of the day we blessed the Willow boughes, whereon as yet there appeared no bud, and about nine of the clocke we entred the Citie, carrying the Crosse aloft with the Banner, passing through the middle of the street of the *Saracens*, 30

They enter *Caracorum* on
Palme Sunday

where the Market and Faires are vnto the Church: and the *Nestorians* met vs on Procession. And entring into the Church, we found them prepared to celebrate the Masse: which being celebrated, they all communicated, and they asked mee, whether I would communicate? I answered that I had drunke before, and the Sacrament should not be receiued but fasting. Masse being said, it was now Euening. Master *William* brought vs with great ioy to his Inne to sup with him: who had a Wife, the Daughter of a *Lotharingian*, borne in *Hungarie*, who could speake the *French* and the Language of *Comania*. We found also there a certayne other man called *Basilus*, the Sonne of an *Englishman*, borne in *Hungarie*, who also was skilfull in the foresaid Languages. Supper being ended, they brought vs to our Cottage, which the *Tartars* had appointed vs, in a certayne plat of ground neere the Church, with the Oratory of the Monke. On the morrow *Chan* himselfe entred into his Palace. And the Monke and I, and the Priests went vnto him. They suffered not my companion to goe, because he stumbled at the threshold. I much deliberated with my selfe what I should doe, whether I should goe or no. And fearing offence, if I should depart from other Christians, and because it pleased him: and fearing lest that good might be hindred, which I hoped to obtaine, I chose rather to go, although I saw their actions full of Sorcery and Idolatrie: nor did I any other thing there, but pray for the whole Church with a loud voyce, and also for *Chan* himselfe, that God would direct him to the way of eternall saluation. We therefore went into that Court which was sufficiently ordered. And in the Summer Riuer is conueyed into euery place, whereby it is watered. After this we entred into the Palace, full of men and women, and stood before *Chan*, hauing the foresaid Tree at our backs, which with the Vessels thereof tooke vp a great part of the Palace. The Priests brought two little Loaves, and fruit in a Platter, which they presented vnto him, blessing them. And the Butler brought them vnto him sitting aloft in a very high place, much raised. And hee presently began to eate one of the Loaves, and sent another to his Sonne, and to a certayne yonger Brother of his, who was brought vp by a certayne *Nestorian*, and knew the Gospell, who also sent for my Bible, that he might see it. After the Priests the Monke said his Prayer, and I, after the Monke. Then he promised, that the next day he would come vnto the Church, which is great enough, and faire, and all the feeling aboue was couered with filke wrought with Gold. The next day he went his way, willing the Priests to excuse him, that he durst not come to the Church, because he vnderstood the dead were carried thither. But we, and the Monke remayned at *Caracorum*, and other Priests of the Court, that they might celebrate Easter there. 60

Mangu Chan
departeth
from *Caracorum*.

Maundie

MAundie Thursday drew neere, and Easter, and I had not our Vestments, and I considered the manner how the *Nestorians* made the Sacramentall Bread, and I was much troubled, what I should doe; whether I should receiue the Sacrament of them, or should celebrate it in their Vestments, and Chalice, and vpon their Altar, or should altogether abstayne from the Sacrament. Then there were a great multitude of *Christians, Hungarians, Alanians, Rutenians, Georgians*, and *Armenians*; all which had not seene the Sacrament since they were taken: because the *Nestorians* would not admit them to their Church, vnlesse they were baptized of them, as they said, yet they made no mention of this to vs. And they offered their Sacrament freely to vs, and made me stand in the doore of the Quire, that I might see their manner of Consecration. And also on the Vigill or Euen before Easter, by the Font, that I might see their manner of baptizing. They say, they haue of that Oyntment, wherewith *Mary Magdalene* anoynted the feet of our Lord, and they power in as much of that Oyle, with that which they lay aside, and kneade their bread therewith. For all those people of the East put fat in their bread, in stead of Leuen or Butter, or Suet of a sheepes tayle, or Oyle.

They say also that they haue of the flowre, whereof the bread was made, which the Lord consecrated: and alwayes powre out so much Oyle with it, as the flowre they lay aside. And they haue a Chamber hard by their Quire, and an Ouen, where they bake the bread, which they must consecrate with great reuerence. They therefore make one Loafe of an hand breadth, with the foresaid Oyle, which they first breake into twelue pieces, according to the number of the Apostles: and after diuide those pieces, according to the multitude of the people: and the Priest giues the bodie of Christ to euery one in his hand. And then euery man taketh it out of the Palme of his hand with reuerence, and stretcheth his hand to the top of his head.

The foresaid Christians, and the Monke himselfe were very earnest, intreating vs for Gods sake, that wee would celebrate. Then I made them bee confessed, by an Interpreter, as I could, reckoning vp the tenne Commandements, and the seuen deadly Sinnes, and other things, for the which a man ought to bee grieued, and confessed. All of them publikely excused themselves concerning Theft, saying, that without Theft they could not liue, because their Masters provided them neither food nor rayment. Then considering, that they had taken away the persons and their substance without iust cause, I said vnto them, that they might lawfully take necessaries, of the goods of their Masters, and I was readie to maintayne it to the face of *Mangu Chan*.

Some of them also were Souldiers, who excused themselves, that they must needs goe to the Warres, or else they should bee slaine; I firmly forbad them to goe against the Christians, and that they should not hurt them, they should rather suffer themselves to bee slaine, for so they should become Martyrs. And I said, that if any would accuse mee of this Doctrine before *Mangu Chan*, I would bee readie to preach the same in his hearing. For the *Nestorians* themselves of the Court were present, when I taught this; of whom I was suspicious, least they should report ill of vs. Then Master *William* caused an Iron to bee made for vs, to make Hosts, and hee had certayne Vestments which hee had made for himselfe: for he had some knowledge in Learning, and behaued himselfe as a Clerke. Hee caused the Image of the blessed Virgin *Marie* to bee grauen after the French fashion, and ingraued the History of the Gospell (in the Casements) very faire, and made a certayne siluer Boxe, to lay vp the bodie of Christ therein, and the Reliques, in certayne little holes cunningly made in the sides of the Boxe.

Hee made also a certayne Oratorie vpon a Chariot, very fairely painted with holy Histories. I therefore tooke his Vestments and blessed them, and wee made Hosts, after our manner, very faire; and the *Nestorians* assigned mee their Font for Baptisme, wherein there was an Altar. And their Patriarch sent them from *Baldach*, a square Hide like a portable Altar, made with Chrisme, which they vse in stead of consecrated Stone. Therefore I celebrated on the Day of the Lords Supper, in their siluer Chalice and Dish, which were very great Vessels; I did the like also on Easter day. And wee communicated the people with the blessing of God, as I hope. But they baptized in the Vigill of Easter more then threescore persons very orderly. There was great ioy generally among all Christians.

Then it hapned that Master *William* was grievously sicke, and when hee was vpon recoverye, the Monke visiting him, gaue him Rubarbe to drinke, so that hee had almost killed him. Then visiting him, when I found him so ill at ease, I asked him, what hee had eaten or drunke? And hee told mee, the Monke had giuen him the foresaid Potion, and hee drunke two little Dishes full, thinking it had beene Holy Water. Then I went to the Monke, and said vnto him, Either goe as an Apostle doing Miracles indeed, by vertue of Prayer, and the Holy Ghost, or doe as a Physician according to the arte of Medicine. You giue a strong

Chap. 40.
William Bonchier is sicke, the Monke giueth him Rubarbe; the Priest *Ionas* is sicke: Frier *William* admistrates.

reproue the Lords Supper vnto him, and anionteth him beeing readie to dye. Hee reproue the Monke for his

Potion of Physicke to drinke, to men not prepared, as if it were a certayne hollow thing, for the which you will incurre a foule scandall, if it come to the knowledge of men. From that time he began to feare and to beware of him.

The Priest is sicke and dyeth.

It hapneth at that time, that that Priest was sicke, who was, as it were, the Archdeacon of the rest: and his friends sent for a certayne *Saracen*, which was a Sooth-sayer. Who said vnto them, *A certayne leane man, who neyther eateth, nor drinketh, nor sleepest in a Bed, is angry with him: if hee can obtayne his blessing hee may recouer.* Then they vnderstood it was the Monke. And about mid-night, the Priests Wife, his Sister, and his Sonne came, intreating that hee would come, and blesse him. They also raised vs vp, to intreate the Monke. Then he said vnto vs, intreating him: Let him alone, because hee with three others, who likewise tooke euill courtes, consulted to goe vnto the Court, to procure *Mangu Chan*, that I and you should bee expelled from these parts.

For there arose a contention among them, because *Mangu* and his Wiues sent foure Iascots and certayne Silkes vpon Easter Euen to the Monke and Priests, to distribute among them. And the Monke had kept vnto himselfe one Iascot for his part, and of the other three, one was counterfeit, for it was Copper. Whereupon it seemed to the Priests, that the Monke had kept too great a portion to himselfe. Whence (it might bee) that they had some words among themselves, which were reported to the Monke. When day came I went vnto the Priest, hauing an extreme grieve in his side, and spitting blood: whereupon I thought it was an Impostume. Then I counsell'd him (if he had any thing that was an others) to restore it. He said, hee had nothing. I spoke vnto him also of the Sacrament of Extreme Vnction. Who answered, we haue no such custome, neither doe our Priests know how to doe it: I intreat you, that you would doe it for mee, as you know best to bee done. I aduised him also concerning Confession, which they frequent not, hee spake shortly in the Eare of a certayne Priest, one of his fellowes.

The Nestorians know not Extreme Vnction, nor Confession.

After this hee beganne to bee better, and hee intreated mee to goe for the Monke. So I went, but the Monke would not come at the first: yet when hee heard hee was some-what better, hee went with his Crosse. And I also went, and carryed (in a Boxe of Master *Williams*) the bodie of Christ, which I had reserued vpon Easter Day, at the intreatie of Master *William*. Then the Monke beganne to kicke him with his feet, and hee most humbly embraced his feet.

Then I said vnto him; It is the custome of the Church of *Rome*, that the sicke should receiue the Bodie of Christ, as it were prouision for their iourney, and a defence against all the Deceits of the Enemie. Behold, the Bodie of Christ, which I consecrated on Easter Day. You must bee confessed, and desire it. Then said hee with a great Faith, I desire it with all my heart. Which, when I had discouered, hee, with great affection said, I beleue, that this is my Creatour and my Sauour, who gaue mee life, and will restore it againe vnto mee after death in the generall Resurrection: and so tooke the Bodie of Christ (from my hand) made after the manner of the Church of *Rome*. Then the Monke abode with him, and gaue him (in my absence) I know not what Potions. On the morrow hee beganne to haue the pangs of death vpon him. Then taking their Oyle, which they said, was holy, I anointed him according to the manner of the Church of *Rome*, as they intreated mee. I had none of our Oyle, because the Priests of *Sartach* kept all.

He that is present with one that dyeth, cannot come into the presence of the Prince, for the space of an whole yeare. Bold blindnes. The Monke vseth Diuinations.

And when wee should sing a Dirge, and I would haue beene present at his end, the Monke sent vnto mee, willing me to depart, because if I should bee present, I could not come into the house of *Mangu Chan*, for one whole yeare. Which, when I had told his friends, they said, it was true: and requested me to depart, lest I might be hindered in that good, which I might promote. As soone as hee was dead, the Monke said vnto mee, care not: I haue killed him with my Prayers. This fellow only was Learned, and opposed himselfe against vs: the rest know nothing. Henceforth *Mangu Chan* himselfe, and they all will crouch at our feete. Then hee declared vnto me the foresaid Answer of the Sooth-sayer. Which (not beleueing it) I inquired of the Priests who were friends of the dead, whether it were true or no. Who said it was. But whether he were pre-instructed or not, that they knew not. Afterwards I found, that the Monke called the foresaid Sooth-sayer and his Wife into his Chappell, and caused dust to be sifted, and to diuine vnto him. For hee had a certayne *Rutenian* Deacon, who diuined to him. Which, when I vnderstood, I was astonied at his foolishnesse, and said vnto him, Brother, a man full of the Holy Ghost which teacheth all things, should not demand Answers of Counsell from Sooth-sayers: seeing all such things are forbidden, and they excommunicated, who follow such things. Then hee beganne to excuse himselfe that it was not true, that hee sought after such things. But I could not depart from him, because I was placed there by the commandment of *Chan* himselfe, nor could I remooue my selfe without his speciall command.

Concer-

Concerning the Citie of *Caracorum*, know this, that excluding the Palace of *Chan* himselfe, it is not so good, as the Castle of *Saint Denis*: and the Monasterie of *Saint Denis* is tenne times more worth then that Palace, and more too. There are two streets there: one of the *Saracens*, where the Faires are kept: and many Merchants haue recourse thither, by reason of the Court, which is alwayes neere, and for the multitude of Messengers. There is another street of the *Cataians*, who are all Artificers. Without those streets there are great Palaces, which are the Courts of the Secretaries. There are there twelue kindes of Idolatries of diuers Nations. Two Churches of *Mahomet*, where the Law of *Mahomet* is proclaimed: one Church of the Christians at the end of the Towne. The Towne is inclosed with a mudde Wall, and hath foure Gates. On the East part Millet and other Graine is sold, which yet is seldome brought thither. On the West, Sheepe and Goates. On the South, Oxen and Waggones are sold. At the North, Horses are sold. Following the Court, before the Ascension, wee came thither the Sunday before the Ascension. The next day after, we were called before *Bulgai*, who is a Iustice, and chiefe Secretarie, both the Monke and all his Family, and wee, and all the Messengers and Strangers, which frequented the house of the Monke. And wee were called before *Bulgai* seuerally, first the Monke, and after wee, and they beganne diligently to inquire whence wee were, and for what purpose wee came, and what our errand was? And this inquirie was made, because it was told *Mangu Chan*, that foure hundred *Hassafines*, or secret Murtherers were gone forth in diuers Habits to kill him. About that time the foresaid Ladie was restored to health, and shee sent for the Monke, and hee not willing to goe, answered: shee hath sent for Idolaters about her, let them cure her, if they can. I will goe no more. Vpon Ascension Euen, wee were in all the houses of *Mangu Chan*: and I saw when hee should drinke, how they cast Cosmos to their Idols of Felt. Then I said to the Monke, *What fellowship hath Christ with Beliall*. What part hath our Crosse with these Idols?

Moreouer, *Mangu Chan* hath eight Brethren, three by the Mother, and five by the Father. One of them of his Mothers side, hee sent into the Countrey of the *Hassafines*, who are called by them *Mulibet*: and hee commanded to kill them all. Another went towards *Persia*, and is now entred therein, to goe (as is thought) into *Turkie*, from thence to send Armies against *Baldach*, and *Vastacius*. One of the other, he sent into *Cataia*, against some that rebelled. His youngest Brother of the same venter, hee kept nigh himselfe, whose name was *Arabucha*, who holdeth his Mothers Court which was a Christian, whose Seruant Master *William* is: for one of his Brothers, on the Fathers side, tooke him in *Hungarie* in a certayne Citie, called *Belgrade*, where there was a *Norman* Bishoppe, of *Belle-Ville* neere *Roan*, with a certayne Nephew of the Bishoppes, whom I saw there at *Caracorum*. And hee gaue Master *William* to *Mangu*s Mother, because shee was very earnest to haue him. When she was dead, Master *William* came backe againe to *Arabucha*, with all things else pertayning to the Court of his Mother: and from him hee came to the knowledge of *Mangu Chan*. Who after the finishing of the foresaid Worke, gaue vnto Master *William* an hundred Iascots, that is, a thousand Markes.

On the Euen therefore of the Ascension, *Mangu Chan* said, hee would goe to his Mothers Court, and visite her, for it was neere. And the Monke said, hee would goe with him, and giue his blessing to his Mothers soule. *Chan* was well contented. In the Euening, the day of the Ascension, the foresaid Ladie was very much pained. And the chiefe of the Sooth-sayers sent to the Monke, commanding him that the Table should not be smitten. On the morrow, when the whole Court remoued, the Court of the foresaid Ladie remayned still. And when wee came to the place where the Court should stay, the Monke was commanded to depart further from the Court, then hee was wont: which hee did. Then *Arabucha* met his brother *Chan*. So the Monke, and wee, seeing that hee was to passe by vs, met him with the Crosse. And hee calling vs to minde, because sometimes he had bene at our Oratorie, stretching forth his hand, made a Crosse vnto vs, like a Bishop. Then the Monke taking Horse, followed him, bearing certayne Fruits. But hee alighted, before his brothers Court, wayting, while hee came from hunting. Then the Monke alighted there, and offered him the Fruit, which hee receiued. And hard by him sate two *Saracens*, of the Nobilitie of the Court of *Chan*. But *Arabucha* vnderstanding of the contention betwene the Christians and the *Saracens*, enquired of the Monke if hee knew the said *Saracens*; and hee answered, I know they are Dogges: why haue you them so neere you? but they replied; why, say they, doe you wrong vs, when wee doe none to you? To whom the Monke said, I speake the truth: and yee, and your *Mahomet* are vile Dogges. Then they beganne to answer blasphemously against Christ; and *Arabucha* forbad them, saying, speake not so blasphemously, for wee know, that the *Messias* is God. That very houre there arose so great a winde ouer all the street, that the Devils seemed to runne through them. And after awhile, there came Rumours, that the Ladie was dead.

Chap. 41.
The Description of the Citie of *Caracorum*, they are examined: *Mangu Chan* sendeth his brethren against diuers Kingdomes, the Monke biddeth the *Saracens* farewell. The Wife of *Mangu Chan* dyeth.

The Countrey of the *Hassafines*, or *Mulibet*. Chap. 16. Some of *Cataia* rebell.

Ascension day.

Arabucha the younger brother of *Mangu Chan*.

Ignorant zeale a betrayer of the Faith, a cause perhaps of *Tartarian* *Saracenisme*. One of the Wiues of *Chan* dyeth.

The next morning, *Chan* returning towards his Court another way. For this is their Sorcerie, that they neuer returne the same way they came. Moreouer, while the Court abode heere, after the remooue thereof, none dare passe that way (neither Horseman nor Footman) where the Court staid, so long as any shew of the fire made there, remaineth. That day certayne *Saracens* kept company with the Monke vpon the way, prouoking him, and disputing with him. And when hee could not defend himselfe with Argument, and they mocked him, hee would haue lashed them with the Whip which hee held in his hand; and hee went so farre, that the foresaid words were reported at the Court. And wee were commanded to depart with other Messengers, and not abide before the Court, where wee were wont. And I alwayes hoped, the King of *Armenia* would come. There came some about Easter from *Bolac*, where those *Dutchmen* are, for whose sake chiefly I went thither, who told mee, that the *Dutch Priest* should come to the Court. Therefore I moued no Question to *Mangu*, concerning our stay, or departure. And in the beginning hee gaue vs leaue to stay but two monethes: and now five monethes are past. This was done about the end of May. And wee had continued there all Ianuary, February, March, Aprill, and May. But hearing no newes of the King, or the said Priest, and fearing lest wee should returne in the Winter, whose sharpnesse wee had prooued, I caused to bee demanded of *Mangu Chan*, what his pleasure was concerning vs, because willingly wee would euer stay there, if so hee pleased. But if wee must returne, it were easier for vs to returne in Summer, then in the Winter. Hee presently sent vnto mee, commanding, that I should not goe farre off, because his pleasure was to speake with mee the next day. But I told him, that if hee would speake with mee, hee should send for Master *Williams Sonne*, for my Interpreter was not sufficient. And hee, that spake with mee, was a *Saracen*, who had bene a Messenger to *Vastacius*: and (blinded with Rewards) counselled *Vastacius* to send Ambassadors to *Mangu Chan*, and the meane while the time passed: for *Vastacius* thought, hee would presently enter his Countrey. So hee sent, and after hee knew them, hee little regarded them, nor made peace with them, neither did they yet enter his Countrey: nor shall they bee able, so long as they dare defend themselues, nor did they euer take any Countrey by Force, but by Deceit. And because men make peace with them, vnder colour of that peace they overthrow them.

The Tartars do more by deceit then by force.

Then hee beganne to bee very Inquisitiue of the Pope, and of the King of the *Franches*, and of the way to goe to them. But the Monke hearing this, aduised mee secretly not to answere him, because he would procure, that an Ambassador should be sent. Whereupon I held my peace, not willing to answere him. And hee spake vnto mee I know not what iniurious words; for the which the *Nestorian Priests* would haue accused him: so that hee had either bene slaine, or beaten all to clouts, but I would not.

Chap. 42. They are often examined wherfore they came, *Mangu* desireth to make comparison of Diuine things. The most learned speech of Frier *William* with the Idolaters. The *Saracens* acknowledge the truth of the Gospell. The godly conference of Frier *William* with the Seruants of *Mangu Chan*.

ON the morrow, (to wit) the Sunday before Pentecost, they brought mee to the Court: and the chiefe Secretaries of the Court came vnto mee: one of *Moal*, who wayteth vpon *Chans* cup, and the rest, *Saracens*, inquiring on the behalfe of *Chan*, wherfore I came? Then I told them the foresaid words, how I came to *Sartach*, and from *Sartach* to *Baatu*, and how *Baatu* sent me thither. Whereupon, I said vnto him, I haue nothing to speake on the behalfe of any man, vnlesse I should speake the words of God vnto him, if he would heare them; for he should best know what *Baatu* hath written to him. They stucke vpon this word, demanding, what words of God I would speake vnto him? thinking I would prophesie vnto him some prosperous thing, as many vse to doe. To whom I answered: if yee will that I speake the words of God vnto him, get me an Interpreter. Who said, we haue sent for him, yet speake by this Interpreter, as you may: wee shall vnderstand you well. And they vrged mee much to speake. Then I said: This is the word of God: To whom more is committed, more is required at his hands, another also: to whom more is forgiven, hee ought to lone more out of these true words of God, I said, to *Mangu* himselfe, that God hath giuen him much. For the power and riches which hee hath, the Idols of the *Tuinians* haue not giuen him, but the Omnipotent God, who hath made Heauen and Earth, in whose hands all Kingdomes are, and hee translateth them from Nation to Nation for the sinnes of men. Wherefore if he loue him, it shall goe well with him: if otherwise, let him know, that God will require all these things at his hands, euen to the uttermost farthing. Then said one of the *Saracens*, Is there any man that loueth not God? I answered, God saith, if any man loue me, he will keepe my Commandements: and he that loueth me not, keepeth not my Commandements. Therefore, hee that keepeth not the Commandements of God, loueth not God. Then said hee, haue yee bin in Heauen, that yee might know the Commandements of God? No said I, but he hath giuen them from Heauen to holy men: and at the last himselfe descended from Heauen, teaching vs: and wee haue those things in the Scriptures, and we see by the workes of men, whether they keepe them or no. Whereto hee replied, will yee then say that *Mangu Chan* keepes not the Commandements of God? To whom I said, Your Interpreter wil come, as yee lay, then before *Mangu Chan* (if it please him) I wil recite the Com-

Commandements of God, and he shall be his owne Iudge, whether hee keepe them or not. So they departed, and told him, that I said, hee was an Idolater or a *Tuine*, and kept not the Commandements of God. The next day, he sent his Secretaries vnto mee, saying: Our Lord sends vs vnto you, saying. Yee are heere *Christians*, *Saracens*, and *Tuines*: and euery of you saith, his Law is better, and his Letters (to wit) Bookes, are truer. Wherefore hee would, that yee all come together, and make comparifon, that euery one write his words, that he might know the truth. Then I said, *Blessed be God, who hath put this in the heart of Chan, but our Scriptures said, the Seruant of God must not bee contentious, but meeke vnto all: wherefore I am readie without strife and contention, to render an account of the faith and hope of Christians, to euery one that shall require it.*

10 Then they wrote my words, and brought them to him. Then the *Nestorians* were commanded, to prouide themselves, and write what they would speake, and the *Saracens* likewise, and the *Tuinians* also.

Mangu Chan desireth to haue a comparifon made concerning diuine things, betweene the *Christians*, *Saracens*, and *Idolaters*.

On the morrow hee sent the Secretaries againe, saying: *Mangu Chan* would know, wherefore yee came to these parts, to whom I said: That hee shall know by the Letters of *Baatu*. Then said they, *Baatus* Letters are lost, and hee hath forgotten, what *Baatu* wrote vnto him, wherefore he would know of you. Then somewhat imboldned, I said vnto them. *The dutie or office of our Religion is to preach the Gospell to all: whereupon, when I heard of the fame of the people of Moal, I had a desire to come vnto them: and while I was thus purposed, we heard of Sartach, that he was a Christian. Then I directed my Iourney vnto him: And my Soueraigne Lord the King of the Frankes sent him Letters, contayning good words: and other words besides, testifie of vs vnto him,*

20 *what men wee are when hee made request, that hee would suffer vs to continue with the people of Moal. Then he sent vs to Baatu, and Baatu to Mangu Chan. Whereupon we intreated, and yet intreat him to suffer vs to stay. But they wrote all, and made relation thereof vnto him. On the morrow, he sent to me againe, saying: Chan knowes well enough that yee haue no message vnto him, but yee came to pray for him as many other Priests doe: But hee demandeth, whether euer any of your Embassadors were with him, or ours with you? Then I declared all vnto them concerning David and Frier Andrew, so they putting all in writing, reported the same vnto him. Then he sent againe vnto me, saying: Our Lord Chan saith, yee haue stayed long here, his pleasure is,*

30 *that yee returne vnto your Countrey: withall, hee demandeth whether yee would conduct his Embassadors with you. To whom I made answer, that I durst not carrie his Embassadors beyond his owne Countrey: because there is a Warlike Nation betweene vs and you, and the Sea and Mountaynes, and I am a poore Monke: and therefore dare not take vpon mee to bee his Guide. So they hauing set downe all in writing, returned.*

His Answer.

Mangu Chan wil haue them returne.

Whitson Euen came; The *Nestorians* writ Chronicles from the Creation of the World to the Passion of Christ: and passing ouer the Passion, they spake of the Resurrection of the dead, and of the Ascension, and of the comming to Iudgement. Wherein somewhat was to be reprehended which I told them, and wee likewise wrote the Symbole of the Masse, *Credo in unum Deum*.

40 Then I demanded of them, how they would proceed. They said, they would first dispute with the *Saracens*. I shewed them, this was no good courle: for the *Saracens* in this agree with vs, who affirme, there is but one God. Wherefore, yee shall haue them to helpe you against the *Tuines*: so they were contented. Then I asked them, if they knew how Idolatry had his first originall in the World, and they could not tell. Then I told them and they said; yee shall declare these things vnto them: and then let vs speake; for it is hard to speake by an Interpreter.

To whom I said: make tryall, how yee will behaue your selues against them: I will take the *Tuinians* part, and yee the *Christians*. Suppose I am of that Sect, that say, there is no God. Proue yee there is a God. For there is a certayne Sect there, which saith, That euery soule, and euery vertue in what thing soeuer, is the God thereof, and that otherwise there is no God. Then the *Nestorians* knew not how to prooue any thing, but only that which their Writing declar-eth. I said, they beleue not the Scriptures: if yee shew one, they will shew another. Then I counselled them, to let me first talke with them: because if I should be ouercome, they might yet haue libertie of speech: if they should be ouerthrowne, I should haue no hearing. They agreed vnto it.

50 Wee were therefore gathered together on Whitson Euen at our Oratorie, and *Mangu Chan* sent three Writers, who should be Iudges: one *Christian*, one *Saracen*, and one *Tuine*: And it was proclaimed before. *This is the Commandement of Mangu Chan: And none dare say, that the Commandement of God is otherwise: He commandeth that none speake contentious or inuiours words to other, nor make any tumult, whereby this businesse might be hindered, vpon paine of his head.* Then all were silent: And there was a great assembly there: for euery partie invited the wisest of their Nation, and many others came flocking thither. Then the *Christians* set me in the middle of them, willing the *Tuinians* to speake with mee. Then they (who are many in number)

60 began to murmure against *Mangu Chan*, because neuer any *Chan* attempted thus much, to search into their secrets. Then they opposed one vnto mee, who came from *Cataia*, hauing his Interpreter: and I had Master Williams Sonne, And he first said vnto me: Friend, if you bee brought to

his returne by

a non plus, you must seeke a wiser then your selfe. But I held my peace. Then hee demanded whereof I would first dispute: either how the world was made: or what becomes of the soules after death: To whom I answered: Friend, this should not be the beginning of our speech. All things are of God, and he is the Fountayne and head of all. Wherefore we ought to speake first of God: of whom yee thinke otherwise then we doe. And Mangu desires to know who beleuees better. Then the Arbitrators iudged this to bee reasonable. They would haue begunne with the foresaid questions, because they hold them for the strongest; for they are all of the Heresie of the Manichees: beleeuing, that the one halfe of things is bad, and the other good: and that at the least there are two Principia. And concerning the soules they all thinke they passe from body to body. Insomuch as one of the wisest of the Nestorian Priests demanded of mee, concerning the soules of brute Beasts, whether they could fly any whither where they should not be compelled to labour after death: for confirmation also thereof (as Master William told mee) a certaine child was brought from Cataia, who (according to the quantitie of his body) was not three yeeres old, yet notwithstanding was capable of any reason; who affirmed of himselfe, that he had bene three times incorporated, and knew letters, and how to write. I said to the foresaid Tuinian, Wee firmly beleene with the heart, and confesse with the mouth, that there is a God, and there is but one God, and one in perfect vnitie. What beleene you? Hee said: Fooles say there is but one God, but Wise men say there are many. Are there not great Lords in your Country, and here is a greater Lord, Mangu Chan? So is it of the gods: because in diuers Countries there are diuers. To whom I said: You make an ill example or comparison of men with God; for so every mightie man in his countrey may be called a god. And when I would haue dissolued the similitude, hee preuented me, inquiring; What manner of God is yours, whereof you speake, that hee is but one? I answered: Our God, beside whom there is no other, is Omnipotent, and therefore needeth not the helpe of another: nay, all we haue neede of his helpe, it is not so with men. No man can doe all things. And therefore there must be many Lords in the earth, because no one can support all. Againe, he knowes all things, therefore hee needes not a Counsellor: nay, all wisdom is from him. Moreover, he is perfectly good, and needeth not our good: nay, in him we liue, moue, and haue our being. Such is our God, and therefore you must not hold there is any other. It is not so, saith he. Nay, there is one highest in the Heauens, whose Generation we know not yet, and ten are vnder him, and vnder them there is one Inferiour. And in the Earth there are infinite. Then hee would haue added other fables. So I asked him of that highest God, whether he thought he were Omnipotent: or of any other God: and fearing to answer, hee demanded, if your God bee such as you say, Why made hee the halfe of things euill? It is false said I. Whoso maketh any euill is no God, and all things whatsoeuer are good. At this word all the Tuinians maruelled, and set it downe in writing, as false, or impossible. Then he began to aske, Whence therefore commeth euill? You aske amisse, said I; For first you should demand, what euill is, before you aske whence it is. But returns vnto the first question, whether you beleene that any God is Omnipotent, and after I will answer you to all whatsoeuer you will demand. Then hee sate a long time and would not answer; Insomuch, as the Writers on the behalfe of Chan, were faine to command him to answer. At length hee answered: That no God was Omnipotent. Then all the Saracens brake out into great laughter: Silence being made, I said, Therefore none of your gods can saue you in all dangers, because such a chance may happen, wherein he hath no power. Againe, no man can serue two Masters. How then can you serue so many Lords in Heauen and in earth. The Auditorie willed him to answer. But he held his peace. Then when I was about to alleadge reasons to proue the truth of the diuine Essence, and the Trinitie, in euery mans hearing, the Nestorians of the Countrey said vnto me, that it was enough, because they meant to speake. So I gaue them place: And when they would haue disputed with the Saracens; they answered: We grant that your Law is true, and whatsoeuer is in the Gospell is true: Wherefore wee will not dispute with you in any thing: and they confessed, that they beg at the hands of God in their prayers, that they may die the death of the Christians. There was there a certaine old Priest, of the Sect of Iugurs, who confesse one God, yet they make Idols, with whom they talked much, shewing all till the comming of Christ to iudgement, declaring the Trinitie to him and the Saracens by similitudes. All of them harkened without any contradiction; yet none of them said, I beleue, and will become a Christian. The conference ended, the Nestorians and the Saracens sang together with a loud voice, the Tuinians holding their peace: and after that, they all drunke abundantly.

Vpon Whitsonday Mangu Chan called mee before him, and the Tuinian with whom I disputed, and before I went in, Master Williams sonne my Interpreter, said vnto me, that we must returne vnto our Countrey; and that I should speake nothing against it, because he vnderstood it for a certaine. When I came before him, I must kneele, and the Tuinian by mee, with his Interpreter. Then he said vnto me: Tell me the truth, whether you said (when I sent my Writers vnto you) that I was a Tuinian? Then I answered. My Lord, I said not so, but (if it pleased your Highnesse) I will tell you the words I spake. Then I recited what I had spoken: and he answered; I thought well, you said not so, for it was a word which you should not speake, Baatu, he craueth leaue to stay there, which is not graunted.

but

but your Interpreter hath ill interpreted it; so hee reacheth forth his staffe towards mee, whereon he leane, saying: Feare not. I smiling said softly, If I feared, I had not come hither. Then he demanded of the Interpreter what I had said? So he repeated my words vnto him. Afterward he beganne to confesse his Faith vnto me. *Wee Moallians (saith he) beleene, that there is but one God, through whom we liue and dye; and we haue an vpright heart towards him.* Then (said I) God grant you this, for without this gift it cannot be. And he demanded what I said: so the Interpreter told him; then he added further. *That as God hath giuen vnto the hand diuers fingers, so he hath giuen many waies to men. God hath giuen the Scriptures to you, and ye Christians keep them not. Ye finde it not in the Scriptures, that one of you shall dispraise another? Doe you finde it,* said he?

10 No, said I, but I signified vnto you from the beginning, that I would not contend with any. *I speake it not,* saith he, *touching you. In like manner, yee finde it not, that for Money a man ought to decline from Iustice.* No Sir, said I, and truly, neither came I into these parts to get Money; nay, I refused that which was giuen me. And there was a Writer present there, who gaue testimony that I had refused a Iascot, and certaine pieces of Silke: I speake it not (said he) for that. *God hath giuen you the Scriptures, and yee keepe them not: But he hath giuen vs Sooth-sayers, and we doe that which they bid vs, and we liue in peace.* He dranke foure times as I thinke, before hee disclosed these things: And while I hearkned attentiuely whether hee would confesse any thing else concerning this Faith, he beganne to speake of my returne, saying: You haue stayed a long time heere, my pleasure is therefore, that you returne. You said, you durst not carrie my Embassadours with you. Will you carrie my message or my Letters? And from that time I could neither haue place nor time to shew him the Catholike Faith. For a man cannot speake before him, saue what he pleaseth, vnto an Embassadour. But an Embassadour may speake what he will: And they alwaies demand, whether he haue any thing else to say. But he suffered me to speake no more: but I must heare him, and answer Interrogatories. Then I answered, That if he could make me vnderstand his words, and that they were set downe in writing, I would willingly carrie them to my power. Then he asked me, if I would haue Gold or Siluer, or costly garments? I said, we receiue no such things: but we haue not expenses, and without your helpe, we cannot get out of your Countrey. Then said he, I will provide you all necessities throughout my Countrey, will you any more? I answered, it sufficeth me: Then he demanded, how farre will you be brought? I said, Let our Passe bring vs into the King of Armenias Countrey: if I were there, it were enough. He answered: I will cause you to be conueyed thither, and after looke to your selfe. And hee added: there are two eyes in one head; and though they bee two, yet there is one aspect of both, and whither the one directeth the sight the other doth. You came from Baatu, and therefore you must returne by him: when hee had thus said, I craued licence to speake. Speake on, saith hee. Then said I; Sir, wee are not men of warre: wee desire that they haue dominion of the world, who would more iustly gouerne it, according to the will of God. Our office is to teach men to liue according to the will of God: for this purpose came we into these parts, and would willingly haue remained heere, if it had pleased you: but seeing it is your pleasure that we returne, it must bee so. I will returne and carrie your Letters

20 according to my power, as yee haue commanded. I would request your magnificence, that when I haue carried your Letters, it might bee lawfull for me to returne vnto you with your good liking, chiefly, because yee haue poore Seruants of yours at Bolac, who are of our language; and they want a Priest, to teach them and their children their Law, and I would willingly stay with them. Then answered he: Know you whether your Lords would send you backe to me? Then said I; Sir, I know not the purpose of my Lords: but I haue licence from them to goe whether I will, where it were needfull to preach the word of God: and it seemeth to mee, that it were very necessarie in these parts: whereupon, whether they send Embassadours backe or no, if it pleased you, I would returne. Then hee held his peace, and sate a long space as it were in a Muse. And my Interpreter willed me, to speake no more, and I carefully expected what he would answer. At length he said: You haue

30 a long way to goe, make your selfe strong with food, that you may come lully into your Countrey. And he caused them to giue me drinke. Then I departed from his presence, and returned not againe. If I had had power to doe wonders as Moses did, peraduenture hee had humbled himselfe.

A token of fauour.

The faith of the Tartars.

He speaketh of the Fryers returne.

Baatus greatnesse.

Hee craueth leave againe to stay in the Tartars Countrey, but it is not granted.

He departeth from the presence of Mangou Can.

Chap. 44.

A description of the Tartarian Sorcerers, and of their diuers and vnlawfull behauiour. Chief Priest of the Tartars. Some of them know Astronomie. Eclipses, when

Sooth-sayers therefore, as hee confessed, are their Priests: and whatsoever they command to be done, is performed without delay. Whose office I describe vnto you, as I could learne of Master William, and others, who reported vnto me things likely to be true. They are many; and they haue alwaies one Captaine or chiefe Priest: who alwaies placeth his house before the great house of Mangou Chan, neere, within a stones cast. Vnder his custodie (as I said before) are the Chariots which beare their Idols. The others are behind the Court, in places appointed for them. And they who haue any confidence in that Art, come vnto them from diuers parts of the World. Some of them are skilfull in Astronomie, specially the chiefe of them. And they foretell to them the Eclipse of the Sunne and the Moone, and when it shall come to passe. All the people prepare them food, so that they need not goe forth of the doore of their house. And

They fore-tell
lucky and vn-
fortunat daies
for the perfor-
mance of all
businesse what-
soever.

They cause all
things sent to
the Court, passe
betweene fires.
Friar Andrew,
and his fellows

The ninth day
of the Moone
of May, so-
lemnly kept e-
uery yeere.

They are cal-
led to the birth
of children, and
fore-tell their
destinies, and
are also sent
for when any
are sicke.

ginning.

when there is an Eclipse, they play vpon their Timbrels and Organes, and make a great noise, and a loude crye, when the Eclipse is past, they giue themselves to feasting, and drinking, and make great ioy. They foretell fortunate and vnlucky dayes for all businesse or affaires. Whereupon they neuer leaue an Armie, nor vndertake Warre without their direction. And they had long since returned into *Hungarie*: but their Sooth-sayers doe not suffer them. They make all things which are sent to the Court passe betweene fires, and they haue a due portion thereof. They also purge all the household-stuffe of the Dead, drawing them betweene the fires. For when any one dieth, all things whatsoever appertayne to him, are separated, and not mingled with other things of the Court, till all be purged by the Fire. So did I see it done to the Court of that Ladie, which died, while wee were there. Whereupon, there was a double reason why 16
Friar Andrew, and his fellows should goe betweene the fires, both because he brought presents, as also for that they belonged to him, who was dead, (to wit) *Ken Chan*. No such thing was required of me, because I brought nothing. If any liuing creature, or any thing else, fall to the ground, while they thus make them passe betweene the fires, that is theirs. They also the ninth day of the Moone of May, gather together all the white Mares of the Herd, and consecrate them. The Christian Priests also must come together thither with their Censers. Then they cast new Cosmos vpon the ground, and make a great Feast that day; because then they thinke they drinke Cosmos first, as it is the fashion somewhere with vs, touching Wine, in the Feast of Saint *Bartholmew*, or *Sixtus*, and of fruits, in the Feast of Saint *James* and *Christopher*. They also are invited, when any child is borne, to foretell his destinie. They are sent for also 20
when any is sicke, to vse their Charmes: and they tell whether it bee a naturall infirmitie, or by Sorcerie. Whereupon that woman of *Mentz*, whereof I spake before, told mee a wonderfull thing.

On a certaine time, very costly Furies were presented, which were layd downe at the Court of her Ladie, who was a Christian, as I said before. And the Sooth-sayers drew them through betweene the fires, and tooke more of them then was their due. And a certaine woman, vnder whose custodie the treasure of her Ladie was, accused them thereof vnto her Ladie: where- vpon the Ladie her selfe reproued them. It fell out after this, that the Ladie her selfe began to be sicke, and to suffer certaine sudden passions in diuers parts of her bodie. The Sooth-sayers were called: and they sitting farre off, commanded one of those Maidens, to put her hand vpon 30
the place where the grieve was, and if shee found any thing, shee should snatch it away. Then shee arising did so. And shee found a peece of Felt in her hand, or of some other thing. Then they commanded her to put it vpon the ground; which being layd downe, it began to creepe, as if it had bene some liuing Creature. Then they put it into the water, and it was turned, as it were, into a Horse-leach: and he said, some Witch hath hurt you thus with her Sorceries: and they accused her that had accused them of the Furies, who was brought without the Tents into the fields, and receiued the bastinado seuen dayes together there, and was thus tormented with other punishments, to make her confesse; and in the meane space her Ladie died. Which shee vnderstanding, said vnto them, I know my Ladie is dead, kill mee, that I may goe after her, for I neuer did her hurt. And when shee confessed nothing, *Mangu Chan* 40
commanded to suffer her to liue. Then the Sorcerers accused the Ladies daughters Nurse, of whom I spake before: who was a Christian, and her husband was the chiefe among all the *Nestorian* Priests, so shee was brought to punishment, with a certaine Maide of hers, to make her confesse. And the Maide confessed, that her Mistresse sent her to speake with a certaine Horse, to demand answeres. The woman also her selfe, confessed some things which shee did to bee be- loued of her Ladie, that she might doe her good, but shee did nothing that might hurt her. Shee was demanded also, whether her husband were priuie to it: shee excused him, for that he had burnt the Characters and Letters which shee had made. Then shee was put to death, and *Mangu Chan* sent the Priest her husband to the Bishop which was in *Cataia*, to be iudged, although he were not found culpable. 50

In the meane time it fell out, that the principall wife of *Mangu Chan*, brought forth a sonne, and the Sooth-sayers were called, to fore-tell the Destinie of the child, who all prophesied prosperitie, and said, he should liue long, and be a great Lord: after a few dayes, it happened, the child died. Then, the mother enraged, called the Sooth-sayers, saying, you said my sonne should liue, and loe hee is dead. Then they said, Madam, behold wee see that Sorceresse, the Nurse of *Chirina*, who the other day was put to death, shee hath killed your sonne; and behold wee see, shee carries him away. Now there remayned one sonne and a daughter of that woman growne to full age in the Tents: and the Ladie sent presently for them in a rage, and caused the young man to be slayne of a man, and the maide of a woman, in reuenge of her sonne, whom the Sooth- 60
sayers affirmed to be killed of their mother not long after, *Mangu Chan*, dreamed of those chil- dren, and demanded in the morning, what was become of them. His seruants were afraid to tell him: and he being troubled the more, demanded where they were, because they had ap- peared vnto him in a Vision by night. Then they told him. So hee presently sending for his wife, demanded whence shee learned, that a woman should giue sentence of death, without the priuitie

priuie of her Husband? And he caused her to be shut vp seauen dayes, commanding to giue her no meat. But the man who (who slew the young man) he caused to be beheaded; and the head to be hung about the womans necke, who had kild the Mayde; and made her to be cudgelled with burning Fire-brands through all the Tents, and after to be put to Death. Hee had also put his Wife to death, but for the Children he had by her: And he went out of his Court, and returned not till after one Moone.

The Reuenge of Mangu Chan, vpon his Wife being a murderer.

The Sorcerers also trouble the Ayre with their charmes: and when the Cold is so great naturally, that they cannot apply any remedy, then they search out some in the Campe, whom they accuse, that the cold comes through their meanes, so they are put to Death without any delay. A little before I departed thence, one of the Concubines was sicke, and languished long, and they mumbled their Charms ouer a certaine Dutch Slaue of hers, who slept three dayes. Who, when she came to her selfe, they demanded, what she had scene? And she had scene many persons, of all which, shee iudged they should all shortly dye: And because she saw not her Mistres there, they iudged she should not dye of that sicknes. I saw the Maydes head yet aking by reason of that sleepe. Some of them also call vpon Deuils, and gather them together (who will haue answers from the Deuill) in the night vnto their house, and they put sodden flesh in the midst of the house, and that Chan who inuoketh, beginneth to say his Charms, and hauing a Tymbrell, smites it strongly against the ground; at length he begins to raue, and causeth himselfe to be bound. Then the Deuill comes in the darke, and giues him flesh to eate, and makes him answer. On a certaine time, (as Master William told me) a certaine Hungarian hid himselfe with them, and the Deuill being vpon the house, cryed, that hee could not come in, because a certaine Christian was with them. He hearing this, fled with haste, because they began to search for him. These things and many other doe they, which were too long to report.

The Sorcerers trouble the Ayre with their Charms.

The Sorcerers raise vp deuils.

After the Feast of Pentecost they began to make ready their Letters, which they meant to send vnto you. In the meane while, he returned to Caracurum, and held a great Solemnity, iust about the fifteenth of Iune: and hee desired, that all the Embassadors should be present. The last day also he sent for vs, but I went to the Church to Baptise three Children of a certaine poore Dutch-man, whom we found there. Master William was chiefe Butler at that Feast, because he made the Tree which powred forth drinke. And all the Poore and Rich sung and daunced, and clapped their hands before Chan. Then he began to make an Oration vnto them, saying; *I haue sent my Brethren farre off, and haue sent them into danger, into forraigne Nations: Now it shall appeare what yee will doe, when I shall send you, that our Common-wealth may be enlarged.* Euery day in those foure dayes, hee changed garments, which hee gaue them all of one colour, euery day, from the shooes euen to the tyre of the head. At that time I saw the Embassador of the Calipha of Baldach, who caused himselfe to be carried vpon a Horse-litter, betweene two Mules, to the Court: of whom some said, that he made peace with them: so that they should giue him ten thousand Horse for his Army. Others said, that Mangu said, hee would not make Peace, vnlesse they would destroy all their Munition. And the Embassador answered; when you will plucke off your Horse hoofes, we will destroy our Munition: I saw also there, the Embassadors of a certaine Soldan of India, who brought with him eight Leopards, and ten Harehounds taught to sit vpon the Horse buttockes, as Leopards doe. When I inquired of India, which way it lay from that place, they shewed me towards the West. And those Embassadors returned with me, almost for three Weekes together, alwayes westward: I saw also the Embassadors of the Soldan of Turkie, who brought him rich presents: And hee answered (as I heard) he needed neither Gold nor Siluer, but men: wherefore he required them to prouide him an Army. In the feast of Saint Iohn he held a great Drinking, and I caused one hundred and fise Carts, and ninety Horses to be numbred, all laden with Cowes milke: And in the feast of the Apostles S. Peter and S. Paul, in like manner. At length the Letters being dispatched, which he sendeth to you, they called me, and interpreted them, the tenor whereof I writ, as I could vnderstand them by my Interpreter, which is this. *The commandement of the eternall God is this: There is but one Eternall God in Heauen: vpon Earth let there be but one Lord Chingis Chan, Temingu Tingij, That is to say the sound of Yron: (They call Chingis, the sound of Yron, because hee was a Smith: and puffed vp with pride, they call him now the Sonne of God.) This is the word which is spoken to you. Whatsoeuer Moals wee are, whatsoeuer Naymans, whatsoeuer Merkets, whatsoeuer Musulman, wheresoeuer eares may heare, whethersoeuer Horse may goe, there, cause it to bee heard, and vnderstood, since they haue heard my commandement, and would not belene it, and would leuie an Army against vs, yee shall heare and see, that they shall be as hauing Eyes, and not seeing, and when they would hold any thing, they shall be without hands, and when they would walke, they shall be without feet. This is the commandement of the Eternall God, by the vertue of the Eternall God: by the great world of the Moall. The commandement of Mangu Chan is giuen to the French King, King Lodouick, and all other Lords, and Priests, and to the great world of the Frankes, that they vnderstand my wordes, and the commandement of the Eternall God, made to Chingis Chan. Nor from Chingis Chan, nor others after him, came this commandement vnto you. A certaine man called Dauid came vnto you, as an Embassador*

can, of Iohn de
Plano Carpini.

of the Moalls, but he was a lyar, and with him you sent your Embassadors to Chen-chan. After Chen-chan was dead, your Embassadors came to his Court. Charmis his wife sent you Clotb, called Nasic. But to know matters appertayning to Warre and Peace, and to settle the great World in quiet, and to see to doe good; That wicked woman, more vile then a Dog, how could shee know how to doe it? Those two Monkes which came from you vnto Sartach, Sartach sent them to Baatu: but Baatu, because Mangu Chan is the greatest ouer the World of the Moalls, sent them vnto vs. But now, that the great World and the Priests, and the Monkes might liue in peace, and enioy their goods, that the commandement of God might be heard among you, wee would haue sent our Embassadors of Moall, with your Priests: but they answered, that betweene vs and you there was a warlike Nation, and many bad men, and troublesome wayes; so as they feared they could not bring our Embassadors safe vnto you, but if we would deliuer them our Letters, contayning our commandement to King Lodowick, they would carrie them. For this cause wee sent not our Embassadors with them. But wee haue sent the commandement of the eternall God by your said Priests. It is the commandement of the eternall God, which wee haue giuen you to vnderstand. And when you shall heare and beleue it, if yee will obey vs, send your Embassadors vnto vs, so shall wee be certified, whether yee will haue peace with vs, or warre. When by the power of the eternall God, the whole World shall be in vnitie, ioy, and peace, from the rising of the Sunne, to the going downe of the same, then shall it appeare what wee will doe. When yee shall heare and vnderstand the commandement of the eternall God, and will not hearken to it, nor beleue it, saying, our Countrey is farre off, our Hills are strong, our Sea is great, and in this confidence, shall leuie an Armie against vs, to know what wee can doe, Hee which made that which was hard, easie; and that which was farre off, neere; the eternall God himselfe knowes it.

He departeth
the 9. of Iuly.

Note.

They stayed
there from the
27. of Decem-
ber to the 9. of
Iuly.

They depart
from the
Court to Ca-
racarum.

And they called vs your Embassadors in the Letters. Then I said vnto them, call vs not Embassadors, for I said well to Chan, that wee are not the Embassadors of King Lodowicke. Then they went vnto him and told him. But when they returned, they said vnto me: that he held it much for our good, and that he commanded them to write as I should direct them. Then I told them, they should leaue out the name of Embassador, and call vs Monkes and Priests. In the meane time, while these things were doing, my Companion hearing that wee must returne by the Wildernesse to Baatu, and that a man of Moall should be our Guide, he ranne (without my priuie) to Bulgai the chiefe Scribe, signifying to him by signes that he should die, if he went that way. And when the day came, wherein we should haue our Passe (to wit) a fortnight after the Feast of Saint Iohn; when we were called to the Court, the Scribes said vnto my Companion, Behold Mangus pleasure is, that your Companion returne by Baatu, and you say, you are sicke, and it appeareth so: Mangu sayth thus, If you will goe with your Companion, goe: but let it be your owne fault; because peradventure you may remayne with some Iani, that will not prouide for you, and it will bee an hinderance to your Companion. But if you will stay heere, he shall prouide necessities for you, till some Embassadors come, with whom you may returne more easily, and by a way where there are Villages. The Friar answered, God grant Chan a prosperous life; I will stay. Then I said vnto the Friar; Brother, bee aduised what you doe, I will not leaue you. You leaue not me (sayth he) but I leaue you: because, if I goe with you, I see the death of my bodie and soule, because I haue not patience in intolerable labour. Then they held three Garments or Coats, and said vnto vs, Yee will not receiue Gold, or Silver, and yee haue stayed long here, and prayed for Chan: hee entreats you, that at the least euery one of you would receiue a single Garment; that yee depart not emptie from him. Then we must receiue them, for reuerence of him: for they account it a very euill thing, when their gifts are contemned. First, he caused vs to bee often asked, what we would haue? And wee alwaies answered the same thing: so that the Christians insulted ouer the Idolaters, who seeke nothing but gifts. And they answered, that wee were fooles: because if hee would giue them his whole Court, they would willingly take it and should doe wisely to. Receiuing therefore the Garments, they besought vs to make our prayers for Chan; which we did. So, taking our leaue, we went to Caracarum. But it happened vpon a certaine day, while wee were with the Monke, farre from the Court, with other Embassadors; that the Monke caused the Table to be stricken so hard, that Mangu Chan heard it, and demanded what it was. Then they told him. So he asked, why he was remoued so farre from the Court. They told him, because it was troublesome to bring him Horses and Oxen euery day vnto the Court: and said further, that it were better, that he should stay at Caracarum. Then Chan sent vnto him, saying, if hee would goe to Caracarum, and stay there, neere about the Church, he would giue him all things necessarie. But the Monke answered, I came from the holy Land of Ierusalem hither, by the commandement of God, and left that Citie, wherein there are a thousand better Churches then that of Caracarum. If he please that I stay here and pray for him, as God commanded me, I will stay: if not, I will returne to the place from whence I came. So that euery euening Oxen were brought him yoked to the Carts, and in the morning he was brought vnto the place where he vsed to be before the Court. And a little before wee departed thence, a certaine Nestorian came, who seemed to bee a wise man: Bulgai the chiefe Secretarie placed him before his Court; to whom Chan sent his children, that he should blesse them.

Wee

WEe came therefore to *Caracorum*. And while wee were in Master *Williams* house, my Guide came vnto me, and brought me ten Iascots; whereof he left fise in Master *Williams* hand, willing him to spend them in the behalfe of *Chan*, for the Friars necessities, which remayned there: other fise he left in the hand of the Man of God; my Interpreter, commanding to spend them vpon the way, for my necessities. For Master *William* had giuen them such instructions, without our knowledge. I presently changed one into money, and distributed it to the poore Christians, which were there: for all their eyes were fixed vpon vs. Wee spent another in buying necessarie things for vs, as garments, and other things, which wee wanted. With the third, the Man of God himselfe, bought some things, wherein hee gayned somewhat which was profitable vnto him: we spent the rest, and that to; because since wee came into *Persia*, sufficient necessities were no where giuen vs: nor yet any where among the *Tartars*: but we seldome found any thing to be sold there. Master *William*, sometimes your Citizen, sends you a certaine Girdle set with a certaine precious-stone, which they vse to weare against thunder and lightning, and infinitely salutes you, alwaies commending you to God in his prayers: for whom, I shall neuer bee able to render sufficient thanks to God and you. Wee baptized there in all fixe soules. Wee therefore departed one from the other with teares: my Companion remayning with Master *William*; and I returning alone; with my Interpreter, my Guide, and one seruant; who had commandement to take one Mutton in foure dayes, for vs foure. Wee came therefore in two moneths and ten dayes from *Caracorum* to *Baatu*, and neuer saw Towne; nor token of any house, but Graues, except one Village, where in we eate no Bread. Nor did we euer rest, in those two moneths, and ten dayes; saue one day, because wee could not get Horses. Wee returned for the most part by the same kind of people, and yet through other Countries altogether: for we went in the Winter, and returned in the Summer, and by the higher parts of the North by farre; except, that fifteene dayes iourney wee must goe and returne alwaies hard by a certaine Riuer, betweene the Mountaines, where there is no lodging, but by the Riuer side. We went two dayes, and sometimes three dayes, taking no food but Cosmos. Once wee were in great danger, not being able to finde any people, our prouision fayling vs, and our Horses tyred. When I had trauelled twentie dayes, I heard newes of the King of *Armenia*, that he had passed by.

In the end of August I met with *Sartach* himselfe, who went to *Mangu Chan* with Flockes and Herds, and with his Wiues and Children: yet his great Families remayned betweene *Tanais* and *Etília*: And I did my dutie to him, saying, I would willingly stay in his Countrey; but *Mangu Chan* would not haue mee returne, and carrie his Letters. Hee answered, that I must performe the will of *Mangu Chan*. Then I asked *Coiac* for your children. Hee answered, they were in the Court of *Baatu* carefully recommended. I also required to haue our Clothes, and Bookes againe: who answered, Did yee not bring them to *Sartach*? I said, I brought them to *Sartach*, but I gaue them not vnto him, as yee know: and I replied to him, what answere I made, when he demanded whether I would giue them to *Sartach*. Then hee answered, you say true, and none can resist the truth. I left your goods with my father, who remayneth neere *Sarai*; which is a new Towne *Baatu* hath made vpon *Etília*, on the East shoare: but our Priests haue some of the vestments. If any thing like you (said I) keepe it, so my Bookes be restored. Then he told me, he would report my words to *Sartach*. I must haue Letters (said I) to your Father, to restore mee all. But he was readie to bee gone, and said vnto mee, The traine of the Ladies followeth vs neere at hand. Yee shall alight there, and I will send you *Sartachs* answere by this man. I was very carefull he should not deceiue me; yet I could not contend with him. Late in the euening the man came vnto me, whom he shewed me, and brought two Coats with him, which I thought had beene all of Silke, vncut: and he said vnto me, Behold two garments: the one, *Sartach* hath sent to you; and the other, if it seeme good to you, you shall present to the King, on his behalfe. To whom I answered, I weare no such garments, I will present them both vnto my King, in honour of your Lord. Then said hee, doe with them what you please; but it pleased me to send them both vnto you, and I send them to you by the bearer of these presents. He deliuered him Letters also to the Father of *Coiac*, to restore mee all which appertayned vnto me, because he had no need of any thing, which was mine. So wee came to the Court of *Baatu* the same day I departed thence, the yeere past; the second day after the Exaltation of the blessed Crosse. And I found our young men in health, yet much afflicted with penurie, as *Goffet* told me. And if the King of *Armenia* had not comforted them, and recommended them to *Sartach*, they had perished: for they thought I had beene dead. The *Tartars* also demanded of them, if they could keepe Oxen, or milke Mares. For, if I had not returned, they had beene brought into their seruitude.

After this, *Baatu* caused me to come vnto him, and made the Letters (which *Mangu Chan* sends vnto you) to be interpreted vnto me. For so *Mangu* wrote vnto him, that if it pleased him to adde any thing, or leaue out, or change, hee should doe it. Then said hee, yee shall carrie these Letters, and cause them to bee vnderstood. Hee demanded also what way I would goe, whether by Sea, or Land? I said, the Sea was shut, because it was Winter, and I must goe by Land.

A description
of *Porta ferrea*,
or *Derbent*.

Land. For I thought you had beene yet in *Syria*, so I directed my journey towards *Persia*. For if I had thought you had passed into *France*, I would haue gone into *Hungarie*: so I should sooner haue come into *France*, and by a more easie way then into *Syria*. Then wee trauelled * a moneth with him, before wee could haue a Guide. At length, they appointed mee a certaine *Iugur*, who vnderstanding I would giue him nothing, and that I would goe forth-right into *Armenia*, caused Letters to be made, to conduct me to the *Soldan* of *Turkie*, hoping he should receiue gifts of the *Soldan*, and that he should gayne more that way. Then we tooke our journey speedily (fifteene dayes before the Feast of All-Saints) towards *Sarai*, going forth right Southward, descending neere to *Etilia*, which is diuided into three Armes there below: euery one where- of is almost twice as big as the Riuer of *Damiatia*. It maketh foure other lesser Armes; so that we passed that Riuer in seven places by Boat. Vpon the middle Arme is the Village, called *Sumerkent*, without a wall: but when the Riuer overflowses, it is compassed with water. The *Tartars* were eight yeeres about it before they could take it: and the *Alani*, and the *Saracens* were in it. There we found one *Dutch-man*, with his wife, a very good man, with whom *Goffes* stayed in the Winter: for *Sartach* sent him thither to ease his Court. About those parts was *Baatu* on the one side of the Riuer, and *Sartach* on the other, about Christmas, and they goe no further downe. And it falleth out, that all the Riuer is frozen, so they passe ouer. Here is great store of grasse, and there among the Caues theeues hid themselues, till the Ice melt. *Coiacks* father, receiuing *Sartachs* Letters, restored my vestments vnto mee, except three Albes and an Amice trimmed with fine Silke, and a Stole, and a Girdle, and a Tualia adorned with golden embroyderie, and a Surplice. He restored also vnto me the siluer Plate, except the Censer, and the little Boxe where the Chrisme was. All which, the Priests which were with *Sartach* had. Hee restored my Bookes, except our Ladies Psalter, which hee kept with my leaue, because I could not denie it him: for he said, *Sartach* tooke much delight in it. Hee also requested me, that if it happened, that I returned vnto those parts againe, I would bring them a man that knew how to make Parchment: for he made a great Church (by the Commandement of *Sartach*) vpon the West side of the Riuer, as he said, and a new Towne. Yet I know that *Sartach* meaneth no such matter. *Sarai* and the Palace of *Baatu*, are vpon the Easterne side of the Riuer. And the Valley through which the Armes of the Riuer are spread abroad, containeth more then seven leagues in bredth. And there is great store of fish there. A Bible also in verse, and a cer- taine Booke in the *Arabian*, worth thirtie Sultanies, and many other things I neuer recovered.

SO departing from him on the Feast of All-Saints, alwaies going toward the South, in the Feast of Saint *Martin*, we came to the Mountaines of the *Alani*. Betweene *Baatu* and *Sarai* in fifteene dayes we found no people, but one of his sonnes, who went before him, with Falcons, and his Falconers, who were many, and one litle Village. From the Feast of All-Saints, for five dayes, we found not a man: and wee were almost in great danger by reason of thirst, one whole day and a night finding no water, till about three of the Clocke the next day, the *Alani* in those Mountaines yet hold out, so that, of ten of the Subiects of *Sartach*, two must come, to guard the straight and narrow passages of the Hills, lest they come forth of the Moun- taines, and steale their Cattell in the Playne. Betweene the *Alani*, and *Porta Ferrea*, which is two dayes journey thence, where the Playne of *Arcacci* beginneth, betweene the *Caspian* Sea and the Mountaines, there are certaine *Saracens* called, *Lesgi*, betweene the Mountaines, who likewise resist: so that those *Tartars*, who dwell at the foot of the Mountaines of the *Alani*, were faine to giue vs twentie men, to bring vs beyond the Iron gate, or *Porta Ferrea*. And I was glad, because I hoped to see them armed. For I could neuer see their Armour, though I had beene very desirous. And when we came to the dangerous Passage, of twentie there were two which had Habergions. And I demanded, whence they had them? They said, they had gotten them of the *Alani* aforesaid, who are good Worke-men for such things, and excellent Smiths. Whereupon, I thinke, they haue small store of Armour, but Quiuers, and Bowes, and Leather Iackes. I saw them presented with Iron Plates, and Iron Sculls (*capillos*) out of *Persia*. And saw two also, who presented themselues to *Mangu*, armed with Coats made of Hogs skins bent inward, of rough Leather, which were very vnfit, and vnwildy. Before we came to *Porta ferrea*, wee found one Castle of the *Alani*, which was *Mangu Chans*: for hee had subdued that Countrey. There we first found Vineyards, and drunke Wine. The day following, wee came to *Porta ferrea*, which *Alexander* the *Macedonian* King made. And it is a Citie whose East end is vpon the Sea shoare, and there is a little Plaine betweene the Sea and the Mountaines, through which the Citie is stretched forth in length vnto the top of the Mountaine which bordereth vpon it on the West: so that there is no way aboue, for the roughnesse of the Mountaines, nor below for the Sea, but forth-right through the midst of the Citie ouerthwart, where there is an Iron gate, from whence the Citie hath the name. And the Citie is more then a mile long, and in the top of the Hill a strong Castle: and it is as much in bredth, as a great stones cast: it hath very strong walls without Trenches, and Turrets of great polished stones. But the *Tartars* haue destroyed the tops of the Turrets, and the Bulwarkes of the Walls, laying the Tur- rets

rets euen with the Wall. Beneath that Citie, the Countrey was wont to bee like a Paradise.

Two dayes journey hence, we found another Citie called *Samaron*, wherein there were many *Jewes*. And when we past it, we saw walles descending from the Mountaines to the Sea. And leauing the way by the Sea by those walles, because it bent towards the East, wee went vp into the high Countries towards the South. On the morrow, wee passed through a certaine Valley, wherein the foundations of walles appeared, from one mountaine to another, and there was no way through the tops of the Mountaines. These were sometimes the Inclosures or walles of *Alexander*, restraining the fierce Nations, (to wit) the Shepherds of the Wildernes, that they could not inuade the inhabited Countries and Cities. There are other walles or Inclosures where

Sabatch a Citie of *Jewes*.

The inclosures or walles of *Alexander*.

Other inclosures where the *Jewes* are.

Or *Samagi*. Moan a great Plaine.

Cur, or the River *Cyrus*.

The *Georgians*. The Citie *Tiphis*.

Reg. 19. 45. 37.

Note that the Hebrew text hath *Ararat* in both places.

Ganges, a great Citie.

A bridge of Ships.

10 *Jewes* are. The next day we came vnto a certaine great Citie, called *Samag*. And after this, we entred into a great Plaine, called *Moan*, through which the River *Cur* floweth, of the which the *Curgi* haue their name, whom we call *Georgians*. And it runneth through the middle of *Tiphis*, which is the Metropolis of the *Curgines*, and in comes directly from the West running to the East, to the foresaid *Caspian* Sea, and it hath excellent *Salmons*. In that plaine wee found *Tartars* againe. Also by that plaine comes the River *Araxes*, which commeth from the greater *Armenia*, from betwixt the South and West: of which it is called the Land *Araxat*, which is *Armenia* it selfe. Whereupon in the booke of the *Kings* it is said of the *Sonnes* of *Sennacherib*, that hauing slaine their Father they fled into the Land of the *Armenians*. And in *Esay* it is said, that they fled into the Land of *Ararat*. To the West then of that most beautifull Plaine is *Curgia*. In that Plaine the *Crosmi* were wont to be. And there is a great Citie in the entrance of the Mountaines, called *Ganges*, which was their Metropolis, stopping the *Georgians* that they could not come downe into the Plaine. Then wee came to the Bridge of Ships, which were fastened together with a great Yron chaine, stretched forth crosse the River, where *Cur*, and *Araxes* meet together. But *Cur* loseth his name there.

After that, wee went alwayes vpward by *Araxes*, whereof it is said; *Pontem dedignatur Araxis*, *Araxes* disdaines a Bridge. Leauing *Persia*, and the *Caspian* mountaines on the left hand, towards the South: on the right hand, *Curgia*, and the great Sea toward the West: going South-west, betweene the South and the West. We passed through the meadowes of *Bacchu*, who is Generall of that Armie, which is there within *Araxis*. And hee hath made the *Curgi*, and *Turkes*, and *Persians* subiect to him. There is another Gouverneur (in *Persia* at *Taurinum*, ouer the Tribute) called *Argon*. Both which, *Mangu Chan* hath called home to giue place to his Brother comming into those Countries. That Countrey which I haue described to you, is not properly *Persia*, but was sometimes called *Hycania*. I was in *Bacchus* house, and hee gaue vs Wine to drinke, and he himselfe dranke *Cosmos*, which I would willingly haue drunke, if he had giuen it me: yet it was the best new Wine: but *Cosmos* is more whollome for an hunger-staruen man. Wee went vp therefore by the River *Araxes*, from the Feast of Saint *Clement*, vnto the second Sunday in Lent, till we came to the head of the River. And beyond that Mountaine where it riseth, there is a goodly Citie, called *Arserum*, which belongeth to the *Soldan* of *Turkie*. And neare thereabout *Euphrates* ariseth towards the North, at the foot of the Mountaines of *Curgia*: to whose Spring I had gone, but the Snow was so great, that no man could goe out of the trodden path: on the other side of the Mountaines of *Caucasus*, towards the South ariseth *Tigris*.

Chap. 48.

They alwaies goe vp the River of *Araxis*, by the Citie *Naxnan*, by the Countrey of *Sabens*, by the Castle *Marsu-gen*, by *Aini*, a Citie of *Sabens*; they came to the Head of *Araxis*.

When we departed from *Bacchu*, my Guide went to *Taurinum* to speake with *Argon*, carrying my Interpreter with him. But *Bacchu* caused me to bee brought to a certaine Citie, called *Naxnan*, which sometimes was the head of a certaine great Kingdome, and the greatest and fairest Citie; but the *Tartars* haue made it a Wildernes. And there were sometimes Eight hundred Churches of the *Armenians* there: now there are but two little ones: for the *Saracens* haue destroyed them: In one of the which, I held the feast of Christmas as I could with our Clerke. And the next day following, the Priest of that Church dyed: to whose buriall came a certaine Bishop, with twelue Monkes of the high Countries. For all the Bishops of the *Armenians* are Monkes, and of the *Greekes* likewise, for the greater part. That Bishop told me, that there was a Church neere that, where Saint *Bartholmew*, and likewise Saint *Iudas Thaddaeus* were martyred: but there was no way open for Snow. He told me also, that they haue two Prophets: The first or chiefe is *Methodius* the Martyr, who was of their Country, and plainely Prophesied of the *Ismaelites*. Which Prophecie is fulfilled in the *Saracens*. The other Prophet is called *Acacron*, who when hee dyed, Prophesied of a Nation of *Archers*, that should come from the North, saying; That they should Conquer all the Countries of the East: and should spare the Kingdome of the East, that he might giue them the Kingdome of the West. But he saith, our Friars the *Frankes* being Catholikes, beleue them not: And they shall possesse the Countries from North to South: and shall come vnto *Constantinople*, and shall take the Port of *Constantinople*. And one of them, who shall be called a Wise man, shall enter the Citie: and seeing the Churches and rites of the *Frankes*, shall cause himselfe to be Baptized, and shall counsell the *Frankes*, how they may kill the Emperour of the *Tartars*; and there they shall be confounded. Hearing this, the *Frankes* which shall be in the middle of the Land, (to wit) *Hierusalem*, shall set

Bacchu a Prince of the *Tartars*: of whom perhaps the Citie *Bacchu* on the *Caspian* Sea (of which it is now called the Sea of *Bacchu* or *Bacon*) hath her name.

The head of *Tigris*.

Or *Vaknan* sometimes the greatest Citie of *Armenia*. *Bartholmew* and *Thaddaeus* Martyrs.

The Prophecie of *Methodius*. Or *Acacron*, his Prophecie.

vpon the *Tartars*, who shall border vpon them, and with the helpe of our Nation (that is) the *Armenians*, shall pursue them: so that the *French King* shall place his Royall Throne at *Taurinum* in *Persia*. And then all East Countries, and all the vnbeleeuing Nations shall be conuerted to the Faith of Christ. And there shall be so great Peace in the world, that the Liuing shall say to the Dead, Woe be vnto you wretches, that liued not vntill these times. I read this Prophecie brought to *Constantinople* by the *Armenians*, which remaine there, but I made light of it. Yet, when I spake with the said Bishop, calling it to minde, I regarded it the more. And throughout all that *Armenia*, they as firmly beleue this Prophecie as the Gospell. Hee said vnto vs also: Euen as the Soules in *Limbo* expected the comming of Christ for their deliery; so doe we looke for your comming, that we might be freed from this slavery, wherein wee haue so long liued. Neere the City (*Vaxnan*) aforesaid, there are Mountaines, on the which (they say) the Arke of *Noah* rested. And there are two, one greater then the other, and *Araxes* runneth at the foote of them. And there is a little Towne there, called *Cemanium*, which is by Interpretation, Eight: for (they say) it was so called of the Eight persons, which came forth of the Arke, and built it. Many haue assayed to climbe the greater Hill, and could not. And that Bishop told me, that a certaine Monke was very much troubled, and an Angell appeared vnto him, and brought him a piece of the wood of the Arke, willing him to trouble himselfe no more. That piece of Wood they had in their Church, as he told me. Neither is the Hill so high in appearance, but that men might well get vp vnto it. A certaine Old man shewed me a sufficient reason, why none should climbe it. They call that Mountaine *Massis*: and it is of the Feminine gender in their Tongue. No man (saith he) must climbe vp *Massis*, because it is the Mother of the world.

In that Citie (of *Vaxnan*) Frier *Bernard Cathalane*, of the Order of the Preaching Friars found me; who abode in *Georgie*, with a certaine Prior of the Sepulcher, who possesseth great lands there. And he had learned somewhat of the *Tartars* language. Who went with a certaine *Hungarian* Frier to *Taurinum*, to desire *Argons* Passe to *Sartach*. When they came there, they could not haue accesse: and the *Hungarian* Frier returned by me to *Tephelis* with one Seruant: but Frier *Bernard* remained at *Taurinum* with a certaine Lay Frier, whose language he vnderstood not. We went out of the Citie of *Vaxnan* in octauis of the Epiphanie: for we had stayd long there by reason of the Snow. We came therefore in foure dayes to the Countrey of *Sabenssa*, a certain *Curgine*, sometimes mighty, but now tributary to the *Tartars*, who destroyed all his Munition: whose Father *Zacharias* got that Countrey of the *Armenians*, hauing deliuered them from the hands of the *Saracens*. And there are many faire Villages of true Christians, hauing Churches right like the *Frankes*. And euery *Armenian* hath in his house, in an honourable place, a wooden hand holding a Crosse, and he sets a burning Lampe before it: And that which we doe with holy Water, sprinkling it to driue away wicked Spirits, they doe the same with Frankinsence. For euery euening they burn Frankinsence, carrying it through all the corners of the house, to rid them of all kinde of Enemies. I ate with the foresaid *Sabenssa*, and he did me great reuerence, both he and his Wife, and his sonne *Zachary* was a very faire and wise young man. Who demanded of me, that if he should come vnto you, whether yee would entertaine him? for he so hardly brooketh the Dominion of the *Tartars*, that, though he haue plenty of all things, he had rather trauaile into a strange Countrey, then indure their Lord-like Dominion. They said further, that they were sonnes of the Church of *Rome*: and if the Lord Pope would send them any ayde, they would bring all the bordering Nations vnto the subiection of the Church.

From that Towne of his, in fifteene dayes, we entred the Countrey of the *Soldan* of *Turkie*, vpon the first Sunday in Lent. And the first Castle we found, is called *Marsengen*. All in the Castle were *Christians*, *Armenians*, *Curgines*, and *Greekes*: The *Saracens* onely haue the Dominion. There, the Captaine of the Castle said, he had receiued commandement, that no victuals should be giuen to any *Frank*, or to the Ambassadors of the King of *Armenia*, or of *Vastacius*. So that from the place where wee were the first Sunday in Lent, vnto *Cyprus*, (whether I came eight dayes before the Feast of Saint *John Baptist*) we must buy our prouision. He, who was my guide procured me Horses, and tooke money for the victuals, and put it in his purse. When he came into the Fields, seeing a flocke any where, hee violently tooke one Sheepe, and gaue it to his family to eate, and maruailed I would not eate of his robbery. In the Purification I was in a certaine Citie called *Aini*, which was *Sabenssa*, whose situation is most strong: and there are there a thousand *Armenian* Churches, and two Synagogues of the *Saracens*. The *Tartars* place a Baily there. There five Preaching Friars met me, whereof foure came from *Prouince* in *France*, and the fift ioyned himselfe to them in *Syria*, and they had but one sicke Boy, who could speake *Turkish*, and a little *French*: And they had the Popes letters to *Sartach*, and to *Mangu Chan*, and to *Buri*; such as your Highnes gaue me, Letters of request, that they would suffer them to continue in their Countrey, and Preach the Word of God, &c. But when I told them what I had seene, and how they sent me backe againe, they directed their journey to *Tephelis*, where there are Friars of their Order, to consult what they should doe. I said vnto them they might well passe, by those Letters, if they would: but they should bee well assured to indure much labour, and render an account of their comming: for seeing they had no other message, but the office of Preaching, they would

would care but a little for them, and chiefly, because they had no Interpreter. What they did after, I know not.

THe second Sunday in Lent, we came to the head of *Araxis*, and passing beyond the top of the Mountaine, we came to *Euphrates*; by the which wee descended eight dayes, alwayes going to the West, vnto a certaine Castle, called *Camath*. There *Euphrates* bendeth to the South towards *Halapia*. But we passing the River went through very high hilly Countries, and through the deepe Snow to the West. There was so great an Earthquake there that yeare, that in one Citie called *Arsengan*, tenne thousand persons noted by name, perished, beside poore men of whom there was no notice taken. Riding three dayes together, we saw the gaping of the Earth, as it was cleft by the Earthquake, and the heapes of Earth which came from the Mountaines, and filled the valleyes: so that if but a little more of the Earth had bene moued, that which *Esay* speaketh had bene literally fulfilled. *Every valley shall be filled, and every Mountaine, and little hill shall be humbled.* We passed through the Valley where the *Soldan* of *Turkie* was vanquished of the *Tartars*. It were too long to write how he was overcome. But a certaine seruant of my guides who was with the *Tartars*, said; That the *Tartars* were not aboue tenne thousand in the whole; and a certaine *Curgine*, a seruant of the *Soldans*, said; That there were two hundred thousand with the *Soldan*, all Horsemen, In that plaine where the Battaille was, nay that fight, there brake out a great Lake, at the time of the Earthquake. And my heart told me; that all that Earth opened her mouth to receiue yet more blood of the *Saracens*. We were in *Sebastie* of the lesser *Armenia* in Easter weeke. There we visited the Tombes of forty Martyrs. There the Church of Saint *Blase* standeth: but I could not goe thither, because it was aboue in the Castle. On Low-Sunday we came to *Cesaria* of *Cappadocia*; where there is a Church of Saint *Basill* the great. About fifteene dayes after we came to *Iconium*, making small iournies, and resting in many places: because we could not so readily procure Horses. And my guide did this of purpose; taking vpon him to sollicite his owne busines three dayes, in euery Towne: whereupon, I was much grieved, but durst not speake, because he might haue sold, or slaine me and our seruants, and there was none to gaine-say it. I found many *Frankes* at *Iconium*, and a certaine *Iannuesian* Marchant, called *Nicholas de Sancto Syrio*. Who with a certaine companion of his a *Venetian*, called *Boniface de Molendino*, carried all the Allum out of *Turkie*, so that the *Soldan* could not sell any, but to those two: and they made it so deare, that what was wont to be sold for fifteene *Bizantians*, is now sold for fifty. My guide presented me to the *Soldan*; The *Soldan* said, he would willingly cause me to be conuayed to the Sea to *Armenia*, or *Cilicia*. Then the foresaid Marchant knowing that the *Saracens* made little accompt of me, and that I was much burthened with the company of my guide (who troubled me euery day to giue him gifts) caused me to be conueyed to *Curcum*, a Hauen of the King of *Armenia*. I came thither the day before the Ascension, and stayed till the day after Pentecost. Then I heard, that Ambassadors came from the King to his Father. Then I went speedily to the Kings father, to demand, whether hee had heard any newes of his Sonne: And I found him set with all his Sonnes, one excepted, called *Barum Usin*: Who made a certaine Castle. And he receiued newes from his Sonne, that hee was returned: And that *Mangu Chan* had much eased his Tribute, and had giuen him a Priuiledge, that no Ambassadour should come into his Countrey. Whereupon the old man himselfe, with all his Sonnes made a great Banquet. And he caused me to be conueyed to the Sea, to the Hauen called *Ajax*: and thence I passed ouer into *Cyprus*. And at *Nicosia* I found our Prouinciall, who the same day carried me with him to *Antiochia*, which is in very weake state. Wee were there on the Feast of Saint *Peter* and *Paul*. From thence we came to *Tripolis*, where our Chapter was, in the Assumption of the Blessed Virgin.

ANd our Prouinciall determined, that I should leaue *Acon*, not suffering me to come vnto you: Commanding, to write vnto you, what I would by the bearer of these Presents. And not daring to resist contrarie to my obedience, I did according to my power, and vnderstanding: craving pardon of your inuincible Clemencie for my superfluities, or wants, or for any thing that shall be vndiscreetly, nay foolishly spoken, as from a man of little vnderstanding; not accustomed to indite long Histories. The Peace of God which passeth all vnder standing preferue your heart and vnderstanding.

I would willingly see your Highnesse, and certayne spirituall friends, which I haue in your Kingdome. Wherefore, if it should not bee contrarie to your Maiesties liking, I would beseech you to write to our Prouinciall, that he would let me come vnto you, and returne shortly againe into the Holy Land.

Concerning *Turkie*, your Maiestie shall vnderstand, that the tenth part there, is not a *Saracen*: nay, they are all *Armenians*, and *Greekes*, and Children rule ouer them. For the *Soldan* who was conquered of the *Tartars*, had a lawfull Wife of *Hiberia*, by whom he had one feeble Sonne, concerning whom he charged, that he should be the *Soldan*. He had another of a *Greeke* Concubine, whom he gaue to a certayne great Admirall. The third, hee had of a *Turke*. To whom

Chap. 49.

They come to *Euphrates*, to the Castle *Camath*, they passe into *Cyprus*, afterward to *Antiochia*, and thence to *Tripolis*.

The Citie *Arsengan* mightily shaken with an Earthquake. The gaping of the earth closed.

The Valley where the *Soldan* of *Turkie* was vanquished of the *Tartars*.

many *Turks* and *Turcomans* being gathered together, they purposed to haue slaine the Sonnes of the Christians. They ordayned also (as I vnderstood) that after they had gotten the Victorie, they would destroy all the Churches, and kill as many as would not become *Saracens*. But hee was ouercome, and many of his men slaine. Hee renued his Armie the second time, and then was taken, and is yet in Prison. *Pacaster* the Sonne of the *Greeke* Concubine procured of *Filaster*, that he might be *Soldan*, because the other was weake, whom they sent to the *Tartars*. Whereupon, his Kindred on the Mothers side (to wit) the *Hiberi*, and the *Curgi* were angry. So that a child ruleth in *Turkie*, hauing no Treasure, few Warriours, and many Enemies. The Son of *Vastacius* is weake, and hath warre with the Sonne of *Assau*, who likewise is a child, and worne out with the scrutude of the *Tartars*. Wherefore, if an Armie of the Church should come to the Holy Land, it were a very easie thing to subdue all these Countries, or to passe through them.

The King of *Hungarie* hath not aboue thirtie thousand Souldiers. From *Cullin* to *Constantinople* are not aboue threescore dayes iourney by Waggon. From *Constantinople* are not so many dayes iourney to the Countrey of the King of *Armenia*. In old time, valiant men passed through these Countries, and prospered, yet they had most valiant Resisters; whom God hath now destroyed out of the Earth. And we need not be in danger of the Sea, nor in the mercie of Sayers. And the price which wee should giue for freight, were sufficient for expenses by Land. I speake it confidently, if your Countrimen (I say not Kings and Souldiers) would goe, as the Kings of the *Tartars* goe, and bee contented with such victuals, they might winne the whole World. It seemeth not expedient (as I thinke) that any Frier goe vnto the *Tartars* any more, as I did, or as the Preaching Friers doe. But if our Souereigne Lord the Pope would honourably send a Bishop, and answere their follies; which they haue thrise written to the *Frankes*: once to Pope *Innocent* the Fourth of Sacred Memorie, and twice to your Maiestie, once by *Dauid*, who deceiued you, and now by me, he might speake vnto them what he would, and also cause them to put those things in writing. For they heare whatsoever an Ambassadour will speake, and alwayes demand, if he will say any more. But he must haue a good Interpreter; nay, many Interpreters, and large Expenses.

For the Readers better satisfaction touching the former Authour, and knowledge of the North parts of Asia and Europe and for His owne sake also, I haue added this Transcript of our famous Countriman Frier Bacon, which I haue not Englished, both to preuent tediousnesse in this Worke, otherwise more then enough voluminous; and because he was an Historian, no Traveller; and the use thereof is principally to such as can reade his owne Idiome; a good part also being the same with that which our former Frier hath deliuered.

D Aquilonarem vero partem Indiæ, ut dictum est, sunt Mare Scythicum, & montes illi magni, qui *Caucasus* & *Taurus*, & multis alijs nominibus vocantur, secundum diuersitatem locorum & Gentium. Et ab Occidente est *Persida* seu *Parthia* & *Media*. Deinde sub eis ad Occidentem est *Mesopotamia* & tota *Syria*, ut dictum est. Sed in consinio *Mediæ* & *Parthiæ*, est *Porta ferrea Alexandri*; qua est *Ciuitas* denominata à *Portis*. Et ille porta dicuntur *Caspia*, non *Caucasica*, ut dicit *Plinius*. Nam alia sunt porta *Caucasica*, ut postea dicetur. Quia in littore *Maris Caspiæ* sunt hæc Porta. Est enim Mare quoddam quod fit ex concursu maximorum fluminum venientium ab *Aquilone*, & *Caspium* vocatur, atque *Hircanicum* secundum *Plinium*. Nam *Caspia* & *Hircani* super littora illius *Maris* inhabitant. Non igitur est hoc Mare veniens ab Oceano, ut *Isidorus* & *Plinius*, & omnes Authores Occidentales scribunt. In hoc enim casu non habuerunt experientiam certam, nec per se, nec per alios, sed ex rumore scripserunt.

In libris autem de moribus Tartarorum, & per fide dignos, qui in illis Regionibus fuerunt, patet, quod hoc Mare sit ex concursu fluminum. Et est Mare satis magnum. Nam circuitus est quatuor mensium. Et *Hircania* prope, est super littus Meridionale illius *Maris* in termino *Parthiæ*. Et ubi *Parthia* coniungitur *Mediæ* in *Portis* illis, extenditur à *Portis Caspijs* versus Orientem, ut dicit *Plinius*. Deinde contra residuum *Mediæ* ad eius Septentrionem, & ad Occidentem *Hircaniæ* est maior *Armenia*: & eam diuidit *Euphrates* à *Capadocia*, ut dicit *Plinius*. Propter quod *Capadocia* est ad Occidentem *Armeniæ* maioris. Deinde versus *Syriam* & Mare nostrum est *Cilicia*, qua dicitur *Armenia minor*. Vnde iacet partim Medio, partim in Occidente *Capadociæ*; & eius principium non distat ab *Antiochia* per duas dietas. Sub *Cilicia* ad Septentrionem super Mare comprehenditur *Pamphilia*, ut dicit *Plinius*, neglecta gente *Isaurica*, vel non computata per se propter prauitatem, sed sub eis comprehensa.

- bensa. In Cilicia est Tarsus Metropolis eius; in quo natus fuit Beatus Apostolus Paulus. Et durat Cilicia à meridie in Septentrionem per Tarsum in latitudine circiter quatuor dietas versus Turkiam. Nam ad Septentrionem Ciliciæ est Lycaonia; ubi est Iconium celeberrima Civitas; à qua Lycaonia dicitur quasi Iconia. Unde Princeps eorum vocatur Soldanus Iconij & Turkia. Et à finibus Armeniæ usque Iconium sunt octo dietæ. Nomina Prouinciæ in his Regionibus sunt multum mutata propter guerras. Nam Turkia multas terras occupat quæ apud Authores habent nomina antiqua. Vt est pars Asiæ minoris, & Phrygia & Lydia. Asia vero maior continet plus medietate Mundi, & totum præter Europam & Africam: unde continet hanc Asiæ minorem. Et hæc nunc vocatur apud Græcos Anatoli, id est, Orientalis Græcia: in qua est Galatia; unde Galatæ, quibus scribit Apostolus.
- 10 & Troia dicitur illa formosissima Civitas: & sunt alia mura, ut Ephesus, & 7. Ecclesia Apocalypsis; & Nicea: unde Synodus Nicena, & multa alia. Et ab Iconio usque Niceam sunt 20. dietæ in æstate: & ab ea usque ad Brachium Sancti Georgij (quod apud antiquos vocatur Hellepontus) Mare inter Italiam & Antiochiam. Et ibi terminatur Asia minor. Et habet à parte Occidentis Thraciam, Macedoniam, & Achaiam. A parte vero meridiei habet Mare illud, quod est inter Italiam & Græciam, & Antiochiam, & Egyptum. Ab Oriente habet Phrygiam. Nam ut dicit Plinius curialite, Phrygia Troadi superiecta Septentrionali sua parte Galatis continisa est, meridiana Lycaoniæ ab Occidente Capadociæ habet. Et dicit quod Lydia, Phrygiæ ex ortu solis vicina est, unde fuit Crcesus ditissimus Rex Lydorû. Brachium vero Sancti Georgij est strictum multum, & habet Constantinopolim ab Occidente in Europa. Et extenditur à Mari magno quod est inter Asiæ & Egyptum, Syriam, & Italiâ, circiter centum leucas versus Aquilonem, usque ad aliud Mare, quod vocatur Ponticum, & Mare Maius. Et istud Mare habet formam arcus Scythici; & multas Regiones determinat. Vnde hic incipiunt Regiones Aquilonares: de quibus Philosophi meridiani parum sciuerunt, secundum quod Ethicus Astro-
nomus refert in suo libro. Sed hic perambulauit omnes has Regiones, & Mare Oceanum Septentrionale cum Insulis suis nauigauit. Volo sequi ipsum: & nihilominus libros de moribus Tartarorum: & præcipue fratrem Willielmum, quem Dominus Rex Franciæ, Lodouicus in Syria existens misit ad terram Tartarorum anno Domini 1253. Qui frater scripsit Domino Regi situm Regionum & Marium. Extenditur autem hoc Mare maius ab Occidente, scilicet à Constantinopoli in Oriens, per mille quadringenta miliaria in longum: & in medio eius coarctatur ex utraq; parte in angulos: & in angulo meridiano est castrum & portus Turkiz, quod vocatur Sinopolis: A parte vero Aquilonis habet aliud castrum in angulo, quod vocatur Soldaia; & est in Prouincia quæ nunc Cassaria dicitur, id est, Caissaria. Et sunt trecenta miliaria inter Sinopolim & Soldaiam. Et hæc est latitudo maris inter illos angulos. Et ista castra sunt duo portus famosi, à quibus transcunt homines à meridianis Regionibus ad Aquilonares, & e contrario. Et ab istis castris versus Occidentem seu Constantinopolim extenditur Mare per septingenta miliaria in longum & latum, similiter ad Orientem per septingenta. Et ista Prouincia Cassaria circumdatur Mari à tribus lateribus. Nam in Occidente habet partem Maris Pontici, ubi est ciuitas Kersoua, in qua fuit Sanctus Clemens martyrisatus; & prope eam est Insula, in qua est Templum, quod dicitur Angelicis manibus præparatum, in quo corpus Sancti sepultum fuit. Et à Kersoua usque ad Soldaiam sunt quadringenta castra, quorum quodlibet fere habet proprium Idioma. Et sunt ibi multi Goti, qui omnes loquuntur Teutonicum. Et à parte meridiei Cassariæ extenditur Mare Ponticum: Et in Oriente eius cadit flumen Tanais in Mare, ubi habet latitudinem duodecim miliariorum, ubi est Civitas Matrica. Et flumen illud versus Aquilonem facit Mare quoddam, habens septuaginta miliaria in longitudine & latitudine, nusquam habens profunditatem ultra 6. pedes. Et hoc Mare est Palus Mæotis famosissima, de qua Philosophi & Historiæ & Poeta loquuntur.
- Et flumen Tanais extenditur ultra illam paludem versus Aquilonem usque ad montes Riphæos; qui sunt in ultimo Aquilonis: à quibus montibus oritur hoc flumen, & descendit per longum terræ tractum in Paludem supradictam, faciens eam: & ultra eam disgraditur, & fluit in Mare Ponticum, ut prædixi. Et hoc flumen famosum diuidit Europam ab Asia in locis illis; & Palus illa & plures paludes sunt contiguae: sed quasi pro una computantur, & vocantur paludes Mæotis: vel Mæotidæ in adiectiuo. Paludes igitur illæ quæ vocantur Mare illud vadosum sunt in Oriente Cassariæ; & pars fluminis Tanais, quæ est inter paludes & Mare Ponticum. Et hæc Prouincia Cassaria habet ab Aquilone vastam solitudinem, quæ extenditur à flumine Tanai in Oriente usque ad Danubium in Occidente itinere duorum mensium velociter equitando, sicut equitant Tartari. Et hoc est una die quantum est ab Aureliani Parisijs. Vnde durat hæc terra circiter 4. menses, secundum quod alij homines communiter equitant. Et hæc terra fuit tota Cumanorum, qui dicebantur Captac. Sed Tartari destruxerunt eam totaliter, & interfecerunt Cumanos, præter partem quæ fugit ad Regnum Hungariæ, qui sunt ei tributarii: Et à Teutonicis dicitur Valana; A Plinio & Isodoro & ceteris Alania Occidentalis. Et hæc Prouincia habet Danubium, & Poloniam, & Hungariam, ab Occidente. Et ab Aquilone istius Prouinciæ est Russia magna: quæ similiter à Polonia in una parte sua extenditur ad Tanaim; sed in magna sui parte habet Leuconiam in Occidente (quæ est terra ita magna sicut Alemannia.) Ad cuius partem Occidentalem sunt multa terra in circuitu Maris cuiusdam, quod Mare fit per multa Brachia Maris Oceani quæ veniunt per medium Daciæ, & ultra versus Orientem dilatant se magnum Mare, quod ab Occidente habet Daciæ & Sweciam: Sed Swecia est ad Aquilonem Daciæ declinans aliquantulum in Orientem ultra Daciæ: ultra quas ad Aquilonem est Norguegia. Deinde Mari magno interiecto sunt Scotia & Anglia: & Mari paruo interposito Hibernia. Nota sunt hæc Regiones; sed

- tango eas propter notitiam aliorum. Si ergo à finibus Occidentalibus ex parte Aquilonis ascendamus versus Orientem, primo est Hibernia, secundo Britannia maior, qua continet Angliam & Scotiam: Deinde Norguegia, Swecia, Dacia, & post in Orientem versus est mugnum mare predictum, quod vocatur mare Orientale; quia Oceanus non se extendit ultra altud mare: Sed super latus Aquilonare istius maris immediate post angulum Sweciae est Estonia: deinde Liuania versus Orientem illius maris: deinde Curonia seu Curlandia declinando ad Meridianum latus: postea Prussia magna terra in Meridiano latere: deinde Pomerania: postea Lubec portus magnus & famosus in confinio Daciae & Saxoniae. In medio istius maris est Insula quadam, qua vocatur Gotlandia. Et super Liuaniam ad Orientem est Semigallia. Curoniam circumdat Leuconia predicta, & etiam circumdat Russia magna ex utraque parte maris dicti, & terminatur Meridiana ad Prussiam & Poloniam, Polonia vero iacet ad Meridiem Prussiae: & ad Meridiem eius est Bohemia: deinde Austria. Et ad Occidentem terrarum istarum Alemannia; & postea Francia & Hispania. Sed haec nota sunt: facio tamen mentionem propter alias. Ad Orientem Austriae & Bohemiae est Hungaria, ad quam Occidentalis pars Albaniae descendit. Nam cadit super Danubium, qui fluit per medium Hungariae, & ultra eam in mare Ponticum per duodecim ostia magna. In termino vero Hungariae Orientalis à parte Aquilonis occurrit * Vel Valachia. Moldavia, contra quam ad Meridiem Danubij sunt * Balchi & Bulgari & Constantinopolis, quae terra antiquitus vocabantur Thracia. Albania igitur Occidentalis extenditur à Danubio post finem Hungariae versus Orientem usque ad flumen Tanaim; habens Cassariam à Meridie, & Balchiam, Bulgariam & Constantinopolim. Ab Occasu vero Hungariam & Poloniam, & extremitatem Russiae: ab Aquilone habet totam longitudinem Russiae.
- Et ultra Russiae ad Aquilonem est Gens Hyperborea, qua sic nominatur à montibus magnis, qui vocantur Hyperborei. Et hac Gens propter aeris salubritatem vivit in sylvis. Gens longeva usque quo fastidiant mortem, optimarum consuetudinum, Gens quieta & pacifica, nulli nocens, nec ab alia Gente molestat: sed confugiunt ad eam sicut ad asylum. Qualiter autem potest Regio ibi esse temperatissima, tetigi prius in complexionibus locorum Mundi. Et sic habemus regiones Aquilonares in Europa notabiles. Ritus vero istarum Gentium sunt diversi. Nam Pruteni, Curlandi, Liunioni, Estoni, Semigalli, Leuconij sunt Pagani. Alani vero non sunt, quia Tartari ceperunt terram illam, & fugaverunt omnes, usque in Hungariam. Et Cumani sunt Pagani: & Alani fuerunt similiter, sed deleti sunt. Ruteni sunt Christiani, & sunt scismatici, habentes ritum Graecorum, sed non vivunt lingua Graeca; immo lingua Sclavonica: qua est una de linguis, quae plures occupat regiones. Nam Russiae, Poloniam & Bohemiam, & multas alias Nationes tenet. Tartari vero à Danubio in hoc in terram Alanorum seu Cumavorum, & ulterius, usque fere ad partes ultimas Orientis, & alias Nationes eis vicinas ad Aquilonem & Meridiem subiugaverunt pro maxima parte. Nam aliqua Gentes sunt in montanis & locis tuisissimis, quas non possunt debellare, licet sint eis vicini, quia sunt inexpugnabiles.
- Tanais quidem fluvius descendit à montibus Riphæis altissimis, qui sunt in vero Aquilone: nec est ultra illos ad Aquilonem habitatio. Et in termino Orientali Russiae & Alaniae, ubi mercatores & alij conveniunt de Hungaria & Cassaria, & Polonia & Russia est quoddam Casale, ubi navigio pertransitur flumen Tanais. Et est Tanais ibi ad latitudinem Sequanae Parisijs. Et ultra flumen illud est Albania superior usque ad aliud flumen magnum, quod vocatur Etilia, quae maior est in quadruplo quam Sequana: & est de maioribus fluminibus Mundi; & crescit in aestate sicut Nilus: & à parte Aquilonis distat hoc flumen à Tanai per decem dietas: sed versus meridiem multum seperantur. Nam Tanais cadit in mare Ponticum, & Etilia in mare Caspium: & facit illud mare, cum alijs fluminibus multis, quae veniunt de Perfide & alijs locis. Nam à Pontico mari secundum Plinium sunt tricenta octoginta milliaria usque ad mare Caspium. Et in hac terra habitabant Cumani. Sed Tartari deleverunt omnes, sicut ex altera parte fecerunt usque ad Danubium, ut dictum est. Et Tartari habent pecora infinita, & habitant in tentorijs, non habentes villas nec castra, nisi rarissime. Et unus Princeps cum exercitu, & cum suis armentis gregum vagatur inter duo flumina. Ut unus inter Boristhenem & Tanaim: alius inter Tanaim & Etiliam; & sic ultra versus Orientem, quia semper divisi sunt per pascua & aquam. Et à Ianuario incipiunt adire partes Aquilonares iuxta flumina usque ad Augustum: & tunc redeunt versus meridianas propter frigus Aquilonis in hyeme. Et versus Aquilonem distat Etilia à Provincia Cassariae per unum mensem & tres dietas, sicut equitant Tartari. Hac vero terra Tartarorum inter Tanaim & Etiliam habet ab Aquilone quasdam Gentes: & primo est Gens Arimphaea prope montes Riphæos, quae est similis Hyperboreis in omnibus. Et haec duae Gentes sunt prope polum in Aquilone. Sed remotius ab Aquilone ultra Tanaim est primo Gens quae vocatur Moxel, subiecta Tartaris. Et sunt adhuc sine lege pure Pagani: civitatem non habent, sed casulas in sylvis. Dominus eorum & magna pars eorum fuerunt interfecta in Polonia per Polonos & Alemannos & Boemos. Nam Tartari duxerunt eos ad bellum cum Polonis: & multum approbant Polonos & Alemannos de strenuitate sperantes adhuc liberari à servitute Tartarorum per eos. Si mercator veniat inter eos, oportet quod ille in cuius domo primo hospitiatur, det ei expensas quantum vult ibi morari. Hac enim est consuetudo illius Regionis. Post hos ad Orientem est Gens quadam quae vocatur Merduini, subiecti Tartaris. Sed sunt Saraceni, habentes legem Machometi. Post eos est Etilia flumen predictum quod descendit à maiori Bulgaria, de qua postea dicetur. A meridie vero istius Regionis Tartarorum super mare Ponticum sunt Iberi & Georgiani. Et in Georgia est metropolis civitas,

ciuitas, quæ vocatur Tephelis, in qua Fratres Predicatores habent domum. Et ulterius versus Orientem est terra Corasminorum: sed deleti sunt à Tartaris. Et in his locis solebant antiquitus esse Amazones, secundum Plinium & Ethicū Astronomum. Amazones enim, ut refert Ethicus, fuerunt mulieres ducentes exercitum magnum ex mulieribus sine viris collectum: quæ aduocantes viros certis temporibus anni conceperunt: sed masculos genitos interfecerunt, feminas reseruando, quarum in iuuentute mamillas dextras per artificium chirurgiæ abstulerunt ne in sagittando reciperent impedimentum per mamillas; & Minotauros ac Centauros, monstra ferocissima nutruerunt à iuuentute mamillis suis: unde antecedeabant eas sicut matres suas: & omnem exercitum premebant magis per huiusmodi monstra, quam per arma: & similiter Elephantes à iuuentute nutrebant & assuescebant ad bella: & sic per centum annos vastabant meridianas partes Asiæ & Græciæ, donec ab Hercule fuerunt seductæ & destructæ.

Tephelis.
Cormini deleti.
Amazones.
Pala.

Hæc vero loca Georgianorum & Corasminorum habent terram Soldani Turkiæ & Capidociam à Meridie. Nam in latere Meridiano maris Pontici est terra Soldani vsque ad Sinopolim, de qua prius dictum est: & post eam in eodem latere maris versus Occidentem est terra Vastacij, scilicet Græcia Orientalis. Nam Occidentalis vocatur ubi Constantinopolis est, & Regiones ei annexæ citra Brachium Sancti Georgij in Europa. Sed Armenia maior est super Capadociam ad Orientem. Et ideo illa Armenia etsi Meridiana sit respectu Georgiæ, tamen in Orientem tendit, & extenditur vsque Mediam & Mesopotamiam. Et hæc terra tota æstimatur à multis esse terra Ararat: propter hoc quod in Isaia dicitur, quod filij Sennacherib interfecit patre fugerunt in Ararat: In libro Regum

Terræ Vastacij
sit. Regnum
Trepézondæ.
Terra Ararat.

20 dicitur, quod fugerunt in Armeniam. Sed Ieronimus undecimo libro super Isaia soluit hoc dicens: Ararat regio in Armenia campestris per quam Araxis fluit incredibilis vbertatis ad radices montis Tauri, qui vsque illic extenditur. Quapropter Ararat non est tota Armenia, sed regio determinata; magna tamen est. Nam Araxes fluuius, à quo Ararat regio nominatur, extenditur à capite suo per iter trium mensium & amplius. Caput autem eius est Fons in monte Armeniæ ubi proprie oritur Euphrates ex parte Aquilonis, & Tigris ad aliud latus montis versus Meridiem. In montibus autem Armeniæ testante Scriptura requieuit Arca Noe: Sed non in quibuscunque montibus: quoniam non est in istis, ubi oriuntur ista tria flumina magna, sed in altissimo Tauri montis cacumine, ubi Ararat regio est, secundum quod dicit Ieronimus undecimo super Isaia; Arca in qua liberatus est Noe cessante diluuiio non ad montes generaliter Armeniæ, sed ad montes Tauri altissimos, qui Ararat imminet

De hoc dubio.

Tria flumina ex
eisdem montibus

30 campis. Et prope illos montes est ciuitas quæ maxima fuit, antequam eum destruxerunt Tartari. Nam fuerunt in ea octingenta Ecclesiæ Hermenorum. Et in tempore Fratris Willelmi, cum transiit per eam, non fuerunt nisi due parua: Et ibi prope fuerunt Martyrizati Beatus Bartholomæus & Beatus Iudas Thaddæus. Et ibi sunt due Prophetiæ. Una est Beati Methodij Martyris, qui fuit de Gente illa. Et plane prophetauit de Ismaelitis: quæ prophetia impleta est in Saracenis. Alius Prophetia eorum vocatur Akaton, qui prophetauit de Tartaris & destructione eorum. Dicit enim, quod ab Aquilone veniet Gens Sagittaria, quæ omnes Nationes Orientis subingabit: Et venient in Regnum Occidentis, scilicet ad Constantinopolim, & ibi per Principes Occidentis destruentur. Et tunc conuertentur omnes Gentes Christi: & erit tanta pax ubique, quod vini dicent mortuis: Vae vobis, quod non vixistis vsque nunc. Et Imperator Christianus ponet solium suum in Taurino in Perside. Et Her-

Frater Willel-
mus.
Vid. sup. in Ru-
bric.
Bartholo-
mæus.
Iudas Tha-
dæus.

40 meni habent istam prophetiam sicut Euangelium. Et ciuitas memorata vocatur nunc Naxuan; quæ solebat esse caput Regni: & est versus partes Aquilonares Armeniæ. Nam à festo Sancti Clementis ascendit Frater Willelmus iuxta Araxem ubi terminatur versus Aquilonem; & in festo Natalis venit ad illam ciuitatem; & in Octauis Epiphaniæ recessit ab ea: & per Araxem iuit vsque ad caput eius in secunda Dominica quadragesimæ: & non longe plus est à ciuitate illa ad ultimum Armeniæ à parte Meridiei, quam ad Aquilonem. Deinde superius ad Orientem sunt montes Alanorum, & Aas, qui sunt Christiani, & recipiunt indifferenter omnes Christianos tam Latinos quam Græcos: unde non sunt scismatici, & pugnant cum Tartaris; & similiter Alani. Post eos ad Orientem sunt Saraceni, qui vocantur Lelgi, qui similiter propter terræ fortitudinem pugnant cum Tartaris.

Nunc Nach-
chuan.

Alani, Aas.

Lelgi, Sara-
ceni.

Porta Caspiæ.

50 Post illos ad Orientem sunt Porte Caspiæ super Mare Caspium, quas Alexander magnus construxit in concursu Montium. Nam cum voluit expugnare Gentem Aquilonarem non potuit propter illius Gentis ferocitatem & multitudinem. Et, ut dicit Ethicus, stetit per annum unum & menses tres, ut defenderet se ab eis, & ingenuit quod talis pessima Gens fuisset in partibus Aquilonis; & exclamauit ad Deum, ut apponeret remedium, ne mundus destrueretur per eos. Sed, licet non fuit dignus exaudiri, tamen Deus sua bonitate, & propter salutem generis humani, iussit fieri terræ motum maximum, & montes distantes per stadium conueniti sunt vsque ad latitudinem vnius Portæ. Et Alexander tunc fecit fundi columnas areas miræ magnitudinis, & erexit portas & liniuit eas bitumine, quod nec igne, nec aqua, nec ferro dissolui posset, quod acquisiuit ex Insulis maris. Nec potuerunt diuini aliquo modo nisi per terræ motum: & iam dirui sunt. Nam Frater Willelmus transiit per medium earum cum Tartaris. Et est ibi ciuitas quæ vocatur Porta ferrea Alexandri: à qua versus orientem incipit Hircania super Hircanum mare, quod est Caspium, ut superius dictum est. Nam Hircania iacet super litus meridionale illius maris, & extenditur vsque ad terminos Indiæ: à cuius Hircaniæ latere meridionali sunt Media & Parthia, sicut prius fuit annotatum. Hæc vero Portæ non sunt Caucasæ, sed Caspiæ, ut dicit Plinius: nec Caucasæ sunt Caspiæ. Nam Caucasæ distant à Caspijs per ducenta milliaria versus mare Ponticum: Et à mari Pontico distant per centum milliaria circa partes Iberiæ & Georgiæ.

Mare Caspium

Montes Cauca-

Et ista loca cum montibus interiacentibus vocantur claustra Alexandri, per que cohibuit Gentes Aquilonares ne irruerent in terras Meridianas deuastando eas. Nam Alexander multa bella gessit cum eis, ut refert Ethicus, & aliquando infra tres dies ceciderunt ex utraque parte multa millia hominum. Alexander tamen magis arte & ingenio vicit, quam armorum potestate. Et cum fuerunt excitati sicut Vrsi de cavernis suis, non potuerat eos reprimere per violentiam: Sed Deus inuit per terra motum & clausuras montium: Nunc autem rupte sunt; & diu est quod fracta sunt, sine terra motu, seu vastitate. Et considerandum est diligenter de locis istis. Nam Gog & Magog de quibus Ezechiel Prophetat, & Apocalypsis, in his locis sunt inclusi. Secundum quod dicit Ieronimus undecimo libro super Ezechielem; Gog Scythica gens trans Caucasum & Maotum & Caspium mare ad Indiam usque tenduntur. Et a principe Gog, omnes qui subditi sunt Magog appellantur. Et Iudæi similiter, quos Orofius & alij sancti referunt exituros. Atque, sicut Ethicus scribit, Alexander inclusit viginti duo Regna de stirpe Gog & Magog, exitura in diebus Antichristi: Qui mundum primo vastabit, & deinde obuiabunt Antichristo, & vocabunt eum Deum deorum; sicut & Beatus Ieronimus confirmat. O quam necessarium est Ecclesia Dei, ut Prelati & viri Catholici hac loca considerent: non solum propter conuersionem Gentium in illis locis, & consolationem Christianorum captiuorum ibidem, sed propter persecutionem Antichristi, ut sciatur unde venturus sit, & quando, per hanc considerationem & alias multas.

A portis vero Caspijs incipit Mare Caspium extendi in longum ad Orientem & in latum ad Aquilonem. Et est non minus quam Ponticum Mare, ut dicit Plinius: Et habet spacium quatuor mensium in circuitu. Frater vero Willielmus in redeundo ab imperatore Tartarorum circueiuit latus Occidentale, & in eundo ad eum perambulauit latus Aquilonare; ut ipse retulit Domino Regi Franciæ, qui nunc est, Anno Domini, 1253. Et a parte Aquilonis habet vastam Solitudinem, in qua sunt Tartari: Et ultra eos sunt multe Regiones Aquilonares antequam peruenitur ad Oceanum. Et ideo non potest istud Mare esse sinus maris Oceani: quod tamen fere omnes authores scribunt. Sed experientia huius temporis facta per fratrem Willielmum & homines alios fideles docet quod non venit a Mari, sed fit per flumina magna & multa, quorum congregatione fit hoc mare Caspium & Hircanum.

Tota vero hac terra Tartarorum a Tanai usque ad Etiliam fuit Cumanorum, qui vocabantur Cangle: qui omnes sunt deleti per Tartaros. Et tota ista terra vocabatur Albania antiquitus. Et hic sint Canes maximi, ita ut Leones, & tauros perimant: Et homines ponunt eos in bigis & aratris. Deinde ultra Etiliam est tertius principatus Tartarorum: Et destructe sunt gentes indigenæ ab eis: Et fuerunt Cumani Cangle, sicut prius. Et durat principatus ille a flumine Etilia in Orientem per iter quatuor mensium ex parte meridionali, usque veniatur ad terram principalem imperatoris: Sed ex parte Aquilonari durat per iter duorum mensium & decem dierum. Ex quo patet, quod Cumania fuit terrarum maxima. Nam a Danubio usque ad terram hanc in qua Imperator residet, habitabant Cumani. Qui omnes sunt destructi a Tartaris, præter eos qui fugerunt ad regnum Hungariæ. Et hic principatus habet ab Aquilone primo Maiorem Bulgariam; a qua venerunt Bulgari, qui sunt inter Constantinopolin & Hungariam & Sclauoniam. Nam hac que in Europa est minor Bulgaria, habet linguam illorum Bulgarorum qui sunt in maiori Bulgaria, que est in Asia. Et isti Bulgari sunt pessimi Saraceni. Et hoc est mirabile: quoniam illa terra distat a porta ferrea seu a Portis Caspijs triginta diebus & plus per transversum Solitudinis: Et est in fine Aquilonis. Unde mirum est valde, quod ad eos tam distantes a Saracenis peruenit secta Machometi. Et de hac Bulgaria venit Etilia, de qua dictum est. Post eam ad orientem est terra Pascatur, que est magna Hungaria, a qua exiuerunt Huni: Qui postea Hungari; modo dicuntur Hungari. Qui colligentes secum Bulgaros, & alias Nationes Aquilonares, sicut dicit Isidorus, Claustra Alexandri ruperunt: Et soluebatur eis tributum usque in Egyptum. Et destruxerunt terras omnes usque in Franciam. Vnde maioris potentia fuerunt, quam adhuc sunt Tartari. Et magna pars eorum residet in terra que nunc vocatur Hungaria ultra Bohemiam & Austriam, que est modo apud Latinos regnum Hungariæ. Et iuxta terram Pascatur sunt Blaci de Blacia maiori: a qua venerunt Blaci in terra Asiani inter Constantinopolim & Bulgariam, & Hungariam, & Hungariam minorem. Nam populus ille dicitur nunc a Tartaris Ilac; quod idem est quod Blac. Sed Tartari nesciunt sonare B. literam. A parte vere meridiei Istius Solitudinis Tartarorum est mare Caspium: Et deinde montes Caucafi usque in Orientem. Et extenditur hic principatus ab Etilia usque in Catayam Nigram: unde vocatur Cara Cataia. Et Cara idem est, quod Nigra: Et dicitur Cataia Nigra, ad differentiam alterius Cataiæ, que est longe ultra hanc ad Orientem multis regionibus distantem ab ista Cataia Nigra: de qua postea dicitur. Et hac terra cum sibi adiacentibus est terra imperatoris Tartarorum præcipui, in quibus vagatur semper eum curia sua, ascendendo in æstate ad frigidas regiones; & in hyeme ad calidas. Et hac Cataia Nigra fuit terra Presbyteri Iohannis, seu Regis Iohannis; de qua tanta fama solebat esse: & multa falsa dicta sunt & scripta.

Hic vero oportet exprimi originem Tartarorum: non solum propter euidentiam distinctionis regionum maiorem, sed propter ipsam Gentem, que nunc famosissima est, & subdit mundum pedibus. Sciendum igitur, quod cum bellum fuit Antiochiæ, tunc regnavit in Terra ista Coir Can. Nam in historia Antiochena legitur. Quod Turci miserunt pro succursu contra Francos ad regnum Coir Can, qui tenebat Monarchiam in regionibus Aquilonis, tempore illo, quo capta fuit Antiochia qui fuit de Cara Cataia. Coir

fuit Terra Presbyteri Iohannis, de quo multa falsa, nec falsitate minori transijt fabula ad Abassinos novumq; dedit nomen Iohannem Africanum. Turci. Regnum Coir Can.

Cataia Nigra
bis Presbyterum

vero est nomen proprium: Can est nomen dignitatis; & sonat idem quod Divinator. Nam principes ibi regunt populum per divinationes & scientias, que instruunt homines in futuris, siue sint partes Physica, ut Astronomia & scientia experimentalis, siue artes Magica, quibus totum Oriens est deditus & imbutum. Omnes igitur imperatores Tartarorum vocantur Can: sicut apud nos vocantur Imperatores & Reges. Mortuo vero isto Coir, fuit quidam pastor Nestorinus in terra illa potens & Dominus super populum, qui populus vocatur Naiman; qui erant Christiani, Nestorini. Qui sunt mali Christiani: Et tamen dicunt se esse subiectos Romanæ Ecclesiæ. Et isti Nestorini non solum sunt ibi in Terra Naiman, sed per omnes regiones usque in Orientem sunt dispersi. Iste vero pastor erexit se in Regem; & vocatus est Presbyter & Rex Iohannes. Huic Iohanni erat frater quidam pastor potens Vnc nomine: habens sua

bene

10 pascua ultra fratrem suum per iter trium Septimanarum: Et erat Dominus cuiusdam Villæ, qua dicitur Caracarum: qua est nunc civitas Imperialis, & maior in terra Imperatoris: Et tamen non est ita bona sicut Sanctus Dionisius iuxta Parisios in Francia; sicut scripsit frater Willelmus Domino Regi. Et ultra pascua istius circiter duodecim dietas erant pascua Moal, qui erant pauperes homines, & stulti ac simplices sine lege: iuxta quos fuerunt alij pauperes qui vocabantur Tartari, similes eis. Mortuo igitur Iohanne Rege eleavit se in Regem Vnc frater eius, & vocavit se Can: unde Vnc-Can dicebatur: qui misit armenta sua versus terminos Moal. Inter quos Moal erat faber quidam nomine Cingis, furans & rapiens animalia Vnc-can. Quo congregante exercitum Cingis fugit ad Tartaros: Qui dixit ad eos & ad Moal: Quia sumus sine duce ideo Vicini nostri opprimunt nos. Et factus est Dux eorum, & congregato exercitu irrumpit super Vnc-can, & vicit eum; & factus est princeps in terra, & vocavit se Cingis-can: Et accepit filiam Vnc, & dedit eam filio suo in uxorem, ex qua natus est Mangu Can, qui regnum diuise istis principibus Tartarorum, qui nunc regnant & discordant ab invicem. Ad hunc enim Mangu Can fuit frater Willelmus. Et ipse Cingis Can ubiq; præmittebat Tartaros in pugna. Unde exiit fama Tartarorum: qui fere deleti sunt per crebra bella. Et licet propter hanc causam nos istam Gentem vocemus Tartaros, apud quos est imperium & Dominium: tamen semper sunt Imperatores & principes de gente Moal. Nec volunt vocari Tartari sed Moal: quia primus eorum imperator scilicet Cingis-can, fuit Natione Moal. Unde non habuerunt ad huc ante istos qui nunc regnant nisi tres scilicet Cingis-can, & Ken-can, & Mangu-can. Qui Ken-can fuit filius Cingis, & Mangu filius eius. Hac igitur gens Moal est stultissima ab origine prima, & pauperrima: Qua tamen permissione Divina paulatim omnes Nationes vicinas subingavit & totam mundi latitudinem in parvo

30 tempore prostravit. Que si esset concors primo congressu Ægyptum & Affricam vastaret, ut sic ex omni parte Latinos circumdarent. Nam nunc a parte Aquilonis regnant usq; in Poloniam. Quia tota Russia est eis subiecta, & tota terra ab Oriente usq; ad Danubium & ultra Danubium, scilicet Bulgaria & Blachia sunt eis tributaria: Ita quod usq; ad terram Constantinopolitanam tenet eorum Imperium. Et Soldanus Turkiæ, & Rex Armeniæ, & princeps Antiochiæ, & omnes principes Orientalis usq; in Indiam sunt eis subiecti, præter paucos, qui aut nimis distant, aut habent loca in Montanis tutissima, qua expugnari non possunt.

40 Primo igitur in terra ubi imperator moratur est, Cataia Nigra, ubi fuit Presbyter Iohannes. Post eam est terra fratris sui ultra per iter trium Septimanarum. Deinde terra Moal; & Tartarorum ultra eos per iter quasi duodecim dietarum. Sed tota hac terra est in qua moratur Imperator vagans per diversa loca. Terra tamen in qua fuerunt Moal, vocatur Ornan Kerule: Et ibi est adhuc Curia Cingis Can. Sed quia Caracarum, cum Regione eius fuit prima adquisitio eorum; ideo Civitatem illam habent pro imperiali: Et prope illam eligunt suum Can, id est Imperatorem. Deinde post Moal & Tartaros ad Orientem sunt fortes homines, qui vocantur Tangut; qui ceperunt primo Cingis can in bello: Sed pace facta iterum subingavit eos. Isti homines habent Boves fortissimos, habentes Caudas plenas pilis sicut Equi: Quorum vaccæ non permittunt se Mungi*, nisi cantetur eis. Et si isti Boves vident hominem indutum rubeis, insiliunt in eum volentes interficere. Post istos ad Orientem sunt homines qui vocantur Tebeth: qui solebant comedere parentes suos causa pietatis, ut non facerent eis alia Sepulchra nisi viscera sua. De quibus scribunt Philosophi, ut Plinius, Solinus & alij: Et frater Willelmus testatur in libro suo: ac frater Iohannes de Plano Carpini similiter in libro, quem composuit de Tartaris, inter

50 quos fuit Anno Domini, 1246. missus a Domino Papa in legationem ad Imperatorem Tartarorum. Sed quia fuerunt ex hoc facto abominabiles omni Nationi, ideo iam mutaverunt hunc ritum; & tamen adhuc de ossibus capitum faciunt ciphos, in quibus bibunt propter memoriam parentum suorum. Post istos ad Orientem sunt parvi homines & fusci sicut Hispani, & dicuntur Solangi. Quorum nuncij cum veniunt ad curiam alicuius, habent in manu tabulam de Ebore, in qua inspiciunt cum narrant ea que volunt, ac si omnia essent ibi scripta. Et ultra eos est quidam Populus, quorum animalia non appropriant alicui, nec habent custodem. Sed si aliquis indigena vult habere aliquod animal, stat super collem & vociferat sicut vult, & veniunt ad vocem suam, & accipit quod vult. Quod si extraneus veniret, odore suo fugaret omnia, & faceret ea Sylvestria. Et ideo cum homo venit extraneus, claudunt eum in domo, & dant ei necessaria vita, donec habeat responsam de eis pro quibus venit, nec permittent eum vagari per regionem. Ultra hos est Cataia (qua Seres dicitur apud Philosophos.) Et est in extremitate Orientalis, a parte Aquilonari respectu Indiæ, diuisa ab ea per sinum Maris & Montes. Et hic sunt pan-

60 ni serici optimi, & in magna copia. Unde ab hac terra deferuntur ad alias regiones. Et hic populus aspirat multum per naves: Et sunt optimi Artifices in omni arte. Et sunt boni Medici apud eos in omnibus præterquam de Urina, cuius indicio non utuntur, sed per Pulsam & alia signa optime diiudicant: Et

Vel Aspreolo-

bene cognoscunt vires herbarum, & totius medicina potestatem. Multi ex eis sunt apud Tartaros. Et istorum Cataiorum moneta vulgaris est charta de bambasio in qua imprimunt quasdam lineas. Nec mirum; Cum Ruteni, qui prope nos sunt, habent pro moneta faciem * Hesperolorum. Et ista Cataia non distat per 120. dietas a terra in qua moratur Imperator. Et in illa terra sunt rupes excelsae, in quibus habitant quaedam creaturae habentes per omnia formam humanam; non tamen genua flectunt, sed ambulant saltando: sed non sunt longitudinis maioris, quam cubiti; & vestitur totum corpus crinibus. Et venatores portant ceruissiam, & faciunt foueas in rupibus ad modum cyphorum: Et illa animalia veniunt & bibunt ceruissiam, & inebriantur, & dormiunt, & sic capiuntur: Et venatores ligant eis manus & pedes, & aperiunt venam in collo, & extrahunt tres vel quatuor guttas sanguinis, & dissolunt ea, ac permittunt abire. Et ille sanguis est preciosissimus pro purpura.

Sciendum vero, quod a principio Cataia magna nigra usque ad finem Orientis sunt principaliter Idolatra: sed mixti sunt inter eos Saraceni & Tartari, & Nestoriani, qui sunt Christiani imperfecti, habentes Patriarcham suam in Oriente; qui visitat Regiones, & ordinat infantes in cunabulis ad sacros ordines: quia ipse solus ordinat, & non potest venire ad unum locum nisi quasi in quinquaginta annis. Et ille dicit se habere auctoritatem a Romana Ecclesia ab antiquo; & paratus est obedire, si via esset aperta. Et isti docent filios Nobilium Tartarorum Euangelium & fidem, & alios quando possunt. Sed quia parum sciunt, & sunt malorum morum, ideo Tartari despicunt eos. Et consecrant in missa unum panem latum ad modum palmae, & diuidunt primo in duodecem partes, secundum numerum Apostolorum; & postea illas partes diuidunt secundum numerum populi. Et Sacerdos dat unicuique corpus Christi in manu sua; & tunc quilibet assumit de palma sua cum reuerentia. Sed Idolatra praualem in multitudi-
ne in omnibus hys Regionibus. Et omnes conveniunt in hoc quod habent Templa sicut nos, & campanas magnas. Et ideo Ecclesia Graecorum & totius Orientis nolunt habere campanas. Ruteni tamen habent & Graeci in Cassaria.

Omnes Sacerdotes eorum radunt caput & barbam, & seruant castitatem ex quo radunt caput: Et vivunt centum vel ducentum in una congregatione. Diebus quibus intrant Templum ponunt duo scamna, & sedent e Regione, chorus contra chorus in terra, habentes libros in manibus, quos aliquando deponunt super illa scamna: & habent capita discooperta quamdiu sunt in Templo legentes in silencio; & nullo modo loquerentur in Templo nisi verba officij sui. Habent etiam in manibus quocunque vadunt quandam cordam centum vel ducentum nucleorum sicut nos Pater noster: & dicunt super haec verba. On, Maio, Baccan, id est, Deus tu nosti. Haec sunt communia omnibus Idolatris. Sed tamen Iugres, qui habitant in terra ubi Imperator moratur, differunt ab alijs. Nam alij non ponunt unum Deum, sed plures, & creaturam adorant. Isti vero propter Viciniam Christianorum & Saracenorum ponunt unum Deum. Et sunt optimi scriptores: unde Tartari acceperunt literas eorum: & illi sunt magni scriptores Tartarorum. Et isti scribunt a sursum in deorsum, & a sinistra in dextram multiplicant lineas & legunt. Tebeth scribunt sicut nos, & habent figuras similes nostris. Tangut scribunt a dextra in sinistram sicut Arabes, sed multiplicant lineas ascendendo. Catai Orientales scribunt cum punctorio, quo pingunt pictores: & faciunt in una figura plures literas comprehendentes unam dictionem. Et ex hoc veniunt Characteres, qui habent multas literas simul. Vnde veri Characteres & Philosophici sunt compositi ex literis, & habent sensum dictionum. Et tota terra a Danubio usque in Orientem vocatur apud Antiquos Scythia, a quo Scythae. Et omnes Regiones Tartarorum sunt de Scythia: & etiam Russia, & totum usque ad Alamaniam.

Others call
him Ogodai Can

Relations of VINCENTIUS BELVACENSIS, the most of which hee received
from Frier SIMON de Sancto Quintino, one of the foure Friars sent by
Pope INNOCENT the Fourth to the Tartars: serving
to the illustration of the former.

ANno, 1246. Cyne, who is also called Gog Cham, was aduanced to the Imperiall Throne of the Tartars. All their Barons being assembled, placed a golden seat in the midst, whereon they caused him to sit; and set a Sword before him, saying, Wee will, and desire, and command thee to rule ouer vs. He demanded if they were contented, to doe, come, goe, slay as he should command. They answered yea. Then said he, The word of my mouth shall henceforth bee my Sword: and they all consented. After this they spread a Felt on the ground, and set him thereon, saying, Looke upwards and acknowledge God, and looke downe on the Felt whereon thou sittest. If thou shalt gouerne well, wilt be liberall, iust, and honour thy Princes according to their dignitie, thou shalt reigne magnificent, and the whole World shall be subiect to thy Dominion, and God will giue thee all thy heart's desire; if otherwise thou shalt bee miserable and so poore, that the Felt shall not bee left thee whereon thou sittest. This done, they set his Wife with him on the Felt: and lifted them vp both so sitting, and proclaimed them Emperour and Empresse of the Tartars. After which they brought before him infinite store of Gold, and Silver, and Gemmes, with all which remayned to Chagadan, who distributed what he pleased, and reserued the rest. Then began they to drinke yntill night after their manner; and afterward sodden flesh came in Carts without Salt, and a-
mongst

mongst foure or fve they distributed a ioynt thereof. They call him *Can*, concealing his proper name, and he boasts himselfe the Sonne of God. He hath a Prince in the Confines of *Persia*, called *Baioth Noy* (*Noy*, signifieth his dignitie, *Baioth* is his name) which hath subdued the Countreies of *Christians* and *Saracens* to the Mediterranean Sea. Another called *Corenzam* remayneth in the West Frontiers with threescore thousand vnder him. The greatest Prince is *Bathoth*, who hath vnder him one hundred and threescore thousand *Tartars*, and foure hundred and fiftie thousand *Christians* and others. The *Chams* forces are innumerable.

Bathoth

Anno Dom. 1247. Frier *Ascelinus* sent by the Pope, came into the Campe of the *Tartars* with other Friers Preachers: where the Captayne *Baioth-noy*, by Messengers demanded, whose Messengers they were. Frier *Asceline* answered for them all, I am the Messenger of the Lord Pope, who amongst *Christians* is greater then any man, reputed a Father and Lord. They replied, how proudly doe yee say your Pope is greater then any? Knowes he not that the *Cham* is Son of God, and *Baioth-noy* and *Bathoth* are his Princes? *Ascelinus* answered, the Pope knowes not them, but heares that the *Tartars* haue come out of the East, and haue destroyed infinite multitudes. And had he knowne the names of *Cham* or his Princes, he would not haue omitted their names in the Letters which we bring. But being grieved for the slaughters of so many, especially *Christians*, with the aduice of his Brethren the Cardinals, he hath sent vs to the next *Tartarian* Armie we could find, to exhort the Generall thereof to cease such attempts, and to repent of that which they haue done. The Messengers went and came diuers times betwixt, euery time in change of Garments, and were very sollicitous for Gifts and Presents which the Friers had none to giue. And besides they denyed to performe the Ceremonies of kneeling to *Baioth-noy*, lest they should thereby intimate a subiection of the Pope to the *Tartars*: whereupon hee consulted to put them all foure to death, to which a Messenger sent from the Great *Cham* would not consent. The Friers only would put vp their hoods and bow the head: whereat a *Tartar* asked whereas you *Christians* adore stockes and stones, that is Croffes imprinted on them; why doe you refuse to doe so to *Baioth-noy*, whom *Cham* the Sonne of God hath commanded to be adored. *Ascelinus* answered, *Christians* adore not stockes and stones, but the signe of the Croffe theron, for his sake which dyed on a Croffe, adorning it with his members as precious Jewels and consecrating it with his blood, purchasing thereby our saluation. So cannot wee doe to your Lord. *Baioth-noy* sent them word, that hee would send them with their Letters to the *Cham*, which they refused. Then he sent for the Letters which were translated first into *Persian*, and thence into the *Tartar* Language. Hee held them there with many Trickes and Illusions, many weeks with hard fare and ill vsage. And after much adoe he returned with *Baioth-noys* answer, hauing first had a Messenger with Letters from the *Cham*.

The foure
were *Ascelinus*,
Alberike, *Alex-*
ander, and *Si-*
mon.

See a like di-
stinction of
Ethnikes, *Aug.*
in *Psalm*. 113.

Baioth-noys Letter was this to the Pope. The word of *Baioth-noy*. Pope, know this; thy Messengers came and brought thy Letters to vs. Thy Messengers spake great words; we know not whether thou gauest them so in charge, or whether they spake it of themselves. In thy Letters thou hadst written; yee kill, slay, and destroy many men. The precept of God stable and firme, who containeth the face of the whole world, unto vs is this. Whofoener shall heare the Statute on their owne Land, let them yeeld Water and Patrimoine, and let them deliuer power to him which containeth the face of the whole World. But whofoener will not heare the Precept and Statute, but shall doe otherwise; let them be rooted out and destroyed. Now we send to you touching that Statute and Precept. If yee will yeeld Water and Patrimoine on our Land, it is meet that thou Pope thy selfe in thine person come to vs, and to him which containeth the face of the whole Earth: and if thou wilt not heare the stable Precept of God and of him which containeth the face of the whole Earth, wee know not, God knowes. It is meet that before thou comest, thou sendest Messengers, and that thou signifiest to vs whether thou comest or no; whether thou wilt compound with vs, or be Enemy. And send an Answer of the Precept quickly to vs. This Precept by the hands of *Aybeg* and *Sargis*, we haue sent in the moneth of *Iuly*, the twentieth day of the Moone. In the Territorie of the Castle *Sitiens*.

The Copie of the *Chams* Letters to *Baioth-noy*. By the Precept of the lining God *Cingif-cham* the Sonne of God, sweete and venerable saith, that God is high ouer all, hee is God immortall, and vpon Earh *Cingif-cham*, is Lord alone. Wee will that this come into euery place to the hearing of all, to the Prouinces obeying vs, and to the Prouinces, obeying against vs. It is therefore meete that thou O *Baioth-noy* excite them and make it knowne to them, that this is the commandement of the lining and immortall God: that thou also incessantly make knowne thy desire touching this, and notifie my commandement in all places, where a Messenger may come. And whofoener shall gainsay thee shall be bunted, and his Land shall be wasted. And assure thee, that whofoener shall not heare this my Mandate, shall bee deafe; and whofoener shall doe according to this my iudgement, knowing peace and not doing it, shall be lame. Let this my Ordinance come to the knowledge of all. Whofoener shall heare and neglect to obserue it shall be destroyed and slaine. Manifest this O *Baioth-noy*. And whofoener desireth the profit of his House, and will serue vs, shall bee saved and honoured. And whofoener shall contradict, studie thou to correct them at thine owne pleasure.

tach in Rubruq.
Ercalchays pre-
tended Letter
in Vincent. 6.91.

Vnto Lewis the French King were sent certayne Messengers from a great man, called *Ercalchay*; * and there was present Frier *Andrew* of *Lentumel* a *Dominican*, who knew *David* the chiefe of them, hauing leene him in the Armie of the *Tartars*. These brought Letters in *Persian* and *Arabike* Letters. They reported also that a great King of the *Tartars* called *Cham* was become a Christian, with most of his followers. And now the said *Ercalchay* had receiued Baptisme and was come forth from *Cham* with a great Armie to aduance the Christian Faith, and to destroy the Aduersaries thereof; and much desired the French Kings loue. They thought also that the said *Ercalchay* would the next Easter besiege *Baldach*. These told the King also of the *Tartarian* Affaires. Whereupon he sent Messengers with Letters and Jewels to *Ercalchay*, with a Tent or Chappell of Scarlet fairely embroydered, with the Storie of the Passion, with Ornaments thereto and things fitting for Diuine Seruice, with a piece of the wood of the Holy Crosse, exhorting him to proceed in the Faith. The Messenger were the foresaid Frier *Andrew* with two other Friers and two Clerkes. Transcripts of all were sent into France.

1.4.6.2. & 1.5.
6.14.

Anno 1239. the *Tartars*, inhumane Nations, which had made great slaughters, and had with hostile forces inuaded the borders of Christendome, in the greater *Hungarie* were vanquished and most of them slaine, beeing encountred by siue Kings, *Christians* and *Saracens*, herein confederate. After which the King of *Dacia* and the King of *Hungarie* caused the Confinnes (before by the *Tartars* brought in manner to a Wildernesse) to bee inhabited by *Christians*, which they sent thither. Of which out of *Dacia*, alone went more then fortie ships.

Anno 1240. the detestable people of Satan, to wit, an infinite number of *Tartars* brake forth from their Mountayne-compasse, and Rocke-defended Region, like Devils loosed out of Hell (that they may well be called *Tartarians*, as *Tartareans*) and like Grasshoppers couering the face of the Earth, spoyling the Easterne Confinnes with fire and Sword, ruining Cities, cutting vp Woods, rooting vp Vineyards, killing the people both of Citie and Countrey. And if they spared any, they vsed them in the fore-front of their battels to fight against their Allies, that if they were therein faint or fayned, themselves at their backes might kill them: if otherwise it was without reward. They are rather Monsters then men, thirsting and drinking bloud, tearing and deuouring the flesh of Dogges and Men; clothed with Oxe-hides, armed with Iron Plates; in stature thicke and short, well set, strong in bodie; in Warre inuincible, in labour in-
fatigable, behind vnarmed; drinking the bloud of their beasts for Dainties, &c. These *Tartars* of detestable memory, are thought to be descended of the ten Tribes which went away (forsaking the Law of *Moses*) after the golden Calues; whom *Alexander* the *Macedon* sought to inclose in the *Caspian* hils; to which labour, exceeding humane power, hee inuoked the assistance of the God of *Israel*, and the tops of the hils ioyned together, and the place became inaccessible and impassible. And though it be doubtfull, because they vse not the *Hebrew* Tongue, nor Law of *Moses*, nor are gouerned by any Lawes; yet is it credible, that as their hearts then in *Moses* gouernment were rebellious, Reprobately-sensuall and Idolatrous, so now more prodigiously their heart and Language is confounded, and their life immane and beastly inhumane. They are called *Tartars* of a certayne Riuer called *Tartar*, running alongst their hils.

Anno 1241. that inhumane and brutish, lawlesse, barbarous and sauage Nation of *Tartars*, horribly spoyling the North and North-east parts of the *Christians*, caused great feare and hor-
rour ouer all Christendome. For they had now brought in manner to a Wildernesse, *Frisia*, *Gothia*, *Polonia*, *Bobemia*, and both *Hungarias*, the most part of the Princes, Prelates and people beeing fled or slaine: as by this Letter appeareth.

To the Beloued and alway worthy to be beloued Lord, our Father in Law, the Illustrious Prince the Duke of Brabant, H. by the grace of God Earle of Loraine, Palatine of the Saxons, his hum-
blest seruice. The perills foretold in holy Scripture, now breake forth because of our sinnes. For a certayne cruell and innumerable people, sauage and lawlesse, inuadeth and possesseth the Confinnes next bordering to vs, and are now come to Poland, many other Lands being passed and peoples destroyed. Whereof aswell by our owne Messengers, as by our beloued Cousin the King of Bohemia, we are fully certified and are in-
uited speedily to succour and defend the faithfull. For we know for certayne that about the Octaues of Easter, the *Tartarian* Nation will inuade cruelly and forcibly the Lands of the Bohemians, and if not
pre-

presented, will there perpetrate unheard-of slaughter. And because our next neighbours house is now on fire, and the next Countrey lieth open to waste, and some are already wasted, we earnestly and pitifully entreat the ayde and counsell of God and of our neighbour-brethren for the vniuersall Church. And because delay is full of danger, with all our hearts we beseech you, that you make all possible speed to arme as well for your as our deliuerance, making strong preparations of store of Souldiers; diligently exhorting the noble, mightie and couragious, with the people subiect to them, that yee may haue them in readinesse, when we shall next direct our Messengers to you. And we, by the ministerie of our Prelates, Preachers, and Minors, cause the Crosse (because the businesse belongs to him which was crucified) to be generally preached, fasts and prayers to be appointed, and our Lands in common to be called to the warre of Iesus Christ.

Crusades against the Tartars.

10 Hereto wee adde that a great part of that detestable Nation, with an other Armie adioyned to them, wasteth Hungaria with unheard-of tyrannie, insomuch that the King is said to haue retayned but a small part to himselfe. And to speake much in few words, the Church and People of the North is so oppressed and brought to such Straits, as it neuer was so scourged since the World began. Dated the yeere of grace 1241. on the day on which is sung Lactare Ierusalem:

And this was the Letters sent to the Bishop of Paris by the Duke of Brabant. The like was written by the Arch-bishop of Cullen to the King of England. Therefore for this grievous tribulation, and for the discord betwixt the Pope and the Emperour, so hurtfull to the Church, there are appointed fasts and prayers, with larger Almes in diuers Regions; that our Lord being pacified with his people, who as a magnificent triumpher is as strong in a few as in many, may destroy the pride of the Tartars. The French Kings mother, Queene Blanch, with deepe sighs and plentifull teares spake hereof to her sonne. What shall we doe my dearest sonne about this lamentable euent, the terrible rumour whereof is come to our Confinnes? generall destruction of vs all and of holy Church hangs ouer our times by the impetuous inuasion of the Tartars. The King with mournfull voice, not without the Spirit of God, answered: The heauenly comfort, Mother, exalt vs; and if they come on vs, either we shall fend againe those Tartarians to their Tartarean places whence they came; or they shall exalt vs to Heauen.

A deuout Queene and a Saint King.

Diuine apophthegme.

30 The Emperour certified hereof, wrote to the Princes, and especially to the King of England in this forme. Frederike Emperour &c. to the King of England greeting. Wee cannot conceale, though it somewhat lately came to our eares, but give you notice of a thing which concerneth the Roman Empire (as prepared to the preaching of the Gospell) & all zealous Christian Kingdoms in the World, threatening generall destruction to all Christendom. A barbarous Nation hath lately come from the Southern * Region, which had long layne hid vnder the torrid Zone, and after towards the North by force possessing Regions long remayning is multiplied as the Canker worme, called Tartars wee know not of what place or originall; not without the fore-seene iudgement of God is reserved to these last times, to the correction and chastisement of his people, God grant not losse of all Christendom. A publike destruction hath therefore followed, the common desolation of Kingdomes, and spoile of the fertile Land, which that wicked people hath passed thorow, not sparing sexe, age, or dignitie, & hoping to extinguish the rest of mankind, whiles it alone goeth about to domineere and reigne euerie where by their immense and incomparable power and number. Now all things which they haue beene able to set eye on being put to death and spoyle, leauing vniuersall desolation behind them, these Tartarians (yea Tartareans) when they had come to the well peopled Colonie of the Cumani (prodigall of their liues, hauing Bowes their most familiar Armes, with Darts and Arrowes which they continually vse and are stronger in the armes then other men) they vterly ouerthrew them, and with bloody sword killed all which escaped not by flight. Whose neighbourhood scarcely warned the Rutheni not farre distant to take heed to themselves. For they suddenly flie thither, to prey and spoile as the wrath of God and lightning hurles it selfe, and by their sudden assault and barbarous inuasion take Cleua the chiefe Citie of the Kingdome; and all that noble Kingdome was wasted to desolation, the Inhabitants being slayne. Which yet the neighbouring Kingdome of the Hungarians who should haue taken warning, neglected: whose sluggish King too secure, being required by the Tartars messengers and letters, that if he desired that he and his should liue, he should hasten their fauour by yeelding himselfe and his Kingdome; yet was not hereby terrified and taught to fortify against their irruptions: but they ignorant or insolent contemners of their enemies, secure in their enemies approach, trusting in the natie fortification of the place, unexpectedly compassed and oppressed at vnawares by them entering like a whirlwind, opposed their Tents against them. And when the Tartars Tents were five miles from the Hungarian, the Tartarian fore-runners in the dawning of the morning, rushed suddenly and compassed the Hungarians, and first slaying the Prelates and chiefe men, killed an infinite number, with such unheard-of slaughter as scarcely is recorded euer to haue hapned in one battell. The King hardly escaped by flight on a swift Horse, which fled with a small companie to the brotherly portion of the Hyllirian Kingdome, there to be protected; the Enemy possessing the Tents and spoiles. And now wasting the nobler and greater part of Hungarie beyond Danubius, consuming all with fire and sword, they threaten to confound the rest, as by the venerable Bishop Vatientis the Ambassadour of the said Hungarian King, not ce is given to our Court first as he passed, being destined to the Roman Court. Wee are also hereof fully certified by the Letters of our deare sonne Conrade, elect King of Romans alway Augustus, and heire of the Kingdome of Ierusalem; and of the King of Bohemia, the Dukes of

Emperour. Fr. 2. this Letter to King Henr. 3.

* An error, as usually such shadows attend fame; like the former of inclosed Jewes: And indeed the Tartars were so base and so remote, that till they like Nilus ouerflowed the Earth, they were vknowne, yea, then also; their sudden storms, and vknowne originall adding to that terrour, with which they then amazed, and withall affrighted the World as these Letters testifie.

Austria and Bauaria; by the Messengers words also instructed experimentally of the Enemies neccessesse. Nor could wee learne these things without great griefe. Truly, as the report goeth, their undetermined damnable Armie, by our Lords sufferance, hath proceeded diuided purposely in three parts. For one being sent by the Pructeni, and entring Poland, the Prince and Duke of that Land were slayne by them, and after that all the Region spoyle. The second hath entred the bounds of Bohemia, and being entred hath made stay, the King manly opposing himselfe. The third hath runne thorow Hungaria, bounded by Austria. Whence the feare and trembling hauing beginning from furie, doe excite and inuite all; neccessitie urgeth to withstand them, the danger being neere; the generall destruction of the world, and specially of Christendome, calls for speedie helpe and succour. For this People is brutish, and without law, ignorant of humanitie: yet followers, and hath a Lord whom it obediently obserueth and worships, and calls, The God of the earth. The men are of short stature, but square and well set, rough and couragious, at the becke of their Leader rushing on any difficulties: haue broad faces, frowning looks, horrible cries agreeing to their hearts. They weare raw Hides of Oxes, Asses, or Horses, with Iron plates sewed on for defensive Armes hitherto: but now, with griefe we speake it, out of the spoiles of conquered Christians, they are more decently armed, that in Gods anger wee may be the more dishonourably slayne by our owne weapons. They are also furnished with better Horses, fed with daintier fare, adorned with fairer rayment. The Tartars are incomparable Archers; carrie sewed skins artificially made, by which they passe Riuers and waters without losse. When food fayles, their Horses are sayd to be content with barks and leaues of Trees, and roots of Herbs: whom yet they finde swift and hardy. And we fore-seeing all those things, often by Letters and Messengers are mindfull to request your excellence, as also other Christian Princes, earnestly soliciting and warning, that peace and loue may flourish amongst Rulers, and discord being appeased (which often endamage Christendome) agreeing together to set stay to them which haue lately shewed themselves; forasmuch as fore-warned are fore-armed, and that the common enemies may not reioyce, that to prepare their wayes, so great dissensions breake forth amongst Christian Princes. Oh God, how much and how often would wee haue humbled our selues, doing the utmost that the Roman Bishop might haue surceased from the scandall of dissention against vs, which is gone thorow the World; and would more temperately haue reuoked his passions from impetuous rashnesse, that wee might bee able to quiet our subiects by right, and rule them more peaceably; nor that he would protect those Rebels, the greatest part of which is by him fostered: that things being settled, and the Rebels awed against whom wee haue wasted much treasure and labour, our power might bee aduanced against the common Enemies. But Will being to him for a Law, not ruling the supperie running of his tongue, and disdainning to abstayne from manifold dissention which he hath attempted; by his Legats and Messengers hee hath commanded the Crosse to be published against mee the Arme and Advocate of the Church, which hee ought to haue exercised against the tyrannie of the Tartars or Saracens, innading and possessing the Holy Land, whiles our Rebels insult and consult grievously against our honour and fame. And now that our greatest care is to free our selues from domestike and familiar Enemies, how shall wee also repell Barbarians? seeing that they by their spies which euery where they haue sent before, they (howsoeuer directed without Diuine Law; yet well trayned in Martiall stratagems) know the publike discord, and the unfortified and weaker parts of the Lands: and hearing of the heart-burning of Kings, and the strife of Kingdomes, are more encouraged and animated, O how much doth triumphing courage adde to strength? Wee will therefore by Gods providence conuerted, apply our strength and industrie to both, that wee may driue away the scandall domesticall and barbarous on this side and on that, from the Church. And we haue expressly sent our deare sonne Conrade, and other Princes of our Empire, that they may powerfully withstand the assaults of our barbarous Enemies, and repress their entrie. And heartily wee adiuire your Maiestie in behalfe of the Common neccessitie, by our Lord Iesus Christ, that taking heed to your selfe, and to your Kingdome (which God keepe in prosperitie) with instant care and provident deliberation, you diligently prepare speedy ayds of strong Knights, and other armed men and Armes: this we require in the sprinkling of the blood of Christ, and the league of affinitie in which wee are ioined. And so let them be ready with vs manfully and providently to fight for the deliuerance of Christendome, that against the Enemies now proposing to enter the confines of Germanie, as the Gate of Christendome, by united forces victory to the praise of the Lord of Hosts may be obtained. Neither let it like you to passe ower these things with dissimulation; or to suspend them by deferring. For if (which God forbid) they innade the Germane confines without obstacle, let others looke for the lightnings of a sudden tempest at the doores; which we beleene to haue hapned by Diuine Iudgement, the world being diuersly infected, the loue of many waxing cold (by whom faith ought to be preached and conserued) and their pernicious example stayning the world with Vsuries, and diuers other kinds of Simoine and Ambition. Let your Excellency therefore provide; and whiles the common enemies are outragious in the neighbour Regions, wisely consult to resist them: because they haue come out of their Lands with this intent, not regarding the perils of life, that they might subdue to them (which God auert) all the West, and may peruert and subuert the Faith and Name of Christ. And in respect of unexpected victorie, which hitherto by Gods permission hath followed them, they are growne to that exceeding madnesse, that now they thinke they haue gotten the Kingdoms of the World, and to tame and subiect Kings and Princes to their vile seruices. But wee hope in our Lord Iesus Christ, vnder whose Standard wee haue hitherto triumphed, being deliuered from our Enemies, that these also which haue broke forth of their Tartarean seats, their pride being abated by oppo-

The Pope to haue his will against the Emperour, exposeth Christian Princes to mutuall quarrells, which he should haue opposed to the Tartars, neuer ceasing till he had ruined that Familie and the Empire.
Tartar Spies.

This Emperour Fred. 2. married Isabel Sister to K. Henr. 3.

sed forces of the West, these Tartars shall be thrust downe to their Tartara (or Hell) Nor shall they boast to haue passed so many Lands, overcome so many peoples, perpetrated so many mischiefs vnauenged, when their vnwarie Destinie, yea Sathan, shall haue drawne them to the conquering Eagles of puissant Imperiaall Europe to their deaths. Where Germanie voluntarily raging and prone to Armes, France the mother and nurse of Soulderie, warlike and daring Spaine, fertile England potent in men and a furnished Navie, Almaine full of impetuous Warriours, Strip-strong Denmarke, untamed Italie, Burgundie ignorant of Peace, vnquiet Apulia; with the Pyriticall and inuincible Iles of the Greeke, Adriaticke and Tyrrhene Seas, Creet, Cyprus, Sicil, with the Sea neighbouring Islands and Regions, bloudie Ireland, with nimble Wales, marishie Scotland, Icie Norway, and euery Noble and famous Region in the West, will cheerfully send their choise Soulderie vnder the Colours of the quickning Crosse, which and not onely rebellious men but aduerse Denils dread. Dated in our returne after the yeelding and depopulation of Fauentia, the third of Iuly.

Dacia naualis.

Some (Papalines) suspected that the Emperour had hatched this Tartar-pestilence like Lucifer or Antichrist, to get the Monarchie of the world and to subuert Christianity, and that the secret Counsels and waylesse wayes of the Tartars were fraught with Imperiaall Counsels. For they conceale their Language, varie their Armes, and if one be taken, knowledge of them or their purpose can by no tortures be extorted from him. And where (say they) should they lurke, in which of the Climats till this time? whence their so secret and fraudulent Conspiracie? They are Hircans and Scythians, sauage bloud-suckers, who with the confederate Camani, through the Emperours deuise, haue ouerthrowne the King of Hungarie, to make him seeke shelter vnder the Imperiaall wings, and doe him homage, &c.

Malice mad.

Needs must they goe whom the Deuill driues: or how else but by mad malice, and furious faction, or an Antichristian mist, could such impossibilities haue beene conceiued? Of their driving the Turkes and the Choerosmines out of Persia is else-where spoken. Of the Popes entertainment of the Tartarian Messengers, Anno 1248. close Conferences with them and gifts to them, with diuers other discourses in the said author or Authors, I omit. Onely this Epistle following, as containing both the strange aduentures of an Englishman, and his relations of the Tartars from better experience, I could not but adde heere, making so much to the Readers purpose and ours. It was written by one Yuo of Narbone a Clergie man, which being accused of Heresie to Robert de Curzun the Popes Legat, fled, and liued one while with the Patarines, another with the Beguines, and at last writ this Letter containing a discourse of his trauels, amongst them in Italie and Germanie. He begins *Graldo Dei gratia Burdegalsi Archiepiscopo, Yuo dictus Narbonensis suorum olim nouissimus Clericorum, salutem, &c.* and after some premisses of the Patarines, and Beguines (too long for this place) hee proceeds; *Hoc igitur & multis alijs peccatis inter nos Christianos emergentibus iratus Dominus, &c.* In English, Our Lord therefore being angry with this and other sinnes falling out amongst vs Christians, is become as it were a destroying enemy.

Selib. 3. c. 6 & 4.

Part of an Epistle written by one Yuo of Narbone vnto the Archbishop of Burdeaux, containing the confession of an Englishman, as touching the barbarous demeanour of the Tartars, which had liued long among them, and was drawne along perforce with them in their expedition against Hungarie: Recorded by Matthew Paris in the yeare our Lord 1243.

The Lord therefore being prouoked to indignation, by reason of this and other sinnes committed amongst vs Christians, is become, as it were, a destroying enemy, and a dreadfull auenger. This I may iustly affirme to bee true, because an huge Nation, and a barbarous and inhumane people, whose Law is lawlesse, whose wrath is furious, euen the rod of Gods anger, ouerrunneth, and vterly wasteth infinite Countries, cruelly abolishing all things where they come, with fire and sword. And this present Summer, the foresaid Nation, being called Tartars, departing out of Hungarie, which they had surprised by treason, layd siege vnto the very same Towne, wherein I my selfe abode, with many thousands of Souldiers: neither were there in the said Towne on our part above Fifty men of warre, whom, together with twenty Corse-bowes, the Captaine had left in Garrison. All these, out of certaine high places, beholding the enemies vaste Armie, and abhorring the beastly cruelty of Antichrist his complices, signified forthwith vnto their Governour, the hideous lamentations of his Christian subiects, who suddenly being surprised in all the Prouince adioyning, without any difference or respect of condition, Fortune, sexe, or age, were by manifold cruelties, all of them destroyed: with whose carresses, the Tartarian chieftaines, and their brutish and sauage followers, glutting themselves, as with delicious cates, left nothing for vultures but the bare bones. And a strange thing it is to consider, that the greedy and rauenous vultures disdained to pray vpon any of the reliques, which remained. Old and deformed Women they gaue, as it were for daylie sustenance, vnto their Canibals: the beautifull deuoured they not, but smothered them, lamenting and scritchng, with forced and unnaturall rauishments. Like barbarous miscreants, they quelled Virgins

Neustat.

unto death, and cutting off their tender paps to present for dainties unto their Magistrates, they engorged themselves with their Bodies.

Howbeit, their spies in the meane time discrying from the top of an high mountaine the Duke of Austria, the King of Bohemia, the Patriarch of Aquileia, the Duke of Carinthia, and (as some report) the Earle of Baden, with a mighty power, and in battell aray, approaching towards them, that accursed crew immediately vanished, and all those Tartarian Vagabonds retired themselves into the distressed and vanquished land of Hungarie: who as they came suddenly, so they departed also on the sudden: which their coleritic caused all men to stand in horror and astonishment of them. But of the said fugitives, the Prince of Dalmatia tooke eight: one of which number the Duke of Austria knew to bee an Englishman, who was perpetually banished out of the Realme of England, in regard of certaine notorious crimes by him committed. This fellow on the behalfe of the most tyrannicall King of the Tartars, had bene twice, as a messenger and Interpreter, with the King of Hungarie, menacing and plainly foretelling those michiefes which afterward happened, unlesse he would submit himselfe and his Kingdome unto the Tartars yoke. Well, being allured by our Princes to confesse the truth, he made such oathes, and protestations, as (I thinke) the Devil himselfe would haue bene trusted for. First therefore hee reported of himselfe, that presently after the time of his banishment, namely, about the thirtieth yeare of his age, hauing lost all that he had in the Citie of Acon at Dice, euen in the midst of Winter, being compelled by ignominious hunger, wearing nothing about him but a shirt of sacke, a paire of shooes, and a haire cap onely, being shauen like a foole, and vttering an vncouth noyse as if hee had bene dumbe, he tooke his iourney, and so traouelling many Countries, and finding in diuers places friendly entertainment, he prolonged his life in this manner for a season, albeit euery day by rashnes of speech, and inconstancy of heart, hee endangered himselfe to the Deuill. At length, by reason of extreame trauaile, and continuall change of ayre and of meates in Caldea, hee fell into a grievous sicknesse, insomuch that he was weary of his life. Not being able therefore to goe forward or backward, and staying therea while to refresh himselfe, hee began (being somewhat learned) to commend to writing those wordes which he heard spoken, and within a short space, so aptly to pronounce and to vtter them himselfe, that he was reputed for a natieue member of that Countrie: and by the same dexteritie he attained to manie Languages. This man, the Tartars hauing intelligence of by their spies, drew him perforce into their societie: and being admonished by an oracle or vision, to challenge dominion ouer the whole earth, they allured him by many rewards to their faithfull seruice, by reason that they wanted Interpreters. But concerning their manners and superstitions, of the disposition and stature of their bodies, of their Countrie and manner of fighting, &c. he protested the particulars following to be true: namely, that they were aboue all men, couetous, haughty, deceitfull, and mercilesse: notwithstanding, by reason of the rigour and extremities of punishments to be inflicted vpon them by their superiours, they are restrained from brawlings, and from mutuall strife and contention. The ancient founders and fathers of their tribes, they call by the name of Gods, and at certaine set times they doe celebrate solemne Feasts vnto them, many of them being particular, and but foure onely generall. They thinke that all things are created for themselves alone. They esteeme it none offence to exercise cruelty against rebels. They be hardy and strong in the breast, leane and pale-faced, rough and huffe-shouldred, hauing flat and short noses, long and sharpe chinnes, their vpper jawes are low and declining, their teeth long and thin, their eye-browes extending from their fore-heads downe to their noses, their eyes inconstant and blacke, their countenances writthen and terrible, their extreame ioynts strong with bones and sinewes, hauing thicke and great thighes, and short legs, and yet being equall vnto vs in stature: for that length which is wanting in their legs, is supplied in the vpper partes of their bodies. Their Countrey in old time was a land vtterly desert and waste, situated farre beyond Chaldea, from whence they haue expelled Lyons, Beares, and such like vntamed beasts, with their bowes, and other engines. Of the hides of beastes being tanned, they vse to shape for themselves light, but yet impenetrable armour. They ride fast bound vnto their Horses, which are not very great in stature, but exceedingly strong, and maintained with little prouender. They vse to fight constantly and valiantly with Iauelins, maces, battle-axes, and swords. But especially they are excellent Archers, and cunning warriors with their bowes. Their backs are sleightly armed, that they may not flee. They withdraw not themselves from the combate, till they see the chiefe Standard of their Generall giue backe. Vanquished, they aske no fauour, and vanquishing, they shew no compassion. They all persist in their purpose of subduing the whole world vnder their owne subiection, as if they were but one man, and yet they are moe then millions in number. They haue 60000. Courriers, who being sent before vpon light Horses to prepare a place for the Armie to incampe in, will in the space of one night gallop three dayes iourney. And suddenly diffusing themselves ouer an whole Prouince, and surprising all the people thereof vnarmed, vnprovided, dispersed, they make such horrible slaughters, that the King or Prince of the land inuaded, cannot finde people sufficient to wage battell against them, and to withstand them. They delude all people and Princes of regions in time of peace, pretending that for a cause, which indeed is no cause. Sometimes they say that they will make a voyage to Colen, to fetch home the three wise Kings into their owne Countrey; sometimes

times to punish the avarice and pride of the Romans, who oppressed them in times past; sometimes to conquer barbarous and Northern nations; sometimes to moderate the furie of the Germans with their owne meeke mildnesse; sometimes to learne warlike feates and stratagems of the French; sometimes for the finding out of fertile ground to suffice their huge multitudes; sometimes againe in derision they say, that they intend to goe on Pilgrimage to Saint James of Galicia. In regard of which sleights and collusions certaine vndiscreet Gouvernours concluding a league with them, haue granted them free passage thorow their Territories, which leagues notwithstanding being violated, were an occasion of ruine and destruction vnto the foresaid Gouvernours, &c.

To the Reader.

I Found this Booke translated by Master Hakluyt out of the Latine. But where the blind leade the blind both fall: as here the corrupt Latine could not but yeeld a corruption of truth in English. Ramusio, Secretarie to the Decemviri in Venice, found a better Copie and published the same, whence you haue the worke in manner new: so renewed, that I haue found the Prouerbe true, that it is better to pull downe an old house and to build it anew, then to repaire it; as I also should haue done, had I knowne that which in the euent I found. The Latine is Latten, compared to Ramusios Gold. And hee which hath the Latine hath but Marco Polos Carcasse, or not so much, but a few bones, yea, sometime stones rather then bones; things diuers, auerse, aduerse, perueried in manner, disioynted in manner, beyond belief. I haue scene some Authours maymed, but neuer any so mangled and so mingled, so present and so absent, as this vulgar Latine of Marco Polo; nor so like himselfe, as the three Polos were at their retorne to Venice, where none knew them, as in the Discourse yee shall find. Much are wee beholden to Ramusio, for restoring this Pole and Load-starre of Asia, out of that mirie poole or puddle in which he lay drowned. And, O that it were possible to doe as much for our Countriman Mandeuill, who next this (if next) was the greatest Asian Traveller that euer the World had, & hauing salne amongst theenes, neither Priest, nor Leuite can know him, neither haue we hope of a Samaritan to releene him. In this I haue induoured to giue (in what I giue) the truth, but haue abridged some things to preuent prolixitie and tautologie in this so voluminous a Worke, leauing out nothing of substance, but what elsewhere is to be found, in this Worke: and seeking rather the sense then a stricter verball following our Authours words and sentence. As for the Chapters I find them diuersly by diuers expressed, and therefore haue followed our owne method.

CHAP. IIII.

The first Booke of MARCVS PAVLVS VENETVS, or of Master MARCO POLO, a Gentleman of Venice, his Voyages.

§. I.

The Voyages of Master M. NICOLO and M. MAFFIO from Constantinople to the Great CAN, and their comming home to Venice: their second Voyage with the Authour and retorne.

IN the time of Baldwin Emperour of Constantinople, * where vsually remayned a Magistrate of Venice, called Messer lo Dose, in the yeare of our Lord 1250. Master Nicolo Polo, Father of Master Marco, and M. Maffio his Brother, Noble, Honourable and Wisemen of Venice, beeing at Constantinople with store of Merchandize, kept many Accounts together. At last they determined to goe into the Great (or Euxine) Sea, to see if they could increase their stocke, and buying many faire and rich Iewels. They departed from Constantinople and sayled by the said Sea to a Port called Soldadia: * from whence they travelled after by Land to the Court of a great Lord of the Tartars, called Barcha, who resided in the Cities of Bolgara and Assara, and was reputed one of the most liberal and courteous Princes that euer had beene amongst the Tartars. He was very well pleased with their comming, and did them great honour. They hauing made shew of their Iewels, and seeing they pleased him, freely bestowed them on him. He, loth placed in Chirmia (not Armenia) on the North side of the Euxine Sea. Frier Bacon before calls it Soldaia in Cassaria.

* Of Baldwins conquering of Constantinople and the Em-pire of the Latines there, Ramusio hath giuen a long discourse: see also Knolles Turkish Historie: & sup. tom. 1. l. 8. c. 6
* Called by Arabians Ismael, Sogdat, and

Bocara, 'or Bog-
har in Bactria,
of which see
M. Ienkinson.

to be exceeded in liberalitie, caused twice the value to bee giuen them, and besides great and rich gifts. Hauing stayed one yeare in the Countrey of the said Prince, whiles they thought to returne to *Venice*, there suddenly arose Warre betwixt the said *Barcha* and another named *Alan*, Lord of the Easterne *Tartars*. These Armies fighting together, *Alan* had the Victorie, and the Armie of *Barcha* receiued a great ouerthrow. By reason whereof, the wayes beeing not secure, they were not able to returne that way which they came. And hauing consulted how to returne to *Constantinople*, they were aduised to goe so farre to the East, that they might compasse the Realme of *Barcha*, by vnknowne wayes: and so they came to a Citie called *Ouchacha*, which is in the Confinnes of the Kingdome of this Lord of the *Tartars* on the West, and passing further, they went ouer *Tigris* (one of the foure Riuer of Paradise) and after that a Desart of seuen-
teene dayes Journey, without Citie, Castle, or Fort, finding only *Tartars*, which liue in the fields in certayne Tents, with their beasts. Beeing past the Desart they came to a good Citie called *Bocara*, (the name also of the Prouince) in the Region of *Persia*, which was subiect to a King called *Barach*: in which place they stayed three yeares before they could goe forward or backward, by reason of great warres betwixt the *Tartars*.

At that time a certayne Wiseman was sent Ambassador from the said Prince *Alan* to the Great *Can*, who is the greatest King of all the *Tartars*, residing in the Confinnes of the Earth, betwixt the North-east and the East, called *Cublai Can*: who being comne to *Bocara*, and finding there the said two brethren which had now well learned the *Tartarian* Language, he reioyced aboue measure, and perswadeth these Westerne men or *Latines* to goe with him, to the presence of the Great Emperour of the *Tartars*; knowing that hee should gratifie him in this, and the men notwithstanding should be entertayned with great honour, and rewarded with large gifts; especially, seeing through the manifold conference had with them, he now perceiued their pleasing behauiour. Those men therefore considering, that they could not easily returne home without danger, consulting together, ioyne with the said Ambassadour, and iourney with him to the Emperour of the *Tartars*, hauing certayne other Christians in their Company, whom they brought with them from *Venice*, and departing towards the North-east and the North, were a whole yeare in going to the Court of the said chiefe King of the *Tartars*. The cause of their long time in this Journey, was the Snowes and Riuer Waters much increased, so that they were forced in their trauell to stay the wasting of the Snow, and decreasing of the floods.

They come to
the Great *Can*.

Being therefore brought before the presence of the Great *Can*, they were most courteously receiued of him. He questioned them concerning many things, as of the Countries of the West, the *Romane* Emperour, and other Kings and Princes, how they carried themselves in Government, and in Warlike affaires, how Peace, Iustice, and Concord continued among them; also what manner of life, and customes were obserued with the *Latines*; and especially of the Pope of the Christians, of the things of the Church and the Religion of the Christian Faith. And *M. Nicolo* and *M. Maffeo*, as Wisemen told him the truth, alway speaking well to him, and orderly in the *Tartarian* Tongue. Insomuch that hee often commanded they should bee brought to his presence, and they were very acceptable in his sight.

They are sent
Ambassadors
from the *Can*
to the Pope.

Hauing well vnderstood the Affaires of the *Latines*, and resting satisfied with their answers, the Great *Can* intending to send them his Ambassadors to the Pope, first, consulted with his Barons, and then calling to him the two Brethren, desired them for his loue to goe to the Pope of the *Romans*, with one of his Barons called *Chogatall*, to pray him to send an hundred Wisemen, and learned in the Christian Religion vnto him, who might shew his Wisemen, that the Faith of the Christians, was to bee preferred before all other Sects, and was the only way of saluation; and that the Gods of the *Tartars* were Deuils, and that they and others the people of the East were deceived in the worship of their Gods. Hee gaue them also in charge to bring in their returne from *Ierusalem*, of the Oyle of the Lampe which burneth before the Sepulchre of our Lord Iesus Christ, to whom hee had great deuotion, and held him to bee true God. They therefore yeelding due reuerence to the Great *Can*, promise that they will faithfully execute the charge committed vnto them, and present the Letters which they receiued from him, written in the *Tartarian*, to be deliuered to the Bishop of *Rome*.

Golden tablet
vied as a Com-
mission vnder
the broad
Seale.

He (according to the custome of his Kingdome) commanded a Golden Tablet to bee giuen them ingrauen and signed with the Kings marke; carrying the which with them throughout his whole Empire, in stead of a Passe-port, they might bee euery-where safely conueyed through dangerous places, by the Gouvernours of Prouinces and Cities, and receiue expenses from them; and lastly, how long soeuer they would stay in any place, whatsoever they needed to them or theirs, should be ministred vnto them. Taking their leaue therefore of the Emperour, they take their Journey, carrying the Letters and Golden Tablet with them. And when they had rid twentie dayes Journey, the Baron aforesaid associated vnto them began to fall grievously sicke. Whereupon consulting and leaving him there, they prosecute their intended Journey, beeing euery-where courteously receiued by reason of the Emperours Tablet. Yet in very many places they were compelled to stay, by occasion of the ouer-flowing of Riuer, so that they spent three yeares, before they came vnto the Port of the Citie of the *Armenians*, named *Giazza*. From

Giazza

Giazza they goe to *Acre*, to wit, in the yeere of our Lord 1269. in the moneth of Aprill.

But hauing entred into the Citie of *Acre*, they heard, that Pope *Clement* the fourth was lately dead, and that no other was substituted in his place: for the which they were not a little grieved. At that time, there was a certaine Legate of the Apostolicall Sea at *Acre*, to wit, Master *Tibaldo de Vesconti di Piacenza*, to whom they declared all they had in commission, from the Great *Chan*: and he aduised them, to expect the Creation of a new Pope. In the meane space therefore departing to *Venice* to visit their Friends, (purposing to remayne there vntill another Pope were created) Master *Nicolo* found that his wife was dead, whom (at his departure) hee had left great with child, but had left a sonne, named *Marco*, who was now * nineteene yeeres of age. This is that *Marco* which ordayned * this Booke, who will manifest therein all those things which he hath seene. Moreouer, the Election of the Pope of *Rome* was deferred two yeeres.

They (fearing the discontentment, and disquieting of the Emperour of the *Tartars*, who (they knew) expected their returne) goe backe againe to *Acre* to the Legate, carrying with them *Marco* aforesaid, and (hauing gone to *Ierusalem*, and fetched of the Oyle) with the Legats Letters, testifying their fidelitie to the Great *Chan*, and that a Pope was not yet chosen, they went againe towards *Giazza*. In the meane time whiles they were going, Messengers came from the Cardinals to the Legate, declaring vnto him, that he was chosen Pope: and he called himselfe * *Gregorie*. Hearing this, presently sending Messengers, hee calleth backe the *Venetians*, and admonisheth them not to depart, preparing other Letters for them, which they should present vnto the Great *Chan* of the *Tartars*; with whom he also ioynd two Preaching Friars, men famous for their honest conuersation and learning, whereof the one was called Friar *Nicolo Danicenza*; the other, Friar *Guilmo da Tripoli*. To these hee gaue Letters, and Priviledges, and authoritie to order Priests and Bishops, and of all absolution as if himselfe were present, with Presents also of great value, and Crystall vessels to present the great *Chan*, together with his Benediction. They came to *Giazza*, a Port of the Sea in *Armenia*. And because *Bentischdare* the Sultan of *Babylon* leuying a great Armie had then inuaded the *Armenians*, the two Friars mentioned, began to bee afraid of themselves, and deliuering the Letters and Presents to Master *Nicolo*, and *Maffio*, and *Marco*, desiring to auoide the danger of the wayes, and perill of warres, remayned with the Master of the Temple, and returned with him.

But the three *Venetians* exposing themselves to all danger, with many labours, and much difficultie travelled many dayes, alwaies towards the North-east and North, till they after three yeeres and a halfe came vnto the Emperour of the *Tartars*, vnto the Citie called *Clemenfu*: for in the Winter time their iourney had often and long hinderances, by reason of the snow and extreme cold, and inundations of waters. Moreouer, King *Cublai* hearing that they were coming, who were yet very farre off, sent Messengers fortie dayes iourney to meet them, who should conduct them, and minister all necessaries for the iourney.

Going therefore to the Kings Court, and being brought to his presence, they fell downe before him on their faces, yeelding the accustomed reuerence. Of whom being curteously received, they are willed to arise, and he commandeth them to declare, how they passed the diuers dangers of the wayes, and what they had treated with the Bishop of *Rome*. Then they orderly declare all things, and giue the Emperour the Popes Letters and Presents which they brought. Whereat the *Chan* wonderfull reioycing, commended their faithfull cares. The Oyle also brought from the Lampe of the Lords Sepulcher, and offered vnto him, hee reuerently received of them, and commanded it should bee honourably preserued. And asking of *Marco*, who hee was, Master *Nicolo* answered, that he was his Maiesties seruant and his sonne. Hee entertayned him with a friendly countenance, and caused him to write amongst other his honourable Courtiers: Whereupon he was much esteemed of all the Court, and in a little space learned the customes of the *Tartars*, and foure diuers Languages, being able to write and reade them all.

The great *Chan* to make his wisdom more apparent, committed an Embassage vnto him to be performed in a Citie called *Carahan*, vnto the which he could scarcely attayne in fixe moneths space. But he, carrying himselfe wisely in all things, discharged what hee had in commission, not without the commendation and fauour of the Prince. And knowing the Emperour was delighted with nouelties in the Countries which he passed thorow, he diligently searched the customes and manners of men, and the conditions of the Countries; making a memoriall of all which he knew and saw, to pleasure the Great *Chan*. And in fixe and twentie * yeeres which he continued one of his Court, he was so acceptable to him, that he was continually sent thorow all his Realmes and Signories, for the affaires of the Great *Chan*, and sometimes for his owne, but by the *Chans* order. And this is the true reason that the said Master *Marco* learned and saw so many nouelties of the East, which follow in order diligently written.

But these *Venetians* hauing stayd in that Court many yeeres, and growne very rich in Jewels of great value, were inflamed with desire to visit their Countrey, fearing that if the *Chan* (now old) should die, they should not bee able to returne. One day Master *Nicolo* seeing the *Chan* merrie, craued licence to depart in the name of all three. Whereat hee was moued, and asked

Acre or *Acon*, then in possession of the Christians, see before l. 8. c. 4. Pope *Clement* the fourth.

* Another copie hath 15. x For the Booke was written by a Gentleman of *Genoa* from his mouth: and therefore still in *Ramusio* *Marco* is mentioned in the third person, and not in the first: at least much of it was so written and the whole published by both. d The tenth of that name. Letters, and Preaching Friars sent vnto the *Tartars*.

The Citie *Clemenfu*.

The adoration of the *Tartars*.

Marcius Paulus made one of the *Chans* Clerkes, and a Courtier. *Marcos* Legation. His wisdom in travelling to a farre Countrey.

* This 26. yeeres are to be reckoned to the time in which this booke was written, from 1272. to 1298. as in the Relation appeareth. The sense is that it was 26. yeeres since he began to be a Courtier. They desire to returne.

gana.
Cogatin.

why they would put themselves on so dangerous a iourney: and if they wanted riches, he would giue them twice as much as they had: and in great loue would not permit their departure. Yet in the meane space it happened, that a King of the Indians, named *Argon*, sent three wise men vnto the Court of Great *Cublai*, whose names were *Vlatai*, *Apusca*, *Coza*, to treat with him, that he wold deliuer him a wife; for his wife named *Bolgana*, being lately dead, begged this grace of the King at the point of death, and left in her Wil, that he should not marrie a wife of another Familie then her owne, which was of *Catay*. King *Cublai* therefore yeelding to his request, caused to be sought out for them a faire young Mayden of seuentene yeeres of age, named *Cogatin*, descended of the said Queenes stocke, and to be the wife of *Argon*.

These Embassadors departing, rode eight moneths the same way they came, but found so hot warres betwixt the *Tartars*, that they were constrained to returne: and acquainted the *Chan* with their proceedings. Meane-whiles, Master *Marco* had returned from the parts of *India*, where he had beene employed with certaine ships, and declared to the *Chan* the nouelties of the places, and the securitie of those Seas: which words hauing passed him, the Embassadors conferred with the *Venetians*, and agreed that they with the Queene should goe to the Great *Chan*, and desire leaue to returne by Sea, and to haue the three *Latines*; men skilfull in Sea affaires, with them to the Countrey of King *Argon*. The Great *Chan* was much displeased with their request, yet vpon their petition granted it: and caused *Nicolo*, *Maffio* and *Marco* to come to his presence, and after much demonstration of his loue, would haue them promise to returne to him, after they had spent some time in Christendome, and at their owne house. And he caused to giue them a Tablet of Gold, in which was written his commandement, for their libertie and securitie thorow all his Dominions, and that expenses should bee giuen them and theirs, and a Guide or conuoy for safe passage; ordaining also that they should be his Embassadors to the Pope, the Kings of *France*, of *Spayne*, and to other Christian Kings. Hee caused fourteene ships to be prepared, each hauing foure Masts and able to beare nine Sayles in sayling, the forme of which is too long here to relate. Foure of them, or fife, had from two hundred and fiftie to two hundred and sixtie Mariners each of them. In these ships the Embassadors, the Queene, and *Nicolo*, *Maffio*, and *Marco*, set sayle, hauing first taken leaue of the Great *Chan*, who gaue them many Rubies and other precious gems, and expenses for two yeeres.

After three moneths they came vnto a certaine Iland, named *Iana*, and from thence sayling through the *Indian Sea*; after eightene moneths, they come vnto the Countrey of King *Argon*, fixe hundred men of the Mariners and others, and but one of the Women and Damsels died in the iourney, and onely *Coza* of the three Embassadors was liuing. When they came to the Countrey of King *Argon*, they found that hee was dead, and that one *Chiacato* gouerned the Kingdome, for his sonne being young. They sent to acquaint him with their businesse; who answered, that they should giue her to *Casan* the Kings sonne, then in the parts of *Arbor secco*, in the Confines of *Persia* with sixtie thousand persons for the guard of certaine passages against the enemye. Hauing done so, *Nicolo*, *Maffio*, and *Marco*, returned to *Chiacato*, and stayed there nine moneths. After this, taking leaue, *Chiacato* gaue them foure Tables of Gold, each a cupit long, fife fingers broad, of the weight of three or foure Markes: in which was written, that in the power of the eternall God, the name of the Great *Chan* should bee honoured and praised many yeeres; and euery one which should not obey, should be put to death, and his goods confiscate. It was further contayned, that these three Embassadors should be honoured, and seruice done them in all Lands and Countries, as to his owne person: and that Horses, Conuoyes, expenses and necessaries should be giuen them. All which was duly put in execution, that sometimes they had two hundred Horses for their safeguard. In this their trauell they heard that the Great *Chan* was dead, which tooke from them all hope of returning thither. They rode till they came to *Trabesonde*, and from thence to *Constantinople*, and after to *Negroponte*, and at last came with great riches safe to *Venice*, Anno 1295. And thus much may serue for a Preface to the following worke, whereby might appeare, how *Marco Polo* could come to the knowledge of the things therein contayned.

To supply a little more, deliuered by Tradition and recorded by *Ramusio*: he sayth that these three being come to *Venice*, like *Vlysses* in *Ithaca*, none knew them; all esteeming them long since dead. Besides, their voyage had so altered them, that they seemed rather *Tartarians* then *Venetians*, hauing in manner forgotten their native Language; their habite also was of thicke Cloth, like *Tartars*. They went to their house in *Saint Iohn Chrysostomes Street*, and is there still to be seene, then a faire Palace, and now called, The Court of millions: which name it had by reason of *Marcos* relations of so many millions in this worke, and in his discourses of the Great *Chans* incredible wealth. They found there inhabiting some of their kindred, nor knew how to make themselves knowne. Therefore, as I haue often heard of *Magnifico Messer Gasparo Malipiero*, a very old Gentleman of singular integritie, from the report of his Father and Grandfather, &c. they agreed to inuite many of their kindred to a feast, prepared in honourable manner with much Magnificence: in which at first all three came forth in *Crimson Sattin* suites, and after the Guests were set, stripped themselves, and gaue them to the Seruitors, comming forth in *Crimson Damaske*; and at the next seruice in *Crimson Veluet*, and after in the com-

mon habit, giving still the former to the scrivers. Dinner ended and the Scrivers put forth, Marco brought forth their three habits of thicke Cloath in which they had come home, and thence tooke and set on the Table an incredible quantitie of Jewels artificially sewed therein, which was no lesse marvell to the beholders, then evidence of their being of the Polo family as they pretended. Maffio was made a Magistrate in Venice, Marco was daily frequented with the youth; and all wanne great reputation. In few moneths after, Lampa Doria Generall of a fleet of Genois being come to the Ile Curzola with seauentie Galleyes, Andrea Dandolo was sent against them, and in that Fleet Marco was made Captaine of a Galley, which by disadventure of Warre was taken, and he carryed prisoner to Genoa. Where his strange travels being made knowne, a certaine Gentleman daily resorting to him (as did the whole Citie in admiration) caused and helped him to write this storie, having sent to Venice for his Notes. The booke was first written in Latine, and thence translated into Italian. One of which Latine Copies very ancient and haply copied out of Marcos originall, I haue seene and compared with this which I heere Publish, lent me by a Gentleman of this Citie of the house of the Ghisimys speciall friend, which holds it in speciall esteeme. No price might ransom him, insomuch that his Father wanting an heire to his wealth married againe, and had by his wife three Children. Marcos worthinesse obtained that which no moneys worth could doe, and being at libertie hee returned and married, and had two Daughters (but no sonne) Morretta and Fautina, &c.

That Gentleman of Genoa made a Preface to the Booke, and Francisco Pipino a Frier Preacher which translated the same, Anno 1320. out of the Vulgar (the Latine being rare, as well it might before Printing and perhaps neuer seene of him) into Latine. Both those Prefaces are in Ramusio: the latter commends M. Polo for a deuout and honest man, and saith his Father confirmed the truth of this Booke, and his vncke Maffio on his Death-bed to his Confessor. Pipino abbreviated the Booke and perhaps gaue occasion to that corruption which was after increased by others.

§. II.

Observations of M. Polo, of Armenia, Turkie, Zorzanian, Baldach, Persia, Chirmain, Cobniam, Ormus, Knaue-fooles Paradise, and other Easterne parts in Asia, and Armenia the lesse.

30

Here are two *Armenias*, the greater and the lesse. In the lesse the King abides in a Citie called *Sebastoz*, which in all his Countrey obserueth Iustice and good Government. The Kingdome it selfe hath many Cities, Fortresses and Castles: the soyle also is fertile, and the Countrey lacketh no necessary thing, nor doth it want game of Beasts and fowle: the ayre is not very good. The Gentlemen of *Armenia* in times past were stout warriors, but become now effeminate and nice, giue themselves to drunkenness and ryot. There is a certaine Citie in this Kingdome seated neere the Sea, named *Giazza*, hauing an excellent Hauen whither many Merchants resort from diuers Countries, euen from *Venice* and *Genoa*, by reason of the diuers marchandises brought thither, especially Spices of sundry sorts, and certaine other precious riches brought thither out of the East Countries for trading: for this place is as it were a certaine part of all the East Countries.

The manners
of the Inhabi-
tants.
Giazza.

40

In *Turchomania* are three sorts of Nations; to wit, the *Turchomans* or *Turke-men*, which obserue the law of *Mahomet*. They are men vlearned, rude, and wilde, inhabiting the Mountaines and inaccessible places, where they know are pastures; for they liue onely of their beasts. There are good Horses, called *Turke-men*, (or *Turkie* horses) Mules, of great estimation. The other Nations are *Grecians* and *Armenians*, who possesse the Cities and Townes, and bestow their labour on Marchandise and Artes. They make the best Carpets in the world. And they haue many Cities, the chiefe whereof are *Cogno*, or *Iconium*, *Casarea*, and *Sebastie*, where Saint *Basil* suffered Martyrdome for *Christ*, and they acknowledge one of the Kings of the *Tartars* for their Lord.

Turchomania, or
Turkie.

50

Armenia the greater, being a very large Prouince, tributary to the *Tartars*, hath many Cities and Townes. The chiefe Citie thereof is called *Arzuiga*, and the best Bukram is made there. Most wholsome hot waters also spring there, for the washing and curing of mens bodies. And the other more famous Cities next to the Metropolis, are *Argiron* and *Darzik*. In the Summer time, very many *Tartars* resort thither with their Flockes and heards, allured through the fatnes of the pasture: and againe in the Winter depart for a certaine time by reason of the abundance of Snow. The Arke of *Noah* remained in the Mountaines of this *Armenia*. This Countrey hath the Prouince of *Mosull* and *Meridin*, bordering on the East. But on the North is *Zorzanian*, in the confines of which a Fountaine is found, from which liquor-like oyle floweth, yet is it vnprofitable for the seasoning of meat, but very fit for the making and maintaining of Lampes, and to anoint other things enough to lade Camels.

Of the *Georgi-
ans*.

60

In *Zorzanian* is a King called alway *David Melicz*, or King *David*: One part of the Prouince is subiect to him, the other payeth tribute to the King of the *Tartars*. The Woods there are of Boxe-tree. The Countrey abutteth on the two Seas, *Mar-maggiore*, and that of *Abacch*,

Georgia.

(or

(or the *Caspian*) which containeth in Circuit twentie eight hundred Miles, and is like a Lake, not mingled with other Seas. In it are many Ilands, Cities and Castles, some of which are inhabited by those which fled from the *Tartars* out of *Persia*. The people of *Zorzanis* are Christians, observing the rites of the *Christians*. They keepe their hayre short, like the *Westerne Clergie*. The Inhabitants haue many Cities and Castles, and abound with Silke, of the which they make very faire Cloathes.

Moxul.

Moxul is a Prouince in which dwell people of many sortes, one called *Arabi* which are *Mahumetans*, other are *Christians*, some *Nestorians*, others *Iacobites*, and others *Armenians*: and they haue a Patriarch called *Iacolit*, which ordaineth Archbishops, Bishops, and Abbots, and lends them thorow all parts of *India*, and to *Cairo* and *Baldach*, and all parts where Christians dwell, as doth the Pope of *Rome*. And all the cloathes of Gold and of Silke called *Moffulines* are wrought in *Moxul*. But in the Mountaines of this Kingdome dwell the people called *Cordi*, whereof some are *Nestorians*, other *Iacobites*, and some followers of *Mahumet*. They are wicked men and rob Merchants. Neare to them is another Prouince, called *Mus* and *Meridin*, wherein growes infinite store of Cotton or Bombast, whereof they make Buckrams and other workes. They are all vnder the *Tartars*.

Baldach.
Chisi.
Balsara.

Baldach is a great Citie, in which was the *Chalifa* that is the Pope of all the *Saracens*. A Riuer runnes thorow it, from whence to the Sea is ordinarily seauenteene dayes iourney. They sayle by a Citie called *Chisi*: but before they come thither is *Balsara*, about which grow the best Dates in the world. In *Baldach* are many cloathes of Gold and Silke: there are wrought Damaskes and Veluets with diuers figures of creatures. All the pearles (in manner) in Christendome come thence. In that Citie is studyed the law of *Mahomet*, *Negromancie*, *Physicke*, *Astronomie*, *Geomancie*, and *Phisnomie*: It is the chiefe Citie in those parts. When the *Tartars* began to raigne, there were foure Brethren, the eldest of which, *Mongu* rained in *Sedia*. These purposing to subdue the world, went one to the East, another to the North, to the South a third, which was *Ulan*, and the other to the West. In the yeare from the Incarnation of our Lord 1250. *Ulan* hauing a great Army of one hundred thousand Horse, besides Foot, yet vsed policie, and hauing hid a great part of his men brought by fained flight, the *Calipha* into his ambush, and tooke him, and the Citie: in which he found infinite store of treasure, insomuch that he wondered.

Vlan Alan, or
Haalon.

He sent for the *Califa*, and reprobued him that in that warre hee had not therewith provided himselfe of Souldiers for defence: and commanded that hee should be inclosed in that Tower, where his Treasure was, without other sustenance. This seemed a iust iudgement from our Lord Iesus Christ on him. For he in the yeare 1225, seeking to conuert the Christians to *Mahumet*: And taking aduantage on that place of the Gospell, that *hee which hath Faith as much as a graine of Mustard-seed, should be able to remoue mountaines*, he conuerted all the *Christians*, *Nestorians*, and *Iacobites*, and propounded to them in ten dayes to remoue certaine Mountaines, or turne *Mahumetans*, or be slaine, as not hauing one man amongst them which had the least faith. They therefore continued eight dayes in Prayer: after which a certaine Shoemaker by reuelation to a Bishop, was designed to performe it. This Shoemaker once tempted to lust by sight of a young Woman in putting on her Shooe, zealously had fulfilled that of the Gospell, and literally had put out his right eye: He now on the day appointed with other Christians following the Crosse and lifting his hands to Heauen, prayed to God to haue mercy on his people, and then with a loude voyce commanded the Mountaine in the name of the Father, Sonne, and holy Ghost to remoue, which presently with great terrour to the *Califa* and all his people was effected. And that day is since kept holy, with fasting also on the euen.

Tauris.

Tauris is a great Citie in the Prouince of *Hirace*. It is a most populous Citie. They liue of Arts and Merchandise. They make Cloathes of gold and silke. Foraine Merchants make there great gaine, but the Inhabitants are generally poore: a mixed people of *Nestorians*, *Armenians*, *Iacobites*, *Georgians*, and *Persians*, and *Mahumetans*. These last are perfidious and treacherous, thinking all well gotten which they steale from men of other Religions. And this wickednesse of the *Saracens* hath conuerted many *Tartars* thereto. If the Christians kill them in their robbetrie, they are reputed Martyrs. From *Tauris* to *Persia* are twelue dayes iourney. In the confines of *Tauris* is the Monasterie of Saint *Barsam*, the Monkes whereof are like *Carmelites*; they alway make girdles which they lay on the Altar, and giue to their friends, which deuoutly esteeme of them.

Devils Martyrs

The eight
Kingdome of
Persia.
Horses.
Asses.The Inhabi-
tants.

Persia containeth eight Kingdomes: whereof the first is called *Casbin*, the second *Curdistan*, the third *Lor*, the fourth *Suolistan*, the fift *Spaan*, the sixt *Sirat*, the seauenth *Soncara*, the eight *Tumochaim*, which is neere *Arborescco* towards the North. Faire and great Horses are there, whence they are sold into *India*. There are also very goodly and excellent Asses sold dearer then the Horses, for that they eat little, carrie much and farre. They haue Camels but not so swift. These are necessary in those Countries, which sometime in a long way yeeld no grasse. The people in those Countries are very wicked, contentious, Theeues, and Murderers, professing the faith of *Mahumet*. Merchants are euery where slaine by those Theeues, vnlesse they trauell in troupes. Yet are there excellent Artificers in the Cities, who make wonderfull things in gold, silke,

silke, and Embroyderie. They abound with Silke-wormes, Wheat, Barley, Milium, and other kindes of Corne: and haue also plenty of Wine and fruits. And though their Law forbid wine, yet they haue a glosse to correct or corrupt the text, that if they boyle it, then it changeth the taste, and therefore the name also of Wine.

Fine distinction, as in a Popish fast.

Iasdi is a great Citie in the confines of *Persia*, where much Trading is exercised. It hath also cunning Artificers who labour in Silke.

Iasdi.

Chierman is a Kingdome in the confines of *Persia* to the East, subiect to the *Tartars*. In the veines of the Mountaines the stones are found, commonly called *Turchisses*; veines also of *Az-zao* and *Andanico*. There are also made all Armes and munition for warre, and by the Women excellent needle-workes in Silkes, with the portraictures of all sorts of Creatures verie admirable. There are the best Falcons in the world, verie swift of flight, red breasted, and vnder the trayne, lesse then those of other Countries. Proceeding further, you goe through a great Plaine, and hauing ended eight dayes iourney, you come vnto a certaine descent. In the Plaine many Partridges are found, and also Castles and Townes. But in that steepe descent are many trees and thole fruitfull, but no habitation is there but of Shepherds. This Countrey in the winter time hath intollerable cold.

After this you come vnto a certaine great Plaine, where a certaine Citie is seated, named *Camandu*, which in times past was great, but is now destroyed by the *Tartars*, and the Countrey is called *Reobarle*. There grow Pomgranats, Quinces, *Adams*-apples, and diuers others fruits, which grow not in our cold Countries. It hath also very great Oxen, and all white, thin hayred with thicke blunt short hornes, with a Camels bunch on the backe, accustomed to beare great burthens. And when the packe-saddles are set vpon the bunch, they bow the knee like Camels, and hauing receiued the burthen rise againe, being so taught by men. The Sheepe of that Countrey are no lesse then Ases, bearing so long and broad a tayle, that they weigh thirty pound weight. They are very faire and fat, and good meat. Moreover, in the plaine of this Countrey are many Cities and Townes, with high walls of Mud to defend them from the *Carannas*, that is *Mesizos*, or mingled people of *Indian* women and *Tartars*, tenthousand of which bee conducted by one *Nugodar*, the nephew of *Zagathai* who ruled in the greater *Turkie*. This *Nugodar* hearing of the *Malabars* subiect to Soldan *Asidin*, without his Vncles knowledge went and tooke *Dely* with other Cities, and erected a new Seignorie, and mixing with the *Indian* women procreated these *Carannas*, which goe vp and downe to rob and spoyle in *Reobarle* and other Countries. There they learned magicall and diabolicall Arts, by which the ayre is so darkned in the day time for a long space, that none may see them or preuent them. *M. Marco* one time thorow such darknesse did almost fall into their hands, but made shift to escape to a Castle called *Consalmi*; but many of his company were taken or slaine.

Camandu.

Oxen with a bunch on the backe. Sheepe of the bigness of Ases.

Their Inchantments. The Authors danger.

Ormuz.

Parrots.

That Plaine whereof I now speake, is five daies iourney extended towards the South. But at the end therof, the way beginneth by litle and litle to descend for twenty miles together, & the way it selfe is very bad, and not without danger by reason of Theeues. At length you come to very goodly Plainnes, which extend themselves two dayes iourney in length, and the place it selfe is called *Ormuz*. That Countrey aboundeth with Riuer of water and Palme trees. There is also plenty of diuers Fowles, especially of Poppin-jayes, which are not like to ours. From hence you come vnto the Ocean, where on an Iland is seated, a Citie called *Ormuz*, whereto many Merchants resort, bringing Spices, Pearles, precious Stones, cloath of Gold and Silkes, and Elephants teeth, and all other precious things from *India*. That Citie is a great Mart, hauing Cities and Castles vnder it, and is head of the Kingdome *Chermain*: the King is called *Ruchmedin Achomach*, who yeelds obedience to the King of *Chermain*. He makes himselfe heyre, if any Merchant dyes there. In Summer they by reason of the heat betake themselves to their Garden houses built on waters. And from nine till noone there blowes a winde with such extreame heat from the sands, that it swallows vp a mans breath and stifeth him, which makes them lye in the water. The King of *Chermain* sent an Armie of fixteene hundred Horse, and five thousand Foot, against the Lord of *Ormuz* for not paying his tribute, which were all surprised and stifed with that winde. The Inhabitants of the place eate no Bread made of Corne and flesh, but feed vpon Dates, salt Fish, and Onions. They haue not very sound Ships: for they fasten them not with yron nayles (by reason that the wood is brittle and would cleaue) but with wooden pins, with certaine threds made of the shels of *Indian* Nuts. These shels are dressed after the manner of Leather, out of the which, threds are cut, and of the thrids exceeding strong cordes are made, which are able to indure the force and violence of the water, and are not easily corrupted thereby. Those Ships haue one Mast, one sayle, one beame, and are couered but with one decke. They are not chalked with Pitch, but with the Trane of Fishes. And when they crosse the Sea to *India*, carrying Horses and other freight with them, they lose many Ships, because that Sea is very tempestuous, and the Ships are not strengthened with yron. The Inhabitants of that Countrey are blacke, and addicted to the Law of *Mahumet*. It is the custome of this Countrey, when any Master of a family dyeth, that the wife left behind him should mourne for him foure weekes, once a day. They haue women which professe the practise of mourning and are thereto hired, to mourne daily for their dead.

Their Ships

An outward shell which growes vpon the *Coco* Nut, and yeelds a ready substance.

Returning

Returning from *Ormus* to *Chermain* is a fertile Plaine, but the bread made there, cannot bee eaten of them, who are not accustomed thereunto, it is so bitter by reason of the bitter water put therein, whereof are store of hot Bathes good against diseases.

A Defart in which is Salt, bitter, laxative, Greene water.

Going from *Chermain* in three dayes riding you come to a Defart, which continued till you come to *Cobinam*, seven dayes Iourney, which is extended. In the first three dayes you shall haue no water, saue a very few, and those salt and bitter, of a Greene colour in shew, as if it were the iuyce of Herbs: and who so tasteth but a little thereof, cannot escape loosenesse of the belly. The like also hapneth, if any taste the Salt made of that water: It is therefore needfull, that Trauellers carrie some water with them, if they will not be indangered through thirst. The beasts also which are compelled to drink that water, escape not without scouring. In the fourth day they find a fresh Riuer vnder ground: the three last dayes are as the first.

Cobinam.
Tutia and
Spodio.

Cobinam is a great *Mahumetan* Citie; goodly, and great Looking Glasses of Steele, are made there. *Tutia* also which cureth the eyes; and *Spodio* and that, after this manner. That Countrey hath Mines, out of which they digge Earth, which they boyle casting it into a fierie Fornace, an Iron grate receiuing the ascending vapour from aboue, in the which, the conglutinated and clammy vapour becommeth *Tutia*. But the grosser matter remayning in the fire, is called *Spodio*. The Inhabitants of this Countrey, are followers of *Mahumet*.

A Defart of eight dayes Iourney.

Leauing the Citie *Cobinam*, you meet with another Defart eight dayes Iourney in length, and in it there is great drynesse: it wanteth trees, and fruits, and waters which it hath are very bitter, so that the very beasts refuse to drinke them except they mixe meale therewith, and Trauellers carrie water with them. But hauing passed ouer this Defart, you came to the Kingdome *Timochaim* in the North Confines of *Persia*, where many Cities and Castles are. There is a great Plaine in which a great tree groweth, called the tree of the Sunne, which the Christians call, *The dry Tree*. This tree is very great and thicke, and hath leaues, which on the one side are white, and on the other side Greene. It produceth prickly shales like those of a Chesnut, but nothing in them. The wood is solide and strong, yellow like Boxe. There is no tree within one hundred miles, except on one side, on which are trees within ten miles. In this place the Inhabitants say, that *Alexander* the Great fought with *Darius*. The Cities are plentifull of good things, but *Mahumetan*, and of temperate Aire. It hath also goodly men, but specially women, the most beautifull in my iudgement in the World.

Timochaim.

Tree of Sun,
or *Arbor Secco*.
a *Ricci*.

Mulehet.

Mulehet is in *Saracen* Language, as much to say as a place of Heretikes, and of this place they call the men *Mulehetici*, that is, Heretikes in their Law, as with vs *Patarines*. Hauing spoken of the Countrey, the old man of the Mountayne shall bee spoken of, of whom *Marco* heard much from many. His name was *Aladine*, and was a *Mahumetan*. Hee had in a goodly Valley betwixt two Mountaynes very high, made a goodly Garden, furnished with the best trees and fruits he could find, adorned with diuers Palaces and houses of pleasure, beautified with gold Workes, Pictures, and Furnitures of tilke. Thereby diuers Pipes answering diuers parts of those Palaces were scene to runne Wine, Milke, Honey and cleere Water. In them hee had placed goodly Damofels skilfull in Songs and Instruments of Musicke and Dancing, and to make Sports and Delights vnto men whatsoever they could imagine. They were also fairely attyred in Gold and Silke, and were scene to goe continually sporting in the Garden and Palaces. He made this Palace, because *Mahomet* had promised such a sensuall Paradise to his deuout followers. No man might enter: for at the mouth of the Valley was a strong Castle, and the entrance was by a secret passage.

Aladine the
old man of the
Mountayne.

Knaue-fooles
Paradise.

Aladine had certaine Youthes from twelue to twentie yeares of age, such as seemed of a bold and vndoubted disposition, whom hee instructed daily touching *Mahomets* Paradise, and how hee could bring men thither. And when he thought good, he caused a certaine Drinke to bee giuen vnto ten or twelue of them, which cast them in a dead sleepe: and then hee caused them to be carryed into diuers Chambers of the said Palaces, where they saw the things aforesaid as soone as they awaked; each of them hauing those Damofels to minister Meates and excellent Drinkes, and all varieties of pleasures to them; insomuch that the Fooles thought themselves in Paradise indeed. When they had enioyed those pleasures foure or fife dayes, they were againe cast in a sleepe, and carryed forth againe. After which, hee caused them to be brought into his presence, and questioned where they had beene, which answered, by your Grace, in Paradise, and recounted before all, all before mentioned. Then the old man answered, This is the commandement of our Prophet, that whosoever defends his Lord, he make him enter Paradise: and if thou wilt bee obedient to mee, thou shalt haue this grace. And hauing thus animated them, hee was thought happie whom the old man would command, though it cost him his life: so that other Lords and his Enemies were slaine by these his *Assafines*, which exposed themselves to all dangers, and contemned their liues. Hereupon hee was esteemed a Tyrant, feared in all those parts; and had two Vicars one in the parts of *Damasco*, and another in *Curdistan*: which obserued the same order with young men. Hee vsed also to rob all which passed that way. *Vlan* in the yeare 1262. sent and besieged his Castle, which after three yeares liege they tooke; slue him and ruined his Paradise, not being able for want of victuall to hold out longer.

* It is likely that the *Assafines* mentioned in the eight & ninth Bookes were branches of this stock. Disciples of his Syrian Vicar: or this of them.

§. III.

Of Sapurgan, Balac, Thaican, Scassem, Balaxiam, Bascia, Chesmur,
Vochan, Samarchan, Carchan, Peym, the dreadfull De-
sart of Lop and Tanguth.

DEparting from the foresaid place, you come vnto a certayne Country pleasant enough, which hath Hills, Plaines, and excellent Pasture, and lastly, fruits in great plentie: for the soyle thereof is very fruitfull. This continues sixe dayes, and then you enter a Desart of fortie or fiftie miles, without water. After this you come to the Citie *Sapurgan*, where plentie of all victuall is found: especially, Pompons the best in the World, sweet like Honey.

The

Passing from thence, we came vnto a certayne Citie, named *Balach*, which in times past was great and famous, hauing sumptuous Marble Palaces: but now ouerthrowne by the *Tartars*. In this Citie they report, that *Alexander* tooke the Daughter of King *Darius* to wife. To this Citie (on the East and North-east) continue the Confines of *Persia*. But if you goe from hence, and proceed betweene the East, and the North-east, you cannot finde any Habitation for two dayes Journey: because the Inhabitants of the place hauing endured so many grieuances by Theeues and Robbers, are compelled to fflye vnto the Mountaynes, to wit, places of more safetie. Many waters are found there, and very much game of wild beasts: Lyons also are there. And because Trauellers find no food in that Journey, they carrie victuals with them, which may suffice them for two dayes.

That two dayes Journey ended, which we mentioned, we met with a certayne Castle, called *Thaican*; where is great plentie of Corne, and very goodly fields. The Mountaynes also on the South are high, some of which are of white and hard Salt, and the Inhabitants thirtie dayes Journey about fetch it from thence, being the best World, so hard that they must breake it with Iron Instruments, so much that the whole World may haue sufficient Salt from thence. The other Mountaynes haue store of Almonds and Pistaches. Going betweene the East and North-east from hence the Countrey is fruitfull, the Inhabitants Murtherers, Perfidious, *Mabumetans*, Drunkards: Their Wine is boyled and excellent. They goe bare-headed, saue that the men bind vp their heads with a certayne string of ten hanfuls long. But they make them clothing of the skinned of the wilde beasts which they take, as Breeches and Shooes, and vse no other Garments.

After three dayes Journey is the Citie *Scassem* seated in a Plaine, and hath many Castle, in the Mountaines round about it. A certayne great Riuer also floweth through the middle thereof. There are many Porcupines in that Countrey, which they hunt with Dogges by the Hunters: and they contracting themselues with great furie, cast their prickly Quills against the men and the Dogges, and wound them. That Nation hath a particular language: the shepherds thereof abide in the Mountaynes, hauing made Caues for their Habitation. You goe hence three daies Journey without any Habitation at all, to the Prouince *Balaxiam*.

Balaxiam is a *Mabumetan* Prouince, and hath a peculiar Language. Their Kings who succeed one another by hereditarie right, are reported to haue deriued their discent from *Alexander* the Great, and from the Daughter of *Darius*, and are called *Zulcarnen*, which is to say, *Alexander*. There are found the *Ballasces*, faire precious stones, and of great value. No man without danger of life, dare either digge such stones, or carrie them out of the Countrey, but with the licence and consent of the King: for all those stones are the Kings, and he sendeth them to whom he pleaseth, either for a Present, or payment of Tribute: he exchangeth also many for Gold and Siluer. And this hee doth lest the stone whereof there is such plentie should become viler and cheaper. Other Mountaynes also in this Prouince yeeld stones, whereof the best Azure is made, the like whereof is not found in the World. The Mines also yeeld Siluer great store, and Brasse and Lead. The Countrey it selfe is very cold. It hath many Horses, and those excellent, great, and swift, which haue so hard and strong hooves on their feet, that they need no Iron Shooes, although they runne through Rockes. It is said that not long since there were Horses of the Race of *Alexanders Bucephalus*, all with his forehead-marke, in the possession only of the Kings Vncle, who was slaine for denying the King to haue of them: whereupon his Widow in angry spite destroyed the whole Race. There are also excellent Falcons. The soyle thereof beareth notable Wheate, and Barley without huskes, and Oyle made of Nuts and Susimane, which is like to flaxe seed, more sauourie then other Oyle. There are strait passages and many stormie places. The men are good Archers and Huntsmen, clothed with beasts skinned. The hills are steepe and high, large plaines, Riuers amongst the ruptures; and if any haue an Ague with abiding two or three dayes on the hills he recouereth, which *Marco* procured in himselfe after a yeares sicknesse. The women in the skirts of their Garments put sixtie or eightie yards of Cotton, the greatest Bumse Boncer seeming the goodliest Lasse.

H

Bascia.

The Prouince *Bascia* is ten dayes Iourney toward the South, distant from the Countrey *Balaxiam*. And the Countrey it selfe is very hot: whereby it commeth to passe, that the people are browne: they are expert Magicians, and continually attend thereto. They haue a peculiar Language: and weare Golden and Siluer Eare-rings with Pearles and stones artificially wrought in them. They eate flesh and Rice, and are Idolaters, craftie and cruell.

Chesmur.

The Prouince *Chesmur* is seuen dayes Iourney distant from *Bascia*. The Inhabitants thereof haue a peculiar Language, and are Idolaters; beyond all others cunning Inchanters, forcing their Idols to speake, and darkning the day. They are the chiefeest Idolaters, and Idols are descended from them. From thence you may goe to the *Indian* Sea. The men and women are browne, not wholly blacke, the heate some-what tempered: their food is flesh and Rice, yet are they exceeding leane. There are many Cities and Townes there. Their King is tributarie to none. There are certaine Heremites in this Prouince, who in Monasteries and Cels worship Idols, honouring their Gods with great abstinence of meate and drinke, and obserue great Chastitie, are very cautious not to offend their Idols, and liue long. Of these are many Abbeyes, and the people giue them great reuerence. The men of this Prouince kill no quicke creatures, and shed no bloud: and if they will eate flesh, it is necessary that the *Saracens* which liue amongst them, kill the creature. Corall is here sold dearer then any where. Wee will leaue the way to *India* now and returne to *Balaxiam* and direct our way towards *Catay*, betwixt the East and North-east. Beyond *Balaxiam* is a certaine Riuer, whereon stand many Castles and Villages belonging to the King of *Balaxiam* Brother: and after three dayes Iourney is the Prouince *Vochan*, hauing in length and breadth three dayes Iourney. The Inhabitants thereof haue a peculiar Language, and worship *Mahumet*. They are good Liuers, stout Warriours, and good Hunters: for that Countrey aboundeth with wild beasts. If you depart hence betwixt the North-east and the East, you must ascend for three whole dayes together, vntill you come vnto an exceeding high Mountayne, then the which, there is said to bee none higher in the World. There also betweene two Mountaynes, a great Lake is found, whence by a Plaine runneth a very goodly Riuer, neere vnto which are excellent Pastures, so that in them a leane Horse, or an Oxe, may bee fatted in ten dayes. There is also plentie of wild beasts: especially, exceeding great wild sheepe, hauing hornes some of them sixe palmes or spans long, of the which they make diuers kinds of vessels. That Plaine contayeth twelue dayes Iourney in length, and is called *Pamer*; nor is there any humane Habitation there, and Trauellers must carry victuals with them. No Bird also appeareth there, by reason of the cold, and (it is reported for a Miracle) if fire be kindled there, it is not so bright nor so effectuell to boyle any thing, as in other places. From hence the way leadeth fortie dayes further, betweene the East and the North-east through the Mountaynes, Hills, and Valleys, in the which many Riuers are found, but no humane habitation, nor any herbe: and the Countrey it selfe is called *Belero*. Habitations of men are scene in the top of those high Mountaynes, but such as are sauage, wicked, Idolatrous; who liue by hunting, and are clothed with the skinnies.

Vochan.

Highest mountayne.

Pamer.

Belero.

Cafchar.

After this you come to the Prouince *Cafchar*, which is tributarie to the great *Cham* and a *Mahumetan*. In it are Vines, greene Gardens, fruitfull trees, Cotton, Flaxe, and Hempe, and a fertile soyle. The Inhabitants haue a peculiar Language, and are Merchants, and Artificers, who are so couetous that they eate that which is bad, and drinke worse. Some *Nestorian Christians* are found there, who also haue their Churches. The Countrey inlargeth it selfe fve dayes Iourney.

Samarshan is a great and famous Citie in that Countrey, where are goodly Gardens and a fertile Plaine. It is subiect to the Nephew of the Great *Cham*. In it the *Christians* dwell with the *Saracens*, whence little agreement is betwixt them. It is reported, that in this manner a Miracle hapned, the brother of Great *Cham*, named *Zagatai*, gouerned that Countrey, about one hundred yeares agoe, being perswaded to become a Christian, the Christians through his fauour built a Church, in honour of Saint *Iohn Baptist*, with such cunning that the whole Roofe thereof, was supported by one Pillar in the midst, vnder which was set a square stone, which by fauour of their Lord was taken from a building of the *Saracens*. *Zagathais* Sonne succeeded after his death in the Kingdome, but not in the faith: from whom the *Saracens* obtayned that the Christians should be compelled to restore that stone. And when they offered a sufficient valuable price, the *Saracens* refused to receiue any other composition then the stone. But the Pillar listed vp it selfe, that the *Saracens* might take away their stone, and so continueth.

Carchan.

Wennes by bad waters happen also in the *Alpes*. *Cotam* the name of a Prouince and chiefe Citie.

Departing againe from this Citie, you come into the Prouince *Charchan*, about fve dayes Iourney in length. This Prouince hath plentie of all victuals, beeing subiect to the Dominion of the Nephew of Great *Cham*. The Inhabitants worship *Mahumet*, yet among them certaine *Nestorian Christians* dwell. They are great Artificers, and haue most of them great legges, and a great Wenne or Bunch in the throat, by reason of the waters which they drinke.

The Prouince *Cotam* followeth betweene the East and the North-east. It is subiect to the Dominion of the Nephew of Great *Cham*, and hath many Cities and Townes. The chiefe Citie thereof is called *Cotam*. The Prouince is extended eight dayes Iourney in length. There is no want therein of any thing, appertayning to the maintenance of life. It hath plentie of Cotton,

ton, Flaxe, Hempe, Corne, and Wine. But the people are not warlike, yet good Artificers and Merchants. They acknowledge *Mahumet*.

Proceeding further through the same Countrey, you meet with the Prouince *Peim*, extended five dayes Iourney in length. It is subiect to Great *Can*, and hath many Cities and Castles. The chiefe Citie thereof is called *Peim*, neere which runneth a Riuer, wherein precious stones are found, to wit, Iasper stones and Chalcedonie. The Inhabitants of the Countrey worship *Mahumet*, and are Artificers and Merchants. There is a custome in this Prouince, that when any married man goeth into another place and returneth not home within twentie dayes, it shall be lawfull for the Wife to marrie another Husband, and the men also wheresoeuer they goe doe the like. All those Prouinces aforesaid, to wit, *Caschar*, *Cotam*, *Peim*, to the Citie of *Lop*, are in the bounds of Great *Turkie*.

Peim.

Adulterous custome. Great *Turkie*, or *Turcomania*.

Ciarcian.

Ciarcian is subiect to the *Tartars*, the name of the Prouince and chiefe Citie, it hath many Cities and Castles. Many precious stones are found there in the Riuer, especially Iaspers and Chalcedonies, which Merchants carrie euen to *Ouchach* to sel, and make great gain. From *Peim* to this Prouince, and quite thorow it also, it is al Sand, with many bad waters and few good. When any Armie passeth through this Prouince, all the Inhabitants thereof with their Wiues, Children, Cattel, and all their household stuffe, flie two dayes Iourney into the sands, where they know good waters are, and stay there: and carrie their Corne thither also to hide it in the sands after Haruest for like feares. The wind doth so deface their steps in the sand, that their Enemies cannot find out their way. Departing from this Prouince, you are to trauell five dayes Iourney thorow the sand, where no other water almost then that which is bitter is to be found, vntill you come vnto the Citie named *Lop*.

Lop is a great Citie, from whence is the entrance of a great Desart, called also *Lop*, seated betweene the East and the North-east. The Inhabitants are *Mahumetans*, subiect to the Great *Can*. In it Merchants who desire to passe ouer the Desart, cause all necessities to be provided for them. And when victuals beginne to faile in the Desart, they kill the Asses and Camels and eat them. They most willingly vse Camels, because they are sustayned with little meate, and beare great burthens. They must prouide victuals for a moneth to crosse it ouer-thwart; for to goe thorow the length, would aske a yeares time. They goe thorow the sands and barren Mountaines, and daily find water, yet is it sometimes so little, that it can scarcely suffice fiftie or one hundred men with their beasts: and in three or foure places the water is salt and bitter: the rest (which are eight and twentie) good. In it are neither beasts nor birds. They say that there dwell many spirits which cause great and meruailous Illusions to Trauellers to make them perishe. For if any stay behind that he cannot see his company, he shall be called by name, and so going out of the way is lost. In the night they heare the noyse as it were of a company, which taking to bee theirs they perish likewise. Other apparances as of their companions, or of enemies haue caused some to miscarrie. Consorts of Muscical Instruments are sometimes heard in the Ayre, likewise Drummes, and noyses of Armes. They goe therefore neere together, hang Bels on their beasts neckes, and set markes if any stay.

Illusions of Deuils. It seemeth that the compasse was not then found out, which of later times they vse in Desarts, as in the Sea.

Sachion.

Tanguib.

Having passed ouer the Desart, you come vnto the Citie *Sachion*, betwixt the East and North-east, subiect to the Great *Can*, in the Prouince of *Tanguib*, where among the Worshippers of *Mahumet*, a few *Nestorian* Christians are found. Many Idolaters are also there, who haue their proper Language. The Inhabitants of this Citie, liue not of Merchandize, but the fruits of the Earth. This Citie hath many Monasteries, consecrated to diuers Idols, in the which many Sacrifices are offered, and great reuerence. And when a Sonne is borne vnto a man, hee presently commendeth him to some Idoll, and in honour thereof, nourisheth a sheepe that yeere in his house, which he presenteth before it together with his Sonne, the next Festiuall Day of that Idoll, with many Ceremonies and great reuerence. Afterward the flesh of the sheepe is boyled, and left so long before the Idoll, while their Prayers are finished, which they make for the conseruation of their Sonne, and the Idoll hath sucked out the saueur of the meate, after which their fancie all his kindred being gathered together, eat that flesh at home with great deuotion and ioy: but orderly keepe the bones in certayne vessels. The Priests haue the feete, head, inwards, skinn, and some part of the flesh for their share. In celebrating the Funerals of such as were of esteeme, the dead bodies are burned after this manner. The kindred send for the Astrologers, and tell them what yeare, moneth, day, and houre, hee who dyed was borne: who perceiving the constellation, declare the day when hee is to be burned: so that when the Planet fits not, they reserue the dead bodie sometimes seuen dayes, and sometimes fixe monethes, preparing a Chest for it at home, and ioyning the sides together with such cunning Art, that no stinke can issue forth. They also imbalme the bodie it selfe with Spices, and couer the Chest fairely painted with a costly cloth: and euery day that the dead corps is kept at home, at the houre of Dinner, a Table is prepared neere the Chest, setting wine and meate thereon for the space while one might well eat a meales-meate, supposing that the soule of the dead, feedeth of the saueur thereof. The Astrologers sometime forbid to carrie it forth at the chiefe gate, pretending some disastrous starres thereto, and cause them to carrie it out another way, and sometimes breake the

The Sacrifice of the Birth-day. The Rites of Funerall. Astrologers.

wall which is opposite to that place which the Planet makes more luckie; for otherwise the spirits departed would bee offended and hurt those of the house. And if any such euill happen, they ascribe it to the dead thus wronged. When the bodie is carryed through the Citie to be burned without, wooden Cottages are erected in the way, with a porch couered with Silkes, in which they set the bodie, and set before it Bread, Wine, and Flesh, and Delicate Cates, supposing the spirit to be refreshed therewith, which must bee presently present at the burning of the bodie.

And when they come vnto the place of burning, they write and paint vpon Papers made of the barks of Trees, the Images of Men and Women, Horses, Camels, Money, and Garments. (All the Instruments of the Citie meane-while resounding) all which are burned together with the dead bodie. For they say, that that dead man shall haue so many Men-seruants, and Mayd-seruants, Cattell, and Money, in another life, as resemblances, and Pictures were burned together with him, and shall perpetually liue in that honour and riches.

The Prouince *Chamul* lyeth in the great Prouince *Tanguth*, subiect to the Great *Can*, hauing many Cities and Townes: the chiefe Citie is called *Chamul*. The Land butteth vpon two Desarts, to wit, the great Desart, whereof wee haue spoken before, and a certaine other, that is lesse, of three dayes Iourney. It aboundeth with such things, which a man needeth for the sustentation of life. The Inhabitants are Idolaters, haue a peculiar Language, and seeme to bee borne for none other purpose, but to apply themselves to sporting, singing, dancing, writing and reading after their fashion, playing on Instruments, and to giue themselves delight. When any Traueller passing by, turneth into any mans house for entertaynment, the Master of the Family receiueth him with great ioy, and commandeth his Wife and all the Family, that they as long as he will abide with them, obey him in all things. In the meane space, he departeth not to returne so long as the Guest remaineth in his house. And meane-while hee lyeth with the Wife, Daughter, and the rest, as with his owne Wiues. The women of that Countrey are beautifull, and readie to obey all those Commandements of their Husbands, who are so besotted with this folly, that they thinke it a glorious thing for them, and acceptable to their Idols, for which they prosper with plentie of all things. *Mangu Can* hauing heard of this folly, commanded them to obserue this detestable custome no longer; which they did about three yeares, and then seeing not their wonted fertilitie, and troubled with some Domesticall crosses, sent Ambassadors to the *Can*, and instantly entreated, that he would reuoke so grievous an Edict, and not abolish that Tradition which they had receiued from their Elders. The *Can* answered, seeing you desire your reproch and shame, let it be granted you. Goe and doe herein after your wont. The Messengers returning with this Answer, brought great ioy to all the people: this custome is obserued by that people vntill this day.

After the Prouince of *Camul*, followeth the Prouince of *Chinchintalas*, which on the North boundeth vpon the Desart, and is sixteene dayes Iourney in length, subiect to the Dominion of Great *Cham*. It hath Cities and many Castles. The people thereof are diuided into three Sects. Some few acknowledge Christ, and these are *Nestorians*: others worship *Mahomet*, the third, adore Idols. In this Prouince there is a Mountaine where are Mines of Steele and Andanicum, and also Salamanders, of the which cloth is made, which, if it bee cast into the fire, cannot bee burned. But that cloth is made of the Earth in this manner (as one of my companions, a *Turke* named *Curcifar*, a man indued with singular industrie, informed me) who had the charge of the Minerals in that Prouince. A certaine Minerall of Earth is found in that Mountayne, which yeeldeth threeds, not vnlike to Wooll, which being dryed in the Sunne, are bruised in a brazen Morter, and afterward washed, and whatsoever earthy substance cleaueth vnto them, is taken away: lastly, those threeds so purged and made small, are spunne like other Wooll, and wouen into cloth. And when they will whiten those clothes, they cast them into the fire for an houre, and then they are taken out of the flaming fire vn timer, whiter then Snow. After the like manner they cleanse them, when they haue taken any spots: for no other washing is added to them, besides the fire. But touching the Salamander, the Serpent, which is reported to liue in the fire, I could search out nothing in the East Countries. They say, there is a certayne Napkin at *Rome*, wouen of the Salamander, wherein the Handkerchiefe of the Lord is kept wrapped vp, which a certayne King of the *Tartars* sent vnto the Bishop of *Rome*.

After you are past this Prouince, you go betwixt the East and North-east ten dayes Iourney, in which few Habitations or things remarkable are found; and then you come to the Prouince *Succuir*, which hath many Habitations and Townes. The chiefe Citie thereof is called *Succuir*. In this Prouince, among many Idolaters, a few Christians are found: they are subiect to the Great *Can*. They apply not themselves to Merchandize, but liue of the fruits of the Earth. The best Rhubarbe is found in great quantitie in this Prouince, which is carryed thence by Merchants, to diuers parts of the World. Strangers dare not go to the Mountaynes where it growes, by reason of venemous herbs, which if their beasts should eate them would lose their hooves; but those of that Countrey know and auoyd them. The generall name of this Prouince, and of the two following is *Tanguth*.

Iouiall Lads.

Bawdes to
their owne
Wiues.

these parts.

Campion

Campion is a great Citie, the principall in the Countrey of *Tanguth*. In it are *Christians* (which haue there three great and faire Churches, *Mahumetans*, and *Idolaters*. The *Idolaters* haue many Monasteries, where they worship their Idols. Moreouer, those Idols are made either of stone, wood, or clay, some ouer-layed with gold, and very artificially wrought. Among these, some are so great, that they contayne ten paces in length, fastned to the earth, as if they lay vpright, neere vnto the which, little Idols are placed, which seeme to giue reuerence to the greater, and both are much reuerenced. The Religious men seeme to liue more honestly then other *Idolaters*, abstayning from certaine things, as Lecherie, and other things; although Lecherie seemes no grieuous sinne: for they say, if a woman seekes for lue to a man, he may vse her without sinne, but not, if he seekes first to her. They reckon the whole circuit of the yeere by Moones. In these Moones, they obserue siue, or foure, or three dayes, wherein they kill no Beast, or Bird, nor eat Flesh (as is the vse with vs on Friday, Saturday, and Vigils.) The Lay-men marrie twentie or thirtie wiues, as they are able to maintayne: yet the first is accounted the more worthie, and more legitimate. The husband receiueth no dowrie from the wife, but hee himselfe assigneth conuenient dowrie, in Cattell, seruants, or money, according to his abilitie. If the wife become hatefull to the husband, it is lawfull for him to diuorce her from him, as he pleaseth. They take for wiues their Kins-women or Mothers in law. *Marco*, together with his Father, and Vncle, remayned a yeeres space in this Citie, for the dispatch of certaine affaires.

Ezina.

From the Citie *Campion*, you goe twelue dayes iourney to the Citie *Ezina*, bordering vpon a sandy Desart towards the North, contayned in the Prouince of *Tanguth*. Many Camels are there, and many other beasts; and Hawkes of diuers kinds. The Inhabitants are *Idolaters*, liuing of the fruits of the Earth, forbearing merchandise.

§. II. III.

Of *Carchoran*, the Originall proceedings and exploits of the Tartars; of Priest *IOHN* and his discendants. Customes of the Tartars. Of *Bargu*, *Erginul*, *Xandu* the Cans Citie and Palace; of *Muske*: of strange Sorcerers, and austere Monkes.

All the Prouinces and Cities aforesaid, *Sachion*, *Chemul*, *Chinchitalas*, *Succuir*, *Campion*, and *Ezina*, pertaine to *Tanguth*. Hauing passed ouer the foresaid Desart, you come vnto the Citie *Carchoram*, which is in circuit three miles, strongly rampierd with earth, for they want stone. Neere it is a great Castle, and in it the *Gouernors* faire Palace. This was the first place neere which in old times the *Tartars* assembled themselves. And now we will declare how they began to raigne. They dwelt in the North parts, to wit, in *Ciorza* and *Bargu*, where are many and great Playnes without Cities and Townes, but goodly Pastures, Riuers and waters. They had not a Prince of their Nation, but payed tribute to a certayne great King, named as I haue heard, in their language *Vmcan*, which in some mens opinion in our tongue signifieth, *Presbyter* (or Priest) *Iohn*. To him the *Tartars* gaue yeerely the tenths of all their beasts. In proesse of time, the *Tartars* so encreased in multitudes, that *Vmcan* was afraid of them, and thought to disperse them into seuerall parts of the world. And therefore when any rebelled he sent three or foure of an hundred of the *Tartars* into those parts, so diminishing their power; and the like he did in his other occasions, deputing some of their principals to that purpose. They seeing their ruine intended and loth to be separated one from another, went from the places where they dwelt to the Desart towards the North, where by remotenesse they might be safe, and denyed to *Vmcan* their wonted Tribute.

Carchoran, vide
Rubr. of *Cavacum*.
The originall
of the Domi-
nion of the
Tartars.

It hapned that about *An. 1162.* the *Tartars* hauing continued some time in those parts, chose a King among themselves, a wise and valiant man, named *Cingis Can*. He began to reigne with such iustice, that he was beloued and feared of all as a God rather then a Prince, in somuch that his fame brought all the *Tartars* in all parts to his subiection. And hee seeing himselfe Lord of so valiant men would needs leaue those Desarts, and commanding them to prouide Bowes and other weapons, began to subdue Cities and Prouinces, in which Conquests hee placed such iust *Gouernours*, that the people were not offended. The chiefe of them hee carried alongst with him with great prouisions and gifts. Seeing therefore that he was aduanced to so great glorie, and power, he sent Embassadors politickly to *Vmcan* to intreate, that he would bestow his daughter vpon him to be his wife. Which he taking, in very euill part, answered with indignation, and reiecting the Embassadors of *Cingis*, said, doth my seruant demand my daughter? Get ye out of my sight and tell your Master, if he euer make such demand againe, I will make him die a miserable death. But King *Cingis*, leuying a great Armie, went forth with an hostile minde, and incamped in a certaine great Plaine, named *Tanduc*, sending vnto the King, and signifying vnto him, that he should defend himselfe. But he, comming with a mightie Armie, descended to the Playnes, and pitched his Tents within ten miles of the Campe of the *Tartars*. Then *Cingis* commanded his Astrologers to shew him, what euent and successe the battell should haue. They cutting a Reed

lengthwise in two parts, set the pieces themselves into the ground, and wrote vpon the one, *Cingis*; and on the other, *Umcan*; and said vnto the King: In the meane space, while we reade the Coniurations, it shall come to passe by the Idols power, that these two parts of the Reed shall fight together: And whose part shall ascend vpon the other, that King shall obtayne victorie in the battell. The multitude therefore running together to behold that spectacle, the Astrologers beganne to mumble their prayers, and reade their inchantments, when presently the parts of the Reed being moued, fought together, yntill at length the part of *Cingis* ascended vpon the part of *Umcan*. Which being seene, the *Tartars* assured of the future victorie, were encouraged to the battell, and *Umcan* being slayne, the Victorie, and Kingdome, and *Umcan's* daughter remayned to *Cingis*. *Cingis* reigned sixe yeeres after this, in the which hee got many Prouinces: and lastly, when he endeouored to winne a certaine Cattle, called *Thaigin*, and came somewhat neere, being shot in the knee with an Arrow, he died, and was buried in the Mountaine *Altai*.

The first King of the *Tartars*, was called *Cingis*; the second, *Cyn Can*; the third, *Bathyn Can*; the fourth, *Esu Can*; the fifth, *Mongu Can*; the sixth *Cublai Can*, whose power is greater then all his Predecessors, hauing inherited theirs, and adding by Conquest in manner the rest of the World. For he liued neere sixtie yeeres in his Government. The name *Can* signifieth Emperor. All the great *Cans*, and Princes of that bloud of *Cingis*, are carried to the Mountaine of *Altai* to be buried, wheresoeuer they die, although one hundred dayes journey from it. And they which carrie the Corpse to the buriall, kill all those that they meet in the way, saying: goe, and serue our Lord the King in another life. They kill also the better Horses. When the bodie of great *Cham Mongu*, the Predecessor of *Cham Cublai*, was brought vnto the Mountaine *Altai* to bee buried, the Souldiers accompanying the funerall, are reported to haue slayne aboue ten thousand men, vpon the foresaid occasion.

The *Tartarean* women are most faithfull to their husbands. Adulterie is a great shame with them: yet it is accounted lawfull, and honest, that euery one may marrie as many wiues as he is able to maintayne, although the first be iudged to be more principall and honorable then the rest. These liue together in the same house without one ill word, in admirable concord, make their merchandises, buy, and sell, and chaffer all things necessarie to their husbands and households, the men medling with nothing but their hunting, hawking, and things pertayning to Armes. They haue the best Falcons in the World, and so they haue of Dogs. They liue onely of Flesh and Milke, and what they take in hunting. They eat Horses, Camels, Dogs, if fat; and drinke Mares milke, called *Chemurs*, so vsed, that it is like white Wine. If the father dies, the sonne may haue all his wiues except his owne mother and sisters. So, the brother being dead, it is lawfull for the brother who remayneth alieue, to marrie the widdow of the brother. The husbands receiue no dowrie from the wiues, but they themselves assigne dowry to the wiues, and their mothers. Through the multitude of wiues, the *Tartars* haue many children. Nor is the multitude of Wiues very burdensome vnto the *Tartars*, seeing they gaine much through their labours. Besides, they are very carefull for the gouernement of the familie, and preparation of food: and with no lesse care, execute the other duties of the house. But the men apply themselves wholly to hunting, fowling, and exercise of Armes. The *Tartars* nourish many herds of Oxen, flocks of Sheepe, and other Beasts, and Cattell, and abide with them in places of Pasture, in the Summer time, in the Mountaines, and colder places, where they finde Pasture and Wood; but in the Winter, they remoue vnto the hotter Countreyes, where they finde Pasture for their Cattell: and goe forth on two or three moneths together. Their houses are couered with stickes and felts, ordinarily round, which they carrie with them on Carts or Waggones of foure wheelles, whithersoever they goe. For they can fold and extend them, set them vp, and take them downe: and they turne the doore of them alwaies to the South. They haue also neat Carts of two wheelles (couered with Felt so well that rayne cannot pierce them) drawne by Oxen, and Camels, wherein they carrie their wiues, children, and necessarie household-stuffe with them, and defend them from the iniurie of foule weather, and rayne.

The *Tartars*, if they be rich, are clothed with Sables, Ermins, and Cloth of gold, and all their furniture is costly. Their Armes are Bowes, Swords, Polaxes, and some Lances, but they can best vse their Bowes, whereto they are vsed from their childhood. They are hardie, valorous, cruell, will continue two dayes and nights on horse-backe armed; exceeding patient of difficulties, and exceeding obedient to their Lords. Their Cattell also are hardie.

The Law and Faith of the *Tartars* is this. They say, that there is a great God, high and heauenly, of whom with daily incense they desire good vnderstanding and health. They haue another, which they call *Natigay*, which is like an Image couered with Felt, or some other thing, which euery one hath in his house. To this God they make a wife and children, placing the wiues Image at the left hand, and the representations of children before his face. This they call, The God of earthly things, which keepeth their Children, and their Beasts, and Corne; and giue it great reuerence. Before they eat themselves, they anoint the mouthes of the Images with the fat of the foddren Flesh, and they cast the broth out of doores, in honour of other Spirits.

Spirits, saying, that their God with his familie haue had their part; and after they eate and drinke at pleasure.

If the sonne of any *Tartar* die, who hath not yet beene married, and also the daughter of another die vnmarrried, the parents of both the deceased parties meet together, and make a marriage betweene the dead: and making a draught in writing, of that contract, they paint men and women for seruants, Horses and other creatures, with clothes of all sorts and moneyes, in paper, and burne them together with the writing of contract; by the fumes whereof, they say that all these things are carried to their children in another world, where they are married, and the fathers and mothers thinke they are ioyned together through such a bond of affinitie, as if those marriages had beene celebrated, while the married couple yet liued.

When the *Tartars* goe to warre, their Prince conducteth about one hundred thousand Horse, appointing Heads ouer tens, hundreds, thousands, ten thousands, by which orderly subordination, commands are easily effected. Every hundred is called a *Tuc*; ten, a *Toman*. When they set forth they send out men euery way, as Scouts that no *Enemie* may assault them vnprovidd. Of Horse and Mares, there are for euery man about eightene. They carrie also their like Felt houses, vnder the which they shelter themselves in the time of rayne. When there falls out some important employment, they will ride ten dayes together without victuals boyled, and liue of the blood of their Horses, cutting a veyne and sucking it. They haue Milke dried like Paste, which they make, boyling the Milke, and taking the Creame which swims on the top, put it in another vessell, and thereof make Butter: After, they set the Milke in the Sunne, and drie it; and when they goe in the Armie, carrie ten pounds thereof, and euery morning take halfe a pound, and put it into a little Flaske or Bottle of Leather, with as much water as he pleaseth: which while he rides, beats together: and this is his dinner. When they encounter with their Enemies, they ride here and there shooting, and sometimes make shew of flight, shooting as they flee, and finding the Enemies broken, reintegrate their forces, and pursue the victorie: hauing their Horses at command, with a signe to turne any way. But now the *Tartars* are mixed in diuers parts, and so are their fashions.

They punish malefactors after this manner. If any steale a thing of small value, and hath not deserued to be deprived of life, he is seauen times beaten with a Cudgell, or seauenteene, or seauen and twenty, or thirty seauen, or forty and seauen, giuing the strokes according to the measure and qualitie of the offence, and that vnto an hundred; some doe often times dye, through these strokes. But if any haue stollen an Horse, or another thing, for the which hee deserueth to dye, he is cut asunder with a Sword in the middle: but if hee will redeeme his life, he shall restore the theft nine fold. Such as haue Horses, Oxen or Camels, brand them with their markes, and send them to the pastures without a keeper.

Leaving the Citie of *Carachoran*, and the Mountaine *Altai*, you come vnto the champaine Countrey of *Bargu*, which extendeth it selfe Northwards about fixtie dayes iourney in length. The Inhabitants of those places are *Mecrits*, and they are subiect to great *Chan*, vsing the manners of the *Tartars*. They are wilde men, and eate the flesh of Beasts which they take by hunting, especially of Stagges, whereof they haue great plentie, and they make them so tame, that they may ride them: They want Corne and Wine. In the Summer they exercise great hunting and taking of wilde Beasts and Fowle, with the flesh whereof they may liue in the winter: For in Winter, as well fowle as other liuing creatures flie from thence, by reason of the exceeding and vntolerable cold of that Countrey. After the end of fortie dayes iourney, you come vnto the Ocean, neere which is a Mountaine where *Astori*, and strange Falcons breed, which are carryed thence vnto the Court of great *Chan*.

Heere we must returne vnto the Citie *Campion*. If therefore you proceed further five dayes iourney from the Citie *Campion* towards the East, (in the places lying in the middle, horrible voyces of Devils are heard in the night time) you come to the Kingdome *Erginul*, in the Prouince of *Tangut*, subiect to the great *Chan*. In this Kingdome are many other Kingdomes which are Idolators. There are some *Nestorian* Christians, and *Turkes*. There are many Cities and Castles, of which *Erginul* is chiefe. From hence, if you proceed further to the Southeast, you may goe to the parts of *Cathai*, going Southeast towards *Cathai*, there is a certaine famous Citie named *Cinguy*, (the name also of the Prouince) tributarie vnto great *Chan*: contained in *Tangut*: the people are some Christians, some *Mahumetans*, others Idolators. Their are also found wilde Oxen, neere as great as Elephants, very faire, hauing white and blacke hayre; short in other parts, and on the shoulders three palmes long, fine and white beyond like: of which *Marco* brought some to *Venice* as a rare thing. Many also of these Oxen are tamed, and made to engender with tame Kine, and the breed of them are fitter for businesse then any other creatures, beare great burthens, are yoaked to the plow, and doe twise as much as others. The best Muske in the world is found in this Prouince, and is of a goodly beast of the bignesse of a Goat, hauing grosse hayre like a Stagge, feet and tayle like a *Gazella* but without hornes; it hath foure teeth, two aboue, and two beneath, of the length of three fingers, subtle; and white as Iuorie, and is a faire beast to see to, when the Moone is at full; neare the nauill vnder the belly there growes

to this beast an impostume or bladder full of blood, and at the full then they goe to hunt the said beasts and take away that swelling, which is dryed in the Sunne, and is the best Muske: the flesh also is good to eate. Master *Marco* brought to *Venice* the head and feet of this beast dryed. The men liue of Merchandise and Arts, and haue abundance of Corne: they are Idolaters, of a fat body and a little Nose, blacke hayred, hauing no beard but foure hayres on their chin. The women are faire and white. And when the men desire to marry wiues, they rather seeke the beautifull, then the noble or rich. Whereby it commeth often to passe, that a great and Noble man marryeth a poore wife, but beautifull, assigning dowrie to her mother there. This Prouince extendeth it selfe fise and twentie dayes iourney in length, and is very fertile. In it are exceeding great Feasants, hauing traynes eight or ten handfuls long. Many other kindes of Birds are also found there, which haue very goodly feathers, distinguished with diuers and excellent colours.

Egrigai.

Proceeding further towards the East, after eight dayes iourney, you meet with the Prouince *Egrigai*, in the which are many Cities and Castles, all still in *Tanguth*. The principall Citie is called *Calacia*. The Inhabitants thereof are Idolaters, there are three Churches of *Nestorian* Christians, and are subiect to the great *Chan*. In the Citie *Calacia*, Chamlets are made, wouen of white wooll and the hayre of Camels, then the which, there are scarce any fairer found in the world.

Mares milke.

Going to the East from the Prouince *Egrigai*, the way leadeth vnto the Prouince *Tenduch*, in the which are many Cities and Castles: where also *Presbyter Iohannes* vsleth to abide, who now payeth tribute to great *Chan*. This King of that progenie of *Priest Iohn* is named *George*, and is a Priest and a Christian, and most of the people are Christians. All the Great *Chans*, after his death who was slaine in battell by *Cingis*, gaue their Daughters to those Kings to wife. This King *George* holds not all that *Priest Iohn* before held, and is the fourth of that progenie. There is a Nation there called *Argon*, more goodly men and fitter for Merchandise then the rest, descended of Idolaters and *Mahumetans*. There are also two Regions where they raigne, which in those parts are called *Og* and *Magog*, but they which dwell there call them *Vng* and *Mongul*: in *Vng* are *Gog*, and in *Mongul* the *Tartars*. Riding East seauen dayes towards *Catay*, are many Cities peopled with Idolaters, *Mahumetans*, and *Nestorians*. There is one Citie called *Sindicin*, where very faire and excellent Armes are made of diuers sorts, fit for Armies. In the mountaines of this Prouince are great Mines of siluer, and manifold game of wilde beasts, and the Countrey of the mountaines is called *Idifa*. Three dayes iourney distant from the foresaid Citie, standeth another Citie *langamur*, that is *White Lake*, wherein is a Palace, in which the great *Chan* most willingly remaineth, becaue there are many Lakes and riuers, many Swannes, and in the plaines, Cranes, Feasants, and Partridges, and store of other fowle. There are fise sorts of Cranes there: some haue blacke wings like Crowes, others are white and bright, hauing their feathers full of eyes like Peacocks, but of a golden colour, the necke blacke and white very beautifull; a third sort of bignesse not vnlike ours; a fourth, little and very faire, intermingled with red and blew colours; the fifth, of a grizell or gray colour, hauing red and blacke heads, and these are very great. And neere vnto this Citie lyeth a certaine valley where many Cottages are, in the which an exceeding number of Partridges is maintained, which are kept for the King, comming to lodge there for a time.

This Citie is three dayes iourney Northeastward to the Citie *Xandu*, which the great *Chan* *Cublay* now raigning, built; erecting thereing a maruellous and artificall Palace of Marble and other stones, which abutteth on the wall on one side, and the midst of the Citie on the other. He included sixteene miles within the circuit of the wall on that side where the Palace abutteth on the Citie wall, into which none can enter but by the Palace. In this inclosure or Parke are goodly meadowes, springs, riuers, red and fallow Deere, Fawnes carryed thither for the Hawkes, (of which are there mewed about two hundred Gerfalcons which he goeth once a weeke to see) and he often vsleth one Leopard or more, sitting on Horses, which hee setteth vpon the Stagges and Deere, & hauing taken the beast, giueth it to the Gerfalcons, and in beholding this spectacle he taketh wonderfull delight. In the midst in a faire Wood hee hath built a royall House on pillars gilded and vernished, on euery of which is a Dragon all gilt, which windeth his tayle about the pillar, with his head bearing vp the loft, as also with his wings displayed on both sides: the couer also is of Reeds gilt and vernished, so that the rayne can doe it no iniurie, the reeds being three handfuls thicke and ten yards long, split from knot to knot. The house it selfe also may be sundred, and taken downe like a Tent and erected againe. For it is sustained, when it is set vp, with two hundred silken cords. Great *Chan* vsleth to dwell there three moneths in the yeare, to wit, in Iune, Iuly, and August. On the eight and twentieth day of August, he departeth to make a solemne sacrifice. He hath an herd of white Horses, and white Mares, about ten thousand of the milke whereof none may drinke except hee be of the progenie of *Cingis Can*, except one family, called *Boriat*, priuiledged hereto by *Cingis* for their valour. And these beasts as they goe vp and downe feeding are much reuerenced, nor dare any goe before them or hinder their way. The Astrologers or Sorcerers tell *Chan* that on the twentieth eight of the Moone of August, he

he should disperse that milke heere and there, for the honour of all spirits and his Idols, that they might be carefull preservers of all those things which he possesseth.

There are two sorts of Idolaters, Sorcerers called *Thebeth* and *Chefmir*, which in the midst of stormes ascend the Palace and suffer no rayne to fall thereon; which they make the people beleue comes to passe by their sanctitie: and therefore they goe slovenly and regardlesse of their persons, neuer washing nor combing themselves. They also haue a horrible custome to dresse and eat such as are condemned to death, but not those which dye naturally. They are called also *Bachsi*, which is the name of their Order, as Friars Predicants or Minors with vs. They seeme by Magicke to doe what they list, when the great *Can* in his Hall sits at his Table, which is eight yards high: and in the midst of the hall a good distance from the table is a great Cupboard of plate furnished: They cause that the peeces full of Wine or Milke, or other viands of themselves, fill the goblets without any hand touching them, and goe ten paces in the ayre into the great *Cans* hand; and when he hath drunke, returne to their place. This they doe in the presence of any man, when their Lord commands. These *Bachsi* also when they will make feasts to their Idols, goe to the *Can* and say; Sir, know that if our Idols be not honoured with Sacrifices, they will bring plagues to Corne and Beasts. And therefore wee pray you to giue the flesh of so many Sheepe with blacke heads, and so many pounds of Incense and Lignum aloes, that we may make them due sacrifice and honour. This they speake not to him themselves, but by certaine Lords deputed to that Office, who speake to the *Can* and obtaine it. On the feast day they sacrifice the said beasts, and sprinkle the broath before the Idols.

The Kings
Magicians.

They haue great Monasteries some of the bignesse of a Citie, in some of which are about two thousand Monkes which serue Idols, sequestred from the Laitie in their shauing and garments. For they shau their heads and beards, and were a religious garment. These in the solemnities of their Idols sing with solempne songs and lights, some of them may marry. There are some of great abstinence called *Sensim*, leading an austere life, for they eat nothing but Meale mingled with water till all the Flower be gone, and eat the branne without any saour. These worship the Fire; and the men of other rules say that these which are so austere, are Heretikes against their Law, because they worship not Idols as they doe; and there are great differences betwixt them: and these marry not in any case. They shau their Head and Beard: they weare blacke hempen garments, and bright yellow. They sleepe in thicke Mats, and liue the seuerest life in the world.

Shauings.

Austereitie.

§. V.

of *CUBLAI CAN*, his Raigne and Acts, Magnificent feasts and Huntings, Court and Counsell. His Citie Cambalu and glorious Palace.

IN this Booke I purpose to write of all the great and maruellous Acts, of the present *Can* called *Cublai Can*, which is in our Tongue Lord of Lords, the greatest Prince in peoples, Cities and Treasures, that euer was in the world. Hee being descended from the Progenie of *Chingis*, the first Prince of the *Tartars*, is the sixth Emperour of that Countrey, beginning to raigne in the yeare of our Lord 1256. being twentie leauen yeares old, and ruling the people with great wisdome and grauitie. He is a valiant man, exercised in Armes, strong of bodie, and of a prompt minde for the performance of matters, before he attained to the dignitie of the Empire (which by his wisdome he did against the will of his Brethren) he often shewed himselfe a valiant Souldier in the warres, and carryed himselfe like a wiser and bolder Captaine, then euer the *Tartars* had. But since he swayed the Kingdome, he went but once into the Field, but sends his Sonnes, and other Captaines in expeditions.

In the yeare of our Lord 1286. his Vncle named *Naiam*, being thirtie yeares of age, and hauing the command of many people, and Countries, so that hee was able easily to bring together foure hundred thousand Horie. Being puffed vp through youthfull vanitie, would now no longer be subiect, but would needs take away the Kingdome from his Lord *Cublai*, and sent to another great Lord named *Caydu*, Lord of the parts towards great *Turkie*, who was nephew of the Emperour *Cublai*, yet hated him, who yeelding consent to Rebellion, promised to come in proper person with an hundred thousand Horse.

Both of them began to gather Forces, which could not bee done so secretly but *Cublai* heard of it, and presently tooke order to set guard to the wayes that no intelligence might passe that way: and then assembled all the Forces within ten dayes journey of *Cambalu* with great speed, so that in twentie dayes, were gathered together three hundred & sixtie thousand Horse, and one hundred thousand Foot, a great part of them Falconiers and men of his Household. With these hee made all haste day and night towards *Naiams* Countrey, where at the end of twentie five dayes he arriued, altogether vnlooked for: and rested his men two dayes. Then hee called his

Caydu.

Astrologers, and caused them before all the Armie to diuine who should haue victorie (a thing they alway vse to incourage their men) and they promised it to *Cublai*. One morning whiles *Naiam* was sleeping negligently in his Tent, hauing not so much as sent out any scouts to espie, *Cublai* made shew of his Armie vpon a hill to *Naiams*. Hee himsele late in a certaine Castle of wood, full of Archers and Crosse-bow men, borne by foure Elephants; on the top whereof was the Royall Standard with the Images of the Sunne and Moone. Hee deuided his Armie into three wings, of which he sent that on the right hand and the other on the left against *Naiams* Armie: To euery ten thousand Horse were assigned fise hundred Foot with Lances, taught to leape vp behind the horse-men if any occasion of flight happened, and suddenly on aduantage to light and slay the enemies horses with their lances. *Caidu* was not yet come. The battels ioyned and made a cruell fight, which continued from morning till noone: and then was *Naiam* taken and brought before *Cublai*, who commanded that he should be sewed betwixt two Carpets, which should be tossed vp and downe till the breath were out of his bodie, that so the Imperiall blood might not be exposed to the Sunne and the ayre. The remainder of his people sware Obedience to *Cublai*, which were foure Nations, *Ciorza*, *Carli*, *Barscol*, and *Suingut*.

Naiam was secretly baptised, and by profession a Christian, but no follower of the workes of Faith, and signed his principall Ensigne with the signe of the Crosse, hauing with him infinite store of Christians which were all slaine.

The *Jewes* and *Saracens*, that were in the Armie of *Cublai*, began to vpbraide the Christians with this disaster of the Crosse, who thereupon complained to *Cublai*. Hee then sharply reproving the *Jewes* and *Saracens*, turning to the Christians saith; Surely, your God and his Crosse, would not giue any ayde to *Naiam*, but be not you therefore ashamed, because God beeing good and iust, ought not at all to defend Iniustice and Iniquitie. *Naiam* was a Traytour to his Lord, and contrary to all equitie raised rebellion, and sought the helpe of your God in his mischieuous purpose. But he as a good and vpright God, would not fauour his Designes. He returned after this with great triumph to *Cambalu*, and stayed there till Easter. On that day he called the Christians before him, and kissed their Gospels, and made his Barons doe the same. The like hee doth in the great Feasts of *Saracens*, *Jewes*, and *Ethnikes*, that *Sogomamber Can* the God of the Idols, *Mahumer*, *Moses*, or whosoeuer is greatest in heauen might helpe him. Yet he made best shew of liking to the Christian Faith, but pretended the ignorance of the Professors, and the mightie acts of the Sorcerers, to his not professing it.

Now for rewarding his Souldiers, he hath twelue Barons or wise Counsellours, which giue him notice of each Captaynes merit, who raiseth them command of one hundred to a thousand, and from one thousand to ten thousand, and so forward, giuing them Vessels of Plate and Tablets. The Captayne of one hundred hath a Tablet of siluer, and the Captayne of one thousand of Gold, or siluer gilded; the Captayne of ten thousand hath a Tablet of Gold with a Lions head on it: the weight of the Tablets differ also according to the worth and weight of the dignitie. On the said Tablet is written a command in this manner. *By the strength and power of the great God, and by the Grace which he hath giuen to our Empire, the name of Can be blessed, and let them all dye and be destroyed which will not obey him.* All they which haue these Tablets haue priuiledges in writing, of all things which they are to doe or demand. And the Generals when they ride in publike, they haue a cloth borne ouer their heads; and when they sit, sit on a Chaire of siluer. Their Tablet is of three hundred Saggi (fittie ounces of Gold) with the Images of the Sunne and Moone. They whose Tablet haue a Gersfalcon, may take with them for their guard the whole Armie of a great Commander.

Cublai person described.

His Wiues and Concubines.

Ungut.

Cublai is a comeley and faire man of a meane stature, of a red and white face, blacke and goodly eyes, well fashioned nose, and all the lineaments of his bodie consisting of a due proportion. He hath foure wiues which he accounteth lawfull, and the first-borne of them succeedeth him in the Kingdome. And euery one of these is called *Empresse*, and holdeth a peculiar Court, and that Princely in a proper Palace, hauing about three hundred chosen Hand-mayds, and Mayd-servant, and many Eunuch seruants, and at least ten thousand persons in their Family. The King hath also many Concubines.

There is a certaine Nation of faire people, *Tartars*, called *Ungut*, whether euery second yeare he sendeth Ambassadors to puruey the fairest Lasses for him of greatest esteeme for beautie, which bring him foure or fise hundred more or lesse, as they see cause. There are Prayers or Examiners appointed, which take view of all their beauties, examining Eyes, Nose, Mouth, &c. apart; and set price on them at sixteene, seuentene, eightene, nineteene, twentie or more Carrats. And they bring those of that rate which their Commission appoints. These hee causeth to bee reuiewed by other Examiners, and of so many chuseth perhaps thirtie for his Chamber of the chiefe; which he puts to some of his Barons Wiues, to see if they snore not in their sleepe, if in smell or behaiour they be not offensive. Those which are approoued are by fises diuided, each fise part wayting three dayes and nights in his Chamber by course, the other in the next Lodgings preparing whatsoeuer these command them. The lesse prized are put to Cookerie, and other noble Officers. And sometimes the *Can* bestowes them on Gentlemen with great portions.

The

The men of that Countrey esteeme it a grace and credit to haue Daughters worthy his liking : and thinke themselues borne vnder an ill Planet, if they haue not for his turne.

Cublai hath two and twentie Sonnes by his foure legitimate Wiues, and the first-borne of his first Wife was called *Cingis*, who should haue succeeded him in the Empire, if hee had not dyed before his Father. He left a Sonne named *Temur*, a valiant man, wise, and exercised in Armes, who is to succeed his Grand-father in the Empire, in stead of his deceased Father. But by his Hand-mayds and Mayd-servants, he hath five and twentie Sonnes, all which are daily exercised in feats of Armes, and are great Lords. Seuen of his Sonnes by his Wiues are Kings of great Prouinces, and maintayne their states with great reputation.

- 10 Three moneths of the yee, to wit, December, Ianuarie, and Februarie, *Cublai* remaineth ordinarily in *Cambalu* which is at the North-east border of *Cathai*, and there on the South part by the new Citie is seated a great Palace. First, there is a square Wall, each square being eight miles, with a deep Ditch enuironing, and a Gate in the middle of each : after which is the space of a mile in circuit where Souldiers stand. After this is another circuit of sixe mile square, with three Gates on the South square, and three on the North : that which is in the midst being in both the greater, and kept shut, except when the *Can* passeth that way ; the other alway open to others. In each corner of this Wall and in the midst is a faire Palace, eight in all, very large, in which are kept the *Cans* munitions and furnitures of all sorts, for Horles in one, in another Bowes and shooting Artillerie, in a third Costlets, Curasses and leather Armour, and so in the rest. Within this circuit is another wall-circuit, very thicke, and ten paces high, all the battlements white ; the wall square, each square a mile in length, with sixe gates as the former, and eight Palaces also very great, wherein are the *Cans* prouision. Betwixt these two last walls are many faire trees and medowes, in which are Deere, Muske beasts, with other game, and store of grasse, the paths being heighthned two cubits to spare it, no durt, nor plashes of water being therein. Within this last wall is the Palace of the great *Can*, the greatest that hath beene seene, abutting with the wall on the North and South and open spaced where the Barons and Souldiers passe. It hath no feeling, but a very high rooffe : the foundation of the pauement ten palms high, with a wall of marble round about it, two paces wide, as it were a walke. In the end of the wall without, is a faire Turret with Pillars. In the walls of the Halls and Chambers are carued Dragons, Souldiers, Birds, Beasts, of diuers kinds, histories of Warres, gilded. The
- 20 rooffe is so made, that nothing is seene but Gold and Imagery. In euery square of the Palace is a great Hall of marble, capable of great multitudes. The Chambers are disposed the best that may be deuised : the rooffe is red, greene, azure, and of all coloures. Behind the Palace are great Roomes, and priuate store-houses for his treasures and Jewels, for his women, and other secret employments. Ouer against the said Palace of the *Can*, is another for *Cingis* his sonne, whose Court, was in all things like his Fathers. Neere this Palace towards the North is a Mount made by hand, a mile in compasse, one hundred paces high ; beset with trees that are alwaies greene. Vnto this mountaine, the king commandeth all the best trees, to be brought from remote parts, lading Elephants with them, for they are taken vp with the roots, and are transplanted in this Mountaine. And because this Mountaine is alwaies greene it is called, The greene Mountaine.
- 40 And where the earth of that Mount was taken away, are two Lakes answering each other, with a pretie Riuer filling them, stored with fish, and so grated that the fish cannot get forth.

- The Citie of *Cambalu* in the Prouince of *Cathai*, seated on a great Riuer, was famous, and regall, from antiquitie. And this name *Cambalu* signifieth, The Citie of the Lord, or Prince. This Citie the great *Can* remoued vnto the other side of the Riuer where the Palaces are : for he vnderstood by the Astrologers, that it should rebell against the Empire *. This new built Citie is called *Taidu* : and he made all the *Catayans* to goe out of the old Citie into the new : which contayneth in compasse foure and twentie miles, euery side of the square contayning sixe miles. It hath walls of earth ten paces thicke at the bottome, and at the top but three, by little and little ascending thinner : the batlements are white. Euery square of the wall hath three
- 50 principall Gates, which are twelue in all, hauing sumptuous Palaces built ouer each of them. There are also excellent Palaces in the angles of the walls, where the Armes of the Garrison (which are one thousand at each Gate) are kept. The buildings are squared out, & the streets laid very straight by line, throughout this Citie, so that from one Gate a free prospect openeth thorough the Citie, to the opposite Gate, hauing very goodly houses built on both sides, like Palaces with Gardens and Courts, diuided to the Heads of Families. In the middle of the Citie, a certaine sumptuous house is built, wherein hangeth a very great Bell, after the third knolling whereof in the night no man may goe out of his house, vntill the beginning of the day following, except it be for speciall cause, as for a woman in trauell, &c. And they are compelled to
- 60 carrie a light with them.

Without the Citie of *Cambalu* are twelue great Suburbs, three or foure miles long, ioyning vpon each of the twelue Gates, more inhabiting the Suburbs then the Citie : heere Marchants and Strangers keepe, each Nation hauing a seuerall Store-house or Burse in which they lodge. No dead corps of any man is buried within this Citie, but the bodies of Idolaters are burned

burned without the Suburbs, where the dead bodies of other sects are buried. And because an huge multitude of Sorcerers conuerse alwayes there, they haue about twentie five thousand Harlots in the Suburbs and in the Citie, and these haue a Captaine appointed ouer euery hundred, and thousand; and one Generall; whose office is, that when Embassadors come, or such as haue businesse with the *Can* whose charges he findeth, this Captaine giueth euery Embassador and euery man of his family, change of women nightly at free cost: for this is the Queanes tribute. The Guards euery night cast those in prison which they finde walking late: and if they be found guiltie they are beaten with Cudgels: for the *Bachsi* tell them that it is not good to shed mans blood. But many dye of those beatings.

The great *Can* hath in his Court twelue thousand Horse-men, which they call *Casitan*, faith- 10
full Souldiers of their Lord, who guard his person more for state then feare. And foure Capitaines haue the charge of these, whereof euery one commandeth three thousand. When one Captaine with three thousand Souldiers within the Palace, hath guarded the King for three dayes and nights, another Captaine with his Souldiers againe succeedeth: and so throughout the whole yeeare, this course of watching by courte is obserued.

When through occasion of any feastiuall day hee keepeth a solemne Court, his Table being higher then the rest of the Tables, is set at the North part of the Hall, and his face is to the South, hauing the greatest Queene on his left hand, to wit, his principall wife, and his Sonnes, and nephews, and they of the blood royall on his right. Yet their table is in a lower place, so that they scarce touch the Kings feet with their heads; the seat of the eldest being higher then the 20
rest. The Barons and Princes, sit in a lower place then that. Their wiues also keepe the like order, first the *Cans* sonnes wiues and his kinsmens, sits lower on the left hand, and after, those of the Lords and of euery Captaine, and Noble-man, each in her degree and order. And the Emperour himselfe, while he sitteth at his table, may cast his eyes vpon all that feast with him in that Hall. There are not Tables for all to sit, but the greatest part of the Souldiers and Barons eate on Carpets. At all the doores stand two giantly fellowes with Cudgels, to see that none touch the Threshold, which if hee doe they take his garments away; which he must redeeme with so many blowes as shall be appointed, or else lose them. They which serue the King sitting at the table, all of them couer their mouthes with Silke, least their breathing should by any meanes touch the Kings meat or drinke. And when he hath minde to drinke, the Damofell which giues 30
it, goeth back three paces and kneeles downe, and then the Barons and all the people kneele, and the Musicians sound their Instruments. There is no cause why I should write any thing concerning the meats which are brought to the Table, how daintie and delicate they are, and with what magnificence and pompe they are serued in. All the *Tartars* obserue this custome, to celebrate the Birth day of their Lord most honourably. The Festiuall birth day of *Cublai*, is kept the twentie eight of September, and this day hee accounteth more solemne, then any of the whole yeare, except the first of February, wherein they begin their yeare. The King therefore in his Birth day is cloathed with a most precious garment of Gold, and about two thousand Barons and Souldiers, are cloathed of the same colour of gold (though of Silke stufte) and a girdle wrought with gold and siluer, which is giuen them with a payre of shooes: some weare Pearles 40
and Gemmes of great price, namely, the *Quicitarie*, which are next to the *Can*: and these garments are not worne but on their thirdeene solemne Feasts according to the thirdeene Moones of the yeare; all then cloathed like Kings. This custome is also obserued with the *Tartars*, that on the birth day of great *Cham*, all the Kings, Princes, and Nobles, which are subiect to his Dominion, should send presents vnto him, as to their Emperour. And they who desire to obtaine any place of Dignitie or office of him, offer their requests vnto twelue Barons appointed for this purpose, and what they decree, is all one, as if the Emperour himselfe had answered them. All people also, of what Faith or sect soeuer, whether *Christians*, or *Senes*, *Saracens*, or *Tartars*, and other *Pagans* are bound, solemnly to call vpon their Gods, for the life, safetie, and prosperitie of Great *Can*.

On the day of the *Kalends* of February, which is the beginning of the *Tartars* yeare, great 50
Can and all the *Tartars*, wheresoeuer they are, celebrate a very great and solemne Feast, and all aswell men as women, desire to bee cloathed in white Garments. For they beleue, that the white garment is a token of good lucke: Therefore that fortune might fauour them all the yeare, they weare white in the beginning of the yeare. Moreouer the Rulers of Cities, and Gouvernours of Prouinces, mindfull of their dutie, send vnto their Emperour on this day presents of Gold and Silver, Pearles and Precious stones, many white Cloathes, and other white things, and many Horses of a white colour: the rest of the *Tartars* at the beginning of the yeare, send white presents one to another. It is the custome of those which bring presents, if they can, of each to present nine times nine; as if they send Horses, to present nine nines, that is eightie one, and so of 60
Gold, of Cloaths, & other things, that sometimes he hath by this reckoning one hundred thousand Horses. Also at this good lucke, all the Elephants which the Emperour hath (five thousand in number) are brought vnto the Court, couered with Tapistrie, wherein the similitudes of diuers Beasts and Fowles are portrayed, carryng vpon their shoulders two Chests full of golden and siluer.

Siluer vessell. Many Camels also are brought, couered with faire Silken clothes, which bring other things, necessarie for the Court. And this day in the morning, all the Kings, Capitaines, Barons, Souldiers, Physicians, Astrologers, Falconers, and the Gouvernours of Prouinces, and Armies, and other Officers of the Emperour, assemble in the great Hall before the King, and they who happen to haue no place there, for the multitude of men, stand in another place where he may see them. All being placed in their order, and degree, one ariseth as it were some Prelate, and crieth out with a loude voyce, *Bow downe, and adore.* And presently all doe reuerence, bending downe their foreheads to the earth. Then he sayth, *God preserue our Lord with long life and ioy,* and all answere, *God grant.* Then he sayth, *God encrease and aduance his Empire,* and *preserue his Subiects in peace, good-will, and prosperitie:* and all answere, *God grant.* And this they doe foure times. The adoration finished, the said Prelate goeth to an Altar richly adorned, on which is a red Table, wherein is written the name of the *Can*, and taking a Censer, and putting odoriferous Spices therein, they perfume the Table and the Altar with great reuerence, in honour of great *Can*, and so returne to their places. After which, are offered the gifts whereof we haue spoken; and then the Tables are prepared, and a most solemne Dinner held, eating and drinking with great ioy with their wiues, in manner before described. And lastly, a domestick Lion is brought vnto the King, which lying at his feet, like a gentle Whelp, acknowledgeth his Lord.

The Feast.

A tame Lion.

In those three moneths, in which as we said before, the Emperour remayneth in the Citie of *Cambalu*, to wit, in December, Ianuarie, and Februarie, all the Hunters which the Emperour hath in all Prouinces, round about the Prouince of *Cathai*, apply themselves to hunting, and offer all the greater wilde-beasts, to wit, Stags, Beares, Roe-buckles, wilde Boares, Deere, and such like, vnto their Gouvernours: who (if they be distant from the Emperours Court, lesse then thurtie dayes Iourney) send such beasts taken, by Waynes, and Ships vnto the Emperour, hauing first bowelled them. But such as are fortie dayes Iourney distant from his Court, send onely the skinned, which are necessarie for the making of Armour. Hee hath many Leopards, and Wolues for hunting, and many Lions also, greater then those which are in *Babylon*, in the haire whereof certaine little beames appeare of diuers colours, to wit, white, blacke and red, and they are accommodated to catch Boares, Beares, Stags, Roe-buckles, wilde Asses, and wilde Oxen; and it is marvellous to see the Lions fiercenesse and dexteritie in the act. Two Lions vse to be carried in one Wagon, when they goe to hunt, and with them a Dog, with which they are tamed; and they carrie them on this fashion, because of their furie and vnrulinesse: and they must carrie them contrary to the wind; for else the beasts would sent them, and flee. Hee hath many tame Eagles, which are so fierce, that they take Hares, Roe-buckles, Deere, and Foxes: among which some of them reare not with great violence to seize vpon Wolues, and vex them so sore, that without labour and danger, they may be taken by men.

The office of the Prouincial Hunters.

Tame Leopards, and Lions.

Eagles.

The great *Can* hath in his Court two which are brethren, one called *Bayan*, the other *Mingan*, called in the *Tartar* language, *Cinici*, that is, Masters of the Game, whereof either hath the charge of ten thousand men: they which are vnder one of them, are clothed in red; the other in skie-colour, alway when they hunt. These keepe diuers sorts of Dogs, to the number of fve thousand Mastiues and other. In hunting they goe with their people, one on the right, and the other on the left hand of the King: and they take vp so great a length of the Playne, that from one end to the other is a dayes Iourney, so that no beast can escape them; and it is great pleasure when the *Can* goes in the midst, to see the Dogs follow Harts, Beares, and other kinds. And these Brethren are bound by couenant, from the beginning of October to the end of March, to bring to the Court, one thousand heads of beasts and birds, besides Quails, and fishes the best they can, in great proportion.

The Masters of the Game.

The moneth of March comming in, great *Can* departeth from the Citie of *Cambalu*, and proceedeth North-eastward towards the Ocean distant thence two dayes Iourneyes, bringing with him about ten thousand Falconers, who haue Falcons, Hawkes, Gerfalcones, and other kinds of Fowles of prey fit for hawking. These Falconers disperse themselves by an hundred or two hundred in a Companie: and the birds that are taken, for the most part, are brought vnto the King, who by reason of his Gout, sitteth in a wooden house, which two Elephants carrie, couered with the skins of Lions, and within hanged with cloth of Gold, hauing with him for his recreation, twelue choice Hawkes, and twelue fauoured Courtiers: many Noblemen and Souldiers ride by, who guard the Kings person. Who, when they see Pheasants, or Cranes, or other birds flying in the aire, declare it to the Falconers which are neere vnto the King: and they, signifying the same vnto the King, vncouer the Kings House, and let their Falcons and Hawkes flie, and the King sitting on his Bed, beholdeth the pastime of the birds. Other ten thousand men also goe with the King, who in that hawking, runne hither and thither, by two and two, and marke whither the Falcons and Hawkes flie, that are cast from the fist, that (if need bee) they may helpe them. And these, in the *Tartars* Language, are called *Toscaol*, that is to say, *Toscaol*. Watch-men or Markes-men, being skilfull in a certaine kind of whistle, wherewith they call in the Hawkes that are flown. Nor is it needfull, that the Falconer who let the Hawkes flie,

Toscaol.

The markes of
the Hawkes.

should follow her, seeing they, of whom I now speake, are busily employed in taking vp the Hawkes, and are carefull that by no meanes they bee hurt or lost. And euery flying Hawke carrieth a little table of siluer on her foot, signed with the marke of her Master or Falconer, that if shee bee lost, shee may bee restored to her owner. But if the marke cannot be knowne, the Hawke is deliuered to a certaine Baron, who for this cause is called *Bulangazi*, to whom are brought all lost things (otherwise the Finder would be counted a Thiefe) and to him Losers resort to inquire of things lost. He hath a most eminent place, noted by his Ensigne, that in so great an assembly of people he may be knowne.

The number
and order of
the Pauilions.

The huge
price of Arme-
lines, and
Sables.

Hunting for-
bidden.

Barke or Pa-
per money.

Cambalu, the
Mint of mo-
ney.

Whiles they are thus busied in sporting and hawking, they come vnto a certaine great Plaine, called *Caczarmedin*, where the Tents of the King and all the Courtiers are prepared, about ten thousand in number. The first and chiefe is the *Cans* Pauilion, vnder which ten thousand Souldiers stand, besides Barons and Noble-men, with the doore to the South: sustayned with three Pillars, wrought with diuers curious and excellent carued workes, and couered with the skinnies of Lions (and strakes of diuers colours) which keepe out rayne. But within, the walls of the Pauilions are couered with most costly skinnies of *Armelines* and *Sables*, although in those Countries these skinnies are accounted most precious, that sometimes skinnies worth two thousand Sultanines of gold are scarce sufficient for one paire of Vests. The *Tartars* call the *Sable*, the Queene of Fures. The Cordes, wherewith these Pauilions are supported, are of silke. There are also other Pauilions erected, wherein the Wiues, Sonnes, and Hand-maides of the King remaine. Further also, the Falcons, Hawkes, Owles, Garfalcons, and other Birds, which serue for Hawking, haue their Tents wherein they are containd. For, there is so great a multitude of Tents, that to them that come thither, a farre off it seemeth that a famous Citie is built there. The King remayneth all March in that Plaine, and taketh innumerable Beasts and infinite multitudes of Fowle. For no man may else hunt in all the Prouinces of that Kingdome, at the least within fve dayes iourney one way, ten another, and fteene a third way of the *Cans* Court: nor keepe an hunting Dogge, or an Hawke: and specially, from the beginning of March vntill the month of October, no man is permitted to vse any deuice or engine whatsoever, to take Stagges, Deere, Roe-bucks, Hares, lest he should hinder their breede: and here-vpon it is that there are such store.

It is incredible what multitudes of People, Merchants, and merchandises of all sorts are seene in *Cambalu*. The Money of the Great *Can* is not made of gold or siluer, or other metall, but they take the middle barke from the Mulberrie Tree, and this they make firme, and cut it into diuers and round pieces, great and little, and imprint the Kings marke thereon. Of this matter therefore, the Emperour causeth an huge masse of money to bee made in the Citie of *Cambalu*, which sufficeth for the whole Empire: and no man vnder paine of death may lawfully coine any other, or spend any other money, or refuse it in all his Kingdomes and Countries. Nor any coming from another Kingdome, dare spend any other money in the Empire of Great *Can*. Whereby it commeth to passe, that Merchants often coming from farre remote Countries and Regions vnto the Citie of *Cambalu*, bring with them gold, siluer, pearle, and precious stones, and receiue the Kings money for them. And because this money is not receiued in their Countries, they change it againe in the Empire of Great *Can* for merchandise, which they carrie away with them. He also payeth stipends to his Officers and Armies of the mentioned money; and lastly, whatsoever thing he needeth in his Court he buyeth with this money. Wherefore, there is not a King to be found in the World, who exceedeth him in Treasure, not expended on the Mint as elsewhere.

The Great *Can* hath twelue Barons, as is said before, which are his Counsell of Warre, and dispose of martiall affaires, and the exalting or disgracing of Captaines and Souldiers. Their office is called *Thai*, that is, *The high Court*, because they haue none about them but the *Can*. Other twelue Barons are appointed Counsellors for the foure and thirtie Prouinces, which haue a faire Palace in *Cambalu*, in which is for euery Prouince a Iudge & many Notaries. These haue power to choose Gouvernours of the said Prouinces, and present their names to the *Can* which confirms them. These also haue the charge of the Treasure to exact and dispense the same. Their office is called *Singh*, that is, *The second Court*, subiect to none but the *Can*, yet reputed lesse noble then the former, that being a martiall State.

§. VI.

The Cans prouisions for Embassadors and for Posts; against Dearth; for High-ways; for the Poore in Cambalu, for Astrologers; Tartars Wine, Fuel, Religion, Opinions, Behaviour, Court-neatnesse: POLOS proceeding from Cambalu Westward. Of Pulisangan, Gouza, Tainfu, Pianfu, Thaigin, Cagianfu, Quenzanfu, Sindinfu, Thebeth, Caindu, Caraian, Carachan, Cardandan and Vociam.

10 **W**ithout the Citie of *Cambalu*, many publike wayes conduct to the neighbouring Prouinces, and in euery one of them alway at the end of five and twentie or thirtie miles, are Lodgings or Innes built, called *Lamb*, that is, *Post-horses*, with great and faire Palaces, Chambers furnished with Beds and other Prouisions, meete to entertaine great Men, yea to lodge a King; the prouisions laid in from the next adioyning places: where about foure hundred Horses are in readinesse for Messengers and Embassadors, which there leaue their ridden Horses and take fresh. And in mountaynous places, where are no Villages, he sends People to inhabite, ten thousand at a place where these *Lamb* are built, which till the ground for their prouisions; and this continueth vnto the furthest limits of the Empire: so that

20 in the publique wayes, throughout the whole Empire, about ten thousand of the Kings Innes are to bee found. And the number of the Horses, appointed for the seruice of the Messengers in those Innes, are more then two hundred thousand, a thing almost incredible to tell: so that in a little while with change of Men and Horse, intelligence might flie to the Court. And if any wonder how so many men and beasts should be provided for, hee must consider that the *Moors* and *Gentiles* haue many women, and store of children, some having thirtie sonnes which follow them armed; and for victuall they sow three seeds, Rice, Panike and Mill, which yeeld an hundred fold: they make not bread, but boile these with Milke or Flesh. Wheat will not so encrease with them: nor suffer they any ground, which will beare, to lye vntilled. And their Cattell alway increase, that each of them carries with him six, eight, or more Horses into the field for his owne person. These Horses also take turnes, that of the foure hundred aforesaid two hundred are

30 in the stables readie, the other two hundred at grasse by monethly courses. Their Cities adioyning to Riuer or Lakes, are appointed also to haue ferry Boats in readinesse for the Posts. And Cities adioyning to Desarts, are felled at Hories and prouisions thorow those Desarts, but haue contribution from the *Can*. In cases of great import, the Poste rides with a Gersfalcon Table, and is trussed so that he will ride two hundred miles in a day, or two hundred and fiftie, sometimes also they ride the night, Foot-posts running by with lights, if the Moone shine not. They winde a Horne that the fresh Horses may be brought forth for them to mount presently, and hauing their bellies and heads girded runne as fast as the horse can: and those which are able to endure this excessive riding are of great reputation.

40 There are also betweene the said Innes other habitations, three or foure miles distant one from another, where there are a few houses wherein Foot-posts dwell, hauing all girdels full of shrill sounding bells. These are alwayes readie, and as often as the Kings Letters are sent vnto them, conuey them speedily to the next habitation: who hearing the sound of the Foot-post comming afarre off, expect him, and receiuing his Letters, presently carrie them to the next watch: and so the Letters passing through diuers hands, are conueyed without any delay, vnto that place whither they ought to come. And it commeth often to passe, that the King vnderstandeth newes, or receiue new fruits from a place, ten dayes journey distant, in two dayes: as fruits growing at *Cambalu* in the morning, the next day at night at *Xandu*. But all the mentioned Postes are free from all exaction of Tribute, and receiue a good recompence of their labours from the Kings

50 Rent gatherers besides. Some also are appointed to examine these Posts monethly, and to punish their faults.

He sends yearly vnto diuers Prouinces, subiect to his Empire, to inquire whether any harme be done to the Corne, by Tempests, Locusts, Wormes, or any other plague. And when he hath notice giuen him, that any Prouince or Citie, hath sustained any damage, he remitteth Tributes to that people for that yeere, and sendeth Graine for victuall and for Seede, out of his owne Garners. For, in the time of great plentie, the King buyeth abundant store of Corne, and keepeth it with great care of Officers, three or foure yeeres in Garners, that when there shall be scarcitie of Corne in one Countrey, that defect may bee supplied out of the Kings Store-houses. Hee selleth his graine for the fourth part of other mens price, and alway prouideth that his store-houses be stored. Likewise, when any murren lighteth among Cattell, hee sends them other Cattell which he hath for Tenths in other Prouinces. And if a thunder-bolt hath stricken any beast of any Herd or Flock, he will haue no Tribute thereof for three yeeres, be the Herd neuer so great: nor custome of a Thunder-stricken ship, thinking God is angrie with them which are so stricken. Likewise, that Trauellers may find the way in all places capable to beare Trees, He hath caused

Postes and Innes. The Romans also had publike Stables, as appears by *Constantine*, *Zos. l. 2.* and *Palladius* who in three dayes would ride from the Confines of the Empire to *Constantinople*, *Soc. l. 7. c. 19.*

Foot-postes. *Die Post boden.*

Their Priviledges.

Fatherly Royallie.

Hence perhaps the walk from *Labor* to *Agra* was occasioned. Their Rice-wine.

Coales taken out of mines, a thing strange to *Polo* an *Italian*, but common with vs, called *Sea-cole*, because they are brought by Sea from *New-castle*, &c. *Enemas Syluius* and the *China* *Le-suites*, haue told wonders of these black stones, a wonderfull diuine bounty indeed to this Land, and specially to this Citie. *Cans* charitie to the Poore. The Tenth paid to the *Can*. Weekly labour for him. The Deuill an Angell of light. Astrologers.

Tartarian computation of times.

Their Religion.

* *Stattendo i denti*.

Opinions of the soule.

Their Customs.

Court reuerence.

Trees to be planted, a little distance one from another, neare vnto the principall wayes; and in Sandie and desert places, he hath caused to set Stones and Pillars for that purpose: and Officers are appointed to looke to these things. Hee plants Trees the rather because his Astrologers tell him, that planting Trees lengthens the life.

They make excellent drinke, in the Prouince of *Cathai*, of Rice and diuers Spices, which in the taste thereof excelleth the sweetnesse euen of Wine. And they who drinke more greedily therof then reason iudgeth to be fit, or the nature of the drinker requireth, sooner become drunke then if they had drunke Wine.

Throughout the whole Prouince of *Cathai*, certaine blacke stones are digged out of the Mountaines, which put into the fire burne like wood, and being kindled preserue fire a long time, as if they be kindled in the Euening, they keepe quicke fire all the night. And many vse those stones, because that though they haue store of wood, yet is there such frequent vse of Stoues and Bathes (thrice every weeke) that the wood would not serue.

It is not amisse also, hauing spoken of his Prouisions abroad, to mention his care for the poore of *Cambalu*. When he heares of any honourable Familie decayed by disaduentures, or of any which cannot worke, and haue no meanes: he causeth to giue to such Families the whole yeares expences; each of such Families going to the Officers for that purpose, and shewing their Bill of allowance, receiue prouisions accordingly. There is a Palace deputed for those Officers. They are provided also of garments for Winter, and for Summer; the *Can* hauing the Tenth of all Wool, and Silke, and Hempe, which he causeth to bee made into Clothes in a house thereto appointed: for all Trades are bound one day in the weeke to worke for him. He prouides also apparell for his Armies, and in euery Citie causeth Cloth to be made of his tithes wooll. You must vnderstand that the *Tartars* ancient customes knew no almes, but rather vpbraided such as were in necessitie, as hated of God. But the Idolaters, especially these *Bachsi*, haue propounded it as a good worke acceptable to God, and haue taught him to be thus bountifull, so that in his Court bread is neuer denied to any which aske: and there is no day in which is not giuen away twentie thousand Crownes in Rice, Millet and Panike, whereby he is esteemed as a God.

There are also in *Cambalu* of *Christians*, *Saracens*, and *Catayans*, about fife thousand Astrologers and Diuiners, which the Great *Can* prouideth yeerly of foode and rayment, as those poore abovesaid. These haue an Astrolabe in which are marked the signes of the Planets, the houres and points of all the yeere. Herein all these Astrologers, each Religion apart, view the course of the yeere, according to euery Moone, obseruing the disposition of the weather, referring alway to God to doe more or lesse after his owne pleasure. They write also vpon certaine squares (they call them *Tacini*) the things which are to come that yeere, which they sell to those that will buy them, and such as speake most truth are most honored. If any intend any great worke, or to goe a farre iourney, and will know the euent before-hand, he makes recourse to these Astrologers, to see it with their eyes in the Heauens, which they doe, comparing the present Constellation with that of his Birth (which they demand of him) so foretelling him the good or euill.

The *Tartars* reckon the computation of their yeeres by twelues, the first signified by a Lion, the second by an Oxe, the third by a Dragon, the fourth by a Dogge, and so thorow the whole twelue: so that if a man be demanded when he was borne; he will answer, such a point of such an houre, of such a day in the yeere Lion (this their fathers exactly set downe in a booke) and when the twelue is complete, they goe ouer the same againe.

Of their Religion we haue said that they are Idolaters, and for their Gods haue a Table set aloft in the wall of their Chamber, on which is written, a Name representing the *High God of Heauen*; and there euery day, with a Censer of incense, they adore it in this manner. They lift vp their hands aloft, and strike their teeth thrice, praying it to giue them a good vnderstanding and health; and desire thereof nothing else. Besides, on the ground they haue another statue, called *Natigai*, The God of earthly things, with his Wife and Children (as before is said) whom likewise they worship with incense, striking * or gnashing the teeth, and lifting vp the hands; and desire thereof temperature of the aire, fruits of the earth, children, and the like. They hold the Soule to be immortal, and that when a man dies, it enters into another bodie better or worse, according to the merits in the former life, as of a poore man to become a Gentleman, and after of a Prince or Lord, and so higher till it be assumed in God: or if it hath ill deserued to be a poorer man, after a Dogge, alway descending to the lowest ranke of basenesse. They haue a comely speech, salute cheerfully and honestly, haue a gracefull carriage, and feed cleanly. They beare great reuerence to their Parents, and if any be vndutifull, or helpelesse to their necessitie, there is a publike Office designed to this particular, to punish vngratefull or disobedient children. Prisoners are released at three yeeres end, and marked in the cheeke, to be knowne Malefactors.

The Barons and People which goe to the Grand *Can*, obserue these Rites. First, within halfe a mile of the place where the *Can* is, all is hushed and quiet without noyse or cryes, or any loud speech: and euery Baron carries continually a little faire vessell to spit in, after which hee couers it, none daring to spit on the Hall. They haue Furre buskins of white leather, which they put on when they enter the Hall, putting off the former and giuing them to the seruants, lest they should foule the faire artificiall Carpets.

Ten

Ten miles off *Cambalu*, is a certayne great Riuer, named *Pulifangan*, emptying it selfe into the Ocean, by which many ships with much merchandise ascend. And in that place, there is a very faire Bridge, all of Serpentine stone curiously wrought, contayning three hundred paces in length, and eight in breadth, that ten men may ride abreast. On each side it is fairely mounted with a wall of marble, and Pillars set on a row: and in the height of the ascent is a great and high Pillar, at the foote whereof is a great Lion, and on the top another. And so quite thorow the Bridge, one pace and halfe distant are Pillars with Lions on the top, and a faire well-wrought marble worke betwixt, to keepe men from falling.

An admirable Bridge. *Ramusio* hath giuen a picture, London more.

Having passed ouer the Riuer and Bridge, proceeding thirtie miles westward (in which Palaces are continually scene with Vineyards and fertile Fields) you come to the Citie *Gouza*, both faire and great, hauing many Monasteries of Idols. Cloth of gold and silkes are made there, and the purest and finest Cambricks or Launes; and many common Innes for Strangers and Trauailers are found in that Citie: The Citizens are Artificers and Merchants. A mile without this Citie the way parteth, one leading West, the other South-east: that to the West leadeth through the Prouince of *Carbay*, but the other towards the Countrey of *Mangi*. From the Citie of *Gouza* to the Kingdome of *Tainfu*, you ride ten dayes thorow *Cataio*, alway finding many faire Cities and Castles, well traded with Vineyards and tilled Fields, from whence Wine is carried to *Cataio*, where it wants. There are many Mulberrie trees for Silke-workes: the People ciuill and Cities very frequent.

The Citie *Gouza*. Parting of the way.

Tainfu is the name of the Kingdome, and of the chiefe Citie which is great and faire, hath much trading with store of munition, fit for the *Cans* Armies. The Wine about this Citie serueth the whole Prouince. Seuen dayes further westward is a goodly Countrey, beautified with many Castles and Cities, in which also great trade of merchandise is vsed. After which, you come to a Citie very great, named *Pianfu*, in which there is great abundance of Silke and Trading.

Tainfu. Armes.

Westward from *Pianfu* standeth a very goodly Castle, named *Thaigin*, anciently built by a King called *Dor*. In it is a spacious Palace, wherein is a faire Hall, in which are painted all the famous Kings which haue reigned there; a faire spectacle. Of this King *Dor* they say that he was potent, and was attended onely by young Damsels, whereof his Court had great store. They also when hee listeth to take his pleasure, carried him in a small light Chariot thorow the Castle, which is so fortified by Art and Nature, that the Gouvernour thereof feared none, no not *Vmcan* his Lord, against whom hee rebelled. But seuen men professing fidelitie and seruice to *Dor*, tooke him at aduantage in hunting, and brought him captiue to *Presbyter Iohn* or *Vmcan*, who put him in vile clothes, and appointed him to keepe his Cattell, and set on him a strong guard till two yeeres were ended: after which, hee commanded him to bee brought before him, and attyred him in Princely apparell, and giuing him his pardon after sharpe admonition, sent him so well attended to the repossesion of his Kingdome.

Dor and his Damsel-court. The King of *Achen*, and the *Mogol*, doe likewise in part.

About twentie miles beyond the Castle *Thaigin*, is the Riuer *Cardamoran*, which by reason of the exceeding bredth and depth thereof, hath no Bridge: and floweth to the Ocean. On the shoare thereof are many Cities and Castles built; wherein much trading is exercised. This Countrey aboundeth with Ginger, Silke, and Fowle, especially Feasants, that three of them are bought for a groat of *Venice*. There grow Reeds infinite store, so great that some are a foot, some are a foot and halfe in compasse, profitable to many vses. Passing this Riuer, after two dayes iourney is the famous Citie called *Carianfu*, where many clothes of Gold and Silke are made: heere growes Ginger, Galingale, Spike, and many Spices. The people are Idolaters. Proceeding seuen dayes iourney Westward, many Cities, and Townes, goodly Fields and Gardens are found; and euery where Mulberies for Silke-wormes. And they are Idolaters, but there are also *Christians*, *Turkes*, *Nestorians*, and some *Saracens*. There is much both of wilde Beasts and Fowle. If you proceed seuen dayes iourney further, you shall come to a certaine great Citie, named

Cardamoran. *Carianfu*.

Quenzanfu, which is the chiefe Citie of the Kingdome, in which haue raigned many famous Kings: and at this day, the sonne of great *Can*, called *Mangalu*, hath the command thereof. That Countrey yeeldeth great plentie of Silke, Cloth of Gold, and all other things necessarie for furnishing of an Armie, and for preseruacion of the life of Man. The Inhabitants worship Idols; and there are some *Christians*, and *Turkes*, and *Saracens*. Fiue miles without the Citie standeth the Palace of *Mangalu*, seated in a Playne, where are many Springs, Riuerets, and places of Game. There is a high wall encompassing fiue miles, where are all wilde Beasts and Fowles, in the midst is an excellent Palace, hauing many Halls and Chambers great and faire, all painted with Gold and Azure, and infinite Marbles adorning. The King with his Courtiers applieth himselfe to hunting of wilde Beasts, and taking of Fowle, and followeth his fathers steps in Iustice and Equitie, much beloued of his people.

Quenzanfu. King *Mangalu*.

Going three dayes iourney Westward from the said Palace, through a certaine goodly Plaine, where many Cities and Castles are (and abundance of Silke, Merchandise, and Arts) is a mountainous Countrey, where, in the Mountaines and Valleys are frequent Habitations, and store of Lodgings, of the Prouince of *Cunchin*. The Inhabitants are Idolaters, and Husbandmen. Also,

Cunchin.

in that Countrey they hunt Lions, Beares, Stags, Roe-buckles, Deere, Wolves. That Plaine is two dayes iourney, and the Countrey is twentie dayes Westward all inhabited, hauing Mountaines, and Valleyes, and many Woods.

*Achbaluch
Mangi.*

After that, twentie dayes towards the West, is a Prouince, named *Achbaluch Mangi*, that is, *The white Citie of the borders of Mangi*, which is wel peopled. This Prouince for two daies iourney hath a Plaine, with infinite habitations. After which follow Mountaines, Valleyes, and Woods, all inhabited twentie dayes iourney Westward. It hath store of wild beasts, and of those creatures which yeeld Muske. In this Prouince Ginger groweth in great plentie, as also Corne and Rice.

*Mangi.
Sindinfu.*

After twentie dayes iourney thorow those Hills, is a Playne, and a Prouince in the Confines of *Mangi*, named *Sindinfu*. The chiefe Citie hath the same name, great and exceeding rich, being twentie miles circuit about. It hath had many rich and mightie Kings, but the old King dying, left three sonnes Successors of the Kingdome, which diuided the Citie into three parts, compassing euery part with their proper walls, all which notwithstanding were contained within the former wall. But great *Can* subiected that Citie and Kingdome to his Dominion. Thorow this Citie runne many Riuer, in many places, and round about, some halfe a mile ouer, some two hundred paces, very deepe, and on them are many Bridges of stone, very faire, eight paces broad, set on both sides with marble Pillars, which beare vp a timber Frame that couers the Bridge; each Bridge hauing streets and shops all along ft. When these Riuer are past the Citie, they becom one great riuer, called *Quian*, which runneth one hundred dayes iourney hence to the Ocean. Neere these Riuer are many Cities and Castles, and ships for Merchandise. Proceeding 20
five dayes iourney further, through a certaine Playne, many Cities, Castles, and Villages are found, in which fine Lawnes are in great abundance. Many wilde Beasts also are there.

Quian.

The greatnesse
of the Prou-
ince of *Tebeth*

After the Playne whereof wee now speake, is the Prouince of *Tebeth*, which great *Can* vanquished, and wasted: for in it are many Cities destroyed, and Castles ouerthrowne by the space of twentie dayes iourney. And because it is become a Wildernesse, wanting Inhabitants, wilde Beasts, and Lions are there encreased abundantly: and it is needfull that Trauellers carrie victuals with them. Very great Canes grow in this Countrey ten paces in length, and three palmes in thicknesse, and as much from knot to knot. When Trauellers therefore will rest by night secure from Beasts, they take great bundles of the greener Reeds, and putting fire vnder, kindle them. Which make such a cracking, and so great a noyse, that it may bee 30
heard two miles off. Which terrible sound the wilde Beasts hearing, flee away. Moreover, Horses, and other Beasts which Merchants vse for their iourney, hearing this noyse and cracking, are very much afraid, and many betaking themselves to flight, haue escaped from their Masters: but the wiser Trauellers binding their feet together with Fetters, detain them with violence.

The subtil de-
uise of Trauel-
lers.

tioneth the
like of the Cy-
prians.
Alianus V. H.
the 4. booke,
chapter 1.

Twentie dayes iourney ended, hauing passed ouer the Prouince of *Tebeth*, wee meet with Cities, and very many Villages, in which, through the blindnesse of Idolatrie, a wicked custome is vsed: for, no man there marrieth a wife that is a Virgin. Whereupon, when Trauellers and Strangers comming from other parts, passe through this Countrey, and pitch their Pauilions, the Women of that place hauing marriageable daughters, bring them vnto Strangers, desiring 40
them to take them, and enioy their companie as long as they remayne there. Thus the pretier are chosen, and the rest returne home sorrowfull. And when they will depart, they are not suffered to carrie any away with them, but faithfully restore them to their Parents. The Mayden also requireth some toy or small Present of him who hath deflowered her, which shee may shew as an argument and prooffe of her deflouring. And shee that hath beene loued, and abused of most men, and shall haue many such fauours and toyes to shew to her Wooers, is accounted more noble, and may more easily and honourably be married. And when shee will goe honourably attired, shee hangeth all her Louers fauours about her necke, and the more acceptable illee was to many, of so much the more honour is shee adiudged worthie. But when they are once married to husbands, they are now no more suffered to be coupled with strange men. And the 50
men of this Countrey are very wary, that they offend not one another in this matter. They are Idolaters, and cruell men, thinking it no sinne if they rob, and exercise theft. They liue by hunting, and the fruits of the earth. Many beasts also are found with them, yeelding Muske called by them, Gudderi. They haue a proper Language, and haue no money, not the Paper money of *Can*, but spend Corals for money, and are clothed with the skins of beasts, or course Hempe. This Countrey appertayneth to the Prouince of *Tebeth*: for *Tebeth* is a very large Prouince, and hath beene sometime diuided into eight Kingdomes, hauing many Cities, and Townes, with many Mountaynes, Lakes, and Riuer, where Gold is found. The women weare Corall about their neckes, and hang it about the neckes of their Idols, as a precious thing. In this Countrey there are very great Dogs, as big as Asses, which take wilde Beasts, specially wilde 60
Oxen, called *Beyamini*. They are exceeding Necromancers, causing tempests, lightnings, thunderbolts, and many other wonders. There are many sorts of Spices neuer brought into these parts. This *Tebeth* is (as all the former Prouinces) subiect to the *Can*.

Whose glorie
is in their
shame.

Corall money.

Eight King-
domes of
Tebeth.

Caidu.

On the West of the Prouince of *Tebeth*, bordereth the Prouince of *Caidu*, sometimes gover-
ned

ned by her owne Kings, now by the Gouvernours of the *Can*. By the West you must not vnderstand that the Countries are in the West, but that wee departing from those parts which are betwixt the East and North-east come hither Westward: and therefore reckon them Westward. The people are Idolaters, haue many Cities, the chiefe called by the name of the Prouince, *Caindu*, built in the entry of the Prouince. There is a great salt Lake, in which is store of Pearles, white, not round, so abundant, that the price of them would become little worth, if they were suffered to be carried away at mens pleasures. Whereupon, it is provided vpon payne of death, that none should presume to fish for Pearle in this Lake, without the licence of great *Can*. There is also a Mountaine in which is found a Minerall of Turkeffe stones, confined to the like licence. Many Gadderi are also in this Prouince, which yeeld Muske. That Lake also which ingendreth Pearle in such plentie, aboundeth with Fishes: and the whole Countrey is full of wilde Beasts, that is to say, of Lions, Beares, Stags, Deere, Ounces, Roe-buckes; and diuers kinds of Birds. Cloues are found there in great plentie, which are gathered from small Trees, which haue boughs and leaues like the Bay-tree, but somewhat longer and straighter, white flowers and little, as are the Cloues, and when they are ripe they are blacke and duskie. Ginger, Cinamon, and diuers other Spices grow there in great plentie, which are not brought vnto our Countries. Wine groweth not in it, but in stead thereof they make excellent Drinke of Corne, Rice, and diuers other Spices. The Inhabitants of this Countrey worship Idols, by which they are so besotted, that they thinke they deserue their fauour, if they prostitute their wiues, sisters, and daughters to bee abused by Trauellers. For, when any Stranger commeth amongst them, euery housholder seeketh to giue him entertainment, and goe their way, leauing the femals and house to the Strangers will, and returne not vntill they depart. And the women presently hang vp some signe till he be gone, that when the Master of the familie returneth, he may know he is there still, and goe away againe, staying without till he be departed: which hee doth for the glorie of his Idols, hoping they will be more gracious vnto him. Certaine twigs of Gold are their money, vsing weights, and according to the weight of the twig is the value of the money. And this money is the greater money without stampe. They haue also a lesser, which they make after this manner. They boyle Salt in a Caldron an houres space, of which being congealed, they make little lumps like two-pennie loaves, which being made solid, is signed with the Princes Stampe, and make great profit thereof in sauage places, remote from Cities which haue store of Muske and Gold, and want Chapmen. These bartar their Gold for Salt to vse in their meats. Leauing this Prouince, they proceed fifteene dayes iourney further, and in the meane space meet with Castles, and many Villages, whose Inhabitants haue the same customes, that the Prouince of *Caindu* hath, and at length they come vnto a Riuer, called *Brim*, where the Prouince of *Caindu* is bounded. In this Riuer Gold is found in great plentie, which they call, *Di Paiola* (washed in vessels to seuer it from the sands and earth.) On the bankes thereof Cinamon groweth in great abundance. This Riuer runneth to the Ocean.

Gadderi.

Cloues.

Ginger, Cinamon.

The Inhabitants are Idolaters and Bawdes.

Money of Salt.

The Riuer *Brim* yeelding Gold.The seuen Kingdomes of *Caraian*. King *Scutemur*.The Citie *Iaci*.

Money of Stones.

Raw flesh.

Caraian. Riuer yeelding gold *di paiola*, that is washed in vessels from the sand & earth. Great Dragons.

Hauiing passed ouer the Riuer *Brim*, they come westward to the Prouince *Caraian*, which containeth seuen Kingdomes. It is subiect to the Great *Can*, whose sonne, named *Scutemur*, is made King of that Kingdome, who is rich, wise and iust. The Inhabitants thereof are Idolaters. You ride fife dayes and finde it all well peopled. They liue of their Beasts and Fruits. The Countrey breedeth excellent Horses: and it hath a peculiar and difficult language. At the end of those fife dayes is the chiefe Citie, called *Iaci*, and it is great and famous, hath in it many Merchants and Artificers, and many sorts of People, *Idolaters*, *Christians*, *Nestorians*, and *Saracens*; but the most Idolaters. It hath Corne, and much Rice, although they eate no bread of Corne, because it is not wholsome, but they make bread of Rice. They make drinke also of it, and diuers Spices very pleasant. They vse white Porcelanes in stead of money, and for ornaments which are found at the Sea. Much Salt is made in this Citie of the water of salt Wells, whereof the King hath great profit. The men of this Countrey care not if any man come to their Wiues, so they giue their consent. There is also a Lake there very full of Fish, containyng an handreth miles in compasse. Those men eate raw flesh of Hennes, Beefe, Mutton and Buffals, but prepared after this manner. They first breake it into small pieces, and after season it with excellent Spices; but the poorer sort shred it and lay it in Garlicke sawce, and eate it as wee doe boyled meate.

Departing from the Citie of *Iaci*, hauiing trauiiled ten dayes iourney westward, yee come to the Prouince named, as is the chiefe Citie, *Caraian*, which *Cogatin*, sonne of *Cublai*, gouerneth. The Riuer there yeeld very much gold *di paiola*, and also that which is more solid, and the Mountaines gold of the veine, and they giue one stone of gold for six of siluer. They spend Porcelanes for money, brought thither from *India*. The Inhabitants are Idolaters: very great Serpents are bred in this Countrey, whereof some containe ten paces in length, and in thicknesse ten spans. They haue two little feet before nigh the head, with three talons or claws like Lions, and the eyes bigger then a Groat loafe, very shining. They haue their mouthes and jawes so wide, that they are able to swallow a man; great and sharpe teeth: nor is there any man, or other liuing Creature, which may behold those Serpents without terror: there are found lesse, of eight

The taking
of them.

eight, sixe, or five paces long, which are taken after this manner. In the day time they vse to lie hid, by reason of the heat in holes, out of the which they goe by night to seeke their prey, and deuoure what soeuer they get, Lions, Wolves, or others: and then goe to seeke water, leauing such a tract with their weight in the sands, as if some piece of timber had bene drawne there. Whereupon the Hunters fasten vnder the sands sharpe Iron prickes in their vsuall tracts, whereon they are wounded and slayne. The Crowes presently ring his knell, and by their crawing cries invite the Hunters, which come and slay him, taking forth his gall, profitable for diuers Medecines (amongst other things, for the biting of mad Dogs, a pemie weight giuen in Wine; and for women in trauell, for carbuncles and pusses) and they sell the flesh deare as being exceeding delicate. There are bred great Horses in this Prouince, which by Merchants are carried into India. They vse to take one bone out of the tayle, lest he should bend his tayle hither and thither, and esteeme it more comely that it hang downe right. They vse long Stirrups as the Frenchmen; which the Tartars and other Nations for their shooting vse short, because when they shoot, they rise vp. They vse Targets and Armour in the Warres, made of the hides of Buffals: they haue Lances and Crosse-bowes, and poyson all their Arrowes. Some of them which are ill minded, are said to carrie * poyson about them continually, that if they be taken, they may suddenly swallow it and death together, to preuent torture. For which cause the great Lords haue Dogs dung ready, which they force them to swallow, and that forceth them to vomit the poyson. Before the great Can subiected them, they vsed, that when any Stranger which seemed of good presence and parts lodged with them, they slue him by night, supposing that those good parts of that man might abide afterwards in that house: and this was the death of many.

* Poyson and
Dogs dung.

stome.

Cardandan.
Vociam.

The rarenesse
of Siluer.
Golden cou-
rings for the
teeth.

Going from the Prouince Carazan, after five dayes iourney Westward, is the Prouince Cardandan, which also is subiect to great Can. The chiefe Citie thereof is called Vociam. The Inhabitants thereof vse Porcelanes and weighed pieces of Gold instead of money: for in that Countrey, and many other lying round about, Siluer mines are not found, and they giue one ounce of Gold for five ounces of Siluer, and great gayne is made by the change. The men and women of that Countrey couer their teeth with thinne plates of Gold, which they so fit vnto them, that the teeth themselves seeme (as it were) to be set in the plates. The men about their armes and legs make lists, pricking the places with Needles, and putting thereon a blacke inde-
30
lible tincture. And these lists or markes are esteemed with them a great galantrie. They giue their minds to nothing but riding, hunting, hawking, and exercises of Armes, leauing the household cares to the women, who are helped therein by slaues which they buy or take in Warre. When a woman is brought to bed, shee forsakes the bed, washeth the child and dresseth it, and then the husband * lieth downe and keepes the child with him fortie dayes, not suffering it to depart: is visited meane while of friends and neighbours, to cheare and comfort him. The woman lookes to the house, carrieth the husband his broths to his bed, and giues sucke to the child by him. Their Wine is made of Rice and Spice, their meat Rice, and raw flesh dressed, as is before mentioned. In this Prouince there are no other Idols, saue that euery familie adoreth the oldest man in the house, of whom they say come themselves and all they haue. They dwell for the most
40
part, in wilde and mountainous places. But Forrainers come not to those Mountaines, because the ayre would kill them, being in Summer very corrupt. They haue no letters, but make their Contracts and Obligations by tallies of wood, the halfe whereof the one keepeth, and the other, the other: which being afterward payd, the tallie is rendred. There are no Physicians in this Prouince, nor in Camdu, Vociam and Caraian: but when any is sicke, they call the Magicians, or Idoll Priests together, and the sicke partie declareth his disease vnto them: then the Magicians dance, and sound certaine instruments, and bellow forth songs in honour of their Gods, while at length the Deuill entreth into one of them skipping and playing in the dance. Then leauing the dance, they consult with him that is possessed, for what cause that disease hap-
50
ned vnto him, and what is to be done for his recouerie. The Deuill answereth by him, because he hath done this or that, or because he hath offended this or that God; therefore, he fell into this disease. Then the Magicians intreat that God to pardon him that offence, promising, that if the sicke partie recouer, he shall offer a Sacrifice of his owne bloud. But if the Deuill thinke the weake partie to be sicke of such a disease that he cannot be freed from the same, he vseth to answer: This man hath so grievously offended that God, that he cannot by any sacrifices bee appeased. But if he thinke he shall recouer, he commandeth to offer so many Rammes hauing blacke heads, and to prepare so many Magicians with their wiues, by them to offer Sacrifices, and that God may then bee appeased towards him. Which being heard, his kinsmen quickly cause those things to be done which the Deuill commanded: they kill Rammes, and sprinkle their bloud in the ayre, and the Magicians assembled with their Witches, light great Candles,
60
and perfume the whole house with incense, making fume of Lignum Alces, and sprinkle the broth of the flesh in the ayre, together with the potion made of Spices: all which being duely performed, they skip about againe in a dance in honour of that Idoll, which is supposed to haue bene fauourable to the sicke, singing, and making an horrible noyse with their voyces. These things

the Magicians.

things being done, they aske the possessed againe, whether by these things the Idol be appeased. If he answer, No, they presently prepare themselves to fulfill another command of his. But if he answer, that he is satisfied, they sit downe at the Table, and eate the flesh offered to the Idoll with great ioy, and drinke the confections. And dinner being ended, and the Magicians payed, euery one returneth to his owne home. And when the sicke hath thus escaped the disease, through the prouidence of God, and hath beene restored to health, they attribute it to the Idoll whom they sacrificed. But if he die, then they say, the Idoll was defrauded, and that some of the Sacrificers tasted thereof first. This is not done to all but to the Richer, the Deuill deluding their blindnesse.

¶ VII.

*Of the Prouince of Mien and Bengala, how they were conquered to the Can: Of Cangi-gu, Amu, Tholoman, Cintigui, and some other parts of Cataio.
And of the Conquest of Mangi.*

ANno Dom. 1272. the Great Can sent an Armie into the Kingdome of *Vociam*, and *Carazan* to guard it, to the number of twelue thousand expert warriors, vnder the conduct of *Nestardin* a wise Captaine. As soone as the King of *Mien*, and the King of *Bengala* heard of their comming, assembling their forces, they ioyned Horse and Foot together, about threescore thousand, and about a thousand Elephants bearing Castles, and in euery Castle twelue or sixteene armed men were placed. With this Armie the King of *Mien* speedily marched towards the Citie *Vociam*, where the Armie of the Tartars rested. *Nestardin* comming forth with a manly courage to fight against the Enemie, encamped against a certaine great Wood, knowing that the Elephants with those Towres were not able to enter into the Wood. Then the King of *Mien* marcheth forth to meete them. But the Tartarian Horses perceiving the Elephants to be present, which were placed in the first front of the battaile, were terrified with so great feare, that they could not by any violence or policy be prouoked against the Elephants. The Tartars therefore were compelled to alight from their Horses, and tying them to the Trees of the Wood, they come to fight on foot against the Elephants. In the front of the battaile, all the Tartars purposely shot a multitude of Arrowes against the Elephants, which not able to indure the strokes of the Arrowes, speedily betooke themselves to flight, and with swift course went all vnto the next Wood, and brake their Castles, and ouer-threw the armed men sitting in them, which the Tartars seeing, runne vnto their Horses, and getting vpon them, furiously fall vpon the Kings Armie with great violence: and many of either Armie fell, at length the King of *Mien* being put to flight, left the victorie to the Tartars, who hasten to the Wood, and taking many Captiues, vsed their helpe to take two hundred of these Elephants. And euer since Great Can hath vsed Elephants in his Armies which before hee had not accustomed. Hereupon also he vanquished the Countries of the King of *Mien* and *Bengala*, and subiected them to his Empire.

Departing from the Prouince of *Cardandan*, is a great descent, which continueth two dayes and a halfe, nor is there any habitation there, but a very large Playne, in the which, three dayes in the weeke many men meete together for Trading. Many descend from the great Mountaines of that Countrey, bringing gold with them to change for siluer, to wit, giuing one ounce of gold for five ounces of siluer: whereupon, many Merchants from forraine Nations come thither, who bringing siluer carrie away gold, and bring thither merchandises to sell to those people. For to those high Mountaines, in which, they who gather gold in that Countrey, dwell, no stranger can come, seeing the way is vnpassable and intricate. When you are past that Playne, going toward the South, *Mien* bordereth vpon *India*, and the way lyeth fifteene dayes iourney in places not inhabited and wooddy, in which innumerable Elephants, Vnicornes, and other wild beasts wander.

After that fifteene dayes is found *Mien*, a great and noble Citie, the head of the Kingdome, and subiect to Great Can. The Inhabitants thereof haue a peculiar language, and are Idolaters. In this Citie there was a King, who being readie to die, commanded that neere to his Sepulchre, there should be made two Towres in Pyramide fashion, one at the head, the other at the feete, both of Marble, of the heighth of ten fathom. On the top was a round Ball. He caused one to be couered all ouer with gold a finger thicke, and the other with siluer. And vpon the top round about the Balls, many little golden and siluer Bells were hanged, which at the blowing of the winde gaue a certaine sound. The Monument or Sepulchre was also couered with Plates, partly of gold, partly of siluer. He commanded this to be made in honor of his Soule, and that his memorie should neuer decay among men. And when Great Can minded to subdue this Citie, hee sent a valiant Captaine, and the greatest part of his Armie were Iesters, of which his Court is alway furnished. These winning the Citie, would not violate that Monument without the Cans knowledge,

* This by relation; for they vse not to carry about three or foure.
His stratagem.

Fight & flight of Elephants.

Market in a dis-habited Playne.
Change of gold and siluer.

Vnicornes or Rhinoceroses
Mien.

The picture of the Tartars towards the dead knowledge, who hearing that the deceased had made it for the honor of his Soule, would not suffer it to be stirred: for the manner of the Tartars is, not to violate those things which belong to the dead. In this Prouince are many Elephants, wild Oxen, great and faire Stagges and Deere, and other wild Beasts of diuers kindes.

Bengala.

The Prouince *Bengala* bordereth vpon *India* toward the South, which Great *Can* subdued, when *Marco Polo* liued in his Court. The Countrey hath a proper King, and peculiar language. The Inhabitants thereof are all Idolaters: they haue Masters which keepe Schooles and teach Idolatries and Inchantments; a thing common to all the great Men of that Countrey. They eate Flesh, Rice and Milke: they haue Cotton in great plentie, and by reason thereof, much and great trading is exercised there: they abound also with Spike, Galangal, Ginger, Sugar, and diuers other Spices. Huge Oxen also are there, comparable with Elephants in height but not in thicknesse. Many Eunuches are made in this Prouince, which are afterwards sold vnto Merchants. This Prouince continueth thirtie dayes iourney, in the end whereof going Eastward is the Prouince of *Cangiu*.

Oxen as bigge as Elephants. Eunuches.

Cangiu. The Kings many wiues.

Cangiu hath his proper King and peculiar language. The Inhabitants thereof worship Idols, and are Tributaries to Great *Can*. Their King hath about three hundredth Wiues. Much gold is found in this Prouince, and many Spices, but they cannot easily be transported, seeing that countrey is farre distant from the Sea. There are also many Elephants in it, and much game of many wild Beasts. The Inhabitants thereof liue with Flesh, Milke and Rice. They want Wine, but they make good drinke of Rice and Spices. Aswell the Men as the Women vse to embroider their Faces, Necks, Hands, Bellies and Legs, making the Images of Lions, Dragons and Birds, and so firmly imprint them that they cannot easily bee put out: and the more such Images any one hath, by so much is hee esteemed the more gallant. And there be Professors of this foolish Art of flesh embroidery, which vse no other Trade but this Needle-worke, and dying of Fooles-skinnes.

Embroidred Gallants.

Amu.

Amu is an Easterly Prouince subiect to Great *Can*, whose Inhabitants worship Idols, and haue a peculiar language. They abound with Herds of Cattell, and haue plentie of Victuals, and many Horses and those excellent, which Merchants bring into *India*. They haue also many Buffes and Oxen, because there are delicate Pastures there. As well Men as Women, weare bracelets of gold and siluer of great value on their armes, also the like on their legs: but those of the Women are of most value. From *Amu* to *Cangiu* are five and twentie dayes iourney.

Tholoman.

The Prouince *Tholoman* is eight dayes iourney distant to the East from *Amu*, subiect vnto Great *Can*, hauing a peculiar language, and worshipping Idols. The Men and Women thereof are tall and goodly, of a browne colour. The Countrey is very well inhabited, hauing many and strong Castles and Cities. The men are exercised in Armes and accustomed to warre. They burne the bodies of their dead, and inclosing the Reliques of their bones in a Chest, hide them in the Caves of the Mountaines, that they cannot bee touched either of man or beast. Gold is in great plentie there, and in stead of money they vse Porcelanes brought from *India*, as also in *Cangiu* and *Amu*.

Cintigui.

Cloth made of Barkes: which are now vied in Congo. Great and hardie Dogs.

From the Prouince *Tholoman*, the way leadeth towards the East on a Riuer, by which are many Cities and Castles, and at the end of twelue dayes you come to the great Citie *Cintigui*. The Countrey is subiect to Great *Can*, and the Inhabitants thereof are addicted to Idolatrie. Excellent Clothes are made in this Countrey of the barks of Trees, wherewith they are clothed in the Summer. Very many Lions are there, so that for feare of them, none dare sleepe without doores by night. The ships which goe vp and downe the Riuer, for feare of the Lions, are not fastned to the banke. There are great Dogs in the same Countrey, so hardie and strong, that they feare not to aduenture on the Lion: And it often hapneth, that two Dogs and one Archer kill a Lion: for the Dogs set on by the man giue the onset, and the Lions nature is presently to seeke shelter from some Tree, that the Dogs may not come behind him: neither yet will his great heart suffer him to runne from the Dogs, lest he should seeme afraid; but he holds his statelie pace, the man meanwhile shooting, and the Dogs fastning on his hinder parts, but with such quicknesse, that when the Lion turnes on them they are gone. And then doth this magnanimous Beast hold on his way againe to seeke such Tree succour, that with Bitings and Arrowes he sometimes comes short, and with expence of bloud dyeth by the way. This Countrey aboundeth with Silke, which by Merchants is carried to diuers Prouinces by the Riuer. They liue on Merchandise, their money is Paper. They are valiant in Armes. At the end of ten dayes is the Citie *Sidinfa*, and twentie dayes from thence is *Gingui*, and foure dayes thence is *Pazanfa* towards the South, and is in *Cataio* returning by the other side of the Prouince. The people are Idolaters and burne their dead. There are also certaine Christians which haue a Church: all vnder the *Can* and vse Paper money. They make Clothes of Gold, and Silke, and Launes very fine. By this Citie (which hath many Cities vnder it) goes a great Riuer which carries store of merchandise to *Cambalu*, made by many Channels to passe thither. But wee will passe hence, and proceeding three dayes iourney, speake of *Cianglu*.

Sidinfa. *Gingui.* *Pazanfa.*

Cianglu.

Cianglu is a great Citie toward the South of the Prouince of *Cataio*, subiect to the *Can*, the Inhabitants are Idolaters, and burne their dead. Their money is the (Mulberie) Paper coine of the *Can*.

Can. In this Citie and the Territories they make store of Salt, for that Earth is very salt, and out of it they get Salt, after this manner. They heape vp Earth in manner of an Hill, and powre water vpon it, which drawes the saltnesse of the Earth vnto it, and then runnes into certaine Conduits, and is boyled in Pannes till it be congealed to Salt faire and white, to the *Cans* and their great gaine, being carried into other Countries to sell. There are great Peaches very good, which weigh two pounds a piece. Fiue dayes iourney beyond the Citie *Ciangli*, in *Cataio* Southward standeth another Citie, named *Ciangli* (in which way are many Cities and Castles, all subiect to the *Can*) through the middest whereof runneth a great Riuer, very conuenient for shipping laden with merchandises.

The Salt of *Ciangli*.

Great Peaches *Ciangli*.

10 Six dayes iourney thence to the South (all which way hath great Cities and Castles of Idolaters) is the noble Kingdome and great Citie *Tudinsu*, which had his proper King, before it was subdued to Great *Can*, Anno 1272. and hath eleuen Royall Cities, famous for traffick, subiect to the iurisdiction thereof. It is very delectable for Gardens and Fruits, rich in Silkes. The *Can* sent to the gouernment hereof one of his Barons, named *Lucansor*, with eightie thousand Horse: who rebelled against his Lord, but was slaine by a power of one hundred thousand vnder two other Barons sent against him, and the Countrey reduced to obedience. Seuen dayes off (riding by many Cities and Castles of Idolaters, plentifull of all things) towards the South is the famous Citie, named *Singumatu*, vnto the which on the South, a certaine great Riuer runneth, which being diuided by the Inhabitants of the place into two Riuers, floweth partly to the East towards *Cataio*, and partly to the West towards *Mangi*. By these Riuers, innumerable Vessels for multitude, and incredible for their greatnesse and wealth, bring necessities to both Prouinces. If you goe sixteene dayes iourney towards the South from *Singumatu*, you still meet with Cities and Townes where much trading is exercised. The Inhabitants of these Countries are Idolaters, subiect to Great *Can*.

Tudinsu.

Singumatu.

20 After that sixteene dayes, you come vnto a great Riuer, named *Caramoran*, which is said to flow out of the Kingdome of *Vmcan* or *Presbyter John*, of the North. It is very deepe, and carrieth Ships of great burthen: it is also stored with Fish. Within one dayes iourney of the Sea there are in this Riuer fifteene thousand Saile, each of which carrieth fifteene Horses and twentie Men, besides Victualls and the Mariners. This is the *Cans* Fleet kept there in readinesse, to carrie an Armie to any of the Ilands in the Sea, if they should rebell; or to any remote Region Neere the banke of the Riuer where these Ships are kept, is *Coiganzu*, and ouer against it *Quanzu*, one a great Citie, the other small. After you are past that Riuer, you enter into the noble Kingdome of *Mangi*. And doe not thinke that wee haue handled in order the whole Prouince of *Cataio*: yea, I haue not spoken of the twentieth part. For, *M. Polo* passing by the said Prouince, hath onely described the Cities in his way, leauing those on both hands, and those betwixt these, to preient tediousnesse.

Caramoran.

30 The Prouince of *Mangi* is the most rich and famous that is found in the East: and An. 1269. had a certaine King, named *Fanfur*, richer and mightier then any which had reigned there in an hundred yeeres, but a man peaceable and full of almesdeeds, so beloued of his subiects, that thereby, and by the strength of the Countrey, he seemed inuincible. Whereby it came to passe, that the King aswell as the People, lost the vse and exercise of Warre and Armes. All the Cities were compassed with Ditches, a Bow shoot broad, full of Water. Hee held in pay no Horses, because he feared none. And hence it came to passe, that the King giuing himselfe to pleasure more then was meete, enioyed continuall delights. He maintayned about a thousand goodly Lasses, with which he passed his time in pleasure. He nourished Iustice, and preferred Peace. No man durst offend his Neighbour, and disturbe the Peace, for feare of seuer vnpartiall punishment. So that Artificers would often leaue their Shops full of Wares open by night, and yet none would presume to enter into them. Trauailers and strangers most safely walked day and night, throughout that whole Kingdom, fearing no man. The King himselfe also was pitifull and mercifull towards the Poore, and forsooke not them that were oppressed with necessitie, or pinched with penurie. Besides, every yeere hee tooke vp twentie thousand young Infants, cast off by their Mothers, which through pouertie were not able to keepe them, which he brought vp, and set them when they were growne to some Trade, or married the young Men with the Maids which hee had in like sort educated.

Fanfur King of *Mangi*, which is now called *China*.

50 *Cublai Can* was of a differing disposition to *Fanfur*, and delighted onely in Warres and Conquests, and to make himselfe Great; he sent a great Armie leuiued of Horse and Foot, and made one, named *Chinsan Baian* (that is, one hundred eyes) Generall thereof. Hee, therefore comming with his Armie and a Fleet to the Prouince of *Mangi*, first summoned the citie *Coiganzu* to yeeld obedience to his Emperour. Who refusing the same, hee departed without any assault giuen to the Citie: and required the same of the second Citie; which likewise refusing, he marched forward to the third, and fourth, and received the like answere of them all. But he assaulted the next with great courage, and vanquished the same by force, and slue every mothers child therein; which so affrighted and terrified the rest, that they all presently yeelded. Moreouer, Great *Can* sent another great Armie after the former, with both which Armies hee marched against the chiefe Citie *Quinsai*.

Chinsan Baian, another *Argus* in the signification of his name.

Kings Court.

The flight of
King Fanfur.

* This name
Mangi and
China, are so
different that
they may seem
diuers Regi-
ons. But the
Reader is to
obserue, that
China is a
name to the
Chinois vn-
knowne, and that Kingdome hath appellations diuersly diuersified: either from the Familie reigning (which now is called *Ciu*, and the Kingdome *Min*, and *Min Ciu*, are not farre from *Mangi*) and by the *Tartars*, when they reigned, it was called *Han*, and before, *Chen*, which both put together make *Han Chen*, without any great dissonance from *Mangi*: Or else by generall appellations com-
mon to all ages, &c. See our following relations of *Ricci* and *Trigautin*.

Quinsai, where the King of *Mangi* resided: who mightily terrified, as neuer hauing seene any battell, fled with his wealth and treasures in ships which he had prepared to certaine impregnable Ilands in the Ocean (where he after died) committing the custodie of the Citie of *Quinsai* to his wife, bidding her to defend it as well as shee could; for being a woman shee need not feare death, if shee were taken. It is to be obserued, that King *Fanfur* had bene told by his Diuiners, that his Kingdome should neuer be taken from him, but by one which had an hundred eyes: which the Queene knew, and therefore was still in hope not to lose the Citie, howsoeuer streightned; thinking it impossible for one man to haue an hundred eyes. But one day she heard, that the Commander of the *Tartars* was called *Baian Chinsan*, that is to say, An hundred eyes, and was much terrified: wherefore, calling for the Commander of the *Tartars* Armie, thin-
king him to bee the man which the Astrologers spake of, shee deliuereth the Citie vnto him. Which being heard, the Citizens, and Inhabitants of the whole Prouince, reuolted to the obedience of great *Can*. The Queene was sent vnto the Court of great *Can*, and was most honourably receiued by him, and maintayned like a Queene. And now wee will speake of the Cities of * *Mangi*.

10

Q. VIII.

Of the Cities of Mangi (now called China) and the rarities thereof: the many wonders of Quinsai, the Palaces, Pleasures, Rites and Gouvernement, obserued by the Natives, and the Tartars.

Nanghin.

Coiganzu is a faire and rich Citie, situate towards the South-east, and East in the entrance of the Prouince of *Mangi*, (from Cataio, whence the *Amhour* passed) where are alway great store of ships, being seated on the Riuer *Caramoran*. Great store of Merchandise is carried thither. Salt is also made there in great abundance.

Going from *Coiganzu*, you ride towards the South-east one dayes iourney on a stone * Cause; on both sides whereof are great Fennes with deepe waters, whereon they may passe with ships: neither is there any entrance into *Mangi* but by shipping (as the Captaine of the *Can* did) but by this Cause. At the end of that dayes iourney is a Citie called *Paughin* great and faire. The people make clothes of Gold and of Silke, are Merchants and Idolaters. The Paper money of great *Can* is receiued throughout that whole Countrey. It is plentiful of all necessities of life.

To the Citie *Caim*, is from *Paughin* one dayes iourney South-east, and this is also a famous Citie, abounding with fish, and game, of beasts, and fowle: especially Pheasants are found there, in exceeding great plentie, as great as Peacocks, of which you may haue three for one Venetian groat.

Proceeding further hence one dayes iourney, you come thorow a well manured and peopled Countrey to the Citie *Tingui*, which although it be not great, yet hath it exceeding great plentie of victuals. They are Merchants, and very many ships are also there: plentie of beasts and fowles: It is seated to the South-east, and on the left hand towards the East three dayes iourney off is the Ocean: and in the space betweene, are very many Salt pits; and they make great store of Salt. After this, is *Cingui* a great Citie, whence the Countrey is furnished with Salt, whereof the *Can* makes great profit, beyond beliefe. They are Idolaters, and haue Paper money. From *Cingui* riding towards the South-east, you meet with the noble Citie *Iangu*, vnder the gouernment whereof are other Cities, seuen and twentie in number. And in that Citie resideth one of the twelue Barons which are Gouernours of Prouinces chosen by the great *Can*. They are Idolaters, and liue of Merchandise. They make Armes and Harnasse for warre. And Master *Marco* had the sole gouernment thereof by commission of the great *Can*, three yeeres together in stead of one of those Barons.

Nanghin is a Prouince to the West, one of the greatest and noblest of *Mangi*, a place of great Merchandise. They are Idolaters, spend Paper money, haue store of beasts and fowle, wilde and tame. They make clothes of Gold and Silke, and are rich Merchants, and the Countrey is very commodious to the *Can*, specially by Customes of Merchandise. There is great plentie of Corne. *Sianfu* is a noble and great Citie in the Prouince of *Mangi*, and hath twelue rich and great Cities subiect vnto her iurisdiction. They make great store of Silkes and cloth of Gold, haue plentie of game and fowle, and of all things pertayning to a Citie of note: so strong, that it was three yeeres besieged, and could not be vanquished by the Armie of the *Tartars*, when the Prouince of *Mangi* was subdued. For it is compassed on euery side with Lakes, that there

Was

was no way vnto it, but on the North: so that ships came and went continually, bringing plenty of victuals: which not a little afflicted great *Can*. The two brethren Master *Nicolo*, and Master *Maffio*, then in his Court, hearing hereof, went to him, and offered their seruice to devise certaine Engines after the manner of the West, able to shoot a stone of three hundred weight, thereby to kill men, and ruine houses. The *Can* appointed them the best Carpenters which were *Nestorian* Christians, who made three (*Mangani*) of those Engines in a short space, which were proued and approued before him, and by ships sent vnto his Armie. Planting them therefore against the Citie *Sianfu*; they began to cast great stones into the Citie: and the first falling vpon a certaine house, brake it for the most part, with the violence thereof. Which the besieged Inhabitants seeing, were very much astonished, and yeelded themselves, and became subiect to the obedience of great *Can*, on the same conditions with the rest of *Mangi*; to the great repute of the two *Venetian* brethren.

From the Citie *Sianfu*, to a certaine Citie, named *Singui*, are numbred fifteene miles South-eastward, which although it be not great, yet hath it an exceeding multitude of Ships, being seated vpon the greatest Riuer in the world, called *Quian*, the bredth of which in certaine places, containeth ten miles, in other eight, and in some sixe. But the length thereof extendeth it selfe aboute an hundred dayes journey from the head to the Sea. Innumerable other Riuers flow into it, which runne thorow diuers Regions, and are nauigable, and make it so great; incredible store of Merchandise is brought by this Riuer. There are also very many other Cities, in number about two hundred, which participate of this Riuer: it floweth through the bounds of sixteene Prouinces. The greatest commoditie is Salt, wherewith all the Cities which communicate in these waters are stored. Master *Marco* saw at one time at *Singui* siue thousand ships, and yet other Cities on that Riuer haue more. All those ships are couered, and haue but one mast, and one sayle, and vsually carrie foure thousand, and so vpwards, some of them twelue thousand *Venetian* Cantari. Neither vse cordage of Hempe, except for the mast and sayle, but haue Canes fifteene paces long, which they riuie into thinne parts from one end to the other, and binding the cut pieces together, and wreathing them, make very long ropes, so that some of them containe three hundred fathom in length. And those lines are as strong as Hempen, and serue for halbes and cables to draw their ships vp and downe the Riuer, each ship hauing ten or twelue Horses for that purpose. On that Riuer in many places are rockie hillockes, on which are built Monasteries to their Idols: and all the way are Villages and places inhabited.

Cayngui is a little Citie, vpon the foresaid Riuer South-eastward, where euery yeere is brought store of Corne and Rife, carried the most part to *Cambalu*. For they may passe thither by Lakes and Riuers, and by one deepe large hand-made Riuer, which the *Can* caused to be made for passage from one Riuer to another, and from *Mangi* to *Cambalu* without going to Sea. Which worke is goodly and wonderfull for the site and length, and more for the profit thereby to the Cities. Hee hath made also great Causes to goe on land by those waters commodiously. In the mids of the said Riuer is an Island of a Rocke, on which is erected a great Temple and Monasterie, in which are two hundred Idolatrous Monkes. This is the Mother-temple and Monasterie of many others.

Cinghianfu is a Citie of *Mangi*, rich in Merchandise, plentifull of game, of wilde beasts and fowle, and of victuall. In it are two Churches of *Nestorian* Christians, built Anno 1274. when the great *Can* sent Gouvernour thither, *Marsachis* a *Nestorian*, which built them.

From the Citie *Cinghianfu*, in three dayes journey South-eastward, you find many Cities and Castles all Idolaters, and at last come to the Citie *Tingui*, a great and faire Citie, abounding with all kinde of victuals. When *Chinsam Baian*, Generall of the Armie of the *Tartars* conquered the Prouince of *Mangi*, he sent many Christians (called *Alani*) against this Citie, which was double walled; into the inner they retired; into the other the *Alans* entred, and found there abundance of Wine, whereof after a bad iourney, they began to drinke so largely, that they were all drunke: and the Citizens in their sleepe suddenly falling vpon them, slue them all, none escaping. But *Baian* hearing this, sent another great Armie against those Citizens, which shortly vanquishing the Citie, in reuenge, put them all to the sword, leauing none alieue.

The great and excellent Citie *Singui*, containeth in circuit twentie miles. Great multitudes of people are in it: it hath many rich Merchants, and cunning Artificers, and it hath also very many Physicians, and Magicians, and Wisemen or Philosophers. In the Mountaines of this Citie, Rhubarb and Ginger grow in great plenty. This Citie hath sixteen Cities vnder the iurisdiction thereof, where much trading is vsed, and very many curious Arts are exercised. Very many Silkes are made there. The word *Singui*, in their language, signifieth, *The Citie of the Earth*, as if they haue another Citie, which they call *Quinsai*, that is to say, *The Citie of Heauen*. From *Singui* one dayes journey is *Vagin*, where is also abundance of Silke, and cunning Artificers with many Merchants.

Going from *Vagin* three dayes, continually you find Cities, Castles, and Villages, well peopled and rich. The People are Idolaters, vnder the *Can*: at the end of those dayes you

tions.

come to *Quinsai*, which for the excellency hath that name (interpreted *Citie of Heauen*) for in the World there is not the like, in which are found so many pleasures, that a man would thinke he were in *Paradise*. In this Citie Master *Marco Polo* hath often bene, and considered the same with great diligence, obseruing the whole state thereof, setting downe the same in his memorials, as here shall be declared briefly. This Citie by common opinion, is an hundred miles in circuit; for the streets and channells thereof are very wide. There are Market places exceeding large. On the one side a cleere Lake of fresh water, on the other a great Riuer which enters in many places, and carries away all the filth of the Citie, and so runneth into that Lake, thence continuing his course to the Ocean: which causeth a good ayre, and commodious passage both by land, and by these channells. There may goe both Carts and Barks to carrie necessaries: and the report is, that there are twelue thousand Bridges great and small, and those on the chiefe channells are so high that a ship without her Mast may passe vnder, and aboue, Chariots and Horses.

On the other side the Citie is a Ditch, about fortie miles long, which encloseth it on that side; large and full of water from the Riuer, made by the antient Kings of that Prouince, both to receiue the overflowings of the water, and to fortifie the Citie: the earth which was taken out being layd within as a banke or hill encompassing. There are *ten chiefe Market-places* (besides infinite others along the streets) which are square, halfe a mile in each square. And from the forepart of them is a principall street fortie paces wide, running right from one end of the Citie to the other, with many Bridges trauerling it. And every foure miles is found such a Market-place, two miles, as is said, in compasse. There is also *one large channell*, which runnes against the said street, behind the Market-places, on the next banke whereof are erected great Store-houses of stone, where the Merchants from *India*, and other parts lay vp their Merchandise, at hand, and commodious to the Market-places. In each of these Market-places is a concourse three dayes in the weeke of persons betwixt fortie and fiftie thousand, which bring thither all things that can be desired for mans life, of all beasts of game, and fowles; that Lake yeelding such commodiousnesse to bring them vp, that for a *Venetian* groat you may haue two Geese, and foure Duckes for as much. Then follow the *Butcher-rows* of Veale, Beefe, Kid, and Lambe, which the great and rich men eat; for the poore eat vncleane meats without respect. There are all sorts of herbs and fruits continually, and amongst the rest *huge Peares*, weighing ten pounds a piece, white within like paste, and very fragrant: Peaches yellow and white very delicate: Grapes grow not there; but are brought from other places dried very good, and Wine also, but not so esteemed in these parts, that of Rice and Spices contenting them. Every day from the Ocean is brought vp the Riner (which is the space of fise and twentie miles) great quantitie of fish, besides that of the Lake, so much as a man would thinke would neuer be bought, and yet in a few houres is gone. All those Market-places are encompassed with high houses, and vnderneath are shops of Artificers, and all sort of Merchandises, Spiceries, Jewels, Pearles, and in some onely Rice-wine. Many streets answer one another in the said Market-places. In some of them are many Baths of cold waters accomodated with attendants of both sexes, a thing which from children they vse themselves vnto. There are chambers also in the said Baths with hot waters for strangers which are not accustomed to the cold waters. They wash every day; neither doe they eat before they haue washed.

In other streets are mercenarie Prostitutes in such number, that I dare not report it: and not onely neere the Market-places, where they haue their places appointed, but thorow all the Citie they stand very pompously with great odours, many seruants, and their houses adorned. These are very practike in making sports, and dalliances, and sweetest pleasures rauishing (*fooles*) forth of themselves. In other streets are the Physicians, the Astrologers, they which teach to reade and write, and infinite other Trades. At each end of every Market-place is a Palace, where Lords and Gouvernours are appointed by the King to determine difficulties which happen betwixt Merchants or others, as also to looke to the Guards on the Bridges, punishing the negligent. Alongst the principall Street (whereof wee spake) on both sides are great Palaces with Gardens; and neere them houses of Artificers, and such multitudes of people continually going to and fro, that a man would wonder whence such multitudes should bee provided of victuals. And Master *Marco* learned of an officer of the Custome-house in *Quinsai*, that by reckonings appeared the daily expence of Pepper in *Quinsai*, to be three and fortie *Somes*, and every *Soma* two hundred twentie three pounds. Hence may be ghesse the quantitie of Victuals, Fleish Wine, Spiceries, were there spent.

The Inhabitants are Idolaters, spend Paper money, are white and faire complexion, apparelled for the most part in Silke, which growes in all that Territorie abundantly, besides that which is brought from other places. There are twelue principall mysteries, each of which he one thousand shops; and in each shop or standing, are ten men, fiftene, or twentie at worke, and in some fortie vnder one Master. The rich Masters doe no worke with their hand but stand ciuilly adorned, or rather pompously, especially their wiues, with Jewels inualluable and although the antient Kings ordayned, that the child should bee of the fathers Trade; the rich

rich are permitted not to worke, but to keepe shop, and men working in the same Trade. Their Houses are well ordered, and wrought richly, adorned with Pictures and other stupendious costs. The Natives are peaceable, know not to manage Armes, nor keepe them in their Houses: nor is there strife and debate amongst them. They make their workes with great sinceritie. They loue in such amitie, that one Street seemes as one House, without jealousies of their Wiues, which they hold in great respect, and it would be reputed great disgrace to speake a dishonest word to a married Woman. They entertayne Merchant-strangers kindly, both in their houses, and with best aduice for their affaires. But they are loth to see Souldiers and the Guards of the Grand Can, as by whom they are bereft of their naturall Lords and Kings. Great neigh-
bourhood.

- 10 About the Lake are built faire Buildings and great Palaces of the chiefe men: and Temples of their Idols with Monasteries of many Monkes. In the midst of the Lake are two Ilands, vpon each of which is a Palace with incredible numbers of Roomes; whither they resort vpon occasions of Marriages or other Feasts; where Prouisions of Vessels, Naperie, and other things are maintayned in common for such purposes, one hundred sometime accommodated at once in feuerall Roomes. In the Lake also are Boates and Barges for pleasure, adorned with faire Seates and Tables, and other prouisions for Bankets, couered aboue and plaine, vpon which men stand with Poles to make the Boat goe, the Lake being but shallow. Within they are painted; without, are windowes to open and shut at pleasure. Nor can any thing in the World seeme more pleasant then in this Lake to haue such an obiect, the Citie so fully presenting it selfe to the eye, with so many Temples, Monasteries, Palaces, Gardens with high Trees on the Waters, Barges, People: for their custome is to worke one part of the day, and to dispenſe some part to this solace with their Friends, or with Women in the Lake; or else by Chariots riding thorow the Citie, which is also another of the *Quinsay* pleasures. For all the streets are paved with stone; as also are all the high Wayes in the Prouince of *Mangi*, onely for the Postes is left on the side, a space vn timer. The principall street of *Quinsay* is paved ten paces on each hand, and in the midst it is full of Grauell with passages for the Water, which keepe it alway cleane. On this street are alway innumerable long close Chariots, accommodated with Clothes and Cushions of silke, for six persons; which solace themselves in the street, or goe to Gardens, and there passe the time in places made by the Gardeners for that purpose, and returne at night in the said Chariots.

- 30 When one is borne, the Father sets downe the print of Time, and with that note goes to the Astrologer to consult of his future fortunes. Of these Astrologers are a great number in euery Market place. They will not celebrate a marriage without such consultation. When one dies that is of note, his Kindred clothe themselves in Canuasse, and so both Men and Women accompanie him to the burning place, playing on Instruments, and singing all the way prayers to their Idols: and being come to the place, cast into the fire many Papers of Cotton, whereon are painted Slaues, Horses, Camels, Clothes of gold and silke, Monies, which they thinke hee shall really possesse in another World; and make such minstrellie, in conceit of the ioy wherewith the Idols there receiue his Soule, where hee beginneth (they say) to liue anew. In euery street are 40 Towres of stone, whither in danger of fire they vse to carrie their goods, their timber houses being much subiect to such casualtie.

- The Can hath ordayned that on the most part of the Bridges, day and night, there stand vnder a couert ten Guardians, fise by day and fise by night: and in euery Guard is a Tabernacle of Wood with a great Bafon, whereby they know the houres of the day and night, which at euery houres end the Warders strike to notifie what houre, one, two, &c. beginning at the Sunne rising, and then againe at the beginning of the night. They walke vp and downe, and if any haue a light or fire after the deputed time, they cause him to answer it before the Iustices or Gouvernors aforeſaid; or if any walke later. If any be not able to worke, they carrie him to Hospitals, of which are exceeding many founded by the Kings of old, with great reuenues, thorow the Citie. When they are well againe, they are compelled to worke. If a fire happen; these from diuers places come to quench it, and to carrie the goods into Boats, or the Ilands, or those Towres: for in the night the Citizens dare not come out, but those who are in danger. The Can alway keepeth here store of his best and faithfulest Souldierie, as being the best and richest place in the World. Within a mile of each other are builded Rampiers of wood, where a sound is made to be heard further off, for like purposes.

- 50 When the Can had reduced all *Mangi* to his obedience, hee diuided it (being before but one Kingdome) into nine parts, and set a King ouer each, which there administers iustice. Euery yeere they giue account to the Cans Officers of the reuenues, and other accidents: and euery third yeere are charged, as all other Officers are. One of these Deputie-Kings is resident at *Quinsay*, who is Gouvernour of aboue one hundred and fortie Cities, all rich and great. Nor may this be a wonder, seeing in *Mangi* there are twelue thousand Cities, all inhabited with rich and industrious people. In euery of which the Can maintayneth a Garrison, proportionable to the greatness and occasions, one thousand, ten or twentie thousand; not all *Tartars*, but *Catayans*; for the *Tartars* are Horse-men, and keepe where they may exercise their Horses. Into *Cathay* he sends those

those of *Mangi*, and *Cathayans* hither such as are fit for Armes, of which he makes choise euery third yeere: and sends for foure or fve yeeres together into places twentie dayes journey from their Countrey, and then suffers them to returne home, others succeeding. And most part of the *Cans* Receipts are this way expended: and if any Citie rebell, he suddenly from the next Garrison rayseth an Armie to reduce or destroy them. This Citie of *Quinsai* hath in continuall Garrison thirtie thousand Souldiers; and that which hath least, hath one thousand in Horse and Foote.

Fanfurs Palace

To speake now of the Palace of King *Fanfur*; his Predecessors caused to enclose a place of ten miles circuit with high walls, and diuided it into three parts. That in the midst was entred by one Gate; on the one side and the other were great and large Galleries, the Roofe sustayned by Pillars painted, and wrought with gold and fine azure: these were smaller at the entrie, and the further the greater; the fairest at the end, the Roofe fairely adorned with gold, and on all the Walls were painted the stories of the former Kings artificially. There euery yeere on certaine

Feasts.

Idoll holy-dayes, *Fanfur* kept his Court and feasted his principall Lords, the great Masters, and rich Artificers of *Quinsai*, ten thousand at a time vnder those Terraces. This dured ten or twelue dayes with incredible magnificence, euery guest indeuouring to present himselfe in greatest pompe. Behinde this middle-most building was a wall, and going out which diuided the Palace; in which was, as it were, a Cloyster with Pillars, sustayning the Porch or Terrace round about the Cloyster: wherein were Chambers for the King and Queene curiously wrought. From this Cloyster was entrance into a Gallerie six paces wide, in length extending to the Lake, all covered. On each side of this Gallerie were ten Courts, answering one another fashioned like Cloysters, each Court hauing fiftie Chambers with their Gardens, and in them one thousand Lasses abode, which the King kept for his seruice, who sometimes with the Queene, sometimes with them, went in his Barge on the Lake for solace, or to visit his Idoll Temples.

1000. Women in 1000. chambers.

Great Parke.

The other two parts of the Serraille were diuided into Groues, Lakes, Gardens planted with Trees; in which were inclosed all sorts of beasts, Roes, Bucks, Stags, Hares, Conies: and there the King solaced himselfe with his Damsels in Charets or on Horse-backe, no man entring there. There did he cause *These to hunt* with his Dogs, wearie whereof they went into those Groues, which answered one another ouer the Lakes, and there leauing their garments came forth naked, and set themselues a swimming in the Kings presence. Sometimes hee would take his repast in those Groues being serued by those Damsels, without once thinking of Armes, which *sweet meat* cost him the foure *sauce* yee haue heard. All this was told mee by a rich old Merchant of *Quinsai*, whiles I was there, one which had bene an inward familiar of King *Fanfur*, and knew all his life, and had seene that Palace flourishing, into which he would needs bring me. The Vice-roy now resides there; and the first Galleries remayne as they were wont, but the Damsells Chambers are ruined; the wall also which encompassed the Woods and Gardens is fallen to the ground, the Beasts and Trees being gone.

The Sea Gam-
pe.

Twentie fve miles from *Quinsai* is the Ocean betwixt the East and North-east, neere to which is a Citie, called *Gampu*, a goodly Port, where arriue the *Indian* ships of merchandise. Whiles *M. Marco* was in *Quinsai*, account being giuen to the Grand *Can* of the Reuenues, and the number of the Inhabitants, he hath seene that there haue bene enrolled one hundred and sixtie Toman of fires, reckoning for a fire, the Familie dwelling in one house: euery Toman containeth ten thousand, which makes sixteene hundred thousand Families: of all which there is but one Church of *Christians*, and those *Nestorians*. Euery house-holder is bound to haue written ouer his doore, the names of the whole house-hold, Males and Females; also the number of Horses; the names added or blotted out as the Familie increaseth or decreaseth. And this is obserued in *Mangi* and *Catay*.

1600000. house-
holds in *Quin-
sai*.

Those also that keepe Innes, write in a Booke the names of their Guests, and the day and houre of their departure, which Booke they send daily to the Lords or Magistrates, which reside at the Market-places. In *Mangi* the poore which are not able to bring vp their children, sell them to the rich.

Reuenues of
Quinsai, & the
appurtenances
twentie three
Millions of
Duckats, and
200000.
Customes.

The Reuenues which accrew to the *Can* from *Quinsai*, and the others pertayning thereto, being the ninth part of the Kingdome of *Mangi*, are first, of Salt euery yeere eightie Toman of gold (euery Toman is eigltie thousand Sazzi of gold, and euery Sazzo is more then one Florin of gold) which will amount to six Millions and foure hundred thousand Duckats. The cause is, that that Prouince being nigh the Sea, there are many Lakes where the water in Summer is coagulated into Salt, wherewith fve other Kingdomes of that Prouince are serued. There is store of Sugar growing, which payeth as all other Spices doe, three parts and a third in the hundred. The like of Rice-wine. Also those twelue mysteries (which we said had twelue thousand shops) and the Merchants which bring goods hither, or carrie any hence by Sea, pay the same price. They which come from farre Countries and Regions, as from the *Indies*, pay ten *per cento*. Likewise, all things there breeding, as Beasts, and growing out of the Earth, and Silke, pay tithe to the King. And the computation being made in the presence of *M. Marco*, besides Salt before mentioned, yeerely amounts to two hundred and ten Toman, which will bee sixteene millions of gold and eight hundred thousand.

From

FROM *Quinsai* one dayes journey to the South-east are all the way Houses, Villages, faire Gardens, plentifull of Victuals, at the end whereof is *Tapinzu*, a faire and great Citie, in the iurisdiction of *Quinsai*. Three dayes thence South-east is *Vgnin*, and two dayes further may you ride that way, all the way finding Castles, Cities, and cultivated Places, in such Neighbour-hood, that they seeme to Trauellers all one Citie, all in the same iurisdiction of *Quinsai*. There are great Canes fiftene paces long and foure palmes thicke. Two dayes journey further is the Citie *Gengui*, faire and great, and travelling further South-east are inhabited places, full of People and Trades. And in this part of *Mangi* are no Muttons, but Beeues, Buffals, Goates, and Swine in great plentie. At the end of foure dayes journey is found the Citie *Zengian*, built on a Hill in the midst of a River, which with her parted Armes embraceth and encompasseth it, and then runne one to the South-east, the other to the North-west. They are in the iurisdiction of *Quinsai*, are Merchants, Idolaters, haue store of Game. Three dayes journey thence, thorow a goodly Countrey exceedingly inhabited, stands *Gieza*, a great Citie, the last of *Quinsai* Kingdome, after which you enter into another Kingdome of *Mangi*, called *Concha*. (The principall Citie thereof is *Fugin*) by the which you trauell, six dayes journey South-east, thorow Hills and Dales, alway finding places inhabited and store of Game of Beasts and Fowle. They are Idolaters, Merchants, subiect to the *Can*. There are stout Lions; there growes Ginger and Galingale plentie, with other sorts of Spices, eightie pounds of Ginger for a *Venetian* groat. There is an herbe, whose fruit hath the effect and giues the colour and smell of Saffron, but is not Saffron, vfed in their meates. They voluntarily eate mans flesh, if they die not of sicknesse, as daintier then others. When they goe to Warres, they shauo the eares and paint their faces with azure; they are all Foot saue the Captaine which rideth, and vse Swords and Launces: are very cruell, and when they kill an Enemie, presently drinke his blood, and after eate his flesh.

After those six dayes trauell is *Quelinsu*, a great Citie with three Bridges, each eight paces broad and aboue one hundred long; the Women faire, delicate; and they haue store of Silke and Cotton, are great Merchants, haue store of Ginger and Galingale. I was told, but saw them not, that they haue Hennes without feathers, hayrie like Cats, which yet lay Egges and are good to eate. Store of Lions make the way dangerous. After three dayes, in a populous Countrey which are Idolaters, and haue store of Silke, is the Citie *Vnquem*, where is great plentie of Sugar, sent thence to *Cambalu*, which they knew not to make good till they became subiect to the *Can*; in whose Court were *Babylonians*, which taught them to refine it with ashes of certayne Trees; they before onely boyling it into a blacke paffe. Fiftene miles further is *Cangiu*, still in the Realme of *Concha*: and here the *Can* keepeth an Armie in readinesse for guard of the Countrey. Thorow this Citie passeth a River a mile broad, fairely built on both sides, and stored with Ships of Sugar and other lading. This River disembokes from hence fife dayes journey South-east, at *Zaitum*, a Sea Port, from whence the rich Ships of *India* come to this pleasant and fertile Citie, as is the way betwixt, in which are Trees or Shrubs of *Camsire*.

Zaitum is a famous Port, where many Ships arrive with merchandise, thence disperfed thorow all *India*. There is such store of Pepper, that the quantitie which comes to *Alexandria* to the West, is little to it, and as it were one of a hundreth: the concourse of Merchants is incredible, it being one of the most commodious Ports of the World, exceeding profitable to the *Can*, which Custometh ten of the hundreth of all merchandise. They pay so much for hire of ships also that there is not aboue one halfe of their merchandise remayning entire to themselves, and yet is that moitie very gainfull to them. The Citie is Idolatrous, giuen to pleasure; in it is much embroidery and Arras worke. The River is great, very wide and swift, and one arme of it goeth to *Quinsai*, at the parting of which is *Tingui* situate, where Porcelane dishes are made (as I was told) of a certaine Earth which they cast vp in great Hills, and so let lie to all weathers for thirtie or fortie yeeres without stirring: after which refining by time, they make Dishes, paint them and then put them in the Furnace. You may there haue eight Dishes for one *Venetian* Groat. In this Kingdome of *Concha* the *Can* hath as great Reuenue almost as of the Kingdome of *Quinsai*. In these two *M. Marco* was, and in none of the other nine Kingdomes of *Mangi* (in all which is one speech vfed, with varietie of Dialect, and one sort of writing) and therefore will speake no more of them; but in the next Booke discourse of *India* the Greater, the Middle, and the Lesse, in which hee was both in the seruice of the *Can*, and also in his returne with the Queene to *Argon*.

¶ IX.

*The Ships of India described, the Ile of Zipangu, the Sea Chin, and World of
Ilands, the two Iauas, Zcilan and other Ilands, with the
rarities therein.*

Here begins
the third book
of M. Polo.
Ships of India.

WE will now enter into *India* and begin with their Ships, which are made of Firre, and the Zapino Tree, with one deck, on which are twentie Cabbins (or lesse, as the Ships are in quantitie) each for one Merchant. They haue a good Rooter, and foure 10
Masts with foure Sailes, and some two Masts, which they erect or take downe at pleasure. Some greater Ships haue thirteene *Colti*, or diuisions, on the inside made with boards inched, that if by blow of a Whale or touch on a Rocke water gets in, it can goe no further then that diuision; which being found is soone mended. They are all double, that is, haue two course of boards one within the other, and are well calked with Ocam, and nayled with Iron, but not pitched (for they haue no Pitch) but anointed with the Oile of a certayne Tree mixed with Lime and Hemp beaten small, faster then Pitch or Lime. The greater ships haue three hundred Mariners, others two hundred, one hundred and fiftie, as they are in bignesse, and from five to six thousand bags of Pepper. And they were wont to be greater then now they are; the Sea hauing broken into Ports and Ilands, that the defect of water, in some places, causeth them to build lesse. They vse also Oares in these Ships, foure men to an Oare; and the greater Ships 20
haue with them two or three ships lesse, able to carry a thousand bags of Pepper, hauing sixtie or more Mariners, which lesse ships serue sometimes to tow the greater. They haue also with them ten small Boats for fishing and other seruices, fastned to the sides of the greater ships, and let downe when they please to vse them. Also they sheath their ships after a yeeres vsage, so that then they haue three course of boards; yea proceed on in this manner sometimes till there bee six courses, after which they breake them vp. Hauing spoken of the ships, we will speake of *India*, and first of certayne Ilands.

Zipangu.

Cin in Italian is
pronounced
Chin.
The Monsons.

Zipangu is an Iland in the East, one thousand and five hundred miles distant from the shoares of *Mangi*, very great, the people white and faire, of gentle behauiour, in Religion Idolaters, and haue a King of their owne. They haue gold in great store, for few Merchants come thither, and 30
the King permits no exportation of it. And they which haue had commerce there tell of the Kings house couered with Gold, as Churches here with Lead, gilded Windowes, Floores of gold: there are many Pearles. Once; the fame of these riches made *Cublai Can* to send to conquer it, two Barons, with a great fleet of ships, one named *Abbaccatan*, the other *Vonsancin*, which going from *Zaitum* and *Quinsai* arriued there; but falling out betwixt themselues, could take but one Citie, and there beheaded all they tooke saue eight persons, which by an enchanted precious stone inclosed in the right arme betwixt the skinne and flesh, could not bee wounded with Iron; whereupon, with wooden Clubs, at the command of the two Barons they were slaine. It hapned one day that a Northerne winde made great danger to the ships there riding, so that some were lost, some returned further into Sea, and others with the two Leaders and o- 40
ther Principals returned home. Out of many broken ships some escaped by boards, and swimming on an Iland not inhabited foure miles off *Zipangu*, and were about thirtie thousand, without prouisions of victuals or Armes, against whom the *Zipanguanders*, after the Tempest was calmed, set out a fleet of ships and an Armie. These comming on Land to seeke the wracked *Tartars* without order, gaue occasion to the *Tartars* to wheele about, the Iland (being high in the midst) and to get vnseene to their ships, which were left vnmanned with the Streamers displaid: and with them they went to the chiefe Citie of *Zipangu*, where they were admitted without suspicion, and found few others but Women. The King of *Zipangu* besieged them six moneths, and they hauing no reliefe yeelded themselues, their liues saued: this happened *An. 1264*. The *Can* for this disorder of his two Commanders, cut off the head of one, and sent the other to a 50
saluage Iland, called *Zorza*, where hee causeth Offenders to die, by sewing them, their hands bound, in a new-slayed hide of a Buffall, which drying shrinketh so as it puts them in a little-ease to a miserable death. The Idols in this and the adioyning Ilands are made with heads of Kine, Swine, Dogs, and other fashions more monstrous, as with faces on their shoulders, with foure, ten, or an hundred hands (some, and to these they ascribe most power and doe most reuerence) and say, that so they learned of their Progenitors. They sometimes eate the Enemies which they take, with great ioy, and for great dainties.

The Sea in which this Iland standeth, is called the Sea of *Cin* or *Chin*, that is the Sea against *Mangi*: and in the language of that Iland, *Mangi* is called *Chin*: which Sea is so large, that the Mariners and expert Pilots which frequent it, say, that there are seven thousand foure hundred 60
and fortie Ilands therein, the most part inhabited, and that there growes no Tree which yeelds not a good smell, and that there growes many Spices of diuers kindes, especially *Lignum Aloes*, and Pepper blacke and white. The ships of *Zaitum* are a yeere in their voyage, for they goe in Winter and returne in Summer, hauing Windes of two sorts, which keepe their seasons. And
this

this Countrey is farre from *India*. But I will leaue them (for I neuer was there, nor are they subiect to the *Can*) and returne to *Zaium*. From hence sayling South-westward one thousand five hundred miles, passing a Gulfe, called *Cheinan* (which continues two moneths sayling to the Northward, still confining on the South-east of *Mangi*, and elsewhere with *Ania*, and *Toloman*, and other Prouinces before named) within it are infinite Ilands, all in manner inhabited. In them is found store of Gold, and they trade one with the other. This Gulfe seemes another World.

After one thousand and five hundred miles sayling ouerthwart this Gulfe, is the Countrey *Zi-
amba*, rich and great, hauing a King and Language proper, Idolaters, and paying tribute to the
10 Grand *Can*, of twentie Elephants, and *Lignum Aloes* in great quantitie yeerely. Anno 1268. the *Can* hearing of the riches of this Iland sent thither *Sagatu* with an Armie, to inuade it. *Accambale* the King thereof was old, and made this composition of tribute. There are many Woods of blacke Ebonie.

Ziamba.

Sayling thence betwixt the South and South-east one thousand & five hundred miles, is *Iana*, supposed by Mariners, the greatest Iland in the World, aboue three thousand miles in circuit, vnder a King which payeth tribute to none, the *Can* not offering to subiect it for the length and danger of the voyage. The Merchants of *Zaium* and *Mangi* fetch thence store of Gold and Spices. South and South-westward sixe hundred miles from *Iana* are two Ilands, one *Sondur*, which is the greater; the other *Condur*, lesse, both desolate. Fifty miles South-east from them is a Pro-
20 uince of firme land, very rich and great, named *Lochac*, the people Idolaters, hauing a Language and King peculiar. There growes Brasill-wood in great quantitie, store of Gold, Elephants, wilde beasts, and fowle, a fruit called *Berci*, as great as Limons, very good. The place is mountainous and savage, and the King permits not many to come thither, lest they should know his secrets. There is store of Porcelane shells for money transported to other places.

Iana maior, I suppose this is *Borneo*, and *Iana minor* that which still is called *Iana*.

Five hundred miles Southward from *Lochac* is the Ile *Pentan*, a savage place, which produceth in all the Woods sweet Trees: sixtie miles of the way the Sea is in many places but foure fathoms: after which being sayled to the South-east, thirtie miles further is the Iland and King-
30 dome of *Malaiur*, which hath a peculiar King and Language to it selfe; and here is much Merchandise of Spices. From *Pentan* one hundred miles South-east is *Iana* the lesse, encompassing about two thousand miles, and hath in it eight Kingdomes, and as many Languages. They are Idolaters, haue store of Treasure, Spices, Ebony, Brasill, and are so farre to the South; that the North Starre cannot there be seene. Master *Marco* was in sixe of those Kingdomes, of which shall here be spoken, leauing the other two, which he saw not.

Lochac.
A South Continent, if true.
Pentan.
Malaiur.
Iana minor, in which are eight Kingdomes. The *Mahometans* by commerce first, and after by conquests & religion haue here altered all things, both Names, Peoples, and Rites; that hardly they can now be designed, and reconciled to later names. *Vnicornes*, or rather some kind of *Rhinoceros*. *Pigmeys* how made.

One of those eight Kingdomes is, *Felech*: here the Idolaters by frequent Trade of *Saracens* are conuerted to the Law of *Mahomet*, in the Cities, the Mountainers being beastly, eating mans flesh and all impure food; and worship all day what they first see in the morning. Next to that is *Basma*, which hath a Language by it selfe; they liue without Law, like beasts, and sometimes send Hawkes to the *Can* (who challengeth all the Iland) for Presents. They haue wilde Elephants, and *Vnicornes* much lesse then Elephants, like the Buffals in haire. Their feet
40 are like Elephants feet. They haue one horne in the midst of the fore-head and hurt no bodie therewith; but with the tongue and knee. For on their tongue are certaine long prickles and sharpe, and when they hurt any, they trample on him, and presse him downe with their knee, and then wound him with their tongue. The head is like to a wilde Boares, which hee carries downwards to the ground; and they loue to stand in the mire, and are filthie beasts, and not such as they (*Vnicornes*) are said to be in our parts, which suffer themselves to be taken of Maidens, but quite contrarie. They haue many Apes, and of diuers fashions. They haue Goshawkes all blacke as *Rauens*, great, and good for prey. There are certaine small Apes faced like men, which they put in Boxes, and preserue with Spices, and sell them to Merchants, who carrie them thorow the World for *Pigmeys*, or little men.

50 *Samara* is the next Kingdome where Master *Marco* stayed five moneths against his will, forced by ill weather. There none of the Starres of *Charles wane* are seene. Hee descended once on land with two thousand people, and there fortified for that five moneths, for feare of those brutish man-eaters, and traded meane while with them for victuals. They haue excellent Fish, Wine of the Date-tree, very medicinall for Phisicke, Dropisie, diseases of the Spleene; some white, some red; and *Indian Nuts* as big as a mans head, the middle whereof is full of a pleasant liquor, better then Wine: they eat all flesh without any difference.

Samara.

Dragoian is another of those Kingdomes, claymed by the *Can*, hauing a proper King and Language. I was told of an abominable custome, that when one is sicke, they send to enquire of the Sorcerers whether hee shall scape; if the Deuils answer, No; the kindred send for some
60 whose office it is, to strangle the sicke partie, after which they cut him in pieces, and the kindred eat him with great iollity, euen to the marrow of the bones, For (say they) if any substance of him should remayne, wormes would breed thereof, which would want food, and so die, to the great torture of the soule of the deceased. The bones they after take and carrie into some Caeue in the hills, that no beast may touch them. If they take any stranger they also eat him.

See of this Wine (*Taddy*) in Master Terry pag. 1469. &c. *Coco-nuts.* *Dragoian.*

Lambra

Lambri. *Lambri* is a fifth Kingdome of *Iana* in which is store of *Brasill*, of the seeds whereof *Master Marco* brought to *Venice*, and sowed them, but in *vayne*, the soyle being too cold. Some men (the most) in this Kingdome haue tayles more then a palme long, like *Dogs*, but not hairy; and these dwell in the Mountaines out of *Cities*. They haue *Vnicornes* in great plentie, and chase of beafts and fowles.

Fansur. *Fansur*, the sixth Kingdome hath the best *Camfire*, which is sold weight for weight with *Gold*. In that Prouince they take meale out of great and long trees, as great as two men can fathome, whence taking the thinne barke and wood about three fingers thicke, the pith within is meale, which they put in water, and stirre well, the lightest drosse swimming, and the purest settling to the bottome; and then the water being cast away, they make thereof paste, of which **Heauie Wood.** *Master Marco* brought to *Venice*, tasting like *Barley bread*. The wood of this tree throwne into the water sinkes like *Iron*, whereof they make *Lances*, but short, for the long would be too heauie to beare: these they sharpen, and burne at the tops, which so prepared will pierce an *Armour* sooner then if they were made of *Iron*.

Nocueran. About one hundred and fiftie miles from *Lambri*, sayling Northwards, are two Ilands, one called *Nocueran*, in which they liue like beafts, goe all naked, men and women, and worship *Idols*, haue excellent *Trees*, *Cloues*, *Sanders* white and red, *Indian Nuts*, *Brasill*, and other *Spices*; the other, *Angaman*, sauage as the former, and I was told, they had *Dogs heads* and teeth.

Angaman. Sayling hence one thousand miles to the West, and a little to the North-west, is *Zeilan*, two thousand and foure hundred miles in circuit, and of old encompassed three thousand and sixe hundred miles, as is seene in the *Maps* of the *Mariners* of those parts, but the North winds haue made a great part of it *Sea*. It is the best Iland of the *World*. The King is named *Sender-naz*. The men and women are *Idolaters*, goe naked (saue that they couer their priuities with a cloth) haue no *Corne*, but *Rice*, and *Oyle* of *Sesamino*, *Milke*, *Flesh*, *Wine* of trees, abundance of *Brasill*, the best *Rubies* in the *World*, *Saphires*, *Topazes*, *Amathists*, and other *Gems*. The King is said to haue the best *Rubie* in the *World*, one palme long, and as big as a mans arme, without spot, shining like a fire, not to be bought for money. *Cublai Can* sent and offered the value of a *Citie* for it, but the King answered, he would not giue it for the treasure of the world, nor part with it, hauing beene his *Ancestours*. The men are vnfit for warres, and hire others when they haue occasion.

A glorious Rubie.

P. X.

Of the firme Land of the Greater India.

Malabar. From *Zeilan* sayling sixtie miles to the West is the great Prouince of *Malabar*, which is not an Iland, but firme Continent, called *India the greater*, the richest Prouince in the *World*. There are in it foure Kings, the chiefe of which is *Senderbandi*, in whose Kingdome they fish for *Pearles*, to wit, betwixt *Malabar* and *Zeilan*, in a Bay where the *Sea* is not aboue ten or twelue fathome, in which diuers descend, and in bags or nets tyed to their bodies bring vp the *Oysters* in which they are. And because there are great fishes which kill the *Fishermen*, they hire certaine *Bramines* to charme them (being skilfull to charme all sorts of beafts also and birds) and these haue the twentieth, the King the tenth. These *Oysters* are found all *Aprill*, and till the midst of *May*, and not else: in *September* they finde them in a place aboue three hundred miles off, and till the midst of *October*. The King goeth as naked as the rest, saue that he weareth some honorable *Ensignes*, as a *Coller* of precious stones about his necke, and a threed of *Silke* to his breast with one hundred and foure faire *Pearles* (as *Beads*) to number his *Prayers*, of which he must daily say so many to his *Idols*: like *Bracelets* he weareth on three places of his armes, and likewise on his legs; and on his fingers also and toes. The prayers which he sayth are *Pacauca, pacauca, pacauca*, one hundred and foure times. This King hath one thousand women, and if any please, his sence he takes her; as one he did from his brother, whence warres had followed, but the mother threatening to cut off her breasts which had nourished them, if they proceeded, stayed the broyle. He hath many *Horsemen* for his *Guard* which alway accompanie him, who when the King dies, throw themselves voluntarily into the fire wherein he is burned to doe him seruice in the next *World*. This and his brethren the Kings of *Malabar* buy their *Horses* from *Ormuz*, and other parts. The Countrey breeds none, and if it happens sometimes, yet are they there bred ill-fauoured and naught. Condemned persons will offer themselves to die in honour of such an *Idoll*, which is performed with twelue *Kniues*, and twelue wounds in diuers parts of the bodie, at every blow, saying, *I kill my selfe in honour of that Idol*, and the last he thrusts in his heart; and then is burned by his kindred. The wiues also cast themselves into the fire with their husbands; they being disreputed which refuse it.

See my Pilg. l. 5. c. 12.

Bread-devotion.

Most of these following customs are still in vse, as in Linschoten, and in my Pilg. l. 5. is seene.

They worship *Idols*, and most of them *Beques*, and would not eat of so holy flesh as *Beefe*, for

for all the World. There are some called *Gani*, which eat those Bees which dye alone, may not kill them, and dawbe ouer their houses with Oxe dung. These *Gani* are of the Posteritie of those which flue Saint *Thomas*, and cannot enter the place where his bodie is, if ten men should carrie them. They sit on Carpets on the ground in this Kingdome, they haue no Corne but Rice, people; wash twice a day, morning and euening both men and women, and will not otherwise eate; which they which obserue not, are accounted Heretikes. They touch not their meat with the left hand, but vse that hand only to wipe, and other vncleane offices. They drinke each in his owne pot, and will not touch another mans pot, nor suffer their owne to touch their mouth, but hold it ouer and powre it in. To strangers which haue no pot they powre drinke into his hands to drinke with them. Iustice is seuerely executed for Crimes, and Creditors may encompasse their Debtors with a Circle, which he dares not passe till hee hath paid or giuen securitie: if he doth, he is to be put to death: and *M. Marco* once saw the King himselfe on Horse-backe thus encircled by a Merchant whom he had long delayed and frustrated, neither would the King goe out of the Circle which the Merchant had drawne till he had satisfied him, the people applauding the Kings Iustice.

They are very scrupulous in drinking Wine of the Grape, and they which doe it are not admitted to be Witnesse; a thing denyed also to him which sayles by Sea, for they say such men are desperate. They thinke Leachery no sinne. It is very hote, and they haue no raine but in June, Iuly, and August, without which refreshing of the Ayre they could not liue. They haue many Physiognomers and Sooth-sayers, which obserue beasts and Birds, and haue an vnluckie houre every day of the weeke, called *Choiach*, as on Munday betwixt two and three, on Tuesday, the third houre, on Wednesday the ninth, &c. thorow all the yeare set downe in their Bookes. They curiously obserue Natiuities: at thirteene yeares old they put the Boyes to get their owne linings, which runne vp and down to buy and sell, hauing a little stocke giuen them to begin: and in Pearle-season they buy a few Pearles, and sell them againe to the Merchants, which cannot well endure the Sunne for little gaine. What they get they bring to their Mothers to dresse for them, but may not eate at their Fathers cost.

They haue Idols Males and Females, to which they offer their Daughters, which when the Monkes (or Priests) appoint, sing and dance to cheere the Idols; and diuers times set victuals before them saying, that they eat, leauing it the space of a meale, singing the while, and then they fall to eating in deed, after which they returne home. The cause of these solaces is the household quarrels betwixt the God and his Goddesse, which if they should not thus appease, they should lose their blessing.

The great men haue Litters of large Canes, which they can fasten artificially to some vpper place, to preuent *Tarantulas* byting and Fleas, and other Vermine; and for fresh Aire. The place of Saint *Thomas* his Sepulchre, is a small Citie, smally frequented by Merchants, infinitely by Christians and *Saracens* for deuotion. The *Saracens* hold him a great Prophet, and call him *Ananias*, that is a holy man. The Christians take of the Earth where he was slaine, which is red, and carry it with them with great reuerence, and giue it mixed with water to the sicke.

Anno 1288. A great Prince hauing more Rice then roome to lay it in, made bold with Saint *Thomas* his Church in the roome where Pilgrimes were receiued, but by a Vision of Saint *Thomas* in the night was so terrified that he quickly freed the place. The Inhabitants are black, hot borne, but often anoynt themselues with *Sessamine* Oyle to obtayne that beautie: they paint the Deuill white, and their Idols blacke. The Beue-worshippers carry with them to battell, some of the haire of a wild Oxe as a preseruatiue against dangers: and therefore such haire is dearely prized.

Murphili or *Monsul* is Northward from *Malabar* five hundred miles, they are Idolaters: They haue Diamonds in their hills, which they search for after great raines. West-wards from Saint *Thomas* is *Lac*, whence the *Bramines* haue originall, which are the truest Merchants in the World, and will not lye for any thing, and trustily keepe any thing committed to their custodie, or sell, or barter Merchandice for others. They are knowne by a Cotton threed which they weare ouer the sholder tyed vnder the arme crossing the brest. They haue but one Wife, are great Diuiners, of great abstinence and long life: obserue their owne shadow in the Sunne when they are to buy, and thence coniecture according to their Discipline. They vse to chew a certayne Herbe which makes their teeth good and helpes digestion. There are some Religions of them called *Tingui*, which goe altogether naked, liue austerely, worshippe the Beue, whereof they haue a little brasse Image on their forehead, and of the Oxe bones althes make an Ointment, wherewith they anoynt their bodies in diuers places with great reuerence. They nor kill nor eate any quicke creature, nor herbe greene, or Root before it is dried, esteeming all things to haue a soule. They vse no Dishes but lay their Viands on dry leaues of Apples of Paradize. They doe their Excrements in the Sands, and then disperse it hither and thither, lest it should breed Wormes which must presently dye for want of food. Some of them liue to one hundred and fiftie yeares, and their bodies after death are burned.

12700. Ilands.
India maior,
media and minor.

Abascia, or India media.
Soldan of Adem.

Frankincense.

In *Zeilan* I had forgot to tell of a high Mountayne, which none can ascend but by Iron chaines, as I was told, in the top whereof the *Saracens* say is *Adams Sepulchre*, the Idolater say it is the body of *Sogomonbarchan* the first Idol-founder, sonne to a King of that Iland, which gaue himselfe to a solitarie life on the top of this hill, whence no pleasures nor perswasions could draw him. His Father made an Image after his death to represent him, all of Gold adorned with Gemmes, and commanded all the Ilanders to worship it, and hence began Idolatry. Hither they come from farre places in Pilgrimage; and there his haire, teeth, and a dish of his are reserued, and solemnly shewed. The *Saracens* say they are of *Adam*, which report caused the *Can*, Anno 1281. to send Ambassadors thither, who obtrayned two teeth, and a dish, and some of his haire by grant of the King of *Zeilan*; which he caused to be receiued by the whole people of *Cam- 10*
balu, without the Citie, and brought to his presence with great honour.

Caal is a great Citie gouerned by *Astar*, one of the foure Brethren, very rich and a good vsur of Merchants: he hath three hundred women. All the people haue a custome to carrie in their mouthes chawing, a leafe called *Tembul*, with Spices and Lime. *Conlam* is fise hundred miles North-west from *Malabar*, they are Idolaters: there are also *Christians* and *Jewes* which haue a speech by themselves. They haue Pepper, Brasill, Indico, Lions all blacke, Parrets of diuers sorts, all white as Snow, others Azure, others Red, and some very little: Peacockes and Peahens much differing from ours, and greater, as are their fruits. They are leacherous, and marrie their sisters and kindred. There are many *Astrologers* and *Physicians*. In *Cumari* are Apes so great that they seeme men: and here we had sight of the North starre. *Dely* hath a proper King 20
and Language: the people Idolatrous and haue store of Spices. The shippes of *Mangi* come thither.

Malabar is a Kingdome in the West, in which and in *Guzzerat* are many Pirats, which come to Sea with aboue one hundred Sails, and rob Merchants. They bring with them their wiues and children, and there abide all Summer. In *Guzzerat* is store of Cotton, the Trees six fathoms (or paces) high, and dure twentie yeeres; the Cotton of the old Trees is not good to spin, after they are past twelue yeeres old, but for Quilts. There are many * *Vnicornes*: they haue artificiall embroideries. In *Canam* is store of Frankincense; it is a great Citie, where is great trade for Horses. In *Cambaia* is much Indico, Buckram, and Cotton. *Scruenath* is a Kingdome of a peculiar language, Idolaters, Merchants, a good people. *Chefmacoran* is a great Kingdome of Idola- 30
ters and *Saracens*, the last Prouince of the greater *India* towards the Northwest (*understand the Author according to his journey, from China or Mangi by Sea*) fise hundred miles from which, are said to be two Ilands, one of Men, the other of Women, those comming to these, and there staying March, Aprill, and May. The Women keepe their Sonnes till twelue yeeres, and then send them to their Fathers. It seemes the Ayre admits no other course. They are *Christians* and haue their Bishop, subiect to the Bishop of *Soccotera*; they are good Fishers and haue store of Ambar. *Soccotera* hath an Archbishop, not subiect to the Pope, but to one *Zatolia* which resides in *Baldach*, who chooseth him. The *Soccoterans* are Inchanters and great Witches, as any in the world (howsoeuer excommunicated therefore by their Prelate) and raise Windes to bring backe such ships as haue wronged them, in despite of all contrarie working.

A thousand miles thence Southward is *Magastar*, one of the greatest and richest Iles of the World, three thousand miles in circuit, inhabited by *Saracens*, gouerned by foure old men. The People liue of merchandise, and sell great store of Elephants teeth. The Currents in these parts are of exceeding force. They tell of Fowles, called *Ruch*, like an Eagle, but of incomparable greatnesse, able to carrie an Elephant (*but I am not able to carrie it.*) *Zenzibar* also is said to bee of great length, &c. there are Elephants, Giraffas, sheepe vnlike to ours: the Men and Women are very deformed. I haue heard Mariners and great Pilots of those parts report, and haue seene in their writings, which haue compassed the Sea of *India*, that there are in it twelue thousand and seuen hundred Ilands, inhabited or desart. In *India maior*, which is from *Malabar* to *Chefmacoran* are thirteene Kingdomes. *India minor* is from *Ziambi* to *Mursili*, in which are eight 50
Kingdomes, besides Ilands many. The second or middle *India*, is called *Abascia*. The chiefe King is a *Christian*; there are six other Kings, three *Christians*, and three *Saracens*, subiect to him: there are also *Jewes*. *Saint Thomas* hauing preached in *Nubia*, came to *Abascia*, and there did the like, and after to *Malabar*. They are great Warriors, alway in Armes against the *Soldan* of *Adem*, and the people of *Nubia*. I heard that An. 1288. the great *Abissine* would haue visited *Ierusalem*, but being dissuaded by reason of *Saracen* Kingdomes in the way, he sent a Bishop of holy life to doe his deuotions, who in his returne was taken by the *Soldan* of *Adem*, and circumsised by force: whereupon the *Abissine* rayfed a power, discomfited the *Soldan* with two other *Mahumeran* Kings, tooke and spoyled *Adem*. *Abascia* is rich in gold. *Escier* is subiect to 60
Adem fortie miles distant South-east: where is store of white Frankincense very good, which drops from small Trees by incision of the barke; a rich merchandise, &c. Some in that Countrey for want of Corne make Bisket of Fish, whereof they haue great plentie. They also feede their beafts with fishes. They take them in March, April, and May, &c.

Hauing spoken of the Prouinces on the Coast, I will now returne to some Prouinces more to the

the North, where many *Tartars* dwell, which haue a King called *Caidu*, of the Race of *Cingis* *Caidu and his*
Can, but subiect to none. These obserue the customes of their old Progenitors, dwell not in Ci- *Northerne*
ties, Castles, or Fortresses, but abide with their King in the Fields, Playnes, Valleyes, and Fo- *Tartars.*
rests, and are esteemed true *Tartars*. They haue no sort of Corne, but liue of Flesh and Milke in
great peace. They haue store of Horses, Kine, Sheepe, and other beasts. There are found great
white Beares, twentie palmes long, black Foxes very great, wilde Asles, and little beasts called
Rondes which beare the Sable Furses, and *Vari arcolumi*, and those which are called *Pharaos rats*,
which the *Tartars* are cunning to take. The great Lakes which are frozen except in a few mo-
neths of the yeere, cause that the Summer is scarce to bee trauelled for myre. And therefore the
10 Merchants to buy their Furses, for fourteene dayes journey thorow the Desart, haue set vp for
each day a house of Wood, where they abide and barter: and in Winter they vse Sleds without
wheels, and plaine in the bottome, rising with a semi-circle at the top or end, drawne easily on
the Ice by beasts like great Dogs * six yoked by couples, the Sledman only with his Merchant
and Furses sitting therein.

In the end of the Region of these *Tartars*, is a Countrey reaching to the furthest North, called
Darknesse, because the most part of the Winter moneths the Sunne appeares not, and the Ayre is
thicke and darkish, as betimes in the morning with vs. The men there are pale and great, haue
no Prince, and liue like beasts. The *Tartars* oft rob them of their Cattell in those darke moneths,
and lest they should lose their way, they ride on Mares which haue Colts sucking, which they
20 leaue with a Guard at the entrance of that Countrey, where the Light beginneth to faile, and
when they haue taken their prey giue reynes to the Mares, which hasten to their Colts. In their
long continued day of Summer they take many the finest Furses (one occasion of the *Tartars* go-
ing to rob them) of which I haue heard some are brought into *Russia*. *Russia* is a great Countrey *Russia.*
in that Northerne *Darknesse*: the people are *Greeke Christians*, the Men and Women faire, and
pay Tribute to the King of the *Tartars* of the West, on whom they border on the East. There is
store of Furses, Waxe, and Minerals of siluer. It reacheth, as I was told, to the Ocean Sea; in
which are store of *Gerfalcons* and *Falcons*.

* Perhaps
these are a
kind of Deere,
Region of
Darknesse.

30 To the Reader.

IN this admirable Voyage of Polo, I confesse, Inopem me copia fecit; the Translation which I had
of Master Hakluyts from the corrupted Latine, being lesse then nothing (nimirum damno auctus
fui) did me no steed but losse, whiles I would compare it with the Latine, and thought to amend it by
the Italian; and was forced at last to reiect both Latine and English, and after much vexation
to present thee this, as it is, out of Ramusio. I haue not giuen thee word for word as an exact
Translator, but the sense in all things substantiall, with longer Relations then I haue admitted in others,
because many which haue read M. Paulus, neuer saw M. Polo, nor know the worth of the worthiest
Voyage, that perhaps any one man hath written: a man credible in that which hee saw himselfe, in some
things receiued by Relation, rather telling what he heard, then that which I dare belecue, and specially
40 toward the end of his third Booke, which I haue therefore more abridged. Pitie it is that time hath so
gnawne and eaten some-where, and some-where deuoured utterly many his names and Tracts, which
new Lords and new (Lames, the Saracenicall Conquests, especially euer since his time) in those parts haue
caused. And farre easier by the Cans greatnesse then, and his employments vnder him, might hee know
the World in those times; then in the combustions long since begonne and still continued, in diuersified and
quarrelling States is possible: the Saracens quarrelling with Ethnikes, Christians, and other Saracens;
the *Tartars* diuided and sub-diuided into so many quarrellsome Serpentine heads, whereby that hugeness
is broken in pieces; the Chinois and others prohibiting ingresse of strangers, egress of their owne; that
I mention not Ethnike and Moorish Diuisions amongst themselves. In the same time with Polo,
50 liued this following Armenian, of whom Ramusio relateth, and this Discourse intimateth that the Ho-
ly Land being quite lost, Pope Clement the Fifth minding to reconer it, was giuen to vnderstand of
helpes which might be gotten from the *Tartars*, and withall of this Haiton or Antonie a Kinsman of the
King of Armenia, then liuing a Monke or Frier of the Order Premonstratensis in Episcopia in Cy-
prus; who in his young time had bene exercised in the Warres betwixt the *Tartars* and Egyptian Sol-
dans, by whom he might receiue the best Intelligence of *Tartarian* Affaires. He therefore (as hee first
remoued the Court from Rome to France, where it abode seuentie yeares) caused the said Hayton to be
brought from Cyprus to France with all his Memorials and Writings of that subiect, and being come
to Poitiers, caused one Nicolo di Falcon a Frenchman to write in French, which the other dictated in
Armenian, which was done Anno 1307. A Copie of this Storie written aboue two hundred yeares since
60 came to Ramusioes hand (whereto I here, that I say not you, are beholden) whence hee took that which
concerned the *Tartars*, omitting the rest, or remitting rather his Reader to M. Polo. Betwixt which two
some difference may seeme, but so little, that Wisemen need no aduertisement thereof.

One thing is remarkable, that the Author and the next, who in many Geographicall Notes agrees with
him, diuide Asia into two parts, one called profound or deepe, the other the greater, and diuided in the
mid

midst by the Caspian Sea; and Caucasus, which our Armenian calls Cocas, which Alexander passed not, nor was ever well knowne to the Ancients, who called all beyond that Hill Scythia, as we now call the most of it by a generall name Tartaria. Strabo * hath made like division of Asia into the inner and vtter, Taurus being the Vmpire; which Hill (with diuers Appellations) beginning at Pamphylia runnes Eastwards thorow the midst of Asia to the Indies, that part to the North being called Asia within (Taurus) and that to the South Asia without. Some ancient Geographers as Dionysius mentions, extended Europe to the Caspian Sea, which most of the Ancients thought to concur with the Ocean, as the Mediterranean, Arabian, and Persian doe. Dionysius his Verses are worth obseruation,

Μίαν * γῆν ἡμῶν Ἀσίαν ἔπος ἀμυγδύσκειν,
Ἀπὸ δὲ τοῦ γαίης Παμφυλίδος ἀρχομένην ἰσθμῶν, &c.

They called it *Taurus*, as there followes of the Bull-forme, &c.

Οὐρενὰ Ταυροειδὲς τὰς ἀμυγδύλους ἰσθμῶν,

Hereof we are the more curious, to giue to the more curious a reason of our method in this Worke, who in our former Tome haue first encompassed the shoares of Asia from the West to the East: and then in the In-land parts haue in the eight and ninth Bookes principally (as Voyages gaue leaue) viewed Asia without Taurus, and to the South of the Caspian: but this Profound or Inner, more unknowne part, we suruay here, where we handle the Voyages and Discoveries of those parts of the World, which the Ancients knew very little or not at all. And indeed, how little was Mangi, Cataio, or Tartaria knowne, till the Tartars obtunded vpon the World, a terrible knowledge of themselves, in manner as Rubruquius and the former Friers, with these Gentlemen, Polo and Haiton describe? Tea, how were they by ignorance of following times buried againe, till Portugall, English, and other moderne Voyages haue reuiued them, as it were in a resurrection? and that often in new names, as if they had suffered that *μνηστικὸν*, so often here rehearsed, and so much credited in many Religions of those Easterne Asians, whence it comes that they are hardly knowne to be the same. The Reader must pardon me (or go to the Author himselfe) if I haue here omitted some pieces of Haiton, which you haue had in Polo and others before, specially not so pertinent to our present Tartarian subiect. The figures note the Chapters, after the Latine, from which Ramusius Diuision is much diuided, and we therefore from both.

CHAP. V.

The Historie of AYTON, or ANTHONIE the Armenian, of Asia, and specially touching the Tartars.

§. I.

Of the Kingdome of Cathay, and diuers other Prouinces of Asia, and of
the first habitation of the Tartars: and of CANGIUS, or
CINGIS his beginnings.

The largenesse
of the King-
dome of Ca-
thay.
Ilands.

He Kingdome of Cathay, is the greatest that is to be found in the World, and is replenished with people and infinite riches; beeing situated on the shoare of the Ocean Sea; In the which there are so many Ilands, that their number can no wayes be knowne. For neuer was there any man that could say he had seene all those Ilands; But those of them which haue beene frequented, are found to abound with innumerable wealth and treasures; and that which is there most e-

Oile of oliues.

steemed, and deereft sould, is Oyle of Oliues, which the Kings and Commanders there cause to be kept with great diligence, as a Soueraine Medicinable thing; And moreouer, in the Kingdome of Cathay, are many maruellous and monstrous things, which I forbear to mention. The Inhabitants of those parts are exceeding wise and subtile, replenished with all kind of skill and cunning, insomuch, that they disdain the endeauours of all other Nations, in all kind of Arts, and Sciences: saying, that they only see with two Eyes, the Latines but with one eye, and that all other Nations are blind. And albeit they are exceeding sharpe-sighted in the exercise of all bodily workes and labours; yet is there not amongst them any knowledge of spirituall things; the men of that Countrey are not bold, or couragious, but more fearefull of death then besitteth such as beare Armes; yet are they very ingenious, and haue oftner had victorie of their enemies by Sea, then by Land: the money vsed in those parts, is of square peeces of Paper, signed with

Their arro-
gant presump-
tion.
Effeminate
fearfulnesse.

the

the Kings signe, according to which signe or marke: the pieces are of greater or smaller value; and if they begin by age to be wasted, or worne out, hee that bringeth them to the Kings Court shall haue new for them; of Gold and other Metals, they make Vessels, and other ornaments. Of this Kingdome of *Cathay* it is said, that it is in the beginning of the World, because the head thereof is in the East, and there is not knowne any other Nation to inhabit more Easterly thereabouts; on the West it confineth on the Kingdome of *Tarfa*, on the North with the Desert of *Belgian*. And on the South-side are the Ilands of the Ocean, afore mentioned.

See Sir Iohn Mandevils trauesels.

2. In the Kingdom of *Tarfa* are three Prouinces, whose Rulers are also called Kings, the men of that Countrey are called *Iogour*, they haue alwayes worshipped Idols, and yet doe except the ten Kindreds of those Kings, who by the guiding of a Starre came to worship the Natiuitie in *Bethleem Iuda*. And there are yet found many great and noble among the *Tartarians* of that Race, which hold firmly the Faith of Christ. But the rest which are Idolaters in those parts, are of no estimation in matter of Armes, yet are they of a piercing wit for the learning of all Arts and Sciences. They haue peculiar Letters or Characters of their owne. And almost all the Inhabitants of those parts abstayne from eating of flesh and drinking of Wine, neither would they by any meanes bee brought to kill ought that hath life. Their Cities are very pleasant and they haue great Temples in which they worship their Idols. Corne groweth there abundantly, and all good kind of Graine. But they are without Wine, and hold it a sinne to drinke it, as doe also the *Agarens*. This Kingdome of *Tarfa* on the East-side confineth with the Kingdome of *Cathay*, as aforesaid; on the West it bordereth on the Kingdome of *Turquestan*, on the North on a certayne Desert, and on the South-side it adioyneth to a very rich Prouince called *Sym*, which is situate betweene the Kingdome of *India* and *Cathay*, and in that Prouince are found Diamonds.

Of the Kingdome of *Tarfa*.

Wit and inclination.

Manners and Rites.

Sym.

Of the Kingdome of *Turquestan*. The Inhabitants Shepherds.

Oceria. *Cursia*. *Turkes*.

3. The Kingdome of *Turquestan* on the East side is confined with the Kingdome of *Tarfa*, on the West side with the Kingdome of the *Persians*, on the North side with the Kingdome of the *Corasmians*, and on the South it reacheth out to the Desert of *India*. In this Kingdome are but few good Cities, but there are large Plaines and good feeding for their flockes, therefore the Inhabitants for the most part are Shepherds, dwelling in Tents, and houses that may easily bee removed from place to place. The greatest Citie of that Kingdome is called *Oceria*, there groweth but little Barley or Wheate: no Wine at all. Their Drinke is *Cursia*, and other made Drinks, and Milke, they eate Rice and Millet, and flesh, and are called *Turkes*. And almost all of them are of the Sect of wicked *Mahomet*, yet there are some amongst them of no Faith nor Religion. They haue no peculiar Characters of their owne, but doe vse the *Arabike* Letters in their Cities or Campes.

Of the Kingdome of the *Corasmians*.

Corasme. *Soldini*.

4. The Kingdome of the *Corasmians*, is well stored with good Cities and Townes, and there are many Inhabitants, because the Land is fruitfull and pleasant, and wheate, and other graine, is there in great quantitie; but they haue little Wine. This Kingdome is confined with a Wildernesse of one hundred dayes Iourney, in length on the West-side, it reacheth out to the *Caspian* Sea. On the North it bordereth on the Kingdome of *Cumania*, and on the South it hath the Kingdome of *Turquestan*. The chiefe Citie of that Kingdome is called *Corasme*, and the people are called *Corasmians*, being Pagans, which haue neither Learning, nor Religion. But those which are called *Soldini*, are very fierce in Armes, and haue their Language and Letters, and Ceremonies of the *Greekes*, and make the bodie of Christ after the *Greeke* manner, and are obedient to the Patriarkes of *Antioch*.

Of the Kingdome of *Cumania*. This extremitie comes by the long presence in Summer, and absence of the Sunne by Winter.

Cocas or *Caucasus*.

5. The Kingdome of *Cumania* is very great: yet by reason of the distemperature of the Ayre, it is ill inhabited: for in the Winter season, the cold is so great in some places, that neither man nor beast can any way liue therein. And againe in some places, the heate of Summer is so great, that none can endure the same, nor the flies which abound there. This Kingdome of *Cumania*, is in a manner all plaine, and there are no Trees, nor any Wood to bee found therein, vnlesse it be about some Cities, which haue certayne Orchards. The people inhabit in Fields, and in Tents burning the dung of beasts in steed of Wood: This Kingdome of *Cumania* on the East-side, hath the Kingdome of *Corasme*, and a certayne Desert or Wildernesse; on the West-side is the great Sea called *Pontus Euxinus*, and the Sea of *Tanais*: on the North-side it confineth on the Kingdome of *Cassia*, and on the South-side, it reacheth out to a certayne great Riuer called *Etis*, which every yeare is frozen, and sometimes remayneth all the yeare so hardly frozen, that men and beasts goe thereon as on Land, on the bankes of that Riuer, are found certayne small Trees. But beyond and on the other side of that Riuer, are diuers and sundry Nations inhabiting, which are not accounted of the Kingdome of *Cumania*, and yet are obedient to the King thereof: And some there are which inhabit about the Mountayne *Cocas*, which is exceeding great and high. The *Astures* and other rauinous Birds, breeding in that Mountayne, are all white, and that Mountayne is seated betweene two Seas; for on the West is the great *Euxine* Sea, and the *Caspian* Sea on the East, which *Caspian* Sea hath no entrance into the Ocean, but is as a Lake which only for his greatnesse hath the name of a Sea, for it is the greatest Lake that is to bee found in the World, reaching from the said Mountayne *Caucasus*, euen to the head of the Kingdome of *Persia*, and diuideth all *Asia* into

See after Chapter 47.

two parts, whereof that which is towards the East is called *Asia profunda*, and that which is on the West is called *Asia maior*, or the greater *Asia*, and many good fishes are in that Lake.

Indix.

Note that of Alexander the great, the Sarmatians and Pargians have many and strange Fables, neuer heard of in these parts; as here of Orlando, Arthur, Ogerus, and others. See in *Persia* and *Media* are omitted.

6. The Kingdome of *India* is very long, and situated on the Ocean Sea, which in those parts is called the *Indian Sea*. This Kingdome beginneth from the Confines of *Persia*, and extendeth by East vnto a Prouince called *Balaris*, in which are found the precious stones which wee call *Balazes*. On the North-side is that long and great Desart of *India*, where the Emperour *Alexander* is said to haue found so many Serpents, and such diuersitie of Beasts inhabiting. In that Kingdome it is that Saint *Thomas* preached the Faith of Christ, and conuerted many people and Prouinces. But because they are so farre distant and remote from other places and parts of Christendome, the Christian Religion is there much diminished; for there is but one Citie that is inhabited with Christians, the rest hauing wholly forsaken the profession of Christianitie. On the South-side of this Kingdome is a very long reach of the Ocean, in the which are many Ilands, but their Inhabitants be all blacke, going altogether naked for heat, and worship Idols like fooles. In those Ilands are found precious stones, Pearles, and Gold, and sundry Spices, and medicinable drugs helpfull vnto men. There is also a certayne Iland called *Celan* or *Zeilan*, knowne in ancient time by the name of *Taprobana*, in which are found Rubies and Saphires, and the King of that Iland hath the greatest and best Rubie that is any where to be found, which when hee is to be crowned King, he holdeth in his hand riding round about the Citie, and is afterwards obeyed of all as King.

Armenia.

Miralis, or the Iron gate, now Derbent.

9. In the Land of *Armenia* there are foure Kingdomes: yet haue they alwayes beene subiect to one King only. The length of the Kingdome of *Armenia* beginneth at the Confines of *Persia*, and reacheth out Westward euen to the Kingdome of *Turkie*. The breadth of *Armenia* begins at the Citie *Miralis*, called the *Iron Gate*, and extendeth euen to the Kingdome of *Media*. In *Armenia* there are many great and very rich Cities, of which *Tauris* is the chiefe: they haue both Characters of their owne, called the *Armenian Letters*, and others also which they call *Haloen*. In *Armenia* is the highest Hill or Mountayne that is in the World, which is commonly called *Arath*, or *Ararat*, and on the top of that Mountayne, the Arke of *Noah* rested first after the Deluge. And albeit for the abundance of Snow which is alwayes on that Mountayne, both Winter and Summer none is able to goe vp the same, yet is there alwayes scene in the top thereof a certaine blacke thing, which men affirme to be the Arke.

Georgia.

10. The Kingdome of *Georgia* on the East-side, beginneth from a certayne great Mountayne, called *Alboris*, or *Albsor*. There doe inhabit many Nations, and thereof that Prouince is called *Alania*, or *Albania*, from whence the Kingdome of *Georgia* reacheth Westward on the North-side to some Lands of the Kingdome of *Turkie*; the whole length of this Kingdome of *Georgia* lying vpon the great Sea, and on the South-side it is confined with *Armenia* the Great. This Kingdome of *Georgia* is diuided into two Kingdomes, one of which is called by the name of *Georgia*, and the other knowne by the name of *Albas*, or *Albasc*: and they haue beene alwaies gouerned by two seuerall Kings. The one of which is subiect to the Emperour of *Asia*; namely, the King of *Georgia*, But the Kingdome of *Albas* being mightie in people, and strongly situated and fortified, could neuer yet either by the Emperours of *Asia*, or by the *Tartarians* bee subdued. In this Kingdome of *Georgia* is a marvellous strange Wonder or Miracle, which I durst not haue reported or beleueed, if I had not seene it with my eyes. But because I haue personally beene there, and beene made the eye witnesse thereof, I say, that in those parts there is a Prouince or Countrey called *Hamsem*, being in circuit about three dayes iourney, whose whole extent is all couered ouer with such thicke and palpable darknesse, that none can see any thing therein, neither doe any dare to goe into that Land, because they know not the way out againe. Those that inhabit neere about it, affirme, that they haue often heard the sound of mens voices crying, of Cockes crowing, and the neighing of Horses in the Wood, and by the course of a Riuer that runneth out from that place, there appeare certaine signes that there are people inhabiting therein.

Chaldea.

11. The Kingdome of the *Chaldeans* beginneth on the East-side from the Mountaynes of *Media*, and reacheth out vnto *Ninine*. The Inhabitants of *Chaldea* are called *Nestorians*, because they are followers of the Error of *Nestorius*, and they haue their peculiar *Chaldean Characters*, others there are amongst them that vse the *Arabian Letters*, and are of the Sect of the seducer *Mahomet*.

Mesopotamia.

12. The Kingdome of *Mesopotamia* on the East-side, beginneth at the great Citie *Mosel*, (called of the Ancients *Selencia*) which is seated neere the Riuer *Tigris*, and stretcheth out vnto the Riuer *Euphrates*, and the Citie of *Robais* (or *Edeffa*.)

Euphrates. Turkie.

13. When the *Turkes* had inuaded the Kingdome of *Turkie*, and possessed themselves thereof, they could not preuaile against the Citie of *Trapezond*, nor the Territorie thereof, because of their strong Castles and other Fortifications, by reason whereof it remayned still vnder the gouernment of the Emperour of *Constantinople*, who vsed yearely to send thither a Ruler or Gouernour as his Deputie there, vntill at length one of them rebelling against him, made himselfe King in such sort that he which now holdeth that Land, is called Emperour of *Trapezond*. The

Inhabitants are *Greekes*. In the Kingdome of *Turkie* are foure Nations inhabiting; namely, the *Greekes*, *Armenians*, and *Iacobines*, (or *Iacobites*, which are *Christians*, liuing on merchandise and manuring the Earth:) and the *Turkes*, which are *Saracens*, that haue invaded that Land, and gotten the Government from the *Greekes*. Some of them liue on merchandise, and labouring of the ground inhabiting in Cities and Townes: others keeping in the Woods and Fields, both Winter and Summer being Shepherds, and very good Bow-men.

14. *Cilicia* at this day is called *Armenia*, by reason that after the enemies of the Christian faith had gotten that Countrey, and held it a long time from the *Greekes*, the *Armenians* endeauoured themselves so well that they wonne it againe from the *Pagans*. In so much that the King of *Ar-*
10 *menia*, by the grace of God ruleth ouer *Cilicia* at this day: In the Kingdome of *Syria* are diuers Nations inhabiting, namely, *Greekes*, *Armenians*, *Iacobites*, *Nestorians*, and *Saracens*. There are also other Christian Nations, namely, the *Syrians* and *Maronines* (or *Maronites*.)

16. The Countrey in which the *Tartarians* first inhabited, lieth beyond the great Mountaine *Belgian*, mentioned in the Histories of * *Alexander*. And there they liued like brutish People without learning or Religion, feeding herds of Beasts, and going from place to place to seeke pasture. And being not exercised in armes they were despised of other Nations, and payed tribute to al. Of these in ancient time there were many Nations which by a common name were called, * *Mogli*, who vpon their encrease were after diuided into seuen principall sorts esteemed more noble then the rest. The first of these Nations was called *Tatar*, from the name of that Pro-
20 uince wherein they first inhabited: The second, was named *Tangur*: The third, *Cumat*: The fourth, *Talair*: The fifth, *Sonich*: The sixth, *Monghi*: And the seuenth, *Tebeth*. And whiles these seuen Nations liued vnder the subiection of their Neighbours, as is aboue said, it happened that a poore old man, being a Smith, saw a Vision in his sleepe; namely, a man armed all in white Armour, and mounted on a white Horse, which calling him by his name, said vnto him, *Changius*, It is the will and pleasure of the immortall God, that thou be Lord and Ruler ouer these Nations of the *Mogli*, and that by thee they bee deliuered from the Dominion of their Neighbours, vnder which they haue long remayned: and they shall rule ouer their Neighbours, and receiue Tribute of them to whom they formerly paid Tribute. *Changius* hearing this Word of God, was replenished with exceeding ioy, and made publicly knowne the Vision which he had seene. But the Rulers and Comm-
30 anders would not giue credite to the Vision, but rather despised and mocked the old man. But the night following, they themselves saw the same Vision of the Horse-man armed in white, who commanded them from the Immortall God, that they should be obedient to *Changius*, and cause all to obey his command. Whereupon, all the said Chieftaines and Gouvernours of the seuen Nations of the *Tartarians*, calling the people together made them to yeeld obedience and reuerence to *Changius*. Then afterwards placing a Chaire for him in the midst of them, and spreading a blacke Felt Carpet on the ground, they set him thereon, and then the seuen chiefe Rulers lifting him vp, did place him in the Throne, or Chaire of State, with great triumph and acclamation, calling him *Can* their first Emperour, and doing him solempne reuerence, with bowing their knees as to their Lord and Gouvernour.

40 Now, at this solemnitie of the *Tartarians*, and at the simplicitie of their blacke Cloth, vsed in the creating of their first Emperour, none ought much to wonder, either because haply they were not then furnished with any fairer Cloth of State, or else were so rude and ignorant at that time, that they knew no better or fairer fashion of State. But at this men might rather maruell, that the *Tartarians* hauing since that, conquered many Kingdomes, and gotten infinite riches, (and namely, commanding ouer the Dominions and wealth of *Asia*, euen to the confines of *Hungaria*) they will not yet leaue their ancient and accustomed manner; but at the confirmation of euery Emperour obserue the like order in euery point, whereof I can well be a witness, hauing bene personally present at the ceremonie vsed at the Confirmation of one of their Em-
50 perours. But to returne to our purpose, *Changius Can* being thus made Emperour by common consent of all the *Tartarians*, determined ere he attempted any thing, to make triall, whether they would all performe faithfull obedience to him, to which end he made certaine Ordinances to be obserued of all.

See sup. c. 2.

Haiton, an eye-
witness of the
Tart. Corona-
tion.
Changius ordai-
neth Lawes.

The first was, That all the *Tartarians* should beleene and obey the Immortall God, by whose will hee was promoted to the Imperiall Dignitie: which Commandement they obserued and from thenceforth vntill this day haue euer continued to call on the Immortall God in all their occasions. Secondly, Hee willed that all the men that were able to beare Armes should be num-
60 bred, and that ouer euery ten should be one appointed, and ouer euery ten thousand a great Commander, and that also ouer euery thousand should bee a Colonell, or Conducter of a Regiment, and he called an Armie of ten thousand Souldiers, a Regiment. He commanded also the seuen Rulers ouer the Nations of the *Tartarians*, that they should forthwith dismisse themselves of their former dignities: which they relinquished immediatly. But another of his Ordinances was very strange and admirable, in which he commanded those seuen chiefe Rulers to bring euery of them his eldest sonne, and each with his owne hand to cut off his head. Which Commandement appearing to bee most cruell and vniust, yet was there none that would any way gainsay
it,

Preuayleth in
fight against
his borderers.

it, because they knew him to be set ouer them by Gods prouidence, and therefore they presently fulfilled it. When *Changius Can* had seene that they were readie to obey him, euen vnto death, he appointed them all a certaine day in which they should be readie to fight. And then they rode against them which bordered next vnto them, and subdued them. Whereby, they which had beene Lords ouer them, were brought into subiection vnder them. After, hee inuaded diuers other Nations, which hee conquered with great celeritie: For hee did all his exploits with a small troupe of men, and was successefull in his enterprises.

honoured.

Yet, one day it fell out, that being accompanied with a small number he was encountred with a great troupe of his Enemies, in such sort, that the fight being begun betweene them, whiles he valiantly defended himselfe, his Horse was slaine vnder him. And the *Tartarians* seeing their Lord ouerthrowne, betooke themselues to flight; so that the Enemies being all busied in pursuing of those that fled, and hauing no knowledge of the Emperour, whom they had vnhorsed and ouerthrowne; he runne and hid himselfe among certaine shrubs for safety of his life. Whither when the Enemies were returned, with purpose to spoile the dead Carcasses, and to seeke out such as were hidden, it happened that an Owle * came and sate vpon those little trees or shrubs which he had chosen for his couert, which when they perceiued, they sought no further in that place, supposing that the said Bird would not haue sate there, if any man had beene hidden vnderneath. By which meanes in the dead time of the night he found meanes to escape thence, and came by diuers vnfrequented wayes vnto his owne people, and discoursed vnto them what had befallen him. For which the *Tartarians* rendred thankes vnto the Immortall God. And that Bird which vnder God was held to be the meanes of his escape, hath euer since beene held in such reuerence amongst them, that happie is he that can get but a Feather of an Owle, which they weare in their heads with great reuerence. Which I thought fit to set downe in this Booke, that the cause might be knowne for which the *Tartarians* vse commonly to weare Feathers on their heads.

A new Victory.

The Authour
excuseth him-
selfe.

But their Emperour *Changius Can* hauing giuen great thankes to God: for his deliuerance out of so great a danger gathered his Armie together, and fiercely assaulted his former Enemies againe and brought them all vnder subiection, and so became Emperour of all the Countries lying on that side of the Mountaine *Belgian*, and possessed them quietly without disturbance, vntill it happened him to haue another Vision as shall after be declared. Neither is it any maruell that in these Histories I haue not set downe the certaine time, because albeit I haue sought of many to know the certaintie thereof, yet could I neuer finde any to instruct me fully therein: the reason thereof I take to be, because the *Tartarians* at the first were ignorant of all Learning, and knew no letters, and so passed ouer the times and memorable accidents without any Record or Register thereof kept, whereby they came afterwards to be forgotten.

II.

Of *CHANGIUS Can* his second Vision and Conquests. Of *Hoccora* and his three Sonnes expeditions; of *GINO Can*; of *MANGV Can*, who was visited by the King of Armenia, and baptised; of the expedition of his Brother *HALOON*.

Ant. l. 11. c.
l. 2.
The fatal ex-
pedition.

After that *Changius Can* had subdued all the Kingdomes and Countries on that side of the Mountaine *Belgian*, he saw another Vision in the night. For the selfe-same Horseman armed in white Armour appeared vnto him againe, saying, *Changius Can*, it is the pleasure of the Immortall God, that thou passe ouer the Mountaine *Belgian*, and direct thy course Westwards, where thou shalt possesse Kingdomes and Countries, and subdue many Nations. And that thou mayest be assured that the words which I speake vnto thee are from the Immortall God: Arise and goe with thy people to the Mountaine *Belgian*, to that part thereof which ioyneeth to the Sea, there thou shalt alight from thy Horse, and kneeling downe nine times towards the East; thou shalt worship nine times the Immortall God, and he which is Almighty will shew thee the way by which thou mayest easily passe ouer the Mountaine. At this Vision *Changius* reioyced exceedingly, and arose without farther doubt or delay: because the trueth which he had found in the first Vision gaue him assurance of the other: in such sort that he forthwith speedily assembled his people, and commanded them to follow him with their wiues and children, and all that they had. And so they went forwards vntill they came to the place where the great and deepe Sea did beate against the Mountaine, so that there appeared no way nor passage for them.

There presently *Changius Can* as had beene commanded him by God, alighted from his Horse, and all his followers in like manner, worshipping nine times on their bended knees towards the East, they beseeched the Almighty and euerliuing God, that of his infinite mercy and grace he would vouchsafe to shew them the way and passage thence where they continued in prayer all that night. And in the morning arising, they saw that the Sea was departed from the Mountaine,

taine, and had left them a way of nine feet in bredth to passe. Whereat they being all astoni-
shed exceedingly, and rendring thanks to the Immortall God most deuoutly, they passed on
the way which they saw before them, and directed their steps towards the West. But as the
Histories of the *Tartarians* doe mention, after they had passed ouer those Mountaines, they in-
dured some hunger and thirst for certaine dayes, because the land was Desart, and the waters
were bitter and salt, which they could not by any meanes drinke, vntill at length they came
where they had all necessaries abundantly. In which place they abode many dayes. And there
it happened by the will of God, that *Changius Can* grew dangerously sicke, in such sort that
the Physicians despaired of his recouerie.

10 By reason whereof he called before him his twelue sonnes, and perswaded them to vnitie
and concord by an Example. For, he commanded each of them to bring with him an Arrow,
which when he had receiued, and bound them altogether he willed the eldest to breake them if
he could, which when he had tried, but could not performe, he deliuered them to the second, and
then to the third, and then to all the rest, but none of them could breake them as they were. Then
he commanded his youngest sonne to take the Arrowes seuerally and breake them, which hee
easily accomplished. Then said *Changius Can* to his sonnes: In like manner will it be with you;
for, as long as you remayne in concord and vnitie, your Empire shall continue; but as soone as
there commeth diuision amongst you, your power is easily ouerthrowne. Many other good
examples were given by him, and gathered by the *Tartarians*, which in their Language they
call, *Iasach*, or *Instructions of Changius Can*. And afterwards hee caused the wisest and best of
his sonnes, called *Hoccota Can*, to be receiued as his Successour in his Empire, before he died: and
then rested in peace. And his sonne, called *Hoccota Can*, was placed in his Seat.

20 But before wee end this Historie we must shew how the number of Nine came to be of reue-
rence and sacred estimation among the *Tartarians*: for of a memoriall of the nine kneelings
which they made in the Mountaine *Belgian*, when they worshipped the immortall God, accord-
ing to the direction of him that appeared in white Armour, and their way of the bredth of
nine feet, through which they passed, they hold that number Nine in very high estimation.
Insomuch, that if any will offer a Present to the *Tartarian* Emperour, it must bee presented in
forme of nine seuerall things; if hee will haue it graciously accepted; and so that the number
30 of Nine be offered the gift is reputed happie, which Custome is yet obserued at this day among
the *Tartarians*.

18. *Hoccota Can*, who succeeded in the Empire, was a man of much valour and wisdom,
which made him very well beloued of the *Tartarians*, who were alwaies faithfull and obedient
vnto him. Hee therefore bethought himselfe in what manner he might best subdue all *Asia*, and
thought good to make triall first of the mightiest Prince therein before he attempted it himselfe
in person. On that enterprize therefore he sent forth ten thousand Horse-men vnder the conduct
of a wise and valiant Leader, called *Gebesabada*, and commanded him to seeke out diuers King-
domes and States, and when hee met with an Aduersarie too mightie for him, to returne. Hee
marched on, and tooke diuers Castles and Townes, and cruelly vied those which hee vanquished
in battell, for terrour to others, putting out their eyes, and taking away their Horses and Vi-
40 ctuals; dealing kindly with the weaker. Thus hee proceeded to the Iron Gate which *Alexan-
der* built at the foot of *Cochas*, and razed it, lest it might hinder his returne. *Tuannus* the Prince
of *Georgia* came out against him, and in a Plaine, called *Mogran*, they fought, but the *Tartars*
ouercame; and proceeded to *Arscor* a Citie of the *Soldan* of *Turkie*, who was so well provided
to entertayne him, that *Gebesabada* seeing his forces decayed, returned to *Hoccota Can*, then in
Cambalu. Hee desiring to subdue all *Asia*, called three of his sonnes, giuing to each a great Ar-
mie, *Iochi* the eldest he sent Westward to *Tigris*; *Baydo*, to the North; *Chagoday*, to the South:
and so diuided *Asia* among his three sonnes. *Hoccota Can* made choise of another skillfull and
valiant Captaine, called *Baydo*, to whom he gaue thirtie thousand *Tartarian* Souldiers, termed

50 *Tamachi*, or Conquerours, and commanded them to set forward the very same way that the o-
ther ten thousand went before, and not to make stay in any place till they came to the King-
dome of *Turkie*, and to trie whether they could withstand the *Soldan* of *Turkie*, which was held
the mightiest of all the Princes in *Asia*. And if haply they found him so strong that they were
not able to encounter him, they should then forbear to fight with him, and make choise of
some place where they might rest themselues till they had receiued supplie of further aide from
some of his sonnes which should bee neereft vnto them, and that afterwards they might with
more safety set vpon him. *Baydo* accordingly with his thirtie thousand *Tartarians* came to the
Kingdome of *Turkie*; and there hee vnderstood that the *Soldan* which had discomfited the first
Tartarians was dead, and that his sonne *Guiatadin* succeeded him. And this man hearing of the
60 *Tartarians* comming, was very much afraid, and got all the Mercenaries that he could to his suc-
cour both *Barbarians* and *Latines*, and amongst others hee had to his aide two thousand *Latines*
vnder his two Captaines, the one called, *Iohn de Liminado*, who came from the Ile of *Cyprus*,
and the other *Bonifacius de Molin*, who was borne at *Genua*. The *Soldan* also sent to his Neigh-
bours, promising many fauours and benefits to such as would assist him, by which meanes hauing

Of *Mango Can* the fourth Emperour.

affembled a great number of men, hee went towards the place where the *Tartarians* made their abode, whom they found nothing aſtoniſhed at his approach; for they manfully gaue him battle at a place called *Confedrack*, where they ouerthrew the Armie of the *Turkes*, and ſo the *Tartarians* wonne the Kingdome of *Turkie*, in the yeere 1244.

19. And after a little time *Hocota Can* dyed, and a ſonne of his ſucceeded in the Empire, called *Gino Can*, whoſe life was but ſhort, and after him ſucceeded a Kinsman of his, called *Mango Can*, who was of very great power and ſubdued many Prouinces, and at length with a great ſpirit he went into the *Cathayan* Sea to take a certaine Iland, which whiles he held beſieged, the Inhabitants of thoſe parts being very ſubtile and ingenious, ſent certaine Diuers ſecretly vnder water, who continued ſo long vnder the Ship, in which hee was, vntill they had made many holes therein, ſo that the water came into it (no man obſeruing nor ſtopping the leake) vntill the Ship ſunke, and *Mango Can* was drowned therein. Whereupon the reſidue of the *Tartarians* returned home and choſe his brother, called *Cobila Can*, for their Emperour, who raigned ouer them two and fortie yeeres, became a *Chriſtian*, and founded a certaine Citie, called *Ions*, in the Kingdome of *Cathay*, which is reported to be greater then *Rome*; and in that Citie he dwelled vntill his dying day. But leauing him, let vs ſpeake of the three ſonnes of *Hocota Can*, and of *Haoloon*, and of his Heires.

20. *Iochi*, the eldeſt ſonne of *Hocota Can*, rode toward the Weſt with all that people which his Father had giuen him, and there finding fruitfull and pleaſant Countries, abounding in all kinde of riches, he fixed his Tents, and ruled ouer the Kingdome of *Turkeſtan*, and the leſſer *Perſia*, euen to the River *Phison*, where his people inhabiting euer ſince, are exceedingly multiplied in perſons and riches, and the Heires of *Iochi* haue ſucceeded one the other in thoſe Dominions to this preſent, and thoſe Countries are at this day ruled by two Brothers, the one called *Chapar*, the other *Doax*, who haue diuided thoſe Countries betweene them, and doe poſſeſſe them peaceably.

21. *Baydo*, the ſecond ſonne of *Hocota Can*, with the *Tartarians* which his Father gaue him, rode towards the North, vntill he came to the Kingdome of *Cumania*, where the *Cumanians* hauing many armed men, oppoſed themſelues, and defended their Land againſt them. But being at length ouercome, they fled to the Kingdome of *Hungaria*; where are yet many *Cumanians* inhabiting. *Baydo* hauing beaten the *Cumanians* out of their Countrey, went to the Kingdome of *Ruſſia* and conquered it, and poſſeſſed the Land of *Gazaria* (which is in the Northerne part of *Taurica*) and the Kingdome of *Bulgaria*, and by the way which the *Cumanians* had fled, he came to the Kingdome of *Hungaria*. Afterwards the *Tartarians* went towards the parts of *Germanie*, till they came to a certaine River that runneth through the Dukedome of *Auſtria*: where they thought to haue paſſed ouer a Bridge which they found there. But *Frederick* the Duke of *Auſtria*, and others, that bordered neere it, had fortified the Bridge ſo that the *Tartarians* were denyed paſſage. *Baydo* thereupon, incenſed with furie, commanded that all ſhould paſſe through the water, and himſelfe was the firſt that entred, expoſing thereby himſelfe and all his followers to apparant danger of death: for ſuch was the breadth of the River and the violence of the ſtreame, that their Horſes were wearied before they could come to the farther banke of the River. Which the reſidue ſeeing which were not yet entred into the water, they were confounded with grieve, and returned to *Ruſſia*, and *Cumania* which they formerly had conquered, as hath bene declared; and neuer ſince that haue the *Tartarians* attempted againſt *Germania*. But the poſteritie of *Baydo* hath euer ſince ſucceſſfully held thoſe Lands which he ſubdued. And he which now raigenth there, is called *Tochai*, and ruleth peaceably and quietly.

22. *Cangaday* (or *Chagoday*) with thoſe *Tartarians* which his Father gaue him, rode towards the South, euen to the parts of *India* the leſſer. There he found many Deſarts, Mountaines, and drie Lands not inhabited, ſo that hee could not paſſe that way: but hauing loſt many of his People, Horſes, and other Beaſts, he turned him towards the Weſt, and after much labour came to his brother *Iochi*, to whom he related what had befallen him: who taking compaſſion on his brother, gaue him and his people a good part of thoſe Countries which hee had: and euer after, thoſe two brethren dwelled together and their Progenie, vntill this day inhabite in thoſe parts; yet in ſuch ſort, that thoſe which deſcended of the younger brother, doe beare a kinde of reuerence to the poſteritie of the Elder, and ſo being content with their Portions, they liue peaceably and quietly together: and that Succellor of *Iochi* that now liueth, is called *Barach*.

23. In the yeere of our Lord 1253. *Haython*, the King of *Armenia*, ſeeing that the *Tartarians* had in a manner ſubdued all the Kingdomes, Countries, and Lands, euen to the Kingdome of *Turkie*, taking Counſell of the wiſe, he reſolued to goe in perſon to the Emperour of the *Tartarians*, the better to inſinuate himſelfe into his fauour, and to make league with him. But firſt he ſent his brother, Lord *Sinibaldy*, Conſtable of the Kingdome of *Armenia*, to obtayne ſafe conduct for him: who carrying with him many Preſents, and going attended with a goodly compaſſie, diſpatched in good order the buſineſſe for which he was ſent, yet ſtayed hee by the ſpace of foure dayes before he came backe to *Armenia*: but at his returne, he related to the King what he had ſcene and done: who without delay departed in ſecret manner diſguiſed, becauſe it might be

be dangerous for him to be knowne in the Kingdome of *Turkie*, through which hee must needes make his iourney: and as God would, at his comming thither, he found that the *Soldan of Turkie* was ouerthrowne by a *Tartarian* Captaine, whom hee met with there and made himselfe knowne vnto him, who when he vnderstood him to be the King of *Armenia*, and that hee was going toward the Emperour, entertayned him very honorably, and caused him to bee conducted to the Kingdome of *Cumania*, and beyond the Iron gate.

Haiton King of Armenia his iourney.

And afterwards, other *Tartarian* Captaines caused him to bee conducted ouer all other Countreies and Places, vntill he came to *Almalech* (or *Cambalu*) where *Mango Can* their Emperour resided; who reioyced much at the comming of the King of *Armenia*; and the rather for that from the comming of *Changius Can* ouer the Mountaine *Belgian*, no other great Prince had come to meet him, and therefore hee receiued and entertayned him with much honour and loue, and gaue vnto him some of the greatest persons about him to attend, and associate him at his pleasure, and did him many other fauours; But the King of *Armenia* hauing rested certaine dayes, intreated the Emperour to vouchsafe him Audience in those affaires, for which hee was come, and to giue him licence to returne. The Emperour very graciously answered him, that he would most willingly accomplish all his desires, and that it was very acceptable vnto him that he came of his owne accord.

c It seemes Caracorum which then was Almalech, the Kings Citie, or Cambalu, as Ramusio hath it.

The King with good deliberation made seuen Petitions. First, He desired that the Emperour and all his people would be baptized in the Christian Faith, leauing all other Sects. Secondly, That there might be a perpetuall peace and friendship established betweene the *Christians* and the *Tartarians*. Thirdly, That in all Countreies which the *Tartarians* either had conquered or should conquer, the Churches and Churchmen, whether secular or religious, might be free and exempted from all seruitude and payments. Fourthly, That he would deliuer and free the holy Land, and the holy Sepulcher of our Lord, out of the hands of the *Saracens*, and restore them to the *Christians*. Fifthly, That he would endeavour the destruction of the *Caliph of Baldach*, who was the head and chiefe Doctor of the Sect of *Mahometisme*. Sixthly, Hee required that a speciall Charter might be granted him, that of whatsoever *Tartarians* especially such as should be nearest to the Kingdome of *Armenia* hee should bee occasioned to demand aide, they should forthwith be readie to assist him. Seuenthly, He craved that all the Lands of the iurisdiction of the Kingdome of *Armenia*, which the *Saracens* had inuaded, and were or should happen to be recovered by the *Tartarians*, might be restored to the King of *Armenia*, and that such as he should get from the *Saracens*, hee might peaceably and quietly enioy. *Mango Can* hauing considered the Petitions of the King of *Armenia*, calling before him all his chiefe Captaines and Counsellors in their presence, made him answer after this manner. Because that the King of *Armenia* of his owne accord, and not of compulsion, is come vnto vs from remote parts; it becometh the Imperiall Maiestie to yeeld him all his demands that are lawfull and honest: Therefore to you, O King of *Armenia*, Wee returne this answer, That wee will accept of all your Requests made, and will cause them all (God-willing) to bee duely accomplished: first, I my selfe being Emperour and Lord of the *Tartarians*, will bee baptized in that Faith which the

Christians hold at this day; wishing and aduising all my Subjects to doe the like: yet not intending to force any thereunto. To your second, We will and agree that there be a perpetuall peace betweene the *Tartarians* and *Christians*, yet with this caution, that your selfe bee a chiefe Pledge and Suretie that the *Christians* obserue on their behalfe the like peace and amitie towards vs, as wee for our part intend inuolably to keepe towards them. Wee grant also, That all the Churches of *Christians* and their Clergie-men whatsoever, either Secular or Religious, shall enioy their Priuiledge and Immunitie of Libertie and Exemption throughout the Dominions of our Empire, and that none shall molest them any kinde of wayes. Touching the matter of the holy Land, we say, That if we could conveniently we would willingly goe thither in person, for the reuerence we beare to our Lord Iesus Christ. But because we haue many occasions of importance to stay vs in these parts, wee will take order with our Brother *Haloan* for the due accomplishment of that seruice in all points as it behooueth, for the freeing of the Citie of *Hierusalem* and all the holy Land, out of the hands of the *Pagans*, and restoring it to the *Christians*.

Concerning the *Caliph of Baldach*. We will giue order to *Baydo*, our Captaine of the *Tartarians*, which are in the Kingdome of *Turkie*, and the rest thereabouts, that they bee all obedient to our Brother, whom wee will haue to destroy the *Caliph* as our capitall and deadly Enemy. The Charter which the King of *Armenia* desireth for assistance from the *Tartarians*, Wee with it to bee drawne according to his desire, and wee are readie in all things to confirme it. Lastly, whereas the King *Armenia* requireth, That the Lands of his Kingdome, which the *Saracens* had taken from, and haue since bene recovered by the *Tartarians*, may be restored vnto him, we freely and frankly accord it, willing our Brother *Haloan* to see such restitution made without delay.

See the 18. and 24 Chap. ters.

Polo calls this Haloan, Vlan.

24. After that *Mango Can* had thus liberally accorded the Requests of the King of *Armenia*, and confirmed them by Charters, he would forthwith receiue the Sacrament of Baptisme, and was accordingly baptized by the hands of a certaine Bishop, who was Chancellor of the King of

Armenia, and all that were of his household with many other great Personages of both Sexes, And then he made choice of such as were to accompany his Brother Haloon, about the enterprize of the Holy Land. After Haloon and the King of Armenia departed, and rode both together vntill they passed ouer the great Riuer Phison; then Haloon with his mightie Armie inuaded the Countreyes and Lands euery where, and in lesse then six moneths hee subdued easily the whole Kingdome of Persia, because it was without a Ruler, or Gouvernour, and tooke in all the Countreyes without resistance, euen till he came to the Land of certayne Infidels, which are called *Assassini*, hauing neither Law nor Religion, but liuing as their Prince and Lord, commonly called * *Sex-montio*, instructeth them at whose pleasure and commandement they willingly and readily expose themselves to death. These had a certayne impregnable Castle, called *Tigado*, which was so well furnished with all kind of necessary prouision, and so strongly built and seated, that they feared no assault. Haloon therefore commanded one of his Captaynes to take with him tenne thousand of those *Tartarians*, which hee had left in Persia, and in no wise to depart from the siege of that Castle vntill hee had taken it, so that they remayned at the siege thereof, by the space of seuen yeares both Winter and Summer, which at last was yeelded vp by the *Assassini*, only for want of clothes, but not for any penury of victuals, or scarcitie of any other thing, whiles Haloon employed himselfe in ordering of the Kingdome of Persia, and besieging the Castle of the *Assassini*, the King of Armenia tooke leaue of him to returne, because hee had bene long out of his Kingdome: Haloon therefore licenced him to depart, and giuing him many great gifts, directed his Precept to *Baydo*, residing in the Kingdome of *Turkie*, which he had subdued, that he should conduct him safely to the entrance of his owne Kingdome, which in all things he fulfilled, so that after three yeares and a halfe of absence, the King of Armenia, through the mercie of Iesus Christ, came ioyfully home into his owne Countrey.

25. Haloon hauing ordered the Kingdome of Persia in conuenient manner, went into a certayne Prouince neere to Armenia, called *Sorlock*, where he repoied and recreated himselfe all the Sommer, and at the beginning of Winter he besieged *Baldach*, in which the Caliph resided, who was the chiefe Master and Doctor of the Irreligious Sect of *Mahometisme*, for which Enterprize Haloon re-enforced his Army with thirtie thousand *Tartarians*, that were in the Kingdome of *Turkie*, and assaulting the Citie by the shoare, hee tooke the same without any great difficultie, or delay. The Caliph was brought aliue into the presence of Haloon, and there was found in *Baldach*, so much Treasure and Riches as would scarcely bee beleued to bee in all the World besides; This Citie of *Baldach* was taken in the yeere 1258.

26. When Haloon had disposed of the Citie of *Baldach*, he caused the Caliph to be brought vnto him, and all his Treasure to be laid before him, Then he demanded of him whether he had bene Lord of all that Treasure, who affirming, it was asked againe why hee had not made vse thereof in procuring the ayde of his Neighbours, and leuyed mercenarie Souldiers to defend him and his Countrey from the power of the *Tartarians*, whose answer was that hee thought his owne people had been sufficient. Then said Haloon to the Caliph, thou art said to be the chiefe Doctor & Teacher of all that beleue the deceiuing Doctrine of *Mahomet*, & receiuest rewards and Gifts of them all; therefore such and so precious a Master must be fed with no other meate but with these precious things, which thou hast loued and kept so carefully, all which wee giue thee for thy sustenance: and so commanded that the Caliph should bee shut into a Chamber, and that his Pearle and Gold should bee set before him, that hee might eate as much as hee would thereof, but that no other meate nor drinke should be giuen him; by which meanes the miserable wretch ended his life after a miserable manner. And there was no other Caliph in *Baldach* after him.

27. After that Haloon had subdued *Baldach* and all the Countrey round about, hee distributed the Prouinces amongst his Captaines and Rulers as he thought good, giuing charge that the Christians should euerie where hee louingly vsed, and be preferred to the gouernment of Castles and Cities, and the *Saracens* held vnder streight subiection. Haloon had also a Wife called *Donscario* descended of those Kings that came from the East being guided by the Starre of the Natinitie of our Lord, which Ladie being a most deuout Christian, was a great meanes of destroying the Temples of the *Saracens*, and prohibiting the Solemnities and Ceremonies of *Mahomet*, and finally rased their Temples to the ground, and brought the *Saracens* in such subiection that they durst not shew their heads.

28. After that Haloon had rested a yeare, he sent to the King of Armenia, to meete him at the Citie *Robays*, in the Kingdome of *Mesopotamia*, because he intended to goe towards the Holy Land, that hee might restore it to the Christians, whereupon, the King Haythom of famous memorie tooke his Iourney, accompanied with a great Armie both of Horsemen and Footmen, for at that time the Kingdome of Armenia, was in so good estate, that it could raise a power of twelue thousand Horse, and threescore thousand Footmen, whereof beeing an Eye witnesse myselfe, I can will giue testimonie thereof, when the King of Armenia was come according to this appointment of *Haplan*, and had conference with him touching the Enterprize of the Holy Land, he aduised him that because the *Soldan* of *Halappi*, ruled ouer all the Kingdome of *Sy-*

ria, in which the Citie of *Ierusalem* was seated, the way to get the Holy Land, was first to besiege the Citie of *Halappi*, being the chiefe Citie of *Syria*, which when he had wonne, it would not be difficult for him to subdue all the rest of that Countrey: which advise *Haloön* liked well, and besieged the Citie of *Halappi* (or *Aleppo*) which he found to be of great strength being well walled and inhabited: therefore with Mines vnder ground, with Slings and other Engines, hee begirt it so straightly, and assaulted it so manfully on euery side that albeit it seemed impregnable, yet in the space of nine dayes he obtayned it. In this Citie they found such incredible store of wealth as would hardly be beleued, yet there was a Castle in the midst of the Citie, that held out eleuen dayes after the Citie was taken, which at length was wonne by vndermining. So the Citie *Halappi*, and afterwards the Kingdome of *Syria*, was taken by *Haoloön* in the yeare of our Lord * 1240.

Balestri.

Halapo taken.

* 1260. yet both Latine & Italian haue 1240.

29. But when the Soldan of *Halappi* named *Melechnafer* being then in the Citie of *Damascus*, vnderstood that the Citie of *Halappi*, with his Wife and Children in it, was taken, being vtterly destitute of Countell hee came and cast himselfe at the feet of *Haloön*, hoping thereby that his Wife and Children with some part of his Dominions would bee restored him. But the Soldan found himselfe therein deceiued, for *Haloön* sent him with his Wife and Children into *Persia*, that thereby he might enioy the Kingdome of *Syria*, the more securely. These things thus disposed, *Haloön* gaue to the King of *Armenia* a great part of the spoile of *Halappi*, and of the Lands which he had inuaded, whereby the King of *Armenia* was strengthened with many Castles bordering on his Kingdome, which he fortified as he thought good; and after that *Haoloön* had settled the affaires of those Cities and Countries which he had wonne, intending to goe to *Ierusalem* to free the Holy Land from *Pagans*, and to restore it to the Christians. There came to him a Messenger the third day, who brought newes that the *Tartarian* Empire was vacant by the death of his Brother *Mango Can*, and that his comming was earnestly expected to bee his Successor therein, which report made him very sorrowfull: In regard whereof hee could now proceed no further in person, but left ten thousand *Tartars* to keepe the Kingdome of *Syria*, vnder the command of a Captayne called *Guiboga*, to whom he gaue order that hee should conquer the Holy Land, and restore it to the Christians. And so leauing his Sonne at *Tauris*, hee hastened Eastward himselfe by great Iourneyes.

30

§. III.

Of *COBILA CAN* the fift Emperour, of the *Tartarians*: Of the Warre with *BARCHA*, and *Tartarian* quarrell with the Christians, *HAOLOÖNS* death. Acts of the Soldan of Egypt. Of *ABAYA* and other Sonnes and Successors of *HAOLOÖN*.

40 **B**Vt before he could come to the Kingdom of *Persia*, he heard that the Nobles & Princes had placed his Brother *Cobila Can* in the Imperial Seat of the *Tartars*, which he heard whilst he was at *Tauris*: where he vnderstood that *Barcat* (or *Barcha*) was marching thither with a great Armie, purposing to make himselfe Emperour: *Haoloön* therefore assembled his people and met with his Enemies, on a certayne Riuer which was frozen, where beganne a very great Battaille. But the Ice being broken by the great multitude of Horses and Men, there was drowned on the one side and on the other thirtie thousand *Tartars*; Insomuch, that the Armies on each side returned. But *Guiboga* whom *Haoloön* had left in the Kingdome of *Syria*, and the Prouince of *Palestina* held those Countreyes peaceably, and loued the Christians well, for he was of the Progenie of the three Kings which went to worship the Natiuitie of our Lord. But when he had laboured earnestly to reduce the Holy Land againe vnder the power of the Christians, the Deuill sowed the seed of scandall, and discord betwixt him and the Christians of those parts, which hapned on this manner. In the Land of *Belforte*, which is of the Territory of the Citie of *Sidon*, there were sundry Townes and Villages inhabited by *Saracens*, which paid certayne Tribute to the *Tartars*, on whom some of *Sidon* and *Belforte* made diuers rodes and spoyles killing sundry of the *Saracens*, and carrying others away Captiue with a great droue of Cattle. A Nephew of *Guiboga* remayning nere thereabouts, followed speedily after those Christians that had committed those outrages to tell them on the behalfe of his Vncle, that they should dismisse their bootie. But some of them vnwilling to large their prey they had taken, ranne vpon him, and slue him, with diuers other *Tartarians* that accompanied him. *Guiboga* hearing that the Christians had slaine his Nephew, rode presently and rooke the Citie of *Sidon*, dismantled the walls thereof, and slue some few Christians, the rest sauing themselves in an Iland. And neuer after would the *Tartars* trust the Christians of *Syria*, neither durst they put confidence in the *Tartars*, who were afterwards driuen out of the Kingdome of *Syria* by the *Saracens*, as shall be declared.

The Civill war betweene *Haoloön* and *Barcat* or *Barcha*. See *Polo*, §. 1. *Guiboga* of the Kindred of the three Kings that came to worship the Natiuitie of Christ.

Paruana.

31. Whiles Haaloon was busie in the warre with Barcat, as hath beene said, the Soldan of Egypt assembling his Armie came to the Prouince of Palestina, and in a place called Hamalech, he ioyned battaile with Guiboga and his Tartars, where Guiboga was slaine, and his Armie defeated. The Tartars which escaped went into Armenia, and by this meanes the Kingdome of Syria was wholly subdued by the Saracens, sauing certayne Cities of the Christians, which were seated neere the Sea. When Haaloon vnderstood how the Soldan of Egypt had inuaded Syria, and driuen thence his people, he gathered his Armie and sent to the King of Armenia, and to the King of Georgia, and the other Christians of the East to prepare themselves against the Soldan of Egypt and the Saracens, and when his Armie was in readinesse a sicknesse seized him, of which he languished the space of a fortnight, and then dyed, by whose death the enterprize of the Ho-
ly Land had an end. Abaga his Sonne held the Dominion of his Father, who intreated the Em-
perour Cobila Can being his Vncle, to confirme him therein, to which he willingly accorded. So he was called Abaga Can, and began to reigne in the yeare of our Lord 1264.

32. Abaga was wise and gouerned prosperously in all things, two only excepted, one that he would not be a Christian, as his Father had beene, but worshipped Idols, beleeuing the Idolatrous Priests. The other, that he was alwayes in warres with his Neighbours, by reason whereof the Soldan was long in quiet, and the power of the Saracens much increased. Those Tartars (or rather Turks) which could escape from out the Dominion of the Tartars, fled vnto the Soldan, seeking to auoid the heauie burthens which the Tartars imposed on them. And the Soldan dealt politikelly, for he sent Messengers by Sea to the Tartars, in the Kingdomes of Cumania, and Russia, and made composition and agreement with them, that whensoever Abaga should moue warre against the Land of Egypt, then they should inuade his Countrey, for which he promised them great gifts, by meanes whereof Abaga could not well inuade the Land of Egypt, but the Soldan could easily without resistance inuade the Christians in the parts of Syria, inso much, that the Christians lost the Citie of Antioch, and diuers other places of strength, which they held in that Kingdome.

33. Moreouer, Bendekar the Soldan of Egypt was so fortunate that he much abased the Kingdome of Armenia. For it hapned that the King of Armenia with many of his men was gone to the Tartars, which the Soldan hearing, sent a Captayne of his to inuade the Kingdome of Armenia. The Sonnes of the King of Armenia, gathering together all that could beare Armes, encountered the Egyptians in the Confinnes of their Kingdome, and resisted them courageously; but the Armie of the Armenians being ouerthrowne, one of the Kings Sonnes was taken, and the other was slaine in battaile. So that the Saracens thereby wasted and spoyled all the Kingdome of Armenia, and carryed infinite riches thence to the great damage of the Christians, whereby the Enemies power was much encreased, and the Kingdome of Armenia wondrously weakned. The King whose endeauour was wholly bent about the destruction of the Infidels, hauing heard this most vnhappie newes of his owne Countrey, busied his thoughts night and day how to afflict the Saracens, and oft-times very earnestly dealt with Abaga, and his Tartars to attempt the ouerthrow of faithlesse Mahomet, and the reliefe of the Christians. But Abaga excused himselfe by reason of the warres, in which he was daily entangled with his Neighbours. The King of Armenia seeing that hee could not haue any present ayde of the Tartarians, sent and made truce by his Messengers with the Soldan of Egypt, that he might redeeme his Sonne which was Prisoner. The Soldan also promised him that if he restored him a friend of his called Angoldscar whom the Tartars held captiue, and yeilded vp the Castle Tempack, and some holds of the Citie of Halappi, which he had gotten in the time of Haaloon, hee would set his Sonne at libertie. Whereupon the Soldan, hauing receiued his friend, and the Castle of Tempack beeing yeilded, and two other Castles throwne downe at his appointment, deliuered his Sonne out of Prison, and restored him accordingly. Then afterwards King Haythou of famous memorie, hauing reigned fortie five yeares, and done much good to the Christians, yeilded vp his Kingdome and Dominion to his Sonne Linon, whom he had deliuered out of captiuitie, and renouncing this Kingdom of the World became professed in Religion, and was called Macharius, changing his name (according to the custome * of the Armenians) when they enter into Religion, and in short time after dyed in peace in the yeare of our Lord 1270.

34. This King of Armenia Linon was wise, and gouerned his Kingdom prouidently, and being much beloued by his owne People, and by the Tartars, he laboured earnestly to destroy the Saracens, so that in his time Abaga made peace with al his neighbors, who of long time had been his enemies. Then the Soldan of Egypt entred the Kingdome of Turkie, and slue many of the Tartars, and draue them out of many Townes. For a Saracen, called Paruana, being Captaine ouer the Tartars that were in Turkie, rebelled against Abaga, and fought the destruction of the Tartarians. Abaga hearing thereof, posted thither so speedily, that in fifteene dayes hee rode fortie dayes journey. The Soldan hearing of his comming departed suddenly, not daring to make any longer abode. Yet could not so speedily withdraw himselfe, but that the Tartars following swiftly, ouertooke the rereward of his Armie in the entrie of the Kingdome of Egypt, in a place called Pasblanke. There the Tartarians rushing on them, tooke two thousand Horsemen of the

the *Saracens*, beside much riches, and five thousand of the *Cordines* which lived in that Countrey. *Abaga* being come to the Confines of *Egypt*, was perswaded to goe no farther for heat: for that Land is very hote, and his *Tartars*, and their beasts hauing come speedily from farre, could hardly haue indured it, by reason whereof hee returned into *Turkie*, and spoiled and wasted all the Countreies that had rebelled, and yeelded to the *Soldan*. But he caused the Traytor *Paruana* with his partakers to be cut asunder in the midst, after the *Tartarian* manner; and part of his flesh to be serued in all his meats, whereof he and his Captaines did eat. Such was the reuenge of King *Abaga* on the Traitor *Paruana*.

Paruana cut asunder and eaten.

35. *Abaga* hauing effected his desires in *Turkie*, and enriched his *Tartars* with the spoyle of the rebellious *Saracens*, he called to him the King of *Armenia*, and offered him the kingdome of *Turkie*, in regard that his father and hee had bene euer faithfull to the *Tartarians*. But the King of *Armenia* being discreet and wise, rendred great thankes to *Abaga* for so great a Present, but excused himselfe from the accepting thereof, as vnable to gouerne two Kingdomes. For the *Soldan* of *Egypt* was in his full strength, and earnestly bent against the Kingdome of *Armenia*: so that hee had enough to doe to prouide for the defence thereof. Yet aduised him to settle and dispose the Kingdome of *Turkie* in such sort ere his departure, that there might bee no feare of Rebellion after wards: and in any case to permit no *Saracen* to command there. Which aduice *Abaga* accepted of, and neuer after suffered any *Saracen* to beare rule in that Countrey. The king of *Armenia* then desired him to thinke of deliuering the Holy Land out of the hands of the *Pagans*: wherein he promised all his best endeauour: and wished the King to send messengers to the Pope, and to other Princes of *Christendome* for their assistance. So *Abaga* hauing ordered the affaires of *Turkie*, returned to the Kingdome of *Corazen*, where hee had left his familie. *Bendecar* the *Soldan* of *Egypt*, after he had received such damage by the *Tartars*, was poisoned, died in *Damascus*: whereof the *Christians* of those parts were very glad. And the *Saracens* very sorrowfull: for they had not his like after, as they themselves commonly reported. For his sonne, called *Melechahic*, succeeded him, who was loone driuen out of his Dominion by one called *Elfi*, who violently vsurping, made himselfe *Soldan*.

King *Liunore* refuseth the offer of the Kingdome of *Turkie*.

Hee vrgeth the deliuering of *Ierusalem* from *Pagans*.

Corazen.

The death of the *Soldan*.

Melechahic his sonne and successor.

Elfi the *Soldan*.

36. The time appointed being come, when *Abaga* was to begin his warre against the *Soldan* of *Egypt*, hee appointed his brother *Mangodanior* to goe to the Kingdome of *Syria* with thirtie thousand men, being *Tartars*, and courageously to overcome the *Soldan*, if he came in battell against him: or otherwise to take in the Castles and Holds of the Countrey, and deliuer them to the *Christians*, if the *Soldan* should shun the fight. When *Mangodanior* with his Armie setting forward, was come neere the Confines of *Armenia*, hee sent for the King of *Armenia*, who came presently vnto him with a goodly companie of Horse: so that they entred the Kingdome of *Syria*, and went spoyleing and foraging, till they came to the Citie *Aman*, now called *Camella*, which is seated in the midst of *Syria*. Before this Citie lieth a faire great Playne, where the *Soldan* of *Egypt* had assembled his Power, intending to fight with the *Tartarians*. And there the *Saracen* on the one side, with the *Christians* and *Tartars* on the other side, fought a great battell. The King of *Armenia* with the *Christians* ruled and commanded the right wing of the Armie which inuaded the *Soldans* left wing manfully, and put them to flight, and pursued them three dayes iourney, euen to the Citie *Aman*. Another part of the *Soldans* Armie was also routed by *Amalech* a *Tartarian* Captaine, who pursued them also three dayes iourney, to a Citie called *Turara*. When they thought the *Soldans* Power vtterly ouerthrowne, *Mangodanior* who neuer had seene the conflicts of warre before, being afraid without any reasonable cause of certaine *Saracens*, called *Beduini*, withdrew himselfe out of the field, hauing the better, forsaking the King of *Armenia*, and his Captaine which had preuayled against his enemies. When the *Soldan*, which thought he had lost all, saw the field cleere, and all abandoned, he got vpon a little hill, with foure armed men, and stood there. The King of *Armenia* returning from the pursuit, and missing *Mangodanior* in the field, was much astonied, and imagining which way hee should be gone, followed after him.

Mangodanior deputed Generall by his Brother.

He commeth to battell against the *Soldan*.

Turara.

Amalech.

37. But *Amalech* returning from the enemies whom he had pursued, abode two dayes expecting his Lord, supposing that he had followed after him, as he ought, for the further subduing of his enemies, and the Countrey which they had overcome: till at last, hauing heard of his retrait, leauing his victorie, hee made speed after him; whom hee found on the banke of the River *Euphrates* staying for him. And then the *Tartars* returned to their owne Province. But the King of *Armenia* sustained much losse, and hard aduenture in his returne: for the Horfes of the *Christians* of the Kingdome of *Armenia*, were so wearied and spent with the length of the way, and want of Fodder, that they were not able to trauell, so that the *Christians* going scatteringly by vnusuall wayes, were often found out, and slayne without mercy by the *Saracens* inhabiting those parts: Infomuch that the greatest part of the Armie was lost, and in a manner all the Nobility. And this misaduenture of *Mangodanior* happened in the yeere of our Lord 1282.

The King of *Armenia*, his great losse at his returne.

1282.

Abaga prepa- red his reuenge.

When *Abaga* vnderstood the successe hereof, he assembled all his people, and when hee was readie to set forward with all his power against the *Saracens*, a certaine *Saracen*, the sonne of the Deuill, came to the Kingdome of *Persia*, and preuayled by giuing great gifts to the King that he should serue him.

serued neere about *Abaga*, in such sort, that both he and his brother *Mangodanior* were poyso-
ned both in one day: and died both within eight dayes after. The trueth whereof was after-
wards disclosed by the mischieuous Malefactors themselues. And so died *Abaga Can* in the
yeere of our Lord 1282.

37. After the death of *Abaga Can* the *Tartars* assembled themselues, and ordayned ouer
them a brother of his, called *Tangodor*, who had ouergone the rest of his brethren. In his youth
he had receiued the Sacrament of Baptisme, and was baptised by the name of *Nicholas*. But be-
ing come to riper yeeres, and keeping companie with *Saracens*, whom hee loued, hee became a
wicked *Saracen*, and renouncing *Christian* Religion, would be called *Mahomet Can*, and labou-
red by all meanes to turne all the *Tartarians* to that irreligious Sect of *Mahomet* the sonne
of Iniquitie; in such sort, that those that hee could not compell by violence, hee allured by
preferments and rewards: insomuch that in his time many of the *Tartarians* became profes-
sed *Saracens*, as at this day appeareth. This Child of perdition commanded the Churches of the
Christians to be destroyed, and forbade them to vse any of their religious Rites or Ceremonies.
Hee caused the doctrine of *Mahomet* to be publicly preached, the *Christians* to be banished,
and their Churches in the Citie of *Tauris* vtterly to be destroyed. Hee sent Messengers also
to the *Soldan* of *Egypt*, and concluded a Peace and a League with him, promising that all the *Chri-
stians* within his Dominion should become *Saracens*, or else lose their heads, which gaue the *Sa-
racens* cause of much reioycing, and made the *Christians* very sad.

Hee sent moreouer to the King of *Armenia* in *Georgia*, and to the other *Christian* Princes of
those parts to come vnto him without delay. But they resolued rather to die in battell then to
obey his commandement, for other remedie they could finde none. And the *Christians* being
now in such anguish and bitternesse of heart, that they rather desired to die then to liue, euen
God (which neuer refuseth them that put their trust in him) sent consolation to them all. For
a Brother of this *Mahomet*, with a Nephew of his also, called *Argon*, opposing themselues,
and rebelling against him for his euill deeds did signifie to *Cobila Can* the great Emperour of the
Tartarians, how he had forsaken the steps of his Ancestors, and was become a wicked *Saracen*:
labouring with all his might to bring the rest of *Tartars* to be *Saracens* also. Which when, *Co-
bila Can* vnderstood he was much displeased thereat: insomuch that he sent and required *Ma-
homet* to reforme his euill wayes, for otherwise he would proceed against him. Which message
replenished him with wrath and indignation, insomuch that he being perswaded there was none
that durst gainsay his proceedings but his Brother and his Nephew *Argon*, he caused his Brother
to be slayne: and intending the like to his Nephew, he went against him with a mightie Armie.
Argon being not of strength to withstand his forces, betooke himselfe to a strong Hold among
the Mountaines; which that Sonne of Iniquitie besieged with his deuillish Armie.

Argon finally yeelded himselfe, with condition that he might still enioy his Dignitie and Do-
minion. But *Mahomet* deliuered him to the Constable and others of the Nobilitie, to bee kept
in Prison. And departing towards the Citie of *Tauris*, where he left his wiues and children, he
gaue direction that his Armie should come softly after him: but appointed the Constable, and
such as he trusted most, to put his Nephew to death secretly, and to bring him his head. These
things thus hastily ordered and directed, there was amongst those that had receiued the com-
mand of that bloody execution, a man of some Place and Authoritie, brought vp vnder *Abaga*
the Father of *Argon*, who hauing compassion of his distresse, tooke Armes, and in the night
time slue the Constable of *Mahomet* and all his followers, and deliuering *Argon*, made him Lord
and Ruler of all: some for feare, and others for loue being obedient to his will and commande-
ment. *Argon* being thus established, accompanied with his faithfull followers, pursued present-
ly after *Mahomet*, whom he ouertooke and seized on before he came to *Tauris*, and caused him
after their manner, to be cut asunder in the midst. And such was the end of that cursed Caitiffe
Mahomet, before he had sate two yeeres in his seat.

§. IIII.

Of *ARGON* the Sonne of *ABAGA*, and *REGAITO* his Brother; of
BAIDO, and of the exploits of *CASAN* against the
Soldan of *Egypt*, and others.

IN the yeere of our Lord 1285. after the death of *Mahomet*, *Argon* the sonne of *Ab-
ga Can*, would not take on him the title of *Can*, vntill he had receiued commandement
from the great *Can* Soueraigne Lord and Emperour, to whom he dispatched Messen-
gers which were honourably receiued, and entertayned by the great *Can*, who reioy-
ced much of his successe against *Mahomet* and sent some of his great Officers, to confirme *Ar-
gon* in his Dominion, who was thenceforth called *Can*, and much respected of all. For he was
of a goodly aspect and preface, couragious and wise in his proceedings, much regarding and
honou-

firmed by *Co-
bila Can*.

honouring the *Christians*. The Churches over-throwne by *Mahomet* he repayed. The Kings of *Armenia* and *Georgia*, with the other Christian Princes of the East, came vnto him, desiring his best counsaile, and helpe that the holy Land might be freed from the *Pagans*. *Argon* very graciously answered, That he would gladly doe any thing that might tend to the honour of God, and the aduancement of Christian Religion, and that he intended to make peace with his Neighbours, that hee might the more freely and securely follow that enterprife. But *Argon*, before the execution of these good designments, dyed in the fourth yeere of his raigne. And a Brother of his, called *Regaito*, succeeded him, who was a man of small valour, as shall be after declared.

39. In the yeere of our Lord 1289. after the death of *Argon Can*, his brother *Regaito* was his Successor, being a man of no Religion: in Armes he was of no valour, but was altogether giuen ouer to beastly luxurie, and satiating his insatiable appetite with superfluous meates and drinckes: and did nothing else by the space of six yeeres which he raigne, insomuch that being hated of his subiects and contemned of strangers, he was finally strangled by his Peeres. After whose death *Baydo*, a Kinsman of his succeeded him, who was vpriight and constant in Religion, and did many fauours to the *Christians*, but he soone ended his dayes, as shall be declared.

40. In the yeere of our Lord 1295. after the death of *Regaito*, his Kinsman *Baydo* ruled ouer the *Tartars*. He being a good *Christian* builded the *Christian* Churches, and commanded that none should Preach or publish the Doctrine of *Mahomet* amongst the *Tartarians*. But because those of the Sect of *Mahomet* were many, they could hardly be induced to bee obedient to that commandement of *Baydo*, and therefore sent Messengers secretly to *Casan* the sonne of *Argon*, promising to giue him the Dominion which *Baydo* held, and to make him their Lord and Ruler, if he would renounce the *Christian* Religion. *Casan* caring little for Religion, but greatly affecting Dominion, promised to doe whatsoeuer they would, and so began an open rebellion, whereupon *Baydo* assembled his people, thinking to haue taken *Casan*, not knowing of the Treason which his people had wrought against him. But when they came to the Field, all the *Mahometists* leauing *Baydo*, fled vnto *Casan*, so that *Baydo* being forsaken, thought to haue escaped by flight, yet was pursued and slaine by his Enemies.

41. After the death of *Baydo*; *Casan* being made Ruler ouer the *Tartars*, at the beginning of his raigne, durst not gainsay what hee had promised the *Mahometists* that had promoted him thereto, and therefore shewed himselfe for a while very austere to the *Christians*. But when hee found himselfe well and firmly settled in his Dominion, hee began to honour and cherish the *Christians*, doing them many fauours as shall be declared. First, therefore hee destroyed many great Ones, who had beene perswaders with him to become a *Saracen*, and to persecute the *Christians*. Then hee commanded all the *Tartars* within his Dominion, to bee readie with their Armour and all necessarie furniture, to attend him for a Conquest of the Kingdome of *Egypt*, and ouer-throw of the *Soldan*, and sent to the King of *Armenia*, and the King of *Georgia*, and other Christian Princes of the East in that behalfe. At the beginning of the Spring *Casan* gathered his forces, and first set forward towards *Baldach*: and at length turned towards the Land of *Egypt*. The *Soldan*, called *Melechnaser*, who had long before some intelligence of the coming of the *Tartars*, assembled all his power, and came before the Citie of *Aman*, which is seated in the middest of the Kingdome of *Syria*. *Casan* vnderstanding that the *Soldan* meant to giue him battaile, forbore to besiege any Citie or Castle, but hasted speedily to the place where the *Soldan* was, and pitched his Tents but one dayes iourney from him in certaine Meadowes, where was plentie of forrage and feeding, where he rested his Followers and their Horses which were wearied with their trauell. Amongst whom was a *Saracen*, called *Calphack* (or *Capchick*) who had serued the *Soldan*, and was fled from him to *Casan*, for feare of imprisonment and punishments for his misse-demerits. This *Calphack* had receiued sundrie fauours and rewards of *Casan*, who reposed great confidence in him: yet, like a wicked Traytor, he disclosed the counsaile and purpose of *Casan* to the *Soldan* and *Saracens*, acquainting them by Letters how *Casan* meant to abide in those Meadowes, vntill they had sufficiently rested their Horses which were wondrously wearied, and therefore counsailed the *Soldan* to set vpon him before his Horses were refreshed, whereby he might easily ouer-come the *Tartarians*.

The *Soldan* who thought to haue expected the *Tartars* at the Citie of *Aman*, did hereupon change his resolution, and with a chosen companie hasted with all speede to assaile *Casan* at vnawares. But his Espials and Scouts giuing him notice of their approach. *Casan* commanded his men presently to be set in order and manfully to resist them. He himselfe more bold then a Lion with such companie as hee had about him, rode to meete the *Saracens*, who had approached so neere that they could not auoid the battaile. *Casan* seeing that the residue of his companie were spread so farre abroad in the Countrey for the feeding of their Horses, that they could not suddenly come to him, he commanded those that were with him to dismount from their Horses, and placing them in a Circle, made as it were a Wall of them, and with their Bowes and Arrowes caused his men to expect their Enemies, and not to shoote vntill they were sure to reach them, by which meanes the *Tartars* shooting altogether, wherein they are very skillfull and readie, wounded the foremost Horses of their Enemies in such sort that they fell before the rest, where-

by the rest following on with great furie, and finding the former ouerthrowne, fell themselves head-long ouer them: insomuch, that of all the *Saracens* there escaped few, which were not either ouerthrowne or else wounded to death, with the Arrowes of the *Tartars*.

The *Soldan* himselfe being in the Armie, fled as fast as hee could, which *Casan* perceiuing, made his men get vp on their Horses, and manfully to set on their Enemies, being himselfe the foremost amongst them that entred the Armie of the *Soldan*, who with some small companie remaining so long, sustayned the brunt, vntill the *Tartars* came in Troupes well ordered to fight, and then came the whole Armie on both sides to battaile, which endured from the Sunne rising till the Ninth houre. But in the end, the *Soldan* with his *Saracens* fled, being not able to withstand the courage of *Casan*, who did wonders with his owne hand, and pursued them with his people, killing on euery side vntill it was darke night, and made so great slaughter of the *Saracens*, that the Earth was couered euery where with their dead carcases. That night *Casan* rested at a place, called *Caneto*, reioycing exceedingly at that great victorie which God had giuen him against the *Saracens*. This fell out in the yeere of our Lord 1301. on the Wednesday before the Feast of the Natiuitie.

42. Then *Casan* sent the King of *Armenia*, and a Leader of the *Tartars*, called *Molay*, with fortie thousand Horse, to pursue the *Soldan* as farre as the Desert of *Egypt*, being twelue dayes journey distant from the place where the battaile was fought, and willed them to expect him or some Messenger from him at the Citie *Gazara*. And they departed speedily before the Sunne rising, to follow after the *Soldan*. But some three dayes after, *Casan* sent for the King of *Armenia* to returne, because he purposed to besiege the Citie of *Damascus*, and willed *Molay* with the fortie thousand *Tartars* to pursue with speede after the *Saracens*, and to put what hee could take to the sword. Yet the *Soldan* himselfe flying very swiftly, and riding on Dromedaries both night and day, in the conduct and companie of certaine *Beduini*, escaped into the Citie of *Babylon* very strangely. But others of the *Saracens* fled seuerall wayes, as they thought they could best saue themselves, and a great number of them going by the way of *Tripolis*, were slaine by the *Christians*, which inhabited the Mountayne of *Libanus*. The King of *Armenia* returning to *Casan*, found that the Citie of *Aman* had yeelded vnto him, so that the whole treasure of the *Soldan*, and his Armie was brought into his presence: which was so great that euery one maruailed, why the *Soldan* carried so much treasure with him when he went to fight. *Casan*, when he had gathered together all the riches and spoiles which they had gotten, bestowed them bountifully amongst the *Tartars*, and the *Christians* his followers, whereby they were all made rich.

And Friar *Haytho*, the Compiler of this Historie, who was present in all Expeditions and Battailles, which the *Tartars* had with the *Soldan*, from the time of *Halo* to this day, yet did I neuer see nor heare that any of the *Tartarian* Lords accomplished more in two dayes then did *Casan*. For the first day, with a small companie of his owne, he ouer-came a great Armie of his Enemies, and did such exploits in his Person, that he wanne fame and commendations aboue all the rest. On the second day, such was his largesse, and so great this liberalitie of his heart, that of all the infinite wealth and treasure which hee got, hee kept nothing for himselfe, but a Sword and a Purse, in which was contayned certaine writings concerning the Land of *Egypt*, and the number of the *Soldans* Armie. And this was most maruailous aboue all the rest, how in so little a body, and of so bad presence (for he seemed like a Monster) there could be so much vertue and rigour contayned: for among neere two hundred thousand Souldiers, there could hardly one of lesse stature, or of worse aspect be found. Therefore, because this *Casan* liued in our time, it is fitting wee made the more ample narration of his Acts. And in regard that the *Soldan* who was ouerthrowne by *Casan*, is yet liuing at the writing of this Historie, they which intend to destroy, or any wayes to endamage the *Saracens*, may receiue many aduertisements out of these Collections.

After some few dayes rest, *Casan* directed his course towards the Citie of *Damascus*: where the Citizens hearing of his approach, and fearing lest if hee tooke them by force, they should die without mercy, by the aduice of the wisest amongst them, sent with one consent their Messengers vnto him with offer of their Citie, which hee willingly accepted, and after a while rode towards the Riuer of *Damascus*, on whose Bankes hee pitched his Tents, forbidding any damage to be done to the Citie. Then the Citizens sent him diuers gifts, and plentie of victuals for his Armie. There *Casan* made his abode fise and fortie dayes with all his Followers, except those fortie thousand *Tartars* which were sent with *Molay*, who stayed his coming at the Citie of *Gaccara*.

43. While *Casan* reposed himselfe neere *Damasco*, there came newes vnto him, how a Kinsman of his called *Baydo*, had entred into the Kingdome of *Persia*, and committed great spoile there in his absence: and thereupon hee resolved to returne to his owne. Leauing therefore his chiefe Captaine *Cotolusa*, with part of his Armie for the custodie of the Kingdome of *Syria* (whom hee willed *Molay* and the rest of the *Tartars* to be obedient vnto as to his Lieutenant) he set Rulers and Gouvernours ouer all the Cities, and committed the government of *Damascus* to the Traytor *Calfach*, being not yet acquainted with his trayterous disposition. Then calling to

to him the King of *Armenia*, and acquainting him with his purpose, hee told him that hee would willingly haue deliuered the Lands which hee had conquered into the *Christians* hands, if they had come to him, and that if they came hee would giue order to *Cotolusa* to restore them the Lands which they had formerly holden: and to yeeld them conuenient supply for the repaying of their Castles and Fortresses. These things thus ordered, *Casan* tooke his journey towards *Mesopotamia*, but when hee came to the Riuer *Euphrates*, hee sent word to *Cotolusa*, that leauing twentie thousand *Tartars* vnder the command of *Molay*, hee should come speedily to him with the rest of the Armie. *Cotolusa* did as was commanded him, so that *Molay* remayned Lieutenant in *Syria* for *Casan*, who est-soones by perswasion of the

Calfachs treason.

10 Traitor *Calfach*, remoued towards the parts about *Ierusalem*, to a place called *Gaur*, to finde good feeding and prouision for his Horses.

Gaur.

But in the Sommer time, *Calfach* (who had formerly hatched Treason in his heart against *Casan*, sent word secretly to the *Soldan*, that hee would restore him *Damascus*, with the other Townes which *Casan* had taken. The *Soldan* liked hereof, and couenanted to giue him *Damasco* in perpetuall keeping, and part of his treasure with his siter to wife. Insomuch, that shortly after, *Calfach* became Rebell, and caused all the strong places to rebell against the *Tartars*, bearing themselves bold on the heate of Sommer, in which they knew the *Tartars* could not ride nor yeeld any aide vnto their friends. When *Molay* perceiued that they rebelled euery where, hee durst not stay any longer with so small a companie, but tooke the shortest way

view

20 towards the Kingdome of *Mesopotamia*, and signified thence to *Casan* all that had hapned in the Kingdome of *Syria*. Who seeing hee could not any way redresse it at that season, by reason of heate, yet when the Winter approached, hee made very great preparation on the bankes of the Riuer *Euphrates*, and sent ouer *Cotolusa* before with thirtie thousand *Tartarian* Horse-men, directing him that when hee came to the parts of *Antiochia*, hee should call vnto him the King of *Armenia*, and the other *Christians* of the East, and of *Cyprus*, and with that strength should enter into the Kingdome of *Syria*, whiles hee prepared to come after with the strength of his Armie. *Cotolusa* did as hee was commanded, and with his thirtie thousand *Tartars* went forwards till hee came to *Antioch*, and then sent to the King of *Armenia*, who came vnto him with his Armie. The *Christians* also in the Kingdome of *Cyprus* hauing

view

30 heard of the comming of *Cotolusa*, came speedily with their Gallies and other Vessels to the Ile called *Anterada*, among whom was the Lord *Tyron* brother to the King of *Cyprus*, Master of the Hospitall of the Temple, with their Brethren of their Societie. And these being all ready to vnder-goe the seruice of Christ, there came a rumour that *Casan* was dangerously sicke, that men dispayred of his recouerie. Whereupon *Cotolusa* with his *Tartars* returning towards *Casan*, the King of *Armenia* returned also into his Countrey; and the *Christians* at the Ile of *Anterada* to the Kingdome of *Cyprus*, by which meanes the businesse of the Holy Land was vicerly abandoned, which happened in the yeere of our Lord 1301.

Tyron.

Again, in the yeere of our Lord 1303, *Casan* assembling a mightie Armie, came with great preparation to the Riuer *Euphrates*, intending to enter into the Kingdome of *Syria*, and there

Casan reneweth the warre of Syria.

40 to destroy the whole Sect of *Mahomet*; and to restore the Holy Land to the *Christians*. But the *Saracens* fearing the comming of *Casan*, and doubting that they should not be able to withstand him when they had reaped and gathered their Corne and other fruits of the Earth, and had housed their cattell in strong holds, they set fire on the rest, that the *Tartars* when they came might not find victuals for themselves, nor for forrage for their beasts. When *Casan* vnderstood what the *Agarens* had done, and how they had waited all the Land, considering that his horses could not there be fed nor sustayned, he resolved to remayne that Winter vpon the bankes of the Riuer *Euphrates*, and to beginne his Journey at the beginning of the Spring, when the grasse began to sproute. For the *Tartars* are euery more carefull of their Horses then of themselves, being contented with the smallest pittance of any kind of nourishment for themselves.

The Saracens burne and waste their owne Countrey.

50 Then *Casan* sent for the King of *Armenia*, who came to him without delay, and lodged himselfe on the Riuer. *Casan* extended three dayes Journey in length euen from a certayne Castle called *Cacabe*, to another Castle called *Bir*, which Castles appertayned to the *Saracens*; yet yeelded without any assault vnto *Casan*. But while *Casan* abode there, expecting the conuenient season for effecting his desire on the *Saracens*, and to deliuer the Holy Land out of their hands, the Deuil cast a new Obstacle in his way, for he had newes againe that *Baydo* had entred, and made more spoyles on his Land then before; so that it was necessary for him to returne to his owne, whereat being much grieued, in respect that he was constrained so long to delay the businesse of the Holy Land, he commanded his Captayne *Cotolusa* with fortie thousand *Tartars* to enter into the Kingdome of *Syria*, and to take *Damasco*, and kill all the *Saracens*; and that the King of *Armenia* should ioine his people with *Cotolusa*. *Casan* then returned into *Persia*.

Cacabe. Bir.

Baydo rebelleth againe.

Cotolusa the third time Lieutenant of Syria.

60 *Cotolusa* and the King besieged the Citie *Aman*: and hauing certayne Intelligence that the *Soldan* was at the Citie *Gazara*, and would not stirre from thence, they tooke it by assault putting all the *Saracens* one with another to the sword. There they found great store of wealth and munition.

Aman taken.

*He aydeth him
with men and
money.*

Thence they went to the Citie of *Damascus* to besiege it, but the Citizens sent their Mes-
sengers, desiring a Truce for three dayes which was granted them. The Scouts of the *Tartars* be-
ing almost a dayes Journey beyond *Damascus*; tooke certayne *Saracens* whom they sent to *Co-
tuloffa* that he might examine them. *Cotuloffa* being aduertized by these that there were about
twelue thousand *Saracens* Horsemen; within two dayes Journey from thence, which expected
daily the comming of the *Soldan*. He rode presently with all speed, hoping to take them at vn-
awares: But it was almost night before *Cotuloffa* and the King of *Armenia* could reach thither,
and they had Intelligence that the *Soldan* was come newly before them. Therefore being decei-
ued of their expectation to assaile those twelue thousand alone, some aduised them for the best
to repose themselves that night being now somewhat late; and to set vpon the Enemy in the
morning. But *Cotuloffa* despising the *Soldan*, and his people would not hearken to any aduice,
but commanded his Armie to bee forthwith put in order: which the *Saracens* perceiuing, kept
their standing, being on the one side fenced with a Lake, and with a Mountayne on another side,
and knowing that the *Tartars* could not come to assault them without danger, they would not
goe forth to fight, but remayned in the place where they were, and when the *Tartars* thought
without any impediment to haue assailed their Enemies; they found a small Riuer betwene
them, which in some places had no passage ouer: by meanes whereof much time was spent be-
fore they could passe ouer the Riuer; but after they had passed the greatest part over the Riuer,
they set manfully on their Enemies. Yet the *Soldan* stood still and would not remoue from the
place he was in; betwixt the Lake and the Mountayne; which *Cotuloffa* perceiuing because the
darke night approached he withdrew his company for that night and lodged them neere the
Mountayne, only about a thousand *Tartars*, which could not passe the Riuer, were not with him
that night. The day comming, the *Tartars* againe couragiously set vpon the *Soldan*; but as before,
he would by no meanes come forth to fight, but defended himselfe in that place of aduantage.
So the *Tartars* continuing their assault from the morning vntill the ninth houre, being thirstie
and ouer-wearie for lacke of water they retired themselves in good order, leauing the *Soldan*
and came to the Plaine of *Damascus*, where they had plentie of pasture and water at will,
where they determined to abide vntill they had sufficiently reposited themselves and their
Horses.

But the Inhabitants knowing, that the Armie of the *Tartars* was spread abroad in that
Plaine, opened the Sluces of the Riuer in the night-time, whereby the waters rose so high in
eight houres ouer all the Plaine, that the *Tartars* were constrained on the sudden to arise and de-
part, so that the night being darke, and the Ditches all-filled with water, and no wayes nor
pathes to be seene, they were all amazed in such sort that many Horses perished, and much Ar-
mour was lost, insomuch, that the King of *Armenia* endured much losse, yet the day comming
through the goodnesse of God, they escaped the waters, but the Bowes and Arrowes of the
Tartars being their chiefe weapons which they vse, and the rest of their Armour being all wet
and vtterly vnersuiceable, they were so astonied therewith, that if their Enemies had then pur-
sued them, they might haue bene taken or slaine. Afterwards, the *Tartars* by reason that ma-
ny had lost their Horses, returned softly by small Iournies to the bankes of the Riuer *Euphrates*,
yet none of their Enemies durst follow or pursue them, but the Riuer being risen and swolne
through the abundance of raine that fell, many of the *Armenians*, as also of *Georgians*, perished
therein, more then of the *Tartars*, whose Horses knew better to swimme: so returned they in-
to *Persia* ruined and disgraced, not by the power of the Enemy, but by accident partly, partly
by euill aduice. A great cause whereof was the obstinacie of *Cotuloffa*, who would not regard any
aduice that was given, for if he would haue harkened to the counsell of the wise, he might easily
haue preuented those dangers.

And I *Frier Haytho* the Compiler of this Historie, was present at all these proceedings: and
if happily I create more largely thereof then shall be thought conuenient. I craue pardon in re-
gard that I doe it to this end, that on like occasions happening these courses may bee called to
minde. For these actions that are ordered by counsell, haue commonly good and commenda-
ble euents, but the rash and improuident Enterprizes, doe vsually faile of their wished successe.
After that the King of *Armenia* had passed the Riuer *Euphrates* with some losse, he resolved to
goe to *Casan* before he returned to his Kingdome of *Armenia*; and therefore hee went streight to
the Citie of *Ninie* in which *Casan* then resided. He entertayned the King with much honour,
kindnesse, and magnificence, and being compassionate of his losses to make him some recompence
of especiall fauour vnto him, he granted him a thousand *Tartarians*, continually in pay at his
charge for the defence of his Kingdome, and also granted him out of the Kingdome of *Turkie*, a
yeerely pension, for the maintenance of another thousand *Armenian* Horsemen yeerely at his
pleasure, the King thus recompenced, hauing taken his leaue, returned to the Kingdome of *Ar-
menia*, which *Casan* had enioyned him to watch warily ouer, vntill God pleased to enable him
personally to goe to the reliefe of the Holy Land.

¶ V.

CASAN dyeth, CARBANDA succeedeth; his Apostasie. The Authors
entrance into a Religious Habit. Of TAMOR Can the sixth Empe-
rour, and of CHAPAR, HOCHTAI, and CAR-
BANDA, three other Tartarian
Kings.

10 **H**He King of Armenia returned safely to his Kingdome, but after hee came thither hee found little rest there, for after it so pleased God, that Casan was surprized with a grievous infirmitie, and hauing gouerned wisely in his life, hee was no lesse willing that his wisdom should be commended in his death. Therefore hee made his last Will and Testament, appointing his Brother Carbanda (or Carbaganda) his Heire and Successor and hauing ordered all things concerning the Affaires of his Kingdome and his House in prudent manner, he made many good Ordinances and Lawes which for a memoriall he left behind him, being at this day inuolably obserued by the Tartarians. Then dyed Casan, and his Brother Carbanda succeeded in his Kingdome.

Carbanda his Successor.

20 This Carbanda was the Sonne of a Ladie of famous memorie, called Eroccaton, who was very deuout and religious in Christianitie, while she liued, and had euery day Diuine Seruice celebrated before her, keeping a Priest and Chappell of her owne, so that this Carbanda was baptized and named Nicholas in his Baptisme, and continued a professed Christian as long as his Mother liued. But after his Mothers death, delighting in the societie of Saracens, he forsooke the Christian Religion to become a Mahometist. The King of Armenia vnderstanding of the death of Casan, was much troubled therewith, and his Enemies began to lift vp their Crests very high. For the Soldan of Babylon thereupon sought by all meanes to endamage him and his people, sending all the yeare almost euery moneth great troupes of armed Souldiers, which foraged and wasted the Kingdome of Armenia, and did more damage and spoyle on the plaine Countrey

30 then they had euer sustayned before in any mans memorie. But the Almighty and most mercifull God who neuer forsaketh altogether those that put their trust in him, had compassion on the poore afflicted Christians: for it fell out that in the moneth of Iuly, seuen thousand Saracens of the best Families vnder the Soldan, made a roade into the Kingdome of Armenia, wasting and spoiling all as farre as the Citie of Tharsus, in which the blessed Apostle Saint Paul was borne, and when they had committed many spoyles in that Prouince, and were vpon their retorne, the King of Armenia, hauing gathered his people together, encountred and set vpon them neere the Citie of Giazza, where more by Gods goodnesse then our worth, they were vtterly overthrowne in such sort, that of seuen thousand Saracens there escaped not three hundred, but were either taken or slaine, albeit they thought in their Pride, they could haue ouer-runne the

The Soldan maketh roades into Armenia.

40 whole Kingdome of Armenia, and deuoure all the Christians there at a morsell. This was performed on the Lords Day, being the eighteenth of Iuly, after which conflict, the Saracens durst no more enter into the Kingdome of Armenia. But the Soldan sent to the King of Armenia to make truce with him, which was agreed betweene them.

The King of Armenia ouerthroweth his Enemies.

The Victorie brings peace.

46. I Frier Haythou, hauing beene present at all the said proceedings, had purposed long before to haue taken a Regular Habit vpon me, and to haue entred into Religion. But by reason of many impediments and difficulties in the Affaires of the Kingdome of Armenia, I could not with my honour forsake my friends and kindred in such extremities. But seeing that Gods goodnesse had beene so gracious vnto me, as to leaue the Kingdome of Armenia, and the Christian people there after my manifold labours and trauels in quiet, and peaceable estate, I then tooke the time to performe that Vow which before I had vowed. Therefore hauing taken my leave of my Lord the King, and of the rest of my kindred and friends, euen in that field where God gaue the Christians Victorie over their Enemies, I beganne my Iourney, and comming to Cyprus in the Monasterie of Episcopia, tooke a Regular Habit of the Order Premonstratensis, to the end that hauing serued the World as a Souldier in my youth, I might spend the rest of my life in the Service of God, forsaking the pompe of this World, which was in the yeere of our Lord 1305. Therefore I render thanks vnto God, that the Kingdome of Armenia, is at this day in a good and peaceable estate, and well reformed by the Moderne King Liouono, Sonne to King Haythou, who is a Looking-glasse or patterne to all other Kings in all kinde of eminent vertue.

The Author of himselfe.

He taketh the Habit of a Premonstratensis. An. Dom. 1305.

60 Moreouer, the Compiler of this Worke affirmeth, that he hath come three manner of wayes to the knowledge of those things which hee declareth and writeth in this Booke. For from the beginning of Changins Can, who was the first Emperour of the Tartars vntill Mango Can, who was their fourth Emperour, I faithfully deliuer what I gathered out of the Histories of the Tartarians. But from Mango Can to the deh of Haloon, I write, that which I receiued of an

The credit of this Historie.

Vncle of mine, who writ the same by the commandement of *Haiton* King of *Armenia*, and was present then at all the foresaid occurrences, and with great diligence did often discourse & make rehearfall of them to his Sonnes and Nephewes, that they might remayne the better to Posteritie, and from the beginning of *Abaga Can* to the end of this third part of this Booke, the Author relateth those things which hee knew of himselfe, as hauing bene present at them all, whereby he is enabled to giue testimonie of the truth. Now albeit we haue hitherto treated of the Histories and Deeds of the *Tartarians*, there remaineth yet somewhat to be said concerning their Power and Dominion, especially of those that are now liuing, that it may the better bee knowne.

Tamor Can.

47. The great Emperour of the *Tartars* which now holdeth the Empire, is called *Tamor Can*, 10
being their sixt Emperour, who keepeth his Residence in the Kingdome of *Cathay*, in a very
great City called *Long*, which his Father caused to be built, as is aboue declared, his power is ve-
ry great. For this Emperour alone is able to doe more then all the *Tartarian* Princes together, and
the Nations vnder his gouernment are reputed more noble and rich, and better stored of all ne-
cessaries, because that in the Kingdome of *Cathay*, in which they now liue, there is great abun-
dance of riches.

Besides this great Emperour, there are three other great Kings or Princes of the *Tartars*,
which rule each of them ouer many Nations, yet are they all subiect to the Emperour, and ac-
knowledge him their naturall and Leige Lord. And the differences which happen betweene
them are decided in the Emperours Court, and determined by his Iudgement. The first of these 20
Kings is called *Chapar*, another *Hochtay*, and the third *Carbanda*. This *Chapar* hath his Domi-
nion in the Kingdome of *Turquestan*, being the neereft to the Emperour. It is thought that he is
able to bring into the field foure hundred thousand Horsemen, and these are bold and good War-
riours, but not so well furnished of Horse and Armour as were expedient. The Emperours sub-
iects doe many times make warre vpon them, and they on the other side doe often inuade the
people of *Carbanda*. The Dominion of this *Chapar* was in ancient time subiect for the greatest
part to a Lord called *Doay*.

Hochtay keepeth his Seat of Residence in the Kingdome of *Cumania*, in a Citie called *Asaro*,
(or *Sara*) and it is said, that he is able to bring six hundred thousand Horsemen to the fight, yet
are they not so much commended in Feats of Armes, as the men of *Chapar*, albeit they haue bet- 30
ter Horses. These make warre sometimes on the Subiects of *Carbanda*, sometimes against the
Hungarians, and sometimes amongst themselves. But *Hochtay* who ruleth at this present hol-
deth his Dominion peaceably and quietly.

Carbanda hath his Dominion in the Kingdome of *Asia* the Great, and maketh his chiefe a-
bode in the Citie of *Tauris*, being able to bring three hundred thousand Horsemen to the field.
But these are gathered out of diuers parts being rich and well furnished with necessities. *Cha-*
par and *Hochtay* doe sometimes make warre vpon *Carbanda*, but hee neuer medleth first with
them: neither moueth warres against any but that he sometimes inuadeth the *Soldan* of *Egypt*:
against whom his Predecessors haue fought many Battailles. *Chapar* and *Hochtay* would willing-
ly take from *Carbanda* his Dominion, if they were able to effect it.

The reason whereof is this, *Asia* is diuided into two parts, the one part whereof being called 40
the *Lower or Deepe Asia*, is inhabited by the Emperour, and those two Kings called *Chapar*
and *Hochtay*. The other part being the higher, is called *Asia the Greater*, in which *Carbanda* inha-
biteth and hath Dominion. Now there are only three wayes by which men may passe out of the
Deeper or Lower Asia, vnto the high Countrey called *Asia Maior*. The one is out of the King-
dome of *Turquestan*, to the Kingdome of the *Persians*; another way there is called *Derbent*,
which lyeth neere the Sea where *Alexander* built the Citie called the *Iron Gate*, as in the Histo-
ries of *Cumania* appeares; the other way is to goe ouer the Sea, called *Mare mainus*, which way
lyeth through the Kingdome of *Barca*. By the first way the subiects of *Chapar* cannot passe to
the Territories of *Carbanda*, without great danger and difficultie, because they should find no
feeding for their Horses in many dayes trauailes, the Land being so dry and barren, that before 50
they could come to any fruitfull inhabited Countrey, their Horses would be starued, or at least
so faint and wearied that they might be easily overcome, and therefore that way they will not
take. By the way of *Derbent* the people of *Hochtay* may passe into the Countrey of *Carbanda*,
only fixe moneths in the yeare, which is in the Winter time. But that way *Abaga* hath caused
great Trenches and Fortifications to bee made in a place called *Ciba*: and is alwayes kept and
especially in the Winter with a Garrison of armed men to defend the passage. The people of
Hochtay haue assayed many times to passe that way by stealth and secretly: but they neuer
could, neither can by any meanes doe: for in a Plaine called *Monga*, there are alwayes in the
Winter time certaine Birds about the bignesse of Pheasants hauing very faire feathers to behold, 60
and these Birds (which are called *Seyferach*) when any people come into that Plaine, straight
flye away ouer those Watchmen and their Trenches, whereby the Souldiers there are eft-soones
assured of the comming of their Enemies, and preuent the surprize: and by the way of the Sea
called *Mare mainus*, they neuer attempted because that way goeth through the Kingdome of
Barca

Barca, which is so mightie in people and so strongly situated, that they are without hope to preuaile there, and by meanes hereof hath *Carbanda* and his Predecessors beene secured from the power of so potent Neighbours. Now we will briefly say somewhat of the manners and fashions of the *Tartars*.

Barca in the Latine Copie is called *Abcas*.

48. The *Cataians* do so much differ from other Nations in their fashions and manner of living, that it were tedious to treat of the manifold diueritie and strange varietie found amongst them. They acknowledge and confesse one Immortall God, and they call vpon his Name: yet they neither fast nor pray, nor any wayes afflict nor humble themselves, for feare or reuerence of him, nor doe any good workes. The killing of men they hold to bee no sinne: but if they happen to leave their Bridle in their horse-mouth when hee should feed, they thinke therein they offend God mortally. Fornication and Letherie is held by them as no sinne. They marrie many wiues, and the custome is, that the Sonne must marrie his Step-mother after the death of his Father: and the Brother is married to his Brothers Wife after his decease. In matter of Armes they are very good, and more obedient to their Superiour then other Nations are: and doe easily know by certaine signes in Battaille the will of their Commander: whereby the Armie of *Tartarians* is easily ruled and commanded. Their Lord bestoweth not any stipend on them, but they liue on hunting and such prey as they can get: and their Lord may take from them when hee list whatsoever they haue.

The Religion of the *Cataians*, or *Tartarians* of those parts, Impunitie of Manslaughter.

Polygamic.

Warfare.

When the *Tartars* ride vpon any enterprize, they take with them great store of Horse, drinking their Milke, and feeding on their flesh which they reckon very good food. The *Tartars* are very readie and excellent Archers on horse-backe, but on foot they are but slow, they are dexterous and ingenious in taking of Cities and Castles, and are for the most part victorious over their Enemies; yet will they not forbear to turne their backs in the skirmish if it be for their aduantage. And this aduantage they haue in the field that they will fight with the Enemies when they list themselves, and yet they cannot be compelled to fight but at their pleasure. Their manner of fight is very dangerous, so that in one conflict or skirmish of the *Tartars* there are more slaine and wounded then in any great Battaille of other Nations, which hapneth by reason of their Arrowes, which they shoot strongly, and surely out of their Bowes; being indeed so skilfull in the arte of shooting, that they commonly pierce all kind of Armour, and if they happen to be routed, yet they flye in troupes and bands so well ordered, that it is very dangerous to follow or pursue them, because they shoot their Arrowes backwards in their flight, wounding and killing oft-times both men and horses that pursue them.

Eating of Horse-flesh.

Their Hospitality.

Delight in lying.

The Armie of the *Tartars* maketh no great shew, because they goe trooping close together, so that an Armie of one thousand *Tartars* will scarce seeme five hundred. The *Tartarians* doe courteously entertayne strangers, giuing them part of their Viands, and expect the like offers to bee made them, for otherwise they will take it by violence. They are much more skilfull in conquering of Countries then in keeping of them. When they are weake they are humble and gentle; stout and proud when they are growne the stronger. They cannot endure lying in other men, yet themselves are much giuen to lying, vnlesse it be in two especiall things. The one being in matter of Armes, in which none dareth affirme, that he did any exploit which was not done by him, or denie any faire Act which hee hath committed: The other is, That whosoever hath done any offence, though it deserueth death, he confesseth it presently to his Lord if he be examined thereon. This may suffice at this time, concerning the manners of the *Tartars*, because it were long to rehearse all the different customes and kinds of behauiour.

The other Chapters which follow, pertayning rather to aduice fitting those Times, and the holy Land affaires, then the *Tartarian* Historie, I haue omitted. And in the next place will present some Extracts of our Countreiman, that famous Traueller Sir Iohn Mandevile, whose Geographie Ortelius commendeth, howsoeuer he acknowledgeth his Worke stuffed with Fables. For my part, I cannot but deplore the losse of such a Treasure, but know not how to recover or repaire it (as Ramusio hath done for Polo) and here haue beene forced to deale with him, as Historians doe with our famous Arthur, daring to say little, because others haue dared so much and such incredibilities. For his merit, and for his Nation I haue giuen a touch of him, these few Latine Extracts; referring him that hath a minde to reade him, to Master Hakluits first Edition of his Voyages, where his storie in Latine is to be seene at large. I suspect that some later Fabler out of the Tales of Ogerus the Dane hath stuffed this storie; some of which, for a taste, I haue here left remayning; not that I take pleasure in lyes, but that thou maist see, from what Fountayne I suppose this corruption flowed: and in that mistie Age (when humaner learning was inhumanely imprisoned, and Diuine Scripture was vulgarly buried, and Printing not at all borne) what Huskes poore Christian Prodigals (prodigall to beleene such lyes) were fed with in stead of Bread; not onely in the Church by Legends, but in their priuate studies, by Archurs, Orlandos, Benifes, Guyes, Robin Hoods, Palmerins, and I know not what monstrous changeling-births of Historie. Such was this Ogerus: and in great part such was Odericus a Friar and Traueller, in whom perhaps some Friar hath trauelled, with him at least in this Author (whose age was before him, and therefore could not cite ought out of him.) Neither is it for nothing (though for worse then nothing, a lye is both) that Friars are in this storie so often mentioned and praised: I smell a Friars (Lyars) hand in this businesse. Our Man.

Ogerus a Dane, of whom they write that hee conquered India, &c.

Odericus in M. Hak. publish. d.

Mandevile travelled from Ierusalem beyond Ierico, from Christendome to remotest Ethnikes, and hath fallen among Theeves: The Friarly Priest and Leuite not onely neglected him, but I am afraid played the Theeves thus to rob and wound him; wayming the two former parts, and juggling in the third, which I have therefore chopped off; not daring in the former but with the Nilus Dogge to taste and away, for feare of a false Crocodile. Here you may finde lyes by retaile efficta, afficta, affixa, to this Mandevile; who there, is made a maunde vile full of such pealerie, unworthy thy sight.

CHAP. VI.

Briefe Collections of the Trauels and Observations of Sir Iohn Mandevile; written by Master BALE, Cent. 6.

Mandevile, Knight, borne in the Towne of Saint Albons, was so well giuen to the studie of Learning from his childhood, that he seemed to plant a good part of his felicitie in the same: for he supposed that the honour of his birth would nothing auaille him, except hee could render the same more honorable by his knowledge in good Letters. Hauing therefore well grounded himselfe in Religion by reading the Scriptures, he applied his studies to the Art of Physick, a Profession worthy a noble wit: but amongst other things, hee was rauished with a mightie desire to see the greater parts of the World, as Asia and Africa. Hauing therefore provided all things necessarie for his iourney, hee departed from his Countrey in the yeere of Christ 1332. and as another Ulysses returned home, after the space of foure and thirtie yeeres, and was then knowne to a very few. In the time of his trauaile he was in Scythia, the greater and lesse Armenia, Egypt, both Lybias, Arabia, Syria, Media, Mesopotamia, Persia, Chaldaea, Greece, Illyrium, Tartarie, and diuers other Kingdomes of the World: and hauing gotten by this meanes the knowledge of the Languages, left so many and great varieties, and things miraculous, whereof himselfe had beene an eye witnesse, should perish in obliuion, hee committed his whole Trauell of three and thirtie yeeres to writing in three diuers Tongues, English, French, and Latine. Being arriued againe in England, and hauing seene the wickednesse of that Age, hee gaue out this speech: In our time (said hee) it may bee spoken more truly then of old, that Vertue is gone, the Church is vnder foot, the Clergie is in error, the Deuill raigneth, and Simonie beareth the sway, &c. Hee dyed at Leege, in the yeere 1372. the 17. day of Nouember, being there buried in the Abbey of the Order of the Guilielmites.

The Tombe and Epitaph of Sir Iohn Mandevile, in the Citie of Leege, spoken of by Ortelius, in his Booke called Itinerarium Belgia, in this sort.

Magna & populosa Leodij suburbia, ad collum radices, in quorum iugis multa sunt, & pulcherrima Monasteria, inter qua magnificum illud, ac nobile D. Laurentio dicarum, ab Raginardo Episcopo. Est in hac quoque Regione, vel suburbijs Leodij, Guilielmitarum Canobium, in quo Epitaphium hoc Ioannis à Mandeville, excepiimus.

Epitaphium.

Hic jacet vir nobilis, D. Ioannes de Mandeville, aliter dictus ad Barbam, Miles, Dominus de Campdi, natus de Anglia, Medicinæ Professor, deuotissimus, orator, & bonorum largissimus pauperibus erogator, qui toto quasi orbe lustrato, Leodij diem vitæ suæ clausit extremum. Anno Dom. 1371. Mensis Nouembris, die 17.

Hec in lapide: in quo calata viri armati imago, Leonem calcantis, barba bifurcata, ad caput manus benedicens, & vernacula hæc verba: Vos qui paleis for mi, pour l'amour deix proies por mi. Clipens erat vacuum, in quo olim fuisse dicebant laminam aream, & eius in ea itidem calata insignia, Leonem videlicet argenteum, cui ad pectus lunula rubra in campo caruleo, quem Limbus ambiret denticulatus ex auro. Eius nobis ostendebant, & cultros, ephipiag, & calcaria quibus usum fuisse asserabant, in peragrande toto fere terrarum orbe, ut clarius testatur eius Itinerarium, quod typis etiam excusum passim habetur.

Epistola.

Principi Excellentissimo, præ cunctis mortalibus præcipue venerando, Domino Edwardo ejus nominis Tertio, diuina prouidentia, Francorum & Anglorum Regi Serenissimo, Hi-bernæ Domino, Aquitanie Duci, mari ac eius Insulis Occidentalibus dominanti, Christianorum encomio & ornatui, vniuersorumque arma gerentium Tutori, ac Probitatis & strenuitatis exemplo Principi quoque inuicti, mirabilis Alexandri Sequaci, ac vniuerso Orbi tremendo, cum reuerentia non qua decet, cum ad talem, & tantam reuerentiam minus sufficientes extiterint, sed qua paruitas, & possibilitas mittentis ac offerentis se extendunt, contenta tradantur.

Cum

Cum terra Hierosolymitana, terra promissionis filiorum Dei, dignior cunctis mundi terris sit habenda multis ex causis, & præcipue illa, quod Deus conditor cæli & mundi, ipsam tanti dignatus fuit estimare, ut in eo proprium filium Salvatorem mundi Christum exhiberet generi humano per incarnationem ex intemerata Virgine, & per eius conversationem humillimam in eadem, ac per dolorosam mortis sue consummationem ibidem, atq; inde per eius admirandam Resurrectionem, ac Ascensionem in cælum, & postremo quia creditur illic in fine sæculi reuersurus, & omnia iudicaturus: certum est, quod ab omnibus qui Christiano nomine à Christo dicuntur, sit tanquam à suis proprijs heredibus diligenda, & pro cuiusq; potestate ac modulo honoranda. Verum quia iam nostris temporibus verius quam olim dici potest, Virtus, Ecclesia, Clerus, Dæmon, Simonia, Cessat, calcatur, errat, regnat, dominatur, ecce iusto Dei iudicio, credita est terra tam inchoata, & Sacrosancta impiorum manibus Saracenorum, quod non est absq; dolore pjs mentibus audiendum, & recolendum. Ego Ioannes Mandeuil militaris ordinis saltem gerens nomen, natus & educatus in terra Angliæ, in Villa Sancti Albani, ducebar in Adolescentiam tali inspiratione, ut quamuis non per potentiam, nec per vires proprias possem præfatam terram suis heredibus recuperare, irem tamen per aliquod temporis spacium peregrinari ibidem, & salutarem aliquantulum de propinquo. Unde in Anno ab Incarnatione Domini 1322. imposui me navigationi Martiliensis maris & usq; in hoc temporis, Anni 1355. scilicet, per 33. annos in transmarinis partibus mansi, peregrinatus sum, ambulavi, & circuiui multas, ac diversas Patrias, Regiones, Prouincias, & Insulas, Turciam, Armeniam maiorem & minorem, Ægyptum, Lybiam bassam & altam, Syriam, Arabiam, Persiam, Chaldeam, Æthiopix partem magnam, Tartariam, Amazoniam, Indiam maiorem, & mediam, ac partem magnam de maiori, & in istis, & circum istas Regiones, multas Insulas, Cuitates, Kybes, Castra, Villas, & loca, ubi habitant variæ gentes, aspectuum, morum, legum acritum diuersorum: Attamen quia summo desiderio in terra promissionis eram, ipsam diligentius, per loca vestigiorum filij Dei perlustrare curavi, & diutius in illa steti. Quapropter & in hac prima parte huius operis iter tam peregrinandi, quam nauigandi, à partibus Angliæ ad ipsam describo, & loca notabiliter sancta, quæ intra eandem sunt breuiter commemoro & diligenter, quatenus peregrinis tam in itinere quam in præuentione valeat hæc descriptio in aliquo deservire.

Qui de Hibernia, Anglia, Scotia, Noruegia, aut Gallia iter arripit ad partes Hierosolymitanas potest saltem usq; ad Imperialem Greciæ Cuitatem Constantinopolim eligere sibi modum proficiscendi, sine per Terras, siue per Aquas. Et si peregrinando eligit transigere viam, tendat per Coloniam Agrippinam, & sic per Almanniam in Hungariam ad Montisfauent Cuitatem, sedem Regni Hungariæ. Et est Rex Hungariæ multum potens istis temporibus. Nam tenet & Sclauoniam, & magnam partem Regni Comannorum, & Hungariam, & partem Regni Russiæ. Oportet ut peregrinus in finibus Hungariæ transeat magnam Danubij flumen, & vadat in Belgradum; Hoc flumen oritur inter Montana Almanniæ, & currens versus Orientem, recipit in se 40. flumina antequam finiatur in mare. De Belgrade intratur terra Bulgarix, & transiit per Pontem petrinum fluij Marroy, & per terram Pyncenars, & tunc intratur Græcia, in Cuitates Sternes, Asmopape, & Andrinopolis, & sic in Constantinopolim, ubi communiter est sedes Imperatoris Greciæ. Qui autem viam eligit per aquas versus Constantinopolim nauigare, accipit sibi portum, prout voluerit, propinquum siue remotum, Marthiæ, Pisi, Ianuæ, Venetijs, Romæ, Neapoli, vel alibi: sicq; transeat Tulciam, Campaniam, Italiam, Corsicam, Sardiniam, usque in Siciliam, quæ diuiditur ab Italia per brachium maris non magnum. In Sicilia est Mons Ætna ingiter ardens, qui ibidem appellatur Mons Gibelle, & præter illum habentur ibi loca Golthan ubi sunt septem leuæ quasi semper ignem spirantes: secundum diuersitatem colorum harum flammarum estimant Incola annum fertilem fore, vel sterilem, siccum vel humidum, calidum, vel frigidum: hæc loca vocant caminos Infernales, & à finibus Italiæ usq; ad ista loca sunt 25. miliaria. Sunt autem in Sicilia aliqua Pomeria in quibus inueniuntur frondes, flores, & fructus per totum annum, etiam in profunda hyeme. Regnum Siciliæ est bona, & grandis Insula habens in circuiu fere leucas 300. Et ne quis erret, vel de facili reprehendat quoties scribo leucam, intelligendum est de leuca Lombardica, quæ aliquanto maior est Geometrica; & quoties pono numerum, sub intelligatur fere, vel circiter, siue citra, & dictam intendo ponere, de 10. Lombardicis leucis: Geometrica autem leuca describitur, ut notum est, per hos versus.

Quinque pedes passum faciunt, passus quoque centum
Viginti quinque stadium, si millia des que
Octo facis stadia, duplicatum dat tibi leuca.

Constantinopolis pulchra est Cuitas, & nobilis, triangularis in forma, firmiterq; murata, cuius due partes includuntur mari Hellesponto, quod plurimi modo appellant brachium Sancti Georgij, & alij Buke, Troia vetus. Versus locum ubi hoc brachium exit de mari est lata terra planities, in qua antiquitus stetit Troia Cuitas de qua apud Poetas mira leguntur, sed nunc valde modica apparent vestigia Cuitatis. In Constantinopoli habentur multa mirabilia, ac insuper multa Sanctorum veneranda reliquia, ac super omnia, preciosissima Crux Christi, seu maior pars illius, & tunica inconsutilis, cum spongia & arundine, & vno clauorum, & dimidia parte Corona spineæ, cuius altera medietas seruatur in Capella Regis Franciæ, Parisijs. Nam & ego indignus diligenter pluribus vicibus respexi partem vtramq;: dabatur quoq; mihi de illa Parisijs unica spina, quam usq; nunc preciose conseruo, & est ipsa spina non ligneæ sed velut de iuncis marinis rigida, & pungitua. Ecclesia Constantinopolitana in honorem Sanctæ Sophiæ, id est, ineffabilis Dei sapientiæ dedicata dicitur, & nobilissima vniuersarum mundi

mundi Ecclesiarum, tam in schemate artificiosi operis, quam in servatis ibi Sacrosanctis Reliquijs: nam & continet corpus Sanctæ Annæ Matris nostræ Domine translatum illic per Reginam Helenam ab Hierosolymis: & corpus Sanctæ Lucæ Evangelistæ translatum de Bethania Iudeæ; Et corpus Beati Ioannis Chrysostomi ipsius Civitatis Episcopi, cum multis alijs Reliquijs preciosis; quoniam est ibi vas grande cum huiusmodi reliquijs velut marmoreum de Petra Enhydros; quod iugiter de seipso desudans aquam, semel in anno inuenitur suo sudore repletum. Ante hanc Ecclesiam, super columnam marmoream habetur de ære aurato opere fusorio, magna Imago Iustiniani quondam Imperatoris super Equum sedentis. De prædicta terra Thraciæ fuit Philosophus Aristoteles oriundus in Civitate Stage- res, & est ibi in loco tumbæ eius velut altare, ubi & singulis annis certo die celebratur à populo festum illius, ac si fuisset Sanctus. Temporibus ergo magnorum consiliorum conveniunt illic sapientes terra, reputantes sibi per inspirationem immitti consilium optimum de agendis. Item ad divisionem Thraciæ & Macedoniæ sunt duo mirabiliter alti Montes, unus Olympus, alter Athos, cuius ultimi umbra O- riente sole apparet ad 76. miliaria, usq; in Insulam Lemnon. In horum cacumine montium ventus non currit, nec aer movetur, &c.

Prædictum est de reuerentia Soldani, quando ad ipsum intratur exhibenda. Sciendum ergo, cum ab eo petitur securus conductus, nemini denegare consuevit, sed datur petentibus communiter sigillum eius, in appenditione absque literis: hoc sigillum, pro vexillo in virga aut hasta dum peregrini ferunt, omnes Saraceni videntes illud flexis genibus in terram se reuenter inclinant, & portantibus omnem exhibent humanitatem. Verumtamen satis maior sit reuerentia literis Soldani sigillatis, quod & Admi- rabiles, & quicunq; alij Domini, quando eis monstrantur, antequam recipiant, se multum inclinant: Deinde ambabus manibus eas capientes ponunt super propria capita, postea osculantur, & tandem legunt inclinati cum magna veneratione, quibus semel aut bis perlectis, offerunt se promptos ad explendum quicquid ibi iubetur, ac insuper exhibent deferenti, quicquid possint commodi, vel honoris: sed talem conductum per literas Soldani vix quisquam peregrinorum accipit, qui non in Curia illius stetit, vel noti- tiam apud illum habuerit. Ego autem habui in recessu nico, in quibus etiam continebatur ad om- nes sibi subiectos speciale mandatum, vt me permitterent intrare, & respicere singula loca, pro meæ placito voluntatis, & mihi exponerent quorumcunq; locorum mysteria distincte & absque vilo velamine veritatis, ac me cum omni sodalitate mea benigne reciperent, & in cunctis rationa- libus audirent, requisiti autem si necesse foret de ciuitate conducerent in ciuitatem. Habito itaq; peregrinis conductu, ad Montem Sinay, &c.

Mont Sinay appellatur ibi desertum Syn: quasi in radice Montis istius habetur Cænobium Mo- nachorum pergrande, cuius clausura in circuitu est firmata muris altis, & portis ferreis, pro metu be- stiarum deserti. Hi Monachi sunt Arabes, & Græci, & in magno euentu, multum Deo deuoti. O- stendere solent & caput ipsius Catherine cum inuolumento sanguinolento, & multas perterea sanctas, & venerabiles reliquias, quæ omnia intuius sum diligenter & sæpe, oculis indignis, &c.

Ierusalem cum tota terra Promissionis, est quasi vna de quinq; Prouincijs vel pluribus, quibus Reg- num Syriæ distinguitur. Iungitur autem Iudæa ad Orientem Regno Arabiæ, ad meridiem Egypto, ad Occidentem mari magno, & ad Aquilonem Regno Syriæ. Iudæa terra per diuersa tempora à diuer- sis possessa fuit Nationibus, Cananæorum, Iudæorum, Assyriorum, Periarum, Medorum, Macedo- num, Græcorum, Romanorum, Christianorum, Saracenorum, Barbarorum, Turcorum, & Tar- tarorum. Cuius rei causa merito potest estimari, quod non sustinuit Deus magnos peccatores longo tempore permanere in terra sibi tam placita, & tam sancta.

Itaque peregrinus veniens in Ierusalem primo expleat suam peregrinationem, ad reuerendum & Sa- cro sanctum Domini nostri Iesu Christi Sepulchrum: cuius Ecclesia est in ultima ciuitatis extremitate, ad partem Aquilonarem, cum proprio sui ambitus muro ipsi ciuitati adiuncto. Ipsa vero Ecclesia est pul- chra & rotunde forma cooperta de super cum tegulis plumbeis, habens in Occidente turrem altam & fir- mam, in pauimenti Ecclesia medio ad figuram dimidij compassi habetur nobili opere Latonico adificatum paruum Tabernaculum quasi 15. pedum tam longitudinis quam latitudinis, & altitudinis miro artifi- cio intus extraq; compositum, ac multum diligenter diuersis coloribus ornatum. Hoc itaq; in Taberna- culo seu Capella, ad latus dextrum, continetur incomparabilis thesaurus gloriosissimi Sepulchri, habentis octo pedes longitudinis, & quinque latitudinis. Et quoniam in toto habitaculo nulla est apertura præ- ter paruum ostium, illustratur accedentibus peregrinis pluribus lampadibus, (quarum ad minus vna co- ram sepulchro iugiter ardere solet) ingressus.

Sciendum, quod ante breue tempus solebat sepulchrum esse ingressis peregrinis accessibile, ad tangen- dum & osculandum: sed quia multi vel effringeant, vel conabantur sibi effringere aliquid de petra se- pulchri, iste Soldanus Melech Mandybron fecit illud confabricari, vt nec osculari valeat, nec adiri, sed tantummodo intueri. Et ob illam causam in sinistro pariete in altitudine quinque pedum immurari effracturam petreæ sepulchri ad quantitatem capitis humani, quod tanquam pro sepulchro ibi ab omni- bus veneratur, tangitur, & osculatur.

Dicitur ibi quoq; communiter præfatam lampadem coram sepulchro singulis annis in die Sancta Pa- rascheues, hora nona extinguí, & in media nocte Pascha sine humano studio reaccendi. Quod (si ita est) euidentis diuini beneficii miraculum est. Et quamuis id plurimi Christiani simpliciter in magno pietatis merito credant, plerisq; tamen est in suspitione. Fortè talia Saraceni custodes sepulchri fingent- tes divulgauerunt, pro augendo emolumenta tribui, quod inde resuscitaret, seu oblationum. Singulis

Singulis autem annis in die Coena Domini in Parascheve, & in vigilia Pasche, tribus his diebus manet Tabernaculum hoc apertum continue, & patet omnibus Christianis gentibus accessus, alias vero non per annum sine redditione tributis. Intra Ecclesiam, prope parietem dextrum, est Calvarie locus, ubi crucifixus pependit Christus Dominus. Per gradus ascenditur in hunc locum, & est rupis velut albi coloris, cum aliqua rubedine per loca commixta, habens scissuram, quam dicunt Golgotha, in qua maior pars preciosi sanguinis Christi dicitur influxisse: ubi & habetur Altare constructum, ante quod consistunt tumbe Godefridi de Bullion, &c.

Tumba Godefridi de Bullion.

10 Ultra duo stadia ab Ecclesia ad Meridiem sancti Sepulchri habetur magnum hospitale sancti Ioannis Hierosolymitani, qui caput & fundamentum esse dignoscitur ordinis Hospitaliorum modo tenentium Rhodum Insulam: in quo recipi possunt omnes Christiani peregrini cuiuscunque sint conditionis, seu status, vel dignitatis. Nam Saraceni pro levi cura anxii rumoris, prohibent ne apud quenquam suorum Christianum pernoctet. Ad sustentationem edificij huius hospitalis, habentur in eo 124. columnae marmoreae, & in parietibus distincti 54. pilarij. Satis prope hunc locum in Orientem, est Ecclesia quae dicitur, de Domina nostra magna: & inde non remote alia, quae dicitur nostra Domine Latinorum, edificata super locum, ubi Maria Magdalene, & Maria Cleophae cum alijs pluribus, dum Christus cruci affigebatur, flebant & dolores lamentabiles exercebant.

Cap. 15.
De tribus alijs Ecclesijs, & specialiter de Templo Domini.

20 Item ab Ecclesia sancti Sepulchri in Orientem ad stadium cum dimidio habetur edificium mirabile, ac pulchrum valde, quod Templum Domini nominatur, quod constructum est in forma rotunda, cuius circumferentia Diameter habet 64. cubitos, & altitudo eius 126. & intrinsecus pro sustentatione edificij, multi pilarij. In medio autem Templi est locus altior 14. gradibus, qui & ipse columnis undiq. est stipatus: & secundum quatuor mundi plagas habet Templum quatuor introitus per portas Cypressinas artificiosae compositas, nobiliterq. sculptas, & excisas. Et ante portam Aquilonarem intra Templum fons est aquae munda, qui quamvis olim exundabat, tamen nunc minime fluit. In toto circuitu edificij extrinsecus est valde pro atrio latum spacium loci, stratum per totum pavementum marmoribus. Hoc Templum non ducitur stare in eodem loco ubi Templum Dei stetit in tempore Christi, quo post Resurrectionem a Romanis destructo, istud longo post tempore Adrianus Imperator extruxit, sed non ad formam Templi prioris: praedictum tamen excelsum in medio Templi locum vocant Iudaei Sanctum Sanctorum.

30 Scitis itaq. quod Saraceni magnam exhibent huic Templo reverentiam, & honorem, sapienter illud discalceati intrantes, & positis genibus devote Deum Omnipotentem exorantes, nulla enim ibidem habetur imago, sed multa lampades relucens. Neminem Christianorum seu Iudaeorum ingredi sinunt hoc Templum, reputantes eos indignos ad hoc, & nimium immundos, unde nisi virtute literarum quas habui a Soldano, nec ego fuisset ingressus. Ingressus autem cum meis sodalibus deposuimus calciamenta, recogitantes cum multa cordis devotione, nos magis id facere debere, quam incredulos Saracenos.

Litterae Soldani traditae Mandavillo.

Porro in eo loco ubi staterat idem Rex ante Templum Altare holocausti, videlicet extra portam Templi Occidentalem, habetur & nunc Altare, sed non ad instar, nec ad usum primi: Nam Saraceni, quasi nihil curantes, traxerunt in eo lineas tanquam in Astrolabio figentes in linearum centro batellum, ad cuius umbram per lineas discernuntur diei hora.

40 Viaturo ad dextram satis de propinquo habetur & alia Ecclesia, quae nunc appellatur schola Salomonis: rursumq. ad Meridiem est & aliud Templum siue Ecclesia, quae vocatur Templum Salomonis, quod olim fuit caput, & fundamentum totius ordinis Templariorum, &c.

Cap. 16.
De pluribus locis sacris iuxta urbem.

50 Dominus Soldanus quodam die in Castro, expulsis omnibus de camera sua, me solum retinuit secum tanquam pro secreto habendo colloquio. Consuetum enim est ijs eicere omnes tempore secretorum: qui diligenter a me interrogavit qualis esset gubernatio vitae in terra nostra, breuiter respondebam, bona, per Dei gratiam, qui recepto hoc verbo dixit ita non esse. Sacerdotes (inquit) vestri, qui seipso exhibere deberent alijs in exemplum, in malis iacent actibus, parum curant de Templi seruitio: habitu & studijs se conformant mundo: se inebriant vino, continentiam infringentes, cum fraude negotiantes, ac prava principibus consilia ingerentes. Communis quoque populus, dum festis diebus intendere deberent deuotioni in Templo, currit in hortis, in spectaculis, in Tabernis usque ad crapulam, & ebrietatem, & pingua manducans & bibens, ac in bestiarum morem, luxuriam prauam exercens. In usura, dolo, rapina, furto, detractione, mendatio & periurio viuunt plures eorum euidenter, ac si qui talia non agant, vt fatui reputantur, & pro nimia cordis superbia nesciunt ad libitum excogitare, qualiter se velint habere, mutando sibi indumenta, nunc longa, nunc curta nimis, quandoque ampla, quandoque stricta ultra modum, vt in his singulis appareant derisi potius quam vestiti: pyleos quoque, calcios, calligas, corrigias sibi fabricant exquisitas, cum etiam e contra deberent secundum Christi sui doctrinam simplices, Deo deuoti, humiles, veraces, inuicem diligentes, inuicem concordantes, & iniuriam de facili remittentes. Scimus etiam eos propter peccata sua perdidisse hanc terram optimam quam tenemus, nec timemus eam amittere, quam diu se taliter gubernant. Attamen non dubitamus, quin in futurum per meliorem vitam conuersionem merebuntur de nostris eam manibus recuperare.

Colloquium Soldani cum Mandavillo. Reprehensio Sacerdotum.

Reprehensio vulgi iustissima

Vestimento- rum varietas reprehensa.

60 Ad hoc ego ultra confusus & stupefactus, nequius inuenire responsum, verebar enim obloqui veritati, quamuis ab Infidelis ore prolata, & vultu praerubore demisso percunctatus sum, Domine, salua reuerentia, qualiter potestis ita plene hoc noscere? De hominibus (ait) meis interdum mitto ad modum Mercatorum per terras & Regiones Christianorum, cum Balsamo, Gemmis, Sericis, ac Aromatibus,

ac

ac per illos singula exploro, tam de statu Imperatoris, ac Pontificum Principum, ac Sacerdotum, quam Prælatorum, nec non Equora, Prouincias, ac distinctiones earum.

Igitur peracta colloquutione nostra satis producta, egressos Principes in cameram reuocauit ex quibus quatuor de maioribus iuxta nos aduocans, fecit eos expresse ac debite, per singulas diuisiones in lingua Gallicana distinguere per partes, & singularum nomina partium, omnem Regionem terra Anglie, ac alias Christianorum terras multas, ac si inter nostros fuissent nati, vel multo tempore conuersati. Nam & ipsum Soldanum audiui cum ijs bene & directe loquentem idioma Francorum. Itaque in omnibus his mente consternatus obmutui, cogitans, & dolens de peccatis singulis, rem taliter se habere, &c.

Secunda pars.

Cap. 26.
De Ethiopia,
& Diamanti-
bus, & de infi-
ma India.

India triplex.

Cap. 28.
De Ecclesia &
corpore sanctæ
Thomæ Apo-
stoli.

Regio Mabron
vel Malaber.
Calami, vel
Calumè.

Idolum in
Templo sancti
Apostoli ere-
ctum.

A Ethiopia consistit à terra Chaldaeorum in Austrum, qua distinguitur in Orientalem Ethiopiam, 10
& Meridionalem, quarum prima in illis partibus vocatur Culh, propter hominum nigredinem, altera Mauritania.

De Ethiopia intratur in Indiam mediam, nam triplex est, videlicet Infima, que in quibusdam suis partibus est nimis frigida ad inhabitandum: Media que satis temperata est, & Superior, que nimis calida, &c.

Hinc Meridiem pluribus exactis Insulis per viam decem dietarum venit in Regnum Mabron. Illic in ciuitate Calamiæ, seruatur in magno Templo corpus beatissimi Thomæ Apostoli Domini noster Iesu Christi in capsula honorificata. In quo loco & martirizatus fuit, licet dicunt quidam, quod in E-dissa ciuitate. Iste populus non est multum tempus transactum, quin fuit totus in fidei religione, sed nunc est ad pessimos Gentilium ritus peruersus.

Per certas historias habetur Ducem Danorum Ogerum conquisuisse has terras, & in exaltatione sanctarum Apostoli reliquiarum fecisse fieri prafatam spectabilem Ecclesiam, &c.

In hac ipsa beati Thomæ Ecclesia statuerunt multa mira magnitudinis simulachra, ex quibus unum quod maius est multo alijs, apparet sedens homo in alto solio adoperto aureis sericis, & lapidibus pretiosis, habensq; ad collum suspensa pro ornatu multa cinctoria pretiose gemmis, & auro contexta. Ad hoc autem Idolum adorandum conflunt peregrini à remotis partibus, & propinquis, in satis maiori copia, & valde feruentiori deuotione quam Christiani, ad sanctuum Iacobum in Galizia, quia multi eorum per totum peregrinationis iter, non audent erigere palpebras oculorum, ne forte propter hoc deuotio in-termittatur.

Alij de propè venientes superaddunt labori itinerandi, ut ad tertium vel ad quartum passum semper 30
cadant in genibus. Nonnulli quoque Demoniaci inspiratione semetipsos per viam peregrinationis lanceolis, & cultellis nunc minoribus, nunc maioribus sanciant vulneribus per singula corporis loca, & dum ante Idolum perueniunt, excisum frustum de carne propria projiciunt ad Idolum pro offerenda, ac plagis durioribus se castigant, & quandoque spontaneè penitus se occidunt: in solemnitatibus verò, sicut in de-dicatione, & sicut in thronizatione simulachrorum, fit conuentus populi, quasi totius Regni. Et ducitur cum processione maius Idolum per circuitum ciuitatis, in curru preciosissimo, modis omnibus perornato, & precedunt in numero magno puellæ cantantes binæ, & binæ ordinatissime: succeditq; pluralitas Musi-corum cum instrumentis varijs symphonizantes, quos continuè subsequitur currus cuius lateribus coniun-git se peregrinorum exercitus, qui & venerunt de remotis.

Ibique cernitur miserabilis actus ultra modum. Nam aliqui victi ultra modum diabolica deuotione 40
projiciunt se sub rotis curru precedentis, ut frangantur sibi crura, brachia, latera, dorsa, nec non & colla in reuerentiam Dei sui (ut dicunt) à quo remunerationem sperant, venire ad Paradisum terrestrem.

Occidunt se in
honorem Idoli

Et post processionem postquam statuerunt Idolum in Templo suo loco, multiplicatur coram simula-chris numerus sepe plangentium, & Occidentium ultra quam credi sit facile. Ita quod quandoq; in illa unica solemnitate inueniuntur ducenta corpora, vel plura occisorum. Et assistentes propinqui amici talium Diaboli martyrum, cum magna musicorum melodia decantantes in sua lingua offerunt Idolis corpora, ac demum accenso rogo omnia corpora comburunt in honorem Idolorum, assumentes sibi singuli aliquid de ossibus aut cineribus pro reliquijs, quas putant sibi valituras contra qualibet infortunia, & tempestates. Et habetur ante Templum, aque lacus, velut seruatorium piscium, in quo projicit populus largissime 50
suas oblationes, Argentum, Aurum, Gemmas, Cyphos, & similia, quibus ministri certis temporibus exhibentes prouident Ecclesie, ac simulachro, ac sibi ipsis abundanter.

Cap. 29.
De Iaua, &
quibuldam a-
lijs meridiona-
libus Insulis.

Inde ulterius procedendo in Austrum per multas & mirabiles terras quinquaginta duarum dietarum spacio, habetur magna Insula Lamori. Illic omnes nudi incedunt, & ferè omnia sunt singulis communia; nec utuntur priuatis clauibus siue seris, imò & omnes mulieres sunt communes omnibus & singulis viris, dummodo violentia non inferatur: sed & peior est ijs consuetudo, quod libenter comedunt teneras carnes humanas; unde & negotiatores adferunt eis crassos infantes venales: quod si non satis pingues afferun-tur eos saginant sicut nos Vitulum, siue Porcum.

Mandeuillus v-
sus astrolabio.
Iaua Insula,
grandis.
Multa Aroma-
ta in Iaua.

Hic apparet in bona altitudine Polus Antarcticus & incipit modò apperere in alta Lybia, ita quod in alta Ethiopia, eleuatur octodecem gradibus, prout ipse probauit Astrolabio.

Et est valde grandis Regio Iaua, habens in circuitu ambitum leucarum duarum millium. Huius Rex est valde potens, & imperans septem Insularum vicinarum Regibus. Terra ista est populosa, valde, & cres-cunt in ea Species, & abundantia Gingiberis, Canella, Gariofoli, Nuces Muscata, & Mastix, cum
Aro-

60

Aromatibus multis. Sed & quod ibi nascatur vinum, non habent: Aurum & Argentum est ibi in copia immensa, quod patet in Regis Iauæ palatio, cuius palatii nobilitas non est facile scribenda.

Cuncti gradus ascendentes ad palatii aulæ, & aularum cameras, & ad thalamos camerarum sunt solidi de argento vel auro, sed & omnis statura pavementorum in alijs habetur ad similitudinem scacarj, unam quadratam argenti, alteram auri, laminis valde crassis, & in ipsis pavementis, sunt excelsa gesta, & historia diuersæ. In principali verò aula, est plenarie expressa Dani Ducis Ogeri historia, à natiuitate ipsius, quousque in Franciam fantastice dicatur reuersus, cum tempore Caroli Magni Regis Franciæ, ipse Ogerus armata manu conquisiuit Christianitati ferè omnes partes transmarinas à Ierosolymis usque ad arbores Solis & Lune, ac propè Paradisum terrestrem.

- 10 Pro hac Regione Iaua, (quæ tangit fines Imperij Tartariæ) sibi subiungenda, Imperator Grand Can multoties pugnavit, sed nunquam valuit expugnare. Hinc per mare veniunt ad regnum * Thalamassæ, quod & * Pachon dicitur, in quo habetur magnus numerus bonarum ciuitatum. Intra hanc Insulam, quatuor sunt genera arborum, de quarum una accipitur farina ad panem, de secunda mel, de tertia vinum, & de quarta pessimum venenum. Extrahitur autem farina de suis arboribus isto modo.

* Vel Tholomassi.

* Vel Patena.

Farina ex arbore.

- Certo tempore anni percussitur stipes arboris undique prope terram cum securi, & cortex in locis pluribus vulneratur, de quibus recipitur liquor spissus, qui desiccatus ad solis æstum & contritus reddit farinam albam, ac si de frumento esset confectus, attamen hic panis non est triticeæ saporis, sed alterius valde boni. Simili modo de suis arboribus mel elicitur, & vinum * liquitur: excepto quod illa non sicut graminum prima desiccantur. Fertur quoque ibidem extractionem huius farinae, mellis, & vini, per Angelum primitus fuisse ostensam prædicto Danorum Duci, illic fame cum suo exercitu laboranti. Contra venenum quod de quarto arboris genere stillat, solum est intoxicato remedium, ut de proprio fimo per putant aquam distemperato bibat.

* Taddie.

- In litore maris Calanoch miraculose veniunt semel in anno, per tres continuos dies, quasi de omni genere piscium marinorum, in maxima abundantia: & præbent se omnibus libere capiendos ad manum. Nam & ego ipse cepi quamplures. Unde notandum, quod eodem tempore anni quo super dicta extrahitur farina, mel, & vinum, conueniunt in hoc isti pisces: quæ ambo mirabilia fecit uno tempore Deus olim pro Duce suo Ogero, quæ & in memoria illius, usque nunc, singulis annis innotantur.

Calanoch,

- Et sunt in hoc territorio testudines terribilis quantitatæ, sitq; de maioribus Regi ac Nobilibus delicatus ac preciosus cibus: mentior, si non quasdam ibidem viderim testudinum conchas, in quarum una se tres homines occultarent, suntq; omnes multum albi coloris. Si hic vir vxoratus moritur, sepelitur & vxor una cum eo, quatenus, sicut ibi credunt, habeant eam statim sociam in seculo alio.

Testudines grandissimæ.

- In istis autem meridionalibus partibus apparebat mihi eleuatio poli Antartici 33. graduum, cum 16. minutis. Et sciendum quod in Bohemia, similiter & in Anglia eleuatur polus Arcticus 52. gradibus vel citra: Et in partibus magis septentrionalibus, ubi sunt Scoti 62. gradibus cum 4. minutis. Ex quo patet respiciendo ad latitudinem cæli, quæ est de polo ad polum, itinerario meo fuit per quantum Horizontis spheræ terræ, & ultra per 5. gradus, cum 20. minutis. Cum ergo secundum Astrologos, totus terræ circuitus sit 31500. miliarium, octo stadys pro miliario computatis, & septinginta stadia respondeant ad unum gradum, quod patet ad latitudinem terræ, perambulanti 66733. stadia cum uno tertio, quæ faciunt 4170. leucas Geometricas cum dimidia vel propè.

Australis latitudo 33. grad. 16. minut.

Hæc erat Eratosthenis computatio.

- 40 Cum igitur tot & talia in istis Insulis vidimus monstra (quæ si explicarem scribendo vix à legentibus omnia crederentur) non curauimus ulterius procedere sub polo Australi, ne in maiora pericula incideremus: sed propter auditam & inusitam nobis famositatem potentie, nobilitatis, & gloriæ Imperatoris Tartarorum, vertebam faciem cum socijs navigare magis versus Orientem. Cumq; per multas dietas sustinuissimus multa pericula maris, peruenimus in Regnum Manchus, quod est in confinibus superioris Indiæ, & iungitur ab una parte Tartariæ. Hæc Regio Manchus pro sua quantitate reputatur melior, delectabilior, & omnium bonorum abundantior de cunctis ibi prope Regionibus. Nam & homines, bestie, & volucres maiores & corpulentiores sunt alijs, & præ ubertate vix inuenirentur in una ciuitate decem mendici. Formosi sunt viri, sed femina formosiores. Sed viri loco barba, habent perpaucos pilos, rigidos, & longos ab utraque oris parte, quemadmodum nostros videmus cattos habere.

Cap. 32. De bona Regione Manchus (forte Mangi.)

- 50 Prima quam ingrediamur ciuitas est Lachori, distans una dieta à mari, & mirabamur, & gauesum nos inuenisse integram ciuitatem Christiane fidei. Nam & maior pars Regni credit in Christum. Ibi habetur in leui precio copia rerum omnium, & præcipue victualium: unum genus est ibi serpentum in abundantia quod manducant ad omne conuiuium, & nisi pro finali ferculo ministraretur de illis serpentibus, conuiuium quam modicum diceretur.

Christiani.

Suntq; per hoc regnum pleraque ciuitates & Ecclesiæ, & religiones quas instituit Dux Ogerus, quia hoc est unum de quindecim regnis quæ quasunt, sicut infra dicitur. Illic sunt elegantes albæ gallinæ, quæ non vestiuntur plumis ut nostre, sed optima lana. Canes aquatici, quos nos luras nominamus, sunt ibi multi edomiti, quod quoties mittuntur in flumen, exportant domino piscem.

Sunt huiusmodi etiam canes in India occidentali, teste Petro Martyre, in Decadibus. Canis, vel Quintay, & eius descriptio.

- Ab hoc loco per aliquas dietas, veniunt ad huius regionis maximam urbem Cansay, hoc est dicere, 60 Ciuitatem Cæli, imò de vniuerso orbe terrarum putatur hæc maxima ciuitas; nam eius circuitus 50. leucis est mensus, nec est facile dicere, quam compressæ à quamplurimis populis inhabitatur. Hæc sedet in lacu maris, quemadmodum, & Venetiæ: & habentur in ea plures quam mille ducenti pontes, & in quolibet turres miræ magnitudinis, ac fortitudinis, munitæ pernigili custodia, & pro urbe tuenda contra Imperatorem Grand Can. Multi sunt ibi Christiani, & multi Religiones Christianorum, sed

sed & de ordinibus Minorum, & Predicatorum, qui tamen ibi non mendicant; est magna pluralitas ex diuersis Nationibus Mercatorum. Per Regionem nascitur vinum valde bonum, quod appellatur Bigon. Et ad leucam extra Ciuitatem; Abbatia magna est, non de Religione Christiana sed Pagana: & in ea forrestum, siue hortus magnus undiq; circumclusus, constans arboribus, & arbutis in cuius etiam medio mons altus simul & latus, habens hortum ubi solum inhabitant bestiola mirabiles, sicut Simie, marmota, Lanbon, papiones, foreti & huiusmodi ad varia & multa genera, & ad numerum infinitum.

Eadem narrat
Odericus.

Omni autem die post refectiorem conuentus Abbatia, qui est valde Monachosus, deferuntur reliquie ciborum cum magno additamento, in vasis auro lucentibus ad hunc hortum: & ad sonitum Campana argentea, quam Eleemosynarius manu gestat descendentes, & occurrentes de bestiis duo millia aut plures sese componunt residere ad circulum more pauperum mendicorum, & traditur singulis per seruos, ali- 10
quid de his cibarijs, ac denuo audita campana segregando recurrunt: Cumque nos tanquam redarguen-
tes, diceremus, cur hac non darentur egenis, responderunt, illic pauperes non habentur, quod si inueniren-
tur, potius tamen dari deberent bestiis. Habet enim eorum perfidia, & Paganismus, animas nobilium
hominum post mortem ingredi corpora nobilium bestiarum, & animas ignobilium corpora bestiarum ig-
nobilium & vilium, ad lucenda videlicet crimina, donec peracta penitentia transeant in Paradisum: ideo-
que nutriunt, prout dicunt, has nobiliores bestias, siue bestiolas, quod à quibusdam nobilibus fundaba-
tur in principio hac Abbatia. Multa sunt alia mira in hac Ciuitate, de quibus sciatis, quod non om-
nia vobis recitabo.

Cap. 33.

Insula Pygmaeorum non est protensa, sed fortè 12. Ciuitatum. Quarum una est grandis, & bene mu-
nita, & quam Grand Can facit cum fortibus armaturis curiose seruari, contra Regem Mangi.

Iamchan.

* Cuman.

Hinc proceditur per Imperium Grand Can, ad multas Ciuitates, & Villas morum mirabiliter diuer- 20
sorum, usq; in Regnum Iamchan, quod est vnum de 12. Prouincijs maximis, quibus distinguitur to-
tum Imperium Tartarorum. Nobilior Ciuitas huius Regni seu Prouincia dicitur Iamchan, abundans
mercimonijs, & diuitijs infinitis, & multa prestans proprio Regi tributa, quoniam sicut illi de Ciuitate
spatentur, valet annue Regi quinquaginta milia * Cuman Florenorum auri. Nota. In Iamchan Ci-
uitate est Conuentus fratrum Minorum: in hac sunt tres Ecclesie Monasteriorum: reditus simul as-
cendit ad 12. Cuman. Odericus. Vnus Cuman est decem millium. Summa tributi annui, quinquaginta
millia millium Florenorum. In illis namq; partibus magnas numerorum summas estimant per Cu-
man, numerum 10. millium qui & in Flamingo dicitur latte. Ad quinque leucas ab hac Ciuitate est
alia dicta Meke, in qua sunt de quodam albisimi genere ligni Naues maxima cum Aulis & Thalamis, 30
ac multis edificijs, tanquam Palatium tellure fundatum.

Caydo Ciui-
tas.

Nauigando per dictum flumen versus Orientem, & itinerando per hanc Cathay Prouinciā ad
multas dietas per plurimas Vrbes & Villas, venit in Ciuitatem c Sugarmago, abundantiorē omni- 40
bus in mercimonijs antedictis: quando sericum est hic vilissimum quadraginta libra habentur ibi pro de-
cem Florenis. Ab hac Ciuitate, multis Ciuitatibus peragratis versus Orientem, veni ad Ciuitatem
Cambalu, que est antiqua in Prouincia Cathay: Hanc postquam Tartari ceperunt, ad dimidium mi-
liare fecerunt vnā Ciuitatem nomine Caydo, & habet duodecim portas, & a porta in portam duo sunt
grossa miliaria Lombardica, spaciū inter medium istarum Ciuitatum habitatoribus plenum est & cir-
cūitus cuiuslibet istarum ambit 60. miliaria Lombardica, que faciunt octo Teutonica. In hac Ciuita-
te Cambalu residet Imperator Magnus Can, Rex Regum terrestrium, & Dominus Dominorum ter-
restrium. Atq; inde ulterius in Orientem intratur vetus vrbs Caydo, ubi communiter tenet suam se-
dem Imperialem Grand Can in suo Palatio. Ambitus autem vrbs Caydo, est viginti fere leucarum,
duodecim habens portas à se distantes amplius quam stadia 24.

Cap. 34.
De Palatio
Imperatoris
Grand Can.

Palatium Imperatoris Grand Can, quod est in Caydo Ciuitate, continet in circuitu proprii muralis
ultra duas leucas & sunt in eo aula quam plures, in forma nobiles, & in materia nobiliores. Aula autem
sedis, que est maxima ceterarum, habet intrinsecus pro sui sustentatione 24. areas columnas factas opere
fusorio, de auro puro, & omnes parietes ab intus operas pellibus quorundam animalium, qua vocantur
Pantheres: he sanguinei sunt coloris, & ita remicantes, ut Sole desuper relucente, vix oculus valeat hu-
manus sufferre splendorem, tantāq; fragrantia ut illi approximare non posset aer infectus, unde & ista oper-
tura parietum appreciatur super tegmen aurearum laminarum, &c.

Mandevillus
suis pedibus
mensurauit
aulam Imper-
atoris.

Istius autem ostia aula, dum in ea residet, aut deambulat Imperator, multi Barones ingressum seruant
intente & ne limen tangatur, quod hoc haberent pro augurio: & bene verberaretur, quia Imperatore præ-
sente, nemo nisi adductus in quacunque camera, vel habitatione intromittitur, donec interrogatus iusserit 60
Imperator. Latitudinem huius Basilicæ estimo ad spaciū de meis pedibus centum & longitudinem vl-
tra quatuor centum.

Præterea, iuxta Palatii ambitum, habetur grandis parci spaciamentum, diuersi generis arboribus
repletum, fructu ferentibus varios, & nobis inuisos, & in parte media, aula super excelsum collem de
tam

sam mira & pulchra structura, ut eius nobilitas de facili ad presens non possit describi. Et undiq³, per collis gyrum aqua fossatum profundum, & latum, ultra quod pons unicus ducit ad collem. Atq³, ex duobus montis lateribus, stagnum cum diuersorum copia Piscium, & volucrum indomitum, ut aucarum, annatum, cignorum, ciconiarum, ardearum, & collectorum in magna pluralitate: nec non & per parcum, multa sylvestres bestie, & bestiole quatenus per aula fenestras possit Dominus pro solatio respicere volucrum aucupationes, bestiarum venationes, & piscium captiones.

Præter palatium hoc in Caydo, habet Imperator similiter tria: unum in ciuitate Sadus; versus Septentrionem, ubi competens est frigus, ibi moratur in æstate. Cambalu, ubi competens calor, ibi moratur hyeme. Tertium in ciuitate longh, in quo & in isto Caydo, ut sapiens seruat sedem, eo quod in istis est aer magis temperatus, quamuis semper calidus videtur Nostratibus.

Haitenus me-
minit longh.

Sciat is quod ego, meiq³ sodales, pro fama magnificentie huius Imperatoris, tradidimus nos stipendarios esse in guerris, contra Regem Mangi prænominatum. Et fuimus apud ipsum 15. mensibus, & cerè inuenimus multo maiorem partem hominum, in mediam partem nobis non fuisse relatum: hominum (exceptis custodibus bestiarum & volucrum) qui intra palatium certa gerunt ministeria est numerus decem cuman.

Cap. 35.
De quatuor
solennitati-
bus, quas Ma-
nus Can cele-
brat in anno.

Nota. Traxi moram in Cambalu tribus annis: fratres nostri locum habent in Curia sua speciali-ter, & festis diebus statutis dant benedictionem. Odericus. Et quoniam Imperator habet satis plures quam decem mille Elephantos edomitos, & velut ultra numerum alias bestias (quarum quedam tene-ntur in caneis, stabulis mirabilibus, vel catenis) nec non & aues rapaces, & Accipitres, Falcones, Ostro-

Vixit in Cam-
balu tribus
annis.

20 nes, Gryfandos gentiles, Laneroys, & Satyros, sed & Aniculas loquentes, & Papingos, & similes, aliaq³ cantantes: reputatur numerus hominum de istis curam & laborem gerentium, ultra sex cuman, & præterea ingiter ad Curiam equites cum plenariis armaturis, quinq³ cuman, & de peditibus cum præliandi armaturis, cuman decem. Sed & omnes de natione quacunq³ mundi venientes, qui petunt describi pro Curia, recipiuntur. Sic enim iussit Imperator. Habet & medicos Paganos viginti, & totidem Physicos, atque sine his Medicos Christianos ducentos, & totidem Physicos, quoniam iste Grand Can maiorem gerit confidentiam in Medicis Christianis, quam in sua propria nationis medicis.

Sex cuman sã
mulorum.
Quinq³ Cu-
man equitum.

Medici Chri-
stiani, 200. in
aula Grand Can.
Vnus Cuman
continet de-
cem milia, ut
in cap. 33.
Monera de co-
rio vel papyro.

Hoc ergo firmiter scias, quod de Curia Regis accipiunt necessaria sua ingiter ultra triginta cuman hominum, præter expensas animalium & volucrum, cum tamen in festis maioribus sint homines propè in duplo tanti. Nec valet hic Dominus defectum vllum pati pecunia, eo quod in terra sua non currit moneta de argento, vel auro, aliò metallo, sed tantum de corio vel papyro: horum enim forma denariorum signo Imperatoris impressorum precatur minoris aut maioris valoris, secundum diuersitatem impressio- nis, qui per visitationem, detrui vel rupti, cum ad Regis thesaurarios deferuntur, protinus dantur pro illis noui.

Quatuor festa.

Circumcisio
quædam.

Quater in anno celebrat Imperator festiuitates solennes. Primam de die propria Natiuitatis. Secundam, de die sua prima presentationis in eorum Templo, quod appellant Moleath, ubi & fit q³, ne- scio quod genus circumcissionis. Tertiam, in thronizatione sui Idoli in Templo. Quartam, de die quo Idolum cepit dare responsum, seu facere diabolica mira. Plures enim in anno non tenet solennitates, nisi si quando nuptia filij aut filie celebrat. Itaq³ in istis solennitatibus est populi multitudo absq³ numero, &c.

40 Celebratio post hoc prandio satis morose, quia nunquam est ultra semel edendum in die, de quo & eius administratione nunc longum est scribere, adsunt gesticulatores, mira visu, suauitq³, auditu pedibus, manibus, brachijs, humeris, caputibus, & toto corpore, ac ad singulos gestus, correspondentes debito vocis sono. Et semper finem horum mirabilium cantilena subsequitur musicorum. Ex hoc ioculatores præstò sunt, & Magi, qui suis incantationibus præstant præstigia multa.

1. Sam. II. 2.

Certum est illic homines esse subriles ad quasdam humanas artes, & ingeniosos ad fraudes super omnes, quas noui mundi partes, unde & inter se dicunt prouerbum, se solos videre duobus oculis, & Christianos uno, ceteros autem homines cecos: sed mentitur iniquitas sibi, quoniam ipsi vident solo oculo terrena & transitoria, & nos Christiani duobus, quia cum terrenis videmus spiritualia, & mansura: percussit enim Naas, id est, humani generis hostis cum illis fœdus, ut erueret omnibus oculos dextros, scilicet spirituales.

50 Post annos Christi 1100. prima Tartaria fuit nimis oppressa seruitute sub Regibus circumiacentium sibi nationum. Quando autem Deo placuit, maiores illius Tartariæ eleuauerunt de seipsis sibi Regem dictum Guis Can, cui & promiserunt subiectissimam obedientiam. Idem cum esset prudens & strenuus 12. viriles habens filios, debellauit cum ijs & populo suo, & vicit, ac subiecit cunctos in circuitu Reges, quibus terra indebitè diu subiacerat. Quin etiam apparente sibi in visione Angelo Dei velut milite in albo equo, & candidis armis, & hortante se, ut transiret Alpes, per montem* Beliam, & per brachium maris, ad terram Cathay, & ad alias illic plurimas regiones transiit, & cepit cum filiis suis aliquas ex illis debellare, & subycere, Deo in omnibus adiuuante potenter. Et quoniam in equo albo ei Angelus apparuit, qui etiam ante passum prædicti maris nouem orationes Deo facere iussit, ideo successores vsque hodie diligunt equos albos, & nouenarium numerum habent præ ceteris in gratia. Dunc³ Guis Can morti præ senio appropinquaret, conuocatos ante se filios hortabatur, & monebat exemplo 12. telorum in simul colligatorum, quæ à nullo filiorum pariter frangi potuerant, sed dissoluta vnumquodq³ per se facile frangebatur: sic filij (inquit) dilectissimi, si per concordiam vos inuicem dilexeritis, & vixeritis seniori fratri obediens, confido in Deo iuxta promissionem mihi ab Angelo factam, quod omnem latissimam

istam terram, & optimam illius imperio subycietis, quod & post patris discessum strenuissime, ac fidelis-
sime (Deo sibi prosperante) perfecerunt. Et quia cum proprijs nominibus habebant cognomen Can, pri-
mogenitus pro differentia obtinuit nomen Grand Can, id est, Magnus Can, videlicet supra ceteros fra-
tres, qui sibi in omnibus obediebant.

Itaq; iste secundus Imperator vocabatur Ochoto Can. Post quem filius eius regnavit dictus Gui
Can. Quartus autem, qui Mango Can baptizabatur, permansitq; fidelis Christianus, qui etiam misso
magno exercitu cum fratre suo Hallaon in partes Arabiæ & Egypti mandavit destrui in toto Maho-
meti superstitionem, & terram poni in manibus Christianorum. Et fratre tum procedente, accepit ru-
mores de fratris sui Imperatoris morte inopinata, quapropter & redijt negotio imperfecto. Quintus Co-
bila Can, qui etiam fuit Christianus, & regnavit 42. annis, & edificavit magnam ciuitatem Iong, 10
maiores satis vrbe Roma, in qua & continetur valde nobile palatium Imperiale. Hinc usq; hodie om-
nes successores Paganismo sedantur.

Tempore autem meo erat nomen Imperatoris Echiant Can, & primogenitus eius Cosue Can, prater
quem & alios filios habuit 12. de quorum nominibus conscribendis non est cura presentis.

Prima vxorum suorum vocabatur Serochan, quæ & est filia Presbyteri Ioannis, scilicet Impera-
toris Indiæ. Secunda Verouchan. Tertia Caranth Can.

Istis duobus Imperatoribus non creditur inueniri maior Dominus sub firmamento Cæli. In literis
quæ huius Imperatoris Tartariæ scribuntur nomine ponitur semper iste Titulus. Can filius Dei excel-
si, omnium vniuersam terram colentium summus Imperator, & Dominus dominantium omnium.
Circumferentia magni sui sigilli, continet hoc scriptum. Deus in Cælo, Can super terram, eius for-
tudo. Omnium hominum Imperatoris sigillum. Sciendum quoq; quod quamuis populi ibi dicun-
tur, & sunt Pagani, tamen & Rex & omnes credunt in Deum immortalem, & Omnipotentem, & in-
rant per ipsum appellantes, Yroga, id est, Deum Naturæ. Sed nihilominus colunt & adorant Idola, &
simulachra aurea, & argentea, lapidea, lignea, filtria, lancea, & linea.

Totum Imperium Imperatoris Grand Can distinctum est in 12. magnas Prouinciæ, iuxta numerum
duodecim filiorum primi Genitoris Can. Harum Prouinciarum maior, & nobilior dicitur Cathay,
quæ consistit in Asia profunda. Tres enim sunt Alie, scilicet quæ profunda dicitur, & Asia dicta masor
quæ nobis est satis propinquior & tertia minor intra quam est Ephelus beati Ioannis Euangelistæ sepul-
tura, de qua habes in precedentibus.

Omnes tam viri quam femine similibus in forma vestibus inducuntur, videlicet valde latis, & breui-
bus usq; ad genua cum apertura in lateribus quam firman (dum volunt) ansis quibusdam, nam uterq;
sextus est brachijs seu femoralibus plenè tectus. Nunquam utuntur toga aut collobio, sed nec caputio,
unde nec per aspectum indumentorum potest haberi differentia inter virum & mulierem in nuptam. Sed
nupta gestat per aliquod tegumentum in capite formam pedis viri. Nubit illic vir quotquot placet mulie-
ribus, ut nonnulli habeant decem vel duodecim vxores aut plures. Nam quisq; maritus iungitur licenter
cuiuslibet mulieri, exceptis matre, & amita, sorore, & filia. Sicut viri equitant, tendunt, & currunt per
patriam pro negotijs sic & mulieres, quoniam & ipsæ operantur omnia ferè artificia mechanica sicut pan-
nos & quicquid efficitur de panno, corio, sericoq; minantq; carrucas, & vehicula, sed viri fabricant de
ferro & de omni metallo lapidibus atq; ligno, nec vir nec mulier nobilis aut degener comedit ultra semel
in die communiter. Multa nutriunt pecora sed nullos porcos, parum comeditur ibi de pane exceptis ma-
gnatibus & dinitibus, sed carnes edunt pecorum, bestiarum, & bestiolarum utpote Boum, Onium, Ca-
prarum, Equorum, Asinorum, Canum, Cattorum, Murium, & Rattorum, ius carniū sorbentes, &
omnis generis lac bibentes.

Nobiles autem bibunt lac Equarum, seu iumentorum, pro nobilissimo potu & pauperes aquam bulli-
tam cum modico mellis, quia nec vinum ibi habetur, nec ceruisia conficitur: & multi ac plurimi fontes
consulant in sua siti, per villas, & rura. Domus, & habitacula rotunda sunt forma, composita & con-
texta paruis lignis, & flexilibus virgulis, ad modum cauearum quas nos facimus pro auiculis, habentes
rotundam in culmine aperturam præstantem duo beneficia habitationi, quoniam & ignis quem in medio
domus constituunt fumum emittit, & pro aspiciendo lumen immittit. Intrinsecus sunt parietes undiq; de
filro, sed & tectum filtrum est: has domus, dum locum habitandi novare volunt, vel dum in diutina
expeditione procedunt, ducunt secum in planstris quasi tentoria.

Multas superuacuas observant ceremonias, quia respiciunt in vanitates & insanias falsas: solem
& lunam præcipue adorant, eisq; frequenter genua curnant, & ad nouilunium, quicquid est magni esti-
mant inchoandum. Nullus omnino vititur calcaribus in equitando, sed cogunt equum flagello scorpione,
reputantes peccatum non leue, si quis ad hoc flagellum appodiat, aut iumentum percuteret suo freno: plera-
que similia, quæ parum aut nihil nocent, ponderant ut gravia, sicut imponere cultellum in igne, os esse
confringere, lac seu aliud potabile in terram effundere, nec non & huiusmodi multa. Sed super hæc,
tenent pro grauiori admissio mingere intra domum quæ inhabitatur, & qui de tanto crimine proclamare-
tur affuetus, mitteretur ad mortem. Et de singulis necesse est ut confiteatur peccator Flaminii sue legis,
& soluat summam pecuniarum delicti. Et si peccatum deturpationis habitaculi venerit in publicum, o-
portebit reconciliari domum per Sacerdotem, priusquam ullus audebit intrare. Insuper & peccatorem
necesse erit pertransire ignem, semel, bis, aut ter iuxta iudicium Flaminis, quatenus per ignis acrimo-
niam purgetur à tanti iniquatione peccati.

Neminem hominum probibent inter se habitare, sed indifferenter receptant, Iudæos, Christianos,
Saracenos,

Saracenos, & homines cuiuscunq; nationis, vel legis, dicentes se satis putare suum ritum non ita secum ad salutem, nisi quandoq; traherentur ad ritum magis salutarem, quem tamen determinate nunc ignorant, imò multi de nobilibus sunt iam in Christianitate baptizati.

Porrò Tartari in præcincto expeditionis habent singuli duos arcus, cum magna pluralitate telorum: Nam omnes sunt sagittarij ad manum & cum rigida & longa lancea. Nobiles autem in equis preciosè phaleratis ferunt, gladios, vel spatias breues & latas, scindentes pro vno latere, & in capitibus galeas de corio cocto, non altas, sed ad capitis formam depressas. Quicunq; de suis fugerit de pralio, ipso facto conscriptus est, ut si quando inuentus fuerit occidatur. Si castrum vel ciuitas obfessa se illis reddere voluerit, nullam acceptant conditionem nisi cum morte omnium inimicorum, vel si quis homo singularis se dederit victum nihilominus absq; vlla miseratione occidunt, detrahentes illi protinus aures, quas postea coquentes, & in aceto (dum habuerint) ponentes mittunt inuicem ad conuiuia pro extremo ferculo: dumque ipsi in bellis arte fugam simulant, periculosum est eos insequi, quoniam iaciunt sagittas à tergo, quibus equos & homines occidere norunt. Et quando in prima acie comparant ad bellandam, mirabiliter sese constringunt, ut media pars numeri eorum vix credatur.

Generaliter noneritis, omnes Tartaros habere paruos oculos, & modicam vel raram barbam: In proprijs locis raro inter se litigant, contendunt, aut pugnant, timentes legum pergrauas emendas. Et inuenitur ibi rarius vispilio, latro, fur, homicida, iniurius, adulter, aut fornicarius, quia tales criminatores inuestigatione sollicita requiruntur, & sine redemptione aliqua perimuntur. Dum quis decumbit infirmus figitur lancea iuxta illum in terra, & cum appropinquauerit morti, nullus remanet iuxta ipsum, cum vero mortuus esse scitur, confestim in campis, & cum lancea sepelitur.

Imperator Grand Can postquam eius cognita fuerit defunctio, desertur mox à paucis viris in parco palatij, ad preuisum locum ubi debeat sepeliri. Et nudato prius toto illo loco à graminibus cum cespite figitur ibi tentorium, in quo velut in solio regali de ligno corpus defuncti residens collocatur, paraturq; mensa plena coram eo cibarijs preciosis, & potu de lacte iumentorum. Instabulatur ibi & equa cum suo pullo, sed & ipse albus, nobiliter phaleratus, & onustatus certo pondere auri & argenti. Et est totum Tentoriij pauimentum de mundo stramine stratum.

Tuncq; effodiunt in circuitu fossam latam valde, & profundam ut totum tentorium cum omnibus contentis descendat in illam. Eoq; facto ita equaliter terram planificantes adoperiunt graminibus, ut in omni tempore locus sepultura non valeat apparere. Et quoniam ignorantie nubilo turpiter excacati putant in alio seculo homines delectationibus frui, dicunt quod tentorium erit ei pro hospitio, cibi ad edendum, lac ad potandum, equus ad equitandum, aurum & argentum ad respiciendum, sed & equa lac semper præstabit, & pullos equinos successine generabit.

Post has itaq; Imperatoris defuncti miseræ exequias, nullus omnino audebit de ipso loqui coram uxoribus & filijs, & propinquis, sed nec nominare, quia per hoc putarent derogari paci, & quieti illius, qua non dubitant eum dominari, in maiori satis gloria Paradisi quam hic stetit.

Breuitè & nunc intendo cursum describere aliquarum magnarum Regionum & Insularum Imperij Tartariæ. Et primo illas qua descendunt à prouincia Cathay per septentrionalem plagam, vsq; ad fines Christianitatis Prussiæ, & Russiæ.

Ergo prouincia Cathay descendens in sui Oriente à regno Tharsis iungitur ab Occidente regno Turquescen, in quo & sunt plurimæ ciuitates, quarum formosior dicitur Octopar. Ipsum autem Turquescen regnum iungitur ad Occidentem sui regno seu Imperio Persiæ, & ad Septentrionem regno Coralinæ, quod spaciosum est valde, habens versus Orientem sui ultra centum diuitas deserti: hoc regnum est multis bonis abundans, & appellatur eius melior ciuitas etiam Corasine.

Isti quoq; regno iungitur in Occidente versus partes nostras regnum Commanorum, quod & similiter longum est, & latum, sed in paucis sui locis inhabitatum: Nam in quibusdam est frigus nimium, in alijs nimius calor, & in nonnullis nimia muscarum multitudo.

Sunt autem in Persia due regiones: vna alta Persiæ, qua à regno Turquescen descendens, iungitur ad Occidentem sui fluuijs Pyson. In ista habentur renominate ciuitates, quarum meliores due dicuntur Bocura & Seonargant, quam aliqui appellant Samarkand: Et altera Regio Bassa Persiæ, descendens à flumine Pyson, qui ad sui Occidentem iungitur regno Mediæ, & terra minoris Armeniæ, & ad Aquilonem mari Caspio, & ad Austrum terra minoris Indiæ. In hac bassa Persia tres principales ciuitates sunt Æstabor, Saphaon, Sarmalaule, &c.

A finibus regni Bachariæ supradicti ubi contiguatur Imperio Indiæ, eundo per multas diuitas intratur in regnum Pentoxyriæ quod est magna latitudinis, & abundantia in multis bonis: huius nominatio ciuitas, dicitur Nyse, & in ea habet Imperator palatium Imperiale, in quo residet dum sibi placet. Imperator iste semper vocitatus est Presbyter Ioannes, cuius nominis causam audieram quandoq; non veram: sed in illis partibus accepi rationem indubitam, quam breuiter hic enarro. Circa annum ab Incarnatione Domini Octingentesimum, Dux Ogerus de Danemarchia, cum quindecim cognationis sue Baronibus, & armatis viginti milibus transiit mare Greciæ, & fauente sibi Deo conquissit Christianitati per multa prælia penè omnes Terras, Regiones, & Insulas, quas esse de potestate Grand Can prædixi, nec non & omnes, qua sunt de potestate Imperij huius Imperatoris Indiæ. Eratq; inter Barones vnus denominatus Ioannes filius Goudebucf, Regis Frisonum: qui dictus Ioannes Deo deuotus fuit, & dum licuit Ecclesiarum limina inuit, vnde & Barones ei dabant quasi per iocum Presbyter Ioannes vocabulum. Dum ergo Ogerus dictas regiones expugnatas diuideret in hys quindecim suis cognatis,

& quemlibet eorum in suo loco constitueret Regem, quatenus Christiana religio in illa Orbis superficie semper stabilis permaneret, tradidit isti Presbytero Ioanni superiorem Indiam, cum 4000. Insulis, Regionibus, & ipsum prefecit Imperatorem super reliquos cognatos, ut ei certa tributa impenderent, & in omnibus obedirent, atq; ex nunc omnes successores Indiæ sunt vocati Presbyter Ioannes, & vsq; in hodiernum tempus boni manserunt Christiani, & Religionis amulatores, &c.

CHAP. VII.

The Voyage of NICOLÒ di CONTI a Venetian, to the Indies, Mangi, Cambalu and Quinsai, with some Observations of those places.

This is taken out of Ramusio's discourse of this voyage.

Nicolò di Conti a Venetian, having travelled quite thorow India, after five and twentie yeeres returned home; and because to save his life he had made denyall of his Faith, hee went to the Pope (then Eugenius the Fourth, An. 1444.) being at Florence to obtayne absolution; who enioyned him in way of penance, truly to make Narration of his Voyage, and whole Peregrination to his Secretarie Poggius, who writ it in the Latine tongue. 20
Ramusio sought for it in Venice and other Cities of Italie in vaine, and at last heard that it was translated into Portugall by the care of King Emanuel, An. 1500. a Copy whereof he procured from Lisbon, but so corrupt, that he doubted to publish it, which yet for want of better he did; and we out of him these Observations.

Desart-denils.

Nicolò di Conti a Venetian being a young man, then at Damasco, and having learned the Arabike Language, went with his merchandise in a Caravan of six hundred Merchants, with whom he travelled into Arabia Petrea, and thence into Chaldaea, till he came to Eufrates. In the Defarts of Arabia, once about midnight they heard a great noyse, which they thought were the wilde Arabs comming to rob them, but saw a great multitude passe by neere their Tents without hurting them, which some of the Merchants said were Devils which hanted these Defarts. 30

Baldac.

From Baldac is eight dayes journey to Balsera, and thence foure dayes to the Persian Gulfe, where the Sea ebbeth and floweth. After five dayes sayling therein, he came to Calcut, and after to Ormuz; thence to Calatia a Port of Persia of great traffick, where he remayned to learne the Persian tongue. Afterwards clothed in the habit of the Countrey (which hee used to doe in all his journey) he went with certaine Moores and Persians, having sworn to be faithfull to each other, and sayled to Cambaia, and after to Pacamuria and Dely, where store of Ginger growes.

Ormuz.

Calatia.

Bisnagar.

Thence they went farre into Sea, and came to Bisnagar sixtie miles about, at the foot of a high Mountayne; in which are one hundred thousand men fit for armes; they marry as many wives as they will, which are burned with them when they die. The King is the mightiest King in India, and hath twelue thousand Women, foure thousand of which attend him on foot whither soever he goeth, and are busied in the service of his Kitchin; foure thousand others ride on Horses, or are carried in Litters; two thousand are to burne with him, which is holden a great honor. Pelagonga is subiect to him, eight dayes journey thence and ten miles in circuit: from whence in twentie dayes by Land hee came to Pudisetania (leaving in the way Odeschiria, and Cenderghisia, where red Sanders grow) and thence went to Malepur where Saint Thomas is buried in a great and faire Church. The Inhabitants are Nestorians, which are Christians dispersed thorow all India, as Iewes amongst vs. And all this Prouince is called Malabar. 40

Pelagonga.

Nestorians dispersed thorow India.

Malabar.

Cinamon.

At the end of that Countrey is Zeilam a famous Iland, two thousand miles about, where are Rubies, Saphires, Cats-eye stones; and store of good Cinamon; the Tree like a Willow but thicker, the boughs growing more in breadth then height, the leaues like those of the Bay Tree, but greater: the Barke of the boughs is best, that of the Trunke is not good: the fruit like Bayberries of which they make good Oile to anoint them. There is a Lake in which is a Citie of three miles circuit, gouerned by Bramines, which spend their liues in the studies of Philosophie, and are much giuen to Astrologie.

After that

is a great Iland called Sumatra, which the Ancients called Taprobana, where hee stayed a yeere. There growes the best Pepper, the Tree like to Ivy. In a part of the Iland, called Batech, they eat mans flesh. Thence he sayled to Terraassari: and thence to the mouth of Ganges, and vp the streame (which is very great) to Cernouam, and to Maarazia; whence crossing ouer Land he came to Racha, and thence in seuentene dayes to Ana fiftene miles about, where they are much giuen to spend the Time in drinking and fellowship both Men and Women. There are certaine old women which get their liuing by selling Bels of gold, siluer, brasse, of the bignesse of Nuts, which they put in mens yards betwixt the skin and flesh, when they are of age to vse Women, and in short time cure the place; and the men much please themselves to heare the sound of them as they goe. Here the Copy is defective. 60

This Bell or Ball-fashion is there still in v.c.

Mangi

Mangi is full of Elephants of which the King nourisheth ten thousand: they serue him in the warre, and carrie Castles in which stand eight, ten, or twelue men with Lances, Bowes and Slings. They take them with a tame female Elephant, vied to feed in a place encompassed with a wall with two gates to goe in and out; into which in the coupling season the male enters at one gate, and thence flees out at the other, many men attending with devices to take him, both gates being shut; and with fasting, and accustoming other tame Elephants to him, tame him in few dayes.

Either this story is not true, or this *Mangi* is not *China* but *Polos Mien*, or some other place.

The men of this Countrey haue but one wife, and all both men and women paint or embroide their skinnies with Iron pennies, putting indehible tinctures thereunto. They worship Idols, yet when they rise in the morning, they turne to the East, and with hands ioyned, say, *God in Trinitie keepe vs in his Law.* This Countrey produceth Serpents as grosse as a man, fixe cubits long, without feet, which they eate for great dainties; as they doe also certaine red Ants. There is a beast headed like a Swine, tailed like an Oxe, with a horne in the forehead like an Vnicorne a cubit long, of the colour and stature of an Elephant; with whom hee continually fighteth. The horne is much esteemed against poyson. In the furthest parts of this Countrey towards *Cataio*, are white and blacke Kine, some haired and tailed like Horses, some with haire like feathers of which they make Fannes.

Beyond *Mangi* is the greatest Prouince in the World, called *Cataio*, the Lord whereof is called the great *Can* which signifieth Emperour: and the chiefe Citie is called *Cambalu*, which is foure square and hath eight and twenty miles in circuit. In the midst thereof is a Fortresse, and in it a Palace for the King; and at euery of those foure corners is a Castle, each foure miles about, in which are Armouries of diuers sorts, and Engines for battery. From the Palace is a way on the wall to all those Castles, that if the people rebell he might betake himselfe thither. Beyond this Citie fifteene dayes iourney is *Quinsai* another great Citie, which within this little while hath bene new made by this King. It hath thirty miles compasse, and is more peopled then the former. In these two Cities it was told him that the Houses and Palaces are after the manner of *Italie*, and the men richer and wiser then in other places.

Cataio.

Notes.

After he was gone from *Aus*, alongst the Riuer to the Sea in seuentene dayes he arriued at *Zaiton*, a great Port, where he tooke Sea, and in ten dayes came to a great and populous Citie, called *Pauconia*, which is of twelue miles compasse where he stayed foure moneths. There are a few Vines, which runne vpon Trees, and they make no Wine of them. There grow Abre-cockes, white Sanders, and Camphire, &c.

Zaiton.

Pauconia, perhaps *Paquin*.

I am loth to returne into India with this Author, whose defects and corruptions haue made him so little seruiceable, together with the changed names of places since his time. It is remarkable that hee sayth that the Indian Mariners sayled by the Starres Antartike, and not by the compasse; vsing certaine measures and rules in that Starre-observation. Hee also relateth the huge greatnesse and treble sheathing of their Ships. But of India, whereof all his Relations are, wee haue already given you better, that is more punctuall, methodicall, and credible Authors. Yet before we leaue him, let vs obserue what *Aeneas Syluius*, or *Pope Pius Secundus* hath, cited out of him. Hee sayth, that hee sayled the Indian

No compasse; which yet in the next age was there in vse,

Sea a moneth beyond Ganges, and then came to the Riuer *Ratha*, which being sayled in fixe dayes, hee found a Citie called by the same name. And thence after seuentene dayes passing desert Hills he came into champaine Countreies; which hauing passed in a fortnight with great labour, hee found a Riuer greater then Ganges, called *Dua*: and hauing sayled therein a moneth, came to a famous Citie fifteene miles in circuit, named *Dua*, where the women are exceedingly libidinous, the men contented with one wife. The Prouince is called *Macin*, full of Elephants, ten thousand of which the King keepe for his warres, and is himselfe carried on a white Elephant, wearing a golden Chayne distinguished with gemmes, and hanging to his feet. The men and women rase themselves, &c. (as before) but of the King, he sayth, that the same Kine haue tayles long and hairy to the feet, the haire subtile like Feathers, of much esteeme, and used on the tops of Lances as Ensignes. These things hath this *Nicholas* (sayth *Siluius*) of *Macin*, noting without doubt, the Region *Serica*. For our age placeth the Easterne *Scythians* in *Cathay*. That of *Dua* greater then Ganges, and that of ten thousand Elephants nourished by a King not knowne by fame, are hard to be beleued: but longinquitie cannot easily be confuted.

En. Syl. de 2. Asiae parte c. 10.

Macinum: here by appeares his *Macin* is about *Siam* or *Pegu*, &c.

* And yet how many things more incredible are, now found true.

TO THE READER.

Reader, I here present thee a piece of a Historie, so much as abuts on *Tartaria*, and *China*. *Alhacen*, a learned *Mahumetan* was the Author; whether an exact Historian, euery where literally to be understood; or whether in some part he be parabolicall, and presents a *Tamerlane* like *Xenophons* *Cyrus*, (in some things rather what he should haue bene, and what the Author could say, then what he was) I undertake not to determine. The *Abbat* of *Mortimer* takes it for a mist Storied, and so doth *Master Knolls* in his *Turkish Historie*. If it be an Historie partly parabolicall, yet doth the decorum exact of the Author a verisimilitude euery where of actions and places (sufficient to procure our pardon, if not thanks) the veritie of a great part being euident in other Storied. It is true that some things

seeme

seeme false for want of truth in our intelligence, rather then in themselves. And so hath it fared with all (the subject of this Booke) Tartarian and Chinesian affaires: of which we had as little knowledge as of Tamerlan, farther then terrors of Tartarian Armes, and some mens speciall occasions and trauels haue giuen vs light. Euen the Sunne riseth in those parts whiles it is not day-breake with vs, and hath attayned almost his Noon-point before we see him: and worthy wee are still to abide in a blacke night of ignorance, if we welcome not what light we can get (if we cannot get what wee would) from so remote an East. Once; Tartarian affaires (as it happens in Conquests) were changeable, and their New Moone was quickly at the full; diuers chances and changes succeeding after Poles dayes to these; such wealth whetting the Tartars to get and hold, and no lesse the Chinois to recouer; the China State being vnquiet so long as the Tartar greatnesse continued, and freed (for the most part) with their diminishing, and diuision into diuers Estates. As for these times of Tamerlan (if this Story be exact) it is like the Can held the North parts of China from Quinsay forward, with Cataio; and the King of China the rest; then Nanquin being the Seat Royall, as since the expulsion of the Tartars Paquin. Or perhaps the Quinsay heere mentioned, is that which Conti hath in the former Page told vs, was lately built by the Can: and not that which Polo speakes of; in Catay and not in China: which cleareth this doubt of the Cans residence and rule in China. To reconcile all doubts is for mee too hard a taske, because Cataio and China are euen still bewysted, and leane their Surrueys perplexed, bounding the search of the most curious in searching their mist bounds, how farre they are the same or differing; where in our Iesuites will more amuse and amaze vs (where wee will cleare our selues as well as we can) when wee come to them. I haue premised Conti, though Tamerlane be a little Elder for his Religions sake, and to recreate with a little Relation, before this longer Storie.

CHAP. VIII.

Extracts of ALHACEN his Arabike Historie of TAMERLAN,
touching his Martiall Trauels, done into French by IEAN
DV BEC, Abbat of Mortimer.

P. I.

TAMERLANs Birth and Person, his Expedition against the Muscouite;
his Marriage with the Cans daughter; his overthrow-
ing of CALIX.

Vndry Histories doe attribute, as a great want vnto the happie fortune of Tamerlan, not to haue a Writer in his dayes, which might haue left in writing his Historie vnto posteritie. But without any cause did they moane him, insomuch as his Historie is very famous amongst the Turkes, and Arabians; his Conquests very largely discoursed, and many of his worthy and notable sayings collected, with an infinite number of Noble deeds left vnto the memoriall of posteritie.

Very true it is, that he had not an Homer, but a great and worthie person, learned as well in naturall Philosophie, as in Astrologie, who was in the time of this Prince, a companion and familiar of his Conquests, named Alhacen, an Arabian by birth, and of Mahometers Religion. This Authour then being fallen into my hands, in my Voyage into the East Countrey, I caused the same to be interpreted vnto mee by an Arabian, who did speake Frank (as they terme it) that is to say, Italian, and some time I spent, in associating my selfe so with this man, who commended greatly vnto me the eloquence and grauitie of this Authour, wondering at his digressions, and entring againe into his matter so well to the purpose. It grieved mee much that I had not the perfection of this Language, to be a helpe vnto the richer of this Historie, for to deliuer it vnto my Nation with some grace: but I tooke thereof as much as I could in his Language, which was corrupted, as is the Franke Tongue (so they terme it) which is a kinde of Italian, mingled with Slanon, Greeke, and Spanish Tongues very common at Constantinople, with the Arabian and Turkish Tongues: so as I could not gather but onely the trueth thereof, and not the drifts and grauitie of the Declaration, wherein the Authour had collected it for posteritie (and as he said) by the commandement of the Prince, who was a loue of learning, and excellent in the knowledge of Astrologie and Diuinitie, as the custome of those Nations is to ioine them ordinarily together, studying vpon the vertue of names, and of the turning of letters, euen in their placing, writing them vnderneath Starres, whereof they make sentences, by meanes whereof they wrought miraculously in the things of Nature. This is that Zoroastrien and Bactrien Science, that of Balaam, and some others in my opinion, which hath succeeded vnto so many Arabian,

Arabian Astrologians. Now then, this Prince was endued with such knowledge; as made him admired of the people where he commanded, who are for the most part great wonderers, inso-much as this caused him to be accounted a Prince accompanied with the Diuine vertue, considering the iustice he vsed in all his actions. This hath proceeded euen so farre that some *Italians* haue written foolish things thereof, as of certaine kinds of Tents which he caused to be pitched, when he besieged any Citie; one white, signifying peace, it yeelding vnto his mercy; another red, signifying cruelty to follow; and the third blacke, signifying mourning to ensue. But I finde not this in our Author, and I beleue them to be fables.

I will now declare vnto you with my *Arabian*, who this great Prince *Tamerlan* was. Hee was then of the blood of the *Tartarian* Emperours, and his father *Og* had for his portion the Countrey of *Sachetay*, whereof hee was Lord. This Countrey lying betweene the North and the East, is the ancient Countrey of *Parthia*, vpon the Coast of the *Zogdians*, and the chiefeft Citie of his estate was *Samercaud* situated vpon the Riuer of *Iffarle*. Some of our Historiographers would needs haue him to be the sonne of a shepherd; but this haue they said, not knowing at all the custome of their Countrey, where the principall reuenue of the Kings and Nobles consisteth in Cattell, despising Gold and Siluer, but making great reckoning of such riches, wherein they abound in all forts: this is the occasion wherefore some call them Shepherds, and say also that this Prince descended from them. So his Father *Og* was Prince of * *Achetay*, abounding in such kinde of wealth. And being come vnto the age of fifteene yeeres, his father being already old, deliuered vp vnto him the gouernment of his Kingdome, with the commandement ouer all his Men of warre. His father *Og* being giuen vnto peace, withdrew himselfe vnto a solitary life, for to serue God, and end the rest of his dayes in quiet. Hee gaue vnto his sonne *Tamerlan* (which signifieth *Heauenly grace* in their Tongue) two sufficient personages for to guide and assist him in the gouernment of his Estate: the one was called *Odmar*, and the other *Aly*, persons in great dignitie and credit with his father. Now this Prince was well instructed in the *Arabian* learning, and exercised himselfe much therein, and at such time as they thought him to be either in the Bathes, wherein they are very curious in that Countrey being their chiefeft delicacies, he was in the contemplation and studie of heauenly things. This Prince had within his eyes such Diuine beautie, being full of such maiestie, that one could hardly endure the sight of them without closing of their eyes, and they which talked with him, and did often behold him, became dumbe, inso-much as he abstayned with a certaine modestie and comlineffe, to looke vpon him that discoursed vnto him. All the rest of his visage was curteous and well proportioned: he had but little haire on his chinne: hee did weare his haire long and curled, contrary to the custome of his Countrey, who are shaued on their heads, hauing the same alwaies couered, but he contrariwise was alwaies in a manner bare-headed, and said, his mother came of the race of *Samson*, for a marke whereof shee aduised me to honour long haire. This was the cause that made him respected of his men of Armes, and the most part of them did beleue there was some vertue in those haire, or rather some fatall destinie, the which many did beleue to be so; and verily they were of a dusky colour drawing toward a violet, the most beautifull that any eye could behold. His stature was of the middle sort, somewhat narrow in his shoulders, he had a faire leg and strong, the strength of his body was such as no body did surpasse, and often on the festiual dayes he made triall of his strength with the most strong: and this he did with such grace and humanitie, that he whom he ouercame held himselfe therein most happie, although it bee a disgrace amongst the *Tartarians* to bee throwne to the ground in wrastling. Now, as he was Martiall, and desirous of glorie: the first warre that hee attempted was against the *Moscouite*, who came and spoyle a Citie which had put it selfe into his protection, and had entred also into his Countrey, and being retired, proclaymed open warre against him, gaue him battell neere to the Riuer *Mascha*, although the *Moscouite* had a great Armie, which hee had gathered together long before. On the other side, the Prince determining to resist him, assembled all his forces, and those of his allyes. Now the *Moscouite* had very great forces, and men well trayned vp in the warres, hauing had alwaies warres with his neighbours, the King of *Polonia*, with whom hee had then friendship, and the ayde of ten thousand very good Horse. There were also with him many *Hungarian* Gentlemen, led by *Vdelclaus* a *Hungarian* Gentleman, who had brought with him more then eight thousand Horse; the opinion was, that hee had in his Armie fourscore thousand Horse, and a hundred thousand foot-men. Our Prince *Tamerlan* had in his Armie about six-score thousand Horse, and a hundred and fifty thousand men on foot, but not so skilfull in points of warre as those of the *Moscouite*: for our Estate had long enioyed peace, and our Souldiers were indeed trayned vp in discipline of warres, but not in the practice thereof. The order of *Tamerlan* was this; that is, he caused all his Armie to bee diuided into squadrons, each consisting of sixe thousand Horse, except his owne, which was of ten thousand, so as he made eightene squadrons, his owne being reckoned which made nineteene. The Auant-guard was conducted by *Odmar*, who led nine squadrons, flanked with fortie thousand men on foot, diuided both on the right and left sides, who should shoot an infinite number of Arrowes. The Battell was conducted by *Tamerlan*, who led ten squadrons, his owne being therein

The off-spring and stocke of *Tamerlan*.

The flockes of the *Tartarian* Kings are their stockes, and the *Tartars* beasts are their best wealth.

* This name seems deriued from *Sochtai*, mentioned before in *Haitons* of whom these *Tartars* are still called *Zagetai*.

Tamerlans name: some make it to signifie *Lame-leg* by reason of that accident falling from his Horse, *Michon*, *Tamerlan* his studies and learning. Maiestie in his eyes. The like is reported of *Augustus*.

The custome of the *Tartarians*. *Tamerlan* wore long haire, and why. The description of *Tamerlan*.

Our Authors tell vs he was lame, and that he was therefore so called. *Tamerlan* his first warre against the *Moscouite*.

The Armie of the *Moscouite*. The Armie of *Tamerlan*.

The order of *Tamerlans* Battell.

great *Cham*, and for his benefit as well as for the Princes. Therefore to accomplish his Enterprize, in the meane-time that he attended for the returne of his Embassadors; he caused his forces to come forwards from all parts, appointing vnto them for the place of meeting his owne at the *Horda* of *Baschir*, where all his Armie assembled: and other ayding troupes of the great *Cham* in the Deserts of *Ergimul*, at a certayne day, in which place he should joyne with all his Army. The Army of the great *Cham* consisted of two hundred thousand fighting men; wherein were all the braue men of his Court, who were accustomed vnto the Wars, the Emperour which then reigned, and was old, hauing greatly increased his limits, and conquered a great Countrey, so as these men were well trayned vp in the Wars; and accustomed vnto trauell and paines. Now then the Embassadors which were sent, returne and informe the Prince of the will of (this proud King of the World) this King of *China* (who was named so) who puffed vp with vaine glorie, was astonished how any durst denounce Warre against him, making this proud Answer; That *Tamerlan* should content himselfe that hee had left him that which hee might haue taken from him, and that his Armes and Forces were of another sort, then those of whom he published the victorie, to bring thereby terrour vpon his Neighbours.

This Answer being heard, our Prince marched directly vnto the Army, and gaue order for the conueyance of victuals from all parts, sent to hasten forward his Confederates, imparted the Answer vnto the Emperour by Embassadors dispatched from him, caused the boldnesse of the King of *China* to be published, to make manifest vnto all the World the justnesse of his cause. Before his departure he went to take leaue of his Father, who endued with a singular and Fatherly affection, said he should neuer see him againe, and that he hastened vnto his last rest, and hauing made solemne Prayers ouer the Prince his Sonne for his prosperitie, kissing him a thousand times, drew off his Imperiall Ring, and gaue it vnto him, not asking whether his Iourney tended: and calling *Odmur*, he bade him farewell, recommending his faithfulness vnto his Son. Then he departed and drew towards *Samarcand*, where the Emperesse his Wife remayned; whom he carryed with him as is the custome of that Nation, and after he had (being Religious) visited the Tombe of his Seruant *Hally*, hee caused his soule three dayes to bee prayed for, according to the Rites of his Law: whereupon he presently departed, hauing taken order for the well gouerning of his Kingdome in his absence, committing the charge thereof vnto *Samay*, a man well practised in Affaires, and he who had the charge of our Prince in his youth. So then he marched forward in the middest of his Army, which consisted but of fiftie thousand Horse, and one hundred thousand men on foot, relying principally on the Forces of the great *Cham* his Vncle; who about all desired this War: he did not forget to giue in charge, that the rest of his Forces should be readie vpon the first Commandement, as soone as he should be ioyned with the forces of the great *Cham*, and marching forwards he had stayed by the way, by reason of some distemperature which had surprized him through changing of the Ayre, as the Physicians affirmed. But yet, notwithstanding, the forces which *Calix*, Captayne of the Army of the great *Cham* conducted, went daily forwards. Now the newes was spred into an infinite number of places of his distemperature, yet did he not neglect to send vnto the great *Cham*, and often aduertize him of the estate of his health, to the end the same should not cause any alteration, the which hee did fore-see by reason of his preferment vnto this Empire, by the great *Cham* his Vncle: and hee was in doubt of a certayne Lord named *Calix*, who was discontented therewith, and had not as yet neither gratified nor acknowledged him as all the other subiects had done.

Now concerning his delay, it was by sundry diuersly interpreted; some said that hee had bin aduertized of some vproare to be attempted, when he should be farre seuered from thence, and had passed ouer the Mountaynes of *Pasanfu*, and that *Calix* stayed vpon nothing else, inso much as the Companies of the great *Cham* were gone forwards, euen beyond the Mountaynes, hauing passed the Riuer of *Meau*, and were encamped at *Bonpron*, the which *Calix* vnderstanding, thought he should haue the meanes to worke his enterprize. Thereupon hauing assembled great store of his most faithfull followers, he tooke counsell with them, that this was the meanes to ouerthrow the purposes of *Zachetay*, who would reigne ouer, and bring them vnder his Empire: & that seeing their Prince had bin so badly minded as to do the same of his own mind without calling of them which had interest in that election, that now was the time to assure their libertie, which was in doubt to be lost, & caused also a rumor to be spred of the sicknes of this Prince, that the great *Cham* was old, the greatest part of his forces, far separated from him, forthwith dispatching a Messenger vnto the great *Cham* their Prince, to assure him that they bent not their forces against him, but were his faithful and obedient subiects: but they armed themselves, because they would not be gouerned by the *Parthians*, their ancient enemies. Thus *Calix* thought greatly to trouble him, when he rose in Armes against him, and did thinke that he had already assaulted the Wall which the King of *China* had made against the *Tartarians*. As soone then as the Prince was aduertized of the pretences of *Calix* thus discovered, hee marched one dayes Iourney forward, to the end he might approach vnto *Calix*, and impart the same vnto him, what face soeuer *Calix* set on the matter, he harkened what would become of *Calix*, that hee might likewise make some commotion: there was left with him to command ouer the *Parthians*, the Prince

This was as the *Chinois* report built before, and perhaps now by age ruined, (which may be a cause *Polo* mentions them not) and by this King repayed 100. yeares after *Polo* time. In which space also the *Chinois*, if this story be true, had recovered part of their Empire conquered before by *Cublai*. A kind parting betweene the Father and the Sonne.

Samay made Gouverneur of *Sachetay* in *Tamerlan* absence. *Tamerlan* his Armie marching against the King of *China*.

The conspiracie of *Calix* against *Tamerlan* in his absence.

Good directions
from Tamerlan.

Prince of *Thanaïs*, without whom he could not doe any thing, for that hee led the Auantgard. Thus was the Army deuided in two parts; the King of *China* remayning long before he was aduertized of all this, and thought he had all the forces both of the *Tartarians* and *Parthians* vpon his Armes, so as this was of no small importance to fauour our Affaires: for *Tamerlan* had especially giuen commandement, that the passages which are easily gotten, might as diligently be kept, to the end that the King of *China* should not be aduertized of the tumult. Then *Tamerlan* set forward his Auantgard vnder the leading of *Odmar*: hee promised vnto himselfe shortly a happie successe in his Affaires, and aduertized the Emperour of all: but it came vnto him when he was sicke. And surely it was high time for *Tamerlan* to march forward, or else all had bene reuolted, so leauing his Footmen, he made great Iournies. Now during the time that he had bin aduertized, and made his abode to consult, which was the space of two moneths: *Calix* hauing presented himselfe with a hundred thousand fighting men before *Cambalu*, a very great Citie, and chiefe of the Prouince of *Catayo*, the Inhabitants thereof came out to meete him, and did also receiue him with all the joy that might be.

Brore.

Now whilst our Army marched towards *Caindu*, and from thence vnto *Calatia*, whether our Army went easily, looking for the Forces of his Native Countrey of *Zachetay*, to come and joyne with him: he did not yet forget to send forward daily of our Souldiers towards *Cambalu*, so as they supposed all our Forces to be on the necke of them already, which gaue great terrour vnto the people. *Calix* perceiuing that the people did repent, hee thought best to withdraw himselfe out of *Cambalu*, determining to oppose himselfe against *Tamerlan*, and sent for his power from all places, putting all vpon the euent and hazard of a battell. He drew out of *Cambalu* full fiftie thousand men, as well Burgeses, as Souldiers which were there in Garrison, hauing wonne all the Captaynes which the old Emperour had placed there in Garrison, amounting to the number of thirty thousand men, and him that commanded ouer them, who had consented vnto the reuolt of this great Citie. To make it short, hauing assembled all his Forces, he had fourescore thousand Horse, and a hundred thousand Footmen, the which hee had gathered together from all parts. Our Army then marched with all diligence, in such sort as certayne Scouts which were two thousand Horse, had newes of the Armie of *Calix*, the which came forwards directly towards vs, whereof they caused the Emperour to be certified speedily, who sent thither two thousand Horses more, to the end they should keepe the passage of a Riuer called *Brore*, by the which our victuals were conueyed vnto the Armie, and also for to winne alwayes time, the Prince knowing right well that the motions of Ciuill Warres bee furious at the beginning, and that it is the best to resist them slowly, drawing them alwayes out at length if it be possible. For the people in the end acknowledging their faults, their meanes and money fayling them, and oftentimes victuals also. On the contrary side in a Royall Army none of all this doth happen, where all things are fauourable, and the Souldiers well disciplined, obedience and order beeing wisely obserued. Then had the Emperour the guiding of his owne purposes, for he had receiued commandement from the Emperour his Vncle, to hazard therein all for all, deliuering vp into his hands the safegard of his life and estate, that he might thereby end his dayes in peace, willing him likewise to punish this arrogant fellow and his partakers. By this meanes came forces from all parts vnto *Tamerlan*; but on the contrary part, the Enemies Army was then in his chiefeest force, and began to feele the want of victuals.

Axalla.

Many Christians.

Calix was of the age of fortie, he was a Captayne renowned with the great *Cham*, hee was one of the chiefeest in dignitie and place, and they had alwayes respected him within *Tartarie* as a person most worthy of the Empire, if the glory of *Tamerlan*, and his reputation had not so far excelled. The Armies began to be viewed the one of the other about eight of the clock in the morning, where there were very many skirmishes before they came vnto the mayne Battayle (according to the fights of these Nations) it was a great Plaine wherein they met at that time, with like aduantage on eyther part; *Odmar* led the Auantgard, wherein there was fortie thousand Horse, and threescore thousand Foot-men; he made three Squadrons, whereof hee set forward one before him that began the Battayle. *Tamerlan* marched in the same order, but his Squadrons were much stronger, the Foot-men both of the Auantgard and of the Battayle were on the right and left wings. *Tamerlan* had drawne out sixe thousand *Parthian* Horse, and two thousand *Tartarian* for the Arier-ward, and had committed the charge thereof vnto a faithfull Seruant of his called *Axalla* (a *Genuois* borne) a man of great iudgement, his vnderstanding being good and quicke, and a Captayne in great estimation amongst the Souldiers, although hee worshipped God in another manner then wee did, and was a Christian. And hee had many of them with him, whom he caused to come from the *Georgians*, and from *Pont Euxin*, who fought with great agilitie; this day did hee shew his great fidelitie and courage vnto his Prince. *Calix* on the other-side, who was a well spoken man, was encouraging his Souldiers to fauour his fortune, and the libertie of his Nation: he had diuided his troupes into three mayne Battayles onely, his Foot-men vpon the right hand, his owne person was in the midst of the mayne Battayle, with many Foot-men which compassed him round about (according as wee vse to fight.)

In

In the end, valiantly fighting, he fell into *Axallas* hands, which with one voyce he proclaymed through all his Campe, which ouerthrew the courage of all his Souldiers. Hee was kept vntill the next day, and was iudged by all the Counsell worthy of punishment: whereupon *Tamerlan* caused his head to bee smitten off, the which hee sent to bee presented vnto the Inhabitants of *Cambalu*: he caused the like to be done vnto all the chiefe Leaders, not for crueltie, but for necessity, knowing very well, that the meanes to cut off the Foot of ciuill warres, is to punish the Heads of the same, for they be *Hydras* which grow vp too fast.

§. II.

10 Cataio, Cambalu; Tamerlan's expedition into China, entering the Wall, conquering the King, and disposing of the Countrey, and returne to Cataio.

After this the Armie marched into the Kingdome of *Cataio*, a Countrey rich in grasse, and in all kinds of pastures, abounding with great quantitie of Beasts, and People, which knew not what warre meant. The Prince gaue commandement that these people should not be accounted as Enemies, but his good Subjects, that hee would vse

all the Cities well, as *Cangi*, *Sochgi*, *Gonza*, *Tagni*, *Togara*, *Congu*, which had reuolted, and were come to sue for pardon at his hands, in humbling themselves before him; the which he granted vnto them, enjoying them onely to prouide sufficient victuals for his Armie: which was of no small importance for the appeasing of others, who had put all their hope in extremitie, which is in losing their owne liues to make others doe the like: and especially the Inhabitants of *Cambalu* had taken this resolution: but being informed of the Emperours clemency, changed their opinions. In the meane while our Armie daily approched, and at such time as we came neerest, the more did the feare of all the Citie increase, insomuch as the Prince was aduertised daily from those which fauoured his side, of all things within the Citie, and he was assured that every one determined to obey the Conqueror, and to doe whatsoeuer he commanded. The which being knowne vnto the Prince, he left all his Armie at *Gonza*, and himselfe went directly vnto the Citie of *Cambalu*, where all things were made quiet, by the meanes of thirtie thousand Souldiers, being the ordinarie Garrison, whom hee caused to enter thereinto before him, and two houres after entred into the same himselfe, being receiued with great magnificence, not yeelding as yet to pronounce the word of pardon, referring all vnto the Emperour, and to the ordinarie course of Iustice. He stayed for the returne of one of his Favourites, whom he had sent vnto the Emperour, to carry him newes of the victorie, and of the death of *Calix*, and that the chiefe of this Faction remayned prisoners with him; also to know what Iustice the Emperour would appoint to bee inflicted on those Citizens, which were the first beginners of the reuolt of this Citie: for the Prince being desirous to be esteemed mercifull, and to win loue within this great Citie, would not execute justice of himselfe, nor in his owne name, but by the Emperour his Vncle, whom hee did gratifie herein; leauing the authoritie wholly vnto himselfe, and by this means hee was not esteemed cruell. Thus the Prince after hee had remayned here eight dayes, departed. He was not many dayes journey from the Citie before he receiued tydings, how the great *Chan* his Vncle, willed that justice should bee executed on them which were the first Mouers of this reuolt; the which was executed accordingly in the name of the Emperour, and by his speciall ministers; in such sort, that as the people accused the crueltie of the Emperour, they commended the mercy of *Tamerlan*. Thus was this warre brought vnto an end, to the great honour and reputation of *Tamerlan*.

The ordinarie
Garrison at
Cambalu of
30000. Souldiers.

As soone as our Prince was returned vnto his Army where hee found *Odmar*, who there attended his coming, hee was receiued of his Souldiers, and with a loud voyce called by all his Captaines and Souldiers; Most great Emperour and most victorious, as they are accustomed to doe amongst the *Tartarians*. The Prince after he had long discoursed with his Captaines both of the beautie and greatnesse of the Citie of *Cambalu*, hee arriued at his Tent, where after hee had declared vnto *Odmar* in what sort all things had passed at *Cambalu*: he asked his aduice, whether hee should goe and visite the Emperour his Vncle. *Odmar* well perceiued that the Prince desired it, and called vnto his remembrance the honour which hee had receiued when hee was at *Quinzai*, and that hee would haue bene very willing to spend the Winter with the Emperesse, staying for the Spring for to returne vnto the enterprise of *China*, with a long speech dissuaded him. The Emperour answered him, that he had euer knowne his fidelitie and loue, and that the cause of his sadnesse was, for that hee did not find in himselfe abilitie to recompence the same; and that when he thought to giue himselfe some ease, then was the time hee must in stead of the delicacies and pleasures of *Quinzai*, make the Desarts of *Cipribit* the resting place from the trauailes of his new victorie: that it was ended, and his purposes determined: I haue also heard the Prince say, that *Odmar* did not speake vnto him like an earthly but diuine man, and that he verily beleueed that God by his meanes did call him back from some misse-hap which would haue light vpon him, to make his glorie increase the more. Now, the rumour was already

forward a-
gainst the
King of China.

spread ouer all, that the Princes determination was to goe and visit the Emperour his Vncle, the which tickled euery man with desire to returne into his Countrey, hoping to inioy the sweetnesse of his native soyle. When as commandement was giuen for a generall reuiue of the whole Armie: where the Emperour spake vnto his Souldiers in this manner: *Wee haue begonne (my faithfull Souldiers) an enterprize to goe and assault the King of China, who haib of late repulsed euen beyond the Mountaynes the Tartarian name; but wee were hindered to our great grieve by the foolish rashnesse of Calix, and were driuen to turne the bridle for to punish him, wherein you haue all assisted mee. It grieveth mee that I cannot as well bragge of the fresh spoyle of a stranger, as I may vaunt (by the meanes of your weapons) of those our unfaithfull Citizens; and in times past with your owne selues making tryall of my first Armes against the boldnesse of the fierce Moscouite, although for this last ciuill victorie I am further indebted vnto you, for your greater endeouour, and the hazarding of your persons being much greater, so were they our owne people, who would not acknowledge vs, whereof I cannot speake without shedding of teares, desiring rather to burie such a victorie, what glorie and honour soeuer wee haue gotten thereby. Neither doe I recount these things vnto you, but for to manifest that I forget not your faithfulness, and the great trauaile you haue endured with mee. Wee must not therefore bee wearie, but must turne our weapons against those which thinke that wee are greatly troubled, whereas wee are victorious. Wee haue left our Companions, who haue temporized to heare the euent and successe of our affaires, all our munitions bee there; wee must in that place (my Souldiers and friendly Followers) passe ouer the rest of Winter; our Companions looke for vs. The Enemy is secure and looketh not for vs at this season of the yeere: for hee perceiueth that our Armie which is there is not sufficient for offence, but onely for defence. You shall receiue double pay, the better to furnish you against the iniurie of cold: and as wee shall bee clothed with double garments, I hope wee shall bee also apparelled with double glorie. Let vs march on merrily, I my selfe will goe with you, and bee companion of your glorie. After hee had thus spoken vnto his Souldiers, they all cryed; One God in Heauen, and one Emperour on the Earth: and bowing downe all their heads in token of humilitie, they shewed how agreeable they were to obey that which he commanded.*

The crye of the
Souldiers vpon
the Emperours
Oration.

Thus euery one returned into his Tent, where they abode yet eight dayes more. The Prince sent back againe *Zamai* vnto *Sachetay* with some five and twentie thousand Horse, and fiftie thousand Foot-men, for the safetie of his estate in those parts. Thus after prayers were said, all the Armie being assembled together in the presence of the Prince (according to the custome of our Emperours) our Armie began to march forward. Hee forgot not likewise to dispatch one vnto the Emperour his Vncle, to giue him vnderstanding of all this resolution, the which hee very well liked of. The Prince by the same Messenger did beseech him, to send vnto him in the Spring of the yeere some fiftie thousand men to repayre his Armie, and certayne money also for the payment of his men of Warre, which hee granted him. Moreouer, the conducting of good store of warlike munition, and plentie of victuals for to renew ours: for this warre was principally enterprised for the profit and greatnesse of the *Tartarians*, and for the importance which the losse of the Lordships of *Paguin* and *Quifu* was vnto them, whereby the King of *China* had greatly strengthened and assured his estate, in so much as hee might at his pleasure enter vpon the *Tartarians*, and the *Tartarians* could not enterprize against him without great forces, for that hee had caused a wall to bee made betweene the spaces of the Mountaynes, which was fortie leagues long, so as they were defended hereby from the ordinarie incursions, the which continually did greatly enrich them, because they brought much Cattell through the same, wherein the Countrey of *China* doth greatly abound, by reason it is situated in a temperate ayre, being neither too hot nor cold. This was the cause that made the Emperour his Vncle to desire this warre; whom our Prince, according to his dutie, would to the vttermost of his power gratifie, as also his new Subiects.

The Prince of
Tbanais gay-
neth a Lord of
the Mountaynes
to doe the Em-
peror seruice.
Vauchefu.

So wee began to march, and in thirtie eight dayes wee arriued at *Cipribit*, the Armie hauing found great discommodities: there had wee newes of *Calibes*, who was very glad to vnderstand how the affaires had passed: hee came to visit the Prince, who shewed vnto him a very good countenance, and gaue him particular vnderstanding of his determination, and vnderstood at large of *Calibes*, all that had passed within the Kingdome of *China*. The next day the Prince mounted on horse-back, and came vnto *Pazanfon*, where the forces commanded by *Calibes* were at that present, the which had often fought with and tryed the forces of the *Chinois*: but found them much inferiour vnto their owne. The Emperour caused a generall reuiue to bee made of all the forces which were vnder *Calibes*, and after he beheld the countenances of these Souldiers throughout all their rankes, he caused them to muster, and to receiue money, euery one crying, *God saue the victorious and invincible Emperour*, according to their custome.

The Prince of *Tbanais* (who commanded the Armie in *Calibes* absence, going to meet *Tamerlan*) with great diligence had marked the Wall, and the places by the which hee might enter by force, and sent many Spyes into the Countrey of *China*, by certayne little wayes that were within the Mountaynes, who aduertised him of all. Hee had also gayned through his courtesie a Lord of the same Mountaynes (called the Lord of *Vauchefu*) who ruled a great Countrey, with whom

whom he had so well profited, that he made him desirous of a new Master, and to submit himselfe vnto the Emperour, receiuing daily great discommoditie by the warres which the *Tartarians* and *Chinois* made: so as he comming to visit the Prince of *Thanais*, hee assured him of his desire to doe the Prince seruice, and to helpe him in the warre against the *Chinois*, the which the Prince of *Thanais* had wisely concealed from *Calibes*. But as soone as the Prince was arriued, he imparted the same vnto him, the which made *Tamerlan* desirous to haue some speech with him, so that as soone as the Prince had receiued commandement from the Emperour, hee sent vnto *Vauchefu* to aduertise him of the Princes arriual, and of the commandement which hee had receiued: whereof the other was very glad, and hauing appointed a day, the Prince tooke his journey (without stirring of the Armie) into the campe of the Prince of *Thanais*, which was neere vnto the River of *Langenne*, whither hee had caused this foresaid Lord to come, who met him there.

- Then the Prince after he had heaped vpon him gifts of faire Horses, rich Furrer, and other rare things, he willed him to vtter that which he had to say vnto him. This Lord spake then in this manner: Know my Lord, that it is but losse of time to thinke, that with your Armes you should bee able to force the Wall, which the *Chinois* haue built against the incursions of your subjects; the Defendants haue too much aduantage therein. I doubt not of your Souldiers stoutnesse and of their courage, I know you haue conquered many Nations with them, and that whatsoever you command them, they will die or doe the same. I know you haue great and wise Captaines with you, that your Person is onely of all the World worthy to command them: but all this will bee but in vaine against the Wall of the *Chinois*, where I assure you there are fiftie thousand men to keepe it, and you cannot stay there so short a time, but there will come thither fiftie thousand more, led by the *Xianxi* who hath such a commandement. The King of China will himselfe march forward also, who will giue you battell with two hundred thousand Horse and as many Footmen. After you haue fought, I beleene that the fortune and valour of your men may obtayne the victorie, the which will cost you deare: but for to shew vnto you how much the reputation and mildnesse of your men hath bound mee vnto them, I will shew you a meanes by the which you may cause fiftie thousand men to enter into the Kingdome of China, whom I my selfe will conduct; and they shall bee on them which keepe the Wall, in a manner as soone as they shall perceiue it. In the meane time you shall cause your men to goe vnto a place that I will tell you, which will bee very discommodious vnto the *Chinois*, by reason of a Mountayneouer against them, which you must cause them to winne: for I assure my selfe, that when they shall perceiue your Souldiers to bee passed, they will lose their courage, and you may easily winne the passage for to fauour those men of yours which shall bee passed over with mee. And for to shew vnto you the affection and fidelitie of that I speake, I will deliuer into your hands an onely Sonne I haue, and two little Daughters with my Wife: I haue also one Brother, who I am assured will follow mee to doe you seruice. The Prince hauing heard this Lord speake, receiued great ioy thereof, hoping that his affaires should happily succede, and this hee kept very secret, for euen the Prince of *Thanais* knew not the meanes that this Lord had, seeing there was onely present the Prince and an Interpreter, and the Prince after hee had thus spoken vnto him, gratifying him with all hee could possibly, this Lord retyred himselfe, accompanied with the Prince of *Thanais*, who conducted him backe againe with all the honour that might bee. So the Emperour returned from thence into his quarter, and the next day after hee had imparted the whole vnto *Odmar*, and heard *Calibes* concerning that which hee had learned of the departing of the King of *China*, and of his preparation, which was great. This enterprize seeming hard vnto him, after due reuerence yeelded vnto the Prince, hee spake vnto him in this manner: Know my Lord, that I am your Slaue for to obey you: but seeing you require mee to giue you an account of all that I know of the estate of the Kingdome of *China*, for that I haue remayned these six moneths vpon the borders by your commandement, to hinder them from passing the same, whereby they might hurt your enterprizes, I can assure firme vnto you, that the King of *China*, who aigneth at this present, is of great reputation, and hath increased the limits of his Kingdome more then any of his Predecessors. His strength consisteth in this Wall opposed against vs, the which hee hath caused to bee made by reason of the ordinarie roades of our Nation. I am of opinion, that there bee betwene fiftie and three-score thousand men at the guard of that Wall, men for the most part trayned vp in the Garrisons of the King of *China*, and his best Souldiers, and I know no good meanes to force this Wall without great hazard and much losse of your men. I haue vnderstood, that towards the Lake *Hogeen* you may finde more easie entrance into the Kingdome: after euery one had declared his opinion, hee said; that hee hoped the great God (the Vnitie, of whom hee would maintayne against such Idolaters) and his iust right should answer the reasons which doe contradict his purpose, and the valiant arme of his Souldiers shall quite ouerthrow whatsoever opposeth it selfe against the same; and concealed from his Souldiers that which hee held as assured to execute it, to the end, the honour of a happy conducting might be ascribed vnto him onely.

Now, our Prince hauing satisfied euery one of the Kings and Lords that did accompany him, hee appointed the meeting place for his Armie to bee at a certayne place, where hee meant to choose

chooſe fiftie thouſand fighting men, and deliuer them vnto the commandement of the Prince of *Thanais*, vnto whom he ioyned the Lord *Axalla* a *Genuois* (for that hee knew him to bee diſcrete) for to accompanie him, commanding him to giue credite vnto him, for his experience and fidelitie. The day appointed being come, the Lord with his brother came to the Emperour, hauing viewed the place againe, and found it to bee forceable and fit to paſſe, aſſuring the Prince once againe of the happy ſucceſſe of their enterpriſe, and the Prince beeing aſſembled with them to conferre together, reſolued in the end, that his perſon with all the army ſhould approach vnto the walles directly ouer againſt *Quagnifou*, in which meane ſpace the fiftie thouſand men ſhould march forwards vnto the place appointed, and where they were aſſured to paſſe, conducted by the *Chinois* Lord, vnder the charge of the Prince of *Thanais* and *Axalla*. The Emperour hauing not failed to deliuer vnto them the beſt ſouldiers of his armie, and hauing ſet downe the order by them to bee obſerued, hee willed that the Lord *Axalla* ſhould leade twentie thouſand of them, and ſhould march the firſt, the reſt led by the Prince of *Thanais*, and that euery one ſhould haue one of thoſe Lords to guide them, that by their meanes the enterpriſe might bee more ſafely directed. So hauing marched ten leagues, they arriued at the paſſage, the which was won, not finding any man there to reſiſt them: and hauing taken a light repaſt, they beganne to march forward other ten leagues which yet remained, where the *Chinois* were, who ſuſpected no ſuch thing, hauing onely an eye vnto them which marched for to force their walles, aſſuring themſelues to haue the maſtry, conſidering their aduantage.

But it fell out much otherwiſe, for euen at the very ſame time the *Chinois* did perceiue the Princes armie to approach vnto their wall, as ſoone did they diſcry *Axalla* with twenty thouſand men, who aduanced forward being followed by the Prince of *Thanais* with thirtie thouſand ſouldiers choſen out of the whole army, who without any communication ſet vpon the *Chinois*, which came preſently vnto them, hauing left a certaine number of their Campe for the guard of the wall: but they were preſently won by the footmen led this day by *Odmar*, who paſſed ouer ſo as the *Chinois* were cut off betweene our Armies. When *Axalla* began the battaile, he ouerthrew them in a manner all, the Prince of *Thanais* not hazarding himſelf therein: there was great riches gotten this day, the King of *China* his Couſin (whom he called King) was taken priſoner: There was a great quantity of gold amongſt them, as well on their armes as on their horſe and furniture: they ſhewed no great ſtoutneſſe. The newes heereof being come vnto the King of *China*, who at that preſent time was at *Quantion*, brought vnto him great aſtoniſhment, for that hee iudged it a thing that could not poſſibly come to paſſe, you might haue ſeene euery one filled with fright, teares and cries, bewailing the loſſe of their friends. The King gathering together ſouldiers from all parts (as the cuſtome is of theſe people) cauſed all the Prieſtes and ſuch as had the charge of holy things to come vnto him, and after exhortations vſed, he (as their head) commanded them to offer ſacrifice vnto their Gods, of whom the Sunne is the principall commanding in heauen (whom they hold opinion to bee the chiefeſt cauſe of their being, accounting it immortall and impaſſible, mouing it ſelfe onely for the benefit of liuing creatures) this did hee command to bee obſerued through out all his Cities; and the ſecond thing was, that euery one able to beare armes ſhould mount on horſebacke, and come vnto the King at *Paguinfou*, whither hee doubted that we would go, becauſe it was one of the neereſt townes vpon the borders.

I haue forgotten to declare that this Lord who had the charge to conduct fiftie thouſand men vnto the frontiers, at ſuch time as they which were there had need thereof, was ſoone in a readineſſe, and came to oppoſe himſelfe againſt the Princes Armie which entred, and being ſkilfull in the wayes of the countrey, troubled much the Armie: for a great number of his men were on horſebacke. The Prince determined to beate downe all the wals, the better to aſſure his returne, as alſo all the fortrefſes which were there vpon all the paſſages, all of them hauing yeelded themſelues after his victorie, ſhewing himſelfe very courteous vnto the people of theſe mountaines, he gaue vnto this Lord a ſmall portion of land, wherein there be ſeuen or eight good townes, *Archij*, *Ymulij*, *Faliquien*, *Fulij*, *Cohenſen*, *Qualij*, *Pulij*, *Quianlu*, who came and deliuered vp their keyes vnto him, being neighbours vnto this Lord, and gaue him the gouernment of the frontier province of *Xianxij*, ſhewing himſelfe to be a Prince of his word, and acknowledging the notable ſeruices the which this Lord had done him. He referred the honouring of his brother vntill he had meanes to doe the ſame: the Prince had receiued newes, how that the King of *China* aſſembled his forces & marched forwards, and that he was there in his owne perſon, & that he ſtrengthened alſo his Cities which are ſufficiently fortified, and vpon theſe doubts hee thought good to haue the aduice of his Captaines, and after ſundry opinions, his reſolution was, to leaue nothing behind him, and to aſſault ſome famous Citie, and take it, by meanes whereof he may nourish his Armie, and ſecondarily call the enemy vnto battell. The which the conqueror ſhould alwaies ſeek, & the defender the leaſt he can hazard the ſame. For that it is a very doubtfull thing to commit themſelues vnto a battell, his dutie being rather to delay, vndermining the conqueror by lengt hand by wearineſſe, and light skirmiſhes, then to fight in open field.

It was concluded, and the aduice of euery one was, to conquer the Countrey by little and little, so as their enterprife was to draw directly vnto *Paguinfon*, which as it was a great Citie, and one of the chiefest, so is it also strongly fortified, and well replenished with people.

Then he dispatched *Odmar* with fourteene thousand Horse, to aduance forward and summon the same, as for to hinder victuals from being conuayed thereinto out of the champaine Countrey: to the end that the Cattell remayning in the fields, should be a meanes to maintayne and nourish his Armie. I had forgotten to tell you, that for the acknowledging of the Lord *Axalla* his seruices, the Prince had made him Captaine generall of all his Foot-men, which was one of the principall honours of the Armie. Hee caused the said Lord *Axalla* to march after *Odmar*, with all the Foot-men, which was very neere a hundred and fifty thousand men, well trayned vp in the warres, and good expert fighters. He marched himselfe immediatly after with all his Horsemen, Artilleries, Engines, and other munitions belonging vnto warre, directly vnto *Paguinfon*. *Odmar* did ride twentie French leagues this day, so as he arriued there contrary to their expectation, looking rather for the King then for the Enemie, and hauing taken much Cattell, wherewith the Countrey greatly aboundeth, he pitched his Tents, leauing the Citie betweene him and vs, and stayed for his footmen, who marched forwards in the meane space, sending continually vnto the warre, for to wearie the Enemie. This endured three or foure dayes, vntill our footmen led by this braue Christian *Genuois*, shewed themselues in the Playne of *Paguinfon*. Then the Citie was summoned to yeeld obedience vnto the Emperour, or else they should receiue the Law of the Conquerour. They made answer, that they were determined to live and die in the seruice of their Prince.

Now you must vnderstand that it was fortie yeeres, or thereabouts, since the Father of the King which reigneth at this present ouer the *Chinois*, had conquered it from the Empire of the *Tartarians*, and hauing driuen out all the Inhabitants, they had planted therein new Colonies, so thorowly, that there were but few of the first remembrance, but only they of the flat Countrey, and small walled Townes, who came from all parts and brought their Keyes, most willingly submitting themselues vnto the obedience of the Prince: so as there was great abundance of victuals within our Armie: and if wee had bene within our owne Countrey, there could not haue come greater store; a thing which made our Prince hope for a happie successe, there being no other difficulty which for the most part can ouerthrow a great Armie as ours was, and withdraw them from their enterprife. And thus the Citie of *Paguinfon* is besieged, and our footmen camped round about within an Arrowes shot of the walls. They within the Citie did vse great endeavour for their defence, and our Prince omitted nothing for their offence.

Axalla hauing viewed a great and strong Suburbe, which was in length almost halfe a league, supposed that those of the Citie kept no watch there: that this must needs bee, for that they would not make him obstinate; he had a determination to winne it in the night, and hauing imparted it vnto the Prince, vpon the first watch all his men were ready, all of them hauing made prouision of Ladders, and of such things as are necessary for winning thereof with hand-bloues, and hauing assaulted it on sundry parts, after the fight had continued two houres, *Axalla* remayned the Conquerour, and cut in pieces eight thousand men at the least which were within the same: the spoyle was great, there were many of *Axalla* his men slayne of one side, which was that by the which they doubted to be assaulted. But on the other side, by the which it was taken, there was scarce any one slayne. The taking of this Suburbe did greatly astonish those of the Citie, who had marked the lustinesse of our men, and beganne to enter into doubt of their safety, which vnto this day they accounted as most assured. Now you must vnderstand that the situation of the Citie was of hard accessse, being seated vpon a Playne, the which was enuironed round about with Mountaines, one of them onely approaching the Citie, which overlooked it on front vpon the North side, where was a Valley by the which they passed, and there did runne a Riuer: on this side was the Suburbe situated which had been taken, so as the meanes to succour the Citie was stopped, our Souldiers keeping the passages of these Mountaines, the which were in the old time the borders of the Kingdome: for *Paguinfon* was once gouerned by the *Tartarians*, which kept it for a defence against the *Chinois*, but had lost the same, and these Mountaines were the limits of *China* against the aforesaid *Tartarians*, who gouerned *Paguinfon* at that time, so as these Mountaines were of hard accessse, and there remayned no other way but on the side of the Suburbe, the which a Riuer compasseth about, running all along the side of a bordering Mountaine, vpon the which wee caused many bridges to be built, for to haue thereby a way for to succour our Souldiers, which kept the passages of the Mountaines on the enemies side.

In this meane time the King of *Chinas* Armie approached which was very great, as they brought vs word daily, the Prince determining to goe in person and meet with the Enemie, accompanied with his principall Hors-men, and to leaue the greatest part of his Foot-men at the siege, whereunto he had a great desire, omitting nothing that might wearie the besieged, who defended themselues couragiously. So the Prince beganne to batter, causing his Engines to approach; as Rammes, and other munitions: insomuch as the Citie was assaulted on two sides ver-

ry courageously. In the end through the valour of *Axalla*, who gaue an assault with twenty thou-
sand of his best Souldiers, he wonne the wall, and lodged there, the Prince hauing so comman-
ded him to doe, to stop the heat of the Souldiers from going any further. Now the Princes pur-
pose was to compound for the Citie, and not to force it, for two reasons. The first was, for that
he feared, the Citie being great and rich, that when the Souldiers should sacke it, the Enemie
who was but thirty leagues from thence, should come vpon them, and by this meanes his Armie
should be found in disorder, also rich Souldiers neuer serue well: The other was, for that hee
would draw out of that Citie which was rich and wealthy, those commodities which were ne-
cessary for the sure accomplishing of his enterprise, seeing it was necessary to haue such a Citie
for to make a Store-house of necessary things for the Armie. Thus although the wall was won, 10
the Enemies wanted not courage yet to defend themselves valiantly, looking for ayde according
to the newes they had receiued, that the Kings Armie marched forward. Whilest these things
were in doing, one of our Engines shooting a bullet, slue the Gouverneur, whereupon they did
resolue for to yeeld themselves vnto the Princes mercy, sauing their liues, and the Souldiers en-
ioying their horse and weapons. The conditions were agreed vpon, and there came out of the
Citie eightene thousand Souldiers, the Inhabitants remayning in a manner all: there were
therein thirtie thousand Souldiers at the beginning: the siege continued two moneths. The
honour of taking the Citie and the happy successe therein was attributed vnto *Axalla*, to whom
was giuen the gouernment of the Citie with the Countrey already conquered. But hee besee-
ched the Prince that it would please him to bestow it vpon some other, and for himselfe hee re- 20
serued the hope of his Master, wherein hee should haue part. This answer did greatly content
the Prince, for hee greatly desired the seruice of *Axalla*. Vpon his refusall this charge was be-
stowed vpon the Prince of *Thanais*, with the Title of Vice-roy. Now, as I haue already told
you, our Prince after hee had giuen such order as was necessary, and aduertised his friends in all
parts, and aboue all the Emperour, he marched forward, hauing contented his Souldiers, and
made a generall muster of his Armie, as well of the horse as footmen, the which hee found to
be diminished of ten thousand men onely. Now, our Prince after he had solemnely called vpon
the Immortall, Inuincible, and Incomprehensible God, and spent one whole day in prayer, wee
enterprised to goe on forward, and to goe directly vnto the Enemie, who was at *Simehu*, with
all his owne forces, and of all his Allies. As soone as he receiued newes that our Armie was pas- 30
sed ouer the Riuer of *Chulifu*, the King of *China* marched directly vnto vs with great magnifi-
cence: there was nothing to bee seene but gold and precious stones in his Armie: hee himselfe
was commonly in a Chariot, wherein there was such a quantitie of gold and rich stones, that
euery part was full of Diamonds, Rubies, and Pearles.

The King of *China* was of the age of three and thirtie yeeres, who for the most part had beene
brought vp in pleasures, and not in militarie exercises, nor vnder the bloudie ensigne of *Mars*,
laden with Iron, boisterous and furious, not with gold, precious stones, and with such kinde
of riches: so as he was very insolent in threatnings, brauadoes, and in defying vnto the battaile.
He often said that we had surprised him, and had not warned him to prepare himselfe, and that
we had stricken him without speaking any word: for this is the custome of the people in those 40
parts, to doe in this manner. Hee had two or three Kings also with him, his Neighbours and
Allies, who marched with the same preparation. The rumour of these riches gaue great courage
to the Souldiers, for they were couetous of iust gayne, as is that gotten by a battaile. So both
our Armies went forward each to approach the other, and there was a Citie yeelded vnto the
Prince called *Tunichenoy*, the which helped our Armie greatly. The next day, to the end wee
might giue occasion vnto the Enemie for to approach neerer, we sent to summon, and at the same
time to take possession of the Citie of *Pannibu*, the which in aduancing forward wee left a little
behinde vs. The King of *China* had put many men thereinto, and it was a Citie sufficiently well
fortified: from *Tiauchenoy* to *Pagunubu* there were ten leagues. He aduanced his Armie within
a league of the Citie *Tiauchenoy*, about noone the next day they had more certaine aduertise- 50
ment of the Enemies comming. The Prince commanded his Armie to take the place for the
battaile, which he had chosin in his iudgement with most aduantage, and hauing set downe vn-
to *Odmar* the order he would haue to be obserued, he desired to see the comming of this Armie:
so sending before him fise or six thousand Horse as Scouts, hee aduanced forward, and *Calibes*
with him. After he had seene this great confused Armie which continually came forward, hee
commanded *Calibes* to retyre himselfe as soone as they drew neere vnto him, and bring vnto
him this great cloud, the which hee hoped soone to disperse. So the Prince returned backe vn-
to his men for to assure them of the battaile: hee caused all his footmen to bee placed all along
by a great Mountayne, so as they had but one head for to doubt. And hee planted great store
of Artillerie for the guard of his footmen. I am of opinion, that the Prince had about six- 60
score thousand footmen, whereof many were armed after the *Christian* manner, and all
they were commanded by sundrie Captaines; but all obeyed *Axalla*, who commanded them
as Generall.

Our Horse-men were in battaile array in a great leuell Playne, hauing the Footmen on the
left

left hand, and on the right was the comming of the Enemie, so as vpon the least disfaour that might happen, hee would retyre to bee assisted by his footmen. Wee had foure score thousand horse: *Calibes* with the *Scythians* were in the Auantguard, and had the commandement of thirtie thousand horse, who should receiue him at such time as he did draw on the Enemie, as he was commanded. It was diuided into three troupes, each one consisting of ten thousand. *Odmar* had also thirtie thousand horse who should assist him. The Prince remayned in the Arier-ward at the one of the wings of his footmen, which held one of his principall forces: his purpose was to suffer the threescore and six thousand horse to maintayne the fight against the *Barbarians*; being led by two good Captaines, and if any of them remayned, the Emperor hoped after of them to haue a good market, by causing his footmen to march forward, and himselfe with whom there abode twentie thousand of the best horse, which were sufficient without hazarding his Person for to giue a new battaile, if so be that any disfaour should happen vnto them: for hee had vnderstood that this was the custome of the Kings of *China*, to enclose themselues within the middest of their Chariots with their footmen, and not to hazard themselues but vpon the extremitie. So the Enemie fayled nothing at all to march directly vnto *Calibes*, and all the Armie marched after following of him and setting vpon him, and hee euen as the *Scythians* are alwayes accustomed to doe, with his six thousand horse in retyring gaue many charges, killing some of them, and they likewise killing some of his men. It was a beautifull fight to see this great Armie march, for it seemed to bee twise as great as ours, therein being an infinite number of armed Chariots, wherein he put his principall trust against the furie of our Souldiers; so many gildings of gold and siluer as well in the trappings of their Horses, as on their Armour, that it glittered, and was of vs all much admired. The Prince who with a troupe of horse did see the Armie march after *Calibes*, commended greatly the manner of casting their men out of the ranks, for to compell this troupe vnto fight, and did see this Armie come in good order, and he tryed with his eye to note the place where the Kings Person was, hauing neere him the *Chinois* Lord to instruct him, who knew well their manner of fighting. Now, they had neither Auantguard nor battaile, but onely an Arier-ward commanded by the King, and inclosed (as I haue said) with his Chariots: the which being shewed vnto him by this Lord, the Prince turned himselfe vnto vs, and in our language said: *Yet must wee this day disperse this cloud here so gilded,*

30 *and the King of China and my selfe must make a partition thereof.*

Now, hauing seene the Enemie sufficiently aduanced, and iudging that he had had seene them march a good league, he thought it not conuenient to suffer them for to take breath, nor for to put themselues againe into their order; he sent vnto *Calibes* for to will him to set forward the fight, and that if those whom he had led with him should be weary, they should come vnto him; but it was not in *Calibes* power to haue this commandement ouer them. For as soone as they heard this word of fighting vttered, they required the first charge, with a young Lord, who commanded ouer them, called *Zioctabanes*, who made appeare vnto the *Chinois* to what end their flight was, charging very stiffely vpon the foremost of the Enemies, the which was an occasion to begin the first fight. And I assure you, there could not be seene a more furious thing, nor any for to fight with more desire to manifest the valour of his Nation, and for to procure honour vnto his Prince. Now, this endured a long houre before the *Chinois* had ouerthrowne *Calibes*. The Prince did see all patiently, saying alwayes, that the great multitude how confused soeuer it were, would carry it away from the order and valour of his Souldiers: you could not yet perceiue any alteration in the Princes countenance, Aduersitie and Prosperitie were so indifferent vnto him. His thirty thousand Horse were all *Scythians*, who obserue not the same order the *Parthians* doe. Now, before the Prince retyred with his men, hee did see the first charge giuen. *Calibes* being wounded, retyred himselfe neere vnto the Prince, hauing with him two thousand horse ioyned together againe, and many more ioyning themselues together neere vnto the Prince, who commanded that they should cure *Calibes*, viewing the place of his wound, hee

40 caused him to bee conducted behind his footmen, and the other which were hurt with him also. Now, *Calibes* was not able to pierce through this Armie, being beaten back; but *Odmar* with almost all the *Parthian* horse-men, did handle them more roughly, for hee ranne cleane thorow them, and returned by one of the right wings of the Armie, where hee fought most valiantly, and hauing beaten them back euen within the Kings Chariots, he thought that he should not doe wisely to goe about to breake such forces.

The King of *China* comming forward, and the horse-men which had beene broken by *Odmar*, ioyning themselues together for his ayde, *Odmar* onely remayning in the battaile sent vnto the Prince for the footmen, and for to set forward the Artillerie, and that hee should assure himselfe of the victorie. The Prince, who had already set forward, kept aloofe off, and sent vnto him fiftie thousand footmen, with a part of the Artillerie, giuing charge thereof vnto *Axalla*, who forthwith set forward, hauing commandement to set vpon the Chariots, and to make an entrance: he set forward the Artillerie before him, the which did greatly astonish the enemies: for the Gouvernours of the horses, belonging to the Kings Chariots, could not hold them; it made also a great spoyle. As soone as he perceined this disorder, hee set forward, and

came to hand-blowes, there were a hundred and fiftie thousand men, as yet about the Kings person. *Axalla* full of courage fought so valiantly, that they neuer beheld any doe more braue-ly. *Odmar* during this fight charged againe the Horsemen, who were retyred vnto the Kings ayde, whom he put to flight. Then the Prince aduanced forward with the rest of his Foot-men, gaue ayde vnto *Axalla*, and came euen vnto the person of the King of *China*, who was as yet enclosed within a second ranke of Chariots with thirty or forty thousand men: and after hee had fought two or three houres, the Horse-men assisting the Foot-men, and they principally whom the Prince had reserued, the King remayned wounded within the power of the Prince, the battaile being wonne, and all the Enemies Campe forced; the fight endured eight houres, and it was euen night, which saued the liues of many of the Enemies. There were slaine two Kings the Allyes of the King of *China*, and one taken Prisoner: there was inestimable riches gotten, as well in golden Vessell as precious stones, and the most rich and faire Chariots that could be seene. 10

The Prince would not see the captiued King vntill the next day, being mounted on Horse-backe, and passing through the Campe of the Battayle for to stay the slaughter, and to ioine together againe his men, to the end the accustomed watch might bee kept, whereof hee gaue the charge vnto *Axalla*; to whom he gaue likewise commandement to keepe the King of *China* within the middest of his Souldiers, hauing bin already dressed of a wound he had receiued in his right arme. It was a strange thing to behold the Enemies Weapons, and the diuersitie of streamers wherewith they were decked, the which seemed vnto vs as far off as beautifull, as the diuersity of colours plentifull. But to say the truth, the multitude was great which this King had, notwithstanding there was much difference betweene their valour and ours: and it is reported, that hee had ranged in Battayle this very day three hundred and fifty thousand men, whereof there were an hundred and fiftie thousand Horse-men, the rest on foot: the greatest part of them were rude and barbarous people, which suffered themselues to bee slaine one vpon another, not marking their aduantage, nor hauing any Warlike knowledge, as our men haue: there were slaine of the Enemies some threescore thousand. Now the next day after the buriall of the dead, the Prince hauing giuen thanks vnto God for his victorie, caused the wounded to bee cured, and amongst the others *Calibes*, who by reason of the vntemperatenesse of the Ayre, rather then by the blow of the wound he had receiued, found himselfe very ill, yet would he not omit his dutie, to com- 30 mand alwaycs his Auant-gard, the which was a great pleasure vnto the Prince, for he alone had Commandement ouer the Emperours Forces, being a *Scythian*, and greatly beloued of his Nation.

Pannibu.

The Prince dispatched away thirty thousand Horse in the pursuit of one of the King of *China* Brothers, who was fled away, hauing ioined together againe some twelue or fiftene thousand Horse. The Prince sent to summon *Pannibu*, the which did yeeld it selfe vnto him: where-vpon our Army approached neere vnto it, for to aduance our selues the further into the Coun-try. Now I forget to declare how the Prince hauing the next day caused his Tents to bee pitched most stately, and his Guards ordered according to his greatnesse, the principall of his Army being also neere his person: for all the night hee had remayned continually on Horse-backe, 40 vntill about two of the clocke, when as they brought him a Tart and his water, for hee neuer dranke Wine; and lay downe on a Carpet where hee passed the rest of the night. I was neere vnto him and neuer left him: but I neuer heard any vaunting or boasting to proceed out of his mouth. Then hee sent a commandement vnto *Axalla* to bring vnto him the imprisoned King: who being come, the Emperour issued out of his Tents, and went to receiue him. This King of *China* came with a very proud and haughtie countenance, and like a couragious man, approaching neere vnto the Emperour, hee demanded of *Axalla* by an Interpreter, which was the Emperour, and being shewed him, hee spake fiercely vnto him after this manner: The Gods whom I worship, being prouoked against my Nation and people, and conspired against my good fortune, haue made mee at this day thy Prisoner: but forasmuch, as it is 50 reported ouer all the World, that *Tamerlan* maketh warre for the honour of his Nation: thou shouldest be contented that thou hast wonne it this glory, that the Lord of the World, the Child of the Sunne, is in thy power, to receiue such Law as it shall please thee to prescribe him. This hee said in a braue manner, and without any other humbling of himselfe. The Emperour on the other-side hauing saluted him very courteously, led him into his Tent.

200. Cities.
A description
of China.
Rhubarbe.

He is surely a great Prince, and which hath had two hundred famous Cities within his Kingdome. There be many Mynes of Gold and Siluer, much Muske, and also of an Herbe which the *Christians* call *Rhubarbe*. There bee in like manner within the Kingdome of *China* fiftene very large Prouinces, the which haue Gouvernours. It is reported that hee hath threescore and tenne Kings wearing Crownes, Tributaries vnto him. We call this Region *China*, the which they in 60 their Language name *Tame*, and the people *Tangis*, the which we call *Chinois*. This Kingdome doth abound in fish, and in great numbers of wild-fowle, by reason of the great abundance of running waters which doe ouerflow the Countrey, the which is reasonable temperate: they abound greatly in Silkes, and the meanest are apparelled therewith, hauing small quantitie of

Tame, or Tamin
and Tamegius.

Wooll

Wooll, and not vsing the same: they haue much Cotton and Linnen in stead thereof. The men doe weare their haire long, the women combe them: they haue as many Wiues as they are able to maintayne. Next vnto the King, there is a Gouvernour Generall whom they call *Tutan*, the which was the Brother vnto the imprisoned King. The Prince hauing assembled his counsell, to the end he might be aduised how he should vse his Prisoners and the rest of the Victory: hee receiued newes by *Odmar*, how that the Kings Brother was arriued at *Quantou*, the which hee had fortified, and that great store of forces did ioyne themselves vnto him. This was the cause that the Prince hauing somewhat rested his forces, commanded two thousand *Parthian* Horse to conuey the Prisoners vnto *Paguinfou*, and from thence after they had made abode there, to passe ouer the Mountaynes, and to remayne at *Burda* (a Citie of olde time faithfull vnto the Emperours of *Schytia*) and there to keepe them faithfully. The purpose and resolution of the Prince was, that it behooued to assault *Quantou*, and to shut vp, if it were possible, the Kings Brother within the same, being one of the principall seates belonging vnto the King of *China*, and a Citie greatly peopled and strong: it was forty leagues from the place where the battayle was fought. But *Odmar* being aduanced thither, would not retyre before he had expresse Commandement from the Prince; who hauing sent thither, pitched his Tents round about the said Citie: hauing summoned many small Cities, the which yeelded themselves wholly vnto the Princes mercy, making great lamentation for their King taken. Notwithstanding, the gentlenesse vsed by the Conquerour made them to take all their losses with patience: and because it was also reported, that he had vsed the King most friendly, and all the Prisoners: the Kings Brother had sent Embassadours to obtayne leaue for to know of the Kings health, and for to see him, the which the Prince did willingly suffer, to the end this other should not declare himselfe King, who would haue brought him more trouble then the other. He attended for the euent of *Quantou*, and had his eye vpon the successe of this siege. Now the Kings Brother hauing receiued newes of the Affaires of the besieged, he determined eyther to succour it, or to fight a Battle, and came straight vnto *Porchio*, and made a bridge of Boats, whereof there be great store in these same Countreyes.

Now being enformed when the halfe part were passed, which was fiftie thousand men good, *Odmar* finding them in very ill order, and nothing at all aduertised of the Enemies nearnesse, gaue the charge, and vterly ouerthrew them: there remayned dead vpon the ground some fiftie thousand men, but it was not without great fight, strengthened with the fauour of water, and a great Marish wherein they were encamped. Notwithstanding, our Foot-men hauing wonne the banke of the Riuer, beganne also to winne the Boats, and to seuer them by the meanes of a great Boat, the which we with diligence caused to runne downe beeing full of artificiall fire, so as at the same very time that they which were within the Boate did draw neere, they retyred out of the same, hauing first kindled the fire within the Boate, the which with a great force rushed against the Bridge of Boats and ouerthrew it, and where it was resisted it did burne. This did greatly astonish them that were passed, to see their retorne cut off. The Kings Brother was not yet passed vnto the other-side of the water, and he which first had gone ouer was the King of *Cauchina*, who was slayne at the first charge, fighting very valiantly, in the fore-front. The Kings Brother did see his men slayne and drowned, and could not remedie the same. This second ouerthrow was of no small importance, although it was but the third part of the Kings Brothers Army, and that there remayned vnto him as yet a hundred thousand fighting men: but there was no great hope that he durst present himselfe before our Army. The newes hereof being reported at *Quantoufou*, they desired to make tryall of the Emperours clemency. *Axalla* dispatched one of his faithfull friends of his Countrey vnto the Prince, to carry vnto him these good newes: which was more welcome vnto the Prince, then the ouerthrow he had giuen vnto the Enemy, and agreed vnto all that *Axalla* demanded, referring all vnto his sufficiency and fidelitic. The Kings Brother hauing sent to demand safety for to treat, the Prince granted so much vnto them, for such as would come vnto him.

In this meane-time *Quantoufou* yeelded it selfe into the hands of *Axalla*, who caused the Garrison to come out of the same, receiued the Inhabitants into the Princes protection, and they which would might remayne therein vnarmed: and he entred therein with the joy of all the Inhabitants, who did determine to receiue the Emperour into the same with all the magnificence that might be. He caused thirty thousand men of War to enter thereinto; vnto whom was money deliuered for to maintayne them there, vntill such time as all the Foot-men should receiue pay for three monethes due vnto them, whereof the Inhabitants of *Quantoufou* did furnish the Prince, to the summe of eight hundred thousand Tentins, the which do amount vnto foure hundred and fifty thousand crownes or therabout. The Prince at this present sent me vnto *Axalla*, whom I found feasting of his Captaines and souldiers, staying for the commandement that I brought vnto him, the which was to remaine within *Quantoufou*, and to cause all his footmen to set forward directly vnto him, the which was done by the Prince, to the end it should strike a greater terror into the minds of the enemies, who seeing all his footmen arriued, he supposed they wold nothing doubt (*Quantoufou* being taken) but that he would march forward, inso much

Odmars left Go-
uernour of
China for Ta-
merlan.

as he hoped this would greatly aduance his Affaires, considering the estate they were in. I retur-
ned from *Quantoufon* vnto the Emperour, hauing seene a beautifull and great Citie well forti-
fied, and wonderfully peopled, and round about it there was a fruitfull Countrey.

Thus the Embassadors being arriued, who were of the Kings chiefest Vassals, *Tamerlan* recei-
ued them with all humanitie, causing his greatnesse to appeare vnto them; and therewithall the
agilitie of his Horsemen, to make them see with their eyes, that it would be the destruction of
the *Chinois* name, if he proceeded any further. So hauing saluted the Emperour with all reue-
rence, they vttered their Embassage vnto him, which was that the Kings Brother had sent them
vnto him to treat for two causes: the one, was for the liberty of their King, the other, for pre-
seruation of their Countrey. The Prince hauing heard them, answered them, that they had rea-
son to trust vnto his mildnesse, and seeing at this present, they desired it, he would yeeld there-
vnto. Thereupon the Prince rose vp, and caused to be said vnto them, that they should deliuer
their offers in writing, and that present answer should bee made thereunto. Thus went they
out of the Princes presence with great joy, and as it were assured of Peace, and to recouer their
former prosperities. The conditions which they offered, were to leaue *Pagunfon*, and all the
Countrey beyond it, with all the Fortresses of the Mountaynes; that they would pay all the
charges of his Army, since the day of answer made vnto his Embassadors; that they would
giue two Millions of Gold, for their King. This being presented vnto the Lord, hee made an-
swer thereunto, which was; that he would keepe that which hee had conquered within the
Countrey, which was his owne justly, seeing his armes had giuen it vnto him; that hee would
haue the River where he was now encamped to be his Frontier, stretched vnto *Hoshioy, Taban-
cezug, Canchio, Lulun*, euen vnto *Pofchio* bordering vpon the Sea; that the King of *China* should
pay vnto him yearely three hundred thousand Crownes, the which should bee deliuered at *Pa-
guinfon*, for acknowledgement of submission vnto the Empire, as well for his Successors as him-
selfe; that they should pay five hundred thousand Crownes in ready money for the charge of the
Army, that the King of *China* should be deliuered, and all the *Chinois* Prisoners should pay ransom
vnto particular men that took them, except those which carried the name of Kings, who should
pay one hundred thousand Crownes for peace with his Armes: that no *Chinois* should
bee kept as slaue, nor sold for such hereafter, being vnder the Princes obedience, that
Traffique and Entercourse of Merchants should be free betweene both the Nations; that the
King of *China* should deliuer his Brother as Prisoner, and two Kings named, with twelue prin-
cipall men of the Countrey for assurance of the peace. They accepted of such conditions of
peace as pleased the Conquerour, hoping that time would bring againe vnto them their ancient
liberty, and that for a time it behooued them to beare with patience the yoke of their bondage.
Now the Prince had sent two thousand Horse, to fetch the King of *China*, to the end that being
at liberty, he might sweare to the peace solemnly, the which he hauing performed at *Quantou-
fon*, whither the Prince caused him for to come, he brought with him vnto *Pagun*, all the pled-
ges, and amongst the rest, the Kings eldest Sonne, and his Brother. The King being departed
for to performe his promise, according to the Treaty by him confirmed, he was received, and as
it were worshipped within his Countrey, with all the joy that might be.

In the meane time the Emperour, after hee had prouided for the assurance of his new con-
quest, he left *Odmars* there to gouerne them, and gaue vnto him an estate of thirty thousand
Horse and fifty thousand Foot-men, to furnish all the Fortresses and strong places, the Prince
hauing led with him many of the new conquered people, desiring to haue them for to dwell
within his Countrey, and to send other Colonies in their places, to assure himselfe the better of
the lightnesse of this people, hauing noted them to bee inclined vnto Nouelties. Hee gaue in
charge vnto *Odmars* to make his principall abode at *Quantoufon*, and to fortifie well the passage:
and also commanded a Fortresse to be made at *Dermio*, the better to strengthen his Borders; and
after he had left him all things necessary, he recommended vnto him the seruices of that Lord,
who had manifested vnto him his great affection. The Emperour hauing well tryed his faith-
fulnesse in his Affaires as they fell out, he carryed with him a Brother of his, vnto whom he gaue
great gifts within *Sachetay*.

Then we turned our faces straight vnto *Cambalu*, hauing aduertized the Great *Cham* of the
happy successe of our Affaires. The Prince remayned in deed King of *China*, holding in his pos-
session, two of the fairest and greatest Cities of all the whole Countrey, hauing an hundred good
leagues thereof vnto himselfe, and many lesser Cities; hauing extended his Borders vnto a River,
by which he might goe vnto the Enemy, but they could not come vnto him without passing o-
uer the same: hauing good meanes to keepe it and with aduantage. Now the Prince desired a-
boue all that the Idols which were within his Conquest should be beaten downe, and comman-
ded the worship of one God, establishing the same after the forme of his owne Countrey, for he
made account that in short time all would bee reduced vnto our customes. Our Army wherein
was much sicknesse, began to march, and on the third day hauing newes of forces which came
towards vs, the Prince sent them a Commandement not to come any further forward, and that
they should march straight vnto *Cambalu*, where the Prince did suppose to finde the Emperour
his

his Vncle, who had set forward towards that place to haue the good hap for to see him, being determined to receiue him at *Cambalu* with magnificence and triumphs, as hee well deserued.

Now I will declare by the way, how *Oamar* being seuered from vs, all the Princes fauour was turned vnto *Axalla*, vnto whom hee committed the whole charge of his Armie, inso much as *Axalla* although he was alwaies in great reputation, notwithstanding the same was much encreased by the Prince at *Quantonsou*, where the Prince did trust him with the Armie, in so weighty an enterprise as that was, and the which he so gloriously atchieued: likewise the manner of entring into the Kingdome of *China*, the intelligences hee had: so as the report of his valour did flie throughout all the Empire. *Calibes* led the Auant-guard, and *Axalla* was in the battell neere vnto the Emperour, who gaue him the chiefeft place, bestowing vpon him two hundred thousand crownes yeerely, for to maintayne his ordinary expences. After certaine dayes journey, wee receiued newes of the Emperours arriuall at *Cambalu*, the Prince hauing left his Armie in a faire Countrey for to winter, where he dismissing many of our Souldiers, wee arriued within foure leagues of *Cambalu*, whither all the Princes of the Emperours Court, came for to receiue him, together with all the principall Inhabitants, for to gratifie our Prince for his happie Voyage. The Prince hauing receiued euery one, according to his wonted curtesie, retayning notwithstanding conuenient Maiestie, hee was beheld to the great contentment of all his Subiects. Hee had with him the Empresse his wife, who had not left him in his Voyage. The next day the Emperour did him so much honour, as to come and meet him, with all the magnificence that might bee. Hee gaue a present vnto the Emperour his Vncle, of all the richest Chariots, and fairest Horses hee had wonne. The Emperour was very desirous to see his daughter: he caused her Chariot to bee vncovered, and caused her to enter into his: but the Prince remayned on Horse-backe, whom the eyes of all the people could not be satisfied with admiring. The Prince presented *Calibes* vnto the Emperour, and making a recitall of his faithfulness, and the endeauour of euery one, hee caused the Emperour to giue vnto him an hundred thousand crownes of encrease vnto his pension. *Axalla* was also presented vnto the Emperour, who being informed of his valour, hee was receiued with all the best fauours that might be, and he gaue vnto him of the reuenues belonging vnto the Empire, an hundred thousand *Tartarins* of gold in a Principalltie, that he might the better declare vnto him how much he esteemed of his fidelitie.

Tamerlan turned his fauour vnto *Axalla*.

200000. crowns of yeerley rent giuen vnto *Axalla* by Tamerlan.

The meeting betwene the great Cam and Tamerlan at the Citie of *Cambalu* in *Cataio*.

Axalla rewarded, by the great Cam for his good seruice and faithfulness.

§. III.

The differences betwixt TAMERLAN and BIAZET the Turke; his returne to Samercand, and expedition against BIAZET; the battell, and vic-torie, his caging of BIAZET, and making him his Foot-stoole.

His ioy and pleasure continued with vs all the Winter, where the Prince hauing receiued aduertisement how *Biazet* Emperour of the *Turkes*, had enterprised to ioyne the Empire of *Greece* vnto his owne, and fully determined to besiege *Constantinople*: the which he vnderstanding, and succour being required of him by the *Greece* Emperour, he dispatched one towards *Biazet*, for to declare vnto him his pleasure herein, and warned him on his behalfe, not to trouble the Emperour *Paleologue* who was his confederate. Now this motion came from Prince *Axalla*, who had wrought this league, being of kinne vnto *Paleologue*, and also thrust forward with desire to maintayne his Religion in *Greece*, where he was borne of the *Gennois* race. Whereunto being answered very proudly, by *Biazet* vnto our Emperour, asking what he had to doe therewith, and that he should content himselfe, with enioying lawes vnto his Subiects, and not vnto others, seeing he was not borne his Subiect. This answer being made, *Axalla* procured to be very ill accepted of the Emperour, and in such sort, that he determined to hinder this enterprise of the *Ottomans*.

A message sent by Tamerlan vnto *Biazet*.

The proud answer of *Biazet*.

Now the Prince had obtayned of the Emperour his Vncle an hundred thousand Foot-men, and fourescore thousand Horse, hoping to haue as many from *Sachetny*, besides the Lords who would accompanie him for to winne glorie, from whom he made account also of fifty thousand men more that they would bring vnto him, besides the other forces. Hee supposed that he had abilitie to deliuer the Empire of *Greece* from the bondage of the *Ottomans*. Thus the Prince departed, leauing the Empresse with the Emperour her father, for to serue him as a comfort of his age: it was not without a hard farewell of the Emperours part towards his Nephew; but more grieuous on the Princes part towards his wife, who had neuer left him since the time they were married: but nothing with-held our Prince, where there was either glorie, or meanes to encrease his reputation, and profit the Common-wealth: saying often, that he was borne to this end, and that he must take in these exercises his principall delights: for euery other thing wherein he did exercise himselfe was but borrowed, being appointed and called of God to punish the

pride of Tyrants. Neither will I here omit a dreame, which our Prince had the night before hee departed from *Cambalu*, which was, that he did see as hee thought, a great multitude of reue-
rent men, who put forth their hands vnto him, requiring his succour against the violence of cer-
taine Tyrants, who did afflict them with sundry kinds of torments: he said, that he did neuer see
more reuerent countenances, & that some of them were apparelled in white, and others in cloth
of gold, some hauing as it were Crowns of gold vpon their heads, and it seemed vnto the Prince,
that he gaue them his hand, and lift them very high. This dreame he recited vs the next morning,
but no body was able to giue him the interpretation thereof, & himselfe thought no more of it.

The Prince was accompanied also with *Calibes*, & he commanded the Prince of *Tanais*, to take
vpon him the state of Colonell of the footmen, which *Axalla* had left: vnto whom he gaue the
charge of Lieutenant generall within his Armie, with commandement to leade his Avant-guard,
and *Calibes* the Arere-ward, being accompanied with farre greater forces then euer he had in any
of his Armies: for they came vnto him from all parts. The *Chinois* Lord was licenced by *Odmir*
to goe with 20000. men of the subiects newly conquered, being desirous to shew himselfe vnto
the Emperour, as also for to learne our manners and fashions. The Prince tooke his Voyage di-
rectly vnto *Samerland*, the place of his birth, three yeeres being past since hee had bene there.
Zamay came to meet him, and I verily beleeeue, a million of men, blessing and praying him in
all manner of songs: All the Princes of the Countrey also ranne to visite him; he abode there a
moneth. *Axalla* in this meane time was already at the meeting place at *Ocera*, who prepared
all things, looking for the Princes commandement for to goe vnto him, aduertising him often of
the doings of *Baiazet*.

We departed from *Samerland*, for to goe vnto *Ozara*, where was the meeting place for all the
Princes troupes: and hauing in that place taken aduice for his journey, that is to say, for to know
whether should be most expedient and fauorable, either to goe by the coasts of *Moscouie* directly
vnto *Capha*, or rather on the other side of the Sea *Bachu* to passe by the skirts of *Persia*. It was
resolved in the end, after sundry opinions, although the way were the longer, to passe vnto *Capha*
for to come vnto *Trebisonda*, and to the *Georgians*, and from thence to enter into the limits of the
Ottomans. Then our Armie after the accustomed ceremonies & prayers made vnto God, wherein
our Emperour hoped to finde his principall succours, we drew straight vnto *Maranis*, where the
Armie abode three dayes, looking for the forces which *Odmir* did send, whereof they receiued
newes. There did the Emperour cause all his Armie to be payd, and a generall muster was made.
He had newes also there of the forces that the *Moscouite* did send vnto him: he likewise caused
an infinite quantitie of victuals, and the most part of his furniture to be conuayed by the Sea of
Bachu, there being some twentie leagues where was want of water and victuals, through the
which our Armie must needs passe, causing all things necessary to be carried by water, the which
was a great commoditie vnto vs: and there was a commandement giuen at all the shoares of the
Sea, that they should bring all the vessels for to carrie the munition of the Armie: so as this fore-
fight did greatly ease our Armie. The Prince went continually coasting the Sea-shoare, passing
away his time in hunting, and his Armie came not neere him by ten leagues, except such as came
to seeke necessaries for the Armie, the which did extend it selfe some twenty leagues, it was so
great. The Prince abode at *Sarasich* during the time his Army passed the Riter of *Edel* at *Me-
cher*, and at two or three other Bridges, the which they had caused to bee made; there had hee
ceertaine newes how *Baiazet* marched vnto the siege of *Constantinople*, hauing reduced vnto his
obedience all *Bythinia*, and *Bursia* a very noble Citie, the which hee caused to bee fortified, and
diuers other Cities, vsing all the cruelties that might be, insomuch as all the adioyning Prouin-
ces yeelded themselves his tributaries: amongst the rest the noble Citie of *Capha*: the Citie
was by the Prince giuen vnto *Axalla* for to dispose of the same: which hee did, going thither
to see his kins-folke, and to take such order there, as he thought was for the preservation of the
Citie, as one not vngratefull vnto his Countrey: he rather placed his hope in this little shoare
of *Mar Maiore*, then in the limits of *Scythia* and *China*, and for to succeed after his Master vnto
all his great conquests, for that he had all the Souldiers at his commandement, and great credit
amongst all the people ouer whom his Prince commanded. *Baiazet* hauing a very great and
mightie Armie, neither beleeeued, nor once thought that wee would come vpon him, so excee-
ding barbarous was he, that he would not indure any man so much as to speake onely vnto him
of our Armie, as despising it, he was so proud: and there he caused all the bordering people pub-
licly to bee forbidden, to make any vowes and prayers for our prosperitie. Iustice raigned so
amongst vs, insomuch as if a Souldier had taken but an Apple, he was put to death, and this was
seuerely obserued ouer all, a thing vsuall, and especially in this Journey, the which was the one-
ly cause of ouerthrowing the tyrannie of the *Ottomans*, and of this proud *Baiazet*. So we ar-
riued at *Bachichiche*, where the Armie refreshed it selfe for the space of eight dayes. Vnto this
place came the Embassadors of *Guines*, vnto the Emperour, whom the Prince did greatly reue-
rence for his holinesse. The Emperour after he had caused generall prayers to be published, *Tamer-
lans* Armie departed from *Bachichiche*, and they reckoned that there was in our Armie, three hun-
dred thousand Horse-men, and five hundred thousand Foot-men, of all kinds of Nations. Our
Armie

Armie came vnto *Garga*, where it passed the River *Euphrates*, the Auant-guard at *Chinserig*; and the generall meeting of the Armie was appointed to bee at *Gianich*, the which did yeeld it selfe: and there had we newes that *Baiazet* his Armie was neere vnto vs, within some thirty leagues, which caused vs to march more close. All the Cities yeelded; the Emperour receiuing them graciously, and those which refused obedience, were cruelly punished, especially such Inhabitants as were *Turkes*, but the *Christians* set in full libertie, vnder the name of the *Greeke* Emperour *Emanuel*, whom the Emperour would wholly gratifie; *Axalla* hauing receiued this commandement from the Prince: so hee caused them to sweare fidelitie vnto *Emanuel*. The great Armie of *Baiazet* thought to haue surpris'd our men within *Sennas* (which they had taken) but as soone as they drew neere, our men set it on fire, and the greatest part retyring, there remayned some hundred Horse to performe the same, who retyred themselves in very great disorder. Now, the Prince of *Circas* had diuided his men into two troupes, and giuen commandement vnto the first troupe, that as soone as they perceiued the Enemies to pursue the hundred Horse, they should receiue them, and retyre ioyntly together. Now, hee had the rest of his power in a valley neere vnto a Wood, and hauing suffered some two thousand of the Enemies Horse. *Turkes* Auant-currers to passe by him, he charged them behind, and fought with them; they not fighting but fleeing as soone as they did see themselves pressed: many were slayne, and many were taken prisoners. This was the first time wee fought, and carried away the victorie: all the prisoners were sent vnto the Prince, amongst the rest the *Bassa* of *Natolia*, who led this troupe. The next day *Baiazet* his Armie drew neere vnto the sight of ours, the which marched two leagues: and wee encamped within a league the one of the other. All the night long you might haue heard such noyse of Horses, as it seemed the heauens were full of voyces, the aire did so resound, and euery one was desirous to haue the night passed; for to come each one vnto the triall of his valour. Vnto the *Scythian* Nation, the which is desirous of goods, they propounded the great riches they should get by the victorie ouer the *Ottomans*. Vnto the *Parthian* Nation ambitious of rule, the honour and glorie of the Nation, being Conquerours of them, who onely were able to take from them the Empire of *Asia*. The *Christians* who made the fourth part thereof, assured themselves to conquer their greatest Enemy. Behold, now euery one spake during the night time, according to his humour. The Prince this night went through his Campe hearing all this, and was very glad to see the hope that euery one of his Souldiers did conceiue already of the victorie; and I being neere him, he did me the honour to tell me, that at the time he fought the battell against the *Moscouites*, he did heare all the night long all kindes of songs, the which resounded in his Campe, seeing in a manner no bodie sleepe: I hoped then (said hee) to haue some good hap, and I trust to receiue the like now. Now after the second watch the Prince returned vnto his lodging, and casting himselfe vpon a Carpet, hee meant to sleepe: but the desire of day would not suffer him; he then commanded me to giue him a booke, wherein he did reade: therein was contayned the liues of his Father and Grandfather, and of other valiant Knights, the which he did ordinarily reade: he called me, hauing light vpon (in reading) the discourse of a battell that his Grandfather had lost against the *Persians*, the which he had thought to haue gotten (very vndiscreetly) hauing assaulted his Enemy, many aduantages being propounded vnto him, whereof he might haue made good vse, all which he neglected, trusting vnto his owne valour and that of his Souldiers. And hauing ended his speech, he commanded mee to reade the same before him, and said vnto me, I alwaies reade this before I beginne a battell, to the end I should not so much trust vnto the Lions skin, wherein I wrap my arme, that I should not serue my selfe with the Foxes, to wrap therewith my head: for thus (said he) my Grandfather was in a place of aduantage, and he went out of it to seeke his Enemy, who was lodged strongly, and whatsoeuer his men said to him, hee went on headlong, shutting his eares against all the counsell and aduise of his seruants.

Seeing the *Turkish* Foot-men march, whom they doe call *Ianizaries*, the which were placed in the midst, and vpon the two fronts, two great squadrons of Horse-men, the which seemed to be thirty thousand Horse, and another which aduanced and couered the battalion of the *Ianizaries*: Hee thought this order to be very good, and hard to breake, and turning himselfe vnto *Axalla*, who was neere vnto him, he said, I had thought to haue fought on foot, but it behooueth me this day to fight on horsebacke, for to giue courage vnto my Souldiers to open the great battalion: and my will is, that they come forward vnto mee as soone as they may: for I will aduance forward an hundred thousand Foot-men, fifty thousand vpon each of my two wings, and in the midst of them forty thousand of my best Horse. My pleasure is, that after they haue tryed the force of those men, that they come vnto my Auant-guard, of whom I will dispose (and fifty thousand Horse more) in three bodies, whom thou shalt command, the which I will assist with fourescore thousand Horse, wherein shall be mine owne person, hauing an hundred thousand Foot-men behind me, who shall march in two troupes; and for my Arere-ward forty thousand Horse, and fifty thousand Foot-men, who shall not march but vnto my ayde. I will make choise of ten thousand of the best Horse, whom I will send into euery part where I shall thinke needfull within my Armie, for to impart my commandements.ouer the first forty thousand

thousand the Prince *Ciarcian* commanded: ouer the foremost footmen was the Lord *Synopes*, a *Genuois*, kinsman vnto *Axalla*, and he which was his Lieutenant ouer the footmen, a Captaine of great estimation. That ouer which the Prince *Axalla* commanded, consisted of fise squadrons of horsemen. *Bajazet* his Armie seemed faire and great, which was aduanced continually forward towards vs, who stirred not one whit from the place of the battaile. There were many light horsemen, as well *Scythians*, *Parthians*, as *Moscouites*, who left their rankes, and shot Arrowes, and brake Lances betweene the two Armies. There was a Spie who brought word that *Bajazet* was on foot in the middest of his *Ianzaries*, where he meant to fight, that hee did not forget to mount on horse-back, giuing order ouer all for the wants of his Armie: but purposed to fight in the middest of those *Ianzaries*, who are a number of trusty men, brought vp in exercises from 10 their youth to all manner of warfare, and chosen out of al Nations, the fairest and strongest men, so as they are inuincible. By this bringing vp the which they haue had together, they doe fight with a great force and courage for their Prince and Lord, who being in the middest of them, they are as in a halfe circle within the Armie. Now, they were thirty thousand men in this order, wherein *Bajazet* put his principall hope: he had many other footmen, but gathered together of all sorts. His battaile of horse was very faire, amounting vnto the number of an hundred and fortie thousand horse, well exercised in all manner of fights. The *Soldan* of *Egypt* hauing ayded him with thirty thousand *Mammolues*, very good horse-men, and with thirty thousand footmen. Their Armie in that order seemed almost as great as ours: for they were not so knit together as we were, our forces being directly one after the other, and theirs all in a front.

So the Enemies Armie aduanced forward continually with an infinite number of cryes, and ours was in great silence. After that common prayer was ended, the Emperour himselfe aduanced continually forward, beholding the first charge giuen, and caused *Axalla* to set forward after he returned into his order, continually exhorting his men before hee left them. There could not be seene a more furious charge giuen, then was performed by the *Ottomans* vpon the Prince of *Ciarcian*, who had commandement not to fight before they came vnto him: there could not haue beene chosen a fairer Playne, and where the skilfull choise of the place was of lesse aduantage for the one then for the other, but that wee had the Riuer on our left hand, the which was some aduantage for the Emperour, hauing giuen commandement, that in any case they should not lose the same, and that the Enemies, whatsoeuer came thereof, should not win it: this hee 30 did for to haue the aduantage of the hand in fight. The Emperour, who aboue all Maximes of warre, did vse to deale in such manner, that the Enemy might bee the first Assaulter; hee had straightly commanded them which were appointed for the first charge, to suffer the Enemy for to giue the on-set. Now (as I haue already declared) this young Prince of *Ciarcian* with his forty thousand horse was almost wholly ouerthrowne, hauing fought as much as hee could, but hee entred euen into the middest of the *Ianzaries*, where the person of *Bajazet* was, putting them in disorder, where he was slaine. About this time *Axalla* set vpon them with the Auantguard, where as he was not in any such danger; for hauing surprised one of the enemies wings, hee cut it all in pieces, and his footmen comming to ioyne with him, as they had beene commanded, hee faced the Battalion of the *Ianzaries*.

The Prince seeing the charge *Axalla* had vpon his arme, sent ten thousand horse from his battaile for to succour him, and knit together the mayne battaile of *Axalla*, and to giue once againe a charge vpon another Battalion of footmen, the which did shew it selfe, and came to ioyne with and strengthen that of the *Ianzaries*, who behaued themselues valiantly for the safetie of their Prince. This fight continued one houre, and yet you could not haue seene any scattered, fighting resolutely the one against the other. You might haue seene the Mountaynes of horses rush one against another, the men die, crie, lament, and threaten at one very time. The Prince had patience to see this fight ended, and when hee did perceiue that his men did giue place, hee sent ten thousand of his Horse to ioyne againe with the ten thousand appointed for the A-rierward, and commanded them to assist him, at such time as hee should haue need thereof. At 40 this very time the Emperour chargeth, and made them giue him roome, causing the footmen to assault, ouer whom the Prince of *Thanaïs* commanded; who gaue a furious on-set vpon the Battalion of the *Ianzaries*, wherein was yet the person of *Bajazet*, who had sustayned a great burthen. But the multitude, and not valour, did preuaile; for as much as might bee done in fight, was by the *Ianzaries* performed, for to preserue the person of their Prince. But in the end the Horse-men, wherein was the Emperours person, gaue a new charge, and his Auantguard was wholly knit againe vnto him, hee renewed another forcing, and was fully victorious. *Bajazet* hauing retyred on horse-back out of the troupe of *Ianzaries* wounded, fell alique into the hands of *Axalla*, vnto whom hee yeelded himselfe, supposing it had beene *Tamerlan*: then *Axalla* seeing him so followed (being for a time not knowne but for some great 60 Lord of the *Ottomans*) twentie thousand horse did not fight at all, but onely in pursuing the victorie, and they made a great slaughter. The Prince had his horse slaine vnder him with the blow of a Lance, but he was soone remounted againe on horse-back. This day the wisdome of the Emperour gaue the victorie vnto his Souldiers: for the iudgment which he had in tiring of the strong forces

forces of the *Ottomans*, was the safeguard of his. For if all had gone vnto the battaile in one front, surely, the multitude had put it selfe into a confusion: but this manner of aiding his men made euerie one profitable. The Emperour iudging (like a great Captaine) of the need that euerie one of his souldiers had, so that this manner of proceeding was the getting of the victory. They accounted threescore thousand men slaine of the *Ottomans*, and twentie thousand of ours. The Prince of *Tirzis* was slaine, as I haue said: the head of the *Georgians* slaine, *Calibes* was verie sorrie hee had so easie a reckoning in his Arrier-ward; being very couragious, and a gentle Knight: the Despote of *Serua* was taken prisoner, who did accompanie *Baiazet*, and was a Christian: they gaue him this day of battaile much reputation. The Emperour gaue vnto him very good entertainment, reproouing him, for that hee did accompanie *Baiazet* against him, who did come in fauour of his Emperour. Hee answered him, that it was not according to his dutie, but the prosperitie of *Baiazet*, vnto whom it seemed, that all the world did bend for to subiect it selfe vnto him, and that his safetie had caused him to set forward. The Emperour presently thereupon gaue him leaue to depart at his pleasure. Hee tooke care to get into his hands *Baiazet* his children: hee gaue commandement that *Baiazet* should bee cured, and after brought before him: who at such time as hee was there neuer made any shew of humilitie. The Emperour saying vnto him, that it lay in him to cause him to lose his life, he answered: Do it, that losse shall be my happinesse. And demanding of him what made him so rash, for to enterprise to bring into subiection so noble a Prince as was the Emperour of the *Greekes*. Hee answered him, the desire of glorie and rule. Wherefore dost thou (said the Emperour vnto him) vse so great crueltie towards men, so farre forth that neither thou nor thine doe pardon either sex or age? This doe I (answered hee) to giue the greater terrour to my enemies. Then said the Emperour, so shalt thou receiue the like reward: and causing him to bee conueyed againe out of his presence, hee turned vnto his followers, and said, behold a proud and fierce countenance, hee deserueth to be punished with crueltie, and it is necessarie that hee bee made an exemplarie punishment to all the cruell of the world, of the iust wrath of God against them. I acknowledge that God hath this day deliuered into my hands a great enemy, wee must giue thanks vnto God for the same: the which was performed, being yet day: for the battaile was wonne at foure of the clocke, and there was as yet five houres of day-light. The children of *Baiazet* were brought before him: hee caused them to bee vsed curteously, and as the children of an Emperour. The next day hee commanded the dead to bee buried: they found the Prince of *Tirzis* dead in the midst of the *Ianizaries*, where he remained enclosed. The Emperour did greatly lament this young Prince, who was his kinsman, and would haue beene one day worthie for to doe him great seruice. In that battaile there died manie Captaines, & almost the chiefe *Ottomans*. This was a great Battaille, the which was fought from seuen vnto foure of the clocke, in such sort that they knew not vnto whom the victorie did incline. Our Armie stayed vntill the next day, euerie one causing his friends to bee buried. The Prince of *Tirzis* was emblamed, and conueyed with two thousand horse vnto *Samarcand* vntill the Emperour returned. All the other dead bodies were buried at *Sanas* with all the honour that might be. *Axalla* was much grieved for his kinsman, because hee was verie well beloued of the Prince: his charge was giuen vnto one of his brethren who was verie famous; in fighting this same day, we might iudge the euent of the matters of the world. Behold this Emperour *Baiazet*, who was, as hee thought, superiour to fortune, which in an instant found himselfe and his estate by one battaile onely ouerthrowne euen vnto the lowest place, and at such time as hee thought least thereof. Hee vsed to say, that hee was iustly punished; for despising the multitude we had, for the assurance that hee had in the valour of his horsemen, and especially of his *Ianizaries*. Hee was three dayes (as they report) before he could bee pacified, as a desperate man, seeking after death, and calling for it. The Emperour did not vse him at all curteously, but caused small account to bee made of him: and for to manifest that he knew how to punish the proud; vpon festiuall dayes, when as hee mounted on horseback, they brought this proud man vnto him, and he serued him in stead of a foot-stoole: this did he for to manifest the folly and arrogancie of men, and how iustly God had humbled him. The next day the Prince marched directly towards *Bursia*, whither all the remainder of *Baiazet* his Armie was retired, with the *Bassa Mustapha*. All the countrie yeelded vnto vs, and the Prince caused all the holdes and fortresses to bee ouerthrowne and destroyed, and punished all those which were so euill aduised as to stay vntill they were besieged. I had forgotten to declare, how hee caused the Prince of *Tirzis* bodie to bee accompanied with diuers prisoners chained and tied together, whom hee did send vnto *Samarcand*, the which the Prince had determined to make great, for a perpetuall memorie of his greatnesse. Euen so had hee greatly peopled with people of *China*, which had beene taken in the Battailles, and of those likewise which were taken out of the two great Cities, *Pagunfon*, and *Quantonfon*. Now this battaile did bring great astonishment vnto all the countries possessed by *Baiazet*, and nobodie resisted vs, euen vnto *Bursia*, whither this Armie was fled, and therein were also two sonnes of *Baiazet* verie young. *Axalla* being alwaies aduanced forward before

Vncle.*

our Armie, with fortie thousand Horſe, and an hundred thousand Foot-men without any cariages, who hindred the Enemies from joyning themſelues againe together: and hee made a cruell Warre vpon the *Ottomans*, deliuering the *Gracians* from the tyrannie of *Baiazet*. Hee approached neere vnto *Burſia*, where the *Ottomans* did not ſtay the comming of *Axallas* Armie, but only they which could not runne remayned behind. *Baiazet* his two Sonnes were ſent vnto the *Greekiſh* Emperour for to bring them vp, and to haue mercie vpon them; the reſt went vnto *Gallipoli*, for to goe vnto *Andromopoli*, the which they held, hauing conquered it from the *Gracians*. Now the Prince (for to returne vnto my purpoſe) diſpatched towards the Emperour his Vncle, and vnto the Empreſſe his Wife, one of his Familiars, called *Lieban*, Captayne of his Chamber, for to carrie him newes of this Victorie, and to ioine it alſo vnto all the reſt. He ſent vnto him *Baiazet* his Sword and Bow, and the Capariſons of his Horſe, the which was eſteemed to be worth aboute two hundred thouſand Duckets. You may eaſily thinke that Prince *Lieban* was well entertayned of the old Emperour, and of the young Princeſſe, bringing word vnto them, that all the World did bend it ſelfe to make our Prince victorious, who ſurely receiued theſe Victories from God without inſolencie, and at ſuch time as hee ſent him moſt glory, then did his men note him to be leaſt puffed vp. He was neuer bold, but in the day of battaile, and on the Eue for to command ſeuerely, and with greater Maieſty. To tell you what he was in aduerſitie, I did neuer ſee him in that eſtate: but it is to be thought, that they which bee not inſolent in proſperitie, are not faint-hearted in aduerſitie. So our victorious Prince marched directly vnto *Burſia*, loaden with Spoyle and Trophies which hee daily got, departing from the Cities which did come and yeeld themſelues vnto him; therein obſeruing the ſame manner of proceeding, the which we did in the Conqueſt of *China*; they which did yeeld vnto him without fighting, were well vſed, and the obſtinate well puniſhed, the Prince knowing that reward and puniſhment are the Moderators of Common-wealthes, the one to bee vſed towards the good, and the other towards the euill. In the end we receiued newes by *Axalla*, that he had receiued *Burſia* in the Emperours name, and how the Inhabitants thereof had puniſhed the Garriſons of *Baiazet*, hauing driuen them away, and ſlaine many.

But I dare not follow our Author any further from Tartaria, for whoſe ſake I haue entertayned him. Leaving therefore his agreement with the Greeke Emperour, and ſecret viſiting Conſtantinople; his comming to Ieruſalem, and Expedition againſt the Soldan, With his Exploits in Egypt, Syria, Perſia, we will returne with him to Samarcand.

§. IIII.

*Increase of Samarcand; Affaires of China: Funerals of the Can-
comming to Quinza, and deſcription thereof. His diſpo-
ſition of his eſtate and death.*

Perſia, as long as he liued was much affected vnto him: which greatly ſerued him for the keeping as well of *Syria*, as of the *Soldans* Empire, leauing continually men there, and drawing out Colonies, the better to ſettle his Affaires in thoſe places. So the Emperour leauing the Prince of *Thana*, with his Army to attend his pleaſure, he marched with the reſt of his forces into his owne Countrey with all the loyes and Triumphes that might be poſſible, the chiefeſt Priſoners marching before the Emperour, amongſt the which was *Baiazet* Emperour of the *Turkes* all chayned, and was a Spectacle vnto all the World of Fortunes inſtancy: hee continued notwithstanding in the ſame fierceneſſe was wont to be in him. So whereſoeuer the Emperour paſſed, the people aſſembled themſelues by thouſands, praying and ſinging his Victories. We arriued at the laſt at *Samarcand* with all our ſpoyle, in very great magnificence: where after we had bene the ſpace of one moneth or two in Feaſtings and Manificences, the Emperour with his accuſtomed Deuotion, hauing in great ſolemnitie vowed a Church and Hoſpitall vnto his God, the moſt magnificent that might bee deuifed. Whereupon to performe the ſame, he began to ſearch out all ſorts of Handicrafts men for to honour this Citie, the which hee had a deſire to make one of the ſtateliſt Cities in the World. And in one of the corners thereof he began, and did build there his Temple and Hoſpitall, making an account to increaſe yet this Citie, as large againe as it was, and to people the ſame, with ſo many ſeueral kinds of people and Nations as hee had brought with him, giuing libertie vnto them all to frame and build their Houſes, cauſing money to be diſtributed to do the ſame, and giuing all kinds of Priuiledges and Freedomes vnto the Priſoners, for to giue them a greater deſire to build and ſettle themſelues there: and hauing cauſed the ſtreets and places to be plotted, and hauing appointed a place for euery one to build vpon, hee tooke no other pleaſure, neither had he any other care then the preſeruing the good will of his moſt famous Souldiers, whoſe name hee hauing cauſed to bee written in a generall Muſter-booke, the which hee

*Tamerlan his
vow vnto God*

commanded to be made, from day to day, they (not thinking thereof) received honours, and good turnes of the Prince, in recompence of their so great seruices. Now he declared the death of the Emperour his Vncle vnto his Councell (of which he before had received Intelligence, but kept it close) and forgot no Ceremony due vnto the honour of the said Emperour outwardly; shewing the griefe he conceiued for his death; where after hee had rested some eight dayes, hee determined to goe vnto *Quinzai* for to see the Empreffe, and hauing left *Baiazer* in the custodie of the Gouvernour of *Zachetay*, the Emperour set forward with his ordinary Court which was of forty thousand Horse, and threescore thousand Foot-men.

The Emperour being come vnto *Cambalu*, receiued newes of the Battell *Odmar*, had wonne against the King of *Chinas*, Captayne Generall, and how he pursued his Victory, hauing taken three or foure great and rich Cities, the which did yeeld themselves vnto him, and that againe the *Chinois* did desire peace. The Emperour sent the Articles he required; which were that before all other things the King of *China* should pay the Arretages of the Tribute, the which hee had agreed with the Emperour. First, he should come in person to doe homage vnto his Majesty, and acknowledge himselfe as Vassall vnto his Empire. That the Army should withdraw it selfe during his Voyage, and he should deliuer vp vnto him all his Cities, sauing three such as the Emperour should nominate; and that the things should be restored vnto the same estate they were in before the Warre, when the Emperour made the first peace; that hee should pay the Army for fixe moneths, and should also satisfie all the expences of the War, seeing he had begunne it, and was Author of the breach of peace. Then the Emperour gratified *Odmar*, sending vnto him for Wife one of his Sisters with all magnificence that might be, for to make him the more affectioned vnto him. I will declare how the Emperour was receiued at *Cambalu* by his Subjects, with all the magnificence possible; the Emperour for to gratifie them hauing restored their Priuiledges, the which he had taken from them, for the Rebellion they had committed with *Calix*: so as the Emperour went ouer all gratifying his Subjects for this new Succession that was lately fallen vnto him, all the Companies comming vnto him: for in these Countreyes they haue no certayne dwellings, they are alwayes wandering in troupes wheresoeuer they goe: thither the Empreffe (hauing left Prince *Axalla* to gouerne at *Quinzai*) came vnto him. The Prince remayned there almost two moneths, hauing in this place giuen order for all the Affaires he had. *Cambalu* was also neere vnto mount *Altay*, where they vse to bury the *Scythian* Emperours, whom we doe call the great *Cham*.

The Emperour caused the body of the Emperour his Vncle to be brought thither, and himselfe would conduct it with all pompe, honouring not only his body, but also all that hee had loued in the World, and although it was not the custome to cause women for to assist the Funerals, yet would he afford this honour vnto the Empreffe, that she should assist the bringing of the body, going neere vnto the same. This he did, the more to make appeare how much he honoured the memory of the late Emperour in his Wife, being his Daughter, and also to the end that if God did take him away, his children being small, shee should haue the greater authority, and bee the better acknowledged worthy to gouerne in the minoritie of his Children; and also for that shee had beene brought vp alwayes in authority, euen since shee was marryed. The Prince desiring thereby the more to acknowledge the honour the Emperour his Vncle had done him, by adopting him as his Sonne, and in hauing left him so great and large an Empire, as that was, whereof he left vnto him the possession. Now the Emperour loued her onely, hauing no other affection in such pleasure, but only the happinesse of a faire Off-spring, the which he hoped for. Now the body of the late Emperour being come vnto *Cambalu*, he determined to conduct it vnto the buriall according vnto the accustomed Ceremony, and to put the body with the Kings and Emperours his Ancestors. After he had from point to point performed the last Will and Testament of the late Emperour, he returned from thence vnto *Cambalu*, where he spent all Winter in Tilt and Turnying, going a hunting, making his abode there, because he was in a place neere vnto the Kingdome of *China*, to know how matters passed there, hauing now brought thither his last Affaires, purposing to goe thither in person the next Winter, if *Odmar* did not make an end of the Wars already begunne, and if the King of *China* did not submit himselfe wholly vnder his obedience, hauing determined not to depart from *Cambalu*, vntill this Countrey were pacified, the marke he shot at, being only to keepe that which his valour was able to conquer through his good fortune; being desirous to spend the rest of his life in enjoying the fruits of his trauels, and for to publish his prayses vnto his people, and with Millions to maintayne them in peace. He had also a purpose to bring vnto an end that which hee had determined to doe at *Samarcand*.

Now *Axalla* was at *Quinzai*, as well vnto the contentment of all the men of Warre, as the Inhabitants, who desired much to see their Prince, and hauing caused Prince *Axalla* in their behalfe to beseech it, that it would please the Emperour to cause his Sonne to bee brought vp amongst them there, the which he did grant vnto them in fauour of the said Prince *Axalla*, establishing him for to command in the absence of the Prince his Sonne, whom hee made Gouvernour of *Quinzai*, from *Cambalu* euen vnto the Sea. This Countrey was replenished with some three hundred Cities, and was in largenesse more then foure hundred leagues, besides an finite

Articles of a new agreement betweene Tamerlan and the King of China.

The magnificent Funerals of the great Cham of Tartaria.

Tamerlan his vertuous and chaste loue vnto his good Wife.

The young Prince made Couernour of Quinzai and ouer all the Countrey; which seemeth to bee the North parts of China, and perhaps in these times, Nan-quin was the Seat of the K. of China and Quinzai, of the Tartar Can.

Axalla appointed the young Prince's Gouverneur, and authorised ouer all the Kingdomes of *Tamerlan*, as Gouverneur generall.

The King of *China* came vnto the Emperour *Tamerlans* Court, and did sweare vnto him once againe obedience.

The meane apparell of *Tamerlan*.

The Emperesse deliuered of another sonne at *Samarcand* in *Parthia*.

Tamerlan his recreations, and notable saying thereof.

The admiration and exceeding loue the people of *Quinsay* did beare vnto their Emperour. The nature of the people of *Quinsay* toward their Emperour.

number of Villages. To make short, it was that the Emperour his Vncle gouerned, where this Prince *Axalla* was his Lieutenant generall, vnder the authoritie of the young Prince his sonne, vnto whom he deliuered him in charge for to be his Gouverneur, authorising him vnto the gouernement generall of all his Kingdomes: for the great wisdom that was in this Knight, made him beloued in all the Countreys vnder the Emperours obedience: the seruices also and great victories the which he had caused the Emperour to obtayne by his stout courage, and good conduct, who for these occasions put his principall trust in him, and after himselfe hee thought him onely worthie to preferue for his children his Kingdome and Emperesse.

The King of *China* came to visit him at his Court, according vnto the couenants offered vnto him, the which he accepted: he did sweare once againe obedience vnto the Emperour, who caused him to see all his greatest Cities, for to make himselfe the more to be feared of this *Barbarian*, who kept no more promise then pleased himselfe. Hee was astonished to behold so many Souldiers, and the Countrey so well replenished with people; and aboue all, that they vsed so little curiositie of riches in their apparell and garments, wondring that the Emperour was apparelled in meane Cloth of one colour, without any other fashion: but to counteruaile that, he had about him men which seemed to bee Kings. At the same time when the King of *China* was at the Court, the Emperour receiued newes of the * victorie against the *Soldan*, for the which the Emperour reioyced, making feasts and turneys in his Court in token of mirth, and this reioycing continued for the space of eight dayes. After the Emperour had giuen order for the double paying of his Armie that came into *Persia*, vnder the conduct of the great Chamber-
laine, and *Synopes* Colonell generall in the Imperiall Armie, the Emperour went vnto *Quinsay* for to see his sonne, and visit the people of this Countrey.

The Emperour arriuing neere vnto *Quinsay*, Prince *Axalla* comming to meet him two dayes journey off, with all the chiefe Lords of the Countrey, together with the principall Citizens, who were preparing for the Emperour the most magnificent receiuing that might bee, as well by water as by land. As this Citie is one of the richest in the world, so is it one of the greatest, and of the most wonderfull situation, being all wholly diuided and ouerthwarted with channels, vpon the which are framed wonderfull and stately buildings, accompanied with an infinite number of Bridges, vpon the which they passe ouer channels: this Citie aboundeth with all kinde of spices, and in great quantitie, likewise with all manner of merchandises. The Emperour as soone as he was arriued, receiued presents of the Citizens, the which were esteemed to be worth about two millions of Gold, with a wonderfull variety of all rare and singular things, the which they presented vnto him, for to testifie the loue and obedience they did owe vnto him. The Emperour was desirous to see his sonne, whom they brought vp with the accustomed greatnesse of Princes: and hauing caused the child to be brought before him, being of the age of seuen yeeres: he forbad from hence forward they should suffer him to weare any thing vpon his head, and himselfe did hang a Bowe about his necke, saying aloud, that they which from their birth were called vnto soueraignties, should bee vsed both vnto cold and heate, and should bee exercised in Armes betimes, and not brought vp delicately and easily, reprehending them which had the bringing of him vp, demanding of them, if they meant to make a woman of him? And they answering, that he was tender. If he be not borne (said he) for to be strong in Armes, he will not be worthy to succeed mee: for he must not be an effeminate Prince that shall preferue the *Parthian* Empire. Now he had sent the Emperesse vnto *Samarcand* to be deliuered, where shee was honourably receiued, hauing neuer bene there since shee was married. Hee receiued newes that shee was there deliuered of another goodly sonne, a thing which hee caused to be published ouer all, and himselfe in token of ioy, made feasts fiteene dayes, with all kindes of magnificent turneys: this he did for to shew his agilitie vnto this people, to the end, that as he excelled all his Court in vertues, that they should also iudge him worthie to gouerne them aboue all other men. After he continued there a moneth, and hauing visited all the Seawtownes neere vnto *Quinsay*, hunting all kindes of chases, neglecting nothing notwithstanding which belonged to his charge, saying often, that the recreations hee did take, were helps for to ease him in the paines of his publike affaires whereunto God had called him. Hauing vpon his returne called together all the people, he published his lawes, which were all reuerenced of this people, as though they had proceeded from the Diuinitie, so much admiration had euery one of the greatnesse of this Prince. The which I will truly declare vnto you, that so long as the Emperour was there, this people did almost nothing, being for the most part busied in beholding of him, not finding any greater contentation then that. Some of his Courtiers, and among it the rest, Prince *Axalla* said one day vnto him, that this was a Citie fit for his abode. O my friend, it is not so: if they should see mee daily, they would make no more account of mee. It is a maxime, that the Lord of this great Citie must not goe thither but once in ten yeeres, and when he is there, it behooueth him to temper his actions, as if he were vpon a Scaffold ready for to play some Comedie, where grauitie and good grace is necessary for to content the beholders: for the people doe easily receiue an euill impression of their Prince, as they also doe a good, if you performe it well vnto them.

- Now I haue forgotten to tell you how the Emperour sent Prince *Axalla* in his name from *Quinsay* into *China*, and his Imperiall Maiestie did not depart out of the Prouince before he returned: he went thither with great diligence for to establish peace there. Prince *Axalla* went forward towards *Paguin*, where he was receiued of the Gouvernour with all possible honour. And hauing assembled all the Emperours forces, hee set forward towards the borders of *China*, haue an enteruiew at *Pochio*, where the meeting place was agreed vpon. He passed by *Quantou*: went forward vnto *Pochio*, whither the King came also to meet with him; and hee entred full fiftie leagues into the Countrey newly conquered. It seemed vnto him a thing too much derogating from the greatnesse of the Emperour, the maiestie of whose person hee represented, if he went any further to see this barbarous King, being more fit that he should come forward into the Countrey conquered lately from him by *Odmar*, after he had obtayned the victory, then to goe into his Countreys although he had subiected them vnto the Emperour, and did pay a very great tribute. So the King of *China* arrived within a league of *Pochio* with all his Court: hee set forward vnto a Plaine, where he and Prince *Axalla* did see each other, who was much better accompanied, from whom the King did as much differ as from the Emperours owne person. They met three severall times together: the King desired to bee admitted into a Citie, which the Emperour had granted vnto him by the treatie. Prince *Odmar* declared that it was of great importance, therefore Prince *Axalla* was by the Emperour appointed for to bee Iudge of this controuersie. In the end they required another further within the Countrey, the which the King accepted: so hee was put into possession of that Citie, the situation whereof was very pleasant, being compassed about with a Lake. *Axalla* hauing discovered that this barbarous King, did earnestly desire it onely for his pleasure, and not for any other euill intent, the Citie which hee deliuered being seated vpon a Riuer further within his Countrey, and that other within our Countrey compassed about with our fortresses: but *Odmar* did not allow of that, and supposed it to bee for an euill purpose, as for to contriue some new practises. *Odmar* being an olde man, who knew the Kings vnfaithfulnesse, although hee had made him know it well enough vnto his smart, hauing (as I haue said) wonne twenty or thirty Cities from him; and aboue fourescore leagues of Countrey, at such time as hee obtayned the last Battell, during the time that the Emperour was in his last Voyage against the *Persians*.
- So the enteruiew continued yet betweene Prince *Axalla* and the King of *China* on the Plaine, a Tent being pitched, whither Prince *Axalla* did come vnto him, whom hee continually honoured as much as the Emperours owne person, where after they had long time treated by Interpreters, it was in the end agreed, that the King of *China* should enter againe into *Quinanci*, not suffering him to put any Garrison into it, nor to fortifie the same: but euen as a Prisoner and Subiect vnto the Emperour, hee should enioy it, and it should bee his owne, enioying all the reuenue thereof, neither should hee carrie any kingly Ensignes, without the expresse leaue of the Gouvernour for the Emperour: hee should notwithstanding haue a guard of three hundred men for his person; and should giue knowledge vnto the said Gouvernour of his journey, before he entred into the Emperours Countries, the which hee must passe for to goe thither. Now the Citie was situated in the midst of a very great Lake, in the which were many Ilands, wherein there were an infinite number of houses of pleasure, and it had bene alwaies a very delicate place, where the Kings of *China* were wont to recreate themselves in all kindes of pleasures that were there to be found: in so much as this barbarous King did not respect the conditions propounded vnto him, so as he might make his abode there, as it were in an Hermitage. Hauing left vnto his brother the gouernment of his whole Kingdome, through the displeasure he had of his bondage whereunto he was brought; a courage certainly magnanimous, and worthie a Nation made ciuill with the best learning, and vnworthie the name of a *Barbarian* wherewith we called him.
- Three times in the weeke at *Samercand*, *Tamerlan* ministred open iustice vnto the meanest, in his Imperiall Maiestie, a thing which made him beloued of the people ouer whom hee commanded. In the other dayes hee gaue secret audience for the affaires of his Estate, and tooke aduice for matters of importance, which were decided daily in his presence. He had such seueritie in his counsell, that they must needs deale truely before him, and without all passion in discourting: notwithstanding he alwaies shewed himselfe courteous in his conuersation, and made himselfe both beloued and feared of his people: hee neuer changed his seruants, except they committed great faults against him: of all the seruants of the late Emperour his Vncle he did not change one of them, but hee did withall encrease their estates, making them in this change to feele his liberalitie, which he made strangers for to taste also, vnto whom he was accustomed to giue, to binde them vnto him. He drew great store of money yeerely for tribute of the *Moscovites*: but he distributed it within the same countrey for to maintayne his authoritie there, winning those for his which might haue hurt him, by meanes of giuing vnto them. Hee had great care of his reuenues, and he had such a readinesse, that he did see his estate from three moneths vnto three moneths within one houre, both the ordinarie and extraordinarie expences, they presented it so well digested vnto him.

Prince Sauto-
chio nineteene
yeeres old
when he came
vnto his Em-
pire.

But our haste of other voyages permits not our stay here. Onely we will adde, that after all things or-
dered, Sicknesse arrested and Death conquered this great Conquerour: and this Traueller travelled the
way of all flesh into another world. Presently after his death they ranne to call his sonne, who as
soone as he was come shut his eyes, powring out teares, as also did all his seruants. The Prince
Sautochio his eldest sonne, within two houres after was proclaymed Emperour throughout all
the whole Armie, and dispatches were made from all parts to aduertise the Gouvernours of Pro-
uinces thereof, the Letters being signed with the hand of the new Emperour, who hauing as-
sembled all the Armie together, hee made an Oration vnto the Captaines and Souldiers, and
caused them to make a generall muster, gratifying all the ancient Seruants of the Emperour his
Father: he would not dispose of any thing before he had seene Prince *Axalla*, and was ioyned
with the Imperiall Armie. This young Prince, when he came vnto this Empire was nineteene
yeeres old, hee was faire, and had much of the Emperour his Fathers naturall disposition. They
hoped that hee would wisely (through the good counsell that was about him) maintayne this
great Empire: but they feared greatly the young Prince *Letrochio* his brother (whom his mo-
ther loued) would cause diuisions, as it happened in the times of their great grand-father be-
tweene two brethren, who had beene occasion of the destruction of their estate, the which was
releued and lifted vp againe vnto his height by the valour of Tamerlan.

CHAP. IX.

* or Gilam.

Reports of CHAGGI MEMET a Persian of Tabas in the Prouince of * Chilan,
touching his Trauels and Obseruations in the Countrey of the Great Can,
vnto M. G. BAPTISTA RAMUSIO.

Succuir and
Campion men-
tioned by M.
Polo.

He said that he had beene at Succuir and Champion, Cities of the Prouince of Tan-
guish, in the entrance of the State of Grand Can, who (said he) was called Daimir
Can, and sent his Officers to the gouernment of the said Cities, which are the
first toward the Muslemans, and are Idolaters. He went thither with a Cara-
uan, which went with merchandises out of Persia, and from the places adioy-
ning to the Caspian Sea, for the Regions of Cataio; which Carauan they permit
not to pierce further then Succuir and Champion, nor any other Merchant therein, except he goe
Ambassadour to the great Can.

No passing in-
to the Coun-
trei.
Succuir descri-
bed.

Rhubarbe de-
scribed.

This Citie of Succuir is great and populous, with faire houses of hewen stones after our man-
ner; and hath many great Temples with their Idols of stone. It is situate in a Playne where
runne infinite Rioulets; is abundant in victuals of all sorts, and yeelds silke there made of the
black Mulberies in great quantitie: hath no Wine growing, but they make a drinke with Hony
as it were Ale. Of fruits, by reason the Countrey is cold, there grow none but Peares, Apples,
Apricocks, Peaches, Melons and Cucumers. Hee said that Rhubarb (of this commoditie Memet
had brought great store at that time to Venice) growes all ouer the Countrey; but the best, in
certaine high stony Hills neere adioyning, where are many Springs and Woods of diuers sorts of
high Trees, and the Land is of a red colour, and by reason of many Raynes and Springs almost al-
way myrie. He shewed out of his bosome a picture of the Plant, brought out of the Countrey
(which Ramusio in his Preface to M. Polo hath also presented with this discourse) the description of
which is this. The leaues, he said, are ordinarily two spans long, more or lesse as the Plant is in
bignesse; narrow below and broad aboue, downy with (as it were) small hayres in their cir-
cumference; the stalke or trunk is Greene foure fingers high, and sometimes a span from the
ground: the Greene leaues with age grow yellow and spread on the ground. In the midst of the
trunk growes a thin branch with flowres fastned within, like the *Mamole* violets in forme, but
of the colour of Milke and Azure, and greater then those violets, of a noysome sent. The roote
within ground is a span or two long, of a tawny colour in the barke, some as bigge as a mans
thigh or legge; out of which grow little Roots or Sprigs, which spread in the ground, and are
cut away from the great Roote; which within is yellow with many veynes of faire red, full of
red and yellow iuyce, cleauing to the fingers and making the hand yellow: and being cut in
peeces the viscus iuyce issueth out and the roote becomes light; they lay them therefore on
boards turning them vp and downe diuers times a day, that the iuyce should incorporate there-
in, lest it lose the goodnesse; after foure or six dayes hanging them to drie in the winde, where
the Sunne may not come at them, being in two moneths drie and perfect. They ordinarily take
it out of the ground in the Winter, the vertue being then most vnted in the Roote (the Spring
there beginning at the end of May) which at other times is disperfed into the leaues and flowers,
that iuyce also being gone and the roote light and hollow.

The Root and
Iuyce and pro-
paring.

A cold climate.

Six Saggi
make an
ounce.

They sell one of their Cart lodes of Roots with leaues for sixteene siluer Saggi (not much vn-
like ours) for they haue no Coynes, but make their gold and siluer in small thin rods, and thence
cut

cut peeces of a Saggio weight, which in siluer is twentie Soldi Venetian, and in gold a Duckett and halfe. He said that they would not gather it, if forren Merchants should not come to trade for it, themselves making no reckoning thereof: and that the Merchants of China and India carry away the greatest part; who if they should cut and dresse it as before is exprest, after it is brought in Carts, in foure or six dayes it would corrupt; and seuen burdens greene (hee said) would not yeeld aboue one drie. When it is greene it is intolerably bitter; and in Cataio they vse it not for medicine, but beate and mixe it with other odoriferous compositions for perfumes to their Idols. In some places there is such store that they burne it dried in stead of wood; others giue it their crased horses, so little doe they esteeme it in Cataio. But there they much prize another small Roote, which growes in the Mountaines of Succuir, where the Rubard growes, and call it *Mambroni cini*, very deare, vsed for diseases, those specially of the eyes; nor did he thinke any of it was brought into these parts. He said also, that in all Cataio they much vse the leaues of another herb, which they call *Chiai Catai*, which growes in a place of Catai, called *Cacianfu*. They boyle it, whether new or drie, and taking off a Beaker or two of that decoction fasting (as hot as can be borne) takes away the Feauer, payne of the Head or Stomack, Back, Ioynts, and other diseases, especially the Gowt, and it is good for digestion. They vse to carry it with them in their Voyages, and will giue a sack of Rubarb for an ounce of *Chiai Catai*. And the *Cataians* say, that if our Merchants, *Persians* and *Frankes*, knew the goodnesse thereof, they would buy no *Rauend Cini*, so they call Rubard.

I asked him of his Voyage from thence to Constantinople, and hee answered mee by *Mambre* our Interpreter, that hee returned not that way he went with the Carauan, by reason that the Greene-head Tartars called *Iscilbas*, sent an Embassador at that time when hee was to come away, with a great company, by the way of *Tartaria Deserta*, aboue the *Caspian Sea* to the great Turke at Constantinople, to make a league against the *Persian* their commonemie. Whereupon he thought good to come with them, and so did to *Cassa*. I asked of the way he went. He said he should haue returned from *Campion* to *Gauia* in six dayes (eight Farfences, each of which is three Italian miles, are a dayes iourney, but on the Hills and Deserts they goe not halfe so much) from *Gauia* to *Succuir* in five dayes, from *Succuir* to *Camul* in fifteene, here the *Muslimans* (or *Malumetans*) begin: from *Camul* to *Turfon* is thirteene. From *Turfon* they passe three Cities, *Chialis* ten dayes iourney thence, after that *Cuchia* other ten, and after that *Acfu* in twentie. From *Acfu* to *Casfar* are other twentie dayes all rough Desart, all the former way being thorow places inhabited. From *Casfar* to *Samarcand* are five and twentie dayes. From *Samarcand* to *Bochara* in *Corassan*, five; from *Bochara* to *Eri*, twentie; from thence to *Veremi* in fifteene; from *Veremi* to *Cashu* in six; thence to *Soltania* in foure, and thence to *Tauris* in six dayes.

Now for some particulars of those places, he related that *Campion* is subiect to *Daimir Can*, great Emperor of the Tartars; the Citie placed in a fertile Playne all cultivated and abundant in prouisions. They are appparelled in black Cotton cloth, furred in Winter with skins of Wolues and Sheepe if they be poore; the richer with Sables and Marterns of great price. They weare black Bonets sharpe like a Sugar-loafe; the men rather small then great, wearing beards as we doe, specially a certayne time of the yeere. Their houses are of stone like ours, with two or three lofts, slope-roofed, and diuersly painted, and they haue one street onely of painters. The great men for magnificence make a great Loft or Pageant, and thereon erect two Tents of silke embroydered with gold, siluer, pearles, and jewels, and there stand with their friends. This they cause to bee carried by fortie or fiftie Slaues, and so goe thorow the Citie in solace. The Gentlemen are carried on a simple Pageant, by foure or six men without other furniture. There Temples are made like our Churches, so great that they may contayne foure or five thousand persons; and haue in them two Statues, of a Man and a Woman, each fortie foot long, all of one peece, stretched on the ground, and all gilded. They haue excellent stone cutters. They bring quarry stones two or three moneths iourney on shod Carts of fortie wheelles very high, drawne by five or six hundred Horses and Mules. There are also small Images with six or seuen heads and ten hands, all holding diuers things, one a Serpent, another a Bird, a third a Flower, &c. There are some Monasteries in which liue men of holy life, immured within their houses that they cannot goe out whiles they liue, and haue victuals euery day brought them. There are innumerable, like our Friars, which goe vp and downe the Citie. They haue a custome, when one of their kindred dyes, to clothe themselves in white many dayes made of Cotton; their garments are made long to the ground with wide sleeves. They vse Printing of their Books, which he thought somewhat like those I shewed him at *Mr Thomas Giuntos* printing house. Their Citie is fortified with a thick wall, within filled with earth, able to carry foure Carts abreast, with Towres and Artillery as thick as those of the great Turke. The Ditch is wide and drie, but they can make it runne with water at their pleasure. They haue a kind of very great Oxen with long, thin and with hayre. The *Cataians* and *Idolaters* are forbidden to goe out of their Countreies, to goe on merchandise thorow the World.

Beyond the Desart aboue *Corassan* to *Samarcand*, and till the *Idolatrous* Cities, the *Iscilbas* rule,

rule, which are *Tartars*, *Musulmans*, wearing greene sharpe Turbants of felt, so making a difference betwixt them and the *Persians*, which weare them red: and betwixt them two for diuersitie of opinions in Religion are continual warres, and disagreement about their Confinnes. *Bocara* and *Samarcand* are two Cities of these Green-heads, each a Signorie of it selfe. They haue three particular sciences, *Chimia* (in the same sense as here) *Limia*, to make and cause loue, and *Simia*, to make men see that which is not. The moneys which they haue are not Coyned, but euery Gentleman and Merchant makes thin rods of gold and siluer, as is before said of *Campion* and *Succur*. In the market place of *Campion* are euery day many Mountebanks which haue that science of *Simia*, which compassed with a great multitude present strange sights, as to cause a man to cut off his arme, or thrust himselfe thorow with a sword, and seeme to bee all 10
bloudy, with other like.

CHAP. X.

A Treatise of China and the adioyning Regions, written by GASPARD A CRVZ a Dominican Friar, and dedicated to SEBASTIAN King of Portugall: here abbreviated.

20

§. I.

Of Camboia and the Bramenes there; the cause of his going to China: of China and the neighbouring Regions.

Camboia.
Siam.
Champa.

Being in *Malaca* building an house of my Order, and preaching, was informed that in the Kingdome of *Camboia* (which is subiect to the King of *Siam*, and lyeth toward the parts of *China*, and doth confine with *Champa*, whence cometh 30
the most precious *Calambach*) was great oportunitie to preach the Gospell, and to reape some fruit. Having leaue of my Prelate, I tooke the iourney in hand. And after the passing many troubles and hunger in the iourney, with dangers and sicknesses, I came a land, and after I had reasonably informed my selfe by a third person, conuersing with the People and with the Fathers, euen before I knew it I found all to the contrary of that which they had told, and that all were deceits of the simple Laytie, which of light matters were moued to presume of the people that which was not in them. And besides this, I found many hinderances for the obtayning of my desires and intent; for first, the King is a *Bramene*, and the *Bramenes* are his principall men and his fauourites, and most familiar, because they are Witches, for they are much giuen to bee pleased with witchcrafts, and they doe nothing without consulting the Witches and *Bramenes* that are in the Kingdome (for by this meanes they thrive) 40
by the Deuill. And so the first thing that the King asked me, was if I were a Witch.

Probar missur.
Pralocussur.

The *Bramenes* doe worship among others one God, which they call *Probar missur* (which they said made the Heauens and the Earth; and another God, which they call *Pralocussur*, this also hauing obtayned power of another which they call *Praissur*, for to giue this licence to *Probar missur*) and I shewed them, that not onely he had not made the Heauen and the Earth, but that hee had beene a very wicked man and a great sinner: wherefore these Priests said, that they would worship him no more, hauing worshipped him thitherto with their God *Praput prasar metri*: whereupon the hatred of the *Bramenes* increased towards me, and from thence forward I had disfaours of the King, which was moued for the zeale of his God, and the God of his *Bra-* 50
menes. There met about these matters, the Priests of the Idols, and all of their troupe, which goe for Priests, and hold themselves for religious men, and in their conuersation and life they are separated from all other people, which to my thinking is the third part of the people of the Land; the King thereof setting an hundred thousand men in the field. This religious people, or that holds it selfe for such, are exceedingly proud and vaine, and aloue they are worshipped for gods, in sort that the inferiour among them doe worship the superiour like gods, praying vnto them and prostrating themselves before them: and so the common people haue a great confidence in them, with a great reuerence and worship: in sort that there is no person that dare contradict them in any thing, and their wordes among them are held for so sacred, that in no wise they will endure to be gainsayed. Insomuch that it hapned sometimes whiles I was preaching, 60
many round about me hearing me very well, and satisfying themselves of that which I said vnto them; if there came any of these Priests, and said this is good, but ours is better, they would all depart and leaue me alone. Further, they being very ignorant presumed to be very wise, and the common people did hold them for such, all their knowledge being ignorances and Heathenish follies.

Men aliue
worshipped.

They

They make seuen and twenty Heauens, some where there is meate and drinke and faire women whether they say all liuing things doe goe, euen the Flea and the Lowse, for they say, that as they haue soules, that they must liue in the other World. And to these, they say, all doe goe that are not Religious men as they are. They place others higher, whether they say, their holy Priests doe goe that liue in the Wildernes, and all the felicitie they giue them there, is to sit refreshing themselves with the wind. They place others yet higher, the gods of the which, they say, haue round bodies like Bowles, those which goe to these Heauens, and the honour which they giue them is, to giue them round bodies as the Gods themselves haue. And euen as they make many Heauens, so they doe many Hels, for they make thirteene, to the which they goe according to the griuoufnesse of the finnes of euery one, eyther higher or lower.

Twenty seuen Heauens.

Thirteene Hels.

They haue a diuision of their religious men, for some they call *Massanchraches*, which are as supreme, which sit aboue the King: others they call *Nascendeckes*, which are as our Bishoppes here. These sit equal with the King. Others they call *Mitres*, which are in the common degree of Priests, which do sit vnder the King: vnder the which there are yet two degrees, which they call *Chaynizes* and *Saxes*. And all these they ascend in degree, so they doe in vanitie and pride, and are more reuerenced. Besides all this, there is another very great inconuenience, that except the Priests and all those that holds themselves for Religious men, all the rest are slaues of the King, and when the owner of the House dyeth, all that is in it returneth to the King, and let the Wife and Children hide what they can, and begin to seeke a new life: the people of the Country is of such a nature, that nothing is done that the King knoweth not: and any bodie be he neuer so simple may speake with the King; wherefore euery one seeketh newes to carry vnto him, to haue an occasion for to speake with him: whereby without the Kings good will nothing can be done, and wee haue already shewed before, that hee is vnwilling to the matter of Christianitie. To these things was joynd some disorders of the *Portugals*, so that by all meanes I beene in the Country about a yeare, and seeing I could make no fruit beside the passing of griuous sicknesses, I determined to leaue this Country, and because they told mee many things of *China*, and the people of it to haue a disposition to Christianitie, and that they loued reason, I determined, seeing in this Country I did no good, nor baptized more then one *Gentile*, which I left in the Caue, to goe to *China* in a ship, of *China* which was then in the Country; in which they carryed me with a very good will, giuing me the best roome in the ship, not taking any interest of me; yea, they dealt very charitably with me. This name *China* is not the proper name of the people of this Country, nor of the Country it selfe, neither is there commonly in the Country notice of such a name, onely among all the people of *India*, and among those which dwell in the South parts, as in *Malaca*, *Siam*, *Iaoa*, this denomination of *Chinas* goeth currant, and also among those *Chinas* which doe traffique among vs. The proper name of the Country is *Tame*, the e. not well pronounced, but almost drowning it: and the name of the people of the Country is *Tamgin*, whence this name *China* doth come, which is currant among the strangers we know not, but it may be conjectured, that the people which in old time did sayle to those parts, because they passed by the Coast of a Kingdome, which they call *Cau-chin-china*, and traffique in it, and victuall, and take refreshings there for the Iourney of the Country that lyeth forward, which is that of *China*, in the which Kingdome they liue after the manner of the *Chinas*, and is subject to the *Chinas*; it seemeth, that omitting *Cauchin*, from the denomination of this other Kingdome, they called all the Country that lyeth along *China*.

Massanchraches
Nascendeckes
Mitres.

* As this word
Tame in English

China is a great part of *Scythia*; for as *Herodotus* saith, *Scythia* extendeth it selfe vnto *India*, which may be vnderstood, because the *Chinas* did possesse many parts of *India*, and did conquer them of old time, whereof at this day there are some Monuments, as in the Coast of *Choromandell*, which is towards the Coast of the Kingdome of *Narsinga*, on that side which we call *Saint Thome*, because there is a House built by the Apostle, and the Reliques of his bodie. There is at this day a great Temple of Idols, which is a marke for the Nauigators to know the Coast which is very low, the which as the men of the Country affirme, was made by the *Chinas*, of whom there remayned among them a perpetuall memory, and therefore they call it *Pagode*, of the *Chinas*, which is to say, Temple of the *Chinas*. And in the Kingdome of *Calicut*, which is the head of *Malabar*, there be very ancient fruit-trees which the men of the Country say were planted by the *Chinas*, and on the shoales of *Chilao*, which doe runne from the Iland of *Ceylan*, toward the Coast of *Cheromandel*, is affirmed, by the men of the Country, a great Army of the *Chinas* to be cast away which came for *India*, which was lost, because the *Chinas* were but young in that Nauigation. And so the men of the Country say the *Chinas* were Lords of all *Iaoa*, and of *Iautana*, which is the Kingdome of *Malaca*, *Siam*, and of *Chapaa*, as it is commonly affirmed in those parts: wherefore some doe affirme, many of this people to bee like the *Chinas*, that is, hauing small eyes, flat noses, and long faces, for the great commixture that the *Chinas* had with all of them, especially with them of *Iaoa*, which commonly are more *China*-like. But the King of *China* seeing that his Kingdome went to decay, and was in danger by their

The *Tartars* rather let forth fleets from *China* to these Ex-ploits as in *Po* lo you reade.

their seeking to conquer other strange Countreyes, he with-drew himselfe with his men to his owne Kingdome, making a publike Edict vnder paine of death that none of the Countrey should sayle out of the Kindome of *China*: the which lasteth to this day.

Liquos an Island

The *Liquos* are not continued with mayne Land, but it is an Island which standeth in the Sea of *China*, little more or lesse then thirtie leagues from *China* it selfe. In this Island liue these people, which is a well disposed people, more to the white then browne. It is a cleanly and well attyred people; they dresse their haire like women, and tye it on the side of their head, fastened with a siluer bodkin; their grounds are plentifull of many and good waters; it is a people that sayle very seldome being in the midst of the Sea. They weare good short Swords, they were in times past subject to the *Chinas*, with whom they had great conuersation, therefore are very like the *Chinas*. Now this Island remayning to the Sea from *China*, as we haue said, the Coast of *China* runneth, winding from the Prouince of *Cantano*, and from her Coast vnto the Coast of the Prouince of *Nanquin*, whether to the *Portugals* haue sayled, the Coast making neuer a point as the Maps doe make, the which may be seene well pointed in the Sea-cards and in the Maps made among the *Portugals*.

Cauchin china.
Daman an
Island.

The *Tartars* are reckoned among the *Scythians*, and runne so far along *China*, with the which it hath continuall Warre, that commonly they affirme to haue betweene the *Chinas* and the *Tartarians*, a Wall of an hundred leagues in length. And some will affirme to bee more then a hundred leagues: the first Kingdome that doth confine with it on the Sea-side of *India*, is one that is called *Cauchin-china*, which hath about an hundred leagues little more or lesse a long the Sea-coast, the Sea maketh a great entrance betweene it and the Ile *Daman*, which is of fiftie leagues in length, and is already of the *Chinas*: and in the end of this entrance this Kingdome abutteth with the Kingdome of *China*, and is subiect to the King of *China*. The people of this Kingdome in their Habit, Policie, and Gouernment, doe vse themselves like the people of *China*. The Countrey is much inhabited and of much people; it is also a very plentifull Countrey. They haue the same Writing that the *Chinas* haue, although their speech be diuers. Beyond this Kingdome of the *Cauchin-chinas*, lyeth another very great Kingdome, which runneth within the Land along *China*, which some doe call *Laos*, and others *Siones*, *Maons*: this by the otherside towards *India*, doth confine with the Kingdome of *Camboia*, and with the great Kingdome of *Syam*, and with the rich Kingdome of *Pegu*, with all the which Kingdomes it hath Traffique: in sort that there remayneth to this Kingdome towards the Sea of *India*, all the Coast of *Pegu*, vnto the ends of the Kingdome of *Champa*, which doth confine with *Cauchin-china*. And so there remayne to these *Laos* toward the side of the *Indian* Sea, the great Kingdome of *Pegu*, the Kingdome of *Tanagarin*, and that of *Quedaa*, and that of *Malaca*, and the Kingdomes of *Pan*, of *Patane*, of *Syam*, of *Camboia*, and of *Champa* which abutteth vpon the *Cauchin-chinas*. This Kingdome of the *Laos*, or *Sions*, *Maons*, was subdued by the *Bramas* (of the which we will speake presently) in the yeere of fiftie fixe, and among some which they brought captiue to *Pegu*, they brought some *Chinas* which the *Laos* held Captiues, as one *George Mello* affirmed vnto mee, which went for Captayne of the Voyage to *Pegu*. And though commonly there be no Warres betweene these *Laos* and the *Chinas*, because of the great Mountaynes that are betweene them, on the which the *Chinas* haue good forces on that side in the Prouince of *Camsi*, which doth confine with these and with the *Bramas*: and in the forces they haue continually men in Garrison for the defence of those parts: there bee notwithstanding, continually assaults on the one side and of the other: whereby the *Laos* might haue some *Chinas* captiue. Before that these *Laos* were subdued by the *Bramas*, they carryed to *Sion*, to *Camboia*, and to *Pegu* some very good Muske and Gold, whereof is affirmed to be great store in that Countrey, and these people hauing Muske, makes a conjecture the great store of Muske which the *Chinas* haue, they get it from the many beasts that are in the Confines of this Kingdome in the Prouince of *Camsi*, from whence they bring it.

1559.

Muske what
it is.

The Muske is the flesh and blood of certayne beasts, which they say, to be as bigge as Foxes, the which beaten with strokes and killed, they tye the skinne with the flesh together in lumps, the which they cut after the flesh is rotten, and so they sell it, which the *Portugals* do call Muske Cods. And when it commeth fresh, presently it appeareth to be rotten flesh and blood: the rest they sell loose, holding these Cods for the finer Muske. Returning to the *Laos*, whereof we were speaking, these be the Wares which they brought to the aboue-laid Kingdomes, carrying in returne Cotton-clothes and other things they had need of. This people is not very browne, they weare their haire all cut round vnderneath, and all the rest aboue ruffled, rayfing it many times vpward with their hands, that it remayneth to them like a Cap, and serueth in stead of one, for they weare nothing on their heads; they goe naked from the middle vpward, and from the hips downward, they weare certayne Cotton-clothes girt about them all white: the women goe couered from the breasts to the halfe legge: they haue their faces some-what like the *Chinas*, they haue the same Heathenish Ceremonies that the *Pegu* and *Siones*, and the *Camboias*: The Priests of their Idols doe weare yellow clothes girt about as the rest of the people, and a certayne manner of yellow Copes, with certayne folds and seames in which they hold their Superstitions.

Of

Of this people I saw many in *Camboia*, which remayned there the yeere before by the way of Traffique, and that yeare that I was there, they came not because of the Warres, wherein (as I said) they said they were subdued by the *Bramas*. These *Laos* came to *Camboia*, downe a River many daies Iournie, which they say, to have his beginning in *China*, as many others which runne into the Sea of *India*: it hath eighty fiftene, and twentie fathome water, as my selfe saw by experience in a great part of it: it passeth through many vnknowne and desert Countries of great Woods and Forrests, where there are innumerable Elephants, and many Buffes, of which I saw many wild in that Countrey, and *Merus*, which is like a good Mule, and certayne beasts which in that Countrey they call *Badas*: of the which the Male have a pointlike and blunt Horne in their fore-head, and some of the Hornes are spotted with singular colours, and others all blacke, others of a waxe colour, but they have no vertue, but only for the Hemorroides, or Piles: and after the Elephant there is no other greater beast: the haire of it is browne and footed like an Elephant, the head like a Cow, and it hath a great lump of flesh that falleth vpon his head, whereof I did eate travelling in those parts. There are also many other wilde Beastes. There bee some Thorny Trees, like Limons and Oranges, and many wilde Grapes through the Woodes. When these *Laos* doe returne to their Countrey, going against the streame, they goe in three moneths. This River causeth a wonder in the Land of *Camboia*, worthy of reciting. Comming neere to a place which they call *Chudurmuch*, which is twelue leagues from the principall Citie of *Camboia*, it maketh a passage to another River which commeth from a great Lake, that is in the vttermost parts of *Camboia*, and hath *Siam*, on the other side: in the midst of the which his bignesse being great, yee can see no Land on neither-side, and this River passeth by *Loech*, which is the principall Citie of *Camboia*, vnto *Chudurmuch*: the waters of this River, which is also verie great, the most of them doe passe to the River that commeth from the *Laos*, neere to *Chudurmuch*, and the rest doe run downe the River directly to the Sea, when the great Winter floudes doe come, which happen when it raines not in the Countries of *Camboia*. The many waters which doe come by the River that commeth from the *Laos*, which there they call *Sistor*, doe make a passage right against *Chudurmuch*, to the River that passeth through *Loech*, with so great furie, that where the waters of *Loech* did run downward, by multitude of the other that entreth into it, they are turned backe and run vpward with a great current: in sort that it ouerfloweth all the Countrey of *Camboia*, whereby all the Countrey is not trauelled in the time of these flouds, but in Boates, and they make their Houses all with high lofts, and vnderneath they are all ouerflowne, and sometimes these flouds are so high, that they are forced to make higher Roomes with Canes to keepe their household-stuffe in, and to lodge themselues. This River runneth vpward from Iuly to September, and with the passing from the River that commeth from the *Laos*, (or from the River *Sistor*, which is his proper name) of so many waters to the River of *Loech*, it doth not leaue his running to the Sea, making below verie great armes, and goeth verie high ouer-flowing many Countries downward, but not so much as above. The *Portugals* did shew mee in *Loech* a field, a great hill of Earth, ouer the which they affirmed that in the time of the flouds a great ship that was made in the Countrey did passe without touching, which ship might well haue layled from *India* to *Portugall*.

Beyond these *Laos*, follow the *Brames*, which is a great people, and very rich of Gold and Precious stones, chiefly of Rubies. It is a proud Nation and valiant, these are now Lords of *Pegu*, which subdued it by force of Armes some yeares before they subdued the *Laos*, they are men of good complexion, and well made, they are browne. They haue *Pegu* and part of *Bengala* toward the Sea of *India*. It is a Countrey very scarce of victuals, they apparell themselves as we said of the *Laos*, but that their clothes are fine, and many do weare them painted or wrought: they are also somewhat like the *Chinas* in the faces, they haue very rich and gallant shippings garnished with Gold, in the which they sayle in the Rivers: they vse Vessels of Gold and of Silver, their Houses are of Timber very well wrought, the Kingdome is very great, they haue not commonly warre with the *Chinas*, because of the great Mounraynes that are betweene the one and the other, and because the *Chinas* are well fortified on that side: notwithstanding this, sometimes there are Robbers on the one side, and the other that doe make assaults, whereby the *Chinas* haue some *Bramas* Captiues, as some *Portugals* which were Captiues in those parts, which saw them did affirme, and did speake with them in the great Citie of *Camsi*: and these slaues told them, that from thence it was not very farre to *Brama*, and that in *Pegu*, they had seene *Portugals*.

There followeth along the *China* beyond the *Bramas*, the Kingdome of the *Patanes*, which now are Lords of *Bengala*, and after them the *Mogores*. Beyond these *Mogores* there runneth along the *China*, the *Tartarians*, which doe extend themselves from *Mogor* to the Lake *Meotis* and the River *Thanais*, which is a very great Kingdome and of much and innumerable people. This people are commonly red and not white, they goe naked from the waste vpward, they eate raw flesh, and anoint themselves with the blood of it: whereby commonly they are stinking and haue an ill sent.

An old man of *China* did affirme vnto me, that sometimes when they came against the Countries of *China*, if the wind stood on that side where they came, they were discerned by their smell: and when they goe to warre they carry the flesh raw vnder them for to eate, they eate it in this manner, and anoint themselues with the blood to make themselues the more sturdie and strong, and to prouoke themselues to crueltie in the Warre: these also fight on Horsebacke with Bowes and Arrowes, and vse short Swords. With these is the continuall Warre of the *Chinas*, and as I haue said the *Chinas* haue an hundred leagues (others saying there are more) of a Wall betweene them and the other, where are continually Garrisons of men for the defence of the entries of the *Tartarians*. It may bee beleued that this Wall is not continued, but that some Mountaynes or Hills are intermixt betweene; for a Lord of *Persia* affirmed to me, that the like Workes were in some parts of *Persia*, with intermixing some Hills and Mountaynes.

It was affirmed to the *Portugals* which were Captiues, and in Prison in their Dungeons, in the year 1550, that some yeares there is Truce betwene the *Chinas* and the *Tartarians*: and in the same yeare the *Tartarians* made a great entry in *China*, in the which they tooke a very principall Citie from them: but a great number of people of the *Chinas* comming and besieging the Citie, and not being able to enter it by force of Armes, by the Councell of a man of low degree, they had a meanes whereby they killed them and their Horses, and remaind Lords againe of the Citie. The same *Portugals* which after ward were set at libertie, affirmed, that all the Prisoners made great Feasts, and made a great stirre when the *Tartarians* made this entry, with the hope of being set at libertie by the meanes of the *Tartarians*, if they did possesse *China*.

In the Citie of *Canton* I saw many *Tartarian* Captiues, which haue no other captiuitie then to serue for men at Armes in other places farre from *Tartarie*, and they weare for a difference red Caps, in all the rest they are like the *Chinas* with whom they liue: they haue for their maintenance a certayne stipend of the King, which they haue paid them without faile. The *Chinas* call them *Taras*, for they cannot pronounce the Letter *r*. Above the Lake where *Thanaïs* hath his beginning, they doe confront with the skirts of high *Almayne*, although on the side of *Europe*, and betweene them and *Almayne* are Hills that doe diuide them: and of these people of the skirts of the Mountaines, the *Chinas* say that the King of *China* hath many men of Warre in pay, that doe keepe the weake passages and the Wals on the side of the *Tartarians*: and say, they are great men with great Beards, and weare cut Hose, and Caps, and blunt Swords, and a *Portugall* that was carryed captiue the Land inward, told me that he heard the *Chinas* say, that they called these * *Alimenes*.

telligence.

8. II.

Canton described; the publick and private buildings and Government. The Shipping and Husbandry of China; their contempt of the idle, and provision for impotent

Being to intreate of the Citie of *Cantan*, I give first a warning to the Readers, that among many Noble Cities, *Cantan* is one lesse Noble then many of *China*, and farre inferiour in building then many other: although it be more populous then many; this is said by all them that saw it, and travelled within the Land, where they saw many other. This aduice presupposed, it is to be noted, that *Cantan* in his compasse, is of very strong Wals, very well made, and of a good height, and to the sight they seeme almost new, beeing eightene hundred yeares since they were made, as the *Chinas* did affirme: they are very cleane without any cleft, hole, or rift, or any thing threatning ruine. They are of free stone about a mans height, and from thence vppward of bricke made of a clay like vnto that of the Porcelaine Dishes, whence it causeth them to bee so strong, that I building a Chappell in *Malaca*, one of these (which was brought from *China*) could scarcely bee broken with a good Pick-axe. Jointly with this there is in this Citie and in all the rest an Officer of the King which onely hath care to ouer-see the Wals, for the which he hath a good stipend. And every yeare when the Gouernour of the Borders commeth to visit the Prouince, hee doth visit this as well as the other Officers, to know if he doth well his Office, and finding him in any fault, or negligence, hee is put from his Office, and punished. And if he standeth in need of any expence for the mending of the Walls, the Ouer-seer of the Rents is bound to giue him that which is necessarie, vnder paine, that if the mending remayneth vndone, he shall bee well punished. For this cause the Wals of all the Cities are continually kept sound and in good reparation. These Walles are within the Citie little more then the walke of the same Citie in their height, which is the cause of beeing much more cooler. The Wals haue in compasse 12350. paces, and it hath eighty three Bulwarks.

The wals of
CANTON.

This

This Citie (and so all the rest) hath on the one side the Riuer, along the which, as well this as the rest are built almost in a Valley; and on the other side they haue a Ditch full of water of a good breadth, betweene the which and the wall remayneth a good distance where there may runne together a good troupe of people, and the Earth that was taken out of the Ditch, was cast betweene it and the wall, whereby the foot of the wall remayneth a great deale higher then the other ground. Besides the ditch, notwithstanding, this wall hath a great blemish, for it hath on the contrarie side to the Riuer without the wals, and the ditch a little, Hillocke that disco- uereth all the Citie within the wals.

The Riuer and
Town-ditch.

This wall hath seuen gates: the entries of the which are sumptuous and high, strong and well made, with Pinacles aboue, not square but made like steps. The other places of the wals haue no Pinacles: the wall at the entring of the gates is twelue paces thicke: the gates are all ou- uer plated with Iron, and all of them haue their draw-bridges very strong, which are alwayes vp, and are neuer let downe, but are ready against they be needfull: all the gates at the entrings haue Courts, and the Courts that are toward the side of the Suburbs, which lyeth along the Ri- uer haue euery one three gates, one in the front and two on the sides, which remayne for the seruice of streets that lye along the wall, the wals of the Courts are almost of the height of them within: the gate which is in the front in the Court, is like vnto that of the wals within: it hath also a draw-bridge; the gates which are in the side of the Courts are small. The Courts that are on the other-side of the field where no Suburbe is, haue no more but one gate, and this not right against that of the wals, but stand on the one side: the streets of the Citie are all drawne by a Line very straight without any manner of making a nooke or winding: all the crosse wayes are as straight as the streets: in sort that there is neyther street nor trauerse that maketh any tur- ning. All the streets and traueres are very well paved, the pauements going along the Houses, and lower in the middest for the course of water: the principall streetes haue triumphant Ar- ches which doe crosse them, high and very well made, which make the streets very beautifull, and enoble the Citie: the principall streets haue along the Houses close Portals, in the which and vnder the Arches many things are sold.

The Gates.

Draw-bridges.

Gate courts.

Strait streets
and paved.

Houses of Ma-
gistrates.

The Houses of them, which rule the Countrey, are at the entrings very sumptuous, with high Portals, great and well wrought of Malons worke: they haue in the fore-front very great gates like the gates of a Citie, with two Giants painted with Clubs in their hands: I saw foure in one *Pagode*, (which is a Temple of Idols) drawne naturally from some, which they say, the King hath to keepe his weakest passages from *Tartaria*. They are of great members, of about twelue or thirteene spans high. On the street side it hath right against the principall Porch a re- ceite not very great. It hath built along the street a good wall of a good height right against the gate, that when the gate is open they that are within may not be gazed on by them that goe by the street: this gate serueth not, neither is it opened but for dispatching of matters of Iustice, and the principall of the House goe in and out at them; and others that are as honourable or more then they: at the one side of this principall gate is another very great gate, but not so big as the principall, which is for the seruice of the House, and of the Prisoners when the principall gate is shut: and when this principall gate is shut, they set a glued Paper crosse ouer both the leaues, on which is written the name or firme of the principall of the House, and for to open it againe, an Officer of the House bringeth the same firme or marke on a playstered board to the Porter, that hee may open it, without the which token hee may not open it vnder a great punishment.

* Or little
Court.

Enting by this gate, there is a great Court and almost square, which is almost a Horse-race, and it hath a Gallery little lesse then the length of the gate, which leadeth straight from the gate to a very great Table that stands at the end of the Court, the which is all paved with square stones with leanings as high as a mans waste, and it is high in the entry of the gate, and there remayneth onely one step in the end of it to the Table, and the course in the sides of the Galle- ry is low, that they goe downe to it by steps: this Gallery of the middest is of such respect a- mong them, that in no wise it is lawfull for any one to passe through it, but onely some of the chiest of the House, or others as great or greater then they: and those that goe to negotiate with the Officer of the House when they enter in at the gate, they must goe presently to one side, going downe to the Court which hath very great Trees for shaddow, and they goe vp a- gain by steps vnto the Table aboue-said, which is at the end of the Court, which is very great. In the end of this Table in all his length there is a step, and within the step a very great walke, all paved with square stones as the Table without it, and very high and all wrought with Ma- sons worke: in the middest of it leaning to the wall of the front are two Chaires, with two Tables before them, a little distant the one from the other, one of them, which stands on the left hand, serueth for the Gouvernour of that house, and that of the right hand is void, for if there should come another of a higher dignitie then hee, to sit him downe. To euery one of the sides there are two spaces which runne behind this Gouvernour, and are of a good breadth, hauing pla- ced along the sides of these two spaces in euery one five Chaires with five Tables before them, and as the distance from them to the principall Gouvernour is good, they remayne though behind.

Sanctie of
Courts, and re-
uerence of
high Magi-
strates.

in sight of the principall Gouvernour. These serue for ten Assistants which are with the principall at the dispatching of waigtie matters. From these Galleries inward are great Lodgings, as well for the Gouvernour of the House, as for the Assistants, and for all the other Ministers and Officers of the House, which are many, as we will shew in their place.

Great Prisons.

On euery side of the Court are very great Prisons and great Lodgings, as well for the Iaylours (which also are of great authoritie) as for the Watches that watch by night and by day, but neither these Prisons nor the Chambers of the Ministers of them, nor the Lodgings of the chiefe of the House are seene outward, for they are serued of all things, the doores shut and haue continually their Porters. There are in *Cantan* foure of these Houses for foure principall Officers, and in euery Prouince in the Citie, that is, the Head of the Prouince there are five of these Houses: in *Cantan* there are but foure; for as the Gouvernour of *Cantan* is also Gouvernour of *Cansf*, he is not resident in *Cantan*, but in a Citie that is in the Borders of one of the Prouinces, that the recourse in the Affaires of both the Prouinces may be the easier. Besides, these principall Houses of the chiefe Gouvernours, there are many other in *Cantan*, the which though they bee not of so great Maieftie as they, they are notwithstanding very great, of other inferiour Officers, and chiefly those of the chiefe Iaylour which are very great. There is on the wals of *Cantan*, on the contrary side of the Riuer a high Towre all close behind, that they which are in it may not bee seene, nor gazed on from the Hillocke or Mountafore said, that was without the wals, and it is built in length along the wall, so that it is longer then broad, and it is all made in Galleries very sumptuous, from whence they discouer all the Citie, and the Marshes and Fields beyond the Riuer, which serueth for the recreation of them that rule. In the other Cities are such buildings which serue for recreation, many and very sumptuous, and of singular building.

Private houses.

The Houses of the common people in the outward shew, are not commonly very faire, but within are much to be admired; for commonly they are white as Milke, that they seeme like sleeked Paper, they are paved with square stones: along the ground, of a spanne little more or lesse, they are dyed with Vermilion, or almost blacke; the Timber is all very smooth and euen, and finely wrought and placed, that it seemeth to be all polished, or dyed, or in white, and some there is in white so faire and pleasant to the sight, waued Damaske-like, as it were Gold, and so bright that they should doe it injurie in painting it. I confesse, in truth, that I neuer saw so fine Timber as that. It hath after the House that is at the entrie, a Court with solaces of small Trees; and Bowers with a faire little Fountayne: and then at the entring of the House where the women doe with-draw themselves, it hath a certaine manner of a Gallery open before towards the Court, where they haue verie great Cubboards finely wrought, which takes the one square of the House, in the which they haue their Oratories, and Gods made of Wood, or of Clay: these Oratories are more or lesse curious according to the abilitie of euery one: all the Houses are tiled with very good Tiles, better, and of more continuance then ours: for besides, they being well made, they are of verie good Clay: those which receiue the water are broad and short, and the yppermost that close, the other are narrower, and at the ends toward the street side, they are garnished with fine Workes made of Lime: for many yeares they haue no need to be tiled againe, for as the Clay is very good, they are not so mouldring as ours, or so rough, but they are very smooth and warme, and beeing so well set they breed no filthinesse. There bee many Houses faire within, and very few with Lofts, the most are low Houses.

Temple and Mesquit. Suburbes.

They haue in the midst of the Citie a Temple of Idols with high Towres, the wals of the which we will speake of hereafter: they haue their Mesquit with *Alcoran* very high with his Pinnacle on the top. The Suburbes without are very great and of many Houses, in such sort that some *Portugals* would haue compared them in bignesse with them of *Lisbon*, but to mee and to others they seemed lesse, though they bee bigger and of more Houses then the Citie within the wals. It is very populous, and the people is so much, that at the entring of the gates on the Riuer side yee can scarce get through. Commonly the people that goeth out and in, doe cry and make a great noyse to give place to them that carrie burthens. And the Rulers of the Citie commanding to enquire what victuals were spent euery day, it was found to spend only five or sixe thousand Porkes, and ten or eleuen thousand Duckes; besides which, they ate great store of Beenes and Buffes, and many Hens, and an infinite deale of fish, whereof the Markets and streets are full, and many Frogs and Shel-fish, great store of Fruits and all other Pulse. Hereby little more or lesse may be seene what people are in *Cantan*, and whether it may bee compared with *Lisbon*.

Suburbes.

The Houses of the Suburbes are like those of the wals within; the streetes are so well and leuelled by Line as those within, and all for the most part paved also, and some of them are verie broad, and haue triumphant Arches, but very few. Some streets, as well without as within the wals, on the one side and the other along the Houses, haue Trees for to make shadowes. In all the streets of the Suburbs at the ends of them are gates with speciall Porters, whose Office is to locke them euery night vnder paine of sore punishment; and euery street hath a Constable and a Iayle. He stands bound, either to yeeld the Malefactor which by night doth any harme in the street, are to pay for it; wherefore all the streets haue euery night a watch, the Neighbours di-

Suburb-gates.

uiding

inding themselves in quarters: and they make every night sixe quarters or watches, and for a signe that they are awake, in every street they sound a Drumme, where they haue all the night a Lanthorne with a light. The gates of the Citie are shut as soone as it is night, and on the two leaues is set a paper, with the chiefe Captaines marke on every one of them, and they are opened with the Sunne, with a token from the same Captaine to them all, with his marke written on a white boord. Every gate hath a Captaine, a very honest man, and every one hath certaine Souldiers, which continually doe watch every one of the Gates by day and by night.

Watches.

In some Cities the water runneth almost thorow every street, and on the one side and the other of the street are Tables made of stone, for the common seruice of the people: and thorow all the streets are very good and well wrought Bridges to passe from one side to another: and thorow the middest of the streets is great trafficke by water that goe from one place to another. In those places whereby the water entreteth into the Citie, they haue made in the walls very good gates, which haue very strong Iron grates for to shut by night: and the most of the streets to the land inward are very well paved with stone, and (where is no stone) with small tyle. In all the Mountaines and Hills where there are wayes, they are very well made, cut with the Pick-axe, and paved where they are needfull. This is one of the good works of China, and it is very generall in every place of it. Many Hills on the side of the *Bramas*, and of the *Laos*, are cut in steps, very well made; and in the height of the Hill is made a low place, very well cut; in the which is a very high Towre, which aboue doth equall with the highest of the Mountain, which is very strong, the wall of one of the Towres was measured at the entring of the gates, and it was sixe fathome thicke and an halfe. There are on this side many of these workes, and so there may be in other places. I heard of a Gentleman of credit, called *Galiote Perera*, Brother to the chiefe Iustice of *Arrayolos*, which abode in *Cansu*, being Captiue, that (with the houses of these kinsmen of the King, being so many and so great) the Citie was so bigge that it seemed they occupied very little of it, and make a very little show in it: and so he had it written in a Rudder of his, whence I tooke a great deale * of that which is heere spoken of: in such sort that the greatnesse of the Citie did hide in it selfe the multitude and greatnesse of these houses.

Here followed much of other Cities; but because the Author saw them not, but received his intelligence from *Perera*, I referre you to him. Other China Cities. High-wayes.

Galiote Perera.

* Which is therefore here omitted.

As in the Countrey there is great store of Timber and very cheape, and much Iron and cheap, and it is very good, there are infinite number of ships and shippings; for through the Countrey are infinite Groves of Firre trees, and other trees, whereby it is easie for any one though of a little substance, to make a ship and haue shippings, and this causeth the great profit and gayne that is of them with the necessitie the Countrey hath of them: for it hath not onely a great number of Islands alongst the coast, but also a very great coast where they Naigate: and besides this, all China within is navigated, and runne through Rivers which doe cut and water it all, which are many and very great. So that yee may sayle to the ends of the Land, and goe in shippings. Any Captaine along the coast may in a little space ioyne two hundred, three hundred, euen to a thousand ships, if hee stand in need for to fight. And there is no small Towne along the River that is not plentiful in small and great ships. Along the Citie of *Cantan*, more then halfe a league off the River, is so great a multitude of shipping, that it is a wonderfull thing to see them, and that which is most to wonder, is that, that this multitude neuer decreaseth nor fayleth almost all the yeere: for if thirty, forty, or an hundred goe forth one day, as many doe come in againe the next: I say, the multitude neuer to diminish nor fayle for though sometime there be more, some lesse, alwaies there remaineth a marvellous multitude: and that which is more, all those that goe forth, goe laden; and all that come in, come laden; carrying goods, and bringing goods: and that which sheweth much the noblenesse of the Countrey, the plentie and riches thereof is, that all these ships bringing great store of merchandise of Clothes, Silkes, provisions and other goods, some doe goe into the Land, others come from within the Land, and nothing commeth from without China, neither goeth out of it: and that which the *Portugals* doe carrie, and some that they of *Syam* doe carrie, is so little in comparison of the great trafficke of the Countrey, that it almost remaineth as nothing, and vnperceiued; seeing that out of China there goeth no more but that which the *Portugals*, and they of *Syam* doe carrie; which is as much as though they brought nothing out of China, five or sixe ships comming laden with Silke and Porcelane: the great plentie and riches of the Countrey doth this, that it can sustayne it selfe alone: Pepper and Iuorie which is the principall that the *Portugals* doe carrie; a man may well liue without it, and the trafficke of merchandise that is in this Countrey, is in all the Cities within the Land, which as we haue said, are almost all built along the Rivers. The *Chinas* haue a common speech for to shew the noblenesse of their Kingdome, that the King of China can make a Bridge of ships from China vnto *Malaca*, which are neere five hundred leagues, the which though it seemeth it cannot be, yet by Metaphor it signifieth the greatnesse of China, and the multitude of ships that of it selfe it can make.

Store of shipping.

Riches of China in it selfe.

Proverbs.

The great ships they call Iunks; besides which there are ships for warre, made like great ships, to the which they make great Fore-castles and high, and likewise abafte, to fight from them: in such manner that they ouer-master their aduersaries, and because they vse no Ordnance, all their

Iunks for war and for trade. Ship-fights. No Ordnance.

nificence.

their vse isto come many together, and compassing the aduersaries ship, they boord it: and at the first on-set they cast a great deale of Lime to blinde the aduersaries, and as well from the Castles as from the tops they cast many sharpe pikes burned at the end, which serue for Top-darts, of a very stiffe wood; they vse also great store of stone, and the chiefest they labour for, is to breake with their ships the dead workes of their aduersaries, that they may be masters ouer them, hauing them vader them, and being destitute of any thing to shelter them: and as soone as they can enter, they come to the Pike or handy-blowes, for the which they haue long Pikes, and broad-pointed Swords hanging at their sides. There bee other Iunkes for lading of goods, but they are not so high as those of warre, though there bee some very great. All these ships as well of warre as of burthen vse two Oares a-head: they are very great, and foure or five men doe rowe euery one of them, laying them along the ship they moue them with such a sleight, that they make the ship goe forward, and they helpe very much for to goe out and in at a barre, and setting vpon the enemies for to boord them: they call these Oares, *Lioslios*: in all manner of their shippings they vse the *Lioslios*, neither doe they vse any other manner of Oares in any kinde of shipping. There be other lesser shippings then Iunkes, somewhat long, called *Bancones*, they beare three Oares on a side, and rowe very well, and loade a great deale of goods: there be other lesse, called *Lanteas*, which haue sixe or seuen oares on a side, which doe rowe very swift, and beare a good burthen also: and these two sorts of ships, viz. *Bancones* and *Lanteas*, because they are swift, the theeuers doe commonly vse. The rowing of these Oares is standing, two men at euery Oare, euery one of his side, setting one foot forward, another backward. In the Iunkes goe foure, five, or sixe men at an Oare.

They vse also certaine shippings very long, like vnto Gallies, without Oares or beake-head, which doe lade great store of goods: and they make them so long, because lading bringing a great burden they may sayle the better by the Riuer, which sometimes are not rough. They haue many other shippings of burthen, which is superfluous to tell of euery one. There be many small boats of poore people, in which are husband and wife, and children, and they haue no other dwelling but in their boat in a middle decke, for defence of the Sunne, and of the raine: as also haue the *Bancones*, and *Lanteas*, and others which wee said were like Gallies, and these deckes are in such sort, that vnder them are very good lodgings and chambers in the great ships, in these of the poore, they are much inferiour: there they breed their Pigs, their Hennes, and there they haue also their poore little Garden, and there they haue all their poore state and harbouring. The men goe to seeke worke about the Citie to helpe to maintayne their little house; the women goe in the boats, and with a long cane that reacheth well to the bottome of the Riuer (at the end of the which is a little basket made of rods, wherewith they get shell-fish) with their industrie, and passing of people from one side to another, they helpe to sustaine their household. These poore people notwithstanding doe not liue so poorely and beggarly in their apparell, as those which liue poorely in *Portugall*. There are other great shippings, wherein is the stocke of them both *, which haue great lodgings where they may bestow a great deale of stufte: these haue a great stocke; they haue certaine Cages made all the length of the ship with canes, in which they keepe two or three thousand Duckes, more or lesse as the vessell is: some of these belong to Lordships, and their seruants goe in them: they feed these Duckes, as followeth.

After it is broad day, they giue them a little sodden Rice not till they haue enough, when they haue giuen it them, they open a doore to the Riuer where is a Bridge made of canes, and the noise they make at their going forth is wonderfull to see them goe tumbling one after another, for the great abundance of them, and the time they take in going out; they feed all the day vntill night among the fields of Rice, those which are owners of the shipping doe receiue a fee of them that owe the fields, for letting them feed in them; for they doe cleanse them, eating the grasse that groweth among them. When night commeth they call with a little Taber, and though they be in sundry Barkes, euery one knowes their owne by the sound of the Taber, and goe vnto it; and because alwaies in time some remayne without that come not in, there are euery where many flockes of wilde Duckes, and likewise of Geese. When I saw such a multitude of Duckes in euery one of these Barkes, and all of one bignesse, and thinking they could not be hatched by Duckes or Hens, for if it were so, some would haue beene bigger then some, seeing so many could not be hatched in one, two, or fifteene dayes, I was willing to know how they hatched them; and they told mee, it was in one of two sorts. In Summer, laying two or three thousand Eggs in the dung, and with the heate of the weather and the dung, the Eggs are hatched. In the Winter, they make a Hurdle of canes very great, vpon the which they lay this great number of Egges, vnder the which they make a slacke fire, continuing it of one sort a few dayes till the Egges be hatched. And because they are hatched in this sort, there are so many of one bignesse, and all along the Riuer are many of these Barkes, whereby the Countreies are well prouided of this food.

There are some ships wherein the Rulers doe sayle, which haue very high lodgings, and within houses very well made, gilt, rich, and very sumptuous: and on the one side, and the other they

they haue great windowes with their Nets wouen of Silke, and very fine small rods set before them, that they within seeing all them without, may not bee seene of them. Toward the side of the *Laos* and the *Bramas*, are continually watches and wards in the Riuer in many ships, euen a whole moneths Iourney in length vnto the Citie of *Canfi*: these ships are in the places where the Riuer make any armes, because of the many theeuues which commonly are in these parts, being the vttermost of the Kingdome: and because the Riuer haue many armes, many ships are placed in those parts: in euery place where these shippings are, there bee two small ships, which continually doe goe night and day from one watch to another, because they are very swift, and those of the great ships doe diuide themselves into watches at their quarters, for to watch as well in the small as in the great ones. The ships of passage goe alwaies a great number together, that they may defend themselves, one another, while the ships of warre, and the watches do come to them, and at the watch where they make night, there they stay til the morning, and by the small boats they are deliuered safe to the next watch forward, and so from watch to watch they are accompanied of the small vessels till they bee set in safetie. From the Citie of *Doncheo*, that is, where the Gouvernour of *Consi* and *Cantan* is resident, vnto the bounds of the Province of *Canfi*, which are places more dangerous, are continually Armadas of fortie or fiftie ships. All these watches are paid of the common Rents of the Kingdome.

Ships for guard.

Fleets.

China is almost all a well husbanded Countrey: for as the Countrey is well inhabited, and people in abundance, and the men spenders, and vsing themselves very deliciously in eating and drinking, and apparell, and in the other seruices of their houses, especially that they are great eaters, euery one laboureth to get a liuing, and euery one seeketh wayes to earne their food, and how to maintayne their great expences. A great helpe to this is the idle people to bee much abhorred in this Countrey, and are very odious vnto the rest, and that laboureth not shall not eate, for commonly there is none that doe giue almes to the Poore; wherefore, if any poore did aske almes of a *Portugal* and he did giue it him, the *Chinas* did laugh at them, and in mockage said: why giuest thou almes to this which is a Knaue, let him goe and earne it: onely some letters haue some reward, going to some high place gather the people, and telleth them some fables to get something. The Fathers and Priests of their Idols are commonly abhorred and not esteemed, because they hold them for idle people, and the Rulers for any light fault doe not spare them, but giue them many stripes. Wherefore, a Ruler whipping once before a *Portugal* a Priest of theirs; and he asking him wherefore he did vse their Priests so ill, and held them in so little esteeme, answered him: these are idle and wretched Knaues. One day, I, and certayne *Portugals* entring into the house of the Ouer-seer of the goods, about the deliuerie of certayne *Portugals*, that were in prison, because the matter belonged to him, for the great profit that came thereof to the King, much people came in with vs to see vs, among the which there was a Priest: as soone as the Ruler said, *Set them downe*, all of them ran away in great haste, the Priest running as all the rest, for feare of the whip.

Industry, cause of plentie.

Idlenesse hated.

Almes derided.

Idle Idoll-Priests punished with vniust iustice of profane busie Rulers, which made their soules the least and worst part of themselves, and a God of their goods.

Euery one laboureth to seeke a liuing: for that which hee earneth hee enjoyeth freely, and spends it as he will, and that which is left him at his death remaynes to his children and grandchildren, paying onely duties Royall, aswell of the fruits that they gather, as of the goods they deale in, which are not heauie. The greatest Tribute they haue, is euery married man, or that hath house by himselfe, payeth for euery person in his house two Mases, which are sixtie Reys. From *Champaa*, which as we said, doth confine with *Cauchinchina* vnto *India*, are many vnprofitable grounds, and made Wilderesses and Woods, and the men are generally little curious to get or gather together, for they neuer gayne or get so much but it is tyrannized from them, that which they haue is onely theirs as long as the King listeth, and no more. In such sort that as soone as the King knoweth that any of their officers hath much money, hee commandeth him to bee put in prison, and they vse him so hardly, that they make him cast all that hee hath gotten: wherefore there are many in those parts, that if they get any thing or money one day or one weeke, they will not labour till they consume all that they haue earned in eating and drinking, and they doe it because if any tyrannie should chance to come, they may finde nothing to take from them. From hence it commeth, as I say, that they haue in *India* many grounds in diuers places vnprofitable; which is not so in *China*, for euery one enioyeth the fruits of his labour.

that is 9d. Tyrannie growes poore by seeking to grow rich.

Hence it commeth that all the ground that in *China* can yeeld any kinde of fruit receiuing seede, is husbanded. The high places which are not so good for Corne, haue very faire Groves of Pine Trees, sowing also betwene them some Pulse where it may be: in the drie Lands and stiffe they sow Wheate and Pulse: in the Marshes which are ouerflowed, which are many and very long, they sow Rice: and some of these Marshes doe yeeld two or three Crops a yeere. Onely the Mountaynes that are high and beaten with the weather, and are not fit to plant any thing, remayne vnprofitable. There is nothing lost in the Countrey bee it neuer so vile: for the bones, as well of Dogs as of other Beasts, they doe vse, making toyes, and with workes in stead of Iuorie, they set them in Tables, Beds, and other faire things: they lose not a Ragge of any qualitie, for as well of the fine as of the course, that are not of Wooll, they make fine and course Paper, and they make Paper of barkes of Trees, and of Cantes, and of silken Ragges, and in the Paper made

Thriftie husbandrie.

Nothing lost.

Paper of diuers matters.

Near filth.

made of filke they write: the rest serueth for to roll betweene the pieces of filke: euen the dung of men yeelds profit, and is bought for money or in change of herbs, and they carry it from the houses: in fort that they giue money or money worth, to suffer them to cleanse their houses of office; though it smelleth euill through the Citie: when they carry it on their backs, they carry it in Tubs very cleane without, and although they goe vncovered, notwithstanding it sheweth the cleanlinesse of the Countrey and Cities. In some Cities these Tubs vse to goe covered not to annoy.

Pumps which goe by the feet.

They vse in all things more slight then force, whereby they plow with one Oxe, making the Plough in such fashion that it cutteth well the Earth, though the furrowes are not so bigge as among vs. A ship be it neuer so bigge, and haue it neuer so great a leake, the Pumps are made by such a slight, that one man alone sitting mouing his feet as one that goeth vp a paire of stayres, in a very little space he pumps it out: these pumps are of many pieces as a water wheele, laid along the side of the ship betweene rib and rib, euery piece hauing a piece of wood of halfe a yard little more or lesse, one quarter well wrought: in the midst of this piece of wood is a square little board, almost of a hand breadth, and they joyne one piece into another in such manner as it may double well, the joynts which are all very close, whereby this manner of pompe doth run, is within of the breadth of the little boardes of euery one of the pieces, for they are all equall: and this manner of pompe bringeth so much water as may contayne betweene the two little boardes. The Chinas vse also Puppets, with the which they make representations. They bring vp Nightingales in Cages which sing all the yeere; and are vied to Puppet representations also.

Prouision for impotent persons. See of these things Pinto.

It is a thing worth the noting, that the blinde haue a labour appointed them for to get their food, which is to serue in a Horle-Mill like Hories grinding Corne: and commonly where is a horse-mill there are two, because two going together, they may recreate themselves in talking one with another, as I saw them going about with Fannes in their hands cooling themselves, and talking very friendly. The blinde Women are the common Women, and they haue Nurces that doe dresse them and paint them with Vermillion and Ceruse, and receiue the wages of their euill vse. The lame and the creeple which either haue no kindred within a certayne degree, or if they haue them and they doe not prouide for them that which is necessarie, or are not able to helpe them, they make their Petition to the Ouer-seer of the goods of the King, and his kindred being examined by his Officers, if among them are any that can maintayne them, they doe binde the neereft to take them to them to their charge and maintayne them; and if their kindred bee not able to maintayne them, or if they haue no kindred in the Countrey, the Ouer-seer of the goods commandeth they be receiued into the Kings Hospitall: for the King hath in all the Cities great Hospitals which haue many lodgings within a great inclosure. And the Officers of the Hospitall are bound to administer to those that are bedied all things necessarie, for the which there are sufficient Rents appointed out of the Kings Exchequer. The lame that keepe not their bed, haue euery moneth a certayne quantitie of Rice, with the which, and with some Hens or a Pigge, which they bring vp in the Hospitall, they haue sufficient to maintayne themselves, and all these things are very well paid without faile: and because commonly those which are receiued into these Hospitals are incurable, they receiue them for life: and all those which are receiued by commandement of the Ouer-seer, are enrolled; and euery yeere the Officers of the Hospitall doe yeeld account of the expenses, and of the prouision of the poore sick, and if any fault or negligence bee found in them of that which they are bound to doe, without remission they are well punished for it.

§. III.

Of their mechanicall Trades, Merchandises and Moneyes: their prouisions of Flesh and Fish; the persons and attyre of Men and Women: their Feasts.

Shoemakers.

Here are in this Countrey many workmen of all Trades, and great abundance of all things necessarie for the common vse, and so it is requisite, for the people is infinite. And because shooes are the thing that most is spent, there are more workmen of Shoo-makers then of any other Trade. In *Cantan* are two particular streets of Shoo-makers very long, one where they sell rich shooes, and of silke, another where they sell common shooes of leather; and besides these two streets, there are many workmen scattered about the Citie. The rich Bootes and Shooes, are couered with coloured silke, embroydered ouer with twist, of very fine workes, and there be Bootes from ten Crownes, to one Crowne price, and shooes of two Crownes and thence downward, and in some places are shooes of three pence. So that the rich and the very poore may weare shooes: and the rich as they list; the shooes of three

three pence, or of a Riall, are of straw, and I say of three pence, for there is money that answereth our three pence. There bee many rich husband-men, that set men by the wayes with many of these strawen shooes for the poore Trauellers (and it is no wonder to haue this charitie among these *Infidels*, for in the parts of the *India* are many rich Gentils which haue very great houses, wherein they spend continually much Rice, giuing foode to all the poore of what qualitie soeuer, that will come thither to eate: and by the wayes they haue men set to giue drinke to the poore Trauellers.) There be also many Carpenters, and very good workmen of all manner of worke. They haue continually many Boxes made of many sorts, some varnished with a very faire varnish, others painted, others lyned with leather, and likewise of other sorts. They haue continually a great number of Chaires made, some of very faire white wood, and other fairely gilt and siluered, very finely wrought.

Almes not
almes the fruit
of vain-glorie
not of mercy.

They haue also Chaires wherein the Rulers are carried on mens backs through the Citie, which are very rich, of a great price and very faire: they haue another manner of Chaires, which are high, very rich and pleasant all close, with a little window on each side very faire with a net made of Iuorie, or of Bone, or of Wood, through the which they that goe within doe see on the one side, and on the other of the street without being seene: these serue for to carry the Women about the Citie when they goe abroad. The seate is of the height of one of our Chaires, where they goe sitting with their legs at length. There be many of these Chaires very rich, and of a great price: and there are some plaine, and haue Pinacles on the tops very faire: there are also many bed-steads very pleasant and very rich, all close round about, of wood finely wrought. I being in *Cantan* there was a rich one made wrought with Iuorie, and of a sweet wood, which they call *Cayolague*, and of *Sandalum*, that was prized at foure hundred Crownes, and of little Boxes gilt, and Maundes, and Baskets, Desks, and Tables, all as well gilt as with Siluer is without number: Gold-smiths, Siluer-smiths, Copper-smiths, Iron-smiths, and of all other Trades there be many and perfect Workmen, and great abundance of things of euery Trade, and very perfect. They vse infinite Vessels of Latten: and from *China* they furnish all *Laos* and *Siam*, with these Vessels, which in *India* they call *Bategaria*, and they are in euery kind very perfect. They vse Skillets, and Chafing-dishes, and other Vessels of cast Iron, and not only they doe cast these Vessels of Iron, but after they are broken they buy them againe for to re-cast them. There are many Merchants of pieces and Clothes of Silke, because they spend many in the same Countrie, and in *Siam*, and there are pieces of Damaske and Taffata among themselves so rich, that they bring them not to vs, because they giue them not for them what they are worth within the Land: they sell also great store of fine and course Serge of sundry colours. There are many Merchants of white and dyed Linnen cloth, for it is that which is most spent in the Countrie. They gaue me a piece of Linnen cloth of about ten cubits, which was valued at tenne Crownes, there is both fine and course as euery one will haue it.

Chaires

Silkes

And howsoeuer the Porcelane which is vsed in all the Countrie of *China*, and in all *India* is of common Clay; notwithstanding there is very much course Porcelane, and other very fine, and there is some that is lawfull to be sold commonly, for the Rulers onely vse it because it is red and greene, and gilt, and yellow: some of this is sold but very little, and that secretly. And because there are many opinions among the *Portugals* which haue not bene in *China*, about where this Porcelane is made, and touching the substance whereof it is made, some saying, that of Oysters shels, others of dung rotten of a long time, because they were not enformed of the truth, I thought it conuenient to tell here the substance whereof it is made, according to the truth of them that saw it. The substance of the Porcelane is a white and soft stone, and some is redde, which is not so fine, or in better speaking, it is a hard clay, the which after well beating and grinding it and laying in Cisternes of water (which they haue very well made of free-stone, and some playstered, and they are very cleane) and after it is stirred in the water, of the Creame that remayneth on the top they make the very fine Porcelane: and so the lower the courser, and of the dregs they make the courstest and base, which the poore people of *China* doe vse. They make them first as the potters doe any other vessell; after they are made, they drie them in the Sunne, and then paint them as they list with Azure, which is so fine as we see: after these Pictures are drie, they lay on the Glasse, and then harden them.

Porcelane.

Fables of it.

How it is made

The principall streets of the Merchants, are the most principall streets, which haue couerts on the one side and on the other: notwithstanding, the chiefest sale of the Porcelane is in the Gates of the Cities, and euery Merchant hath at his doore written in a Table all that is sold within his shop: those which sell simples for medicines, haue at their doores tyed and hanging in a string, a piece of euery thing. There is in *China* great store of Rubarbe, but it is not brought to *Cantan*, but sodden, there is none found raw. As the goods of *China* are very great and many, so the rents which the King of *China* hath in euery part of his Kingdome are very great. Some *China* Merchants did asirme that *Cantan* did yeeld euery yeere to the King three thousand Picos of Siluer, and euery three Picos make one Baar, euery Baar hath foure Kintals, euery Kintall hath foure Arrobas: so that one Baar is sixteene Quarters, and three thousand Picos, making one thousand Baars, by consequence, one thousand Baars make 7 sixteene thousand

land Quarters; and wee speake of weight, for in *China* is no money of Gold or Silver, but onely of Brasse, the Gold and Silver goeth by weight. But these as they are popular people, though occupied in the trafficke of the Countrie, it seemes they know not well the trueth of this, and that the summe is greater which is collected of the rents Royall, for the Countrie is very great, and the merchandise many and very substantiall. I was informed by meanes of the Rulers, which is a more certaine information, because the rents doe passe thorow their hands, that the rent of the Salt in *Cantan* did yeeld alone to the King 300. Picos of Silver, which doe make 100. Baars, which are 400. Kintals, that are 1600. * quarters of Silver.

* Which is
40000. pound
weight of Sil-
uer.

Every one hath a paire of scales and weights in his house, which all are exceedingly perfect. The weights that they commonly haue, are from ten crownes to one, and from ten Tanga to one, one Tanga is nine pence. By the name of their Countrie, the lesser great weight is of one Tael, one Tael is sixe Mazes, one Maez is the same that a Tanga: of the small weights, the smallest is one Conderin, ten Conderins make one Tanga, or one Maez: one Conderin hath ten Caxos; and because the common that goeth in stead of money is Silver by weight, every one hath weights of his owne, as abouesaid: for one laboureth by all the meanes hee can to deceiue the other, none doe trust the scales and weights of the other, and every one that goeth to buy in the Market, carrieth a weight and balance, and broken Silver, and the balance is a little beame of Iuorie with a weight hanging at the one end with a string, and on the other end a little scale, and the string of the weight runneth along by the beames, which hath his markes from one Conderin to ten, or of one Maez vnto ten. These scales serue for to buy by retale, for to buy by grosse they haue perfect scales very curious and fine, with very perfect weights. They carrie the Silver commonly full of mixture, and because they encrease it with the mixture, from hence it commeth that he which will make good markets in the Countrie of *China*, and that it may be cheape, carrieth Silver rather then goods, for by the encrease which the *Chinas* make of the Silver with the mixture, they giue the merchandise good and cheape for the Silver. The Merchants are commonly false and lyars.

Very Mer-
chants.
Victuals.

There is great abundance of Rice in all the Countrie, for there are many marishes, which yeeld two or three crops euery yeere. There is also much and very good Wheat, whereof they make very good Bread, which they learned to make of the *Portugals*; their vse before were Cakes of the same Wheat. There be many *French* Beanes, and other Pulse: there is great store of Beefe, and Buffes flesh, which is like Beefe: there are many Hens, Geese, and innumerable Duckes: there are infinite Swine, which is the flesh they most loue: they make of the Hogs many singular fitches, whereof the *Portugals* carrie an infinite number to the *India*, when they goe thither by way of trafficke. The *Chinas* doe esteeme the Porke so much, that they giue it to the sickes. They eat Frogs also, which are sold in great Tubs full of water at the gates, and they that sell them are bound to slay them. All flesh is sold by weight aliue, except Beefe, and Buffes flesh, and Porke, which commonly is sold by the pound, except if they doe buy it whole, for then they are to weigh it whole: and that it may weigh the more, they fill it first with meat and drinke: the Hens to make them weigh the more, they fill them likewise with water, and their crops full of sand and other things. The pound of the Hen, Goose, Ducke, and Frogs, is all at one price; the Porke, Beefe, and Buffes flesh is worth lesse, and all at one price. The fish is exceeding much, and all very good, and it neuer wanteth in the markets: there be many Crabs, and Oyters, and other shell-fish, and all is very good: and of all these things the markets are full. The Markets are commonly at the gates of the Cities, and vnder the triumphant Arches which are in the large and principall streets, as we said before, and along the Portals of the same streets: but not to sell here flesh or fish, for there be particular streets, excepting quicke flesh, which is sold euery where.

Markets.

Herbs.

Fruits.

There are many Garden-herbes, *sc.* Turneps, Radish, Cabage, and all smelling Herbs, Garlecke, Onions, and other herbes in great abundance. There are also many fruits, *sc.* Peaches, Damsons, and another manner of Plummes which wee haue not, with long, round, and sharpe stones at both ends, and of these they make Prunes: There are many Nuts, and very good, and many Chestnuts both small and great. There is a kinde of Apples that in the colour and rinde are like gray Peares, but in smell and taste better then they. There is a fruit whereof there are many Orchards, it groweth on great and large boughed trees, it is a fruit as bigge as a Plumme round and a little bigger, they cast the huske, and it is very singular and rare fruit, none can haue his fill of it, for alwaies it leaueth a desire of more, though they eat neuer so much, and doth no hurt. Of this fruit there is another kinde smaller, but the biggest is the best, they are called *Lechias*. There are Oranges, Figs, and many other fruits, which were to long to recite. And though there be particular streets of Victualling houses, yet there is through all the Citie almost in euery street of these houses. In these Victualling houses is great store of meate dressed. Many Geese, Hennes, and Duckes roasted and sod, and store of other flesh and fish dressed: I saw at one doore hanging, a whole Hog roasted, and let one aske where he will, for all is very cleanly dressed: he shoue of all the meate that is dressed is at the doore, almost inciting them that passe. At the doore is a vessell full of Rice, well coloured and dressed, and because the matters

houses.

Encoreyado

of Iustice are commonly almost from ten of the clocke forward, and many haue their houses farre because the Citie is very great, or because they which come from out of Towne with businesse, as well Inhabitants as Strangers doe eate in these houses. When any man meeteth any acquaintance of his that cometh from abroad, or that he hath not seene him a long time, saluting one another, he asketh him presently if he hath dined, and if he answereth no, he carrieth him to one of these houses, and there they eate and drinke priuily, for there is great store of Wine, and better then in any place of *India*, which they make of confections: if he answereth that he hath dined already, he carrieth him where they haue onely Wine and Shell-fish, wherewith they drinke, of which houses there are also many, and there he doth feast him.

10 There is also in *Canton* along the wall on the outside, a street of Victualling houses, in the which they sell Dogs cut in quarters, roasted, boiled, and raw, with the heads pulled, and their eares; for they scald them all like Pigs, it is a meate which the base people doe eate, and they sell them alio about the Citie in Cages: through euery street they sell flesh, fish, herbes, fruit, and all things necessarie, crying that which they sell. In the end of Februarie, in March, and part of April, when the great flowings are, there cometh great store of fish from the Sea to spawn, in the mouths of the Rivers along the Sea, whereby there breedeth infinite small fish of many sorts in the pooles of the Rivers. Of these spawnes in these times all the Fishers along the Sea coast doe meet in their boats, and there meet so many that they couer the Sea, and lie neere the pooles. And these Fishers doe take great quantitie of this small fish, and cast it in Cisternes which they haue made with stakes, and a very thicke Net made of wyer, where they doe feed them, to the end of the fishing time: and at this time there are wont to come a great number of Barks from all places of *China* within the Land (for I said already that all *China* is sailed by Rivers, for it is all cut and watered with great Rivers) and these Barks doe bring a great many baskets within and without, which are all lined with oyled paper, that it may hold water, and euery one of these Barks doe buy the fish they haue need of. Then they carrie this fish in these baskets through all the Countrie inward, changing euery day the water, and all men of any possibilitie, within their grounds and inclosures haue great store of fish in ponds, for the which they buy the baskets they haue need, they feed this fish in the ponds in a very short time with Cowdung and Buffes dung, wherewith it groweth very fast. In all the ditches of the Cities likewise they breed great store of fish in the same sort, of which the Rulers are serued. In all the Cities which I said already, are built along the Rivers. The King hath many Sea Crowes in Coops, in which they breed, with the which they make Royall fishings many times: all the Barks that are bound to goe a fishing with these Cormorants, doe meet and set round in the River, those that haue charge of the birds, doe tye them about the crops, that they cannot swallow them, and they cast them to fish in the River. They fish till they fill their crops of middle fish, and if it be great, they bring it in the beake, and come to the Barke, where they cast all the fish they haue fished, forcing them to cast it: and in this manner they fish the quantitie they will, till they haue to their contentment: after they haue fished for the Barke they vntye them, and let them goe fish for themselves: after they be full, they come to the Boats, and are put in the

Dogs flesh.

20 Coops: these birds doe fish very much. The King doth giue for a fauour to the Rulers one or two of these Barks, according as the person is of qualitie for the maintayning of his house with fresh fish. Though that the *Chinas* commonly are ill-fauoured, hauing their faces and noses flat, and are beardless, with some few haire in the points of the chinne: some notwithstanding there are which haue very good faces, and well proportioned, with great eyes, their beards well set, and their noses well shapen: but these are few, and it may be they are of other Nations. They weare long Coats commonly with plaies after our good ancient vse: with a flappe ouer the breast to tye on the side, and all in generall haue very long sleeves to their coats, they weare commonly blacke Coats of Linnen, or of very fine Serge or course of diuers colours, some weare them of Silke, many doe vse them on the Feast dayes of Silke: the Rulers weare commonly fine Serge, and on

Fishing with Cormorants.

30 their Feasts they vse very fine Silkes, chiefly crimson, which none in the Countrie may weare but they: the poore people weare commonly Coats of white Linnen, because it costs but little: on their head they weare a high Cap made of very fine twigs, and it is round interwoven with blacke Silke, and very well made, they vse their Stockins whole footed, which are very well made and stiched, and they weare Boots or Shooes, as the curiositie or abilitie of euery one is, either of Silke or of Leather: in Winter they weare Stockins of Felt, either fine or course, but the cloth is made of Felt: they vse also in Winter their garments lined with Martines, chiefly about the necke: they vse quilted Iackets, and some doe vse them of Felt in Winter vnder their Coats.

Their persons.

40 Coops: these birds doe fish very much. The King doth giue for a fauour to the Rulers one or two of these Barks, according as the person is of qualitie for the maintayning of his house with fresh fish.

50 Though that the *Chinas* commonly are ill-fauoured, hauing their faces and noses flat, and are beardless, with some few haire in the points of the chinne: some notwithstanding there are which haue very good faces, and well proportioned, with great eyes, their beards well set, and their noses well shapen: but these are few, and it may be they are of other Nations. They weare long Coats commonly with plaies after our good ancient vse: with a flappe ouer the breast to tye on the side, and all in generall haue very long sleeves to their coats, they weare commonly blacke Coats of Linnen, or of very fine Serge or course of diuers colours, some weare them of Silke, many doe vse them on the Feast dayes of Silke: the Rulers weare commonly fine Serge, and on their Feasts they vse very fine Silkes, chiefly crimson, which none in the Countrie may weare but they: the poore people weare commonly Coats of white Linnen, because it costs but little: on their head they weare a high Cap made of very fine twigs, and it is round interwoven with blacke Silke, and very well made, they vse their Stockins whole footed, which are very well made and stiched, and they weare Boots or Shooes, as the curiositie or abilitie of euery one is, either of Silke or of Leather: in Winter they weare Stockins of Felt, either fine or course, but the cloth is made of Felt: they vse also in Winter their garments lined with Martines, chiefly about the necke: they vse quilted Iackets, and some doe vse them of Felt in Winter vnder their Coats.

The Attire of the men.

60 They vse long haire like women, which they weare finely combed, and they combe it many times a day, they weare it tyed on the crowne of the head, and through the knot thrust through with a long small Siluer pin: those which are not married, to wit, the yong Bachelors doe weare for a deuise a fillet or ribband dresse very well made, their Cap remayning aboue it, that it may be seene: they haue a superstition in their haire, therefore they weare it so long, holding that

Long haire.

by

by it they shall be carried to Heauen. The common Priests doe keepe their haire, but are shauen, for they say they neede no helpe to carrie them to Heauen. Yet among them are some Priests of the Temple of the Idols, which among the *Chinas* are more reuerenced then the rest; these doe weare haire on the top of the head fastned with a stick, very curiously wrought like a close hand, varnished with a very fine varnish, which they call *Acharan*; and these Priests doe weare black coates, the other wearing a white coate.

Courtesie.

The *Chinaes* are very curteous men; the common courtesie is, the left hand close, they inclose it within the right hand, and they bring them very oft to their brest, shewing they haue one another inclosed in their heart; and to this motion of the hands, they joyned wordes of courtesie, though the wordes of the common sort is to say one to another, *Chisan mesan*, which is to say, Haue yee eaten or no, for all their good in this world is resolved in eating. The particular courtesies betweene men of sort which haue not seene one another a long while, are the armes bowed and the fingers clasped one within another, they stoop and speake with wordes of great courtesie, euery one labouring to giue the hand to the other to make him rise; and the more honorable they are the longer they stand in these courtesies. The honorable and noble People doe vse also many courtesies at the Table, the one giuing drinke to the other, and euery one labouring to giue the hand to the other in their drinking, for at the table there is no other seruice but that of drinking. If there come any Ghest newly to his friends house, or his kinsman, if the Master of the house be not apparelled in holy day clothes, when the Ghest commeth in, he maketh no account of him nor any mention, till he commandeth to bring his festiuall apparell, and after he is so apparelled hee goeth to the Ghest, and receiueth him with many complements and courtesies. For they hold it not conuenient, that a new-come Ghest and of reuerence bee receiued with common apparell, but clothed in feast-like apparell, for in this he sheweth him that his entring into his house is a feast day to him.

Cha drinke.

Whatsoeuer person or persons come to any mans house of qualitie, hee hath a custome to offer him in a fine basket one Porcelane, or as many as the persons ate, with a kinde of drinke which they call *Cha*, which is somewhat bitter, red, and medicinall, which they are wont to make of a certayne concoction of herbes somewhat bitter: with this they welcome commonly all manner of persons that they doe respect, be they strangers or be they not; to me they offered it many times. The *Chinaes* are great eaters, and they vse many dainties, they eate at one table Fish and Flesh, and the base people dresse it sometime all together. The dainties which are to be eaten at one table, are set all together on the board, that euery one may eate where hee liketh best. It is a cleanly and neat people. The common people hath some grosse things.

Great eaters.

Certayne noble *Portugals* went to shew me on a day in *Cantan* a banquet, which a rich Merchant made, which was worth the sight. The house where it was made, was with a loft, and very faire, with many faire windowes and casements, and all of it was a mirror: the Tables were set in three places of the house, for euery Ghest enuited a Table and a Chaire very faire and gilt, or with siluer, and euery Table had before it a cloth of Damaske downe to the ground. On the Tables was neither cloth nor napkins, as well because the Tables were very fine, as because they eate so cleanly that they need none of these things: the fruit was set along the edges of euery Table, all set in order, which was, roasted Chestnuts and peggled, and Nuts cracked and shaled, and sugar Canes cleane and cut in slices, and the fruit we spake of before, called *Lichias*, great and small, but they were dried. All the fruit was set in small heapes like Turrets very well made, crossed betweene with certayne small sticks very neat: whereby all the Tables round about with these little Turrets were very fairly adorned. Presently after the fruit, were all the seruices placed in fine Porcelan dishes, all very well dressed and neatly carued, and euery thing set in good order, and although the dishes were set one ouer another, all were so finely set, in such sort that he which sate at the Table might eate what he would, without any need of stirring or remouing any of them: and presently there were two small sticks very fine and gilt for to eate with, holding them betweene the fingers: they vse them in stead of a paire of Pincers, so that they touch nothing of that which is on the board with their hand; yea, though they eate a dish of Rice, they doe it with those sticks, without any graine of the Rice falling: and because they eate so cleanly, not touching with the hand their meate, they haue no need of cloth or napkins: all comes carued and well ordered to the Table. They haue also a very small Porcelan cup gilt, which holdeth a mouth full of wine, and onely for this there is a Waighter at the Table: they drinke so little that at euery bit they must haue the cup, and therefore it is so small. There are some *Chinaes* that weare very long nailes, of halfe a quarter, and a quarter long, which they keepe very cleane, and these nailes doe serue them in stead of the sticks for to eate withall.

Feasts.

Birth dayes.

The *Chinaes* doe vse on their birth dayes to make great feasts, continuing yet in them the custome of the old *Gentiles*. In these Feasts are wont to meet all the Kinsmen and Friends, and all doe helpe him to beare the charges of the Feasts, with sending him Presents, that when they doe celebrate their birth dayes they may pay them in the same sort: and because they haue these helps, they make great expence and solemnitie. The feast lasteth all night long, for all the

Gentiles

Gentiles as they walke in darknesse liuing without the knowledge of God, so all their feasts through all places of *India* and in *China*, are made by night. In these feasts is great abundance of meate and great store of wine, all the night they spend in eating and drinking, and musicke playing on diuers instruments. Their Priests offer their sacrifices to their Gods, apparelled very richly. They apparell themselves in diuers sorts of garments, and the Priests doe sing their songs in a very tunable voice: among these sacrifices, playing and singing, the Tables are alwayes furnished with sundrie meates, euery one taking what hee liketh best. The Priests when they haue sung as all the rest, doe make at their doore triumphant Arches very well made of Paper, and Scaffolds with diuers representations of Figures and
10 Statues, and certayne high Trees and hanging on the broken Boughes, very well wrought and painted, many lights, and in euery place many Lanthornes very faire and well made all with lights.

Night feasts.

In the generall Feasts of all the Towne and People, chiefly on the first day of the yeere, all the streets and doores are very richly dressed, and chiefly they doe indeauour and labour to deck the triumphall Arches, couering them with many clothes of Damaske and of other silke, with many Lanthornes. There is much playing of sundrie Instruments, and singing, and ioyntly with this great store of meate of sundrie kindes, and great abundance of Wine. They vse many times representations by Actors, which doe represent very well and to the life, the Actors hauing very good apparell and well ordered, and fitting as is requisite for the person hee
20 representeth; and they that represent a Womans part, besides the apparell that is requisite for the part hee representeth, they are painted with Stibium and Ceruse. Those which vnderstand them not what they represent, are sometimes wearied, but they that vnderstand them doe delight very much to heare them: and one whole night, and two, and some time three, they are continually busied in representations one after another. While these representations doe last, there must bee a Table set with great store of meate and drinke. They haue in these Actions two great inconueniences or blemishes, the one is, that if one be to represent two parts, and is to change his attyre, he doth it before all the Beholders: the other is, that the Representor as well as hee that speaketh alone, doe speake in a very high voyce almost singing. Sometime they goe to the ships to play, that the *Portugals* may giue them money.

New yeeres day.

Comedies.

The Instruments they vse for to play on, are certayne Bandoraes like ours, though not so well made, with their Pinnes to tune them, and there bee some like Gitternes which are smaller, and other like a Viall de gamba, which are lesse: they vse also Dulcimeres and Rebeckes, and of a certayne kinde of Hoboyse, resembling our vse. They vse a certayne manner of Instrument that hath many wyer strings; they play on them with their nayles, which for that purpose they weare; they haue a great sound and make a good harmonie: they play many Instruments together sometimes, conformed in foure voyces which make a very good consonancy. It hapned one night by Moone-shine, that I and certayne *Portugals* sitting at the doore of our lodging, a few young men passing the time came along the Riuer, playing on diuers Instruments; and wee being glad to heare the musick, sent for them to come neere where
40 wee were, and that wee would inuite them, they as gallant youthes came neere with the Boate and beganne to tune their Instruments, in such sort that wee were glad to see them fit themselves that they might make no discord: and beginning to sound, they began not altogether, but the one tarried for to enter with the other, making many diuisions in the processe of the musick, some staying, others playing: and the most times they played all together in foure parts. The parts were two small Bandoraes for the Tenor, a great one for counter-Tenor, and an Instrument called *Crano* followed the rest, and sometime a Rebecke, sometime a Dulcimer for a Treble. And they vsed a good policy, that wee might remayne the more desirous, they played but two straines.

Instruments.

It is not lawfull for any man in all the Countrey to carry any manner of weapon, no not a knife, therefore when one quarrels with another they goe to buffets and pulling by the haire:
50 onely the Souldiers and Ministers of the Captaines of warre doe weare swords on their hangers. When any man dyeth that hath House, Kindred, and Children, after hee hath giuen vp the ghost, they wash the Coarse and put on his best apparell, and his Cap on his head, and set him on a Chaire, and then commeth his Wife and kneeleth downe before him, and with many teares and lamentable wordes shee taketh her leaue of him: and after the Wife comes the Children in their order doing the like, and after the Children the rest of the Kindred, and all the rest of the House, and his Friends. The ceremonies ended, they put him in a Coffin made for him of *Camsiere* wood, which is preseruatiue for dead bodies, and smelleth well, they close it and pitch it well that no smell may come out of it; they set it vpon two little formes, and cast ouer it a cloath to couer the Coffin downe to the ground, whereon the picture of the
60 man deceased is pictured. They make a little house before the Coffin of white raw cloath, with a Portall right against the Coarse, where a Table is set with candle-sticks and candles lighted, and set thereon bread and all the fruits of the Countrey. And all this they doe of superstition for a ceremonie, and there they keepe the Coarse eight or fifteene dayes, in the

Armes and quarrels.

Funerall rites.

Mourning.

which their Priests of their Gods come continually by night to offer their Sacrifices, and to pray their Heathenish inuentions. There they bring many Pictures of men and women, and burne them with many ceremonies. Finally they hang some Pictures of men and women in paper hanging on coards, and with great praying and mouing these pictures by the coards, with great crying and showting, they say, to send the dead man to Heauen. All day and all night while they are in these ceremonies, there is a Table set with great store of meate and drinke. These ceremonies ended, they take the Coffin and set it in a Field where the dead are, and there it consumes with time. Their mourning which they vse is the sharpest that euer I saw, for they weare Coats after the common sort, of verie course wooll next the flesh, and girt with great coards, and on their head a Cappe of the same cloath, made like the Caps that are vsed in the Countrey, sauing that these haue certaine flappes that fall ouer their eyes. Notwithstanding, that as they are nearest in kindred so they weare the rougher mourning weed. The rest weare raw cloath, and not so course. For Father or Mother, they mourne three yeeres: and if he bee *Louthia*, as soone as hee heareth the newes presently he leaueth the office he serueth, and goeth to mourne to his owne house for three yeeres, which being ended he goeth to the Court to demand his office.

rednesse.

Marriage.

Commonly the men haue one Wife, which they buy for their money more or lesse, according as they are, of their Fathers and Mothers. Yet may euery one haue as many wiues as hee is able to maintaine: but one is the principall with whom they liue, and the other he lodgeth in sundry houses. And if hee hath dealings in diuers Countreies hee hath in euery one a wife and house with entertainment. If the wife committeth adulterie, and the husband accuseth her and the adulterer, both suffer death. And if the husband doe suffer the wife to play the adulteresse, hee is grievously punished. I being in *Cantan*, saw a Marchant of *China* goe from Iustice to Iustice, verie sharply handled for suffering his wife to play the adulteresse. The common women are in no wise permitted to dwell within the walls. And in the Suburbs without they haue their proper streets where they dwell, out of the which they may not liue: All the common women are slaues, they bring them vp for that purpose from their child-hood, they buy them of their mothers, and teach them to play on an Instrument of musique, and to sing. And those that can best doe this, because they gaine most, are worth more. And those which cannot doe that, are worth lesse. The masters either carrie them vnto the men, or sell them to them: and when they are to beset in the street of the common women, they are written by an Officer of the King in a Booke, and the Master is bound to come euerie yeere with a certaine fee to this Officer, they are bound to answer their Master so much euerie moneth. When they are old, with Paynting they make them seeme young. And after they are not for that trade, they are altogether free, without any obligation either to Master or any bodie, and then they feed vpon that which they haue gotten.

The bondage
or slauerie of
some in *China*.

I spake so particularly of this matter, for to come to say that in this Countrey of *China* is no greater captiuitie then this of these Wenches. And let no man say, or affirme any other thing, for about the examining of it I laboured somewhat in *Cantan*, because some *Portugals* would affirme it otherwise. The captiuitie in this Countrey is in manner following. If any woman by the death of her husband remayneth a widdow, and hath nothing to maintayne her selfe with, neither the children that are left her are such as are able to get their liuing, neither hath shee any thing to giue her children; this Woman in this necessitie, commeth to a rich man, and agreeth with him for six or seuen Crownes, for a Sonne or a Daughter, and the price receiued shee deliuereth it; if it be a Daughter, shee serueth as aboue said for a common Woman, and is brought vp for that purpose: if it be a Sonne, hee serueth his Master some time. And when hee is of age to marrie,

marrie, the Master giueth him a Wife, and all the Children that are borne to him remayne free, and without any Obligation: notwithstanding, this Seruant is bound to giue his Master so much by the yeere, hauing a house by himselfe: for when he marrieth they giue him a house and he labourerth, either at some Trade, or by his industrie for to earne his liuing. And no man may sell any of these Slaues to the Portugals, hauing great penalties for it. The Women, as by being common, they looke for great profit of them, in no wise they will sell them, besides the running in to great penalties also. And all those which commonly are sold to the Portugals are stolen, they carry them deceiued, and secretly to the Portugals, and so they sell them: and if they were perceiued or taken in these stealths, they would bee condemned in the vtmost punishment. The Lawes of China giue authoritie to the Women for to sell their Children, and not to the Men, for as the Men are bound to get a liuing for himselfe and for his Children, if hee want the remedie, they hold that hee is in the fault of that. And that Man may the better labour for their liuing and their Childrens. So farre is China from hauing Slaues that altogether should bee captiues, that neither those which they take in warre are slaues: onely they are bound to the King, and are placed for Souldiers in places farre from their Countries where they were taken, eating of the wages they haue of the King. These doe weare for a deuice a red cap, as I saw the Tartarians weare in Cantan, which had beene taken in the warres.

§. IIII.

Of their Louthias, Mandarinues or Magistrates, their creation, priuiledges, maintenance, Of Prisons and Tortures; of the King and of Embassadors.

Every one that in China hath any office, command or dignitie by the King, is called *Louthia*, which is to say with vs *Señor*. How this Title is giuen him, we will in his place make mention of it. There are in euery Prouince of China one thousand *Louthias*, or according to others three thousand, besides those that are resident in the Court, by whom are ordayned all matters of the Kingdome, and to whom come all the waigh- tie matters of all the Realme. And because they are to dispatch with the King, and conuerse with him within doores, and it is not lawfull for other to conuerse with them, neither doe other see them, and they haue entrance where the Wiues of the King are, which are many, they are commonly Eunuchs. In euery Prouince are five, which among the rest are most principall, which haue a very great authoritie and maiestie in their persons, and are greatly reuerenced and honored, not onely of the common people, but also of all the other *Lothyas*.

The principall of the five is the Gouvernour, which in their language is called *Tutom*, to this come all matters both great and small of all the Prouince, and for the authoritie and maiestie of his person he is not resident where the other *Lothyas*; that hee may not bee frequented of them, and so he may be more esteemed and feared. To these come all the Rents of the Prouinces except the ordinarie expences, and by him as well the busineses as the Rents that are gathered, and all that hapneth in the Prouinces are referred and sent to the Court. The second dignitie of the Prouinces, is the Ouer-seers of the goods, which in their language is called *Ponchassi*: this hath the care to send to recouer through all the Prouince the Rents thereof, for the which hee hath many *Lothyas* vnder his iurisdiction, which are particular Officers for the busineses and recoueries of the goods. This prouideth all the ordinarie charges of the Prouince, and with that which remaineth he resorteth to the *Tutom*, that he may send it to the Court, this may enter-meddle in graue matters of the other Officers inferiour, and hath authoritie ouer them. Likewise, all the matters and affaires of the Prouince resort vnto him, to bee referred by him to the *Tutom*. Another chiefe dignitie vnder this is the chiefe Iustice, which in their language is called *Anchasi*, and though there be many other Officers of Iustice, this is aboue all, and by him are the dispatches distributed to the rest, and all matters of Iustice resort vnto him, as one that hath authoritie of the other inferiour. Another dignitie vnder this is the chiefe Captaine, who in their tongue is called *Aitao*. To this *Aitao* pertayneth to command to prepare the men of warre, and all that is necessarie of shipping, and victuals, and all other prouision against Enemies and against Theeues: to this belong also the busineses of strangers in cases which belong not to the goods. The fift and last of the great dignities, is of the chiefe Captaine which putteth in execution the matters of warre, and is resident in the Armies which the *Aitao*, being a land, doth ordayne: when it is necessarie besides the putting matters in execution and order, if the matter require his presence, he goeth in person: and so important may the matter be that the *Aitao* will goe. This is called in the Countrey language *Intchissi*. In the house of euery one of these, except the *Lutbissi*, which is the inferiour of the five, are other ten which are as Assistants, and are also of great authoritie, five of these doe sit at the right hand of the Principal in five chaires, recited before when

Sir, Master, or Lord.

Louthias of the Court Eunuchs.

The *Tutom*; Lieutenant, Deputie or Vice-roy.

The *Ponchassi* or Treasurer.

The *Anchasi* or chiefe Iustice.

The *Aitao* or chiefe Captaine.

His Lieutenant, the *Lutbissi*. Each haue ten Assistants.

Ensignes of
dignitie, girdle
and canopie.

The *Taiffu* or
Sheriffe.

The *Chuen* or
Iudge of the
Circuit, or
Visitor.

The *Quinchais*,
Commissio-
ners extraor-
dinarie.

The third
yeeres Vi-
sitor.

we spake of the buildings, and sue doe sit on the left hand: these in matters of importance are at the dispatching with the principall of the house, and the Principall dying or by any other meanes wanting, one of these according to his antiquitie remayneth in his stead: and if it be necessary to goe through the Prouince about some matter of importance, that appertayneth to the dignitie in whose house they assist, one of these doe goe with all the authoritie of the Principall. The sue that sit on the right hand, haue a greater degree and dignitie then the sue on the left hand. And as the dignitie consisteth in their Girdles and Canopies, those of the right hand weare Girdles of gold and Canopies of yellow, and those of the left hand weare Girdles of silver and Canopies of blew, or of changeable colour. The Girdles are little lesse then three fingers broad, and an inch thick, and all about of gold or of silver very well wrought made of peeces. The Canopies are very large and faire, which an Officer doth beare vpon a staffe a fathom long, of a Clouetree very faire, and they are lined with silke.

Besides these Assistants and the sue Principall, there is among the inferiour one of greater dignitie, which is the chiefe Jaylor, whom they call *Taiffu*, which haue very great houses of great receipts, where they haue great prisons, but neither this nor any that are vnder may weare girdle of gold nor silver, nor a yellow Canopie, except hee bee an Officer or Captaine of men of warre, that for fauour of a Gentleman may haue a yellow Canopie: the rest weare girdles of Tartaruga, or of other matter made like them of gold or silver, and their Canopies are of changeable stuffe or blew, and all these Inferiour doe speake to the Superiour, when they are before them on their knees, and doe kneele as long as they are with them, except the *Taiffu*, who when he cometh in kneeleth and riseth vp presently, and is alwayes standing. Euery one of the great ones haue many inferiour Officers vnder his iurisdiction, for the matters and businesse necessary to the Office of euery one, all which as they are the Kings officers haue the Title of *Lothias* and their badges or signes. The sue Principall with their Assistants doe weare for a Badge the Kings Armes on their breasts, and on their backs, which are certayne Serpents wouen with gold thred.

Euery yeere there is one sent to euery Prouince as a Iustice, which is called *Chuen*, which commeth to take account of all the *Lothias*, great and small, and examineth all the Students and chooseth *Louthias*, and visiteth the Prisons, and all that is necessary to be seene and provided for in all the Prouince. He useth all meanes to spie out their briberie and injustice, and hath power to displace or preferre. When this entreteth newly into this Citie, it is not lawfull for any to worke, they shut their doores and no body walketh through the street, and to preserue his worship and authoritie they will not boldly communicate in sight of the people, and many Officers with Banners displayed of crimson silke, and all the *Louthias* both great and small are bound to goe and meet him. The same entertainment is vsed to euery one of the sue, when hee commeth newly to the Prouince where hee is to administer his office. There bee other dignities about all these, which are called *Quinchais*, which is to say, a Plate or Scale of gold: which are not sent but about very serious matters and of great importance, for the Kingdome, or the King. Euery *Lothia* of what qualitie soeuer hee bee, high or low, hath for a signe or badge, besides the abovesaid, a high Cap and round with certayne eares a-crosse, made of small twiggies wouen with twist.

All the Offices are given from three to three yeeres, and none is given for longer time, and all given to men that are not borne in that part of the Land, because they may not be mooued by affection in matters of Iustice that belong to their offices, and also because they may not become mightie, thereby to preuent insurrections. The offices are distributed by the King with the counsell of the Eunuchs. And because the Eunuchs are those with whose counsell the offices are distributed, they are many times mightily bribed.

The *Chuens* which the King doth send euery three yeeres, commonly are sound men, and bring commonly more authoritie then the rest. And these (besides the yearly *Chuen*) are sent the third yeere, when euery Officer endeth his office. After that the *Chuens* haue taken the accounts of the *Lothias*, they visit the Prisons and giue audience to the Prisoners. After this hee with the other principall *Lothias* doe visit the Schollers, and all those that hee findeth to haue studied well, he fauoureth and giueth them good hopes, and those which haue not studied well, if hee see they haue abilitie for it, he commandeth them to bee whipped. And if already they haue bene whipped and haue not amended, he commands them to bee put some dayes in prison, besides the whipping of them, that with these punishments from thence forward they may haue a better care. If hee findeth that they neither learne, nor haue abilitie, hee thrusts them out of the Schooles.

This doe onely the *Louthias* which come euery three yeeres, after they haue dispatched the businesse of the Prouince, hee busieth himselfe in making *Louthias*: which hee maketh in forme following. He commandeth to come to the principall Citie of the Prouince, all the Students that haue well studied, from all the Cities of the Prouince, and from all the great Townes, where the King hath Schoole-masters of free Schooles, maintayned at his charge (for the Students did learne the Lawes of the Realme, maintayned at their fathers charge.) And all the principall

Louthias

Louthias of the Prouince assembled with *Chaan*, there examine very well every one of the Students, demanding of him many things concerning their Lawes: and if he answereth to all well, they command him to be put apart, and if he be not yet well instructed, eyther they send him to learne more, and if it be through his default, eyther they whip him, or being whipped they send him to Prison, as the *Portugals* law many in Prison for that fault, where they were in Prison also. After the Examination ended, the *Chaan* ritheth up, and all the *Louthias* with great Ceremonies, Feasts, Musickes, and Playings, they give the degree to every one of them they found sufficient, which is to give him the Title of *Louthia*. And after the passing many dayes in Feasts, and Banquets, they send them to the Court to receive the Badges of *Louthias*, which are Caps with eares, broad Girdles and Canopies, and there they stay the distribution of Offices. So that in this manner they make the *Louthias*, which in the Countrey are to administer Iustice. The *Louthias* for war are made by Chivalries and famous Deeds which they did in war. So that in these Countreys men are much honoured by their Learning, or by their Chivalrie, and yet more for their Learning, because of the Learned doe commonly come the five principall *Louthias* and the Assistants.

Taa.

When the *Louthias* are old and wearied in the charges and Offices of the Kingdome, they are lodged in their owne Countries or where they will, and the King alloweth them every moneth so much according to their qualitie for their maintenance till they dye. And because the Ordinaries of the *Louthias* are commonly sufficient, and with some abundance, they may alwayes spare some thing to leaue their Wiues and Children. Before the inferiour Ministers these Officers doe all things of their Offices and matters of Iustice, for they are present at all things, to preuent Bribes and partialitie. Whiles the *Louthia* is sitting in the chaire to heare the parties and dispatching of matters, the Porters, Scriueners, Sergeants and other Ministers are at the doore: and when any person commeth with any matter, one of the Porters with a high voice that hee may be heard where the *Louthias* sitteth (for it is farre off) telleth who and wherefore he com- 10 meth. And none speaketh to the *Louthias* but vpon both their knees on the ground, and commonly they speake a prettie space distant from him. And from thence with a high voyce well vnderstood, he propoundeth his case, or sheweth him his Petition written in Paper, and lifting vp the hand desireth him to receiue it, and to shew him Iustice, to whom a Minister runneth, the *Louthia* making a signe to him, and presenteth it vnto him. After the *Louthia* readeth it, he eyther dispatcheth him of that which he asketh, writing at the foote of the Petition with redde Inke, or remitteth the party to an inferiour Officer to be dispatched. So I saw it done to a Petition which a woman presented to the *Ponchasi*.

The promptnesse and readinesse wherewith the *Louthias* are serued, and how feared they are, cannot be written with the Pen, nor expressed with the Tongue, but it must be seene with the eye for to know what it is. All doe their messages running and with great speed, not onely the Scriueners and Sergeants, and other Ministers, but also the Inferiour *Louthias* to the Superiour. And if any fayleth neuer so little of his diligence and accustomed speed, or committeth the lesse negligence in the World before the *Louthia*, hee hath not any remission, but immediately they put a little flagge in his hand, and he must hold it in his hand kneeling vntill the parties be dispatched: and then the *Louthia* commandeth to giue him the stripes that he thinke good: and the stripes are such as hereafter we will speake of. Whereby all the Ministers in the Houses of the *Louthias* are playstered or marked with the stripes, so that already among themselves they hold it a disgrace not to be marked with the stripes, because it is a thing generally common among them. And when the *Louthia* waxeth angry or is moued at any thing, it is a wonder to see the 30 trouble and feare that is in all the standers by.

I being in the House of the *Ponchasi* with certayne *Portugals*, intreating for the deliuerance of certayne *Portugals* that were Captiues, and imprisoned in the layle, for the which wee carried him eight Ounces of Ambar (which at that time was much esteemed of them, and now by carrying so much it is not so much esteemed) we not being willing to giue him the Ambar, without giuing vs both the *Portugals*, he tooke an occasion for to terrifie vs, to waxe angry against the youth, seruant of a *Portugall* which was in our company and was our Interpretour. Wherefore he rose out of the Chaire and became red as bloud, and his eyes were inflamed, and set one foote forward, putting his thumbes vnder his Girdle, looking to the standers by with a terrible countenance: stepping forward, lift vp his foot and stamp on the ground with it, and said with a terrible voyce. *Taa*, which is to say, Whippe. It was a wonderfull thing to see in how little space they tooke the youth, tyed his hands behind with a Cord, and laid him on his belly with his thighes bare, and two Beadles placed them selues on each side one, with one foote forward, and their Whip readie for to giue him the stripes that they should bee commanded to giue him. Certainly it was all done in a moment. The Merchants that came in our fauour were troubled, and stood aside shaking with feare. At this time one of the Prisoners said, Sirs, be not afraid, for he cannot whip that youth. And in truth we knew it was so, for according to their Lawes there was no fault, whereby he might command him to be whipped, and there was a penaltie if hee did it. The *Louthia* hearing the voyce of the Prisoner, commanded to carry him with speed to the layle againe. And the *Louthia* did this for nothing else but to make vs afraid, that wee should giue him the Ambar for one of the Prisoners, for he could not giue vs the other, because he was already adjudged to dye, and the sentence confirmed by the King, which was irreuocable, and he was willing to haue the Ambar, for he hoped to haue of the King a greater Reward then to be *Ponchasi* for the Ambar. For he did eate it for to sustayne life, and many dayes were past since they had demanded it of the *Portugals*, but as they knew not the name we vsed for it, they neuer vnderstood one another till that the yeare after they had for the *Anao* of *Cantan* a little for the deliuey of a *Portugall*: whereby he was aduanced to *Ponchasi*. And this would also haue for the same effect the Ambar at our hands for to be aduanced.

Notwithstanding, we seeing our selues tyed and without an Interpretour by whom to speake, and the youth in disposition of whipping, we gaue him the Ambar. There came presently a Cha- 60 fing-dish for to proue it, and the Prisoner cast a little in the fire, and seeing the smoake ascend right vp, he was contented, and scattering the smoake hee set his Nose ouer it and said, *Haoo*, which is to say, it is very good. And commanded presently to deliuer vs the Prisoner free. It was wonderfull to see with what speed it was weighed, and the pieces told and put in a Paper, and

and noted by the Scriuener before them all the number of the pieces, and the waight that was there. And after that Paper another, all glued presently. And after that another. And in the third, the *Panchasi* set his Marke with Red Letters, and what was containd within. And at the same instant came a little Boxe, and being put in it was presently stopped, and vpon the cover a Paper glued, and vpon it the Marke of the *Panchasi*: and presently came an inferiour *Louthia* Captayne of the Army with his Souldiers, and all asfarre off kneeled downe, and said at euery word *Quoo*, which is to say, Yes, enclining their heads and hands to the ground. And receiving his message, presently as he came running, so he returned running with the Boxe to take shipping for to carrie the Ambar to the *Tutaen*, to bee sent from him to the King. All this that I haue spoken was done in a trice before wee stirred from the place where wee were. This was also desirous to haue the Ambar of vs before the *Louthia* of that seate did come, which was looked for euery day to come a new: for this was onely a Lieutenant.

When any *Louthia* that is not of the *fine*, neither the *Chaen*, neither very inferiour, but as they say of the meaner sort, goeth abroad into the Citie, he hath before him a good space two Ministers with two Maces that seeme to be of siluer, vpon long staues, made almost after our fashion, and the one goeth on the one side the street, the other on the other-side. After these a little distant, goe other two, each with a straight Cané, or Pole in his hand. After these goe other two in the same distance with two Canes trayling along the Pauements, which are the Instruments of Iustice wherewith they doe whip. After these goe other two with two Tables like two Targets bowed and playstered, whereon is written the Title of the Officer that passeth. The foremost signifie in their Maces, that he which passeth is in his Office in the Kings place. And the two straight Rods, the right of Iustice which he ought to doe. Those which carrie the Instruments of whipping, doe carrie for a signe certayne long Red Laces, with two great round Tassels at the ends. And all doe carrie very gallant Plumes very well made of the points of a Peacocks taylor. And those that goe before doe now and then say with a loud voyce *Hunph*, which is to say, *Give place, or beware*. While these doe passe it is not lawfull in any wise for any one to crosse, or goe in the middle of the street, vnder paine of being whipped without any remission.

It chanced two *Portugals* went through the middest of a street in *Cantan* walking, and behind them came an inferiour *Louthia*, which had but foure Ministers, which came crying according to their custome they should giue place. The *Portugals* either gaue no heed or made no regard of those that came: wherefore a Minister comming, gaue a great thrust to the one of them, and the *Portugall* answered him with a boxe on the eare; and being bound with his hands behind him, was to goe to Prison. It was necessary for the *Portugall* to come to the *Louthia*, and pacifie him with faire words, and he made an end of pacifying him with fourteene Crownes that hee gaue him. After the Ministers commeth the *Louthia* in a rich Chaire gilt and very faire, on foure mens backes. These Chaires are great and sumptuous, and the *Louthia* goeth compassed with all the Scriueners and other his Ministers. And all of them while hee goeth by the street, goe alwayes running. And the *Louthia* weareth a long blacke Coate of fine Searge with long sleeues, which is the common wearing: he carrieth the armes a crosse like a Frier, and his eyes low without looking to any side: for euen with their eyes they will not communicate with the common people, for to preserue their authoritie the more with them, that may be more feared.

When any of the foure *Louthias* goeth abroad, except the *Tutan*, or the yearely *Chaen*, they goe accompanied with many Ministers, and sixe Officers doe carrie them on their backes, and they leade a spare Horse with a faire Saddle, and a cloth of Silke ouer it; the Chaire wherein they goe is more sumptuous and richer, they carrie before foure, *fine*, or sixe Maces, and two or three Instruments and more Ministers.

When the *Chaen* that commeth euery three yeeres commeth into the Citie, or for forme important affaires goeth abroad, or some *Quinchay*, they shut vp all the doores in the streets where he passeth, and none doth worke, nor is any seene in the street when hee passeth. The shops are shut vp, and euery thing of sale is out of sight. The Officers with coards along the street, doe make three lanes, where the triumphing Arches are made in three Arches: and through the middest passeth the *Louthia* onely, and the Officers on the two sides. And it is not lawfull for any to passe through the middle: they are accompanied of many inferiour *Louthias* that goe on foot. And on the one side of the street, and the other are many armed men and others with Banners of red Silke aduanced, all standing in good order. In the Court of the house where he is to goe in, are many Kettle-drummes set vpon high stakes to be well played vpon, which are covered downe to the ground with clothes of Silke quartered. After these are many placed in order, with Flags of Silke on high. After these in the same order, are many with Trumpets, and all are in great silence. As soone as the *Louthia* appeareth they all sound their Instruments in order: the sound of the Instruments ended, they remayne all in so great a silence, as if there were no bodie in the Court, being a great multitude of people. The people as they come in, doe place themselves on the sides, the middest betweene the Instruments remaying voide, whereby the *Louthia* passeth. Before these *Louthias* goe commonly many inferiour *Louthias*, of those that carrie Maces when they goe abroad. There are also in this Court many men at Armes with long

Manner of
their pompe in
the street.

Pompe of the
greater Officers.

Chaen and
Quinchays
splendour.

Noyse and
silence.

long gilt Lances, and with very faire Armour. This is all in the first Court. In the second, along the Gallerie (whereof wee spake aboue, when wee treated of the houses of the great men, that onely the *Louthias* passe through them) on the one side and the other are many inferiour *Louthias* with Head-pieces on their heads, some gilt, some with Siluer, and with Swords hanging at their belts, and with Coats and Caslocks made in fashion of Frockes with studs of Gold and Siluer, that it seemeth set vpon plates, but it is a very fine worke made vpon very single Silke, which serueth onely for brauerie and ornament. Some vse on their heads white Head-pieces garnished with Gold, but are of a very fine leafe and thinne, that seeming an Armour, are not. In this manner also are the *Louthias* inferiours, which doe enuiron the superiour *Louthias*. The Chaires where these doe goe are very rich and of great price, and very sumptuous. The Tables whereon is written the titles of dignitie of these Great men are written with letters of Siluer. And when any of these doth enter newly in any Citie with these feasts and entertainments, all the *Louthias*, great and small, receiue him at a house (where hee landeth very rich and noble) and from thence they accompanie him vnto his lodging, and being lodged, all doe take their leaue with many curtesies. In these receiuinges they vse no sumptuous apparell. The great men (when most) weare Coats of red Silke. In their owne feasts in their houses, and secretly one with another, and in banquets they vse crimson Silke, and all the brauerie in their apparell, and in rich attires.

Manner of
inquisition.

Whensoever by way of inquirie or examination any Witnesses are demanded, the *Louthias* doe it in publicke before the Officers and ministers of his Office, and before all the rest that by any meanes chance to be there present, and this because no falshood may be vsed, nor any sleight in the manner of inquiring: and by consequence in writing. And first they examine the Witnesses seuerally, and if they doe agree, they ioine them, and examine the one before the other, till they bring them to altercations and quarrelling by words, that by the words the one speaketh to the other they may come to the knowledge of the truth. And if by this meanes they doe not comprehend the truth, they giue them many stripes and tortures: that by one meanes or other they may know the truth of the matter they enquire or examine: they vse no Oath, for they esteeme nothing of their Gods. They haue notwithstanding a respect in the witnessing the persons of qualitie, and of whom is presumed that they will not easily lye. When they examine any matter of great weight, or a graue person, then they write themselves, the pro-
cess of the examination. It chanceth sometimes that some of the *Louthias* for a great bribe,

No Oathes.

Bribe-trickes.

or for great friendship let some Prisoner loose, and put another in his place, for there neuer wanteth one naughtipacke that will put himselfe in danger of stripes, or death for interest, or they bring him in by deceit, deceiuing him with words, and making the matter light vnto him, and giuing him some interest, they name him as the Prisoner they will let loose, that the faults and punishments of the guiltie may fall vpon the innocent. And when sometime in this sort they cannot let the guiltie person loose, they labour to bribe all the Officers to giue him for dead among those that die in the prisons. But these inuentions are not vsed but where the bribes are great, or the adherents very great and mightie. And for to eschew the inconueniences which sometime fall out, when any are imprisoned for weightie matters, or the Prisoners haue great aduersaries, they set downe all the markes of the Prisoners, and cause them to be set at the foot of the writing, that so they may not vse any of the malices abouesaid.

Cane-whip-
ping. Much
is here written
of Prisons, and
Executions,
which I haue
omitted.
* Huge Reeds,
or Canes.

With how much pietie and leasure they kill, with so much crueltye and speed they whip, for in this case they forgieue none. The stripes are such that with reason it might be a sufficient punishment for to amend, for the canes wherewith they whip are plaited below about foure fingers broad, and goe straightning vpward vnto the end, where the Beadles hold them: and they are almost a finger thicke (for in those parts are canes as big as a mans leg. And because in *Portugall* are many witnessers of knowledge of the same, I dare simply affirme it, and they are of eighty or ninety spans long.) And their whips are made of these canes of the height of a middle statured man to the breasts. They giue the stripes on the hammes of the mans legs, being layd on his breast, and his legs layd along, and his hands tyed behind. And the Beadles butchering, as they are commanded, the *Louthias* are altogether void of compassion, talking one with another, eating and drinking, and picking their teeth. The crueltye is such, that the Court is full of bloud: and when they haue made an end of whipping them, they carrie them not, but like Butchers with much crueltye they draw them by one leg to the Prison. And when the Beadles are whipping, they tell with a loude voyce the stripes. If the miserable Prisoners which are in the Prison for grievous faults at the time that this correction is to be done can get a piece of a coard, wherewith they may hang themselves, they goe to buffets who shall hang himselfe first, that that the butcherye of the stripes be not executed on them. And the *Portugals* affirmed, which were in Prison, that in one day fortie Prisoners did hang themselves in the Prison where they were, to escape the stripes they were rather willing to lose their liues. And they affirmed, that the coard was very short, that scarcely there was so much as to come about the necke to tie it, and on a sticke which they sticke in the wall, and because the sticke was very lowe, they pulled one another till they were choaked, going to buffets who should hang himselfe first. When any

Miserable eua-
sion of misery.

doth

doth kill himselfe, or dieth in the Prison, it is the order in *China* to cast him in the house of office, and there to be three dayes, where the Rats doe eat him vp. And sometimes the *Chinases* Prisoners doe eat of them with hunger.

Every Citie that is the Head of the Province, hath thirteene Dungeons, and in fixe of them are the men condemned to death: there are in *Cantan* upward of fiftene thousand Prisoners. There are in every Dungeon onely for the condemned to death, one hundred and twenty men that serve for watches, and have a *Louhia* over them, as their Captaine, or Gentleman of the round. There be two sorts of tortures, one for the hands, another for the feet, which are nipped by certaine sticke, to the bruising or breaking of the fingers or toes with cruell paines.

Store of free-people, and therefore store of bond, by abused libertie and store.

30 The King hath as many wiues as he listeth: and within doores all the service is almost of women: whereof he hath a great multitude: and likewise great store of Eunuches, and there is no other people within the house. The first son that is borne vnto him of any of his wiues succeedeth in the Kingdome. The rest he marrieth, and at such time as he marrieth them they are lodged in some of the Cities that he best liketh; where they are well provided of all things necessarie for their maintenance, as sonnes to the King. But they neuer see the Kings face any more after they are married.

The King his wiues, children and seruants.

40 All the Embassadors that come to *China*, with Embassages from Kings or Princess, receiue of the King great rewards and fauours, and they giue him Cap and signes of *Lothia*, whereby he hath great priuiledges in the Countrey. They may whip and punish the *Chinases* themselves, so that they touch not any *Louhia* small or great: for to meddle with these would breed great inconueniences. This was the cause that *Fernando Perez* of *Adrade* going for Embassador to *China*, that the *Chinases* did rise against him, and hee escaped with his hands on his head, losing some ships: because hauing done vnaccustomed Iustice in *China*, and vpon the *Chinases*, and they forbearing him, he would stretch his hand to the *Louhies*. The goods of the Embassador, and of his is free from customes, and to him and to his they giue lodgings to dwell in, and all things necessarie while they are in the Countrey. No man, nor not a *Louhia* may disturbe him in any thing, nor any thing of his. One *Lothia* would haue whipped one of *Siam*, for hauing carried a message to the Prison to certaine *Portugals* that were in Prison. One of the Officers said vnto him that was present, that he was of *Siam* of the Embassage, wherefore being satisfied therewith he let him goe in peace, desiring him he would not doe so againe.

Embassadors priuiledges.

* *Lopo Soares* was sent Vice-roy, An. 1515. and sent this *Perez* with a fleet to *China*, and therein *Thomas Perez* Embassador, who were well entertaigned there. But some *Portugals* vsurping *Tamusa*, a *China*-land, and exercising all outrages, caused *T. Perez* after 4. moneths trauell from *Cantan* to the Court to bee taken for a Spie, and sent backe to *Cantan*, where hee died in Prison among male-factors. See *Maffius* l. 5. c. 6 who seemeth to disagree: or else his peoples act was ascribed vnto him. For hee had left 6. ships there, when he went to *Cantan*.

50 With the *Chinases* being so great as at the beginning we said and declared, the King hath such meanes and industrie in the gouernement thereof, that every moneth he knoweth all that passeth through all the Realme, and he knoweth it in this manner. All matters of Iustice and of Warre, and all annuities with all that is worth the knowing in every one of the Provinces is referred by the *Louhies*, and by other persons to the *Ponchasi*, and the *Ponchasi* maketh a relation of all by writing to the *Tuan*. The *Tuan* is bound to send a Post every moneth to the Court, which carrieth the information in writing to the King of all things that passed in that moneth. They count their moneths by the Moones, and they are to be dispatched in such sort, that at the beginning of every Moone the Posts from all the Provinces are to bee at the Court; that the first day of the Moone it may be presented to the King, as relations of all things happened in every Province. And although some Provinces are farre distant from the Court, that the Posts cannot come within a moneth to the Court: notwithstanding in such manner they agree that every Moone the King is to haue the relation of every Province, though the one be of more time then another, because of the one Province being farre and the other neere.

Disguised Intelligencers.

The manner of the Posts is as among vs, they carrie a Horne which they winde when they come neere to any Towne, that they may haue a Horfe ready in every Towne within a certaine distance. They are bound when they heare the Horne to haue a Horfe ready for him, which is done with such diligence as all the other seruices of the Officers. And where hee is to passe a Foord, as soone as he windeth his Horne with great speed they carrie him a Boat, as I saw once going to the Citie of *Cantan*, in a Towne that was in the way, called *Chaman*. Sometimes it hapneth by the malice of some *Louhies*, when they haue any interest in it, to keepe some things concealed that the King knoweth not: but woe to them if the King come to know it, for they are grievously punished, as wee shall see in a case hereafter following. Being in *India*, and also in *China*, I was enformed that sometimes the King of *China* doth send some men of great confidence disguised through diuers parts of *China*, that they might see how his Officers did serue him. And if there were any nouelties or changes whereof they made him not priue, or some things that were necessarie to provide.

60

§. V.

d. V.

Of the Portugall commerce with the Chinois; of the seuerer Iustice executed vpon certaine Magistrates, for wrongs done to the Portugals.

BEcause we spake many times before of Portugals, captiues in China, it will bee a conuenient thing that the causes of their Captiuitie be knowne, where many notable things will be shewed. Yee are to know, that from the yeere 1554. hitherto, the businesses in China are done very quietly and without danger: and since that time till this day, there hath not one ship beene lost but by some mischance: hauing lost in times past many. Because as the Portugals and the Chinaes were almost at warres, when the Armies came vpon them, they weighed anchor and put for the Sea, and lay in places vnsheltered from tempests, whereby the stormes comming, many were lost vpon the coast, or vpon some shelues. But from the yeere 1554. hitherto, Lionell of Sofa, borne in Algarue, being chiefe Captaine, and married in Chaul, made a couenant with the Chinaes that they would pay their duties, and that they should suffer them to doe their businesses in their Ports. And since that time they doe them in Cantan, which is the first part of China: and thither the Chinaes doe resort with their Silkes and Muske, which are the principall goods the Portugals doe buy in China. There they haue sure Hauens, where they are quiet without danger, or any one disquieting them, and so the Chinaes doe now make their merchandise well: and now both great and small are glad with the trafficke of the Portugals, and the fame of them runneth through all China. Whereby some of the principall of the Court came to Cantan onely to see them hauing heard the fame of them. Before the time aforesaid, and after the rising which Fernando Perez of Andrade did cause, the businesses were done with great trouble, they suffered not a Portugall in the Countrey, and for great hatred and loathing called them *Facni*, that is to say, *Men of the Demill*.

Portugals called *Facni*, and bared. Name-policy.

Lawes of Navigation.

Couertise lawless.

China Pirates.

Liampo.

Chincheo. Namqui, or Nanquin.

Now they hold not commerce with them vnder the name of Portugals, neither went this name to the Court when they agreed to pay customes: but vnder the name of *Fangin*, which is to say, *People of another Coast*. Note also, that the law in China is that no man of China doe sayle out of the Realme in paine of death. Onely it is lawfull for him to sayle along the coast of the same China. And yet along the coast, nor from one place to another in China it selfe it is lawfull to goe without a certificate of the *Louthias* of the Countrey whence they depart: in which is set downe, whither they goe, and wherefore, and the markes of his person, and his age. If he carrieth not this certificate he is banished to the Frontiers. The Merchant that carrieth goods carrieth a certificate of the goods hee carrieth, and how hee payed duties for them. In euery Custome-house that is in euery Prouince hee payeth certaine duties, and not paying them he loseth the goods, and is banished to the frontier parts. Notwithstanding the abovesaid lawes some Chinaes doe not leaue going out of China to trafficke, but these neuer returne againe to China. Of these some liue in Mallaca, others in Siam, others in Patane, and so in diuers places of the South some of these that goe out without licence are scattered. Whereby some of these which liue already out of China doe returne againe in their ships vnto China, vnder the protection of some Portugall: and when they are to dispatch the duties of their ships they take some Portugall their friend to whom they giue some bribe, that he may dispatch it in his name and pay the duties. Some Chinaes desiring to get their liuing, doe goe very secretly in these ships of the Chinaes to trafficke abroad, and returne very secretly, that it bee not knowne, no not to his kindred, that it bee not spread abroad, and they incurre the penalty that the like doe incurre. This law was made because the King of China found that the much communication of the strangers might be the cause of some risings. And because many Chinaes with an excuse of sayling abroad became theues and robbed the Countreys along the Sea coast, and yet for all this diligence there are many Chinaes robbers along the Sea coast.

These Chinaes that liue out of China, and doe goe thither with the Portugals, since the offence of Fernando Perez of Andrade did direct the Portugals to begin to goe to traffick to Liampo; for in those parts are no walled Cities nor Villages, but many and great Townes along the coast, of poore people, which were very glad of the Portugals, and sold them their prouision whereof they made their gayne. In these Townes were these Merchants of China which came with the Portugals, and because they were acquainted, for their sake the Portugals were better entertained. And as these Chinaes which were among the Portugals and the Countrey Merchants in their buyings and sellings, they reaped a great profit thereby. The inferiour *Louthias* of the Sea coast receiued also great profit of this trafficke, for they receiued great bribes of the one and of the other, to giue them leaue to trafficke, to carrie and recarrie their goods. So that this trafficke was among them a long while concealed from the King, and from the superiour *Louthias* of the Prouince. After these matters had for some space beene done secretly in Liampo, the Portugals went by little and little forward, and began to goe and make their merchandise to Chincheo, and to the Ilands of Cantan. And other *Louthias* permitted them already in euery place for the bribes sake, whereby some Portugals came to trafficke beyond Namqui, which

which is very farre from *Cantan*, without the King being witting; or hauing knowledge of this trafficke. The matters fell out in such sort, that the *Portugals* wintered in the Ilands of *Liampoo*.

Some *Chinaes* that were among the *Portugals*, and some *Portugals* with them, came to disorder themselves in such manner that they made great stealths and robberies and killed some of the people. These euils encreased so much that the clamour of the iniured was so great, that it came not onely to the superiour *Louthias* of the Prouince, but also to the King. Who commanded presently to make a very great Armada in the Prouince of *Fuquen*, to driue the theeues from all the coast, especially those that were about *Liampoo*, and all the Merchants as well *Portugals* as *Chinaes* were reputed in this number of theeues. Being ready they went forth along the coast of the Sea. And because the windes serued them not for to goe for *Liampoo*, they went to the coast of *Chincheo*, where finding some ships of *Portugals*, they began to fight with them, and in no wise did they permit any wares to come to the *Portugals*; who stayed many dayes there (fighting sometimes) to see if they could haue any remedie for to dispatch their busineses. But seeing they had no remedy, they determined to goe without it. The Captaynes of the Armie knowing this, sent a message to them very secretly by night, that if they would that any goods should come to them, that they should send them something. The *Portugals* very glad with this message, prepared a great and sumptuous present, and sent it them by night because they were so aduised. From thence-forward came many goods vnto them, the *Louthias* making as though they tooke no heed thereof, dissembling with the Merchants. And so were the busineses ended that yeere, which was the yeere 1548.

Disorders of
outragious
Chinois, and in-
solent Portu-
gals.

Briberie.

The yeare following, which was 1549. there was a straighter watch vpon the Coast by the Captaynes of the Armada, and greater vigilancie in the Ports and entrances of *China*, in such sort that neyther goods nor viuals came to the *Portugals*; but for all the vigilancie and watching there was, (as the Ilands along the Coast are many, for they all ranne in a row along the *China*) the Armies could not haue so much vigilancie, that some wares were not brought secretly to the *Portugals*. But they were not so many that they could make vp the ships ladings, and the vttering those goods which they had brought to *China*. Wherefore leauing the goods which they had not vttered in two ships of *China*, of such *Chinaes* as were alreadie dismembred from *China*, and Traffique abroad vnder the shadow of the *Portugals*, (in the which they left thirtie *Portugals* in charge with the ships and with the goods) that they might defend the ships, and in some Port of *China* where best they could they should sell the goods that remayned in change for some Wares of *China*, and hauing ordayned this they departed for *India*.

As the people of the Armie of the *Chinaes* saw the two ships remayne alone, the other ships being gone, they came vpon them, being induced by some Merchants of the Countrey, which discovered to them the great store of goods that remayned in those Vessels, and the few *Portugals* that remayned to keepe them. Then they layd an ambush for them, dressing some *Chinaes* ashore, which being in armes made as though they would set vpon the ships to fight with them, because they were close to the Land, that the *Portugals* being prouoked, should come out of the ships to fight with them, & so the ships might remaine without defence to them of the Armada, which lay watching in an ambush, & did accordingly set vpon the two Vessels with great furie & celeritie, and slaying some *Portugals* that were in the ships, and wounding others they tooke the ships. The chiefe Captayn which is the *Luthissi*, remayned so glorious, that he vsed great crueltie on some *Chinaes* that hee tooke with the *Portugals*. Hee laboured to perswade foure *Portugals* which had more apparance in their persons then the rest, that they should say, they were Kings of *Malaca*, he perswaded them in the end, because hee promised to vse them better then the rest, and therewith he prouoked them. And finding among the cloathes that hee tooke a Gowne and a Cap, and asking of one of those *Chinaes*, that were taken with the *Portugals* what habit that was, they put in his head, that it was the habit of the Kings of *Malaca*, wherefore he commanded presently to make three Gownes by that patterne, and three Caps, and so he apparelled them all foure in one sort, to make his fayning true, and his victory more glorious. To this was joyned the couetousnesse of the *Luthissi* to see if hee could detayne the many goods that hee had taken in ships.

Mountayne
Mouse-birth.

Spectatum ad-
missi visum te-
nentis amici 2

And to doe this more safely, not to be taken in a lye, he did great executions vpon the *Chinaes* which he tooke with the *Portugals*, and killing some of them determined to kill the rest. These things comming to the eares of the *Aitao*, which was his superior, he disliked greatly that which hee had done, and sent to him presently that hee should kill no more of those which remayned, but that he should come to him presently bringing with him all the prize as well of the men that were yet aliue, as of the goods. The *Luthissi* ordering his Iourney for to goe to the *Aitao*, as he was commanded, he commanded foure Chaires to be giuen to them, to whom hee had giuen title of Kings, to be carried in them with more honour. And the other *Portugals* were carried in Coopes with their heads out fast by the neckes betweene the boards that they could not pull them in, but hauing some wounds in their heads, they went bare headed to the Sunne and to the Dew, and were carried on mens shoulders. The *Luthissi* went with this Prize through the Countrey with great Majestie, he carried before him foure Banners displayed, on the which

Pillory Coops.

were

were written the names of the foure Kings of *Malaca*. And when he entred into the Townes, he entred with great noyse and Majestie, with sound of Trumpets, and with Cryers which went crying the great victorie, the *Luthisi* (naming him) had gotten of the foure great Kings of *Malaca*. And all the great men of the Townes went to receiue him with great Feasts and Honours, all the Townes running to see the new Victorie.

Damnabie vanitie.

When the *Luthisi* came with all his pompe and glory where the *Aitao* was, after the giuing him particular account of all things passed and of his victory, he manifested to him his pretence and agreed with him to diuide the goods betweene them both, and that he should continue the fayning of the Kings of *Malaca*, that both might receiue of the King Honours and Rewards. This being set downe they both agreed that to keepe this in secret, the *Luthisi* should go forward in that which he had begun, to wit, he should slay all the *Chinas*, that came there captiue. And presently they commanded presently to put it in effect, and so they slue ninetie and odde *Chinas*, among whom were some young youths slaine. They left notwithstanding three or foure youthes and one man, that by them (bringing them to their owne hand) they might certifie the King all that they would, that was to make of the *Portugals* Theeues, and conceale the goods which they tooke: certifying also by these that those foure were Kings of *Malaca*. And the *Portugals* not hauing the Language of the Countrey, neither had any person to intreate for or fauour them would perish: and they being mightie would make their owne Tale good, following the end by them intended. And for this cause they slue not the *Portugals*, but left them alive, for the greater triumph of the victorie.

These *Luthis* could not doe this so secretly, but many of those which they slue had kindred in the Countrey, which did grieue at the death of theirs. Whereby, as well by these, as by some *Louthias* that were zealous of Iustice, and would not giue consent in so great euils and fraudulent dealings, this matter came to the Kings eares, and hee was informed how the *Portugals* were Merchants which came to traffique with their Merchandize to *China*, and they were no theeues, and how they had falsly giuen the Title of Kings to foure of them, to the end the King should shew great fauours, and doe them great honours; and how they had vsurped great store of goods: and that for to conceale these euils, they killed men and children without fault.

The Kings Iustice.

As soone as the King was informed of all aboue said, hee dispatched present from the Court a *Quinchay*, (of whom we spake before, that is to say plate of Gold) And with him he sent other two men of great authoritie also, of the which the one had bene *Panchasi*, the other *Anchasi*, these two as Inquisitors and Examiners of this matter: Commanding and commending to the *Chien* which that yeare went to visit the Prouince of *Fuquen*, and to the *Panchasi* and *Anchasi*, of the same Prouince, their ayde and assistance to the *Quinchay*, and the two Inquisitors in all things necessary for them in these busineses. The two that came with the *Quinchay*, as Inquisitors, went presently to certayne great Houses which had in the middest a great Court, and on the one side of the Court were certayne great and faire Lodgings, and on the other side others in the same sort. Each of the Inquisitors entred in one of these Houses aforesaid. The Prisoners were presently brought, and were presented to the one of them, who for courtesie remitted them to the other, that he should examine them first, with many words of courtesie. The other sent them againe with great thankfulness. So they were sundry times carried from one to another, each of them willing to giue the hand to the other of beginning first, till that one of them yeelded and began. And as the matter was of great import and much commended to them, all that the guiltie and the accusers did speake these Officers did write with their owne hands. The *Portugals* had for a great Enemy a *China* man and Pilot of one of the shippes that were taken, and a *China* youth which was a Christian, which from a childe was brought vp among the *Portugals*: for they were both made of the part of the contrarie *Louthias*, mooued by gifts and promises: the *Louthias* being already deposed of their Offices, and held for guiltie, for the which they were accused before the King.

Manner of examination.

But though they were thus handled, they were so mightie and so fauoured, that they could take from the *Portugals* a *China* youth that serued them for an Interpreter, which vpon their Petition was againe deliuered them. They examined them in this order, the accused were first brought and examined by one of these Officers, and they carried them to the other to bee examined againe. And while the other was re-examining the accused, the accusers were brought to him that examined first. And as well the accused as the Accusers were all examined by both the Officers, that afterward they both seeing the confessions of the one and the other, they might see if they did agree. And first they examined euery one by himselfe. Afterward they examined them altogether, for to see if the one did contrary the other, or did contend and reprehend one another, that so by little and little they might gather the truth of the case. In these Examinations the two were contrary, to wit, the Pilot, and the Christian *China* youth, and had many stripes, because they agreed in some things. The *Louthias* did alwayes shew themselves glad to heare the *Portugals* in their defence, who alleaded in their defence, that if they would know who they were, and how they were Merchants and not Theeues, they should send to enquire of them along the Coast of *Chincheo*, that there they should know the truth, which they might know

know of the Merchants of the Countrey, with whom a great many yeares agoe they had dealt, and that they might know that they were no Kings, for Kings do not abase themselves so much as to come with so few mento play the Marchants, and if before they said the contrary, it was by the deceit of the *Luthiss*, and to receive better vsage of him in their persons.

Having this information of the *Portugals*, presently with the opinion of the *Quinchay* and the other Officers, they went to *Chincheo* both of them, to enquire of the truth of that which the *Portugals* had told them; and discovering there the truth of the *Portugals* matter, and the lies of the *Luthiss*, and of the *Aitao*, they dispatched presently a Post; wherein they commanded to put the *Luthiss* and the *Aitao* in Prison, and in good safeguard. Wherefore from thence forward all men began to fauour them very much. If notwithstanding this examination had bin made in *Liamboo*, as it was in *Chincheo*, the *Portugals* could not haue chosen but haue past it ill, according to the greatnesse of the euils they had done there. After the *Louthias* returned from *Chincheo*, they commanded to bring the *Portugals* before them, and comforted them very much, shewing them great good-will, and saying to them, that they knew already they were no theues, but were honest men: and they examined againe as well they as their aduersaries, to see if they contradicted themselves in any thing of that which before they had spoken. In these later re-examinations the Pilot of *China*, which before had shewed himselfe against the *Portugals*, and had bene on the *Louthias* side, seeing that the *Louthias* were already in Prison, and that now they could doe them no good, and that the *Portugals* were already fauoured, and that the truth was already knowne, he gainesaid himselfe of all that he had said, and said that it was true that the *Portugals* were no theues nor Kings, but Merchants, and very good men, and discovered the goods which the *Luthiss* had taken when he surpris'd the *Portugals*. And that till then he had said to the contrary, was for the great promises which the *Louthias* promised him, and for the great threats they vs'd to him if he did it not. But seeing they were already in Prison, and he knew they could doe him no hurt, he would now speake the truth. They then commanded to torment him, and whip him very sore, to see if he would gainay himselfe, but he still continued in the same confession.

All the examinations and diligences necessarie in this businesse ended, the *Quinchay* willing to depart for the Court with his companie, would first see the *Portugals*, and giue a sight of himselfe to the Citie. The sight was of great Maiestie in the manner hee went abroad in the Citie, for he went accompanied with all the great men of it, and with many men in Armes and many Ancients displayed and very faire, and with many Trumpets and Kettle-drummes, and many other things which in such pompe are vs'd. And accompanied in this manner, hee went to certaine noble and gallant houses. And all the great men taking their leaue of him, hee commanded the *Portugals* to come neere him, and after a few words he dismissed them: for this was not but onely to see them. Before the *Louthias* departed they commanded the *Louthias* of the Countrey, and the Taylors, that all of them should fauour the *Portugals*, and giue them good entertainment, and should command to giue them all things necessarie for their persons. And commanded euery one to set his name a piece of Paper, because that while they were at the Court, and their matters were dispatching, they should not craftily make some missing. And they commanded to keepe the *Luthiss* in good safety, and the *Aitao*, and that they should not let them communicate with any person. Being gone from the Citie, they lodged in a small Towne, where they set in order all the Papers, and ingrossing onely that which was necessarie. And because the Papers were many, and were much to write, they helped themselves with three men. And hauing ingrossed all that they were to carrie to the Court, they burned all the rest. And because these three men which they tooke for helpers should not spread abroad any thing of that which they had seene, or heard, or written, they left them shut vp with great vigilancie, that none should speake with them, commanding to giue them all things necessarie very abundantly vntill the Kings Senterie came from Court, and were declared. The Papers being presented in Court, and all seene by the King and by his Officers, he pronounced the Sentence in * manner and forme following.

Pimpu by commandement of the King. Because Chaipuu, Huchin Tutan without my commandement, or making mee priuie thereto, ster the taking of so much people, commanded them to bee slayne: I being willing to provide therein with iustice, sent first to know the truth by Quinsituam, my Quinchai, who taking with him the *Louthias* which I sent to examine the truth of the *Portugals*, and also of the *Aitao* and *Luthiss*, which had informed mee, that the *Portugals* were theues, and that they came to all the coast of my Dominions to robbe and to murder. And the truth of all being knowne, they are come from doing that which commanded them. And the Papers being seene by my Pimpu, and by the great *Louthias* of my Court, and well examined by them, they came to giue mee account of all. And likewise I commanded them to be perused by Ahimpu, and Altu Chaen, and by Athaylissi Chuquin, whom I commanded to oversee those Papers very well, because the matters were of great weight; wherein I would provide with iustice. Which thus being seene and perused by them all, it was manifest that the *Portugals* came many yeeres before to the coast of *Chincheo* to doe their affaires, which was not conuenient they should be in the manner they did it, but in my Markets, as was alwaies the custome in all my Ports. These ten of whom hitherto I knew not: I know now that the people of

abridged.
The Kings
Sentence.

Chincheo went to their ships about their affaires, whereby I know already that they are Merchants and not theenes, as they had written to me they were.

And I doe not blame Merchants to helpe Merchants, but I put great fault in my Louthias of Chincheo: because that when any ship came to my Ports, they should haue knowne if they were Merchants, and if they would pay their duties, and if they would pay them, to write presently unto mee. If they had done so; so much euill had not beene done. Or when they were taken, if they had let mee know it, I had commanded to set them at libertie. And although it bee a custome in my Ports the ships that come unto them to be measured * by cubits for to pay their duties: these being very farre off, it was not necessarie but to let them doe their businesses, and goe for their Countries. Beside this my Pontoos * which knew these men to be Merchants did not tell it mee, but concealed it from me, whereby they were the cause of many people being taken and slaine. And those that remayned alieue is they could not speake, did looke toward Heauen, and demanded from their hearts iustice of Heauen (they know no other God supreme but the Heauen.) Besides these things I know that the Aitao, and the Luthissi did so much euill for conetousnesse of the many goods which they tooke from the Portugals, having no regard whether those which they tooke, and tooke the goods from, were good or euill men. Likewise the Louthias along the Sea coast knew these men to be Merchants, and certified mee not. And all of them, as disloyall, were the cause of so much euill. I knew more by my Quinchey, that the Aitao, and the Luthissi had Letters, by the which they knew that the Portugals were no theenes but Merchants, and knowing this they were not contented with the taking of them, but they wrook many lyes unto mee, and were not contented with killing of the men, but killed children also, cutting off the feet of some, of others the hands, and at last the heads of them all: writing unto mee they had taken and slayne Kings of Mallaca. Which case I helcening to be true, griene in my heart.

And because hitherto so many cruelties haue beene used without my commandement, from hence forward I command they be not done. Besides this the Portugals resisted my Armie, being better to haue let themselves beene taken, then to kill my people. Moreover, this long since they came to the coast of our Dominion about their affaires in manner of theenes, and not as Merchants: wherefore if they had beene naturall as they are strangers they had incurred paine of death & losse of goods, wherefore they are not without fault. The Tutan by whose commandement those men were slaine, said * that by this deed I should make him greater; and the people that he commanded to be slayne after they had no heads, their hearts, (that is their soules and their bloud) required iustice of Heauen. I seeing so great euils to be done, my eyes could not indure the sight of the Papers without teares, and great griefe of my heart. I know not, my Louthias seeing they tooke this people, wherefore they let it not goe, that I might not come to know so many cruelties and so great. Wherefore seeing alitthese things, I doe create Senfuu chiefe Louthia, because hee did his dutie in his charge, and tolamee truth. I create also chiefe Louthia Quinchio, because hee wrote the truth to mee of the Pontoos which went to doe their merchandise in secret with the Portugals to the Sea. Those which are euill I will make them baser then they which sowe Rice.

Likewise because Pachou did trafficke with the Portugals and for bribes did permit the Merchants of the Countrey to trafficke with the Portugals, and yet doing these things, wrote unto mee that the Portugals were theenes and that they came to my Dominions onely to steale. And the same hee said also to my Louthias (which presently answered, that he lyed, for they knew already the contrarie.) And therefore such a one, and such a one, (he nameth ten Louthias) It is nothing that all you be banished to red Caps *, to the which I condemne you: but you deserue to be made baser as I doe make you. Chaen for taking these men thou saydest thou shouldest be greater, and being in the doing of so much euill thou saydest thou didst not feare mee: such a one, and such a one (he nameth nine) for the taking of these men yee say, I would make you great, and without any feare of mee yee all lyed, such a one, and such a one (he nameth many.) I know also yee tooke bribes. But because you did so, I make you baser, (he deprieth them of the dignitie of Louthias.)

Such a one, and such a one (he nameth many. If the Aitao and the Luthissi would kill so many people, wherefore did you suffer it? But seeing that in consenting you were accessarie with them in their death, all are in the same fault. Chifuu, and Chanichifuu, were also agreeing to the will of the Aitao and the Luthissi, and were with them in the slaughter, as well these that were as those that were not in fault. Wherefore I condemne you all to red Caps. Lupuu let him haue a good heart, because the Tutan being willing to kill this people, he said that he should let mee first know it. To him I will doe no harme, but good, as he deserueth, and I command that he remayne Louthia. Sanchi I make my Anchaff of the Citie of Canfi. The Antexio I command to be deposed of his honour. Assaon seeing hee can speake with the Portugals, let him haue honour and ordinarie, and he shall be carried to Chaquean, where hee was borne. (This is the youth with whom the Portugals did defend themselves, seruing them for Interpreter, they gaue him title of Louthia, and mayntaance.) Chinque Head of the Merchants that went to the Sea to trafficke with the Portugals, and receiued them, bringing great store of goods a land, it shall be demanded of him, and set in good safeguad for the mayntenance and expences of the Portugals, and I condemne him and his foure Companions to red Caps, and they shall be banished whither my Louthias shall thinke good.

To the rest guilty and imprisoned for this matter, I commaund my Louthias to giue to euery one the

punishment he deserueth. I command the Chaen to bring me hither the Tutan, that his faults being per-
 nsed by the great men of my Court, I may command to doe iustice on him as I shall thinke good. (This
 Tutan was also a consenter in the wickednesse of the Aitao and the Luthissi: for the Luthissi,
 and the Aitao made him partaker, and gave him part of the booties which they rooke from the
 Portugals, that as the head he should hold for good that which they did: for in truth they durst
 not haue done that which they did if he had not giuen consent, and agreed with their opinion.
 This hearing what was judged against him, hung himselfe, saying, that seeing the Heauen had
 made him whole, that no man should take away his head. The Poutoos which yet are in Prison,
 shall be examined againe, and shall presently be dispatched. Chuichum shall presently be deprived from
 10 being a Louthia, without being heard any more. Chibee, head of sixe and twenty, I command that hee
 and his be all set at libertie, for I find but little fault in them. Those which owe any money, it shall bee
 recovered of them presently. Famichin, and Tomichier shall dye, if my Louthias doe thinke it ex-
 pedient; if not let them doe as they thinke best. Alfonso of Paua, and Peter of Cea (these were Por-
 tugals) Antonie and Francisco (these were Slaues) finding them to be guilty of killing some men of my
 Armie, shall with the Luthissi and Aitao be put in Prison, where according to the custome of my King-
 dome, they all shall dye at leisure. The other Portugals that are aliue with all their Seruants which are
 in all fiftie one, I command them to be carried to my Citie of Canfi, where I command they be well in-
 treated, seeing my heart is so good towards them that for their sake I punish in this sort the people of my
 Countrey, and deale so well with them; for it is my custome to doe Iustice to all men. The Louthias of the
 20 Armada, finding they are in little fault, I command they bee set free (I deale in this sort with all men,
 that my Louthias may see that all that which I doe, I doe it with a good zeale.) All these things I com-
 mand to be done with speed. Hitherto the sentence of the King.

The Portugals that were freed by the sentence, when they carried them whither the King
 commanded, found by the way all things necessary in great abundance, in the Houses aboue-
 said, that the King had in euery Towne for the Louthias when they trauell. They carried
 them in seates of Chaires made of Canes on mens backs, and they were in charge of in-
 ferious Louthias, which caused them to haue all things necessarie through all places where they
 came, till they were deliuered to the Louthias of the Citie of Canfi. From that time they had
 no more of the King euery moneth but one Foan of Rice (which is a measure as much as a man
 30 can beare on his backe) the rest they had need of, euery one did seeke by his owne industry. Af-
 terward they dispersed them againe by two and two, and three and three through diuers pla-
 ces, to preuent that in time they should not become mightie joyning themselues with others.

Those that were condemned to death, were presently put in Prison of the condemned. And
 Alfonso of Paua had a meanes to giue the Portugals to vnderstand that were free, that for his
 welcome they had giuen him presently fortie stripes and intreated him very euill, shewing him-
 selfe comforted in the Lord. Those which were at libertie, now some and then some, came to
 the ships of the Portugals; by the industrie of some Chinas, which brought them very secretly
 for the great gifts they received of the Merchants of Portugall; which made their Merchandize
 in the Citie of Cantan.

¶ VI.
 Of the Religion in China; difficultie of bringing in Christianitie.
 Terrible Earth-quakes and Tempests in
 China.

IN the Citie of Cantan in the middelt of the Riuer which is of fresh water and very
 broad, is a little Ile, in the which is a manner of a Monasterie of their Priests; and
 within this Monasterie I saw an Oratorie high from the ground very well made,
 with certayne gilt steps before it, made of carued worke, in which was a woman ve-
 ry well made with a childe about her necke, and it had a Lampe burning before it. I suspecting
 that to bee some shew of Christianitie, demanded of some Lay-men, and some of the Idoll
 Priests which were there, what that woman signified, and none could tell it mee, nor giue mee
 any reason of it. It might well be the Image of our Ladie, made by the ancient Christians, that
 Saint Thomas left there, or by their occasion made, but the conclusion is, that all is forgotten:
 it might also be some Gentiles Image. The greatest God they haue is the Heauen, the letter that
 signifieth it, is the principall and the first of all the Letters. They worship the Sun, the Moone,
 60 and the Starres, and all the Images they make without any respect. They haue, notwithstanding,
 Images of Louthias, which they worship for hauing beene famous in some one thing or other.
 And likewise Statues and Images of some Priests, of the Idols, and some of other men for some
 respects particular to them. And not only worship they these Images, but whatsoeuer stone they
 erect on the Altars in their Temples.

Fables.

They call commonly these Gods *Omitteffois*, they offer them Incense, Benjamin, Ciuet, and another Wood which they call *Cayo*, * *Laque*, and other smelling things. They offer them likewise *Ocha*, whereof is mention made afore. Every one hath a place to pray, and at the entries behind the doores of the Houses, in the which they haue their carued Idols: to the which euery day in the Morning and at Euening they offer Incense and other perfumes. They haue in many places (as well in the Townes as out of them) Temples of Idols. In all the ships they sayle in, they make presently a place for to worship in, where they carrie their Idols.

In all things they are to enterprize either Iournies by Sea or by land, they vse Lots & cast them before their Gods. The Lots are two sticks made like halfe a Nut-shell, flat on the one side, and round on the other: and as bigge againe as an halfe Nut, and joynd with a string. And when they will cast Lots, they speak first with their God, perswading him with words, and promising him some Offring if he giue him a good Lot, & in it shew him his good Voyage or good successe of his busines. And after many words they cast the Lots. And if both the flats sides fall vpward, or one vp another downe, they hold it for an euill Lot, and turne them toward their Gods very melancholy, they call them Dogs, with many other reproaches. After they are wearie of rating them, they soothe them againe with faire milde words, and aske pardon, saying, that the Melancholy of not giuing them a good Lot, caused them to doe them injurie, and speake injurious words vnto him: but that they will pardon them and giue them a good Lot; and they promise to offer him more such a thing (because the promises are the better for them that promise them, they make many and great promises and offerings) and so they cast Lots so many times till they fall both on the flat sides which they hold for a good Lot, then remayning well contented, they offer to their Gods that which they promised. It happeneth many times when they cast Lots about any weighty matter, if the Lot fall not out good, or launching a ship to the Sea it goeth not well, and some euill came to it, they runne to their Gods and cast them in the water, and put them in the flame of the fire sometimes, and let them scorch a little, and spurning them often, and tread them vnder foot, and giue them rayling words, till their businesse be ended, and then they carrie them with playing and feasts, and giue them their Offerings.

They hold for a great Offering a Hogges head boyled: they offer Hennes, Geese, Duckes and Rice all drest, and a great pot of Wine. After they present it all to the Gods, they set his portion apart, which is, to put in a Dish, the small points of the Hogs eare, the bils, and the points of the clawes of the Hennes, Geese, and Duckes, a few cornes of Rice very few, and put in with great heed, three or foure drops of Wine very heedfully, that there fall not many drops from the Pot. These things so set in a Bason that they set them on the Altar to their Gods for to eate, and they set themselves there before the Gods to eate all that which they bring.

They worship the Deuill also, which they paint after our fashion: and say that they worship him because he maketh those which are good, Devils; and the euill, he maketh Buffes, or Kine, or other beasts. And they say that the Deuill hath a Master that teacheth him his Knaueries: these things say the base people: the better sort say they worship him because hee shall doe them no hurt.

When they will launch any new ship to the Sea, their Priests being called by them come in to the ships to doe their Sacrifices with long side Garments of Silke. They set about the shippe many flags of Silke, they paint in the prow of the ship the Denill, to the which they make many reuerences and Offerings, and say they doe it because the Deuill shall doe no hurt to the ship. They offer to the Gods Papers with diuers Images painted, and other of sundry kinde of cuttings, and they burne them all before the Idols with certayne Ceremonies and well tuned Songs, and while their singing doth last, they ring certayne small Bels, and among all they vse great store of eating and drinking.

In this Countrey are two manner of Priests, the one that haue their head all shauen, these weare on their heads certayne course Caps like vnto Canopie cloth, they are high, and flat behind (higher before then behind a hand breadth) made like a Mitre with Pinacles: their wearing is white Coates after the Lay-mens fashion. These liue in Monasteries, they haue dining places, and Cels, and many pleasures within their wals. There be others whom commonly the people doe vse for their Burials and Sacrifices, these weare their haire, and blacke silke Coates, or of Searge or Linnen, and long like the Lay-men, hauing for a token their haire made fast in the Crowne of the head with a stick very well made like a closed hand, varnished blacke. None of these Priests haue Wiues, but they liue wickedly and filthily.

The first day of the yeare, which is in the new Moone of March, they make through all the Land great Feasts, they visit one another, the chiefe principally doe make great Banquets. How much these people are curious in the rule and gouernment of the Countrey, and in their common Traffique, so much they are beastly in their Gentilities, in the vse of their Gods and Idolatries. For besides that which is said, they haue many *Gentilicall* Lyes, of men that were turned into Dogges, and afterward into men, and of Snakes that were conuerted into men, and many other ignorances.

I entred one day into a Temple and came to an Altar, where were certaine stones set vp which

which they worshipped, and trusting in the little estimation they held their Gods in, and in being men that would be satisfied with reason, I threw the stones downe to the ground; whereat some ranne very fiercely at me and angry, asking me wherefore I had done that, I went mildly to them, and smiling, said to them, because they were so inconsiderate that they worshipped those stones. They asked me wherefore should they not adore them? and I shewed them how they were better then they, seeing they had the vse of reason; feete, hands, and eyes, where-with they did diuers things that the stones could not doe, and that seeing they were better they should not abase and esteeme so little of themselves as to worship things so vile they being so noble. They answered me that I had reason, and went out with me in company, leauing the stones on the ground: so that there is likelihood and shew of their becomming Christians. And it maketh also much to this purpose, their not making any difference of meate, as all the people of India doth. And seeing that among all the meates they esteeme the Porke most, it is almost impossible for them to become *Turkes*.

Notwithstanding, there are two verie great inconueniences to make any Christians in this Countrey. The one is, that in no wise they will permit any noueltie in the Countrey, as in some sort it may bee seene in the matter of the *Moors*. So that whatsoeuer noueltie that is in the Countrey, the *Louthias* take order presently how to repress it, and it goeth no further. Whence it happened in *Cantan*, because they saw a *Portugall* measure the entries of the Gates, they set presently Watches that none should come in without licence, nor goe vpon the Walls.

The second is, that no strange person may enter into *China* without leaue of the *Louthias*, nor be in *Cantan*, which doe giue him a certaine time to bee in *Cantan*. The time of the licence ended, presently they labour to haue them depart. Wherefore because I and those which were with me were one moneth longer in *Cantan*, they set vp written bords that none should keepe nor harbour vs in their houses, vnder payne of so much, till wee held it our best cheape to goe to the Ships. To the abovesaid is ioyned the common people to bee greatly in feare of the *Louthias*, wherefore none of them durst become a Christian without their licence, or at the least many would not doe it. Therefore as a man cannot be settled in the Countrey, hee cannot continue Preaching, and by consequence he cannot fructifie and preserve the fruit. There was notwithstanding one way how to Preach freely, and fruit might be made in the Countrey, without any dogge barking at the Preacher, nor any *Louthia* doe him hurt any way: which is, if hee haue a licence for it of the King; And it might bee obtained if a *solemne Embassage* were sent with a *solemne present* to the King of *China*, in the name of the King of *Portugall*, religious men going with the *Ambassadour* to obayne the licence to goe about the Countrey, shewing themselves to bee men without Armes. And how our Law is no preiudice to his Dominion and Gouvernement, but a great helpe that all might obey him and keepe his Lawes. This onely remedie there is in *China*, to reape any fruit, and not any other (speaking humanely.) And without this it is impossible for any Religious men to Preach or fructifie, and because I had not this remedie, hauing the abovesaid inconueniences, I came away from *China*, and therefore neither I, nor they of the company of *Iesvs* which enterprised already this businesse sundry times, could fructifie in *China*.

This people hath besides the ignorances abovesaid, that filthy abomination, that they refraine no sexe among them. Notwithstanding, I Preaching sometimes, as well publike as priuately against this vice, they were glad to heare mee, saying, that I had reason in that which I sayd, but but that they neuer had had any that told them that was a sinne, nor any thing euill done. It seemeth that because this sinne is common among them, God was willing to send them a grievous punishment in some places of the earth, the which was common in all *China*. I being in the Citie of *Cantan*, and being willing to know of a rich *China* Marchant the euils that had happened in the Countrey, and hee not able to tell it me by word of mouth, gaue me a Letter which they had written vnto him of what had happened: saying to me, that I should translate it and giue it him againe: but not trusting me hee translated it presently, and remayning with the copie gaue me the principall, which I translated into *Portugall* with the helpe of one that could speake our language and theirs, the tenour of the Letter is this.

The principall *Louthias* of *Sanxi* and of *Sauiton*, wrote vnto the King, saying, that in those Prouinces the earth did shake terribly, and the dayes waxed darke like night (hee saith not how long) a South-sayer told them all that should happen. In the yeere before in the moneth of September, the earth opened in many places, and vnder it were heard great noyses like the sound of Bells, there followed a great winde with much rayne, and the winde ranne about all the Compasse. This winde is called in *China*, *Tufanne*, and many yeeres it bloweth but once a yeere, and it is so raging, that it driueth a Ship vnder sayle on the Land a great space, and the men cannot keepe their feete, not leauing and holding one by another, and it doth things worthie admiration and incredible. In the yeere that I was in *China*, in the part where the *Portugals* were, they shewed the Boat of a Ship of a good bigneffe, and the place where it was a land (that this winde carryed it, might bee a great stones cast from the water) and many did affirme it to mee, that the winde had such force, that it carryed it tumbling till it blew it into the Sea. And all the houses the *Portugals* had made of timber, and couered with strawe, which were many and

Prouisions against stay of Strangers.

Notes

Chinois Sodomites.

Plagues happening in China.

Tufon, a terrible tempest.

were built vpon great stakes, and not very high, it threw them all downe breaking the stakes. And one house being fastened with foure Cables, where many *Portugals* retired themselves, at the last fell also, and onely one that was sheltered with a high place escaped that it fell not. To blow downe these houses was nothing, for it doth many other things incredible. This winde is almost euerie yeere in *China*, the which within twentie foure houres that it raigneth, it runneth about all the points of the Compasse. With this winde, and the Lands being shaken with the Earthquakes, many Cities fell and were made desolate, in the which dyed innumerable people.

Vinyanfu, swallowed vp.

Another Citie quire perished. *Leuchimen*.

Hien.

Puchio.

In a Citie called *Vinyanfu*, in this day was a great Earthquake. And on the west side a great Fire burst out, that swallowed vp all the Citie, in the which, innumerable people perished, escaping in one place two, in another three, and so some of the *Mogores* escaped. In another Citie neere to this, there happened the same, but in this none escaped. In a Citie called *Leuchimen*, the Riuer increased in such sort, that it ouer-flowed the Citie, where infinite people were drowned. In a Citie called *Hien*, was an Earthquake, with the which many houses fell, which slew neere eight thousand soules. In *Puchio*, the house of the Kings kinsman fell and slew all that were in the house, except a Childe of seuen or eight yeeres old his sonne, (which was carried to the King) and day and night was a noyse heard vnder the earth, like the sound of Bells.

Cochue.

Enchimoen.

Inchumen.

In a Countrey called *Cochue*, with fire from Heauen and with many waters of a Floud, many perished, and the land remayned vnable to bee cultivated againe. In a Countrey called *Enchimoen*, at midnight the houses fell, and the Citie remayned desolate and ruined, where perished neere one hundred thousand soules. In a Citie called *Inchumen*, in one day and a night, the Riuer did flow and ebbe ten times, and with the great floud many people perished. Hitherto the translation of the Letter: that which followeth, was heard by word of mouth of the *Portugals* that were in the Port of *Cantan* in the moneth of May, and I receiued the Letter in September.

Sanxi.

Bloudie shower.

In a Citie called *Sanxi*, from midnight till five of the clocke in the morning, the earth shooke three times, the eighteenth of Ianuarie, 1556. and the next day after, from midnight till noone, happened the same: the next day following, the twentie of the sayd moneth, the earth shooke mightily after midnight with great Thunder and Lightnings, and all the Prouince was burnt, and all the people thereof, and all the Suburbs, Townes, and Cities: they say it is from bound to bound, fittie or sixtie leagues, that there was not one saued but a Childe, sonne to a kinsman of the King, which was carried to the King. And the third of Februarie in the same yeere, in the Citie of *Panquin* where the King is, fell a shower of rayne like bloud. These newes brought one of *China* that came to *Cantan*, from a Citie neere to *Sanxi*, to giue newes to a *Lou-thia* that hee should resort to his owne house, and said, that the Citie where he was a dweller was ouerflowne, and that he knew not whether it would perish with the rest. That which ought to bee held for truth, is, that in three Prouinces which commonly are sayd to be destroyed, there was no more destruction then of those places whereof the Letter maketh mention, or little more. The agreeing in the Childe, sheweth that the Towne whereof the Letter maketh mention with the childe, was in the Prouince of *Sanxi*. This hath more apparance of truth, because the Letter was written from the Court, then to say that all the three Prouinces perished.

After the happening of the things abouesaid: the same yeere in the Prouince of *Cantan*, a woman which went to the *Panchasi*, told him that the Prouince of *Cansi* would bee destroyed with power from Heauen, the which after shee was well whipt, was imprisoned: but in the moneth of May of the same yeere, there fell great store of rayne verie hot, with the which the earth seemed to burne, and many people perished with the great heate: but the Prouince perished not altogether: wherefore this woman was carried to the King, which was in prison in the place where the *Portugals* were, which told this.

Reader, forasmuch as this Author hath often mentioned, and related also the storie of certaine *Portugals*, Prisoners in *China* (one of which hee nameth *Galotte Perera*) from whom hee receiued great part of his *China* intelligence: I haue thought good to adde hither *Pereras* relations, translated long since out of Italian, and published by *R. Willes*; hauing abbreviated some things in the Frier, that you might rather haue them at the first hand from this Gentleman which saw them: but abbreviated to preuent tediousnesse.

CHAP. XI.

The relation of GALEOTTO PERERA, a Gentleman of good credit,
that lay Prisoner in China.

His Land of *China* is parted into thirteene * Shires, which sometimes were each one a Kingdome by it selfe, but these many yeeres they haue beene all subiect vnto one King.

10 The King maketh alwayes his abode in the great Citie *Pachin*, as much to say in our language (as by the name thereof I am aduertised,) the * Towne of the Kingdome. This Kingdome is so large, that vnder fve moneths you are not able to trauell from the Townes by the Sea side, to the Court and backe againe, no not vnder three moneths in Poste at your vrgent businesse. The Post-horles in this Countrey are little of bodie, but swift of foote. Many doe trauell the greater part of this iourney by water in certaine light Barkes, for the multitude of Riuer, commodious for passage from one Citie to another.

The King, notwithstanding the hugeness of his Kingdome, hath such a care thereof, that euerie Moone (by the Moones they reckon their moneths) he is aduertised fully of whatsoever thing happeneth therein. Before that wee doe come to *Cincoo*, we haue to passe through many places, and some of great importance. For this Countrey is so well inhabited neere the Sea side, that 20 you cannot goe one myle but you shall see some Towne, Borough, or Hostrie, the which are so abundantly provided of all things, that in the Cities and Townes they liue ciuilly. Neuerthelesse, such as dwell abroad are very poore, for the multitude of them euery where so great, that out of a Tree you shall see many times swarme a number of Children, where a man would not haue thought to haue found any one at all.

From these places in number infinite, you shall come vnto two Cities very populous, and being compared with *Cincoo*, not possibly to bee discerned which is the greater of them. These Cities are as well walled as any Cities in all the world. As you come into either of them, standeth so great and mightie a Bridge, that the like thereof I haue neuer seene in *Portugall*, nor else 30 where. I heard one of my fellowes say, that he told in one Bridge fortie Arches. The occasion wherefore these Bridges are made so great, is for that the Country is toward the Sea very plaine and low, and ouerwhelmed euer as the Sea-water encreaseth. The breadth of the Bridges, although it be well proportioned vnto the length thereof, yet are they equally built, no higher in the middle than at either end, in such wise that you may directly see from the one end to the other, the sides are wonderfully well engraued after the manner of *Rome* workes. But that wee did most maruell at, was therewithall the hugeness of the stones, the like wherof, as we came into the City, we did see many set vp in places dishabited by the way, to no small charges of theirs, howbeit to little purpose, wheras no body seeth them but such as do come by. The Arches are not made after our fashion, vaulted with sundry stones set together: but pauered, as it were, whole stones 40 reaching from one Pillar to another, in such wise that they lie both for the Arches heads, & gallantly serue also for the high-way. I haue been astonied to behold the hugeness of these aforelaid stones, some of them are twelue paces long and vpward, the least eleuen good paces long, and an halfe. The wayes each where are gallantly pauered with foure-square Stone, except it be where for want of Stone they vse to lay Bricke: in this voyage we trauelled ouer certaine Hills, where the wayes were pitched, and in many places no worse pauered than in the plaine ground.

The Countrey is so well inhabited, that no one foot of ground is left vntilled: small store of cattell haue we seene this way, we saw onely certaine Oxen wherewithall the countrey-men doe plough their ground. One Oxe draweth the Plough alone, not onely in this Shire, but in other places also, wherein is greater store of cattell. These countrey-men by art doe that in tillage, which we are constrained to doe by force. Here be sold the voydings of Close-stooles, although there wanteth not the dung of beasts: and the excrements of man are good marchandise throughout all *China*. The Dung-farmers seeke in euery street by exchange to buy their durty ware for Hearbs and Wood. The custome is very good for keeping the Citie cleane. There is great abundance of Hennes, Geese, Duckes, Swine, and Goates, Wethers haue they none: the Hennes are sold by weight, and so are all other things. Two pound of Hennes flesh, Goose, or Ducke, is worth two Foi of their money, that is, three halfe pence. Swines flesh is sold at a peny the pound. Beeffe beareth the same price, for the scarcitie thereof, howbeit Northward from *Fuquico*, and further from the Sea coast, there is Beeffe more plentie, and sold better cheape, Beeffe onely excepted, great abundance of all these Viands wee haue had in all the Cities wee passed through. And if this Countrey were like vnto *India*, the Inhabitants wherof eate neither Hen, 60 Beeffe, nor Porke, but keepe that onely for the *Portugals* and *Moore*s, they would bee sold here for nothing. But it so falling out that the *Chineans* are the greatest eaters in all the world, they doe feed vpon all things, specially vpon Porke, the fatter that is vnto them, the lesse lothsome. The highest price of these things aforelaid, I haue set downe, better cheape shall you sometimes buy

*You shal haue a more full description of the Countrey by later Authors: who yet could not so well as this, tell their iudiciall proceedings, sentence, prisons, executions, &c. these 13. are to be vnderstood besides the two royall Prouinces.

Pachin, *Pochang*, or *Paquin*, or *Pequim*.

**Cambalu* signifieth the same, and so the *Mogolls* call this Citie.

Wayes pauered, bricked, or pitched.

Culture and husbandry.

buy them for the great plentie thereof in this Countrey. Frogs are sold at the same price that is made of Hennes, and are good meat amongst them, as also Dogs, Cats, Rats, Snakes, and all other vncleane meates.

Loutea Com-
mencement of
Act.

The Cities be very gallant, specially neere vnto the Gates, the which are maruellously great, and couered with Iron. The Gate-houses built on high with Towers, the lower part thereof is made of Bricke and Stone, proportionally with the walls, from the walls vpward, the building is of Timber, and many stories in it one aboue the other. The strength of their Townes is in the mightie Walls and Ditches; Artillery haue they none. The streets in *Cinceo*, and in all the rest of the Cities wee haue seene are very faire, so large and so straight that it is wonderfull to behold. Their houses are built with Timber, the foundations onely excepted, the which are laid with Stone, in each side of the streets are painteses, or continuall Porches for the Marchants to walke vnder: the breadth of the street is neuertheless such, that in them fiftene men may ride commodiously side by side. As they ride they must needs passe vnder many high Arches of triumph, that crosse ouer the streets made of Timber, and carued diuersly, couered with Tile of fine Clay: vnder these arches the Mercers do vtter their smaller wares, and such as list to stand there are defenced from raine, and the heat of the Sunne. The greater Gentlemen haue these Arches at their doores: although some of them be not so mightily built as the rest.

I shall haue occasion to speake of a certaine order of Gentlemen, that are called *Loutea*, I will first therefore expound what this word signifieth. *Loutea*, is as much to say in our language as *Sir*, and when any of them calleth his name, he answereth, *Sir*. The manner how Gentlemen are created *Louteas*, & do come to that honour and title, is by giuing a broad Girdle not like to the rest, and a Cap, at the commandement of the King. The name *Loutea* is more generall and common vnto moe, than equalitie of honour thereby signified, agreeth withall. Such *Louteas* that doe serue their Prince in weightie matters for iustice, are created after triall made of their learning: but the other which serue in smaller affaires, as Capitaines, Constables, Sergeants by Land and Sea, Receiuers, and such like, whereof there be in euery Citie, as also in this, very many are made for fauour: the chiefe *Louteas* are serued kneeling.

The whole Prouince *China* is diuided, as I haue said, into thirteene Shires, in euery Shire at the least is one Gouvernour, called there *Tutan*, in some Shires there be two. Chiefe in office next vnto them be certaine other named *Chians*, that is, high Commissioners, as you would say, or Visi-
ters, with full authoritie in such wise, that they doe call vnto an account the *Tutanes* themselves, but their authoritie lasteth not in any Shire longer than one yeere. Neuertheless, in euery Shire, being at the least seuen Cities, yea, in some of them fiftene or sixteene, besides other Boroughs and Townes, not well to be numbred, these Visi-
ters where they come, are so honoured and feared, as though they were some great Princes. At the yeeres end their circuit done, they come vnto that City which is chiefe of others in the Shire, to doe Iustice there: finally, busying themselves in the searching out of such as are to receiue the order of *Louteas*, whereof more shall be said in another place.

Ouer and besides these officers in the chiefe Citie of each one of these aforesaid thirteene Prouinces, is resident one *Ponchiaffi*, Captaine thereof, and Treasurer of all the Kings reuenues. This Magistrate maketh his abode in one of the foure greatest houses that be in all these head Cities. In the second great house dwelleth another Magistrate, called *Anchiaffi*, a great officer also, for he hath dealings in all matters of Iustice. *Tuzi*, another officer so called, lieth in the third house, a Magistrate of importance, specially in things belonging vnto warfare, for thereof hath hee charge. There is resident in the fourth house a fourth Officer, bearing name *Taisfu*. In this house is the principall prison of all the Citie. Each one of these Magistrates aforesaid may both lay euill doers in prison, and deliuer them out againe, except the fact bee heynous and of importance: in such a case they can doe nothing, except they doe meet altogether. And if the deed deserue death, all they together cannot determine thereof, without recourse made vnto the *Chian* wherefoeuer he be, or to the *Tutan*: and eftsoones it falleth out, that the case be referred vnto higher power.

In all Cities, not onely chiefe in each Shire, but in the rest also are meanes found to make *Louteas*. Many of them doe studie at the Prince his charges, wherefore at the yeeres end they resort vnto the head Cities, whither the *Chians* doe come, as it hath beene earst said, as well to giue these degrees, as to sit in iudgement ouer the prisoners.

The *Chians* goe in circuit euery yeere, but such as are to be chosen to the greatest offices, meet not but from three yeeres to three yeeres, and that in certain large halls appointed for them to be examined in. Many things are asked them, whereunto if they doe answer accordingly, and be found sufficient to take their degree, the *Chian* by and by granteth it them: but the Cap and Girdle whereby they are knowne to be *Louteas*, they weare not before that they bee confirmed by the King. Their examination done, and triall made of them, such as haue taken their degree wont to be giuen them with all Ceremonies, vse to banquet and feast many daies together (as the *Chineans* fashion is to end all their pleasures with eating and drinking) and so remaine chosen to doe the King seruice in matters of learning. The other examinated found insufficient to proceed, are sent backe to their studie againe. Whole ignorance is perceiued to come of negli-
gence

gence and default, such a one is whipped, and sometimes sent to prison, where wee lying that yeere when this kinde of Act was, wee found many thus punished, and demanding the cause thereof, they said it was for that they knew not how to answer vnto certaine things asked them.

It is a world to see how these *Loureas* are serued and feared, in such wise, that in publike assemblies at one strike they giue, all the seruitors belonging vnto Iustice, tremble thereat. At their being in these places, when they list to moue, be it but euen to the gate, these Seruitors doe take them vp, and carry them in seats of beaten Gold. After this sort are they borne when they goe in the Citie, either for their owne businesse abroad, or to see each other at home. For the dignity they haue, and office they doe beare, they be all accompanied: the very meane of them all that goeth in these seats is vsherred by two men at the least, that cry vnto the people to giue place, howbeit they need it not, for that reuerence the common people hath vnto them. They haue also in their company certaine Sergeants, with their Maces, either siluered, or altogether Siluer, some two, some foure, other six, other eight, conueniently for each one his degree. The more principall and chiefe *Loureas* haue going orderly before these Sergeants, many other with Staues, and a great many Catch-poles with Rods of *Indian* Canes dragged to the ground, so that the streets being paued, you may here a farre off, as well the noise of the Rods, as the voyce of the cryers. These fellows serue also to apprehend others, and the better to be knowne, they weare liuerie-red Girdles, and in their Caps Pecoocks Feathers. Behinde these *Loureas* come such as doe beare certaine Tables hanged at staues ends, wherein is written in Siluer letters the name, degree, and office of that *Lourea*, whom they follow. In like manner they haue borne after them Hats agreeable vnto their titles: if the *Lourea* bee meane, then hath he brought after him but one Hat, and that may not be yellow: but if hee be of better sort, then may hee haue two, three, or foure: the principall and chiefe *Loureas*, may haue all their Hats yellow, the which among them is accounted great honour. The *Lourea* for warres, although hee bee but meane, may notwithstanding haue yellow Hats. The *Tutanes* and *Chians*, when they goe abroad, haue besides all this before them led three or foure Horses, with their Guard in Armour.

Furthermore, the *Loureas*, yea, and all the people in *China*, are wont to eat their meat sitting on Stooles at high Tables as wee doe, and that very cleanly, although they vse neither Table-clothes nor Napkins. Whatsoever is set downe vpon the board is first carued, before that it be brought in: they feed with two Sticks, refraining from touching their meat with their hands, euen as we do with Forkes, for the which respect, they lesse doe need any Table-clothes. Neither is the Nation onely ciuill at meat, but also in conuersation and in courtesie they seeme to exceed all other. Likewise in their dealings, after their manner they are so readie, that they farre passe all other *Gentiles* and *Moors*: the greater States are so vaine, that they line their clothes with the best filke that may be found. The *Loureas* are an idle generation, without all manner of exercises and pastimes, except it be eating and drinking. Sometimes they walke abroad in the fields, to make the Souldiers shoot at Pricks with their Bowes, but their eating passeth: they will stand eating euen when the other doe draw to shoot. The Pricke is a great Blanket spread on certaine long Poles, he that striketh it, hath of the best man there standing a piece of *Crimson* Taffata, the which is knit about his head: in this sort the winner is honoured, and the *Loureas* with their bellies full, returne home againe.

The Inhabitants of *China*, bee very Idolaters, all generally doe worship the heauens: and as we are wont to say, *God knoweth it*: so say they at euery word, *Tien Tante*, that is to say, *The Heauens doe know it*. Some doe worship the Sunne, and some the Moone, as they thinke good, for none are bound more to one then to another. In their Temples, the which they doe call *Means*, they haue a great Altar in the same place as we haue, true it is, that one may goe round about it. There set they vp the Image of a certaine *Lourea* of that Countrey, whom they haue in great reuerence for certaine notable things he did. At the right hand standeth the *Deuill*, much more vgly painted then we doe vse to set him out, whereunto great homage is done by such as come into the Temple to aske counsell, or to draw lots: this opinion they haue of him, that he is malicious and able to doe euill. If you aske them what they doe thinke of the soules departed, they will answer, that they be immortall, and that as soone as any one departeth out of this life, he becommeth a *deuill*, if he haue liued well in this world, if otherwise, that the same *deuill* changeth him into a Busse, Ox, or Dog. Wherefore to this *Deuill* doe they much honour, to him do they sacrifice, praying him that he will make them like vnto himselfe, and not like other beasts. They haue moreouer another sort of Temples, wherein both vpon the Altars, and also on the walls doe stand many Idols well proportioned, but bare headed: These beare name *Omithoson*, accounted of them spirits, but such as in heauen doe neither good nor euill, thought to bee such men and women, as haue chafely liued in this world in abstinence from Fish and Flesh, fed only with Rice and Salates. Of that *Deuill* they make some account, for these spirits they care little or nothing at all. Againe, they hold opinion, that if a man doe well in this life, the heauens will giue him many temporall blessings, but if he doe euill, then shall he haue infirmities, diseases, troubles,

Their Maestrie.

Manner of eating.

We, that is, the Italians and Spaniards.

The manner of shooting.

Idolatrie.

Deuill most respected.

troubles, and penurie, and all this without any knowledge of God. Finally, this people knoweth no other thing then to live and die, yet because they be reasonable creatures, all seemed good unto them we spake in our language, though it were not very sufficient.

- Our manner of praying so well liked them, that in prison importunately they besought vs to write for them somewhat as concerning heaven, the which we did to their contentation, with such reasons as we knew, howbeit not very cunningly. As they doe their Idolatry they laugh at themselves. The greatest fault we doe finde in them is *Sodomie*, a vice very common in the meaner sort, and nothing strange amongst the best. Furthermore the *Loureas*, with all the people of *China*, are wont to solemnize the daies of the new and full Moones in visiting one each other, and making great banquets, for to that end, as I have said, doe tend all their pastimes and spending their daies in pleasure. They are wont also to solemnize each one his birth day, whereunto their kindred and friends doe resort of custome, with presents of Jewells or Money, receiving againe for their reward good cheere. They keepe in like manner a generall Feast, with great Banquets that day their King was borne. But their most principall and greatest Feast of all, and best cheare, is the first day of their new yeere, namely, the first day of the New Moone of *February*, so that their first moneth is *March*, and they reckon the times accordingly, respect being had unto the reigne of their Princes: as when any deed is written, they date it thus: Made such a day of such a Moone, and such a yeere of the raigne of such a King.
- Now will I speake of the manner the which the *Chineans* doe observe in doing Justice. Because the *Chinise* King maketh his abode continually in the City *Pachin*, his Kingdome so great, the shires so many, as before it hath beene said: in it therefore the Gouvernours and Rulers, much like unto our Sheriffes be so appointed suddenly, and speedily discharged againe, that they have no time to grow nought. Furthermore, to keepe the State in more securitie, the *Loureas* that governe one shire, are chosen out of some other shire distant farre off, where they must leaue their Wives, Children, and Goods, carrying nothing with them but themselves. True it is, that at their comming thither they doe find in a readinesse all things necessarie, their House, Furniture, Servants, and all other things in such perfection and plentie, that they want nothing. Thus King is well served without all feare of Treason.
- In the principall Cities of the shires be foure chiefe *Loureas*, before whom are brought all matters of the inferior Townes, throughout the whole Realme. Divers other *Loureas* have the managing of Justice, and receiving of Rents, bound to yeeld an account thereof unto the greater Officers. Other doe see that there be no euill rule kept in the Citie: each one as it behoueth him. Generally all these doe imprison Malefactors, cause them to be whipped and racked, hoyling them vp and downe by the armes with a cord, a thing very vsuall there, and accounted no shame. These *Loureas* doe vse great diligence in the apprehending of the Theeves, so that it is a wonder to see a Thiefe escape away in any Towne, Citie, or Village. Vpon the Sea neere vnto the shoare many are taken, and looke euen as they are taken, so be they first whipped, and afterward laid in Prison, where shortly after they all dye for hunger and cold. At that time, when we were in Prison, there dyed of them aboue threescore and ten. Their whips be certaine pieces of Canes, cleft in the middle, in such sort that they seeme rather plaine then sharpe. He that is to bee whipped, lyeth groueling on the ground. Vpon his thighes the Hangman layeth on blowes mightily with these Canes, that the standers by tremble at their crueltie. Tenne stripes draw a great deale of blood, twentie or thirtie spoyle the flesh altogether, fiftie or threescore will require long time to be healed, and if they cometo the number of one hundred, then are they incurable.
- The *Loureas* obserue moreouer this: when any man is brought before them to bee examined, they aske him openly in the hearing of as many as be present, be the offence neuer so great. Thus did they also behaue themselves with vs. For this cause amongst them can there be no false witness as daily amongst vs it falleth out. This good commeth thereof that many being alwayes about the Iudge to heare the Euidence, and beare witnesse, the Proesse cannot be falsified, as it hapneth sometimes with vs. The *Moors*, *Gentiles*, and *Jewes*, haue all their sundry Oathes, the *Moors* doe sweare by their *Mossafos*, the *Brachmans* by their *Fili*, the rest likewise by the things they doe worship. The *Chineans*, though they be wont to sweare by Heaven, by the Moone, by the Sunne, and by all their Idols, in judgement neuertheless they sweare not at all. If for some offence an Oath be vsed of any one, by and by with the least euidence hee is tormented; so be the Witnesses he bringeth, if they tell not the truth, or doe in any point disagree, except they be men of worship and credit, who are beleueed without any farther matter: the rest are made to confesse the truth by force of Torments and Whips. Besides this order obserued of them in Examinations, they doe feare so much their King, and he where he maketh his abode keepeth them so low, that they dare not once stirre. Againe, these *Loureas* as great as they be, notwithstanding the multitude of Notaries they haue, not trusting any others, doe write all great Processes and matters of importance themselves. Moreouer, one vertue they haue worthy of great praise, and that is, being men so well regarded and accounted of as though they were Princes, they be patient.

patient aboue measure in giuing audience. Wee poore strangers brought before them might say what we would, as all to be Lyes and Falaces that they did write, nor did we stand before them with the vsuall Ceremonies of that Countrey, yet did they beare with vs so patiently, that they caused vs to wonder, knowing specially how little any Aduocate or Iudge is wont in our Countrey to beare with vs. For wheresoeuer in any Towne of Christendome should bee accused vnknewne men as we were, I know not what end the very Innocents cause would haue: but wee in a Heathen Countrey, hauing our great Enemies two of the chiefeest men in a whole Towne, wanting an Interpreter, ignorant of that Countrey Language, did in the end see our great Aduersaries cast into Prison for our sake, and deprived of their Offices and Honour for not doing Iustice; yea, not to escape death, for as the rumour goeth, they shall bee beheaded.

Seuere Iustice.

Somewhat is now to be said of the Lawes that I haue bene able to know in this Countrey, and first, no Theft or Murther, is at any time pardoned: Adulterers are put in Prison, and the fact once proued, condemned to dye, the womans Husband must accuse them: this order is kept with men and women found in that fault, but Theeues and Murtherers are imprisoned as I haue said, where they shortly dye for hunger and cold. If any one haply escape by bribing the Iaylor to giue him meate, his Proesse goeth farther, and commeth to the Court where hee is condemned to dye. Sentence being giuen, the Prisoner is brought in publike with a terrible band of men that lay him in Irons hand and foot, with a board at his necke one handfull broad, in length reaching downe to his knees, cleft in two parts, and with a hole one handfull downe-ward in the Table fit for his necke, the which they enclose vp therein, nayling the board fast together, one handfull of the board standeth vp behind in the necke: the sentence and cause wherefore the felon was condemned to dye, is written in that part of the Table that standeth before. This Ceremonie ended, he is laid in a great Prison in the company of some other condemned persons, the which are found by the King as long as they doe liue. The board aforesaid so made tormenteth the Prisoners very much, keeping them both from the rest, and eke letting them to eate commodiously, their hands being maniced in Irons vnder that board, so that in fine there is no remedie but death. In the chiefe Cities of euery shire, as we haue before said, there be foure principall Houses, in each of them a Prisoner: but in one of them where the *Taitsu* maketh his abode, there a greater and a more principall Prison then in any of the rest: and although in euery Citie there be many, neuerthelesse in three of them remayne onely such as bee condemned to dye.

Lawes.

A Pillorie board.

Their death is much prolonged, for that ordinarily there is no execution done but once a yeere, though many dye for hunger and cold, as we haue scene in this Prison. Execution is done in this manner. The *Chian*, to wit the high Commissioner or Lord Chiefe Iustice, at the yeares end goeth to the head Citie, where hee heareth againe the causes of such as bee condemned. Many times he deliuereth some of them, declaring that board to haue bene wrongfully put about their neckes: the visitation ended, he chooseth out seuen or eight, not many more or lesse, of the greatest Malefactors, the which, to feare and keepe in awe the people, are brought into a great Market place, where all the great *Lousteas* meete together, and after many Ceremonies and Superstitions, as the vse of the Countrey is, are beheaded. This is done once a yeare: who so escapeth that day, may be sure that he shall not be put to death all that yeare following, and so remayneth at the Kings charges in the greater Prison. In that Prison where wee lay were alwayes one hundred and moe of these condemned persons, besides them that lay in other Prisons.

Execution.

These Prisons wherein the condemned captiues doe remayne are so strong, that it hath not bene heard, that any Prisoner in all *China* hath escaped out of Prison, for, indeed, it is a thing impossible. The Prisons are thus builded. First, all the place is mightily walled about, the wals be very strong and high, the gate of no lesse force: within it three other gates, before you come where the Prisoners doe lye, there many great Lodgings are to be scene of the *Lousteas*, *Notaries*, *Parthions*, that is, such as doe there keepe watch and ward day and night, the Court large and paved, on the one side whereof standeth a Prison, with two mighty gates, wherein are kept such Prisoners as haue committed enormous offences. This Prison is so great, that in it are streets and Market places wherein all things necessary are sold. Yea, some Prisoners liue by that kind of Trade, buying and selling, and letting out beds to hire: some are daily sent to Prison, some daily deliuered, wherefore this place is neuer voyd of seuen or eight hundred men that goe at libertie.

Strength of the Prisons.

Store of Prisoners.

Into one other Prison of condemned persons shall you goe at three Iron gates, the Court paved and vaulted round about, and open aboue as it were a Cloyster. In this Cloyster bee eight Roomes with Iron Doores, and in each of them a large Gallerie, wherein euery night the Prisoners doe lye at length, their feet in the stockes, their bodies hampered in huge wooden grates that keepe them from sitting, so that they lye as it were in a Cage, sleepe if they can: in the morning they are loosed againe, that they may goe into the Court. Notwithstanding the strength of this Prison, it is kept with a Garrison of men, part whereof watch within the House, part of them in the Court, some keepe about the Prison with Lanthornes, and Watch-bells, answering one another fve times euery night, and giuing warning so lowde, that the *Lousteas* resting in a Chamber not neere thereunto may heare them. In these Prisons of condemned persons remayne

some

some fiftene, other twentie yeares imprisoned, not executed, for the loue of their honourable Friends that seeke to prolong their liues. Many of these Prisoners bee Shoemakers, and haue from the King a certayne allowance of Rice: some of them worke for the Keeper, who suffereth them to goe at libertie without fetters and boards, the better to worke. Howbeit when the *Lourea* calleth his Checke Roll, and with the Keeper vieweth them, they all weare their Liuries, that is, boards at their neckes, Ironed hand and foote. When any of these Prisoners dyeth, he is to bee seene of the *Lourea* and *Notaries*, brought out at a gate so narrow, that there can but one be drawne out there at once. The Prisoner being brought forth, one of the afore-said *Partians*, striketh him thrice on the head with an Iron sledge, that done, hee is deliuered vnto his friends, if hee haue any, otherwise the King hireth men to carrie him to his buriall in the fields.

Course for
Debtors.

Thus Adulterers and Theeues are vsed. Such as be imprisoned for Debt once knowne, lye there vntill it be paid. The *Taiffu* or *Lourea* calleth them many times before him by the vertue of his Office, who vnderstanding the cause wherefore they doe not pay their Debts, appointeth them a certayne time to doe it, within the compasse whereof if they discharge not their Debts being Debtors indeed, then they be whipped and condemned to perpetuall Imprisonment: if the Creditors be many, and one is to be paid before another, they doe, contrary to our manner, pay him first, of whom they last borrowed, and so ordinarily the rest, in such sort that the first Lender be the last Receiuer. The same order is kept in paying Legacies: the last named, receiueth his portion first.

When I said that such as be committed to Prison for Theft, and Murther, were judged by the Court, I meant not them that were apprehended in the deed doing, for they need no tryall, but are brought immediately before the *Tutan*, who out of hand giueth sentence. Other not taken so openly, and doe need tryall, are the Malefactors put to execution once a yeare in the chiefe Cities, to keepe in awe the people: or condemned, doe remayne in Prison, looking for their day. Theeues being taken, are carried to Prison from one place to another in a Chest vpon mens shoulders, hired therefore by the King, the Chest is fixe handfuls high, the Prisoner sitteth therein vpon a bench, the couer of the Chest is two boards; amidst them both a Pillory-like hole, for the Prisoner his necke, there sitteth he with his head without the Chest, and the rest of his bodie within, not able to moue or turne his head this way or that way, nor to plucke it in: the necessities of nature he voideth at a hole in the bottome of the Chest, the meate he eateth is put into his mouth by others. There abideth he day and night during his whole Iourney: if happily his Porters stumble, or the Chest doe jogge, or be set downe carelessly, it turneth to his great paines that sitteth therein, all such motions being vnto him hanging as it were. Thus were our companions carried from *Cinco*, seuē dayes journey, neuer taking any rest as afterward they told vs, and their greatest grieve was to stay by the way: as soone as they came being taken out of the Chests, they were not able to stand on their feet, and two of them dyed shortly after.

Fuquico.

When we lay in prison at *Fuquico*, we came many times abroad, and were brought to the Palaces of Noble men, to be seene of them and their wiues, for that they had neuer seene any *Portugall* before. Many things they asked vs of our Countrey, and our fashions, and did write euery thing, for they be curious in nouelties aboue measure. The Gentlemen shew great curtesie vnto strangers, and so did we finde at their hands, and because that many times we were brought abroad into the Citie, somewhat will I say of such things as I did see therein, being a gallant Citie, and chiefe in one of the thirteene shires afore-said. The Citie *Fuquico*, is very great and mightily walled with square stone both within and without, and as it may seeme by the breadth thereof, filled vp in the middle with Earth, laid ouer with Bricke, and couered with Tyle, and after the manner of Porches or Galleries, that one might dwell therein. The stayres they vse, are so easily made, that one may goe them vp and downe a Horse-backe, as eftsoones they doe: the streets are paved, as alreadie it hath bene said: there bee a great number of Merchants, euery one hath written in a great Table at his doore such things as hee hath to sell. In like manner euery Artizan painteth out his craft: the Market places be large, great abundance of all things there be to be sold. The Citie standeth vpon water, many streames runne through it, the bankes pitched, and so broad that they serue for streets to the Cities vse. Over the streames are sundry Bridges both of Timber and Stone, that being made leuell with the streets, hinder not the passage of the Barges to and fro, the Channells are so deepe. Where the streames come in and goe out of the Citie, be certayne Arches in the Wall, there goe in and out their *Parais*; that is a kind of Barges they haue, and this onely in the day time: at night these Arches are closed vp with gates, so doe they shut vp all the gates of the Citie. These streames and Barges doe embellish much the Citie, and make it as it were to seeme another *Venice*. The buildings are euen, well made, high not lofted, except it be some wherein Merchandize is laid. It is a World to see how great these Cities are, and the cause is, for that the houses are built euen, as I haue said, and doe take a great deale of roome. One thing we saw in this Citie that made vs all to wonder, and is worthy to be noted: Namely, ouer a Porch at the comming into one of the afore-said fourē Houses, the which the King hath in euery shire for his Gouernours as I haue before said.

Paybi.

Another
Venice.

ſtandeth a Towre built vpon fortie Pillars, each one whereof is but one ſtone, each one fortie handfulls or ſpans long: in breadth or compaſſe twelue, as many of vs did meaſure them. Beſides this, their greatneſſe ſuch in one piece, that it might ſeeme impoſſible to worke them: they bee moreover couered, and in colour, length, and breath ſo like, that the one nothing differeth from the other.

Tower ſtanding on fortie Pillars, each of one ſtone.

Wee are wont to call this Countrey *China*, and the people *Chineans*, but as long as wee were Priſoners, not hearing amongſt them at any time that name, I determined to learne how they were called: and asked ſometimes by them thereof, for that they vnderſtood vs not when wee called them *Chineans*, I answered them, that all the Inhabitants of *India* named them *Chineans*, wherefore I prayed them that they would tell me, for what occaſion they are ſo called, whether peraduenture any Citie of theirs bare that name. Hereunto they alwayes answered me, to haue no ſuch name, nor euer to haue had. Then did I aſke them what name the whole Countrey beareth, and what they would answer being asked of other Nations what Countrey-men they were? It was told me, that of ancient time in this Countrey had bene many Kings, and though preſently it were all vnder one, each Kingdome neuertheleſſe enioyed that name it firſt had, theſe Kingdomes are the Prouinces I ſpake of before. In conſequence, they ſayd, that the whole Countrey is called *Tamen*, and the Inhabitants *Tamegines*, ſo that this name *China* or *Chineans*, is not heard of in that Countrey. I doe thinke that the neareneſſe of another Prouince thereabout called *Cochinchina*, and the inhabitants thereof *Cochineſſes*, firſt diſcouered before that *China* was, lying not farre from *Malacca*, did giue occaſion both to the one Nation and to the other of that name *Chineans*, as alſo the whole Countrey to bee named *China*. But their proper name is that aforeſaid.

Name of China

Tamen the proper name of China. Ta ſignifies Great, Magines is neere Polo's name of Man-gi; Great Man-gines.

Tables reuerenced.

I haue heard moreover, that in the Citie *Nanquim*, remaineth a Table of gold, and in it written a Kings name, as a memorie of that reſidence the Kings were wont to keepe there. This table ſtandeth in a great Palace, couered alwayes, except it bee in ſome of their feſtiuall dayes, at what time they are wont to let it bee ſeene: couered neuertheleſſe as it is, all the Nobilitie of the Citie goeth of dutie to doe it euery day reuerence. The like is done in the head Citie of all the other Shires, in the Palaces of the *Ponchiaſſini*, wherein theſe aforeſaid tables doe ſtand with the Kings name written in them, although no reuerence bee done thereunto but in ſolemne Feaſts.

I haue likewiſe vnderſtood that the Citie *Pachin*, where the King maketh his abode, is ſo great, that to goe from one ſide to the other, beſides the Suburbs, (which are greater then the Citie it ſelfe) it requireth one whole day a horſebacke, going hackney pace. In the Suburbs bee many wealthy Merchants of all ſorts. They told me furthermore, that it was Moted about, and in the Motes great ſtore of Fiſh, whereof the King maketh great gaynes. It was alſo told mee that the King of *China* had no King to wage battell withall, beſides the *Tartars*, with whom hee had concluded a peace more then foureſcore yeeres agoe.

Their enemies

There bee Hoſpitals in all their Citieſ, alwayes full of people, wee neuer ſaw any poore bodie beg. We therefore asked the cauſe of this: answered it was, that in euery Citie there is a great circuit, wherein bee many houſes for poore people, for Blinde, Lame, Old folke, not able to trauell for age, nor hauing any other meanes to liue. Theſe folke haue in the aforeſaid houſes, euery plenty of Rice during their liues, but nothing elſe. Such as bee receiued into theſe houſes, come in after this manner. When one is ſicke, blinde, or lame, hee maketh a ſupplication to the *Ponchiaſſi*, and prouing that to bee true he writeth, hee remaineth in the aforeſaid great lodging as long as he liueth: beſides this, they keepe in theſe places Swine and Hennes, whereby the poore bee releued without going a begging.

I ſayd before that *China* was full of Riuerſ, but now I minde to confirme the ſame anew: for the farther wee went into the Countrey, the greater we found the riuerſ. Sometimes we were ſo farre off from the Sea, that where wee came no Sea-fiſh had bene ſeene, and Salt was there very deare, of freſh-water Fiſh yet was there great abundance, and that fiſh very good: they keepe it good after this manner. Where the Riuerſ doe meete, and ſo paſſe into the Sea, there lieth great ſtore of Boates, ſpecially where no ſalt-water commeth, and that in March and Aprill. Theſe Boates are ſo many that it ſeemeth wonderfull, neither ſerue they for other then to take ſmall fiſh. By the riuerſ ſides they make leynes of fine and ſtrong Nets, that lye three handfulls vnder water, and one aboue, to keepe and nourish their Fiſh in, vntill ſuch time as other fiſhers doe come with Boates, bringing for that purpoſe certaine great Cheſts lyned with paper, able to hold water, wherein they carrie their fiſh vp and downe the riuer, euery day renewing the cheſt with freſh-water, and ſelling their fiſh in euery Citie, Towne, and Village, where they paſſe, vnto the people as they need it: moſt of them haue Net-leyres to keepe Fiſh in alwayes for their prouiſion. Where the greater Boates cannot paſſe any farther forward, they take leſſer, and becauſe the whole Countrey is very well watred, there is ſo great plenty of diuers ſorts of Fiſh, that it is wonderfull to ſee: aſſuredly, wee were amazed to behold the manner of their prouiſion. Their Fiſh is chiefly nourished with the dung of Buſſes and Oxen, that greatly fatteth it. Although I ſayd their fiſhing to bee in March and Aprill,

Store of riuerſ

Plentie of fiſh; and their keeping of them.

at what time wee saw them doe it, neuerthelesse they told vs that they fished at all times, for that vsually they doe feed on Fish, wherefore it behooueth them to make their provision continually.

He speaketh of
Fuquien-shire,
Quianci where
Porcelane is
made.

When wee had passed *Fuquien*, we went into *Quicen*-shire, where the fine Clay vessell is made, as I sayd before : and we came to a Citie, the one side whereof is built vpon the foote of a hill, whereby passeth a Riuer nauigable : there we tooke Boate, and went by water toward the Sea: on each side of the Riuer we found many Cities, Townes, and Villages, wherein we saw great store of Merchandise, but specially of fine clay : there did we land by the way to buy vituals and other necessaries. Going downe this riuer Southward, wee were glad that we drew neere vnto a warmer Countrey, from whence we had benee farre distant : this Countrey wee passed through in eight dayes, for our iourney lay downe the streame. Before that I doe say any thing of that Shire wee came into, I will first speake of the great Citie of *Quicin*, wherein alwayes remayneth a *Tutan*, that is a Gouvernour, as you haue seene, though some *Tutans* doe gouerne two or three Shires.

Alijs Cheuchi.
Great Riuer
and store of
Boates.

That *Tutan* that was condemned for our cause, of whom I spake before, was borne in this Countrey, but hee gouerned *Fuquien*-Shire : nothing it auayled him to bee so great an Officer. This Countrey is so great, that in many places where wee went, there had benee as yet no talke of his death, although he were executed a whole yeere before. At the Citie *Quanche* whither wee came, the riuer was so great that it seemed a sea, though it were so little where we tooke water, that wee needed small Boates. One day about nine of the clocke, beginning to row neare the walls with the streame, wee came at noone to a bridge made of many Barges, ouer-linked all together with two mightie chaynes. There stayed we vntill it was late, but wee saw not one goe either vp thereon or downe, except two *Lombia's* that about the going downe of the Sunne, came and set them downe there, the one in one side, the other on the other side. Then was the bridge opened in many places, and Barges both great and small to the number of fixe hundred began to passe : those that went vp the streame, at one place, such as came downe, at another. When all had thus shot the Bridge, then was it shut vp againe. Wee heard say that euery day they take this order in all principall places of Merchandise, for paying of the custome vnto the King, specially for Salt, whereof the greatest reuenues are made that the King hath in this Countrey. The passages of the bridge where it is opened, bee so neere the shore, that nothing can passe without touching the same. To stay the Barges at their pleasure, that they goe no farther forward, are vsed certaine yron instruments. The Bridge consisteth of one hundred and twelue Barges, there stayed we vntill the Eeuening that they were opened, lothsomly oppressed by the multitude of people that came to see vs, so many in number, that we were enforced to goe aside from the banke vntill such time as the bridge was opened : howbeit, wee were neuerthelesse thronged about with many Boates full of people. And though in other Cities and places where we went, the people came so importunate vpon vs, that it was needfull to withdraw our selues : yet were wee heere much more molested for the number of people, and this bridge, the principall way out of the Citie vnto another place so well inhabited, that were it walled about, it might bee compared to the Citie. When we had shot the bridge, we kept along the Citie vntill that it was night, then met wee with another riuer that ioyned with this, we rowed vp that by the walls, vntill we came to another bridge gallantly made of Barges, but lesser a great deale then that other bridge ouer the greater streame : heere stayed we that night, and other two dayes with more quiet, being out of the prease of the people. These riuers doe meete without at one corner-point of the Citie. In either of them were so many Barges great and small, that wee all thought them at the least to bee about three thousand : the greater number thereof was in the lesser riuer, where we were. Amongst the rest, heere lay certaine greater vessels, called in their language *Parai*, that serue for the *Tutan*, when hee taketh his voyage by other riuers that ioine with this, towards *Pachin*, where the King maketh his abode. Desirous to see those *Parai* we got into some of them, where we found some chambers set foorth with gilded Beds very richly, other furnished with tables and seates, and all other things so neate and in perfection, that it was wonderfull.

Bridge of 112.
Barges.

3000. Barges.

Parai, Barges
with faire
roomes.

Quiacim-Shire, as farre as I can perceiue, lyeth vpon the South. On that side we kept at our first entrie thereinto, traouelling not farre from the high mountaines we saw there. Asking what people dwelleth beyond those mountaines, it was told me that they bee *Theeues*, and men of a strange language. And because that vnto sundry places neere this Riuer, the mountaines doe approach, whence the people issuing downe, doe many times great harme, this order is taken at the entrie into *Quiacim*-Shire. To guard this Riuer whereon continually goe to and fro *Parai* great and small fraught with Salt, Fish powdered with pepper, and other necessaries for that Countrey : they doe lay in diuers places certaine *Parai*, and great Barges armed, wherein watch and ward is kept day and night in both sides of the Riuer, for the safetie of the passage, and securitie of such *Parai* as doe remayne there, though the traouellers neuer goe but many in company. In euery rode there bee at the least thirtie, in some two hundred men, as the passagere requireth.

This

This guard is kept vsually, vntill you come to the Citie *Onchio*, where continually the *Tutan* of this Shire, and eke of *Cantan*, maketh his abode. From that Citie vpward, where the riuer waxeth more narrow, and the passage more dangerous, there be alwayes armed one hundred and fiftie *Parai*, to accompany other vessels fraught with merchandise, and all this at the Kings charges. This seemed vnto me one of the strangest things I did see in this Countrey.

When wee lay at *Fuquien*, we did see certaine *Moores*, who knew so little of their sect, that they could say nothing else, but that *Mahomet* was a *Moore*, my father was a *Moore*, and I am a *Moore*, with some other words of their *Alcoran*, wherewithall, in abstinence from Swines flesh, they liue vntill the Deuill take them all. This when I saw, and being sure, that in many

Moores:

10 *Chinise* Cities the reliques of *Mahomet* are kept, as soone as wee came to the Citie where these fellowes bee, I informed my selfe of them, and learned the truth. These *Moores*, as they told me, in times past came in great Ships fraught with merchandise from *Pachin* ward, to a Port granted vnto them by the King, as hee is wont to all them that trafficke into this Countrey, where they being arriued at a little Towne standing in the hauens mouth, in time conuerted vnto their Sect the greatest *Loutea* there. When that *Loutea* with all his family was become *Moorish*, the rest began likewise to doe the same. In this part of *China* the people bee at libertie, every one to worship and follow what him liketh best. Wherefore no bodie tooke heed thereto, vntill such time as the *Moores* perceiuing that many followed them in superstition,

20 But all this Countrey men and women, choosing rather to forsake Father and Mother, then to leaue off eating of Porke, by no meanes would yeeld to that proclamation. For besides the great desire they all haue to eate that kind of meate, many of them doe liue thereby: and therefore the people complained vnto the Magistrates, accusing the *Moores* of a conspiracie pretended betwixt them and the *Loutea*, against their King. In this Countrey, as no suspicion, no not one trayterous word is long borne withall: so was the King speedily aduertised thereof, who gaue commandement out of hand that the aforesaid *Loutea* should bee put to death, and with him the *Moores* of most importance: the other to be layd first in Prison, and afterward to bee sent abroad into certaine Cities, where they remayned perpetuall slaues vnto the King. To this Citie came by hap men and women threescore and odde, who at this day are brought

30 to five men and foure women, for it is now twentie yeeres agoe this happened. Their offspring passeth the number of two hundred, and they in this Citie, as the rest in other Cities, whither they were sent, haue their *Moscheas*, whereunto they all resort euery Friday to keepe their Holiday. But, as I thinke, that will no longer endure, then whiles they doe liue, that came from thence, for their posteritie is so confused, that they haue nothing of a *Moore* in them, but abstinence from Swines-flesh, and yet many of them doe eate thereof priuily. They tell me that their natie Countrey hath name *Cumarian*, a firme land, wherein bee many Kings, and the *Indish* Countrey well knowne vnto them. It may so be: for as soone as they did see our seruants (our seruants were *Prenzaretas*) they iudged them to bee *Indians*: many of their words sounded vpon the *Persicke* tongue, but none of vs could vnderstand them. I asked them,

That is their Temples.

40 whether they conuerted any of the *Chinise* Nation vnto their Sect: they answered me, that with much adoe, they conuerted the women with whom they doe marrie, yeelding me no other cause thereof, but the difficultie they finde in them to bee brought from eating Swines-flesh, and drinking of Wine. I haue learned moreover, that the Sea whereby these *Moores* that came to *China* were wont to trauell, is a very great gulfe, that falleth into this Countrey out from *Tartaria* and *Persia*, leauing on the other side all the Countrey of *China*, and land of the *Mogorites*, drawing alwayes toward the South: and of all likelyhood it is euen so, because that these *Moores*, the which wee haue seene, bee rather browne then white, whereby they shew themselves to come from some warmer Countrey then *China* is, neere to *Pachin*, where the Riuer are frozen in the winter for cold, and many of them so vehemently, that Carts may passe ouer them.

It seemeth they came vp the riuer from the *Caspian* sea.

50 Wee did see in this Citie many *Tartars*, *Mogorites*, *Bremes*, and *Laoyes*, both men and women. The *Tartars* are men very white, good Horse-men, and Archers, confining with *China* on that side where *Pachin* standeth, separated from thence by great Mountaines that are betwixt these Kingdomes.ouer them bee certaine wayes to passe, and for both sides, Castles continually kept with Souldiers: in time past, the *Tartars* were wont alwayes to haue warres with the *Chineans*, but these fourescore yeeres past they were quiet, vntill the second yeere of our Imprisonment.

Ali. Auoina Tartars.

Mahie V'sent.

Mogores.

The *Mogores* bee in like manner white, and Heathen, wee are aduertised that of one side they border vpon these *Tartars*, and confine with the *Persicke Tartars* on the other side, whereof wee saw in them some tokens, as their manner of cloathes, and that kinde of Hat the *Saracens* doe weare. The *Moores* affirmed, that where the King lyeth, there bee many *Tartars* and *Mogorites*, that brought into *China* certaine Blewes of great value.

As for the *Bremes*, wee haue seene in this Citie *Chenchi* certaine men and women, amongst whom, there was one that came not long since, hauing as yet her hayre tyed vp after the *Persicke*

Bremes:

Southward
from *Chenchi*
to the Sea.

Aucins.

Chenchi.

gues fashions: this woman, and other moe with whom a blacke *Moore* damosell in our company had conference, and did vnderstand them well enough, had dwelt in *Peghu*. This new come woman, imagining that wee meant to make our abode in that Citie, bid vs to bee of good comfort, for that her Countrey was not distant from thence aboue fve dayes iourney, and that out of her Countrey, there lay a high way for vs home into our owne. Being asked the way, shee answered that the first three dayes the way lyeth ouer certaine great mountaines and wildernesse, afterward people to bee met withall againe. Thence two dayes iourney more to the *Bremes* Countrey. Wherefore I doe conclude, that *Chenchi* is one of the confines of this Kingdome, separated by certaine huge Mountaines, as it hath bene already sayd, that lye out towards the South. In the residue of these mountaines standeth the Prouince *Sian*, the *Laoyns* Countrey, *Cambaja*, *Chinapa*, and *Cochinchina*.

This Citie, chiefe of other sixteene, is situated in a pleasant Playne, abounding in things necessarie, Sea-fish onely excepted, for it standeth farre from the Sea: of fresh Fish so much store, that the Market-places are neuer emptie. The walls of this Citie are very strong and high: one day did I see the *Loutea* thereof goe vpon the walls, to take the view thereof, borne in their seates I spake of before, accompanied with a troupe of Horse-men, that went two and two: It was told me they might haue gone three and three. Wee haue seene moreover, that within this aforesaid Citie the King hath more than a thousand of his kindred lodged in great Palaces, in diuers parts of the Citie: their gates bee red, and the entrie into their houses, that they may be knowne, for that is the Kings colour. These Gentlemen, according to their nearenesse in blood vnto the King, as soone as they bee married, receiue their place in Honour: this place neither encreaseth nor diminisheth in any respect, as long as the King liueth, the King appointeth them their Wiues and Familie, allowing them by the moneth all things necessarie abundantly, as hee doth to his Gouvernours of Shires and Cities, howbeit, not one of these hath as long as hee liueth, any charge or government at all. They giue themselves to eating and drinking, and bee for the most part burley men of bodie, insomuch that espying any one of them, whom wee had not seene before, wee might know him to bee the Kings Cousin. They bee neuertheless very pleasant, courteous, and fayre conditioned: neither did wee finde, all the time we were in that Citie, so much honour and good entertainment any where, as at their hands. They bid vs to their houses, to eate and drinke, and when they found vs not, or wee were not willing to goe with them, they bid our seruants, and slaues, causing them to sit downe with the first. Notwithstanding the good lodging these Gentlemen haue so commodious that they want nothing, yet are they in this bondage, that during life they neuer goe abroad. The cause, as I did vnderstand, wherefore the King so vseth his Cousins, is that none of them at any time may rebell against him: and thus bee shutteth them vp in three or foure other Cities. Most of them can play on the Lute: and to make that kinde of pastime peculiar vnto them onely, all other in the Cities where they doe liue, bee forbidden that Instrument, the Curtizans and blinde folke onely excepted, who bee Musicians, and can play.

No Lords but
of the blood
royall.

This King furthermore, for the greater securitie of his Realme, and the auoyding of tumults, letteth not one in all his Countrey to bee called *Lord*, except hee be of his blood. Many great Estates and Gouvernours there be, that during their office are lodged Lord-like, and doe beare the port of mightie Princes: but they bee so many times displaced, and other placed anew, that they haue not the while to become corrupt. True it is, that during their Office they be well provided for, as afterward, also lodged at the Kings charges, and in pension as long as they liue, payed them monethly in the Cities where they dwell, by certaine officers appointed for that purpose. The King then is a Lord onely, not one besides him as you haue seene, except it bee such as be of his blood. A Nephew likewise of the King, the Kings Sisters sonne, lyeth continually within the walls of the Citie, in a strong Palace built Castle-wise, even as his others Cousins doe, remayning alwayes within doores, serued by Eunuches, neuer dealing with any matters. Their festiuall dayes, new Moones, and full Moones, the Magistrates make great banquets, and so doe such as bee of the Kings blood. The King his Nephew, hath name *Van-fuh*, his Palace is walled about, the wall is not high, but foure square, and in circuit nothing inferiour to the walls of *Goa*, the out-side is painted red, in euery square a Gate, and ouer each gate a Tower, made of timber excellently well wrought: before the principall Gate of the foure, that openeth into the high-street, no *Loutea*, bee he neuer so great, may passe on horse-backe, or carried in his seate. Amidst this quadrangle, standeth the Palace where that Gentleman lyeth, doubtlesse, worth the sight, although wee came not in to see it. By report the roofes of the towers and house, are glased greene, the greater part of the Quadrangle set with sauage Trees, as Oakes, Chesnuts, Cypresses, Pine-apples, Cedars, and other such like that wee doe want, after the manner of a Wood, wherein are kept Stagges, Oxen, and other beasts, for that Lord his recreation neuer going abroad, as I haue said.

One preheminance this Citie hath aboue the rest where wee haue bene, and it of right as we doe thinke, that besides the multitude of Market-places, wherein all things are to bee fold,

fold, through every streete continually are cryed all things necessarie, as Flesh of all sorts, fresh-
 Fish, Hearbes, Oyle, Vineger, Meale, Rice, *In summa*, all things so plentifully, that many
 houses need no seruants, euerie thing being brought to their doores. Most part of the Mer-
 chants remayne in the Suburbs, for that the Cities are shut vp every night, as I haue sayd.
 The Merchants therefore, the better to attend their businesse, doe choose rather to make their
 abode without in the Suburbs, then within the Citie. I haue seene in this Riuer a pretie kinde
 of Fishing, not to bee omitted in my opinion, and therefore will I set it downe. The King
 hath in many riuers good store of Barges full of Sea-crowes, that breed, are fed, and doe dye
 therein, in certaine Cages, allowed monethly a certaine prouision of Rice. These Barges the
 King bestoweth vpon his greatest Magistrates, giuing to some two, to some three of them,
 as hee thinketh good, to Fish therewithall after this manner. At the houre appointed to Fish,
 all the Barges are brought together in a circle, where the Riuer is shallow, and the Crowes
 tyed together vnder the wings, are let leape downe into the water, some vnder, some a-
 boue, worth the looking vpon: each one as hee hath filled his bagge, goeth to his owne
 Barge and emptieth it, which done, hee returneth to fish againe. Thus hauing
 taken good store of Fish, they set the Crowes at libertie, and doe suffer
 them to fish for their owne pleasure. There were in that
 Citie, where I was, twentie Barges at the least, of
 these aforesaid Crowes. I went almost
 every day to see them,
 yet could I neuer bee thoroughly satisfied
 to see so strange a kinde
 of Fishing.

PEREGRINATIONS,
VOYAGES, DISCOVERIES,
OF CHINA, TARTARIA, RUSSIA,
AND OTHER THE NORTH AND
EAST PARTS OF THE WORLD,

By English-men, and others.

THE SECOND BOOKE.

CHAP. I.

*The beginning of English Discoveries towards the North, and North-east,
by Sir HUGH WILLOUGHBY, RICHARD CHANCELLOR, and others; of the Muscouie Trade, as also Voyages by Russia, over the Caspian Sea, and thorow
diuers Regions of Tartaria.*

§. I.

*The first Voyage for Discoverie with three ships, set forth vnder the charge of
Sir HUGH WILLOUGHBY Knight, in which he died; and
Moscouia was discovered by Captaine
CHANCELLOR.*

IN the yeere of our Lord 1553. the seventh of the Raigne of King Edward the sixth of famous memorie, Sebastian Cabota was Gouvernour of the Mysterie and Companie of the Merchants Adventurers for the discoverie of Regions, Dominions, Islands, and places unknowne. Certaine instructions were agreed on by him and the said Companie, subscribed by Master Cabota, the ninth of May; the Kings Letters also procured vnto remote Princes in diuers languages, and a fleet of three Ships set forth at that time vnder the command of Sir Hugh Wil-
loughby Knight, Captaine generall, which went, in the *Bona Esperanza* Admirall, a ship of an hundred and twenty tunnes, hauing with her a Pinnace and a Boat: *William Gefferson* was Master of the said ship. The *Edward Bonaventure* was of an

Seb. Cabotâ.

See the parti-
culars in Ma-
ster Hackluyts
printed Voya-
ges; Tom. 1.

hundred and sixty tunnes, and had with her a Pinnace and a Boat, in which went *Richard Chancellor*, Captaine and Pilot Maior of the fleet, and *Stephen Burrough* Master. The *Bona Confidentia* of ninety tunnes, had with her a Pinnace and a Boat, of which *Cornelius Durfoorth* was Master.

The

The first Voyage.

* This discourse was found written in the *Speranza* which wintered a *Arzina*, where all the Companie were frozen to death.

Rost Ilands.

Stanfew harbour.

Lofoot.

August.

Seynam in 70. degrees.

The *Edward* lost, or rather these two lost; and the *Edward* found and entred the Bay of Saint Nicolas.

Willoughby his Land, in 72. degrees.

The Captaines and Masters were sworne to doe their true intent, and the ships provided of necessaries set forth on the tenth of May, 1553. for the discoverie of *Cathay*, and diuers other Regions, Dominions, Ilands, and places vnknowne. The fourteenth of Iuly they discovered Land Eastward, and went on shoare with their Pinnace, and found thirty little houses, the Inhabitants fled. The Land was full of little Ilands, called as they after learned, *Egeland* and *Halgeland*, in 66. degrees. The distance betweene *Orfordnesse* and *Egeland* two hundred and fifty leagues. Then we sayled from thence twelue leagues North-west, and found many other Ilands, and there came to anchor the nineteenth day, and manned our Pinnace, and went on shoare to the Ilands, and found people mowing and making of Hay, which came to the shoare and welcomed vs. In which place were an innumerable sort of Ilands, which were called the Iles of *Rost*, being vnder the Dominion of the King of *Denmarke*: which place was in latitude 66. degrees and 30. minutes. The winde being contrarie, we remayned there three dayes, and there was an innumerable sort of Fowles of diuers kindes, of which we tooke very many.

The two and twentieth day, the winde comming faire, wee departed from *Rost*, sayling North North-east, keeping the Sea vntill the seuen and twentieth day, and then we drew neere vnto the Land, which was still East off vs: then went forth our Pinnace to seeke harbour, and found many good harbours, of the which we entred into one with our ships, which was called *Stanfew*, and the Land being Ilands, were called, *Lewfoot*, or *Lofoot*, which were plentifully inhabited, and very gentle people, being also vnder the King of *Denmarke*: but wee could not learne how farre it was from the mayne Land: and we remayned there vntill the thirtieth day, being in latitude 68. degrees, and from the foresaid *Rost* about thirtie leagues North North-east.

The thirtieth day of Iuly about noone, wee weighed our anchors, and went into the Seas, and sayled along these Ilands North North-east, keeping the Land still in sight vntill the second of August: then hailing in close aboard the Land, to the intent to know what Land it was, there came a Skiffe of the Iland aboard of vs, of whom wee asked many questions, who shewed vnto vs, that the Iland was called *Seynam*, which is the latitude of seuentie degrees, and from *Stanfew* thirty leagues, being also vnder the King of *Denmark*, & that there was no merchandise there, but only dried fish, and Trane-oile. Then we being purposed to goe vnto *Finmarke*, enquired of him, if we might haue a Pilot to bring vs to *Finmarke*, and he said, that if we could beare in, we should haue a good Harbour, and on the next day a Pilot to bring vs to *Finmarke*, vnto the Ward-house, which is the strongest Hold in *Finmark*, & most resorted to by report. But when he would haue entred into an Harbour, the Land being very high on euery side, there came such flawes of wind and terrible whirle-winds, that we were not able to beare in, but by violence were constrained to take the sea againe, our Pinnace being vnshipt: we sailed North and by East, the wind encreasing so fore, that we were not able to beare any sayle, but tooke them in, and lay adrift, to the end to let the storme ouer-passe. And that night by violence of winde, and thickeesse of mists, we were not able to keepe together within sight, and then about midnight wee lost our Pinnace, which was a discomfort vnto vs. As soone as it was day, and the fogge ouer-past, we looked about, and at the last wee descried one of our ships to lee-ward off vs: then wee spred an hullocke of our fore-sayle, and bare roome with her, which was the *Confidence*, but the *Edward* we could not see. Then the flaw something abating, wee and the *Confidence* hoysed vp our sayles the fourth day, sayling North-east and by North, to the end to fall with the Ward-house, as we did consult to doe before, in case we should part companie. Thus running North-east and by North, and North-east fifty leagues, then wee sounded, and had one hundred and sixty fathoms, whereby we thought to be farre from Land, and perceiued that the Land lay not as the Globe made mention. Wherefore we changed our course the sixth day, and sayled South-east and by South, eight and forty leagues, thinking thereby to finde the Ward-house.

The eighth day much winde rising at the West North-west, we not knowing how the coast lay, strooke our sayles, and lay adrift, where sounded and found one hundred and sixty fathoms as before. The ninth day, the winde bearing to the South South-east, we sayled North-east five and twenty leagues. The tenth day we sounded, and could get no ground, neither yet could see any Land, whereat we wondered: then the winde comming at the North-east, we ran South-east about eight and forty leagues. The eleuenth day the winde being at South, wee sounded and found forty fathoms, and faire sand. The twelfth day, the winde being at South and by East, we lay with our sayle East, and East and by North thirty leagues.

The fourteenth day early in the morning wee descried Land, which Land wee bare withall, hoysing out our Boat to discover what land it might be: but the Boat could not come to Land, the water was so shallow, where was very much Ice also, but there was no similitude of habitation, and this Land lieth from *Seynam* East and by North, one hundred and sixty leagues, being in latitude 72. degrees. Then we plyed to the Northward, the fifteenth, sixteenth, and seuenteenth dayes.

The eighteenth day, the winde comming at the North-east, and the *Confidence* being troubled with bilge water, and stocked, wee thought it good to seeke harbour for her redresse: then wee bare roome the eighteenth day South South-east, about seuentie leagues. The one and

and twentieth day wee sounded, and found ten fathoms, after that wee sounded againe, and found but seven fathoms, so shallower and shallower water, and yet could see no Land, whereat we marvelled greatly: to auoide this danger, we bare roomer into the Sea all that night North-west and by West.

The next day we sounded, and had twenty fathoms, then shaped our course, and ranne West South-west vntill the three and twentieth day: then we descried lowe Land, vnto which wee bare as nigh as we could, and it appeared vnto vs vnhabitable. Then we plyed Westward along by that Land, which lieth West South-west, and East North-east, and much winde blowing at the West, we haled into the Sea North and by East thirtie leagues. Then the winde comming about at the North-east, wee sayled West North-west: after that, the winde bearing to the North-west, wee lay with our sayles West South-west, about fourteene leagues, and then descried Land, and bare in with it, being the eight and twentieth day, finding shallow water, and bare in till we came to three fathom, then perceiuing it to be shallow water, and also seeing drie sands, we haled out againe North-east along that Land, vntill we came to the point thereof. That Land turning to the Westward, we ranne along sixteene leagues North-west: then comming into a faire Bay, we went on Land with our Boat, which place was vninhabited, but yet it appeared vnto vs that the people had bene there, by crosses, and other signes: from thence we went all along the coast Westward.

The fourth day of September we lost sight of Land, by reason of contrarie windes, and the eighth day we descried Land againe. Within two dayes after we lost the sight of it: then running West and by South about thirtie leagues, we gat the sight of Land againe, and bare in with it vntill night: then perceiuing it to bee a lee shoare, we gat vs into the Sea, to the end to haue Sea roomer. The twelfth of September wee haled to shoare-ward againe, hauing then indifferent winde and weather: then being neere vnto the shoare, and the tide almost spent, wee came to an anchor in thirtie fathoms water. The thirteenth day we came along the coast, which lay North-west and by West, and South-east and by East. The fourteenth day we came to an anchor within two leagues off the shoare, hauing sixtie fathoms. There wee went ashore with our Boat, and found two or three good Harbours, the Land being rocky, and high, but as for people could we see none. The fifteenth day we ran still along the coast vntill the seuenteenth day: then the winde being contrarie vnto vs, we thought it best to returne vnto the Harbour which we had found before, and so we bare roomer with the same, howbeit wee could not accomplish our desire that day. The next day being the eighteenth, we entred into the Hauen, and there came to an anchor at six fathoms, This Hauen runneth into the Mayne, about two leagues, and is in bredth halfe a league, wherein were very many Seale-fishes, and other great fishes, and vpon the Mayne wee saw Beares, great Deere, Foxes, and diuers strange beasts, as * Guloines, * Or, Ellons, and such other which were to vs vnknowne, and also wonderfull. Thus remayning in this Hauen the space of a weeke, seeing the yeere farre spent, and also very euill weather, as Frost, Snow, and Hayle, as though it had bene the deepe of Winter, wee thought best to winter there. Wherefore we sent out three men South South-west, to search if they could finde people, who went three dayes iourney, but could finde none: after that, we sent other three Westward foure dayes iourney, which also returned without finding any people. Then sent we three men South-east three dayes iourney, who in like sort returned without finding of people, or any similitude of habitation.

In this Hauen they died.

* Or, Ellons:

Heere endeth Sir Hugh Willoughby his note, which was written with his owne hand.

The River or Hauen wherein Sir Hugh Willoughby with the companie of his two ships perished for cold, is called *Arzina in Lapland*, neere vnto *Kegor*. But it appeareth by a Will found in a ship that Sir Hugh Willoughby, and most of the companie were aliue in January, 1554.

A Letter of RICHARD CHANCELLOR, written to his Vncle Master CHRISTOPHER FROTHINGAM, touching his discouerie of *Moscouia*.

Forasmuch as it is meet and necessarie for all those that minde to take in hand the tranell into strange Countries, to endeauour themselves not onely to vnderstand the orders, commodities, and fruitfulness thereof, but also to apply them to the setting forth of the same, whereby it may encourage others to the like tranell: therefore haue I now thought good to make a brieue rehearfall of the orders of this my tranell in Russia, and Muscouia, and other Countries thereunto adioyning; because it was my chance to fall with the North parts of Russia, before I came towards Moscouia, I will partly declare my knowledge therein. Russia is very plentifull both of Land and People, and also wealthie for such commodities as they haue. They be very great fishers for Salmones and small Cods: they haue much Oyle which wee call Trane Oyle, the most whereof is made by a River called Duina. They make it in other places, but not so much as there. They haue also a great trade in seething of salt water. To the North part of that Countrey are the places where they haue their Furs, as Sables, Martens, greeffe Beuers, Foxes white, blacke, and red, Minkes, Ermines, Miniver, and Harts. There are also a fishes teeth, which fish is called

Duina.

Note.

called a Morffe. The takers thereof dwell in a place called Postefora, which bring them upon Harts to Lampas to sell, and from Lampas carrie them to a place called Colmogro, where the high Market is holden on Saint Nicolas day. To the West of Colmogro there is a place called Gratanoue, in our language Nouogorode, where much fine Flaxe and Hempe groweth, and also much Waxe and Honie. The Dutch Merchants haue a Staple-house there. There is also great store of Hides, and at a place called Plesco: and thereabout is great store of Flaxe, Hempe, Waxe, Honie; and that Towne is from Colmogro one hundred and twentie miles.

Vologda.

There is a place called Vologda; the commodities whereof are Tallow, Waxe, and Flaxe: but not so great plentie as is in Gratanoue. From Vologda to Colmogro there runneth a Riuer called Duina, and from thence it falleth into the Sea. Colmogro serueth Gratanoue, Vologda, and the Mosco, with all the Countrey thereabout with Salt and salt Fish. From Vologda to Ierellaue is two hundred miles: which Towne is very great. The commodities thereof are Hides, and Tallow, and Corne in great plentie, and some Waxe, but not so plentifull as in other places.

Ierellaue.

The Mosco is from Ierellaue two hundred miles. The Countrey betwixt them is very well replenished with small Villages, which are so well filled with people, that it is wonder to see them: the ground is well stored with Corne, which they carrie to the Citie of Mosco in such abundance that it is wonder to see it. You shall meet in a morning seven or eight hundred Sleds comming or going thither, that carrie Corne, and some carrie fish. You shall haue some that carrie Corne to the Moteo, and some that fetch Corne from thence, that at the least dwell a thousand miles off: and all their carriage is on Sleds. Those which come so farre dwell in the North parts of the Dukes Dominions, where the cold will suffer no Corne to grow, it is so extreme. They bring thither Fishes, Furrer, and Beasts skinned. In those parts they haue but small store of Cattell.

Mosco.

The Mosco it selfe is great: I take the whole Towne to be greater then London with the Suburbes: but it is very rude, and standeth without all order. Their houses are all of timber very dangerous for fire. There is a faire Castle, the walls whereof are of bricke, and very high: they say they are eightene foot thicke, but I doe not beleue it, it doth not so seeme; notwithstanding, I doe not certainly know it: for no stranger may come to view it. The one side is ditched, and on the other side runneth a Riuer, called Moscuia, which runneth into Tartarie, and so into the Sea, called Mare Caspium: and on the North side there is a base Towne, the which hath also a Bricke wall about it, and so it ioyneth with the Castle wall. The Emperour lieth in the Castle, wherein are nine faire Churches, and therein are Religious men. Also there is a Metropolitan with diuers Bishops, I will not stand in description of their buildings, nor of the strength thereof, because we haue better in all points in England. They be well furnished with Ordnance of all sorts.

The Castle.

The Emperours or Dukes house neither in building nor in the outward shew, nor yet within the house is so sumptuous as I haue seene. It is very lowe built in eight square, much like the old building of England, with small windowes, and so in other points.

Hee commeth before the Duke.

Now to declare my comming before his Maiestie: After I had remayned twelue dayes, the Secretarie which hath the hearing of strangers did send for mee, aduertising me that the Dukes pleasure was to haue me to come before his Maiestie, with the King my Masters Letters: whereof I was right glad, and so I gaue mine attendance. And when the Duke was in his place appointed, the Interpreter came for mee into the outer Chamber, where sate one hundred or moe Gentlemen, all in closh of Gold very sumptuous, and from thence I came into the Counsell-chamber, where sate the Duke himselfe, with his Nobles, which were a faire companie: they sate round about the Chamber on high, yet so that he himselfe sate much higher then any of his Nobles, in a Chaire gilt, and in a long garment of beaten Gold, with an Imperiall Crowne vpon his head, and a Staffe of Crystall and Gold in his right hand, and his other hand halfe leaning on his Chaire. The Chancellour stood up with the Secretarie before the Duke. After my dutie done, and my Letter deliuered, he bade me welcome, and enquired of mee the health of the King my Master, and I answered, that he was in good health at my departure from his Court, and that my trust was, that he was now in the same. Upon the which he bade me to dinner. The Chancellor presented my Present vnto his Grace bare-headed (for before they were all couered) and when his Grace had receiued my Letter, I was required to depart: for I had charge not to speake to the Duke, but when he spake to mee. So I departed vnto the Secretaries Chamber, where I remayned two houres, and then I was sent for againe vnto another Palace, which is called, The golden Palace, but I saw no cause why it should be so called; for I haue seene many fairer then it in all points: and so I came into the Hall, which was small and not great as is the Kings Maiesties of England, and the Table was couered with a Table-cloth; and the Marshall sate at the end of the Table with a little white rod in his hand, which Boord was full of vessell of Gold: and on the other side of the Hall did stand a faire Cupboord of Plate.

Dineth with the Duke.

From thence I came into the dining Chamber, where the Duke himselfe sate at his Table without Cloth of estate, in a Gowne of Silver, with a Crowne Imperiall vpon his head, he sate in a Chaire somewhat high: there sate none neere him by a great way. There were long tables set round about the chamber, which were full set with such as the Duke had at dinner: they were all in white. Also the places where the tables stood were higher by two steps then the rest of the house. In the midst of the chamber stood a Table or Cupboord to set Plate on; which stood full of Cups of Gold: and amongst all the rest

rest there stood foure maruellous great Pots or Crudences as they call them, of Gold and Siluer: I thinke they were a good yard and a halfe high. By the Cupboard stood two Gentlemen with Napkins on their shoulders, and in their hands each of them had a Cup of Gold set with Pearles and Precious Stones, which were the Dukes owne drinking Cups: when hee was disposed, hee drunke them off at a draught. And for his seruice at meate it came in without order, yet it was very rich seruice: for all were serued in Gold; not onely he himselfe, but also all the rest of vs, and it was very massie: the Cups also were of Gold and very massie. The number that dined there that day was two hundred persons, and all were serued in Golden Vessell. The Gentlemen that wayted were all in Cloth of Gold, and they serued him with their Caps on their heads. Before the seruice came in, the Duke sent to euery man a great Shiuer of Bread, and the Bearer called the party so sent to by his name aloude, and said, Iohn Basiluich Emperour of Russia, and great Duke of Mosconia, doth rewarde thee with Bread: then must all men stand up, and doe at all times when those words are spoken. And then last of all hee giueth the Marshall Bread, whereof he eateth before the Dukes Grace, and so doth reuerence and departeth. Then commeth the Dukes seruice of the Swans all in pieces, and euery one in a seuerall dish: the which the Duke sendeth as he did the Bread, and the Bearer saith the same words as hee said before. And as I said before, the seruice of his meate is in no order, but commeth in Dish by Dish: and then after that the Duke sendeth drinke, with the like saying as before is told. Also before Dinner he changed his Crowne, and in Dinner time two Crownes; so that I saw three seuerall Crownes vpon his head in one day. And thus when his seruice was all come in, hee gaue to euery one of his Gentlemen Wayters meate with his owne hand, and so likewise drinke. His intent thereby is, as I haue heard, that euery man shall know perfectly his seruants. Thus when Dinner is done hee calleth his Nobles before him name by name, that it is wonder to beare how he could name them, hauing so many as hee hath. Thus when Dinner was done I departed to my Lodging, which was an houre within night.

I will leaue this, and speake no more of him nor his Household: but I will somewhat declare of his Land and people, with their nature and power in the Warres. This Duke is Lord and Emperour of many Countreies, and his power is marvellous great. For hee is able to bring into the field two or three hundred thousand men: he neuer goeth into the field himselfe with vnder two hundred thousand men: And when hee goeth himselfe, hee furnisheth his Borders all with men of Warre, which are no small number. He leaueth on the Borders of Liefland fortie thousand men, and vpon the borders of Letto, sixtie thousand men, and toward the Nagayan Tartars sixtie thousand, which is wonder to heare of: yet doth hee neuer take to his Warres neither Husbandman nor Merchant. All his men are Horse-men: hee useth no Foot-men, but such as goe with the Ordnance and Labourers, which are thirtie thousand. The Horse-men are all Archers, with such Bowes as the Turkes haue, and they ride short as doe the Turkes. Their Armour is a Coate of Plate, with a skull on their heads. Some of their Coates are couered with Veluet or Cloth of Gold: their desire is to be sumptuous in the field, and especially the Nobles and Gentlemen: as I haue heard their trimming is very costly, and partly I haue seene it, or else I would scarcely haue beleueed it: but the Duke himselfe is richly attyred aboue all measure: his Pavilion is couered cyther with Cloth of Gold or Siluer, and so set with stones that it is wonderfull to see it. I haue seene the Kings Maiesties of England and the French Kings Pavilions, which are faire, yet not like vnto his.

And when they be sent into farre or strange Countreies, or that strangers come to them, they be very gorgeous. Else the Duke himselfe goeth but meanly in apparell: and when hee goeth betwixt one place and another hee is but reasonably apparellled ouer other times. In the while that I was in Mosco, the Duke sent two Ambassadors to the King of Poleland, which had at the lest fise hundred Horses; their sumptuousnesse was aboue measure, not onely in themselves, but also in their Horses, as Veluet, Cloth of Gold, and Cloth of Siluer set with Pearles, and not scant. What shall I further say? I neuer heard of nor saw men so sumptuous: but it is no daily guise, for when they haue not occasion, as I said before, all their doing is but meane. And now to the effect of their Warres: They are men without all order in the field. For they run hurling on heaps, and for the most part they neuer giue battayle to their Enemies: but that which they do, they do it all by stealth. But I beleue they be such men for hard lining as are not vnder the Sunne: for no cold will hurt them. Yea, and though they lye in the field two moneths, at such time as it shall freeze more then a yard thicke, the common Souldier hath neither Tent nor any thing else ouer his head: the most defence they haue against the weather is a Felt, which is set against the wind and weather, and when Snow commeth he doth cast it off, and maketh him a fire, and layeth him downe thereby. Thus doe the most of all his men, except they be Gentlemen which haue other prouision of their owne. Their lying in the field is not so strange as is their hardnesse: for euery man must carrie, and make prouision for himselfe, and his Horse for a moneth or two, which is very wonderfull. For hee himselfe shall lue vpon water and Oate-meale mingled together cold, and drinke water thereto: his Horse shall eate greene wood, and such like baggage, and shall stand open in the cold field without couert, and yet will hee labour and serue him right well. I pray you amongst all our boasting Warriours how many should we find to endure the field with them but one moneth. I know no such Region about vs that beareth that name for man and beast. Now what might hee made of these men if they were trayned and broken to order and knowledge of Ciuill Warres: if this Prince had within his Countreies such men as could make them to vnderstand the things aforesaid, I doe beleue that two of the best or greatst Princes in Christendome were not well able to match with him, considering the greatnesse of his power and the hard-

- hardnesse of his people, and straight lining both of people and Horse, and the small charges which his Wars stand him in: for he giueth no wages, except to strangers. They haue a yearely stipend and not much. As for his owne Countrey men, euery one serueth of his owne proper costs and charges, sauing that hee giueth to his Harquebusiers certayne allowance for Powder and shot: or else no man in all his Countrey hath one penie wages. But if any man hath done very good seruice, he giueth him a Ferme, or a piece of Land; for the which he is bound at all times to be readie with so many men as the Duke shall appoint: who considereth in his minde, what that Land or Ferme is well able to find: and so many shall he be bound to furnish at all and euery such time as Warres are holden in any of the Dukes Dominions. For there is no man of lining, but he is bound likewise, whether the Duke call for eyther Souldier or Labourer, to furnish them with all such necessaries as to them belong.
- Knights Fee.** Also, if any Gentleman or man of lining doe dye without Issue Male, immediately after his death the Duke enureth his Land, notwithstanding he haue neuer so many Daughters, and peradventure giueth it forth with to another man, except a small portion that he spareth to marry the Daughters withall. Also, if there be a Rich man, a Fermour, or man of Lining, which is stricken in age or by chance is maymed, and be not able to doe the Duke seruice, some other Gentleman that is not able to line and more able to doe seruice, will come to the Duke and complaine, saying, your Grace hath such an one, which is unmeet to doe seruice to your Highnesse, who hath great abundance of wealth, and likewise your Grace hath many Gentlemen which are poore and lacke lining, and we that lacke are well able to doe good seruice, your Grace might doe well to looke upon him, and make him to helpe those that want. Immediately the Duke sendeth forth to inquire of his wealth: and if it be so proued, hee shall be called before the Duke, and it shall bee said vnto him, Friend, you haue too much lining, and are unseruiceable to your Prince, lesse will serue you, and the rest will serue other men that are more able to serue. Whereupon immediately his lining shall be taken away from him, sauing a little to find himselfe and his Wife on, and he may not once repine thereat: but for answere hee will say, that hee hath nothing, but it is Gods and the Dukes Graces, and cannot say, as wee the common people in England say, if wee haue any thing; that it is Gods and our owne. Men may say, that these men are in wonderfull great awe, and obedience, that thus one must giue and grant his goods which he hath beene scraping and scratching for all his life to be at his Princes pleasure and commandement. Oh, that our sturdie Rebels were had in the like subiection to know their dutie toward their Princes. They may not say as some Snudges in England say, I would find the Queene a man to serue in my place, or make his Friends tarrie at home if mony haue the upper hand. No, no it is not so in this Countrey: for he shall make humble sute to serue the Duke. And whom he sendeth most to the Warres hee thinketh he is most in his fauour: and yet as I before haue said, he giueth no wages. If they knew their strength, no man were able to make match with them: for they that dwell neere them should haue any rest of them. But I thinke it is not Gods will: For I may compare them to a young Horse that knoweth not his strength, whom a little Child ruleth and guideth with a bridle, for all his great strength: for if he did, neither Child nor man could rule him. Their Warres are holden against the Cricme Tartarians, and the Nagayans.
- Duke heire Generall.** I will stand no longer in the rehearfall of their power and Warres. For it were so tedious to the Reader. But I will in part declare their Lawes, and Punishments, and the execution of Iustice. And first I will begin with the Commons of the Countrey, which the Gentlemen haue rule on: And that is, that euery Gentleman hath Rule and Iustice vpon his owne Tenants. And if it so fall out that two Gentlemen Seruants or Tenants doe disagree, the two Gentlemen examine the matter, and haue the parties before them, and so giue the Sentence. And yet cannot they make the end betwixt them of the Controuersie, but either of the Gentlemen must bring his Seruant or Tenant before the high Iudge or Iustice of that Countrey, and there present them, and declare the matter and case. The Plaintiffe saith, I require the Law, which is granted: then commeth an Officer and arresteth the partie Defendant, and vseth him contrary to the Lawes of England. For when they attach any man, they beate him about the legs, vntill such time as he findeth Sureties to answere the matter: And if not, his hands and necke are bound together, and hee is led about the Towne, and beaten about the legs, with other extreme punishments till he come to his Answere: And the Iustice demandeth if it bee for Debt, and sayth: Owest thou this man any such Debt? He will, perhaps, say nay. Then saith the Iudge: Art thou able to deny it? Let vs heare how? By Oath, saith the Defendant. Then he commandeth to leane beating him till further tryall be had.
- No wages.** Their order in one point is commendable. They haue no man of Law to plead their Causes in any Court: but euery man pleadeth his owne Cause, and giueth Bill and Answere in writing: contrary to the order in England. The Complaint is in manner of a Supplication, and made to the Dukes Grace, and deliuered him into his owne hand, requiring to haue Iustice as in his Complaint is alleaged. The Duke giueth sentence himselfe vpon all matters in the Law. Which is very commendable, that such a Prince will take paines to see ministration of Iustice. Yet notwithstanding it is wonderfully abused: and thereby the Duke is much deceived. But if it fall out that the Officers be espied in cloking the truth, they haue most condigne punishment. And if the Plaintiffe can nothing proue, then the Defendant must take his Oath vpon the Crucifixe, whether he be in the right or no. Then is demanded, if the Plaintiffe bee any thing able further to make prooffe: if he be nor; then sometimes he will say, I am able to proue it by my body and hands, or by my Champions body, so requiring the Campe. After the other hath his Oath,
- Gentlemen.**
- Suits & tryals.**
- No Lawyer.**
- Combat-triall.**

it is granted as well to the one as to the other. So when they goe to the field, they sweare upon the Crucifixe, that they bee both in the right, and that the one shall make the other to confesse the truth before they depart forth of the field: and so they goe both to the battell armed with such weapons as they vse in that Countrey: they fight all on foot, and seldome the parties themselves doe fight, except they bee Gentlemen, for they stand much upon their reputation, for they will not fight, but with such as are come of as good an house as themselves. So that if either partie require the combate, it is granted unto them, and no Champion is to serue in their roome; wherein is no deceit; but otherwise by champions there is. For although they take great oathes upon them to doe the battell truly, yet is the contrary often seene: because the common Champions haue no other liuing. And as soone as the one partie hath gotten the victorie, hee demandeth the debt, and the other is carryed to Prison, and there is shamefully vsed till hee take order.

10 There is also another order in the Law, that the plaintiffe may sweare in some causes of debt. And if the partie defendant bee poore, hee shall be set under the Crucifixe, and the partie plaintiffe must sweare ouer his head, and when hee hath taken his oath, the Duke taketh the partie defendant home to his house, and vseth him as his bond-man, and putteth him to labour, or letteth him for hire to any such as neede him, untill such time as his friends make prouision for his redemption: or else hee remayneth in bondage all the dayes of his life. Againe, there are many that will sell themselves to Gentlemen or Merchants, to bee their bond-men, to haue during their life, meate, drinke and cloath, and at their comming to haue a piece of money; yea, and some will sell their wives and children to be bands and drudges to the buyer. Also they haue a Law for Fellons and pickers contrary to the Lawes of Eng-
 20 land. For by their Law they can hang no man for his first offence; but may keepe him long in Prison, and oftentimes beate him with whips and other punishment: and there hee shall remaine untill his friends bee able to bayle him. If hee be a picker or a cut-purse, as there bee very many, the second time he is taken, hee hath a piece of his Nose cut off, and is burned in the fore-head, and kept in prison till he finde sureties for his good behauiour. And if hee be taken the third time, he is hanged. And at the first time hee is extremely punished and not released, except he haue very good friends, or that some Gentleman require to haue him to the warres: And in so doing, hee shall enter into great bonds for him: by which meanes the Countrey is brought into good quietnesse. But they bee naturally giuen to great deceit, except extreame beating did bridle them. They bee naturally giuen to hard liuing as well in fare as in lodging. I heard a Russian say, that it was a great deale merrier liuing in Prison then forth, but for the great beating. For they haue meate and drinke without any labour, and get the charitie of well disposed people: But being at libertie they get nothing. The poore is very innumerable, and liue
 30 most miserably: for I haue seene them eate the pickle of Herring and other stinking Fish: nor the Fish cannot bee so stinking nor rotten, but they will eate it and praise it to bee more wholesome then other fish or fresh meate. In mine opinion there bee no such people vnder the Sunne for their hardnesse of liuing. Well, I will leaue them in this point, and will in part declare their Religion.

They doe obserue the Law of the Greekes with such excesse of superstition, as the like hath not beene heard of. They haue no grauen Images in their Churches, but all painted, to the intent they will not breake the Commandement: but to their painted Images they vse such Idolatrie, that the like was neuer heard of in England. They will neither worship nor honour any Image that is made forth of their owne
 40 Countrey. For their owne Images (say they) haue Pictures to declare what they bee, and how they be of God, and so be not ours: They say, looke how the Painter or Caruer hath made them, so wee doe worship them, and they worship none before they bee Christened. They say wee be but halfe Christians: because we obserue not part of the old Law with the Turkes. Therefore they call themselves more holy then vs. They haue none other learning but their mother tongue, nor will suffer no other in their Countrey among them. All their seruice in Churches is in their mother tongue. They haue the old and new Testament, which are daily read among them: and yet their superstition is no lesse. For when the Priests doe reade, they haue such trickes in their reading, that no man can understand them, nor no man giueth eare to them. For all the while the Priest readeth, the people sit downe and one talke with another. But when the Priest is at seruice no man sitteth, but gaggles and ducks like so many Geese. And as
 50 for their prayers they haue but little skill, but vse to say, As bodi pomele: As much to say, Lord haue mercie vpon me. For the tenth man within the Land cannot say the Pater noster. And as for the Creed, no man may bee so bold as to meddle therewith but in the Church: for they say it should not be spoken of, but in the Churches. Speake to them of the Commandements, and they will say they were giuen to Moses in the Law, which Christ hath now abrogated by his precious Death and Passion: therefore, (say they) wee obserue little or none thereof. And I doe beleene them. For if they were examined of their Law and Commandements together, they should agree but in few points. They haue the Sacrament of the Lords Supper in both kindes, and more ceremonies then we haue. They present them in a dish in both kindes together, and carrie them round about the Church vpon the Priests head, and so doe minister at all such times as any shall require. They bee great offerers of Candles, and sometimes of money, which
 60 wee call in England, Soule pence, with more ceremonies then I am able to declare.

They haue foure Leuts in the yeere, whereof our Lent is the greatest. Looke as wee doe begin on the Wednesday, so they doe on the Munday before: And the weeke before that they call the Butter-weeke: And in that weeke they eate nothing but Butter and Milke. Howbeit I beleene there bee in no other Countrey the like people for Drunkenesse. The next Lent is called Saint Peters Lent, and begin-

neth alwayes the Munday next after Trinitie Sunday, and endeth on Saint Peters Eeven. If they should breake that Fast, their belife is, that they should not come in at Heauen gates. And when any of them dye, they haue a testimoniall with them in the Coffin, that when the soule commeth to Heauen gates it may deliuer the same to Saint Peter, which declareth that the partie is a true and holy Russian. The third Lent beginneth fifteene dayes before the later Lady day, and endeth on our Lady Eeven. The fourth Lent beginneth on Saint Martins day, and endeth on Christmas Eeven: which Lent is fasted for Saint Philip, Saint Peter, Saint Nicholas, and Saint Clement. For they foure bee the principall and greatest Saints in that Countrey. In these Lents they eate neither Butter, Egges, Milke, nor Cheese; but they are very straightly kept with Fish, Cabbages, and Rootes. And out of their Lents, they obserue truely the Wednesdaies and Fridaies throughout the yeere: and on the Saturday they doe eate flesh. Furthermore, they haue a great number of Religious men: which are blacke Monkes, and they eate no Flesh throughout the yeere, but Fish, Milke and Butter. By their order they should eate no fresh-Fish, and in their Lents they eate nothing but Coleworts, Cabbages, salt Cucumbers, with other rootes, as Radish and such like. Their drinke is like our penie Ale, and is called Quaff. They haue Service daily in their Churches; and vse to goe to seruice two houres before day, and that is ended by day light. At nine of the clocke they goe to Masse: that ended, to Dinner: and after that to seruice againe: and then to Supper. You shall understand that at euerie dinner and supper they haue declared the exposition of the Gospell that day: but how they wrest and twine the Scripture and that together, by report it is wonderfull. As for Whoredome and Drunkenesse there bee none such living: and for Extortion, they bee the most abominable under the Sunne. Now iudge of their holinesse. They haue twice as much Land as the Duke himselfe hath: but yet hee is reasonable euen with them, as thus: When they take bribes of any of the poore and simple, hee hath it by an order. When the Abbot of any of their Houses dyeth, then the Duke hath all his goods mooneable and vnmoneable: so that the Successour buyeth all at the Dukes hands: and by this meane they bee the best Farmers the Duke hath. Thus with their Religion I make an end, trusting hereafter to know it better.

Some additions for better knowledge of this Voyage, taken by CLEMENT
ADAMS, Schoole-master to the Queenes Henshmen, from the mouth
of Captaine CHANCELOR.

I haue this
booke of Cle-
ment Adams, in
Latine, writ-
ten in a very
elegant hand
and eloquent
stile to King
Philip; (as I
thinke) the
very originall.

Richard Chancellor with his Ship and companie being thus left alone, and become very pensue, heauie, and sorrowfull, by this dispercion of the Fleet, hee (according to the order before taken,) shapeth his course for Ward-house in Norway, there to expect and abide the arriuall of the rest of the Ships. And being come thither, and hauing stayed there the space of seauen dayes, and looked in vaine for their comming, hee determined at length to proceed alone in the purposed voyage. And as hee was preparing himselfe to depart, it happened that hee fell in companie and speech with certaine Scottissh-men: who hauing vnderstanding of his intention, and wishing well to his actions, began earnestly to dissuade him from the further prosecution of the discouerie, by amplifying the dangers which hee was to fall into, and omitted no reason that might serue to that purpose. But he holding nothing so ignominious and reproachfull, as inconstancie and leuitie of minde, and perswading himselfe that a man of valour could not commit a more dishonourable part, then for feare of danger to auoyd and shun great attempts, was nothing at all changed or discouraged with the speeches and words of the Scots, remayning stedfast and immutable in his first resolution: determining either to bring that to passe which was intended, or else to dye the death.

And as for them which were with Master Chancellor in his Ship, although they had great cause of discomfort by the losse of their companie (whom the foresaid tempest had separated from them) and were not a little troubled with cogitations and perturbations of minde, in respect of their doubtfull course: yet notwithstanding, they were of such consent and agreement of minde with Master Chancellor, that they were resolute, and prepared vnder his direction and gouernment, to make prooffe and tryall of all aduentures, without all feare or mistrust of future dangers. Which constancie of minde in all the companie did exceedingly increase their Captaines carefulnesse: for hee being swallowed vp with like good will and loue towards them, feared lest through any error of his, the safetie of the companie should bee indangered. To conclude, when they saw their desire and hope of the arriuall of the rest of the Ships to bee euery day more and more frustrated, they prouided to Sea againe, and Master Chancellor held on his course towards that vnkowne part of the world, and sayled so farre, that hee came at last to the place where hee found no night at all, but a continuall light and brightnesse of the Sunne shining cleerely vpon the huge and mightie Sea. And hauing the benefite of this perpetuall light for certaine dayes, at the length it pleased God to bring them into a certaine great Bay, which was of one hundreth miles or there about ouer. Whereinto they entred, and somewhat farre within

They arriue in
the Bay of
Saint Nicholas.

within it cast anchor, and looking euery way about them, it hapned that they espyed a farre off a certaine Fisher-boate, which Master *Chancellor*, accompanied with a few of his men, went towards to common with the Fishermen that were in it, and to know of them what Countrey it was, and what people, and of what manner of liuing they were: but they being amazed with the strange greatnesse of his ship, (for in those parts before that time, they had neuer seene the like) began presently to auoyd and to flee: but hee still following them, at last ouertooke them, and being come to them, they (being in great feare, as men halfe dead) prostrated themselves before him, offering to kisse his feete: but hee (according to his great and singular courtesie,) looked pleasantly vpon them, comforting them by signes and gestures, refusing those duties and reuerences of theirs, and taking them vp in all louing sort from the ground. And it is strange to consider how much fauour afterwards in that place, this humanitie of his did purchase to himselfe. For they being dismissed, spread by and by a report abroad of the arriual of a strange Nation, of a singular gentlenesse and courtesie: whereupon the common people came together, offering to these new-come ghests victuals freely, and not refusing to traffique with them, except they had beene bound by a certaine religious vse and custome, not to buy any forraine commodities, without the knowledge and consent of the King.

By this time our men had learned, that this Countrey was called *Russia*, or *Musconie*, and that *Iuan Vasilovich* (which was at that time their Kings name) ruled and gouerned farre and wide in those places. And the barbarous *Russes* asked likewise of our men whence they were, and what they came for: whereunto answer was made, that they were *English-men* sent into those coasts, from the most excellent King *Edward* the sixth, hauing from him in commandement certaine things to deliuer to their King, and seeking nothing else but his amitie and friendship, and traffique with his people, whereby they doubted not, but that great commoditie and profit would grow to the subiects of both Kingdomes.

The *Barbarians* heard these things very gladly, and promised their ayde and furtherance to acquaint their King out of hand, with so honest and a reasonable a request. In the meane time Master *Chancellor* intreated victuals for his money, of the Gouernour of that place (who together with others came aboard him) and required hostages of them likewise, for the more assurance of safetie to himselfe and his companie. To whom the Gouernours answered, that they knew not in that case the will of their King, but yet were willing in such things as they might lawfully doe, to pleasure him: which was as then to afford him the benefit of victuals.

Now, while these things were a doing, they secretly sent a messenger vnto the Emperour, to certifie him of the arriual of a strange Nation, and withall to know his pleasure concerning them. Which message was very welcome vnto him, insomuch that voluntarily he inuited them to come to his Court. But if by reason of the tediousnesse of so long a iourney, they thought it not best so to doe, then hee granted libertie to his Subiects to bargain, and to traffique with them: and further promised, that if it would please them to come to him, hee himselfe would beare the whole charges of poste Horses. In the meane time the Gouernours of the place, differred the matter from day to day, pretending diuers excuses, and saying one while, that the consent of all the Gouernours, and another while, that the great and weightie affaires of the Kindome compelled them to differ their answer: and this they did of purpose, so long to protract the time, vntill the messenger (sent before to the King) did returne with relation of his will and pleasure.

But Master *Chancellor*, (seeing himselfe held in this suspense with long and vaine expectation, and thinking that of intention to delude him, they posted the matter off so often,) was very instant with them to performe their promise: Which if they would not doe, hee told them that he would depart and proceed in his voyage. So that the *Musconites* (although as yet they knew not the minde of their King) yet fearing the departure indeed of our men, who had such wares and commodities as they greatly desired, they at last resolved to furnish our people with all things necessarie, and to conduct them by land to the presence of their King. And so Master *Chancellor* began his iourney, which was very long and most troublesome, wherein he had the vse of certaine sleds, which in that Countrey are very common, for they are carried themselves vpon sleds, and all their carriages are in the same sort, the people almost not knowing any other manner of carriage, the cause whereof is, the exceeding hardnesse of the ground congealed in the Winter time by the force of the cold, which in those places is very extreame and horrible, whereof hereafter wee will say something.

But now they hauing passed the greater part of their iourney, met at last with the Sled-man (of whom I spake before) sent to the King secretly from the Iustices or Gouernours, who by some ill hap had lost his way, and had gone to the Sea-side, which is neere to the Countrey of the *Tartars*, thinking there to haue found our ship. But hauing long erred and wandered out of his way, at the last in his direct returne, hee met (as he was comming) our Captaine on the way. To whom hee by and by deliuered the Emperours letters, which were written to him with all courtesie and in the most louing manner that could bee: wherein expresse commandement was giuen, that poste Horses should be gotten for him and the rest of his company without any money. Which thing was of all the *Russes*, in the rest of their iourney so willingly done,

Messenger sent to the Emperour.

The Emperours courteous letters to Master Chancellor.

that they began to quarrell, yea, and to fight also in striving and contending which of them should put their poste horses to the Sled: so that after much adoe, and great paines taken in this long and wearie iourney, (for they had trauelled very neere fiftene hundred miles) Master Chancellor came at last to *Mosco*, the chiefe Citie of the Kingdome, and the seate of the King.

HONDIVS *his* Map of Russia.

Riphean hills,
a tale of Anti-
quitic.

Rossomakka, a
strange beast.

The sharpnes
of the winter
in Mosconie.

Touching the *Riphean Mountaines*, whereupon the *Snow* lyeth continually, and where hence in times past it was thought that *Tanis* the river did spring, and that the rest of the wonders of nature, which the *Grecians* fained and inuented of old, were there to bee seene: our men which lately came from thence, neither saw them, nor yet haue brought home any perfect relation of them, although they remayned there for the space of three moneths, and had gotten in that time some intelligence of the language of *Mosconie*. The whole Countrey is plaine and champion, and few hills in it: and towards the North, it hath very large and spacious Woods, wherein is great store of Firre trees, a wood very necessarie, and fit for the building of houses: there are also wilde beasts bred in those woods, as *Buffes*, *Beares*, and blacke *Wolues*, and another kinde of beast vnknewen to vs, but called by them *Rossomakka*: and the nature of the same is very rare and wonderfull: for when it is great with young, and ready to bring forth, it seeketh out some narrow place betweene two flakes, and so going through them, presseth it selfe, and by that meanes is eased of her burthen, which otherwise could not bee done. They hunt their *Buffes* for the most part a horse-backe, but their *Beares* a foot, with wooden forkes. The North parts of the Countrey are reported to bee so cold, that the very Ice or water which distilleth out of the moyst wood which they lay vpon the fire, is presently congealed and frozen: the diuersitie growing sodainly to bee so great, that in one and the selfe-same fire-brand, a man shall see both fire and Ice. When the winter doth once begin there, it doth still more and more increase by a perpetuities of cold: neither doth that cold flake, vntill the force of the Sunne beames doth dissolve the cold, and make glad the earth, returning to it againe. Our Mariners which wee left in the

the ship in the meane time to keepe it, in their going vp onely from their cabbins to the hatches, had their breath oftentimes so suddenly taken away, that they eft-soones fell downe as men very neere dead, so great is the sharpenesse of that cold Climate: but for the South parts of the Countrey, they are somewhat more * temperate.

* The rest of M. Adams containing a description of the Country, &c. is here omitted.

The Copie of the Duke of Moscouie and Emperour of Russia his Letters,
sent to King EDWARD the Sixth, by the hands of
RICHARD CHANCELOVR.

THe Almighty power of God, and the incomprehensible holy Trinitie, rightfull Christian Beliefe, &c. We great Duke Iuan Vasiluich, by the Grace of God great Lord and Emperour of all Russia, great Duke of Volodemer, Mosco, and Nouograd, King of Kazan, King of Astracan, Lord of Plesko, and great Duke of Smolensko, of Twerria, Ioughoria, Permia, Vadska, Bulghoria, and others, Lord and great Duke of Nouograd in the Low Countrey, of Chernigo, Rezan, Polotskoy, Rostoue, Yaruslaueley, Bealozera, Liefland, Oudoria, Obdoria, and Condensa, Commander of all Siberia, and of the North parts, and Lord of many other Countreies, greeting. Before all, right, great and worthy of honour Edward King of England, &c. according to our most heartie and good zeale, with good intent and friendly desire, and according to our holy Christian Faith, and great Governance, and being in the light of great understanding, our Answer by this our Honourable Writing unto your Kingly Governance, at the request of your faithfull Seruant Richard Chancellor, with his company, as they shall let you wisely know is this. In the strength of the twentieth year of our Governance, be it knowne, that at our Sea-coasts arrived a ship, with one Richard, and his company, and said, that he was desirous to come into our Dominions, and according to his request, hath seene our Maiestie, and our eyes: and hath declared unto us your Maiesties desire, as that wee should grant unto your Subiects, to goe and come, and in our Dominions, and among our Subiects, to frequent free Marts, with all sorts of Merchandizes, and upon the same to haue warres for their returns. And they haue also deliuered vs your Letters which declare the same request. And hereupon wee haue given order, that wheresoeuer your faithfull Seruant Hugh Willoughbie, land or touch in our Dominions, to be well enterayned, who as yet is not arrived as your Seruant Richard can declare.

Iuan Vasiluich, that is to say, Iohn the Sonne of Basilus.

d That is, come into our presence.

And we with Christian beliefe and faithfulnessse, and according to your Honourable request, and my Honourable commandement will not leaue it undone: and are furthermore willing that you send unto us your ships and Vessels, when and as often as they may haue passage, with good assurance on our part to see them harmlesse. And if you send one of your Maiesties counsell to treat with us whereby your Countrey Merchants may with all kindes of Wares, and where they will make their Market in our Dominions, they shall haue their free Mart with all free Liberties through my whole Dominions, with all kinde of Wares, to come and goe at their pleasure, without any let, damage, or impediment, according to this our Letter, our Word and our Seale which wee haue commanded to be under sealed. Written in our Dominion, in our Citie and our Palace in the Castle of Mosco, in the yeare 7060. the second Moneth of Februarie.

This Letter was written in the Moscouian Tongue, in Letters much like to the Greeke Letters, very faire written in Paper, with a broad Seale hanging at the same, sealed in Paper vpon Waxe. This Seale was much like the Broad Seale of England, hauing on the one side the Image of a man on Horse-backe in complete Harnesse fighting with a Dragon. Vnder this Letter was another Paper written in the Dutch Tongue, which was the Interpretation of the other written in the Moscouian Letters. These Letters were sent the next yeare after the date of King Edwards Letters, 1554.

After this, entercourse of Letters and Embassages passed betwixt King Philip and Queene Marie, and the Moscouite: and the Moscouie Company was instituted and receiued Priuiledges both from their owne and that Forraigne Prince, a second Voyage being set forth in May, 1555. and Master George Killingworth was made their first Agent: the particulars whereof are found at large in Master Hakluyts first Tome of Voyages, as also other things touching that Trade then settled: which heere I omit, and come to Master Ienkinsons Voyage to Mosco, and thence to Tartaria.

d. II.

The first * Voyage made by Master ANTHONIE IENKINSON,
from the Citie of London, toward the Land of Russia, begunne
the twelfth of May, in the yeare

1557.

* Hee made
three others
after, one as
Embassadour
from Queene
Elizabeth to the
Muscouite.

Ist, by the grace of God, the day and yeare aboue mentioned, I departed from the said Citie, and the same day at *Gransend*, embarked my selfe in a good ship, named the *Primrose*, being appointed, although vnworthy, chiefe Captaine of the same, and also of the other three good ships, to say, the *John Euangelist*, the *Anne*, and the *Trinitie*, hauing also the conduct of the Emperour of *Russia*, his Ambassadour named *Osep Nepea Gregorovich*, who passed with his company in the said *Primrose*. And thus our foure tall ships being well appointed, aswell for men, as victuals, as other necessary furniture, the said twelfth day of the moneth of May, we weighed our Anchors, and departed from the said *Gransend*, in the after-noon, and plying downe the *Thames*, the wind being Easterly, and faire weather, the thirteenth day we came a ground with the *Primrose*, vpon a sand called the blacke tayle, where wee sate fast vntill the fourteenth day in the morning, and then God bee prayesd, shee came off: and that day we pleyed downe as farre as our Ladie of *Holland*, and there came to an Anchor, the winde being Easterly, and there remayned vntill the twentieth day: then wee weyed and went out at *Goldmore* gate, and from thence in at *Balscy* slade, and so into *Orwell* wands, where we came to an Anchor: but as we came out at the said *Goldmore* gate, the *Trinitie* came on ground on certayne Rockes, that lye to the North-ward of the said gate, and was like to be bilged and lost. But by the ayde of God, at the last she came off againe, being very leake: and the one and twentieth day the *Primrose* remaining at an Anchor in the wands, the other three ships bare into *Orwell* Hauen, where I caused the said *Trinitie* to be grounded, searched, and repayed. So we remayned in the said Hauen, vntill the eight and twentieth day: and then the wind being Westerly, the three ships that were in the Hauen, weighed and came forth, and in coming forth the *John Euangelist* came on ground vpon a Sand, called the *Andros*, where she remayned one tyde, and the next full Sea she came off againe without any great hurt, God be prayesd.

The nine and twentieth day in the morning all foure ships weighed in the Wands, and that tyde went as farre as *Orfordnesse*, where we came to an Anchor, because the wind was Northerly: And about sixe of the clocke at night, the wind vered to the South-west, and we weighed Anchor, and bare cleere of the *Nesse*, and then set our course North-east and by North vntill mid-night, being then cleere of *Tarmouth* sands. Then wee winded North and by West, and North North-west, vntill the first of Iune at noone, then it waxed calme, and continued so vntill the second day at noone: then the wind came at North-west, with a tempest, and much raine, and we lay close by, and caped North North-east, and North-east and by North, as the wind shifted, and so continued vntill the third day at noone: then the winde vered Westerly againe, and we went North our right course, and so continued our way vntill the fourth day at three of the clocke in the after-noon, at which time the winde vered to the North-west againe and blew a fresh gale, and so continued vntill the seuenth day in the morning, wee lying with all our ships close by, and caping to the Northwards: and then the winde vering more Northerly, we were forced to put roomer with the Coast of *England* againe, and fell ouerthwart *New-castle*, but went not into the Hauen, and so pleyed vpon the Coast the eight day and the ninth.

The tenth day the wind came to the North North-west, and wee were forced to beare roomer with *Flamborow* head, where we came to an Anchor, and there remayned vntill the seuenth day. Then the wind came faire, and we weighed, & set our course North and by East, time and so continued the same with a merry wind vntill the one and twentieth at noone, at which we took the Sunne, and had the latitude in sixtie degrees. Then we shifted our course, and went North North-east, & North-east and by North, vntill the five and twentieth day. Then we discovered certain Ilands, called *Heilick* Ilands, lying from vs Northeast, being in the latitude of sixty fixe degrees, fortie minutes. Then we went North and by West, because we would not come too nigh the Land, and running that course foure houres, we discovered, and had sight of *Rost* Ilands, joyning to the mayne Land of *Finmarke*. Thus continuing our course along the Coast of *Norway* and *Finmarke*, the seuen and twentieth day we tooke the Sunne, being as farre shot as *Lofoot*, and had the latitude in sixtie nine degrees. And the same day in the afternoone appeared ouer our heads a Rain-bow, like a Semicircle, with both ends vpward. Note, that there is betweene the said *Rost* Ilands and *Lofoot*, a Whirle-poole called *Malestrand*, which from halfe ebbe vntill halfe floud, maketh such a terrible noyse, that it shaketh the Rings in the doores of the Inhabitants Houses of the said Ilands ten miles off. Also if there commeth any Whale within the current of the same, they make a pittifull cry. Moreouer, if great Trees be carryed into it by force of streames, and after with the ebbe be cast out againe, the ends and boughes of them haue beene so beaten, that they are like the stalkes of Hempe that is bruized. Note, that all the Coast of

Heilick Ilands
in 66. degrees
40. minutes.
Rost Ilands.

Malestrand a
strange whirle
poole.

Fin-

Finmarke is high Mountaynes and Hills, being couered all the yeare with Snow. And hard aboard the shoare of this Coast, there is one hundred, or one hundred and fiftie fathomes of water in depth. Thus proceeding and sayling forward, we fell with an Island called *Zenam*, being in the latitude of seuentie degrees. About this Island wee saw many Whales, very monstrous, about our ships, some by estimation of sixtie foote long: and being the ingendring time they roared and cryed terribly. From thence we fell with an Island, called *Kettlewicke*.

Zenam Island.

Kettlewike Island.

This Coast from *Rost* vnto *Lofoot* lyeth North and South, and from *Lofoot* to *Zenam* North-east and South-west, and from *Zenam* to *Kettlewicke*, East North-east and West South-west. From the said *Kettlewicke* we sayled East and by North ten leagues, and fell with a Land called *Inger sound*, where we fished, being becalmed, and tooke great plentie of Cods. Thus plying along the Coast, we fell with a Cape, called the North Cape, which is the Northermost Land that we passe in our Voyage to Saint *Nicholas*, and is in the latitude of seuentie one degrees and ten minutes, and is from *Inger sound* East, and to the North-wards fifteene leagues. And being at this North Cape the second day of Iuly, wee had the Sunne at North foure degrees above the Horizon. The third day we came to *Wardhouse*, hauing such mists that wee could not see the Land. This *Wardhouse* is a Castle standing in an Island two miles from the mayne of *Finland*, subject to the King of *Denmarke*, and the Eastermost Land that he hath. There are two other Islands neere adjoyning vnto that, whereon the Castle of *Wardhouse* standeth. The Inhabitants of those three Islands liue onely by fishing, and make much Stock-fish, which they dry with Frost: their most feeding is fish; bread and drinke they haue none, but such as is brought them from other places. They haue small store of Cattle, which are also fed with fish. From

Inger sound. The North Cape.

Ward-house.

Wardhouse we sayled South South-east ten leagues, and fell with a Cape of Land called *Kegor*, the Northermost part of the Land of *Lappia*. And betweene *Wardhouse*, and the said Cape is a great Bay, called *Dommes baff*, in the South part whereof is a Monastery of Monkes of the *Russes* Religion, called *Pechinchow*. Thus proceeding forward and sayling along the Coast of the said Land of *Lappia*, winding South-east, the fourth day through great mists and darknesse we lost the company of the other three ships, and met not with them againe, vntill the seuenth day, when we fell with a Cape or head-land called *Swetinoz*, which is the entring into the Bay of Saint *Nicholas*. At this Cape lyeth a great stone, to the which the Barkes that passed thereby, were wont to make Offerings of Butter, Meale, and other Victuals, thinking that vnlesse they did so, their Barkes or Vessels should there perish, as it hath beene oftentimes seene: and there it is very darke and mystie. Note, that the sixt day wee passed by the place where Sir *Hugh Willoughby* with all his company perished, which is called *Arxina reca*, that is to say, the Riuer *Arxina*.

Cattell fed with fish.

The Monastrie of Pechinchow.

The Land of *Lappia* is an high Land, hauing snow lying on it commonly all the yeere. The people of the Countrey are halfe Gentiles: they liue in the Summer time neere the Sea side, and vse to take fish, of the which they make bread, and in the Winter they remoue vp into the Countrey into the Woods, where they vse hunting, and kill Deere, Beares, Wolues, Foxes, and other beasts, with whose flesh they be nourished, and with their skins apparelled in such strange fashion, that there is nothing seene of them bare but their eyes. They haue none other habitation, but only in Tents, remouing from place to place, according to the season of the yeere. They know no arte nor facultie, but onely shooting, which they exercise daily, as well men as women, and kill such beasts as serue them for their food. Thus proceeding along the coast from *Swetinoz* afore said, the ninth day of Iuly wee came to Cape *Grace*, being in the latitude of 66. degrees and 45. minutes, and is at the entring in of the Bay of Saint *Nicolas*. Aboard this Land there is twentie or thirtie fathoms water, and sundry grounds good to anchor in. The current at this Cape runneth South-west and North-east. From this Cape wee proceeded along vntill we came to *Crosse Island*, which is seuen leagues from the said Cape South-west: and from this Island, wee set ouer to the other side of the Bay, and went South-west, and fell with an Head-land, called *Foxenose*, which is from the said Island fve and twentie leagues. The entring of this Bay from *Crosse Island* to the neereft Land on the other side is seuen leagues over. From *Foxenose* proceeding forward the twelfth day of the said moneth of Iuly, all our foure ships arrived in safety at the Road of Saint *Nicolas*, in the Land of *Russia*, where we anchored, and had sayled from *London* vnto the said Road seuen hundred and fiftie leagues. The *Russian* Ambassadour and his companie with great ioy got to shoare, and our ships heere forthwith discharged themselves: and being laden againe, and hauing a faire winde, departed toward *England* the first of August. The third of the said moneth I with other of my companie came vnto the Citie of *Colmogro*, being an hundred verstes from the Bay of Saint *Nicolas*, and in the latitude of 64. degrees 25. minutes. I tarried at the said *Colmogro* vntill the fiftenth day: and then I departed in a little Boat vp the Riuer of *Diuna*, which runneth very swiftly, and the selfe same day passed by the mouth of a Riuer called *Pinego*, leauing it on our left hand fifteene verstes from *Colmogro*. On both sides of the mouth of this Riuer *Pinego* is high Land, great Rockes of Alabaster, great Woods, and Pine-apple trees lying along within the ground, which by report haue lyen there since *Noes* flood. And thus proceeding forward the nineteenth day in the morning, I came in-

Arxina reca the Riuer where Sir Hugh Willoughby was frozen.

The Lappians couered all sauuing their eyes.

The current at Cape Grace.

The entring of the Bay of Saint Nicolas is seuen leagues broad at the least.

Multitude of
Guests.

to a Towne called *Temp*, an hundred verstes from *Colmogro*. All this way along they make much Tarre, Pitch, and ashes of Aspen trees. From thence I came to a place called *Vsting*, an ancient Citie, the last day of August. At this Citie meet two Riuers: the one called *Ing*, and the other *Sucana*, both which fall into the aforesaid Riuer of *Duma*. The Riuer *Ing* hath his spring in the Land of the *Tartars*, called *Cheremixzi*, ioyning to the Countrey of *Permia*: and *Sucana* hath his head from a Lake not farre from the Citie of *Vologda*. Thus departing from *Vsting*, and passing by the Riuer *Sucana*, we came to a Towne called *Totma*. About this place the water is very shallow, and stonie, and troublesome for Barkes and Boats of that Countrey, which they call *Nassades*, and *Dofnecker*, to passe that way: wherein merchandise are transported from the aforesaid *Colmogro* to the Citie of *Vologda*. These vessels called *Nassades*, are very long builded, broad made, and close aboue, flat bottomed, and draw not aboue foure foot water, and will carrie two hundred tunnes: they haue no Iron appertayning to them but all of Timber, and when the winde serueth, they are made to sayle. Otherwise they haue many men, some to hale and draw by the neckes with long small ropes made fast to the said Boats, and some set with long poles. There are many of these Barkes vpon the Riuer of *Duma*: And the most part of them belongeth vnto the Citie of *Vologda*: for there dwell many Merchants, and they occupie the said Boats with carrying of Salt from the Sea side vnto the said *Vologda*. The twentieth of September I came vnto *Vologda*, which is a great Citie, and the Riuer passeth through the midst of the same. The houses are builded with wood of Firre trees, ioyned one with another, and round without: the houses are foure square without any Iron or stone worke, couered with Birch barkes, and wood ouer the same: Their Churches are all of wood, two for euery Parish, one to be heated for Winter, and the other for Summer. On the tops of their houses they lay much earth, for feare of burning: for they are sore plagued with fire. This *Vologda* is in 59. degrees 11. minutes, and is from *Colmogro*, one thousand verstes.

All the way I neuer came in house, but lodged in the Wildernesse, by the Riuers side, and carried prouision for the way. And he that will trauell those wayes, must carrie with him an Hatchet, a Tinder boxe, and a Kettle, to make fire and seethe meat, when he hath it: for there is small succour in those parts, vnlesse it be in Townes.

The first day of December, I departed from *Vologda* in poste in a Sled, as the manner is in Winter. And the way to *Moscou* is as followeth. From *Vologda* to *Commelski*, seuen and twentie verstes; so to *Olmor* fise and twentie verstes, so to *Teloytske* twentie verstes, so to *Vre* thirtie verstes, so to *Voshansko* thirtie verstes, then to *Yeraslane* thirtie verstes, which standeth vpon the great Riuer *Volga*, so to *Rostoue* fiftie verstes, then to *Rogarin* thirtie verstes, so to *Perslane* ten verstes, which is a great Towne, standing hard by a faire Lake. From thence to *Dombay* thirtie verstes, so to *Godoroke* thirtie verstes, so to *Owchay* thirtie verstes, and last to the *Mosco* fise and twentie verstes, where I arriued the sixt day of December.

There are fourteene Posts called *Tannes*, betweene *Vologda* and *Mosco*, which are accounted fise hundred verstes asunder.

The tenth day of December, I was sent for to the Emperours Castle by the said Emperour, and deliuered my Letters vnto the Secretarie, who talked with mee of diuers matters, by the commandement of the Emperour. And after that my Letters were translated, I was answered that I was welcome, and that the Emperour would giue mee that I desired.

The fise and twentieth day, being the day of the Natiuitie, I came into the Emperours presence, and kissed his hand, who sate aloft in a goodly Chaire of estate, hauing on his head a Crowne most richly decked, and a staffe of Gold in his hand, all apparelled with Gold, and garnished with Precious stones. There sate distant from him about two yards his Brother, and next vnto him a Boy of twelue yeeres of age, who was Inheritor to the Emperour of *Casan*, conquered by this Emperour eight yeeres past. Then sate his Nobilitie round about him, richly apparelled with Gold and stone. And after I had done obeysance to the Emperour, he with his owne mouth calling me by my name, bade me to dinner, and so I departed to my lodging till dinner time, which at fixe of the clocke, by Candle light.

The Emperour dined in a faire great Hall, in the midst whereof was a Pillar foure square, very artificially made, about which were diuers Tables set, and at the vppermost part of the Hall sate the Emperour himselfe, and at his Table sate his Brother, his Vnclesonne, the Metropolitan, the young Emperour of *Casan*, and diuers of his Noblemen, all of one side. There were diuers Embassadours, and other strangers, as well *Christians* as *Heathens*, diuersly apparelled, to the number of fixe hundred men, which dined in the said Hall, besides two thousand *Tartars*, men of warre, which were newly come to render themselues to the Emperour, and were appointed to serue him in his warres against the *Lief-landers*, but they dined in other Halls. I was set at a little Table, hauing no stranger with mee, directly before the Emperours face. Being thus set and placed, the Emperour sent mee diuers bowles of Wine, and Meade, and many dishes of Meate from his owne hand, which were brought mee by a Duke, and my Table serued all in Gold and Siluer, and so likewise on other Tables, there were set bowles of Gold, set with Stone, worth by estimation 400. pounds sterling one cup, besides the Plate which serued the tables.

There

There was also a Cupboord of Plate, most sumptuous and rich, which was not vsed: among the which, was a piece of Gold of two yards long, wrought in the top with Towers, and Dragons heads, also diuers barrels of Gold and Siluer, with Castles on the bungs, richly and artificially made. The Emperour, and all the Hall throughout was serued with Dukes: and when dinner was ended, the Emperour called mee by name, and gaue me drinke with his owne hand, and so I departed to my lodging. Note, that when the Emperour drinketh, all the companie stand vp, and at euery time he drinketh, or tasteth of a dish of meate he blesseth himselfe. Many other things I saw that day, not here noted.

Rich seruice.

The fourth of Ianuarie, which was Twelf-tide with them, the Emperour, with his brother and all his Nobles, all most richly apparelled with Gold, Pearles, Precious stones, and costly Furies, with a Crowne vpon his head, of the Tartarian fashion, went to the Church in Procession, with the Metropolitan, and diuers Bishops and Priests. That day I was before the Emperour againe in Russe apparell, and the Emperour asked if that were not I, and his Chancellour answered, yea. Then he bad me to dinner: then came hee out of the Church, and went with the Procession vpon the Riuer, being all frozen, and there standing bare-headed, with all his Nobles, there was a hole made in the Ice, and the Metropolitan hallowed the water with great solemnitie and seruice, and did cast of the said water vpon the Emperours sonne, and the Nobilitie. That done, the people with great thronging filled pots of the said water to carrie home to their houses, and diuers children were throwne in, and sicke people, and plucked out quickly againe, and diuers Tartars christned: all which the Emperour beheld. Also there were brought the Emperours best Horses, to drinke at the said hallowed water. All this being ended, hee returned to his Palace againe, and went to dinner by Candle light, and sate in a wooden house, very fairely gilt. There dined in the place, aboue three hundred strangers, and I sate alone as I did before, directly before the Emperour, and had my Meate, Bread, and Drinke sent mee from the Emperour.

Twelf-tide.

Mosco Riuer hallowed.

Riuer of holy water for horse and man.

The Citie of Mosco is great, the houses for the most part of wood, and some of stone, with windowes of Iron, which serue for Summer time. There are many faire Churches of stone, but more of wood, which are made hot in the Winter time. The Emperours lodging is in a faire and large Castle, walled foure square of Bricke, high, and thicke, situated vpon an Hill, two miles about, and the Riuer on the South-west side of it, and it hath sixteene gates in the walls, and as many Bulwarkes. His Palace is separated from the rest of the Castle, by a long wall going North and South, to the Riuer side. In his Palace are Churches, some of stone, and some of wood, with round Towres fairely gilded. In the Church doores, and within the Churches are Images of Gold: the chiefe Markets for all things are within the said Castle, and for sundry things sundry Markets, and euery science by it selfe. And in the Winter there is a great Market without the Castle, vpon the Riuer being frozen, and there is sold Corne, earthen Pots, Tubs, Sleds, &c. The Castle is in circuit two thousand and nine hundred paces.

Citie of Mosco.

The Countrey is full of marish ground, and Playne, in Woods and Riuers abundant, but it bringeth forth good plentie of Corne. This Emperour is of great power: for he hath conquered much, as well of the Lieflanders, Poles, Lettoes, and Swethens, as also of the Tartars, and Gentiles, called Samoeds, hauing thereby much enlarged his Dominions. Hee keepeth his people in great subiection: all matters passe his iudgement, bee they neuer so small. The Law is sharpe for all offenders.

The Countrie.

The Metropolitan dealeth in matters of Religion, as himselfe listeth, whom the Emperour greatly honoureth. They vse the Ceremonies and Orders of the Greeke Church. They worship many Images painted on Tables, and specially the Image of Saint Nicholas. Their Priests bee married, but their wiues being dead, they may not marry the second time, and so become Monks, whereof there are a great number in the Land. They haue foure Lents in the yeere, and the weeke before Shrouetide, they call the Butter weeke, &c.

The Metropolitane.

They haue many sorts of meats and drinks, when they banquet and delight in eating of grosse meates, and stinking fish. Before they drinke they vse to blow in the Cup: their greatest friendship is in drinking: they are great Talkers and Lyars, without any faith or trust in their words, Flatterers and Dissemblers. The Women be there very obedient to their Husbands, and are kept straightly from going abroad, but at some seasons.

Meats and drinks.

At my being there, I heard men and women that drunke away their children, and all their goods at the Emperours Tauerne, and not being able to pay, hauing impawned himselfe, the Tauerner bringeth him out to the high way, and beats him vpon the legs: then they that passe by, knowing the cause, and hauing peradventure compassion vpon him, giue the money, and so hee is ransomed. In euery good Towne there is a drunken Tauerne, called a *Cursenay*, which the Emperour sometime letteth out to farme, and sometimes bestoweth for a yeere or two on some Duke or Gentleman, in recompence of his seruice: and for that time hee is Lord of all the Towne, robbing and spoyling, and doing what pleaseth him: and then hee being growne rich, is taken by the Emperour, and sent to the warres againe: where hee shall spend all that which he hath gotten by ill meanes: so that the Emperour in his warres is little charged, but all the burden

Drunkennesse.

Saddlers.

burden lyeth vpon the poore people. They vse saddles made of wood and sinewes, with the tree gilded with damaske worke, and the seat covered with cloth, sometimes of gold, and the rest *Saphian* leather, well stitched. They vse little drummes at their saddle bowes, by the sound whereof their horses vse to runne more swiftly.

Russe apparell.

The *Russe* is apparelled in this manner: his vpper garment is of cloth of gold, filke, or cloth, long, downe to the foot, and buttoned with great buttons of siluer, or else laces of filke, set on with Brooches, the sleeues thereof very long, which he weareth on his arme, ruffed vp. Vnder that he hath another long garment, buttoned with filke buttons, with a high collar standing vp of some colour, and that garment is made straight. Then his shirt is very fine, and wrought with red filke, or some gold, with a collar of pearle. Vnder his shirt he hath linnen breeches, vpon his legs, a paire of hose without feet, and his bootes of red or yellow leather. On his head he weareth a white Colepeck, with buttons or siluer, gold, pearle, or stone, and vnder it a black Foxe cap, turned vp very broad. When he rideth on horse-back to the warres, or any iourney, he hath a sword of the *Turkish* fashion, and his Bowe and Arrowes of the same manner. In the Towne he weareth no weapon, but onely two or three paire of kniues, hauing the hafts of the tooth of a Fish, called the *Morse*.

In the Winter time, the people trauell with Sleds, in Towne and Countrey, the way being hard, and smooth with snow: the waters and Riuer are all frozen, and one horse with a Sled, will draw a man vpon it foure hundred miles in three dayes: but in the Summer time, the way is deepe with myre, and traelling is very ill.

The *Russe*, if he be a man of any abilitie, neuer goeth out of his house in the winter, but vpon his Sled, and in summer vpon his Horse: and in his Sled he sits vpon a Carpet, or a white Beares skin: the Sled is drawne with a Horse well decked, with many Foxes and Woolues tails at his necke, and is conducted by a little boy vpon his backe: his seruants stand vpon the taile of the Sled, &c.

p. III.

Notes taken out of another mans Relation of the same Voyage, touching the Russian Rites.

N Christmasse day we were all willed to dine with the Emperors Maiestie, where for bread, meate, and drinke, we were serued as at other times before: but for goodly and rich Plate, we neuer saw the like or so much before. There dined that day in the Emperors presence aboue fise hundred strangers, and two hundred *Russes*, and all they were serued in vessels of Gold, and that as much as could stand one by another vpon the Tables. Besides this, there were foure Cup-boards garnished with goodly Plate both of gold and siluer. Among the which there were twelue barrells of siluer, contayning aboue twelue gallons a piece, and at each end of euery Barrell were six hoopes of fine gold: this dinner continued about six houres.

The hallowing of the Riuer of Mosco.

Euery yeere vpon the twelfth day, they vse to blesse or sanctifie the Riuer *Mosca*, which runneth through the Citie of *Mosco*, after this manner. First, they make a square hole in the Ice about three fathoms large euery way, which is trimmed about the sides and edges with white boords. Then about nine of the clocke they come out of the Church with procession towards the Riuer in this wise.

First and foremost there goe certaine young men with waxe Tapers burning, and one carrying a great Lanthorne: then follow certaine Banners, then the Crosse, then the Images of our Lady, of Saint *Nicholas*, and of other Saints, which Images men carry vpon their shoulders: after the Images follow certaine Priests to the number of one hundred or more: after them the Metropolitan who is led betweene two Priests, and after the Metropolitan came the Emperour with his Crowne vpon his head, and after his Maiestie all his Noble men orderly. Thus they followed the Procession vnto the water, and when they came vnto the hole that was made, the Priests set themselves in order round about it. And at one side of the same Poole there was a Scaffold of boords made, vpon which stood a faire Chaire in which the Metropolitan was set, but the Emperours Maiestie stood vpon the Ice.

After this the Priests began to sing, to blesse and to senfe, and did their seruice, and so by that time that they had done, the water was holy, which being sanctified, the Metropolitan tooke a little thereof in his hands, and cast it on the Emperour, likewise vpon certaine of the Dukes, and then they returned againe to the Church with the Priests that sate about the water: but that prease that there was about the water when the Emperour was gone, was wonderfull to behold, for there came aboue fise thousand Pots to be filled of that water: for that *Mosconite* which hath no part of that water, thinks himselfe vnhappy. And very many went naked into the water, both Men and Women and Children: after the prease was a little gone, the Emperours Iennets and

and Horſes were brought to drinke of the ſame water, and likewise many other men brought their Horſes thither to drinke, and by that meanes they make their Horſes as holy as themſelves. All theſe ceremonies being ended, we went to the Emperour to dinner, where we were ſerued in veſſels of ſiluer, and in all other points as we had bene beforetime.

The *Russes* begin their Lent alwayes eight weekes before Eaſter: the firſt weeke they eate Eggs, Milke, Cheeſe and Butter, and make great cheare with Pan-cakes, and ſuch other things, one friend viſiting another, and from the ſame Sunday vntill our Shroue-sunday, there are but few *Russes* ſober, but they are drunke day by day, and it is accounted for no reproach or ſhame among them.

The *Russes* Lent.

10 The next weeke being our firſt weeke in Lent, or our cleaſing weeke, beginning our Shroue-sunday, they make and keepe a great Faſt. It is reported, and the people doe verily beleue that the Metropolitan neither eateth nor drinketh any manner of thing for the ſpace of ſeuē dayes, and they ſay that there are many Religious men which doe the like. The Emperours Maieſtie eateth but one morſell of bread, and drinketh but one draught of drinke once in the day during that weeke, and all men that are of any reputation come not out of their houſes during that time, ſo that the ſtreets are almoſt voide of companie, ſauing a few poore folkes which wander to and fro. The other fixe weekes they keepe as we doe ours, but not one of them will eate either Butter, Cheeſe, Eggs, or Milke.

On Palme-sunday they haue a very ſolemne Proceſſion, in this manner following. Firſt, they haue a Tree of a good bigneſſe which is made faſt vpon two Sleds, as though it were growing there, and it is hanged with Apples, Raiſins, Figs, and Dates, and with many other fruits abundantly. In the miſt of the ſame Tree ſtand ſiue Boyes in white veſtures, which ſing in the Tree, before the Proceſſion: after this there followed certaine young men with Wax Tapets in their hands burning, and a great Lanthorne that all the light ſhould not goe out: after them followed two with long Banners, and fixe with round plates ſet vpon long ſtaues: the plates were of Copper very full of holes, and thinne: then followed fixe, carrying painted Images vpon their ſhoulders, after the Images followed certaine Priests, to the number of one hundred or more, with goodly veſtures, whereof ten or twelue are of white Damaske, ſet and embroidered round about with faire and orient Pearles, as great as Peaſe, and among them certaine Saphires and other ſtones. After them followed the one halfe of the Emperours Noblemen: then commeth the Emperours Maieſtie and the Metropolitan, after this manner.

Palme-sunday Proceſſion.

30 Firſt, there is a Horſe couered with white linnen cloth downe to the ground, his eares being made long with the ſame cloth, like to an Affes eares. Vpon this Horſe the Metropolitan ſitteth ſide-long like a woman: in his lappe lieth a faire Booke, with a Crucifixe of Gold-Smiths worke vpon the couer, which he holdeth faſt with his left hand, and in his right hand he hath a Croſſe of Gold, with which Croſſe he ceaſeth not to bleſſe the people as hee rideth. There are to the number of thirtie men which ſpread abroad their garments before the Horſe, and as ſoone as the Horſe is paſt ouer any of them, they take them vp againe and runne before, and ſpread them againe, ſo that the Horſe doth alway goe on ſome of them. They which ſpread the garments are all Priests ſonnes, and for their labours the Emperour giueth vnto them new garments.

The Emperour leadeth the Metropolitan's Horſe in Proceſſion.

One of the Emperours Noblemen leadeth the Horſe by the head, but the Emperour himſelfe going on foot, leadeth the Horſe by the end of the reyne of his Bridle with one of his hands, and in the other of his hands hee had a branch of a Palme tree: after this followed the reſt of the Emperours Noblemen and Gentlemen, with a great number of other people. In this order they went from one Church to another within the Caſtle, about the diſtance of two flight ſhot: and ſo returned againe to the Emperours Church, where they made an end of their ſeruiſe. Which being done, the Emperours Maieſtie, and certaine of his Noblemen went to the Metropolitan his houſe to dinner, where of delicate fiſhes and good drinckes there was no lacke. The reſt of this weeke vntill Eaſter day they kept very ſolemnelly, continuing in their houſes for the moſt part, and vpon Munday or Thursday the Emperour doth alwayes vſe to receiue the Sacrament, and ſo doe moſt of his Nobles.

50 Vpon Good-friday they continue all the day in contemplation and prayers, and they vſe euery yeere on Good-friday to let looſe a Priſoner in the ſtead of *Barabas*. The night following they goe to the Church, where they ſleepe vntill the next morning, and at Eaſter they haue the Reſurrection, and after euery of the Lents they eate fleſh the next weeke following, Friday, Saturday and all.

They haue an order at Eaſter, which they alwayes obſerue, and that is this: euery yeere againſt Eaſter to dye or colour red with Brazell a great number of Egges, of which euery maſt and woman giueth one vnto the Priſt of their Pariſh vpon Eaſter day in the morning. And moreouer, the common people vſe to carrie in their hands one of their red Egges, not onely vpon Eaſter day, but alſo three or foure dayes after, and Gentlemen and Gentlewomen haue Egges gilded which they carrie in like manner. They vſe it, as they ſay, for a great loue, and in token of the Reſurrection, whereof they reioyce. For when two friends meet during the Eaſter holy dayes

Kissing vsed in
the Greeke
Church.

dayes, they come and take one another by the hand: the one of them saith, *the Lord or Christ is risen*, the other answereth, *it is so of a truse*, and then they kisse and exchange their Egges both men and women, continuing in kissing foure dayes together.

His Majestie heareth all Complaints himselfe, and with his owne mouth giueth sentence, and judgement of all matters, and that with expedition: but Religious matters hee medleth not withall, but referreth them wholly vnto the Metropolitane. His Majestie retayneth and well rewardeth all strangers that come to serue him, and especially men of Warre. He delighteth not greatly in Hawking, Hunting, or any other pastime, nor in hearing Instruments or Musicke, but setteth all his whole delight vpon two things: First, to serue God, as vndoubtedly hee is very deuout in his Religion, and the second, how to subdue and conquer his enemies.

He hath abundance of Gold and Siluer in his owne hands or Treasurie: but the most part of his know not a Crowne from a Counter, nor Gold from Copper, they are so much cumbred therewithall, and he that is worth two, three, or foure Grotes, is a rich man.

Monasteries
and Monkes.

They haue both Monkes, Friers, and Nunnes, with a great number of great and rich Monasteries: they keepe great Hospitalitie, and doe releue much poore people day by day. I haue bin in one of the Monasteries called *Troietes*, which is walled about with Bricke very strongly like a Castle, and much Ordnance of Brasse vpon the walls of the same. They told mee themselves that there are seuen hundred Brethren of them which belong vnto that House. The most part of the Lands, Townes, and Villages which are within fortie miles of it, belong vnto the same.

Images.

They shewed me the Church, wherein were as many Images as could hang about, or vpon the walls of the Church round about, and euen the Roofe of the Church was painted full of Images. The chiefe Image was of our Ladie, which was garnished with Gold, Rubies, Saphirs, and other rich Stones abundantly. In the midst of the Church stood twelue Waxe Tapers of two yards long, and a fathome about in bignesse, and there stands a Kettle full of Waxe with about one hundred weight, wherein there is alwayes the wicke of a Candle burning, as it were a Lampe which goeth not out day nor night.

Miracles.

They shewed me a Coffin couered with Cloth of Gold, which stood vpon one side within their Church, in which they told me lay a holy man, who neuer eate or dranke, and yet that he liueth. And they told me (supposing that I had beleued them) that he healeth many Diseases, and giueth the blind their sight, with many other Miracles, but I was hard of beliefe, because I saw him worke no miracle whilst I was there.

Drinckes and
Vessels.

After this they brought me into their Sellers, and made me taste of diuers kinds of Drinckes, both Wine and Beere, Meade and Quassie, of sundry colours and kinds. Such abundance of Drinke as they haue in their Sellers, I doe suppose few Princes haue more, or so much at once. Their Barrells or Vessels are of an vnmeasurable bignesse and size: some of them are three yards long and more, and two yards and more broad in their heads: they contayne sixe or seuen tuns apiece: they haue none in their Sellers of their owne making that are lesse then a tunne. They haue nine or ten great vaultes which are full of those Barrells which are seldome remooued: for they haue trunks which come downe through the Roofe of the vaults in sundry places, through which they powre drinke downe, hauing the Caske right vnder it to receiue the same, for it should be a great trouble to bring it all downe the staires.

The Hospitali-
tie of their
Monasteries.

They giue Bread, Meate, and Drinke vnto all men that come to them, not onely while they are at their Abbey, but also when they depart, to serue them by the way. There are a great number of such Monasteries in the Realme, and the Emperours Majestie rideth oftentimes from one to another of them, and lyeth at them three or foure dayes together.

Monke Mer-
chants.

The same Monkes are as great Merchants as any in the Land of *Russia*, and doe occupie buying and selling as much as any other men, and haue Boates which passe to and fro in the Riuer with Merchandize from place to place where any of their Countrey doe traffique.

Dyer and Ap-
parell.

They eate no flesh during their liues as it is reported: but vpon Sunday, Munday, Tuesday, Thursday, and Saturday, it is lawfull for them to eate Egges, Butter, Cheese, and Milke, and at all times to eate fish, and after this sort they lead their liues. They weare all blacke Garments, and so doe none other in all the Land, but at that Abbey onely.

Want of Prea-
chers cause of
great igno-
rance and Ido-
latrie.

They haue no Preachers, no not one in all the Land to instruct the people, so that there are many, and the most part of the poore in the Countrey, who if one aske them how many Gods there be, they will say a great many, meaning that euery Image which they haue is a God: for all the Countrey and the Emperours Majestie himselfe will blesse and bow, and knocke their heads before their Images, insomuch that they will cry earnestly vnto their Images to helpe them to the things which they need. All men are bound by their Law to haue those Images in their Houses, and ouer euery gate in all their Townes and Cities are Images set vp, vnto which the people bow and bend, and knocke their heads against the ground before them: as often as they come by any Church or Crosse they doe in like manner. And when they come to any House, they blesse themselves three or foure times before they will salute any man in the House.

They reckon and hold it for great sinne to touch or handle any of their Images within the Circle

Circle of the board where the painting is, but they keepe them very daintily, and rich men deck them ouer and about with Gold, Siluer, and Stones, and hang them ouer and about with Cloth of Gold.

Sinnes of Superstition.

The Priests are marryed as other men are, and weare all their Garments as other men doe, except their Night-caps, which is cloth of some sad colour, being round and reacheth vnto the eares: their crownes are shauen, but the rest of their haire they let grow, as long as Nature will permit, so that it hangeth beneath their eares vpon their shoulders: their Beards they neuer shau: if his Wife happen to dye, it is not lawfull for him to marry againe during his life.

Priests.

They minister the Communion with Bread and Wine after our order, but hee breaketh the Bread and putteth it into the Cup vnto the Wine, and commonly some are partakers with them: and they take the Bread out againe with a Spooone together with part of the Wine, and so take it themselves, and giue it to others that receiue with them after the same manner. They will not permit any Nation but the *Greekes* to be buried in their sacred Burials, or Church-yards. All their Churches are full of Images, vnto the which the people when they assemble, doe bow and knocke their heads, as I haue before said, that some will haue knobs vpon their fore-heads with knocking, as great as Egges. All their seruice is in the *Russie* Tongue, and they and the common people haue no other Prayers but this, *Ghospodi Iesui Christos esine voze ponuloi nashe*. That is to say, O Lord Iesus Christ, Son of God haue mercie vpon vs: and this is their Prayer, so that the most part of the vnlearned know neither *Pater Noster*, nor the Beliefe, nor Ten Commandements, nor scarcely vnderstand the one halfe of their Seruice which is read in their Churches.

Sacraments.

All their seruice is in their Mother tongue.

When any child is borne, it is not baptized vntill the next Sunday, and if it chance that it be not baptized then, it must tarry vntill the second Sunday after the birth, and it is lawfull for them to take as many God-fathers and God-mothers as they will, the more the better.

When they goe to the Church, the Mid-wife goeth foremost, carrying the Childe, and the God-fathers and God-mothers follow into the midst of the Church, where there is a small Table readie set, and on it an Earthen Pot full of warme water, about the which the God-fathers and God-mothers, with the Childe, settle themselves: then the Clerke giueth vnto euery of them a small Waxe Candle burning, then commeth the Priest, and beginneth to say certayne words, which the God-fathers and God-mothers must answere word for word, among which one is, that the Child shall forsake the Deuill, and as that name is pronounced, they must all spit at the word as often as it is repeated. Then he blesteth the water which is in the Pot, and doth breathe ouer it: then he taketh all the Candles which the Gossips haue, and holding them all in one hand letteth part of them drop into the water, and then giueth euery one his Candle againe, and when the water is sanctified, he taketh the Child and holdeth it in a small Tub, and one of the God-fathers taketh the Pot with warme water, and powreth it all vpon the Childe head.

Baptisme.

After this he hath many more Ceremonies, as anoynting Eares and Eyes with Spittle, and making certayne Crosses with Oyle vpon the backe, head, and brest of the Childe: then taking the Childe in his armes, carryeth it to the Images of Saint *Nicholas*, and our Ladie, &c. and speaketh vnto the Images, desiring them to take charge of the Childe, that he may liue, and beleue as a Christian man or woman ought to doe, with many other words. Then comming backe from the Images, he taketh a paire of sheares and clippeth the young and tender haire of the Childe head, in three or foure places, and then deliuereth the Childe, whereunto euery of the God-fathers and God-mothers lay a hand: then the Priest chargeth them, that the Childe bee brought vp in the faith and feare of God or Christ, and that it be instructed to clinege, and bow to the Images, and so they make an end: then one of the God-fathers must hang a Crosse about the necke of the Childe, which hee must alwayes weare, for that *Russe* which hath not a Crosse about his necke they esteeme as no Christian man, and thereupon they say that wee are no Christians, because we doe not weare Crosses as they doe.

Their Matrimonic is nothing solemnized, but rather in most points abominable, and as neere as I can learne, in this wise following.

Of their Matrimonic.

First, when there is loue betweene the parties, the man sendeth vnto the woman a small Chest or Boxe, wherein is a Whip, Needles, Threed, Silke, Linnen Cloth, Sheares, and such necessities as she shall occupie when she is a Wife, and perhaps sendeth therewithall Raisins, Figs, or some such things, giuing her to vnderstand, that if she doe offend, she must be beaten with the Whip, and by the Needles, Threed, Cloth, &c. that she should apply her selfe diligently to sew, and doe such things as she could best doe, and by the Raisins or Fruits he meaneth if she doe well, no good thing shall bee with-drawne from her, nor bee too deare for her: and shee sendeth vnto him a Shirt, Hand-kerchers, and some such things of her owne making. And now to the effect.

When they are agreed, and the day of Marriage appointed, when they shall goe towards the Church, the Bride will in no wise consent to goe out of the House, but resisteth and striueth with them that would haue her out, and sayneth her selfe to weepe, yet in the end, two women get her out, and lead her towards the Church, her face being covered close, because of her dissimulation, that it should not be openly perceiued: for shee maketh a great noyse, as though she were sobbing and weeping, vntill she come at the Church, and then her face is vncouered. The

man commeth after among other of his friends, and they carrie with them to Church a great Pot of Wine or Meade: then the Priest coupleth them together much after our order, one promising to loue and serue the other during their liues together, &c. which being done, they be ginnne to drinke, and first the woman drinketh to the man, and when he hath drunke he letteth the cup fall to the ground, hasting immediately to tread vpon it, and so doth she, and whether of them tread first vpon it, must haue the victorie and be Master at all times after, which commonly happeneth to the man, for he is readiest to set his foot on it, because he letteth it fall himselfe, then they goe home againe, the womans face being vncouered. The Boyes in the streets cry out, and make a noyse in the meane time, with very dishonest words.

When they come home, the Wife is set at the vpper end of the Table, and the Husband next vnto her: they fall then to drinking till they be all drunke, they perchance haue a Minstrell or two, and two naked men, which led her from the Church, dance naked a long time before all the company. When they are wearie of drinking, the Bride and the Bridegroom get them to Bed, for it is in the Euening alwayes when any of them are married: and when they are going to Bed, the Bridegroom putteth certayne Money, both Gold and Siluer, if he haue it, into one of his Boots, and then sitteth downe in the Chamber, crossing his legges, then the Bride must pluck off one of his Boots, which she will, and if she happen on the Boot wherein the Money is, shee hath not onely the Money for her labour, but is also at such choice, as she need not euer from that day forth to pull off his Boots, but if shee misse the Boot wherein the Money is, she doth not onely lose the Money, but is also bound from that day forwards to pull off his Boots continually.

Then they continue in drinking and making good cheere three dayes following, being accompanied with certayne of their friends, and during the same three dayes, he is called a Duke, and she a Dutches, although they be very poore persons, and this is as much as I haue learned of their Matrimony: but one common rule is amongst them, if the woman be not beaten with the Whip once a Weeke, she will not be good, and therefore they looke for it orderly, and the women say, that if their Husbands did not beate them, they should not loue them.

They vse to marry there very young, their Sonnes at sixteene and eightene yeares old, and the Daughters at twelue or thirteene yeares or younger: they vse to keepe their Wiues very closely, I meane those that be of any reputation, so that a man shall not see one of them but at a chance, when shee goeth to Church at Christmasse or at Easter, or else going to visit some of her friends.

The women
of Russia paint
their faces.

The most part of the women vse to ride a-stride in Saddles with stirrups, as men doe, and some of them on Sleds, which in Summer is not commendable. The Husband is bound to find the Wife colours to paint her with all, for they vse ordinarily to paint themselues: it is such a common practice among them, that it is counted for no shame: they grease their faces with such colours, that a man may discerne them hanging on their faces almost a flight shoot off: I cannot so well liken them as to a Millers Wife, for they looke as though they were beaten about the face with a bagge of Meale, but their Eye-browes they colour as blacke as leat. The best propertie that the women haue, is that they can sewe well, and imbroider with Silke and Gold excellently.

Of their Buriall.

When any man or woman dyeth, they stretch him out, and put a new paire of shooes on his feet, because he hath a great Journey to goe: then doe they wind him in a sheet, as wee doe, but they forget not to put a testimonie in his right hand, which the Priest giueth him, to testifie vnto Saint Nicholas that he dyed a Christian man or woman. And they put the Corse alwayes in a Coffin of Wood, although the partie be very poore: and when they goe towards the Church, the Friends and Kinsmen of the partie departed carrie in their hands small Waxe Candles, and they weepe, and howle, and make much lamentation. They that bee hanged or beheaded, or such like, haue no testimonie with them: how they are recieued into Heauen, it is a wonder, without their Pasport.

Bread made of
straw.
The vnmercif
fulnesse of the
Russes toward
the poore.
Stoues or
Baths vsuall
with the Mos
covites.

There are a great number of poore people among them which dye daily for lacke of sustenance, which is a pitifull case to behold: for there hath bin buried in a small time, within these two yeares, aboue eightie persons yong and old, which haue dyed onely for lacke of sustenance, for if they had had straw and water enough, they would make shift to liue: for a great many are forced in the Winter to dry straw and stampe it, and to make bread thereof, or at the least they eate it in stead of bread. In the Summer they make good shift with grasse, herbes, and roots: barkes of Trees are good meat with them at all times. There is no people in the World, as I suppose, that liue so miserably as doe the pouertie in thole parts: and the most part of them that haue sufficient for themselues, and also to relieue others that need, are so vnmercifull that they care not how many they see dye of famine or hunger in the streets.

It is a Countrey full of Diseases, diuers, and euill, and the best remedie is for any of them, as they hold opinion, to goe often vnto the Hot-houses, as in a manner euery man hath one of his owne, which he heateth commonly twice euery weeke, and all the household sweat, and wash themselues therein.

The

The first and principall Meade is made of the joyce or liquor taken from a Berrie, called in *Russia*, *Maliemo*, which is of a marvellous sweet taste, and of a Carmolant colour, which Berrie I have seene in *Paris*. The second Meade is called *Vishna*, because it is made of a Berrie so called, and is like a blacke Gooseberrie: but it is like in colour and taste to the red Wine of *France*. The third Meade is called *Amarodina* or *Smorodina*, short, of a small Berrie much like to the small Raisin, and groweth in great plentie in *Russia*. The fourth Meade is called *Chereunikyna*, which is made of the wild blacke Cherrie. The fift Meade is made of Honey and Water, with other mixtures. There is also a delicate Drinke drawne from the Root of the Birch Tree, called in the *Russe* Tongue *Berocuites*, which drinke the Noblemen and others vse in Aprill, May, and June, which are the three moneths of the Spring-time: for after those moneths, the sap of the Tree dryeth, and then they cannot haue it.

Diuers sorts
of Russian
Drinckes, re-
ported by Tho-
mas Bulley.

about 1558
1558

I haue by me a Letter of Master Christopher Hoddesdon, written the seuenteenth of Nouem- ber 1558 wherein he writes, that it seemes, there is no great punishment for breaking their Re- gion, some of them aduenturing to eat Milke with him on a Fastling day, which yet others re- fused. *Narossasy* (so he calls the Towne where he writ) is fairer then *Volga*, the Riuer almost a mile broad: he was asked seuen *Alines* for a Sturgeon, he had given at *Danske* nine Mark-sprace for a worser: neither had he seene such abundance of Ling in *England*, as there of Sturgeons, there being in that dayes Market, about three thousand.

§. IIII.

The Voyage of Master ANTHONIE LENKINSON, made from the Citie of Mosco in *Russia*, to the Citie of Boghar in *Bactria*, in the yeare 1558. written by himselfe to the Merchants of London, of the Moscouie Company.

He three and twentieth day of Aprill, in the yeare 1558. (hauing obtayned the Em- perour of *Russia* his Letters, directed vnto sundry Kings and Princes, by whose Domi- nions I should passe) departed from *Mosco* by water, hauing with mee two of your Seruants; namely, *Richard Iohanson*, and *Robert Iohnson*, and a Tartar *Tolmach*, with diuers parcels of Wares, as by the Inuentorie appeareth: and the eight and twentieth day wee came to a Towne, called *Collom*, distant from the *Mosco* twentie leagues, and passing one league beyond the said *Collom*, we came vnto a Riuer, called *Occa*, into the which the Riuer *Mosco* falleth, and loseth his name: and passing downe the said Riuer *Occa* eight leagues, wee came vnto a Castle called *Terreuettsko*, which we left vpon our right hand, and proceeding for- ward, the second day of May, wee came vnto another Castle, called *Perslane*, distant eight leagues, leaving it also on our right hand. The third day we came vnto the place where old *Re- xan* was situate, being now most of it ruined and ouer-growne, and distant from the said *Pers- lane*, fixe leagues: the fourth day we passed by a Castle, called *Terreconia*, from *Rezan* twelue leagues, and the sixth day we came to another Castle, called *Cassim*, vnder the government of a Tartar Prince, named *Vizar Zegoline*, sometime Emperour of the worthy Citie of *Cazan*, and now subject vnto the Emperour of *Russia*. But leauing *Cassim* on our left hand, the eighth day we came vnto a faire Towne, called *Morom*, from *Cassim* twentie leagues, where wee tooke the Sunne, and found the latitude fiftie fixe degrees: and proceeding forward the eleuenth day, wee came vnto another faire Towne and Castle, called *Nyse Nonogrod*, situated at the falling of the foresaid Riuer *Occa*, into the worthy Riuer of *Volga*, distant from the said *Morom* fixe and twen- tie leagues, in the latitude of fiftie fixe degrees eightene minutes. From *Rezan* to this *Nyse Nonogrod*, on both sides the said Riuer of *Occa*, is rayfed the greatest store of Waxe and Honey in all the Land of *Russia*. We tarried at the foresaid *Nyse Nonogrod* vntill the nineteenth day, for the comming of a Capitaine which was sent by the Emperour to rule at *Astracan*, who being arriued, and hauing the number of fixe hundred great Boates vnder his conduct, some laden with Victuals, Souldiers, and Munition: and other some with Merchandize, departed altogether the said nineteenth day from the said *Nyse Nonogrod*, and the two and twentieth wee came vnto a Castle, called *Vasilagorod*, distant fixe and twentie leagues, which wee left vpon our right hand. This Towne or Castle had his name of this Emperours Father, who was called *Vasilus*, and *Gorod* in the *Russe* Tongue is as much to say, as a Castle, so that *Vasilia- gorod* is to say, *Vasilus* Castle: and it was the furthest place that the said Emperour conquered from the *Tartars*. But this present Emperour his Sonne, called *Iuan Vasil- wick*, hath had great good successe in his Warres, both against the *Christians*, and also the *Ma- hometists*, and *Gentiles*, but especially against the *Tartars*, inlarging his Empire euen to the *Caspian* Sea, hauing conquered the famous Riuer of *Volga*, with all the Countreyes thereabout adjacent. Thus proceeding on our journey, the fixe and twentieth day of May afore-said,

we came to another Castle called *Sabowhare*, which wee left on our right hand, distant from *Vasiliagorod*, sixteene leagues. The Countrey hereabout is called *Mordonits*, and the Habitants did professe the Law of the *Gentiles*: but now beeing conquered by this Emperour of *Russia*, most of them are christened, but lye in the Woods and Wildernesse, without Towne or Habitation.

Smyaske.

Cazan stands in
55. degrees 33.
minutes.

The seuen and twentieth day we passed by another Castle, called *Smyaske*, distant from *Shabowhare* aforesaid, twentie five leagues: we left it on our right hand, and the nine and twentieth came vnto an Iland one league from the Citie of *Cazan*, from which falleth downe a Riuer called *Cazankareca*, and entreth into the foresaid *Volga*. *Cazan* is afaire Towne after the *Russe* or *Tartar* fashion, with a strong Castle situated vpon a high Hill, and was walled round about with Timber and Earth, but now the Emperour of *Russia* hath given order to plucke downe the olde wals, and to build them againe of free stone. It hath beene a Citie of great Wealth and Riches, and being in the hands of the *Tartars*, it was a Kingdome of it selfe, and did more vex the *Russes* in their Warres, then any other Nation: but nine yeares past, this Emperour of *Russia* conquered it, and tooke the King captiue, who being but young is now baptized, and brought vp in his Court with two other Princes, which were also Kings of the said *Cazan*, and being each of them in time of their Raignes in danger of their Subiects through ciuill discord, came and rendered themselues at severall times vnto the said Emperour, so that at this present there are three Princes in the Court of *Russia*, which had beene Emperours of the said *Cazan*, whom the Emperour vseth with great honour.

The Iland of
Merchants.

We remayned at *Cazan* till the thirteenth day of Iune, and then departed from thence: and the same day passed by an Iland called the Iland of Merchants, because it was wont to be a place where all Merchants, as well *Russes* and *Cazanites*, as *Nagayans* and *Crimmes*, and diuers other Nations did resort to keepe Mart for buying and selling, but now it is forsaken, and standeth without any such resort thither, or at *Cazan*, or at any place about it, from *Mosco* vnto *Mare Caspium*.

The Riuer of
Cama.

Vachen.

Thus proceeding forward, the fourteenth day we passed by a goodly riuer called *Cama*, which we left on our left hand. This Riuer falleth out of the Countrey of *Permia* into the Riuer of *Volga*, and is from *Cazan* fifteene leagues: and the Countrey lying betwixt the said *Cazan*, and the said Riuer *Cama* on the left hand of *Volga* is called *Vachen*, and the Inhabitants bee *Gentiles*, and liue in the Wildernesse without House or Habitation: and the Countrey on the other side of *Volga*, ouer against the said Riuer *Cama*, is called the Land of *Cheremizes*, halfe *Gentiles*, halfe *Tartars*, and all the Land on the left hand of the said *Volga*, from the said Riuer vnto *Astracan*, and so following the North and North-east side of the *Caspian* Sea, to a Land of the *Tartars* called *Turkemen*, is called the Countrey of *Mangat* or *Nagay*, whose Inhabitants are of the Law of *Mahomet*, and were all destroyed in the yeare 1558. at my beeing at *Astracan*, through Ciuill Warres among them, accompanied with Famine, Pestilence, and such Plagues, in such sort that in the said yeare there were consumed of the people, in one sort and another, aboue one hundred thousand: the like Plague was neuer seene in those parts, so that the said Countrey of *Nagay*, being a Countrey of great Pasture, remayneth now vnreplenished to the great contentation of the *Russes*, who haue had cruell Warres a long time together.

Mangat or *Nagay*
Tartars.

Hords.

The *Nagayans* when they flourished, liued in this manner: they were diuided into diuers companies called Hords, and euery Hord had a Ruler, whom they obeyed as their King, and was called a Murse. Towne or House they had none, but liued in the open fields, euery Murse or King hauing his Hords or people about him, with their Wiues, Children, and Cattell, who hauing consumed the Pasture in one place, removed vnto another: and when they remooue they haue Houses like Tents set vpon Waggones or Carts, which are drawne from place to place with Camels, and therein their Wiues, Children, and all their Riches, which is very little, is carried about, and euery man hath at the least foure or five Wiues besides Concubines. Vse of money they haue none, but doe barter their Cattell for apparell and other necessaries. They delight in no Art nor Science, except the Warres, wherein they are expert, but for the most part they bee pasturing people, and haue great store of Cattell, which is all their Riches. They eate much flesh, and especially the Horse, and they drinke Mares Milke, wherewith they be oftentimes drunke: they are seditious and inclined to Theft and Murther. Corne they sow not, neither doe eate any Bread, mocking the Christians for the same, and disabling our strengths, saying, wee liue by eating the top of a Weed, and drinke a Drinke made of the same, allowing their great deuouring of flesh, and drinking of Milke to be the increase of their strength. But now to proceed forward to my Iourney.

The *Crimme*
Tartars.

All the Countrey vpon our right hand the Riuer *Volga*, from ouer against the Riuer *Cama* vnto the Towne of *Astracan*, is the Land of *Crimme*, whose Inhabitants bee also of the Law of *Mahomet*, and liue for the most part according to the fashions of the *Nagayans*, hauing continuall Warres with the Emperour of *Russia*, and are valiant in the field, hauing countenance, and support from the great *Turke*.

The sixteenth day of Iune we passed by certayne Fishermens Houses, called *Petowse*, twentie leagues

leagues from the Riuer *Cassa*, where is great fishing for Sturgeon, so continuing our way vntill the two and twentieth day, and passing by another great Riuer called *Samar*, which falleth out of the aforesaid Countrey, and runneth through *Nagay*, and entreth into the said Riuer of *Volga*. The eight and twentieth day we came vnto a great Hill, where was in times past a Castle made by the *Crimmes*, but now it is ruined, being the iust mid-way betweene the said *Cazan* and *Astrachan*, which is two hundred leagues or thereabout, in the latitude of one and fiftie degrees; fortie seuen minutes. Vpon all this shoare groweth abundance of *Licoris*, whose Root runneth within the ground like a Vine.

The Riuer
of *Samar*.

Licoris in
great plentie.
Peronolog.
Don or *Tanais*.

Thus going forward, the sixt day of Iuly we came to a place called *Peronolog*, so named because in times past the *Tartars* carried their Boats from *Volga*, vnto the Riuer *Tanais*, otherwise called *Don*, by Land, when they would rob such as passed downe the said *Volga* to *Astrachan*, and also such as passed downe by the Riuer *Tanais*, to *Afon*, *Cassa*, or any other Towne situated vpon *Mare Euxinum*, into which Sea *Tanais* falleth, who hath his Springs in the Countrey of the *Rezan*, out of a plaine ground. It is at this streight of *Peronolog* from the one Riuer to the other, two leagues by Land, and is a dangerous place for Theeues and Robbers, but now it is not so euill as it hath beene by reason of the Emperour of *Russia* his Conquests.

Departing from *Peronolog*, hauing the Wildernesse on both sides, wee saw a great Heard of *Nagayans* pasturing, as is abouesaid, by estimation aboue a thousand Camels drawing of Carts with Houses vpon them like Tents, of a strange fashion, seeming to bee as farre off a Towne: that Herd was belonging to a great Murse, called *Smille*, the greatest Prince in all *Nagay*, who hath slaine and driuen away all the rest, not sparing his owne Brethren and Children, and hauing peace with this Emperour of *Russia*, hee hath what hee needeth, and ruleth alone; so that now the *Russes* liue in peace with the *Nagayans*, who were wont to haue mortall Warres together.

The fourteenth day of Iuly passing by an old Castle, which was Old *Astrachan*, and leauing it vpon our right hand, we arriued at New *Astrachan*, which this Emperour of *Russia* conquered fixe yeares past, in the yeare 1552. It is from the *Mosco* vnto *Astrachan* fixe hundred leagues, or thereabout. The Towne of *Astrachan* is situated in an Iland vpon a Hill side, hauing a Castle within the same, walled about with Earth and Timber, neither faire nor strong: The Towne is also walled about with Earth: the Buildings and Houses (except it be the Captaines Lodging, and certaine other Gentlemens) most base & simple. The Iland is most destitute and barren of wood and pasture, and the ground will beare no Corne; the Aire is there most infected, by reason (as I suppose) of much fish, and specially Sturgeon, by which onely the Inhabitants liue, hauing great scarcitie of flesh and bread. They hang vp their fish in their streets and Houses to dry for their prouision, which causeth such abundance of flies to increase there, as the like was neuer seene in any Land, to their great Plague. And at my being at the said *Astrachan*, there was a great Famine and Plague among the people, and specially among the *Tartars*, called *Nagayans*, who the same time came thither in great numbers to render themselves to the *Russes* their Enemies, and to seeke succour at their hands, their Countrey being destroyed, as I said before: but they were but ill entertayned or releued, for there dyed a great number of them for hunger, which lay all the Iland through in heapes dead, and like to beafts vnburied, very pittifull to behold: many of them were also sold by the *Russes*, and the rest were banished from the Iland. At that time it had beene an easie thing to haue conuerted that wicked Nation to the Christian Faith, if the *Russes* themselves had beene good Christians: but how should they shew compassion vnto other Nations, when they are not mercifull vnto their owne? At my being there I could haue bought many goodly *Tartars* Children, if I would haue had a thousand, of their owne Fathers and Mothers, to say, a Boy or a Wench for a Loafe of bread worth fixe pence in *England*, but we had more need of victuals at that time then of any such Merchandize. This *Astrachan* is the furthest hold that this Emperour of *Russia* hath conquered of the *Tartars* towards the *Caspian* Sea, which he keepeth very strong, sending thither euery yeare prouision of men, and victuals, and Timber to build the Castle.

Astrachan.

Store of Stur-
geons, & flies.

Miserable Fa-
mine.

There is a certayne Trade of Merchandize there vsed, but as yet so small and beggerly, that it is not worth the making mention, and yet there come Merchants thither from diuers places. The chiefeest Commodities that the *Russes* bring thither are red Hides, red sheeps skinnes, wooden Vessels, Bridles, and Saddles, Knives, and other Trifles, with Corne, Bacon, and other Victuals. The *Tartars* bring thither diuers kinds of Wares made of Cotton Wooll, with diuers kinds of wrought Silkes: and they that come out of *Persia*, namely, from *Shamacki*, doe bring sewing Silke, which is the courtest that they vse in *Russeland*, *Crasse*, diuers kinds of pike Silkes for Girdles, Shirts of Male, Bowes, Swords, and such like things: and some yeares Corne, and Wal-nuts, but all such things in such small quantitie, the Merchants being so beggerly and poore that bring the same, that it is not worth the writing, neither is there any hope of Trade in all those parts worth the following.

This foresaid Iland of *Astrachan* is in length twelue leagues, and in breadth three, and lyeth East and West in the latitude of fortie seuen degrees, nine minutes: we tarried there vntill the

to the Caspian
Sea.

Volga.

The Blue Sea.

Banghletea be-
ing 74. leagues
from Volga.

six day of August, and having bought and provided a Boate in company with certayne Tartars and Persians, wee laded our goods and imbarked our selues, and the same day departed I, with the said two Johnsons, having the whole charge of the Navigation downe the said River Volga, beeing very crooked, and full of flats toward the mouth thereof. Wee entered into the Caspian Sea the tenth day of August at the Easterly side of the said River, beeing twentie leagues from Astracan aforesaid, in the latitude of fortie six degrees, twentie seven minutes.

Volga hath seuentie mouthes or falls into the Sea: and we having a large wind, kept the North-east shoare, and the eleventh day we sayled seuen leagues East North-east, and came vnto an Island hauing a high Hill therein, called *Accurgar*, a good Marke in the Sea. From thence East ten leagues, we fell with another Island, called *Bawhiata*, much higher then the other. Within these two Islands to the Northwards, is a great Bay called the *Blue Sea*. From thence wee sayled East and by North ten leagues, and hauing a contrary wind, wee came to an Anchor in a fathome water, and so rid vntill the fifteenth day, hauing a great storme at South-east, being a most contrary wind, which we rid out. Then the wind came to the North, and wee weighed, and set our course South-east, and that day sayled eight leagues.

Thus proceeding forwards, the seuenteenth day we lost sight of Land, and the same day sayled thirtie leagues, and the eighteenth day twentie leagues winding East, and fell with a Land called *Banghletea*, being seuentie foure leagues from the mouth of the said Volga, in the latitude of fortie six degrees fiftie foure minutes, the Coast lying nearest East and by South, and West and by North. At the point of this land lyeth buried a holy Prophet, as the Tartars call him, of their Law, where great deuotion is vsed of all such Mahometists as doe passe that way.

HONDIVS his Map of Tartaria.

The nineteenth day the winde being West, and wee winding East South-east, we sayled ten leagues, and passed by a great River called *Iaic*, which hath his spring in the Land of *Siberia*, *Iaic River*. nigh vnto the foresaid River *Cama*, and runneth through the Land of *Nagay*, falling into this *Mare Caspium*. And vp this River one dayes journey is a Towne called *Serachicke*, subiect to the foresaid Tartar Prince, called *Murfe Smille*, which is now in friendship with the Emperour of *Russia*. Heere is no trade of merchandise vled, for that the people haue no vse of money, and are all Men of warre, and Pasturers of cattell, and giuen much to theft and murder. Thus being at an anchor against this River *Iaic*, and all our men being on Land, sauing I, who lay sore sicke, and five *Tartars*, whereof one was reputed a holy man, because hee came from *Mecca*, there came vnto vs a Boat with thirtie men well armed and appointed, who boarded vs, and began to enter into our Barke, and our holy *Tartar*, called *Azy*, perceiuing that, asked them what they would haue, and withall made a prayer: with that these Rouers stayed, declaring that they were Gentlemen, banished from their Countrey, and out of liuing, and came to see if there were any *Russes*, or other *Christians* (which they call *Cappars*) in our Barke: To whom this *Azy* most stoutly answered, that there were none, auowing the same by great oaths of their Law, (which lightly they will not breake) whom the Rouers beleued, and vpon his words departed. And so through the fidelitie of that *Tartar*, I with all my companie and goods were saued, and our men being come on board, and the wind faire, we departed from that place, and winding East and South-east, that day being the twentieth of August sailed sixteene leagues.

20 The one and twentieth day we passed ouer a Bay of sixe leagues broad, and fell with a Cape of Land, hauing two Ilands at the South-east part thereof, being a good marke in the Sea: and doubling the Cape the Land trended North-east, and maketh another Bay, into which falleth the greater River *Tem*, springing out of the Land of *Colmack*. The two and twentieth, three and twentieth, and foure and twentieth dayes, we were at anchor. The five and twentieth, the winde came faire, and we sayled that day twentie leagues, and passed by an Iland of lowe land, and thereabout are many flats and sands: and to the Northward of this Iland there goeth in a great Bay, but we set off from this Iland, and winded South to come into deepe water, being much troubled with shoals and flats, and ranne that course ten leagues, then East South-east, twentie leagues, and fell with the maine Land, being full of copped Hills, and passing along the coast twentie leagues, the further we sayled, the higher was the Land.

30 The seuen and twentieth day we crossed ouer a Bay, the South shoare being the higher Land, and fell with a high point of Land: and being ouerthwart the Cape, there rose such a storme at the East, that we thought verily we should haue perished: this storme continued three dayes. From this Cape we passed to a Port called *Manguslaue*. The place where we should haue arrived at the Southermost part of the *Caspian Sea*, is twelue leagues within a Bay: but we being fore tormented and tossed with this forelaid storme, were driuen vnto another Land on the other side the Bay, ouerthwart the said *Manguslaue*, being very lowe Land, and a place as well for the ill commoditie of the Haven, as of those brute field people, where neuer Barke nor Boat had before arrived, nor liked of vs.

40 But yet there we sent certaine of our men to Land to talke with the Gouvernour and People, as well for our good ylage at their hands, as also for prouision of Camels to carrie our goods from the said Sea side to a place called *Sallyzore*, being from the place of our landing five and twentie dayes journey. Our Messengers returned with comfortable words and faire promises of all things.

Wherefore the third day of September 1558. we discharged our Barke, and I with my companie were gently enterdayned of the Prince, and of his people. But before our departure from thence, we found them to bee a very bad and brutish people, for they ceased not daily to molest vs, either by fighting, stealing, or begging, rayning the price of Horse, and Camels, and Victuals, double that it was wont there to be, and forced vs to buy the water that we drinke: which caused vs to hasten away, and to conclude with them as well for the hire of Camels, as for the price of such as wee bought, with other prouision, according to their owne demand: So that for euery Camels lading, being but foure hundred weight of ours, we agreed to giue three Hides of *Russia*, and foure wooden dishes, and to the Prince or Gouvernour of the said people one ninth, and two seuenths: namely, nine seuerall things, and twice seuen seuerall things: for money they vse none.

And thus being ready, the fourteenth of September we departed from that place, being a Carauan of a thousand Camels. And hauing trauelled five dayes journey, wee came to another Princes Dominion, and vpon the way there came vnto vs certaine *Tartars* on horsebacke, being well armed, and seruants vnto the said Prince called *Timor Sultan*, Gouvernour of the said Countrey of *Manguslaue*, where wee meant to haue arrived and discharged our Barke, if the great storme aforelaid had not disappointed. These aforelaid *Tartars* stayed our Carauan in the name of their Prince, and opened our Wares, and tooke such things as they thought best for their said Prince without money, but for such things as they tooke from mee, which was a ninth (after much dissention) I rode vnto the same Prince, and presented my selfe before him, requesting his

his fauour, and Pasport to trauell thorow his Cpuntrey, and not to be robbed or spoyled of his people: which request he granted me, and entertayned me very gently, commanding me to be well feasted with flesh and Mares milke: for Bread they vse none, nor other drinke except water: but money he had none to giue me for such things as he tooke of me, which might be of value in *Russe* money, fifteene Rubbles; but hee gaue mee his Letter, and a Horse worth seuen Rubbles. And so I departed from him being glad that I was gone: for he was reported to bee a very tyrant, and if I had not gone vnto him, I vnderstood his commandement was, that I should haue beene robbed and destroyed.

Sellizure, or
Shayzure.

Letters of safe
conduct.

Vrgence, in 42.
degr. 18. min.

This *Sultan* liued in the fields without Castle or Towne, and sate, at my being with him, in a little round house made of reeds couered without with Felt, and within with Carpets. There was with him the great Metropolitan of that wilde Countrey, esteemed of the people, as the Bishop of *Rome* is in most parts of *Europe*, with diuers other of his chiefe men. The *Sultan* with this Metropolitan demanded of mee many questions, as well touching our Kingdomes, Lawes, and Religion, as also the cause of my comming into those parts, with my further pretence. To whom I answered concerning all things, as vnto me seemed best, which they tooke in good part. So hauing leaue I departed, and ouertooke our Carauan, and proceeding on our journey, and trauelled twentie dayes in the Wildernesse from the Sea side without seeing Town or habitation, carrying prouision of victuals with vs for the same time, and were driuen by necessitie to eat one of my Camels and a Horse for our part, as other did the like: and during the said twentie dayes we found no water, but such as we drew out of old deepe Wells, being very brackish and salt, and yet somtimes passed two or three dayes without the same. And the fift day of October ensuing, we came vnto a Gulfe of the *Caspian* Sea againe, where we found the water very fresh and sweet: at this Gulfe the Customers of the King of *Turkeman* met vs, who tooke custome of euery five and twentie one, and seuen ninths for the said King and his brethren, which being receiued they departed, and we remayned there a day after to refresh our selues.

Note, that in times past there did fall into this Gulfe the great Riuer *Oxus*, which hath his springs in the Mountaines of *Parapontus* in *India*, and now commeth not so farre, but falleth into another Riuer, called *Ardok*, which runneth toward the North, and consumeth himselfe in the ground, passing vnder the ground aboute five hundred miles, and then issueth out againe and falleth into the Lake of *Kubay*.

We hauing refreshed our selues at the foresaid Gulfe, departed thence the fourth day of October, and the seuenth day arriued at a Castle, called *Sellizure*, where the King, called *Azim Can*, remayned with three other of his brethren, and the ninth day I was commanded to come before his presence, to whom I deliuered the Emperours Letters of *Russia*: and I also gaue him a Present of a ninth, who entertayned me very well, and caused me to eat in his presence as his brethren did, feasting me with flesh of a wilde Horse, and Mares milke without Bread. And the next day he sent for me againe, and asked of me diuers questions, as well touching the affaires of the Emperour of *Russia*, as of our Countrey and Lawes, to which I answered as I thought good: so that at my departure he gaue mee his Letters of safe conduct.

This Castle of *Sellizure* is situated vpon an high Hill, where the King called the *Can* lieth, whose Palace is built of earth very basely, and not strong: the people are but poore, and haue little trade of merchandise among them. The South part of this Castle is low land, but very fruitful, where growe many good fruits, among which there is one called a *Dynie*, of a great bignesse, and full of moisture, which the people doe eat after meate in stead of drinke. Also there growes another fruit, called a *Carbuse*, of the bignesse of a great Cucumber, yellow, and sweet as Sugar: also a certaine Corne, called *Iegur*, whose stalke is much like a Sugar cane, and as high, and the Graine like Rice, which groweth at the top of the cane like a cluster of Grapes; the water that serueth all that Countrey is drawne by ditches out of the Riuer *Oxus*, vnto the great destruction of the said Riuer, for which cause it falleth not into the *Caspian* Sea, as it hath done in times past, and in short time all that Land is like to be destroyed, and to become a Wildernesse for want of water, when the Riuer of *Oxus* shall faile.

The fourteenth day of the moneth wee departed from this Castle of *Sellizure*, and the sixteenth of the same wee arriued at a Citie called *Vrgence*, where we payed Custome as well for our owne heads, as for our Camels and Horses. And hauing there sojourned one moneth, attending the time of our further trauell, the King of that Countrey called *Aly Sultan*, brother to the fore-named *Azym Can*, returned from a Towne called *Corasan*, within the borders of *Persia*, which he lately had conquered from the *Persians*, with whom hee and the rest of the Kings of *Tartaria* haue continuall warres. Before this King also I was commanded to come, to whom I likewise presented the Emperours Letters of *Russia*, and he entertayned me well, and demanded of me diuers questions, and at my departure gaue me his Letters of safe conduct.

This Citie or Towne of *Vrgence* standeth in a plaine ground, with walls of the earth, by estimation foure miles about it. The buildings within it are also of earth, but ruined and out of good order: it hath one long street that is couered aboue, which is the place of their Market. It hath beene wonne and lost foure times within seuen yeeres by ciuill warres, by meanes whereof there are

are but few Merchants in it, and they very poore, and in all that Towne I could not sell aboute foure Kerseys. The chiefeft commodities there sold are such wares as come from *Beghar*, and out of *Persia*, but in most small quantitie not worth the writing. All the Land from the *Caspian* Sea to this Citie of *Vrgence*, is called the Land of *Turkeman*, and is subiect to the said *Azim* King called *Can*, and his brethren which bee five in number, and one of them hath the name of the chiefe King called *Can*, but he is little obeyed sauing in his owne Dominion, and where hee dwelleth: for euery one will be King of his owne portion, and one brother seeketh alwaies to destroy another, hauing no naturall loue among them, by reason that they are begotten of diuers women, and commonly they are the children of slaues, either *Christians* or *Gentiles*, which the father doth keepe as Concubines, and euery *Can* or *Sultan* hath at the least foure or five wiues, besides young maidens and boyes, liuing most viciously: and when there are warres betwixt these brethren, (as they are seldome without) he that is ouercome if hee be not slaine, fleeth to the field with such companie of men as will follow him, and there liueth in the Wildernesse, resorting to watering places, and so robbeth and spoyleth as many Carauans of Merchants and others, as they be able to ouercome, continuing in this sort his wicked life, vntill such time as he may get power and aide to inuade some of his brethren againe. From the *Caspian* Sea vnto the Castle of *Sellizure* aforesaid, and all the Countries about the said Sea, the people liue without Towne or habitation in the wilde fields, remoouing from one place to another in great companies with their Cattell, whereof they haue great store, as Camels, Horses, and Sheepe both tame and wilde. Their sheepe are of great stature with great buttockes, weighing sixtie or eightie pound in weight. There are many wilde Horses which the *Tartars* doe many times kill with their Hawkes, and that in this order.

The Hawkes are lured to seize vpon the beasts neckes or heads, which with chafing of themselves, and sore beating of the Hawkes are tyred: then the Hunter following his game doth lay the Horse with his Arrow or Sword. In all this Land there groweth no grasse, but a certaine brush or heath, whereon the Cattell feeding become very fat.

The *Tartars* neuer ride without their Bowe, Arrowes, and Sword, although it bee on hawking, or at any other pleasure, and they are good Archers both on horse-backe, and on foot also. These people haue not vse of Gold, Silver, or any other coyne, but when they lacke apparell or other necessities, they barter their Cattell for the same. Bread they haue none, for they neither till nor sowe: they be great deuourers of flesh, which they cut in small pieces, and eate it by handfuls most greedily, and especially the Horse flesh. Their chiefeft drinke is Mares milke sowed, as I haue said before of the *Nagayans*, and they will bee drunke with the same. They haue no Riuer nor places of water in this Countrey, vntill you come to the foresaid Gulfe, distant from the place of our landing twentie dayes iourney, except it bee in Wells, the water whereof is saltish, and yet distant the one from the other two dayes iourney and more. They eate their meate vpon the ground, sitting with their legs double vnder them, and so also when they pray. Arte or Science they haue none, but liue most idly, sitting round in great companies in the fields, deuising, and talking most vainely.

They fixe and twentieth day of Nouember, wee departed from the Towne of *Vrgence*, and hauing trauelled by the Riuer *Oxus* one hundred miles, wee passed ouer another great Riuer, called *Ardocke*, where wee payed a certaine petie custome. This Riuer *Ardocke* is great, and very swift, falling out of the foresaid *Oxus*, and passing about one thousand mile to the Northward, it then consumeth it selfe in the ground, and passing vnder the same about five hundred miles, issueth out againe, and falleth into the Lake of *Kitay*, as I haue before declared.

The seuenth of December following, we arriued at a Castle called *Kair*, subiect to a *Sultan* called *Saramet Sultan*, who meant to haue robbed all the *Christians* in the Carauan, had it not beene for feare of his brother the King of *Vrgence*, as we were informed by one of his chiefeft Counsellours, who willed vs to make him a present, which he tooke, and deliuered: besides, wee payed at the said Castle for Custome, of euery Camell one red hide of *Russia*, besides petie gifts to his Officers.

Thus proceeding in our iourney, the tenth day at night being at rest, and our watch set, there came vnto vs foure Horsemen, which we tooke as Spies, from whom we tooke their weapons, and bound them, and hauing well examined them, they confessed that they had seene the tract of many Horsemen, and no footing of Camels, and gaue vs to vnderstand, that there were Roners and theeues abroad: for there trauell few people that are true and peaceable in that Countrey, but in companie of Carauan, where there be many Camels: and Horse-feeding new without Camels were to be doubted. Whereupon we consulted and determined amongst our selues, and sent a Poste to the said *Sultan* of *Kair*, who immediatly came himselfe with three hundred men, and met these foure suspected men which wee sent vnto him, and examined them so straightly, and threatned them in such sort, that they confessed, there was a banished Prince with fortie men three dayes iourney forward, who lay in wait to destroy vs, if hee could, and that they themselves were of his companie.

The *Sultan* therefore vnderstanding, that the Theeues were not many, appointed vs eightie men

men well armed with a Captaine to goe with vs, and conduct vs in our way. And the *Sultan* himfelfe returned backe again, taking the foure theeues with him. These souldiers trauelled with vs two dayes, consuming much of our victuals. And the third day in the morning very early they set out before our Carauan, and hauing ranged the wilderness for the space of foure houres, they met vs, comming towards vs as fast as their horse could runne, and declared that they had found the tract of horses not farre from vs, perceiuing well that wee should meete with enemies, and therefore willed vs to appoint our selues for them, and asked vs what wee would giue them to conduct vs further, or else they would returne. To whom wee offered as we thought good, but they refused our offer, and would haue more, and so wee not agreeing they departed from vs, and went backe to their *Sultan*, who (as wee coniectured) was priuie to the conspiracie. But they being gone, certaine *Tartars* of our companie called holy men, (because they had beene at *Mecca*) caused the whole Carauan to stay, and would make their prayers, and diuine how we should prosper in our iourney, and whether wee should meet with any ill companie or no: To which, our whole Carauan did agree. And they tooke certaine sheepe and killed them, and tooke the blade bones of the same, and first sod them, and then burnt them, and tooke of the blood of the said sheepe, and mingled it with the powder of the said bones, and wrote certaine Characters with the said blood, vsing many other ceremonies and words, and by the same diuined and found, that wee should meete with enemies and theeues (to our great trouble) but should overcome them, to which sorcerie, I and my companie gaue no credit, but wee found it true: for within three houres after that the souldiers departed from vs, which was the fifteenth day of December, in the morning, wee escryed farre off diuers horsemen which made towards vs, and we (perceiuing them to bee rousers) gathered our selues together, being fortie of vs well appointed, and able to fight, and wee made our prayers together every one after his Law, professing to liue and dye one with another, and so prepared our selues. When the theeues were nigh vnto vs, wee perceiued them to be in number thirtie seuen men well armed, and appointed with bowes, arrowes, and swords, and the Captaine a Prince banished from his Countrey. They willed vs to yeeld our selues, or else to bee slaine, but wee defied them, wherewith they shot at vs all at once, and we at them very hotly, and so continued our fight from morning vntill two houres within night, diuers men, horses and camels being wounded and slaine on both parts: and had it not beene for foure hand-guns, which I and my companie had and vsed, wee had beene overcome and destroyed: for the theeues were better armed, and were also better Archers then wee. But after we had slaine diuers of their men and horses with our Guns, they durst not approach so nigh, which caused them to come to a truce with vs vntill the next morning, which wee accepted, and encamped our selues vpon a hill, and made the fashion of a Castle, walling it about with packes of wares, and layd our Horses and Camels within the same, to saue them from the shot of arrowes: and the theeues also incamped within an arrow shot of vs, but they were betwixt vs and the water, which was to our great discomfort, because neither wee nor our Camels had drunke in two dayes before.

Thus keeping good watch, when halfe the night was spent, the Prince of the Theeues sent a messenger halfe way vnto vs, requiring to talke with our Captaine, in their tongue, the Carauan *Basha*, who answered the messenger, I will not depart from my companie to goe into the halfe way to talke with thee: but if that thy Prince with all his companie will sweare by our Law to keepe the truce, then will I send a man to talke with thee, or else not. Which the Prince vnderstanding as well himfelfe as his company, swore so loude that wee might all heare. And then we sent one of our companie (reputed a holy man) to talke with the same messenger. The message was pronounced aloud in this order. Our Prince demandeth of the Carauan *Basha*, and of all you that bee Buffarmans, (that is to say, Circumcised) not desiring your blouds, that you deliuer into his hands as many Caphars, that is, vnbelleeuers (meaning vs the Christians) as are among you with their goods, and in so doing, hee will suffer you to depart with your goods in quietnesse, and on the contrary, you shall bee handled with no lesse cruelty then the Caphars, if hee overcome you, as hee doubteth not. To the which our Carauan *Basha* answered, that hee had no Christians in his companie, nor other strangers, but two *Turkes* which were of their Law; and although hee had, hee would rather dye then deliuer them, and that wee were not afraid of his threatnings, and that should hee know when day appeared. And so passing in talke, the Theeues (contrary to their oath) carried our holy man away to their Prince, crying with a loude voyce in token of victorie, *Olo, olo*. Wherewith wee were much discomforted, fearing that that holy man would betray vs: but he being cruelly handled and much examined, would not to death confesse any thing which was to vs preiudiciall, neither touching vs, nor yet what men they had slaine and wounded of ours the day before. When the night was spent, in the morning wee prepared our selues to battell againe: which the theeues perceiuing, required to fall to agreement, and asked much of vs: And to bee brieue, the most part of our companie being loath to goe to battell againe, and hauing little to lose, and safe conduct to passe, wee were compelled to agree, and to giue the theeues twentie ninths (that is to say) twentie times nine seuerall things, and a Camell to carrie away the same, which being receiued, the theeues departed into the Wilderness to their olde habitation,

habitation, and wee went on our way forward. And that night came to the Riuer *Oxus*, where wee refreshed our selues, hauing beene three dayes without water and drinke, and tarried there all the next day, making merrie with our slaine Horses and Camels, and then departed from that place, and for feare of meeting with the said theeuers againe, or such like, wee left the high way which went along the said Riuer, and passed through a wildernesse of sand, and travelled foure dayes in the same before wee came to water: and then came to a Well, the water being very brackish, and we then as before were in need of water, and of other victuals, being forced to kill our Horses and Camels to eate.

The riuer of *Oxus*.

A wildernesse of sand.

In this wildernesse also, wee had almost fallen into the hands of Theeuers: for one night being at rest, there came certaine scouts, and carried away certaine of our men which lay a little separated from the Carauan where with there was a great shout and crie, and we immediatly laded our Camels, and departed being about midnight, and very darke, and droue fore till we came to the riuer *Oxus* againe, and then wee feared nothing being walled with the said riuer: and whether it was for that wee had gotten the water, or for that the same theeuers were farre from vs when the scouts discovered vs, we know not, but we escaped that danger.

So ypon the three & twentieth day of December, we arrived at the Citie of *Boghar* in the land of *Bactria*. This *Boghar* is situated in the lowest part of all the Land, walled about with a high wall of earth, with diuers Gates into the same: it is diuided into three partitions, whereof two parts are the Kings, and the third part is for Merchants & Markets, and euery Science hath their dwelling and market by themselves. The Citie is very great, and the houses for the most part of Earth, but there are also many Houses, Temples, and Monuments of stone sumptuously builded, and gilt, and specially Bath-stoues so artificially built, that the like thereof is not in the world: the manner whereof is too long to rehearse. There is a little riuer running through the midst of the said Citie, but the water thereof is most vnwholesome, for it breedeth sometimes in men that drinke thereof, and especially in them that bee not there borne, a Worme of an ell long, which lyeth commonly in the leg, betwixt the flesh and the skin, and is pluckt out about the Ankle with great art and cunning, the Surgeons being much practised therein, and if shee breake in plucking out, the partie dyeth, and euery day she commeth out about an inch, which is rolled vp, and so workerh till she bee all out. And yet it is there forbidden to drinke any other thing then water, and Mares milke, and whosoever is found to breake that Law, is whipped and beaten most cruelly through the open markets, and there are Officers appointed for the same, who haue authoritie to goe into any mans house, to search if hee haue either *Aquanita*, Wine, or Brag, and finding the same, doe breake the vessels, spoyle the drinke, and punish the masters of the house most cruelly; yea, and many times if they perceiue but by the breath of a man that hee hath drunke, without further examination he shall not escape their hands.

Boghar a Citie of *Bactria*, in 39. degrees, 10. minutes.

A strange Worme in mens legs.

There is a Metropolitane in this *Boghar*, who causeth this law to be so straightly kept: and he is more obeyed then the King, and will depose the King, and place another at his will and pleasure, as hee did by this King that reigned at our being there, and his predeceffour, by the meanes of the said Metropolitane: for hee betrayed him, and in the night slew him in his chamber, who was a Prince that loved all Christians well.

This Countrey of *Boghar* was sometime subiect to the *Persians*, and doe now speake the *Persian* tongue, but yet now it is a Kingdome of it selfe, and hath most cruell warres continually with the said *Persians* about their Religion, although they bee all *Mahometists*. One occasion of their warres is, for that the *Persians* will not cut the hayre of their vpper lips, as the *Bogharians* and all other *Tartars* doe, which they account great sinne, and call them *Caphars*, that is, ynbelieuers, as they doe the Christians.

These are of the *Ieslbas Tartars*.

The King of *Boghar* hath no great power or riches, his reuenues are but small, and hee is most maintained by the Citie: for he taketh the tenth penie of all things that are there sold, as well by the Craftsmen as by the Merchants, to the great impouerishment of the people, whom hee keepeth in great subiection, and when hee lacketh money, he sendeth his officers to the Shops of the said Merchants, to take their wares to pay his debts, and will haue credit of force, as the like hee did to pay me certaine money that he owed me for nineteene pieces of Kersey. Their money is siluer and copper, for gold their is none currant: they haue but one piece of siluer, and that is worth twelue-pence *English*, and the copper money are called *Pooles*, and one hundred and twentie of them goeth to the value of the said twelue-pence, and is more common payment then the siluer, which the King causeth to rise and fall to his most aduantage euery other moneth, and sometimes twise a moneth, not caring to oppresse his people, for that he looketh not to raigne aboue two or three yeeres, before he bee either slaine or driuen away, to the great destruction of the Countrey and Merchants.

The Coyne of *Boghar*.

The twentie sixth day of the moneth, I was commanded to goe before the said King, to whom I presented the Emperour of *Russia* his letters, who entertained vs most gently, and caused vs to eate in his presence, and diuers times hee sent for me, and deuised with me familiarly in his secret chamber, as well of the power of the Emperour, and the great *Turke*, as also of our Countreies, Lawes, and Religion, and caused vs to shoote in hand-guns before him, and did himselfe practise

A very Tartar.

practise the vse thereof. But after all this great entertainment, before my departure hee shewed himselfe a very *Tartar*: for he went to the warres owing me money, and saw me not payed before his departure. And although indeed hee gaue order for the same, yet was I very ill satisfied, and forced to rebate part, and to take wares as payment for the rest contrary to my expectation: but of a begger better payment I could not haue, & glad I was so to be payd and dispatched.

The Kings iustice.

But yet I must needs praise and commend this barbarous King, who immediately after my arriuell at *Boghar*, hauing vnderstood our trouble with the *Theeues*, sent one hundred men well armed, and gaue them great charge not to returne before they had either slaine or taken the sayd *theeues*. Who according to their commission ranged the wilderness in such sort, that they met with the said companie of *Theeues*, and slew part, and part fled, and foure they tooke and brought vnto the King, and two of them were fore wounded in our skirmish with our Guns: And after the King had sent for me to come to see them, hee caused them all foure to bee hanged at his Palace gate, because they were Gentlemen, to the example of others. And of such goods as were gotten againe, I had part restored me; and this good Iustice I found at his hands.

There is yeerely great resort of Merchants to this Citie of *Boghar*, which trauell in great Carauans from the Countries thereabout adioyning, as *India*, *Persia*, *Balgh*, *Russia*, with diuers others, and in times past from *Cathay*, when there was passage: but these Merchants are so beggerly and poore, and bring so little quantitie of wares, lying two or three yeeres to sell the same, that there is no hope of any good trade there to be had worthy the following. The chiefe commodities that are brought thither out of these foresaid Countries, are these following.

Merchandise of India.

The *Indians* doe bring fine Whites, which the *Tartars* doe all roll about their heads, and all other kindes of Whites, which serue for apparell made of Cotton-wooll and *Crasca*, but Gold, Siluer, precious Stones, and Spices they bring none. I enquired and perceiued that all such trade passeth to the Ocean sea, and the veynes where all such things are gotten are in the subiection of the *Portugals*. The *Indians* carrie from *Boghar* againe wrought Silkes, red Hides, Slaues, and Horses, with such like, but of Kerseis and other cloath, they make little account. I offered to bartar with Merchants of those Countries, which came from the furthest parts of *India*, euen from the Countrey of *Bengala*, and the riuer *Ganges*, to giue them Kerseis for their commodities, but they would not barter for such commoditie as Cloath.

Merchandise of Persia.

The *Persians* doe bring thither *Craska*, Woollen-cloath, Linnen-cloath, diuers kindes of wrought pide Silkes, Argomacks, with such like, and doe carrie from thence red hydes with other *Russe* wares, and Slaues, which are of diuers Countries, but cloath they will buy none, for that they bring thither themselues, and is brought vnto them as I haue inquired from *Aleppo* in *Syria*, and the parts of *Turkie*. The *Russes* doe carrie vnto *Boghar*, red hydes, sheepe skinnies, woollen cloath of diuers sorts, woollen vessels, brydles, saddles, with such like, and doe carrie away from thence diuers kindes of wares made of cotten-wooll, diuers kindes of silkes, *Crasca*, with other things, but there is but small vtterance. From the Countries of *Cathay* are brought

Merchandise of Russia.

thither in time of peace, and when the way is open, Muske, Rubarbe, Satten, Damaske, with diuers others things. At my being at *Boghar*, there came Carauans out of all these foresaid Countries, except from *Cathay*: and the cause why there came none from thence, was the great warres that had dured three yeeres before my comming thither, and yet dured betwixt two great Countries and Cities of *Tartars*, that are directly in the way betwixt the said *Boghar* and the said *Cathay*, and certaine barbarous field people, as well *Gentiles* as *Mahometists* bordering to the said Cities. The Cities are called *Taskent* and *Caskar*, and the people that warre against *Taskent* are called *Cossacks* of the law of *Mahomet*: and they which warre with the said Countrey of *Caskar* are called *Kings*, *Gentiles* and *Idolaters*. These two barbarous Nations are of great force, liuing in the fields without House or Towne, and haue almost subdued the foresaid Cities, and so stopped vp the way, that it is impossible for any Carauan to passe vnspoyled: so that three yeeres before our being there, no Carauan had gone, or vsed trade betwixt the Countries of *Cathay* and *Boghar*, and when the way is cleare, it is nine moneths iourney.

Merchandise of Cathay.

Warres.

Taskent and Caskar.

To speake of the said Countrey of *Cathay*, and of such newes as I haue heard thereof, I haue thought it best to reserue it to our meeting. I hauing made my solace at *Boghar*, in the winter time, and hauing learned by much inquisition, the trade thereof, as also of all the other Countries thereto adioyning, and the time of the yeere being come, for all Carauans to depart, and also the King being gone to the warres, and newes come that hee was fled, and I aduertised by the Metropolitan himselfe, that I should depart, because the Towne was like to bee besieged: I thought it good and meete, to take my iourney some way, and determined to haue gone from thence into *Persia*, and to haue scene the trade of that Countrey, although I had informed my selfe sufficiently therof, as well at *Astracan*, as at *Boghar*: and perceiued well the trades not to be much vnlike the trades of *Tartaria*: but when I should haue taken my iourney that way, it was let by diuers occasions: the one was, the great warres that did newly begin betwixt the *Sophie*, and the Kings of *Tartaria*, whereby the wayes were destroyed: and there was a Carauan destroyed with rousers and *theeues*, which came out of *India* and *Persia*, by safe conduct: and about ten dayes iourney from *Boghar*, they were robbed, and a great part slaine. Also the Metropolitan

Carauan destroyed.

tan of *Boghar*, who is greater then the King, tooke the Emperours letters of *Russia* from me, without which I should haue bene taken Slaue in euery place: also all such wares as I had receiued in barter for Cloath, and as I tooke perforce of the King, and other his Nobles, in payment of money due vnto me, were not vendible in *Persia*: for which causes, and diuers others, I was constrained to come backe againe to *Mare Caspium*, the same way I went: so that the eight of March, 1559. wee departed out of the said Citie of *Boghar*, being a Carauan of fixe hundred Camels: and if wee had not departed when we did, I and my companie had bene in danger to haue lost life and goods. For ten dayes after our departure, the King of *Samarcand* came with an armie, and besieged the said Citie of *Boghar*, the King being absent, and gone to the warres against another Prince his kinsman, as the like chanceth in those Countreies once in two or three yeeres. For it is maruell, if a King raigne there about three or foure yeeres, to the great destruction of the Countrey, and Merchants.

He returneth
the eight of
March, 1559.

Samarcand.

The five and twentieth of March, we came to the foresaid Towne of *Vrgence*, and escaped the danger of foure hundred rousers, which lay in wayte for vs backe againe, being the most of them of kindred to that companie of theues, which wee met with going forth, as we perceiued by foure spies, which were taken. There were in my companie, and committed to my charge, two Ambassadors, the one from the King of *Boghar*, the other from the King of *Balke*, and were sent vnto the Emperour of *Russia*. And after hauing tarried at *Vrgence*, and the Castle of *Sellysare*, eight dayes for the assembling, and making ready our Carauan, the second of Aprill wee departed from thence, hauing foure moe Ambassadors in our companie, sent from the King of *Vrgence*, and other *Sultans*, his brethren, vnto the Emperour of *Russia*, with answer of such Letters as I brought them: and the same Ambassadors were also committed vnto my charge by the said Kings and Princes: to whom I promised most faithfully, and swore by our Law, that they should bee well vsed in *Rusland*, and suffered to depart from thence againe in safetie, according as the Emperour had written also in his letters: for they somewhat doubted, because there had none gone out of *Tartaria* into *Russia*, of long time before.

Vrgence.

The King of
Balke, or *Balg.*

The three and twentieth of Aprill, wee arriued at the *Mare Caspium* againe, where we found our Barke which wee came in, but neither Anchor, Cable, Cocke, nor Sayle: neuertheless we brought Hempe with vs, and spun a Cable our selues, with the rest of our tackling, and made vs a sayle of cloath of Cotton-wooll, and rigged our Barke as well as wee could, but boate or anchor we had none. In the meane time being deuising to make an anchor of wood of a Cart-wheele, there arriued a Barke, which came from *Astracan*, with *Tartars* and *Russes*, which had two Anchors, with whom I agreed for the one: and thus being in a readinesse, wee set sayle and departed, I, and the two *Johnsons*, being Master and Mariners our selues, hauing in our Barke the said fixe Ambassadors, and twentie five *Russes*, which had bene Slaues a long time in *Tartaria*, nor euer had before my comming, libertie, or meanes to get home, and these Slaues serued to row when need was. Thus sayling sometimes along the coast, and sometimes out of sight of land. The thirteenth day of May, hauing a contrary winde, we came to an anchor, being three leagues from the shoare, and there arose a sore storme, which continued fortie foure houres, and our cable being of our owne spinning, brake, and lost our anchor, and being off a lee shoare, and hauing no boate to helpe vs, wee hoyed our sayle, and bare roomer with the said shoare, looking for present death: but as God prouided for vs, we ranne into a creeke full of Oze, and so saued our selues with our Barke, and liued in great discomfort for a time. For although wee should haue escaped with our liues the danger of the sea, yet if our barke had perished, we knew we should haue been either destroyed, or taken slaues by the people of that Countrey, who liue wildly in the field, like beasts, without house or habitation. Thus when the storme was ceased, wee went out of the creeke againe: and hauing set the land with our Compasse, and taken certayn markes of the same, during the time of the tempest, whilst we rid at our anchor, wee went directly to the place where we rid, with our Barke againe, and found our anchor which we lost: whereat the *Tartars* much maruelled, how we did it. While wee were in the creeke, we made an anchor of wood of Cart wheelles, which we had in our Barke, which we threw away, when we had found our Iron anchor againe. Within two dayes after, there arose another great storme, at the North-east, and we lay a trie, being driuen farre into the sea, and had much adoe to keepe our Barke from sinking, the billow was so great: but at the last, hauing faire weather, wee tooke the Sunne, and knowing how the Land lay from vs, we fell with the Riuer *Taik*, according to our desire, whereof the *Tartars* were very glad, fearing that wee should haue bene driuen to the coast of *Persia*, whose people were vnto them great enemies.

Taik.

Note, that during the time of our Nauigation, we set vp the red Crosse of Saint *George* in our flagges, for honour of the *Christians*, which I supposed was neuer seene in the *Caspian* sea before. Wee passed in this voyage diuers fortunes: notwithstanding, the eight and twentieth of May we arriued in safetie at *Astracan*, and there remayned till the tenth of Iune following, as well to prepare vs small Boates, to goe vp against the streame of *Volga*, with our goods, as also for the companie of the Ambassadors of *Tartarie*, committed vnto me, to be brought to the presence of the Emperour of *Russia*.

The English
flag in the Cas-
pian sea, the
Country ther-
of is in 46. deg.

A notable description of the Caspian Sea.

This *Caspian* sea (to say something of it) is in length about two hundred leagues, and in breadth one hundred and fittie, without any issue to other Seas: to the East part wherof, ioyneth the great desert Countrey of the *Tartars*, called *Turkemen*: to the West, the Countreies of the *Chyrasses*, the Mountaines of *Caucasus*, and the *Mare Euxinum*, which is from the said *Caspian* Sea, a hundred leagues. To the North is the river *Volga*, and the land of *Nagay*, and to the South part ioyneth the Countreies of *Media* and *Persia*. This Sea is fresh water in many places, and in other places as salt as our great Ocean: It hath many goodly Rivers falling into it, and it annoyeth not it selfe except it bee vnder ground. The notable Rivers that fall into it, are first the great River of *Volga*, called in the *Tartar* tongue *Edell*, which springeth out of a lake in a marish or plaine ground, not farre from the Citie of *Novogrode* in *Russia*, and it is from the spring to the Sea, about two thousand English miles. It hath diuers other goodly Rivers falling into it, as out of *Siberia*, *Taic*, and *Yem*: Also out of the mountaines of *Caucasus*, the Rivers of *Cyrus* and *Arash*, and diuers others.

Astracan in 47. deg. 9. minutes.

As touching the trade of *Shamakie* in *Media* and *Tebis*, with other Townes in *Persia*, I haue enquired, and doe well vnderstand, that it is euen like to the trades of *Tartaria*, that is little vnterance, and small profite: and I haue bene aduertised that the chiefe trade of *Persia* is into *Syria*, and so transported into the *Leuant* sea. The few ships vpon the *Caspian* Seas, the want of Mart and port Townes, the pouertie of the people, and the Ice, maketh that trade naught.

Cazan is in 55. deg. 33. min. His arriuall at Mosco the second of September.

At *Astracan* there were Merchants of *Shamakie*, with whom I offered to barter, and to giue them *Kerries* for their wares, but they would not, saying, they had them as good cheape in their Countrey, as I offered them, which was fixe rubbles for a *Kerrie*, that I asked: and while I was at *Boghar*, there were brought thither out of *Persia*, Cloath, and diuers commodities of our Countreies, which was sold as good cheape, as I might sell ours.

The tenth day of Iune, wee departed from *Astracan* towards the *Mosco*, hauing an hundred gunners in our companie at the Emperours charges, for the safe conduct of the *Tartar* Ambassadors and me. And the eight and twentieth day of Iuly following, we arriued at the Citie of *Cazan*, hauing been vpon the way from *Astracan* thither, fixe weekes and more, without any refreshing of victuals: for in all that way there is no habitation.

See more certaintie in Goes.

The seventh of August following, wee departed from *Cazan*, and transported our goods by water, as farre as the Citie of *Morum*, and then by land: so that the second of September, wee arriued at the Citie of the *Mosco*, and the fourth day I came before the Emperours Maiestie, kissed his hand, and presented him a white Cowes tayle of *Cathay*, and a Drum of *Tartaria*, which hee well accepted. Also I brought before him all the Ambassadors that were committed to my charge, with all the *Russe* slaues: and that day I dined in his Maiesties presence, and at dinner, his Grace sent me meate by a Duke, and asked me diuers questions touching the Lands and Countreies where I had bene. And thus I remayned at the *Mosco* about your affaires, vntill the seuenteenth day of Februarie that your wares were sent downe: and then hauing licence of the Emperours Maiestie to depart, the one and twentieth day I came to your house to *Vologhda*, and there remayned vntill the breaking vp of the yeere: and then hauing seene all your goods laden into your Boates, I departed with the same, and arriued withall in safetie at *Colmogro*, the ninth of May 1560. And heere I cease for this time, intreating you to beare with this my large discourse, which by reason of the varietie of matter, I could make no shorter, and I beseech God to prosper all your attempts.

Memoriall of Sir H. Willoughbie.

I haue certaine notes which seeme to haue bene written at *Boghar* by some of Master Iepkinsons companie: which containe intelligences there receiued touching *Cathay* and the wayes thither. But I hope thereof in that which followes to giue better intelligence. It is there said that the people of *Comoron* are very beautifull, and that they use *Knives* and *Forkes* of gold and silver to eat their meate, not touching it with their hands: that the *Musk-beast* is as big as a *Hound*. In *Teray* they worship the *Fire*, which is thirtie foure dayes iourney from *Cathay*. At *Cascar* is resident the *Can*. From *Cascar* to *Cocheke* is foure weekes: it is the first Land of the Emperour of *Cathay*: and then to *Camche* five dayes by land, and to *Cataio* eight weekes. In this last iourney is plentie of all things: both Horse to bee had, and Women at too easie rate, &c. which as newes to them I haue heere touched, rather then related.

I haue also by me, the last Will of *Gabriel Willoughbie*, kinsman to that honourable Martyr of English Northerne Discoveries *Sir Hugh Willoughbie*, mentioned in the beginning of this Chapter, and subscribed with his Name, the worth wherof hath caused heere also this subscription. It was found in the Ship where they were frozen.

Q. V.

*Advertisements and reports of the sixth * Voyage into the parts of Persia and Media, gathered out of sundry Letters written by CHRISTOPHER BROUGH; and more especially a voyage over the Caspian Sea, and their shipwracke and miseries there endured by the Ice.*

* The other voyages are in Master Hakluyt; this I have for Tartaria and the Caspian sea brought hither.

Colmogro.

Vshyong.

Teraflane.

Niznouogrod.

Cazan.

Great store of Liquoris.

Sodom.
Strange iudgement.

Peranolok.

Tsaritsna.

I If it is to bee vnderstood, that the ships for the voyage to Saint Nicholas in Russia, in which the Factors and merchandise for the Persian voyage were transported, departed from Grauesend the nineteenth of Iune, 1579. which arrived at Saint Nicholas in Russia the two and twentieth of Iuly, where the Factors and Merchants landed, and the merchandise discharged and laden into Dozhnikes, that is, barks of the Countrey, to be carried from thence vp by Riuer vnto Vologda. And the nine and twentieth day of the said Iuly, the Dozhnikes departed from Rose Iland by Saint Nicholas vp the riuer Dwina Peremene, that is to say in poste, by continuall sayling, rowing, setting with poles, or drawing of men, which came to Colmogro the seuen and twentieth day, and departed thence the nine and twentieth of Iuly vp the said riuer Dwina, and came to Vshyong (which is at the head of the riuer Dwina, and mouth of Sugbano) the ninth of August, where they stayed but a small time, providing some victuals, and shifting certaine of their Cossacks or Barkmen, and so departed thence the same day vp the Sugbano, and came to Totma (which is counted somewhat more then halfe the way from Vshyong) the fifteenth day, where they shifted some of their Cossacks, and departed thence the same day, and came to the Citie Vologda the nineteenth of August, where they landed their goods, and stayed at that place till the thirtieth of the same. Having provided at Vologda, Telegas or Waggones, whereupon they laded their goods, they departed thence with the same by land towards Teraflane, the said thirtieth of August at eight of the clocke in the morning, and came to the East side of the riuer Volga, over against Teraflane, with five and twentie Telegas laden with the said goods, the seuenth of September at five of the clocke afternoone. Then the three stroogs or barks, provided to transport the said goods to Astracan, (where they should meete the ship that should carrie the same from thence into Persia) came ouer from Teraflane vnto the same side of the riuer Volga, & there tooke in the said goods. And hauing prepared the said Barks ready with all necessarie furniture, they departed with them from Teraflane down the riuer of Volga, on the fourteenth day of September at nine of the clocke in the morning, and they arrived at Niznouogrod the seuenteenth day at three of the clocke afternoone, where they shewed the Emperours letters to passe free without paying any custome, and tarried there about three houres to provide necessaries, and then departing, arrived at Cazan (or neere the same Towne) on the two and twentieth of September at five of the clocke afternoone, where (through contrary windes, and for providing new Cossacks in the places of some that there went from them) they remained till the fixe and twentieth day, at what time they departed thence about two of the clocke after noone, and arrived at Teraflagorod, which is on the Crim side of Volga, and in latitude 55. degrees 22. minutes, the eight and twentieth day at ten in the forenoone, where they anchored, and remained about three houres, and departing thence came to Oueak, which is on the Crims side (on the Westerne side of Volga) the fift of October about five of the clocke in the morning. This place is accounted halfe the way betweene Cazan and Astracan: and heere there groweth great store of Liquoris: the soyle is very fruitfull: they found there Apple-trees, and Cherrie-trees. The latitude of Oueak is 51. degrees 30. minuts. At this place had beene a very faire stone Castle called by the name Oueak, and adioyning to the same was a Towne called by the Russes, Sodom: this Towne and part of the Castle (by report of the Russes) was swallowed into the earth by the iustice of God, for the wickednesse of the people that inhabited the same. There remaineth at this day to be seene a part of the ruines of the Castle, and certaine Tombes, wherein as it seemeth haue beene layd noble personages: for vpon a tombe stone might be perceiued the forme of a Horse and a man sitting on it with a Bow in his hand, and Arrowes girt to his side: there was a piece of a Scutchion also vpon one of the stones, which had characters grauen on it, whereof some part had been consumed with the weather, and the rest left vnperfect: but by the forme of them that remained, we iudged them to be characters of Armenia: and other characters were grauen also vpon another tombe stone. Now they departed from Oueak the said fift of October at five of the clocke after noone, and came to Peranolok the tenth day about eleuen or twelue of the clocke that night, making no abode at that place, but passed alongst by it. This word Peranolok in the Russe tongue doth signifie a narrow straight or necke of land between two waters, and it is so called by them, because from the riuer Volga, at that place, to the riuer Don or Tanais, is counted thirtie versts, or as much as a man may well trauell on foot in one day. And seuen versts beneath, vpon an Iland called Tsaritsna, the Emperour of Russia hath fiftie Gunners all Summer time to keepe watch, called by the Tartar name Carawool. Betweene this place and Astracan are five other Carawools or watches.

The First is named *Kameni Carawool*, and is distant from *Pcranolok* one hundred and twentie verstes. The second named *Stupino Carawool*, distant from the first fiftie verstes. The third called *Poleoy Carawool*, is one hundred and twentie verstes distant from the second. The fourth named *Keezeyur Carawool*, is fiftie verstes distant from the third. The fift named *Ichkebre*, is thirtie verstes distant from the fourth, and from *Ichkebre* to *Astracan* is thirtie verstes.

Ice at *Astracan*
for foure moneths.

The sixteenth of October they arrived at *Astracan*. The nineteenth of Nouember the winde being northerly, there was a great frost, and much Ice in the Riuer: the next day being the twentieth of Nouember, the Ice stood in the Riuer, and so continued vntill Easter day.

The sixth of Ianuarie being Twelwe day (which they call *Chreshenia*) the *Russes* of *Astracan* brake a hole in the Ice vpon the Riuer *Volga*, and hallowed the water with great solemnitie according to the manner of their Countrey, at which time all the Souldiers of the Towne shot off their small Peeces vpon the Ice, and likewise to gratifie the Captaine of the Castle, being a Duke, whose name is *Pheodor Michalonich Troicouria*, who stood hard by the ship, beholding them as they were on the Riuer, was shot off all the Ordnance of our ship being fiftene Peeces, viz. two Faulcons, two Faulconets, foure Fowlers, foure Fowlers Chambers, and three other small Peeces made for the Stroogs to shoot Haile-stones, and afterwards the great Ordnance of the Castle was shot off.

An Eclipse.

On the one and thirtieth of Ianuarie there happened a great Eclipse of the Moone, which began about twelue of the clocke at night, and continued before shee was cleere an houre and an halfe by estimation, which ended the first of Februarie about halfe an houre past one in the morning: shee was wholly darkned by the space of halfe an houre.

The variation
of the Com-
passe in *Astra-
can*, was 13. de-
grees 40. min.

The seuenteenth of Aprill, the variation of the Compasse obserued in *Astracan* was 13. degrees 40. minutes from North to West. This Spring there came newes to *Astracan*, that the Queene of *Persia* (the King being blind) had beene with a great Armie against the *Turkes* that were left to possesse *Media*, and had giuen them a great ouerthrow: yet notwithstanding *Derbent*, and the greatest part of *Media* were still possessed and kept by the *Turkes*. The Factors of the Companie consulting vpon their affaires, determined to leaue at *Astracan* the one halfe of their goods with *Arthur Edwards*, and with the other halfe the other three Factors would proceed in the ship on their purposed Voyage to the coast of *Media*, to see what might bee done there: where, if they could not finde safe trafficke, they determined to proceed to the coast of *Gilan*, which is a Prouince neere the *Caspian* Sea bordering vpon *Persia*: and thereupon appointed the said goods to be laden aboard the ship, and tooke into her also some merchandise of *Tifis* or *Persian* Merchants.

Gilan.

The second of May they weighed, and plyed downe the Riuer *Volga*, toward the *Caspian* Sea. The seuenth of May in the morning, they passed by a Tree that standeth on the left hand of the Riuer as they went downe, which is called *Mahomet Agatch*, or *Mahomet's Tree*, and about three verstes further, that is to say, to the Southwards of the said Tree is a place called *Vchoog*, that is to say, The *Russe* Weare: (but *Ochoog* is the name of a Weare in the *Tartar* tongue) where are certaine Corages, and the Emperour hath lying at that place certaine Gun-ners to guard his Fisher-men that keepe the Weare. This *Vchoog* is counted from *Astracan* sixty verstes: they proceeded downe the said Riuer without staying at the *Vchoog*. The ninth and

Vchoog.

Shallow water.

tenth dayes they met with shallow water, and were forced to lighten their ship by the *Panos*: The eleuenth day they sent backe to the *Vchoog* for another *Panos*: This day by mischance the ship was bilged on the grapnell of the *Panos*, whereby the companie had sustayned great losses, if the chiefest part of their goods had not beene layd into the *Panos*: for notwithstanding their pumping with three Pumps, heauing out water with Buckets, and all the best shifts they could make, the ship was halfe full of water ere the leake could be found and stopt. The twelfth day the *Panos* came to them from the *Vchoog*, whereby they lighted the ship of all the goods. The thirteenth day in the morning there came to them a small Boat, sent by the Captaine of *Astracan*, to learne whether the ship were at Sea cleare off the flats. The fifteenth day by great industrie and trauell they got their ship cleare off the shoales and flats, wherewith they had beene troubled from the ninth day vntill then: they were forced to passe their ship in three foot water or lesse. The sixteenth day they came to the *Chetera Bougori*, or Iland of foure Hillockes, which are counted fortie verstes from *Vchoog*, and are the furthest Land towards the Sea. The seuenteenth day they bare off into the Sea, and being about twelue verstes from the Foure hillockes, riding in fise foot and a halfe water about eleuen of the clocke in the fore-noone, they tooke their goods out of the *Panoses* into the ship, and filled their ship with all things necessarie. The eighteenth day in the morning about seuen of the clocke, the *Panoses* being discharged departed away towards *Astracan*, the winde then at South-east, they rode still with the ship, and obseruing the eleuation of the Pole at that place, found it to be 45. degrees 20. minutes. The nineteenth day, the winde South-east, they rode still. The twentieth day, the winde at North-west, they set sayle about one of the clocke in the morning, and steered thence South by West, and South South-west, about three leagues, and then anchored in fixe foot and a halfe water, about

bout nine of the clocke before noone, at which time it fell calme: the eleuation of the Pole at that place 45. degrees 13. minutes. The one and twentieth, hauing the winde at North-west, they set sayle, and steered thence South by West, and South vntill eleuen of the clocke, and had then nine foote water: and at noone they obserued the latitude, and found it to bee 44. degrees 47. minutes: then had they three fathoms and a halfe water, being cleare off the flats. It is counted from the Foure hillockes to the Sea about fiftie verstes. From the said noone-tide vntill foure of the clocke, they sayled South by East five leagues and a halfe: then had they five fathoms and a halfe, and brackish water: from that till twelue at night they sayled South by East halfe a league, East ten leagues: then had they eleuen fathoms, and the water salter. From that till the two and twentieth day three of the clocke in the morning, they sayled three and fiftie leagues, then had they sixteene fathoms water: from thence they sayled vntill noone South and by West seuen leagues and a halfe, the latitude then obserued 43. degrees 15. minutes, the depth then eight and twentie fathoms, and shallow ground: from that vntill eight of the clocke at night, they sayled South by East five leagues and a halfe, then had they three and fortie fathoms shallow ground. From thence till the three and twentieth at foure of the clocke in the morning, they sayled South South-west three leagues and a halfe: then could they get no ground in two and fiftie fathoms deepe. From thence vntill noone they sayled South nine leagues, then the latitude obserued, was 42. degrees 20. minutes. From that till the foure and twentieth day at noone, they sayled South by West seuentene leagues and a halfe, then the latitude obserued, was one and fortie degrees two and thirtie minutes. From noone till seuen of the clocke at night, they sayled South South-west foure leagues, then had they perfect sight of high Land or Hills, which were almost couered with Snow, and the midst of them were West from the ship, being then about twelue leagues from the neereft Land: they sounded but could finde no ground in two hundred fathoms. From thence they sayled South-west vntill mid-night: about three leagues from thence till the five and twentieth day, foure of the clocke in the morning, they sayled West three leagues, being then little winde, and neere the Land, they tooke in their sayles, and lay hulling: at noone the latitude obserued, was 40. degrees 54. minutes: they sounded but could get no ground in two hundred fathoms. At foure of the clocke in the after-noon, the winde North-west, they set their sayles: and from thence till the sixe and twentieth day at noone, they sayled East South-east foure leagues. From thence they sayled till eight of the clocke at night South-west three leagues, the winde then at North. From thence they sayled vntill the seuen and twentieth day two of the clocke in the morning, West South-west eight leagues, the winde blowing at North very much. From the said two till foure of the clocke, they sayled South by West one league: then being day light, they saw the Land plaine, which was not past three leagues from them, being very high ragged Land. There were certaine Rockes that lay farre off into the Sea, about five leagues from the same Land, (which are called *Barmake Tash*) they sayled betweene those Rockes and the Land, and about five of the clocke they passed by the Port *Bilbil*, where they should haue put in but could not: and bearing longt the shore about two of the clocke after noone, they came to *Bildib* in the Countrey of *Media* or *Sheruan*, against which place they anchored in nine foot water. Presently after they were at anchor, there came aboard of them, a Boat, wherein were seuen or eight persons, two *Turkes*, the rest *Persians*, the *Turkes* vassals, which bade them welcome, and seemed to be glad of their arriual, who told the Factors that the *Turke* had conquered all *Media*, or the Countrey *Sheruan*, and how that the *Turkes* *Basha* remayned in *Derbent* with a Garrison of *Turkes*, and that *Shamaky* was wholly spoyled, and had few or no Inhabitants left in it. The Factors then being desirous to come to the speech of the *Basha*, sent one of the *Tiskies* (or Merchants that went ouer with them from *Astracan*, passengers) and one of the Companies seruants *Robert Golding*, with those Souldiers, to the Capitaine of *Bachu*, which place standeth hard by the Sea, to certifie him of their arriual, and what commodities they had brought, and to desire friendship to haue quiet and safe trafficke for the same. *Bachu* is from *Bildib*, the place where they rode, about a dayes journey, on foot easily to be trauelled, which may be fixe leagues the next way ouer Land: it is a walled Towne, and strongly fortified. When the said Messenger came to the Capitaine of *Bachu*, the said Capitaine gaue him very friendly entertaynement.

In the morning very early, hee sent Horse for the rest of the companie which should goe to *Derbent*, sending by them that went, ten Sheepe for the ship. Whilest they were at breakfast, Master *Turnbull*, Master *Tailboyes*, and *Thomas Hudson* the Master of the ship, came thither, and when they had all broken their fasts, they went to *Bachu*. And from *Bachu* they proceeded towards *Derbent*, as it was by the Capitaine promised, being accompanied on their way for their safe conduct, with a Gentleman, and certaine Souldiers, which had the Capitaine of *Bachu* his Letters to the *Basha* of *Derbent*, very friendly written in their behalfe. In their journey to *Derbent* they forsooke the ordinarie wayes, being very dangerous, and trauelled thorow Woods till they came almost to the Towne of *Derbent*: and then the Gentleman rode before with the Capitaines Letters to the *Basha*, to certifie him of the *English* Merchants comming, who receiuing the Letters, and vnderstanding the matter, was very glad of the newes, and sent forth to re-

ceiue them certaine Souldiers Gunners, who met them about two miles out of the Towne, saluting them with great reuerence, and afterwards rode before them: then againe met them other Souldiers, somewhat neerer the Castle, which likewise hauing done their salutations rode before them, and then came forth Noblemen, Captaines, and Gentlemen, to receiue them into the Castle and Towne. As they entred the Castle, there was a shot of twentie Peeeces of great Ordnance, and the *Basha* sent Master *Turnbull* a very faire Horse with furniture to mount on, esteemed to be worth an hundred Markes, and so they were conuayed to his presence: who after he had talked with them, sent for a Coat of cloth of Gold, and caused it to be put on Master *Turnbulls* backe, and then willed them all to depart, and take their ease, for that they were wearie of their iourney, and on the morrow he would talke further with them. The next day when the Factors came againe to the presence of the *Basha*, according to his appointment, they requested him that he would grant them his priuiledge, whereby they might trafficke safely in any part and place of his Countrey, offering him, that if it pleased his Maiestie to haue any of the commodities that they had brought, and to write his minde thereof to the Captaine of *Bachn*, it should be deliuered him accordingly. The *Bashas* answer was, that he would willingly giue them his priuiledge: yet for that he regarded their safety, hauing come so farre, and knowing the state of his Countrey to be troublesome, he would haue them to bring their commoditie thither, and there to make sale of it, promising he would prouide such commodities as they needed, and that he would be a defence vnto them, so that they should not be iniured by any: whereupon the Factors sent *Thomas Hudson* backe for the ship to bring her to *Derbent*. The latitude of *Bildib* by diuers obseruations is 40. deg. 25. m. the variation of the Compas 10. deg. 40. min. from North to West. They arrived at anchor against *Derbent* East and by South from the said Castle in foure fathom & a halfe water, the two and twentieth of Iune at ten of the clock in the morning: then they tooke vp their Ordnance, which before they had stowed in hold for easing the ship in her rolling. In the afternoone the *Basha* came down to the water side against the ship, and hauing the said Ordnance placed, and charged, it was all shot off to gratifie him: and presently after his departure backe, he permitted the Factors to come aboard the ship. The nine and twentieth day their goods were vnladen, and carried to the *Bashas* Garden, where hee made choise of such things as he liked, taking for custome of euery fise and twentie Kersies, or whatsoeuer, one, or after the rate of foure for the hundred. The Factors after his choise made, determined to send a part of the rest of the goods to *Bachn*, for the speedier making sale thereof. They departed from *Derbent* with the said Barke the nineteenth of Iuly, and arrived at *Bildib* the five and twentieth day. *Robert Golding* desirous to vnderstand what might bee done at *Shamaky*, which is a dayes iourney from *Bachn*, went thither, from whence returning, he was set on by theeues, and was shot into the knee with an Arrow, who had very hardly escaped with his life and goods, but that by good hap he killed one of the theeues Horses with a Caliuier, and shot a *Turke* thorow both cheekes with a Dag. On the sixt day of August, the Factors being aduertised at *Derbent* that their ship was so rotten and weake, that it was doubtfull shee would not carrie them backe to *Astracan*, did thereupon agree and bargaine at that place with an *Armenian*, whose name was *Iacob*, for a Barke called a *Busse*, being of burden about fise and thirtie tunnes, which came that yeere from *Astracan*, and was at that instant riding at an Island called *Zere*, about three or foure leagues beyond, or to the Eastward of *Bildib*, which Barke for their more safety, they meant to haue with them in their returne to *Astracan*, and thereupon wrote vnto *Wincoll* and the rest at *Bachn*, that they should receiue the same *Busse*, and lade in her their goods at *Bildib*, to be returned to *Derbent*, and to discharge their first Boat, which was obserued by them accordingly. When all their goods were laden aboard the said *Busse* at *Bildib*, and being readie to haue departed thence for *Derbent*, there arose a great storme with the winde out of the Sea, by force whereof the Cables and Halsers were broken, and their Vessell put ashore, and broken to pieces against the Rockes: euery of them that were in her saued their liues, and part of the goods. But there was a *Carobia* or Chist, wherein were Dollers, and Gold, which they had receiued for the commodities of the Companie, which they sold at *Bachn*, which at the taking out of the *Busse*, fell by the Barks side into the water amongst the Rockes, and so was lost. The packes of Cloth which they could not well take out of the *Busse* were also lost: other things that were more profitable they saued.

The third day of October all things were brought from the shoare aboard the ship: and that day the Factors went to the *Basha* to take their leaue of him, vnto whom they recommended those the Companies seruants, &c. which they had sent to *Bachn*, making account to leaue them behind in the Countrey: who caused their names to be written, and promised they should want nothing, nor be iniured of any. After this leaue taken, the Factors went aboard, purposing presently to haue set sayle and departed towards *Astracan*, the winde seruing well for that purpose at South South-east: And as they were readie to set sayle, there came against the ship a man, who weued: whereupon the Boat was sent ashore to him, who was an *Armenian* sent from *William Wincoll*, with his writing tables, wherein the said *Wincoll* had written briefly, the mis-hap of the losse of the *Busse*, and that they were comming from *Bildib* towards *Derbent*, they,

they, and such things as they saved with a small Boat, forced to put ashore in a place by the Seaside called the *Armenian Village*: Whereupon the Factors caused the ship to stay, hoping that with the Southerly winde that then blew, they would come from the place they were at to the ship, but if they could not come with that winde, they meant to sayle with the ship, with the next wind that would serve them, against the place where they were, and take them in, if they could: which stay and losse of those Southerly winds, was a cause of great troubles, that they afterwards sustayned through Ice, &c. entring the *Volga* as shall be declared.

The *Armenian Village*.

The latitude of *Derbent* (by diuers Observations exactly there made, is fortie one degrees fiftie two minutes. The variation of the Compasse at that place about eleuen degrees from North to West. From *Derbent* to *Bildib* by Land fortie sixe leagues. From *Derbent* to *Shamaky* by Land, fortie five leagues. From *Shamaky* to *Bachu*, about ten leagues, which may bee thirtie miles. From *Bachu* to *Bildib* five or sixe leagues by Land, but by water about twelue leagues. From the Castle *Derbent* East-wards, there reach two stone wals to the border of the *Caspian Sea*, which is distant one *English* mile. Those wals are nine foot thicke, and eight and twentie or thirtie foot high, and the space betweene them is one hundred and sixtie Geometricall paces, that is, eight hundred foot. There are yet to bee perceiued of the ruine of those wals, which doe now extend into the Sea about halfe a mile: also from the Castle West-ward into the Land, they did perceiue the ruines of a stone wall to extend, which wal, as it is reported, did passe from thence to *Pontus Euxinus*, & was built by *Alexander the great*, when the castle *Derbent* was made.

The latitude of *Derbent* 41. degrees 52. minutes.

The variation of the Compasse.

20 The fift of October about noone, the winde North North-east they weighed Anchor, and set sayle from *Derbent*, being alongst the Coast to the South-wards to seeke their men: but as they had sailed about foure leagues the winde scanted Easterly, so that they were forced to Anchor in three fathome water.

The seuenth day about seuen of the clocke in the morning, they set sayle, the wind South-west. They considered the time of the yeare was farre spent, the ship weake, leake, and rotten, and therefore determining not to carry any longer for *Wincoll* and his fellowes, but to leaue them behind, bent themselves directly towards *Astracan*: and sayling North North-east vntill midnight about sixteene leagues, the wind then came to the North North-west, and blew much, a very storme, which caused them to take in all their Sayles, saving the fore Corse, with which they were forced to steere before the Sea, South by West, and South South-west. And on the eight day about two of the clocke in the morning, their great Boat sunke at the ships sterne, which they were forced to cut from the ship to their great grieve and discomfort: for in her they hoped to saue their liues if the ship should haue miscarried. About ten of the clocke before noone, they had sight of the Land about five leagues to the South of *Derbent*, and bare alongst the Coast to the South-east-wards vnto *Nezaouo*, where they came at Anchor in three fathomes, and blacke Ozie, good Anchor hold, whereof they were glad, as also that the winde was shifted to the North-west, and but a meane gale. *Wincoll* and the rest of his fellowes being in the *Armenian Village*, which is about eightene Versts to the West-wards of *Nezaouo*, the place where against they rode at Anchor, saw the ship as she passed by that place, and sent a man in the night following alongst the Coast after her, who came against the ship where shee rode, and with a fire-brand in the top of a Tree made signes, which was perceiued by them in the ship, whereupon they hoysed out their Skiffe, and sent her ashore to learne what was meant by the fire: which returned a Letter from *Wincoll*, wherein he wrote that they were with such goods as they had at the *Armenian Village*, and prayed that there they might with the same goods bee taken into the ships.

Nezaouo.

30 The tenth day they sent their Skiffe to the *Armenian Village* to fetch those men and the goods they had, with order that if the winde serued, that they could not returne to fetch the ship, they of the ship promised to come for them, against the said Village. But in their want God sent them two Couies of Partridges, that came from the shoare, and lighted in and about their ships, whereby they were comforted, and one that lay sicke, of whose life was small hope, recovered his health.

The particulars of their returne are omitted. A strange accident of provision for their reliefes.

Pauoses were sent from *Astracan*, in which they laded the ships goods, leauing her at Anchor with *Russes* to keepe her.

60 The thirteenth of Nouember they departed also in those Lighters, with the goods towards the *Chetera Bougori*, leauing the ship at Anchor, and in her two *Russes*, which with three more that went in the *Pauoses* to prouide victuals for themselves and the rest, and therewith promised to returne backe to the ship with all speed, had offered to vndertake for twentie Rubbles in Money, to carrie the ship into some Harbour, where shee might safely winter, or else to keepe her where she rode all Winter, which was promised to bee giuen them if they did it: and the same day when with those Lighters they had gotten sight of the foure Ilands, being about eight Verstes South-west from them, the wind then at North-east, did freeze the Sea so as they could not row, guide, stirre, or remoue the said Lighters, but as the wind and Ice did force them. And so they continued driuing with the Ice, South-east into the Sea by the space of fortie houres, and then being the sixteenth day, the Ice stood. Whiles they droue with the Ice, the dangers which they

they incurred were great: for oftentimes, when the Ice with force of wind and Sea did breake, pieces of it were tossed and driuen one vpon another with great force, terrible to behold, and the same happened at sometimes so neere vnto the Lighters, that they expected it would haue ouerwhelmed them to their vtter destruction: but God who had preferred them from many perils before, did also saue and deliuer them then.

Trauell vpon
the Ice.

Chetera Babbas.

Within three or foure dayes after the first standing of the Ice, when it was firme and strong, they tooke out all their goods, being fortie and eight Bales or Packes of Raw Silke, &c. laid it on the Ice, and couered the same with such prouisions as they had. Then for want of victuals, &c. they agreed to leaue all the goods there vpon the Ice; and to goe to the shoare: and there vpon brake vp their Chests and *Corobias*, wherewith, and with such other things as they could get, they made Sleds for euery of them to draw vpon the Ice, whereon they layed their clothes to keepe them warme, and such victuals as they had, and such other things as they might conueniently carrie, and so they departed from the said goods and *Panoses* very early, about one of the clocke in the morning, and traouelling on the Ice, directed their way North, as neere as they could iudge, and the same day about two of the clocke in the after-noon, they had sight of the *Chetera Babbas* (foure Hillocks of Ilands so called) vnto the same they directed themselves, and there remayned that night. The goods and *Panoses* which they left on the Ice, they iudged to be from those *Chetera Babbas*, about twentie Versts. And the next morning departed thence East-wards, and came to the *Chetera Bongories* (or foure Ilands before spoken of) before noone (the distance betweene those places is about fiteene Versts) where they remained all that night, departing thence towards *Astracan*: the next morning very early they lost their way through the perswasion of the *Russes* which were with them, taking to much towards the left hand (contrary to the opinion of Master *Hudson*) whereby wandering vpon the Ice foure or fide dayes, not knowing whether they were entred into the *Crimme Tartars* Land or not, at length it fortun- ed they met with a way that had bene trauelled, which crost back-wards towards the Sea: that way they tooke, and following the same, within two dayes trauell it brought them to a place, called the *Crasnoyare* (that is to say, in the English Tongue) *Red Cliffe*, which diuers of the company knew.

The English
ship cut in pie-
ces with Ice.

There they remayned that night, hauing nothing to eate but one Loafe of Bread, which they happened to find with the two *Russes* that were left in the ship, to keepe her all the Winter (as is aforesaid) whom they chanced to meet going towards *Astracan*, about fide miles before they came to the said *Crasnoyare*, who certified them that the ship was cut in pieces with the Ice, and that they had hard scaping with their liues.

In the morning they departed early from *Crasnoyare* towards the *Onchooge*, and about nine of the clocke before noone, being within ten Versts of the *Uchooge*, they met *Amos Riall*, with the Carpenter, which he found at *Onchooge*, and a Gunner newly come out of England; and also sixtie fide Horses with so many *Cassacks* to guide them, and fiftie Gunners for guard, which brought prouision of victuals, &c. and were sent by the Duke to fetch the goods to *Astracan*. The mee- ting of that company was much joy vnto them.

December.

The Factors sent backe with *Amos Riall*, and the said company to fetch the goods, *Thomas Hudson* the Master, *Tobias Paris* his Mate, and so they the said Factors and their company mar- ched on to the *Uchooge*, where they refreshed themselves that day, and the night following. And from thence proceeded on towards *Astracan*, where they arriued the last day of Nouem- ber. These that went for the goods after their departure from the Factors, trauelled the same day vntill they came within ten Versts of the *Chetera Babbas*, where they rested that night. The next morning by the breake of the day they departed thence, and before noone were at the *Chetera Babbas*, where they stayed all night; but presently departed thence *Thomas Hudson* with the Carpenter and Gunner to seecke where the goods lay: who found the same, and the next day they returned backe to their company at the *Chetera Babbas*, and declared vnto them in what sort they had found the said goods.

Assaulted by
Tartars.

Their returne
to Astracan.

The third day early in the morning, they departed all from the foure *Babbas* towards the said goods, and the same day did lade all the goods they could finde vpon the said sleds, and withall conuenient speed returned backe towards *Astracan*. And when they came to the *Chetera Bon- gori*, where they rested the night, in the morning very early before the breake of day, they were assaulted by a great company of the *Nagays Tartars* Horse-men, which came shouting and hallowing with a great noyse, but our people were so inuironed with the sleds, that they durst not enter vpon them, but ranne by, and shot their Arrowes amongst them, and hurt but one man in the head, who was a *Russe*, and so departed presently. Yet when it was day, they shewed themselves a good distance off from our men, being a very great troope of them, but did not as- sault them any more. The same day our men with those carriages, departed from thence to- wards *Astracan*, where they arriued in safetie the fourth of December, about three of the clock in the after-noon, where our people greatly rejoyced of their great good hap to haue escaped so many hard euents, troubles and miseries, as they did in that Voyage, and had great cause therefore to prayse the Almighty, who had so mercifully preferred and deliuered them.

They

They remayned the Winter at Astracan, where they found great fauour and friendship of the Duke, Captaine, and other chiefe Officers of that place: but that Winter there hapned no great matter worth the noting.

In the Spring of the yeere 1581. about the midst of March, the Ice was broken vp, and cleare gone before Astracan.

The breaking
vp of the Ice.

A Letter of Master HENRIE LANE to the worshipfull Master WILLIAM SANDERSON, containing a brieft discourse of that which passed in the North-east discoverie, for the space of three and thirtie yeeres.

After Sanderfon, as you lately requested me, so haue I sought, and though I cannot finde some things that heretofore I kept in writing, and lent out to others, yet perusing at London copies of mine old Letters to content one that meaneth to pleasure many, I haue brieftly and as truly as I may, drawne out as followeth: The rough hewing may bee planed at your leisure, or as pleaseth him that shall take the paines.

First the honourable attempt to discover by Sea North-east and North-west named for Cathay, being chiefly procured by priuiledge from King Edward the sixth, and other his Nobilitie, by and as the cost and sute of Master Sebastian Cabota, then Gouvernour for Discoveries, with Sir Andrew Iudde, Sir George Barnes, Sir William Garrard, Master Anthony Huffie, and a companie of Merchants, was in the last yeere of his Maiesties raigne, 1553. The generall charge whereof was committed to one Sir Hugh Willoughbie Knight, a goodly Gentleman, accompanied with sufficient number of Pilots, Masters, Merchants and Marriners, hauing three Ships well furnished, to wit, The Bona Speranca, the Edward Bonauenture, and the Confidentia. The Edward Bonauenture, Richard Chancellor being Pilot, and Steuen Burrough Master, hauing discovered Ward-house upon the Coast of Finmark, by storme or fogge departed from the rest, found the Bay of Saint Nicholas, now the chiefe Port of Russia, there wintered in safetie, and had ayde of the people at a Village called Newnox.

Anno 1553.
Master William
Burrough was
then young,
and with his
brother in this
first voyage.
Newnox is
from the road
of S. Nicholas
Westward 35
miles.

The other two ships attempting further Northwards (as appeared by Pamphlets found after written by Sir Hugh Willoughbie) were in September encountred with such extreame cold, that they put backe to seeke a wintring place: and missing the said Bay fell vpon a desert Coast in Lappia, entring into a Riuer immediately frozen up, since discovered, named Arzina Reca, distant East from a Russian Monasterie of Monkes called Pechingho, from whence they neuer returned, but all to the number of seuentie persons perished, which was for want of experience to haue made Canes and Stones. These were found with the Ships the next Summer, Anno 1554. by Russe-fishermen: and in Anno 1555. the place sent vnto by English Merchants, as hereafter appeareth.

Note.

Anno 1554. the said ship Edward Bonauenture (although robbed homewards by Flemings) returned with her companie to London, shewing and setting forth their entertainments and discoverie of the Countries, euen to the Citie of Mosco, from whence they brought a priuiledge written in Russe with the Kings or great Dukes seale, the other two ships looked for and unknowne to them where they were.

Anno 1554.

Anno 1555. the said companie of Merchants for a discoverie vpon a new supply, sent thither againe with two Ships, to wit, the Edward Bonauenture, and another bearing the name of the King and Queene, Philip and Marie, whose Maiesties by their Letters to the said Muscouite, recommended sundry their subiects then passing, whereof certaine, to wit, Richard Chancellor, George Killingworth, Henrie Lane, and Arthur Edwards, after their arriuall at the Bay, and passing vp Dwina to Nologda, went first up to Mosco, where, vpon knowledge of the said Letters, they with their trayne had speciall entertainment, with houses and dyer appointed, and shortly permitted to the Princes presence, they were with Gentlemen brought through the Citie of Mosco, to the Castle and Palace, replenished with numbers of people, and some gunners. They entred sundry roomes, furnished in shew with ancient graue personages, all in long garments of sundry colours, Gold, Tissue, Baldekin, and Violet, as our Vestments and Copes haue bene in England, sutable with Caps, Jewels, and Chames. These were found to bee no Courtiers, but ancient Muscouites, Inhabitants, and other their Merchants of credit, as the manner is, furnished thus from the Wardrobe and Treasurie, waiting and wearing this apparell for the time, and so to restore it.

Anno 1555.
The King and
Queenes letters.

Then entring into the Presence, being a large roome floored with Carpets, were men of more estate, and richer shew, in number aboue one hundred set square: who after the said English-men came in, doing reuerence, they all stood up, the Prince onely sitting, and yet rising at any occasion, when our King and Queenes names were read or spoken. Then after speeches by interpretation, our men kissing his hand, and bidden to dinner, were stayed in another roome, and at dinner brought through, where might bee scene masse siluer and gilt Plate, some like and as bigge as Kilderkins, and Wash-bowles, and entring the Dining place, being the greater roome, the Prince was set bare-headed, his Crowne and rich Cap standing vpon a pinnacle by. Not farre distant sate his Metropolitan, with diners other of his kindred, and chiefe Tartarian Captaines: none sate ouer against him, or any, at other Tables, their backs towards him:

which tables all furnished with ghests set, there was for the English-men, named by the Russes, Ghosti Carabelski, to wit, Strangers or Merchants by ship, a table in the midst of the roome, where they were set direct against the Prince: and then began the seruice, brought in by a number of his young Lords and Gentlemen, in such rich attire, as is aboue specified: and still from the Princes table (notwithstanding their owne furniture) they had his whole messes set oner all in massie fine Gold, deliuered enery time from him by name to them, by their sener all Christian names, as they sate, viz. Richard, George, Henrie, Arthur. Likewise Bread and sundry drinckes of purified Mead, made of fine white and clarified Honey. At their rising, the Prince called them to his table, to receiue each one a Cup from his hand to drinke, and tooke into his hand Master George Killingworths beard, which reacheth ouer the table, and pleasantly deliuered it the Metropolitane, who seeming to blesse it, said in Russe, This is Gods gift. As indeed at that time it was not onely thicke, broad, and yellow coloured, but in length fine foote and two inches of asseize. Then taking leaue, being night, they were accompanied and followed with a number, carrying pots of drinke, and dishes of meate dressed, to our lodging.

This yeere the two Ships, with the dead bodyes of Sir Hugh Willoughbie, and his people, were sent vnto by Master Killingworth, (which remayned there in Mosco Agent almost two yeeres) and much of the goods and victuals were recovered and saved.

Anno 1556. The Companie sent two Ships for Russia, with extraordinarie Masters and Saylers to bring home the two ships, which were frozen in Lappia, in the riuer of Arzina aforesaid. The two ships sent this yeere from England sayling from Lapland to the Bay of Saint Nicholas, tooke in lading with passengers, to wit, a Russe Ambassadour, named Ioseph Napea, and some of his men shipped with Richard Chancelor in the Edward. But so it fell out that the two which came from Lappia, with all their new Master and Marriners, neuer were head of, but in foule weather, and wrought Seas, after their two yeeres wintering in Lapland, became, as is supposed, vnstanch, and sunke, wherein were drowned also diuers Russes, Merchants, and seruants of the Ambassadour. A third ship the Edward aforesaid, falling on the North part of Scotland, vpon a rocke was also lost, and Master Chancelor with diuers other, drowned. The said Russe Ambassadour hardly escaping, with other his men, Marriners, and some goods saved, were sent for into Scotland, from the King, Queene, and Merchants, (the messenger being Master Doctor Laurence Huffie, and others:). And then, as in the Chronicles appeareth, honorably enter-tayned and receiued at London.

This yeere also the company furnished and sent out a Pinnesse, named the Serchthrift, to discover the Harborawes in the North coast from Norway to Wardhouse, and so to the Bay of Saint Nicholas. There was in her Master and Pilot, Stephen Borough, with his brother William, and eight other. Their discoverie was beyond the Bay, toward the Samoeds, people dwelling neere the Riuer of Ob, and found a sound or sea with an Island called Vaigats, first by them put into the Card or Map. In that place they throw Snow out of their said pinnesse, with shouels in August, by which extremitie, and lacke of time, they came backe to Russia, and wintred at Colmogro.

Anno 1557. The companie with foure good Ships, sent backe the said Russe Ambassadour, and in companie with him, sent as an Agent, for further discouerie, Master Antonie Ienkinson, who afterward Anno 1558. with great fauour of the Prince of Muscouia, and his letters passed the riuer Volga to Cazan, and meaning to seeke Cathay by Land, was by many troupes and companies of vncinill Tartarians encountred, and in danger: but keeping companie with Merchants of Bactria, or Boghar, and Vrgeme, traouelling with Camels, he with his companie, went to Boghar, and no further: whose entertainment of the King is to be had of Master Ienkinson, which returned Anno 1559. to Muscouie. And in Anno 1560. hee, with Henrie Lane, came home into Enghland: which yeere was the first safe returne, without losse, or shipwracke, or dead freight, and burnings. And at this time was the first trafficke to the Narue in Liouonia, which confines with Lituania, and all the Dominions of Russia: and the Markets, Faieres, Commodities, great Townes and Riuers, were sent vnto by diuers seruants: the reports were taken by Henrie Lane, Agent, and deliuered to the companie, 1561. The trade to Rie, and Reuel, of old time hath beene long since frequented by our English Nation, but this trade to the Narue was hitherto concealed from vs by the Danskers and Lubeckers.

Anno 1561. the said Master Antonie Ienkinson went Agent into Russia, who the next yeere after, passing all the riuer of Volga to Astracan, and ouer the Caspian sea, arrived in Persia, and opened the trade thither.

Also betweene the yeeres of 1568. and 1573. sundry Voyages after Master Ienkinsons, were made by Thomas Alcock, Arthur Edwards, Master Thomas Banister, and Master Geoffrey Ducket, whose returne (if spoyle neere Volga had not prevented by rousing Theemes) had altogether salued and recovered the Companies (called the old Companies) great losse, charges, and damages: But the saying is true, By vnitie small things grow great, and by contention great things become small. This may bee understood best by the Companie. The forwardnesse of some few, and euill doing of some vnjust Factors, was cause of much of the euill successe.

Arthur Edwards was sent againe, 1579. and dyed in the voyage at Astracan. About which matters, are to bee remembred the Voyages of Master Thomas Randolph Esquire, Ambassadour Anno 1567. And late of Sir Ierome Bowes, Anno 1583. both tending and treating for further Discoueries, Freedomes, and Prinuiledges, wherewith I meddle not. But in conclusion, for their paines and

and adventures this way (as diuers doe now adayes other wayes) as worthie Gentlemen sent from Princesses, to doe their Countrey good, I put them in your memorie, with my heartie farewell. From Saint Margarets neere Dartforth in Kent.

To the Reader.

I Haue had much trouble to giue thee this Authour, both for his Language, being Portugall (which for this, and some other parts of this worke, I was forced to get as I could) and for the raritie of his Relations; seeming both in themselves so stupendious, and not seconded in many things, that I say not contraried, by other Authours. Besides his booke came not out, till himselfe was gone out of the world. I answer, that Riccius the Iesuite his Relations came not to vs, till himselfe was likewise gone; and that that might rather plead not onely for the Maturitie, but the sinceritie, by that Cassian rule, Cui hono; for whom should a dead man flatter, or for what should hee lye? Yea, hee little spares his owne companie and Nation, but often and eagerly layeth open their vices: and which is more, I finde in him little boasting, except of other Nations; none at all of himselfe, but as if he intended to expresse Gods glorie, and mans merit of nothing but miserie. And how soeuer it seemes incredible to remember such infinite particulars as this Booke is full of, yet an easie memorie holdeth strong impressions of good or bad: Scribunt in marmore laeti, is said of one; and of the other, Omnia quae curant senes meminerunt. Neither is it likely but that the Authour wrote Notes, which in his manifold disadventures were lost otherwise, but by that writing written the firmer in his memorie, especially new whetted, filed, forbusbed with so many companions of miserie, whom in that state, Hec olim meminisse iuuabat; their best musick in their chaines and wandrings being the mutuall recountings of things seene, done, suffered. More marvell it is, if a lyar, that he should not forget himselfe, and contradict his owne Relations; which sometimes he may seeme to doe in the numbers of the yeere of the Lord; yea, and other numbers: but his leaues were left vnperfect at his death, and those numbers perhaps added by others after: and besides, mine owne experience hath often found figures mistaken from my hand, which being by the Compositor set at large, haue runne at large by ten times so much; and girt in otherwhiles as narrow with the tenth place diminished, or one figure set for another. And none but the Authour, or he which knowes the subiect, can easily amend that fault, being so great by so small and easie a lapse. The graduations of places I doe confesse otherwise than in the Iesuites, and as I suppose not so truly as theirs: for I thinke that he neither had Arte * or Instrument to calculate the same, but contented himselfe in the writing of this Booke to looke into the common Maps of China, and to follow them in setting downe the degrees, and so the blind led the blind into error; no printed Map that I haue seene being true. And perhaps the Chronicler to whom the papers were brought vnfinished might out of those Maps doe it; erring either of ignorance, or (which we haue often seene in Cards of remote places East and West) purposely, to conceale from others that which they haue found sweet and gainfull, the Mariner and Merchant not looking with the generous eyes of the ingenious, ingenuous Scholer.

For his repute at home; it was dedicated to King Philip the Third of Spaine; which impudence would not haue obruded (if altogether a tale) on such Maestie; licenced by the Holy Office, and printed at Lisbon; translated into the Spanish by the Licentiate, Francisco de Herrera Maldonado, Canon of the Church Riall of Arbas, and dedicated to a Clergie-man Seuerin de Faria, Printed 1620. at Madrid (and small credit it had beene to the House of the Farias, that one of them should publish in Portugall, and in Castile to another should be dedicated, a frinulous tale and denised foolerie.) I adde also the Authours stile so religious, and his often protestations: his credit, as Herrera reporteth with King Philip the Second, who spent much time in discourse with him about these things. I might adde the Spanish Translators Apologie at large, and one of him Fr. Andrada the Portugall Chroniclers testimonio.

If this moue thee not to beleene, yet beleene thus much, that I haue no minde to deceine thee, but giue thee what I found, onely much contracted, and not going all the way with our Authour, whose originall Booke is aboue one hundred and fiftie sheets of paper in folio, but contented with his China and Tartaria Relations: that also too much, if not true. And yet I would not haue an Authour reiected for his speeches framed by the Writer, in which many Historians haue taken libertie; no, if sometimes he doth mendacia dicere, so as he doth not mentiri; that is, if he be so credulous to beleene, or so improuident to proffer to others faith, probable falsehoods related by others (as I will not sweare but of himselfe hee might mistake, and by others be mis-led, the Chinois here might in relating these rarities to him enlarge, and de magnis maiora loqui) so as he still be religious in a iust and true delinerie of what himselfe hath seene, and belye not his owne eyes: the former is rashnesse and distastfull, the later is dishonest and detestable. Once, the Sunne Rising hath found many worshippers, but the Westerne Sunne is neerer night: and neerer obscuritie and meannesse are our Westerne affaires then those China Raies of the East; and wee were Backes and Owles not to beleene a greater light then our selues see and vse. All China Authours how diuersified soeuer in their lines, yet concur in a centre of Admiranda Sinarum, which if others haue not so largely related as this, they may thanke God they payed not so deare a price to see them; and for mee, I will rather beleene (where reason euicts not an eiectione firma) then seeke to see

Note for numbers (if great care bee not had) how easily, how dangerously mistaken.

* So it seemes by those words of his, fol. 122. Amda que confesso que me falta o milhor, que he saber o engenho para dar a entender o clima e a Altura dos graos &c. Falso graduations a common thing in Maps of East and West Indies.

Valignarius a great Iesuite wrote a booke with that title

at the Authours rate; and if he hath robbed the Altars of Truth, as he did those of the Calempley Idols, yet in Pequign equity we will not cut off the thumbs (according to Nanquin rigour) upon bare surmise without any euidence against him. How euer, cheaper I am sure he is by farre to thee then to mee, who would haue beene loth to be so true a labourer in a lying Authour, willingly or commonly (in my conceit) falsifying his owne sight, though perhaps not seldome deceiued in things taken vp on China mens trust, or entred into their China Bookes, such as he here often citeth. Men refuse not Siluer for the Oare; gather the Rose notwithstanding the prickles; neglect not Haruest mixed with weeds, Wheat with the chaffe, Fruit for the shells, and hate not Honie for the Bees sting; nor will I either in prodigallitie of faith beleene all, or be so penurious as to reiect the most of that which here I present. Use thou thy freedome, and him at thy pleasure (I say not mee) and if thou wilt not pardon such a brieft collection, thou wouldst hardly giue Castilian entertainment to all, and more then all, often yeelding brauadoes and enlarging flourishes of stile, beyond a translation, as if his Authour had not said enough. The variety, if it had beene meerly deuised, presents I know not how many entercourses as interludes of Comicke and Tragicke enents, more worthie the reading then most in this kinde, and as fit to recreate: how much more, where veritie is (as I suppose) the ground and substance, though perhaps inlayed with other phantasies among. That the Iesuites in some things differ, is their authoritie against his, who as more learned and iudicious, and longer experienced, might finde out some truths better then hee; as his various fortunes, and that time, might let him see many particularities which they could not, writing sixtie yeeres after. In many things they both agree: and Gaspar de Cruz hath many the same things; and that his strange Relation of the Crosse in China and the Hungarian of the Mount Sinai, is deliuered by Lucena, perhaps learned by some of His companie: and these exceptions by mee mentioned, are rather praoccupations, of censorious iudging my iudgement, then my iudiciall sentence, which the iudicious will suspend, and leane to better experience. Iudicent posteri; veritas Temporis filia.

CHAP. II.

Observations of China, Tartaria, and other Easterne parts of the
World, taken out of FERNAM MENDEZ PINTO
his Peregrination.

§. I.

MENDEZ his many miserable aduentures, his strange expedition with
ANTONIO DE FARIA; diuers coasts visited, Pirats
tamed, miseries suffered, glorie
recovered.

Fernam Mendez Pinto, borne at old Montemor in the Kingdome of Portugall, was placed in seruice at ten or twelue yeeres of age in Lisbon, the thirteenth of December, An. 1521. on the day of breaking the Scutchions, or publike mourning for King Emanuel. A yeere and halfe after he fled vpon occasion of a sudden accident, and got aboard a Caruile which was taken by a French Pirat, which would haue made sale of them at Larache to the Moores. But a fortnight after taking another Portugall ship comming from Saint Thome worth 40000. Duckets, they returned for France, carrying some with them for Sea seruice, the rest they set on shoare by night on the shoare of Melides, naked; which came to Santiago de Cacem, where they were relieued. Thence he went to Setuual, and serued Francisco de Faria a Gentleman belonging to the Master of Santiago, and after that was Page to the Master himselfe. But his meanes being short hee left his seruice.

Arabs Con-
quest.
A Martyr of
Mahomet. Mar-
tyrem non pen-
sed causa.

An. 1537. he went for India in a Fleet of fve ships; the Admirall was Don Pedro de Sylua, sonne of Vasco * da Gama (first Discoverer of the Indies, whose bones he carried with him in the ship at his returne, which were receiued by King Johns appointment in greater Funerall pompe, then had beene seene done to a Subiect.) They arriued at Din the fifth of September. Thence after seuteene dayes he went with two Foists for the Straight of Mecca, and came in sight of Curia Muria, and Abedalcuria, almost wracked with foule weather, and comming to Sacotora, watered neere the Fortresse which Francisco d'Almeida first Vice-roy of India, had built, 1507. Hauing receiued some refreshing of the Christians there, they departed, and in the heighth of Masua tooke a ship, but fve men being therein left of eightie; one of which was the Captaine, a Renegado of Malorquy, who for loue of a Moorish woman had denyed his Faith, and refusing to returne to Christianitie, notwithstanding all perswasions, wee bound him hand

and foot, and threw him into Sea with a great stone tyed about his necke: The ship also sunke, and little was saved.

They went to *Arquico* (then) in the Countrey of *Preste Iohn*; to deliuer a letter to *Aurique Barbosa*, the Factor of *Antonio Sylueira*, sent three yeeres before by *Nuno de Cunha*, who with fortie others escaped from the rebellion *Xael*, in which *Dom Manoel de Meneses*, with one hundred and sixtie *Portugals* were taken, foure hundred thousand Duckets, and fixe *Portugall Ships*, which were those that *Solyman Bassa A. 1538.* brought with prouision for his Armada to the siege of *Diu*; the King of *Xael* hauing sent them with sixtie *Portugals* for a *Cairo* present; the rest hee bestowed as almes on *Mahomets* house at *Mecca*. I with three others, were sent some dayes journeyes into the Countrey to *Barbosa*, then in the Fort of *Geleytor* in guard of the Queene, mother of the *Preste Iohn*, who welcommed them, as the nightly dew to the flowerie Garden, and as *Helena* to *Ierusalem*, so were they (said she) to her eyes.

Xael or *Iael* in surrection.

But (to leaue those things) he went thence to *Ormuz*, and then to *Goa*; there offered his seruice to *Pero de Faria* Captaine of *Malaca*, which entertained him. The occurrences of *Bata*, *Achem*, *Aaru* in *Samatra*, *Queda* in the continent, and his employments in those parts, as also of *Siaca*, *Paon*, *Patane*, I omit.

He saith that hee was wracked at Sea comming from *Aaru*; of eight and twentie, fve onely escaping, two of which the Crocodiles deuoured. Hee was taken and sold to a *Moore*, which carried him to *Malaca*. Thence *Pero de Faria* sent him to *Patane* in trade: from thence againe, imployed by *Antonio de Faria* to *Lugor*, *Coia Acem* a *Guzarate* Pirate set vpon them, tooke, and killed all, *Burall* and *Pinto* onely escaping, which leaping into the Sea were reserued by a Barke, and sent to *Patane*. *Faria* afraid to return to *Malaca*, where he was so indebted for those goods, vowed to be reuenged of the Pirat. And by helpe of his friends armed a Iunke with fve & fifty Souldiers, of which I and *Borall* (extreamely both indebted and wounded) were. From *Patane* we set forth in May, 1540. and to a Hauen called *Bralapisaon*, some fixe leagues off the firme Land, where we found a Iunke of the *Leguios*, bound for *Siam* with an Embassadour of *Nantaquim de Lindau*, Prince of the Ile of *Tosa* situate in six & thirty degrees, which seeing vs come, hastened away with all speed. *Faria* sent a *Chinese* Pilot to them with faire offers of loue and courtesie, who returned with a present, a rich Sword, and fixe and twentie Pearles in a Boxe of Gold, with this answer, That the time would come, when they should communicate with vs in the Law of the true God of infinite mercy, who by his death had giuen life to all men, with a perpetuall inheritance in the house of the good: and hee beleued that this should bee after the halfe of the halfe of time were past. Neither could *Antonio de Faria* returne any thing in recompence, they being gotten farre into the Sea.

Bralapisaon.

Tosa, Span Loffe.

A strange answer.

Heere wee watered, and after coasted to search the Riuer of *Pulo Cambim*, which diuides the Kingdome of *Champaa*, from the Seniorie of *Camboia* in the height of nine degrees. Thither we came in the end of May, and the Pilot went vp the Riuer three leagues, to a great Towne called *Catimparis*, where we stayed to take in prouision twelue dayes. *Faria* being curious, desired to know whence that Riuer came, the originall thereof (they told him) was a Lake called *Pinator*, Eastward from that Sea, two hundred and sixtie leagues in the Kingdome of *Quitiruan*; which Lake was compassed with high Hills, at the bottome of which, alongt the waters side, were eight and thirtie Townes, thirteene great, the rest small. One of these Great ones was named *Xincalen*, where was a great Gold Mine, whence euery day was taken a Barre and a halfe of Gold, which in our money amounteth by the yeere to two and twentie millions of Gold. Foure Lords are sharers, and are still at warres for a singular proprietie. They said that one of these called *Raiabitan*, in the Court of his house in iarres, had set vp to the necke in earth six hundred Bars of Gold in poulder, as good as that of *Menancabo* in *Samatra*; and that if three hundred of our men were sent thither, with one hundred Caliuers, they would without doubt become masters thereof. They said also that in *Buaquirim*, another of those Townes, was a Rocke of Diamonds, better then those of *Lane*, and of *Taniampura* in the Ile of *Iaua*.

Rocke of Diamonds.

Proceeding along the Coast of *Champaa*, from *Pulo Cambim*, we came to a shelve called *Saley-lacum*, and the next day to the Riuer *Toobafoy*, in the mouth whereof a Iunke passed by, to which we offered the courtesie of the Sea, and they in scorne made shew of a Negroes Buttockes, with many trumpets and other iollitie. Hence grew displeasure: in the night three Barks came to assaile vs, which we tooke, with the Captain, two *Acheners*, a *Turke*, & the *Negro*. This *Negro* confessed himselfe a Christian, slave to *Gasper de Mello* a *Portugall*, whom that dogge (he pointed to the bound Captaine) slew two yeeres since in *Liampoo*, with fixe and twentie *Portugals* besides with him in the Ship. What said *Faria*, is this *Similan*? Yea, said he, and he had thought in so small a Barke, there had not benee about fixe or seuen, and hee would haue bound your hands and feet, and impaled you as hee serued my master. *Faria* hauing serued him and his with the same sauce, tooke the Iunke, in which was thirtie six thousand Taels of *Iapon* Siluer, which make fiftie foure thousand *Cruzados* or Duckets, besides much good merchandize.

Similan a Pirate taken.

Faria proceeded alongt the Coast of *Champaa*, and came to the Riuer *Tinacorn*, by our men called *Varella*: into which enter the Ships of *Siam* and the *Malaya* Coast, which goe for *China*, and *Truck* for Gold, *Calamba* and *Iuory*, whereof that Kingdome hath store. Many *Paraos* or small

Tinacorn, or *Tawilachim*, or *Varella* Truck for gold.

small Barkes came aboard vs, and wondred to see white men with beards. They told him that if he would goe vp the Riuer to the Citie *Pilaucacem*, where the King resides, hee might in five dayes sell his goods: for great Merchants resorted thither from the *Lauhos*, and *Pafnaas*, and *Gne- os*. That Riuer they said came from the Hill *Moncalor*, eightie leagues from that place, and beyond that Hill it is much larger, but shallower, in some places making shallow fields, where bred infinite store of Fowles which couer the ground, in such innumerable numbers, that two and fortie yeeres before they caused the Kingdome of *Chintaleuhos*, (which is eight dayes journey) to be dispeopled. Beyond that Country of Birds, is another wilde and mountainous, where abide many creatures much worse then those Birds, Elephants, Rhinocerotes, Lions, Wilde-swine, Buffals, and Wilde-kine. In the midst of that Land or Kingdome (so it had beene in old time) is a great Lake, which the Natiues call *Cunebetee*, others *Chiammay*, from which proceeds this riuer, with other three in great quantitie washing that land. That lake, as some write, containeth in circuit sixtie Iaons (each of which is three leagues) alongst which are Mines of Siluer, Copper, Tinne, and Lead, carried thence by Merchants in *Casilas*, with Elephants and Badas (Rhinocerotes) to the Kingdomes of *Sornan*, or *Siam*, *Passiloco*, *Sauady*, *Tangu*, *Prom*, *Calaminkan*, and other Kingdomes. Being asked of the weapons of those Countries, they answered, That they haue none but Poles burned, and short Crises of two spannes. They might not go vp the Riuer in lesse then two months, or two and a halfe, by reason of the force of the water, which way downe, they might dispatch in eight or ten dayes.

Faria going from thence, came to *Pullo Champeiloo*, an Iland not inhabited in fourteene degrees and twentie minutes, at the entrie of the Bay of *Cauchin-China*: and thence hauing fitted his Ordnance to *Ainam*, to seeke *Coia Acem*: and being come to *Pullo Capas*, a Fleet of fortie great Iunkes, of two or three Deckes * a piece was seene in the Riuer by *Boralbo*, whom *Faria* had sent to discover, and after that another seeming two thousand saile great and small, and a walled Towne of some ten thousand houses. At his returne hee saw also one Iunke in the Barre of the Riuer at anchor, which seemed of another Coast. *Faria* supposed this last was of that Pyrat *Coia Acem*, which therefore hee assailed and tooke. One of the company was a Christian of Mount *Sinai*, named *Tome Mostangue* a Merchant, whose Barke *Solyman Bassa* had taken A. 1538. in the Port of *Indaa*, with seuen others to be victuallers for his Armada of sixtie gallies, wherewith he was sent by the Great Turke, to restore *Sultan Baadur* to his Kingdome of *Cambaya*, whereof the *Mogor* had then dispossessed him, and to driue the Portugalls out of *India*. And when he demanded of the Turkes his freight, which they had promised, they tooke his wife and his daughter, and openly rauished them before his eyes; his sonne, which cried at that spectacle, they threw into the Sea bound hand and foot: and laid himselfe in yrons, tooke away his goods, worth aboue fixe thousand Duckets. His wife and daughter died, and hee as desperate leaped one night into the Sea, at the Bar of *Diu*, with a sonne which there hee had, and got to *Surat*, and came thrice to *Malacca* in a Ship of *Garcia de Saa*; whence by *Stephen Gama* he was sent for *China*, with *Christouan Sardinha*, Factor of *Maluco*; whom riding at anchor in *Cincapura Quiay Tayiam*, Captaine of this Iunke slew with six and twentie Portugals, and saued him alieue because he was a Gunner. *Faria* cried out that he had heard of this *Quiay Tayiam*, that he had killed aboue one hundred Portugals, and spoiled them of one hundred thousand Cruzados, and that since he killed *Sardinha*, he caused himselfe to bee called by his name. Hee asked this Armenian where he was, hee shewed where he with fixe or seuen others were hidden in the Iunke. *Faria* went and opened the skuttle, and *Taiam* with his company began a new fight, killed two Portugals and seuen boyes, and wounded twentie; but in the end were slaine. *Faria* halted away for feare of the Iunkes in the Riuer, and came to the Coast of *Cauchin-China* where he rifled this Iunke, and found in her Spices and other goods, to the value of sixtie thousand Cruzados, besides Artillery, which the Pirate had taken out of the Ships of *Sardinha*, *Olineyra*, and *Matos*.

The next day hee set saile againe for *Ainam*, and by the way lighted on Boates fishing for Pearles, to whom they offered contract, who told them that *Guamboy*, a Port somewhat before, (as in *Cantan*, *Chincheo*, *Laman*, *Combay*, *Sumbor*, and *Liampoo*, and other Coast Cities) was a place of trade for strangers, and counselled him to goe thither: for there they had nothing but Pearles, which they fished for the treasure of the Sonne of the Sunne, by the command of the *Tan* of *Combay*, supreme Gouvernor of all *Cauchin-China*. And that the law was, that if any Barke besides the appointed entred, it should bee burnt with all the people therein. And because hee was a stranger, it was best for him to saile away before *Buhaquirim* the Mandarin, which was but seuen leagues thence came; who had fortie great Iunkes, with two thousand Mariners, and five thousand Souldiers; and did abide there the fixe moneths of fishing, from March to August both included. They much maruelled at the Portugall fashion, hauing neuer seene any such men, and suspected them theeuers (they professing themselves Merchants of *Siam*) with gifts and courtesie they wonne good estimation of these Fishers. One of these being asked touching *Aynam*, answered, That it was once an absolute Kingdome gouerned by *Prechan Gamu*, who dying without an heire there arose such contentions, that in foure yeeres and a halfe there dyed sixteen *Lacasas* of men, which are so many hundred thousands, whereby the Land was so dispeopled, that

that the *Cauchin* King made himselfe master thereof, with seuen thousand *Mogores*, which the *Tartar* sent him from *Tuymican*, then the chiefe Citie of his Empire. Hee set ouer the same *Hoyba Pagnarol*, who rebelled and made himselfe tributarie to the King of *China*, paying fixe hundred thousand Duckets, or foure hundred thousand *Tacis* yearly: and dying without heire, two hundred thirtie five yeares since, hee declared the King of *China* his Successour: and so it hath continued. He counselled him not to goe to *Aynam*; because they were Dissemblers, nor would the Monson suffer him to go to *Liampoo*; but to go to the good riuer *Tanauquir*, stil sounding as he went for the shoalds; there he should haue sure Anchorage, and in little space hee might sell all his goods; where yet it was not safe by reason of reasonlesse men to aduenture his goods on Land.

Tanauquir.

To that Riuer we went, and in the mouth thereof not able to stemme the Current, two Iunkes assailed vs, and their first Language was fixe and twentie Peeces of Ordnance: the Issue was, *Faria* tooke them both, most of their men being drowned or slaine, and found therein seuentene *Christians* Prisoners, by whom hee learned that the Captayne was a Rouer which bare two names, one of a *Christian*, *Francisco de Saa*, the other of a *Gentile*, *Necoda Xicaulem*. Five yeares he had bene a *Christian* at *Malaca*; *Garcia de Saa* Captayne of the Fortresse, in his Baptisme imparting his owne name to him, who married him to a Gentlewoman of *Portugall*. But hee going, Anno 1534. for *Chincheo* in a *China* Iunke with twentie *Portugals* and his Wife, slue both her and them at *Pulo Catan*: and the next yeare took another *Portugall* Iunke at *Chincheo*, which came from *Sunda*, and slue ten *Portugals* in her, and thence-forth practised Pyracie on *China* set, (vs hee thought vs to bee) and *Portugals*. The goods of the two Iunkes amounted to fortie thousand *Tacis*, and seuentene Brasse Peeces. The Captayne of this place was in league with him, and shared a third of his Pyracies. *Faria* therefore went to another Port fortie leagues Eastward, called *Mutipinan*, wherein were many Merchants which came in *Casilas* from the Land of the *Lauhos*, and *Pafuaas*, and *Gueos* with great store of siluer. The current setting strong against vs at the Rock of *Tilauinera*. Wee came to *Mutipinan*, and learned that the Riuer was deepe, the best in that Bay; the people peaceable, that Merchants had come nine dayes before from the Kingdome of *Benan* in two *Casilas*, each of five hundred Oxen, with store of Siluer, Iuory, Waxe, Benioyn, Camfire, Gold in poulder, to buy Pepper, Drugs, and pearles of *Aynam*; that they had not any Armada of great ships because the Wars which the *Prechau* (King) of the *Canchins* made were by land, that he abode at *Quangepaaru*, a Citie twelue dayes iourney thence; that his Mynes yeilded him fiftene thousand *Pikes* of Siluer, halfe of which by Diuine Law belonged to the people, which had remitted it to him on conditon to pay no other tributes, whereto the ancient *Prechau* had sworne to keepe it, as long as the Sun should giue light to the Earth. There hee sold a great part of his goods till newes of the *Tanauquir* Rouer made them afraid to come aboard: so that he was forced to set saile.

Benan.

Quangepaaru.

Thus after many dayes spent in this Bay of *Cauchin-china*; because *Coia Acem* and the Pyrates which robbed *Christians* were in league with the *Mandarines*, and sold that which they had gotten in *Ainan*, he pursued that purpose againe, and came to Anchor in *Madel* a Hauen in that Iland where he encountred with *Hinimilau*, a *Chinese* Rouer which had become lately a *Moore*, and bitter enemy of *Christians*, of which Religion hee had also bene. Five *Portugall* Captiue Boyes, which were aboard him, cryed out for mercy, whereby *Faria* mooued, sent to know what they were, which answering with stones on their heads that came in the Boat, a cruell fight followed, in which *Faria* remayned *Victor*, and seised of the Captaine with fiftene others left aliue. He demanded for the *Portugall* Boyes, who told them they were in the Prow vnder Hatches; whereupon sending to see, they found them lying on a heape with their heads off, a woman with her two children being also so serued. *Faria* asked why hee dealt so with the small Innocents? He answered, it was sufficient that they were children of *Portugals*. Being asked why he had forsaken the *Christian* Religion; he said, because the *Portugals* had respected him being a *Gentile*, with Cap in hand saluting him *Quiaay Nicoda*, but after hee was *Christian*, made little account of him; whereupon he became a *Moore* in *Bintam*, and the King of *Iantan* vsed him with much honour, his Officers called him Brother, and hee sware on a Booke to become an Enemy to the *Portugall* and *Christian* Name as long as he liued, the King and Priest applauding and promising all happinesse to his soule. Seuen yeares he had bene in execution of that Oath, and had taken a Iunke of *Luys de Pania* in the Riuer of *Liampoo*, with foure hundred Bares of Pepper, slue eightene *Portugals*, besides slaues: and after that had taken at times foure ships, in which he had slaine neere three hundred persons, seuentie of them *Portugals*, and taken fiftene or sixteen hundred Bares of Pepper and other Commodities, of which the King of *Pan* had halfe, to secure him and let him haue sale: in the Riuer *Choaboque* on the Coast of *China*, he had killed *Ruy Lobo*, his old acquaintance, with seuentene *Portugals*, escaping a wracke, and taken into his Iunke on condition to pay him two thousand *Cruzados*, to let him on shoare at *Patane*; which notwithstanding, hee slue him and the rest by the *Moore*s counsell one night as they were asleepe. *Faria* would heare no further, but caused him to bee slaine and cast into the Sea. In Silke and other goods he found in the Iunke to the value of fortie thousand *Tacis*: the Iunke he burned, hauing none to man her.

Hinimilau an Ethnicke-Christian-Moore Pyrate.

The other *Necodas* or Captaynes of the Iunkes, seeing what *Faria* had done, consulted together, and seeing he might also doe as much to them, sent two chiefe men to him, desiring him as *King of the Sea*, to giue them securitie to passe, in dispatch of their busineses before the Monson were ended, and that as his Tributaries, they would giue him twentie thousand *Taeis* of Siluer; to which he sware, and that no Thiefe should rob them: and with a Present receiued the Money brought him within an houre after. A Boy which writ their Passes, gayned in thirteene dayes aboute foure thousand *Taeis* (besides gifts for dispatch) each Iunke giuing fise *Taeis* and the lesse Barkes two. The Vice-Roy also of *Ainan* sent him a rich Present, with a Letter to intreat him to serue the Sonne of the Sunne as Admirall from *Laman* to *Liamppoo*, at ten thousand *Taeis* annuall wages, besides (after three yeares end) further aduancement: whereto he excused his vnworthinesse, and departed to *Quangiparu*, a Citie of fifteene thousand Housholds, and so coasted all alongst the Iland of *Ainan* seuen monethes space, till the Souldiers were wearie, and required their shares as had bene agreed; which was quieted with promise to winter at *Siam*, and hauing there made Money of all to giue each man his part.

Pullo Quirim.

With this agreement they came to an Iland, called *Theenes Iland*, because standing out of the Bay, it is their place to take the first of the Monson. Here at the new Moone in October wee were encountred with a cruell Tempest in the night, by which the foure Vessels were broken in pieces, fise hundred eightie sixe persons drowned, of which eight and twentie *Portugals*; three and fiftie of vs by Gods mercie saued, *Faria* being one, and one and twentie other *Portugals*, the rest Slaues and Mariners. They spent two dayes and a halfe in Buriall of their dead, and to get some of their prouision, which yet hauing taken Salt-water, would not last aboute fise dayes of the fifteene they staid there. *Faria* comforted them saying, that God would not permit so much euill but for a greater good; nor would haue taken from them fise hundred thousand *Cruzados*, but to giue them sixe hundred thousand: God doth not punish with both hands, his mercie curing the wounds which his Iustice maketh.

Thus we walked naked, and bare-foot on the Strand & in the Wildernes, suffering hunger and cold, many of our companions dying, not so much for want of food, as the stinke and putrified vnholsonnesse thereof. In this disconsolate plight, a Sea-kite * came flying from behind the South Cape of the Iland, and let fall from his Talons a Mullet a span long; which he taking vp with great prayse to God, and Prayer to Iesus Christ, not to consider their merits, but his merits for them, hee caused it to bee rosted and giuen to the sicke. Looking to the place whence the Fowle came, they saw more of them flying vp and downe, and going thitherwards, discovered a Valley with diuers Fruit-trees, and before they came at it, they found a Deere which a Tygre had newly killed, and with their generall cry was scarred from it, hauing begun to eate it. Wee fasted with it, and with many Mulletts which those Sea-kites got, and (scarred with our cries) let fall. This fishing they continued from Munday till Saturday, and then seeing a saile they hid themselves in the Woods. It was a *Lantea* or Barke with Oares, which came thither with thirtie persons to wood and water; and whiles they were disporting themselves, and had left their Barke vnmanned, *Faria* apprehended the occasion, and hauing instructed them, at the name of Iesus they all ranne vpon it, entred without gain-saying, and loosing the Prow put to Sea. The *Chinois* seeing their *Lantea* taken, hasted to the shoare, but scarred with a little Iron-piece out of their *Lantea*, they fled to the Thickets. We presently fell to eate, what an old man was dressing for the *Chinois*, and after searched and found Silkes, Damaskes, Muske, and other goods worth foure thousand *Cruzados*, besides Rice, Sugar, Hennes, which we most esteemed for recouerie of the sicke. There was a Boy of twelue or thirteene yeares old, whom *Faria* asked, whence and whose the *Lantea* was: hee answered, it was his Fathers, from whom they had unhappily taken in lesse then an houre, all hee had gotten in aboute thirtie yeares: hee came from a place, called *Quoaman*, where in barta for Siluer he had gotten those goods, which he was going to sell to the Iunkes of *Siam* in the Port of *Comhay*: and now hee going to supply his want of water, you haue taken away his goods without feare of the Iustice of Heauen. *Faria* promising to vse him as his Sonne; then, said hee, set me on shogre in that miserable Land where my true Father is, with whom I had rather dye then liue with so bad people. Much reasoning passed, and he said, they could speake well of God, but little vsed his Law: neither would he eate in three dayes space.

We determined to goe for *Liamppoo*, two hundred and sixtie leagues Northwards from thence, and to get if we could, a better Barke, this being little, and scanty able to brooke those New Moone-stormes on the Coast of China. At Sun-set wee set sayle, and next morning going East North-east, came to an Ile called *Guintoo*, where we tooke a fisher-barke with store of fresh fish, whence we tooke what we thought fit, with eight men of her, twelue to serue for the *Lantea*, our men being weake. They told vs that eightene leagues thence was a good Riuer, called *Xinguan*, within which was a poore fisher-village, called *Xamoy*, and three leagues higher vp, a Citie of good Trade. The next day in the euening we came to *Xamoy*, where a Iunke rode fitter for *Farias* purpose, which in the night he tooke, the men being asleepe; whom he bound, threatning to kill them all if they made any cry; and sayled presently with her to the Ile *Pullo Quirim*, nine leagues off, and in three dayes after to an Iland called *Luxitay*, where for the recouery of the sicke

ficke hee stayed fiftene dayes. In the Iunke hee found no Merchandize but Rice, the most of which he cast into the Sea to lighten her, and fit her for our Voyage. Thence wee put forth for Liampoo, where we heard were many Portugals from Malaca, Zunda, Siam, and Patane, which ysed there to winter.

In the way we encountred, after two dayes sayling, with a Iunke of Patane, which belonged to a China Pyrate, called *Quiay Panian*, a great friend of the Portugals, of whom he had thirtie in his company entertayned in his pay. They not knowing vs, began with a terrible salutation of fiftene Peeces of Artillery, but by Crosses in their Banner, we knew them and made signes, by which both congratulated each other with heartiest greetings, and *Quiay Panian* and he joyned in league to pursue their Fortunes together. They now purposed to goe to *Chincheo*, and there found five sayle of Portugals, which told them of a great Fleet of foure hundred Iunkes, with one hundred thousand men gone to the Iles of *Goto*, in succour of *Sucan of Pontir*, who had voluntarily subjected himselfe to the King of *China*, in one hundred thousand Taeis Tribute yearly. We tooke out of those five ships thirtie five Souldiers more, and proceeded on our way for *Liampoo*. In the way we encountred a small Paraoe with eight Portugals sorely wounded, whereof *Antonio Anriquez*, and *Mem Taborda* were, rich men of great esteeme.

These recounted to him that a *Guzerate Rouer*, *Coia Acem*, with three Iunkes and foure *Lanteas* (in which were five hundred men, one hundred and fiftie of them *Moors*) set vpon them (having parted seuentene dayes agoe from *Liampoo*, for *Malaca*, purposing to goe for *India*, if the Monlon had permitted) before the Ile *Gumbor*, and after some houres fight tooke them; eightie two persons (eightene of them Portugals) were slaine, and as many others captiued, with one hundred thousand Taeis value in their Iunke: one of the Pyrats Iunkes was fired and burnt to the water. These few in the furie of the entry escaped in the little Boat which hung at sterne; they being busied in the spoyle, and the Sunne then set, could not follow, but went into the Riuer with much triumph.

Faria and *Quiay Panian* who had kindred at *Lailoo*, prouided themselves there of Powder, Lead, Victuals, and other necessities for Money, by leaue of the *Mandarins*, (no Countrey in the World being like *China* for all kind of prouisions) and there got two greater Iunkes in truck of the other, and two *Lanteas*, and one hundred and sixtie Mariners, so that they were in all five hundred persons, of which ninetie five were Portugals. They had one hundred & sixty Harquebuses, forty Brasse Peeces, & sixty Quintals of Powder, nine hundred pots of Powder, foure thousand Darts headed with Iron, Arrowes, and many Fire-workes, with other Weapons. Thus prouided, they set forth in pursuit of *Coia Acem*, and by a Fisher-boat learned that he was in the Riuer *Tinlau*, there to furnish and fit the Iunke lately taken from the Portugals, to goe with it and two others for *Siam* (where he was borne) about ten dayes thence. *Faria* sent *Vicente Morosa* in the Fisher-boat, with some of his company to informe himselfe more fully, which making a shew of fishing with the rest, he easily did, and brought word aboard of the easinesse of the attempt. In the night they anchored, and went vp the Riuer in the morning, the enemy knowing nothing till they came in sight, and *Faria* crying out, *Hey, my Masters, in the Name of Christ, so them, to them, Santiago*, off went the Ordnance, the small shot succeeded, that none now in the Iunkes durst appeare. His small Vessels (*Lorche*) coming from the shoare with succour were so entertayned with great shot that they could not helpe themselves, and by our small Vessels were fired with the fire-pots; in three of them two hundred persons were slaine. Out of the fourth they leaped into the water, and were most slaine by *Panians* men.

Coia Acem which before was not knowne, seeing his *Moors* ready to try the waters courtesie to escape those fiery enemies, armed in Buffe, with Plates fringed with Gold, cryed out aloud that he might be heard, *La llah illullah Muhamed rocolalah: what shall you Muslemans and iust men of the Law of Mahomet, suffer your selues to be conquered of so feeble a Nation as are these Dogges, which haue no more heart then white Hens, and bearded women? to them, to them; the Booke of Flowres hath giuen promise from our Prophet to you and me, to bathe our selues in the blond of these Cafres without Law.* With these cursed words, the Deuill so animated them, that it was fearefull to see how they ranne on our Swords. *Faria* on the other side heartned his in the name of Christ crucified, and with a zealous feruour reached *Coia Acem*, such a blow with a two hand Sword on his Head-piece of Maile, that he sunke to the ground, and with another blow cut off his legges. Whereupon his men with such furie assailed *Faria*, not caring for thirtie Portugals which stood about him, that they gaue him two wounds, which put such spirit into our men, that in little space, eight and fortie of the Enemies lay dead vpon *Coia Acem*, and the rest they slue all but five, whom they tooke and bound, the Boyes cutting the others in quarters, and throwing them into the water with *Coia Acem*, and the King of *Bintans* chiefe *Caciz*, or Priest, the shedder and the drinker of Portugall blond, as he stiled himselfe in the beginning of his Writings, for which hee was of that cursed Sect much honoured.

Of the Enemies were slaine three hundred and eightie, of ours fortie two (eight of which were Portugals, *Faria* searched the Iland, and found a Village therein of fortie or fiftie houses, which *Coia Acem* had sacked, slaying some of the Inhabitants. Not farre off was a great house

Quiay Panian a China Pyrate.

seeming a Temple full of sicke and wounded men, ninetie sixe in number, which the Pyrat had there in cure, whom he burned, setting the house on fire in diuers places, those that sought to escape being receiued on Pikes and Launces. The Iunke which they had taken from the *Portugals*, fixe and twentie dayes before, *Faria* gaue to *Mem Taborda*, and *Antonio Anriquez* in Almes for remission of his finnes, taking their Oath to take no more but their owne. He tooke speciall care of the wounded, and caused the slaues to be set free. After all this, there remayned of cleere gaines, one hundred and thirtie thousand *Tais* in Siluer, of *Japan* and other goods, which that Pyrat had taken along that Coast from *Sumbor* to *Fucheo*.

B. II.

ANTONIO FARIA his taking of Nouda a Citie in China, triumph
at Liampoo; strange Voyage to Calempluy, mi-
serable shipwracke.

Faria wracked
the second
time.

Violent wind.

Nouda.

China perillous
Coast.

Faria hauing recovered his sicke men, set sayle for *Liampoo*, and beeing come to the point of *Micny* in fixe and twentie degrees, by a storme he was driuen vpon a Rock in the darke night, and was forced to cast out all the goods, and cut all their Masts ouer-board; and with much adoe we escaped with their helpe (two and twentie drowned by ouer-hastinesse) to the Iunke of *Mem Taborda*. The second day after came two *Portugals* from *Quiay Panians* Iunke, and plained to vs their almost like misfortune (one gulf hauing taken away three men, and cast them a stones cast into the Sea) and the losse of the small Iunke with fiftie persons, most of which were *Christians*, and seuen *Portugals*. One of the *Lanteas* came and told of their disaduenture, the other *Lantea* lost, only thirteene men escaping, which the Countrey people carryed Captiues to *Nouda*: so that two Iunkes and a *Lantea* with aboue one hundred persons were lost, and in Munition and other goods, aboue two hundred thousand *Cruzados*, the Captayne and Souldiers hauing nothing left but that on their backs. The Coast of *China* is subiect to these strokes more then other Countries, so that none can sayle thereon one yeare without disasters, except at the full and change, they betake them to their Ports, which are many and good, without barred entries, except *Laman* and *Sumbor*. *Faria* went and anchored before *Nouda* and sent some to sound, and to take some of the people to enquire of his men, who brought a Barke with eight men and two women, one of whom (hauing first sworne by the Sea, that it below, and the winds above should pursue him if hee brake his Faith, and the beautie of the starres whose eyes beheld all wrong, as the *Chinese* requested) told him that he taking them to be Sea Routers and Robbers, had taken them and cast them in Irons. *Faria* writ to the *Mandarin* by two of those *Chinois*, with a Present worth two hundred Duckets, to returne his men, which returned the next day with an Answer written, that himselfe should come and demand Iustice at his feet, and he would doe as hee saw cause. Hee wrote againe, offering two thousand *Tais* for their Redemption, signifying that hee was a *Portugall* Merchant, which came to trade at *Liampoo*, and payd Customes without any Robbery; and that the King of *Portugall* his Lord was in true amitie with his Brother the King of *China*, and in *Malaca* his subjects vsed the *Chinois* iustly. This calling the King of *Portugall* the King of *Chinas* Brother, he tooke so hainously, that he caused the *China* Messengers to be whipped, and their leares cut, and sent them backe with a railing Answer written to *Faria*, which had so proudly blasphemed, calling his King the Brother of the Sonne of the Sunne, the Lion crowned with incredible power in the Throne of the Vniuerse, vnder whose feet all Crownes of all that gouerne the Earth, are placed with all their Seniorities, as all Writers affirme in their Histories. For this Heresie he burned his Writing with his Picture, as he would doe to himselfe, charging him presently to set sayle and be gone. *Faria* enraged, resolved to assault the Towne, hauing three hundred men, (seuentie of them *Portugals*) with the company of *Quiay Panian*, for that feat.

Nouda assaul-
ted.

Hauing therefore taken foure Barks, the next morning betimes with them, three Iunkes and a *Lorcha* or *Lantea*, he went vp the Riuer, and had fixe fathomes water and an halfe anchoring by the wals. And striking sayle without salutation of Artillery, we put off our Flagge of contract, after the *China* custome, to fulfill all complements of peace, sending new offers of loue and further satisfaction for the Prisoners. But the *Mandarine* full of indignation, hardly vsed the Messengers on the wall in sight of the Armada; whereupon, *Faria* desperate of doing any good that way leauing order with the Iunkes continually to shoot at the Enemie where they were thickest, he with his company landed without contradiction, and marched to the Towne. When we were come within little more then a Calieuer shot of the Ditch without the wall, there issued by two gates one thousand, or twelue hundred; about one hundred of them Horsemen, or Hackneymen rather (for they rode on leane Iades) which began to skirmish in such disordered sort, encountering one with another, and many of them falling to the ground, that they

see.

seemed to be of some neighbour Villages, which came more of force then with force or heart to the businesse. *Faria* expected them, encouraging his men, and making a signe to the Iunkes.

The Horsemen divided themselves, and wheeled about, as if that would have scared vs, which seeing, without effect they joyned in one bodie or heape rather; whereat the Captayne commanded all the Caléuers to shoot off at once, with such successe, that the former halfe of the Horsemen fell to ground. And then wee which till that time had stood still gaue the assault, crying on the name of Iesus, insomuch that they fled so confusedly, that they fell one vpon another, and when they came to the Bridge ouer the Ditch, they thronged themselves so that none could goe forward. In this case we came on them, and slae about three hundred, none of them scarcely drawing Sword to defend themselves. Wee prosecuted the victory to the gate, in which was the *Mandarine* with sixe hundred men, fairely mounted, armed with a Corslet of Crimson Veluet gilded, which we knew after to haue belonged to *Tome Perez*, which King *Emanuel* of glorious memorie had sent Embassadour to *China*. Hee and his began a fight with vs in the entrie of the gate, more valorous then the former, till a Boy of outs dismounted the *Mandarine* from his Horse with a Harquebuste shot thorow the breast, which caused the rest disorderly to flee, and we with them into the Towne. They casting downe their weapons ranne out at another gate toward the Countrey, none remayning. *Antonio Faria* gathering his companie together, marched orderly to the *Chifanga*, the Prison where our men were, brake vp the gates and grates, and freed his men. Then did he appoint halfe an houre to his people for spoile, himselfe going to the *Mandarines* house, and had 8000. Taies of Siluer there, & five great boxes of Muske: the rest he gaue to the Boyes, which was much Silke twisted, and vnwrought, Damaske, Satin, Porcelane; the sacke was so rich, that foure Barkes or Vessels in which they came, went foure times laden therewith to the Iunkes, that there was neither Boy nor Mariner which had not a Chift or Chifts of pieces, besides what they had secretly. Hauing spent an houre and halfe, he seeing night now come on, set fire in ten or twelue parts of the Citie, which being built of Pine timber suddenly arose into such a flame, that it seemed a Hell. And without impediment, he embarked his company with much riches, and many faire Girles tyed by foures and fives with Match, they crying ours triumphing.

It was now late, yet had *Faria* care of the wounded, which were fiftie of them, eight *Portugals*, and to burie the dead, which were nine only one *Portugall*; and keeping good watch that night, as soone as it was day, he went to a Village on the other side of the water, and found not one person in it, the houses still furnished with goods and provisions, with which he laded the Iunkes: and departed for a desert Island fiftene leagues from *Liampoo*, called *Pullo Hinhor*, where was good water and anchorage. After wee had sayled five dayes betwixt the *Iles Comolem* and the continent, *Premata Gundel* a Rouer which had done much damage to the *Portugals* in *Pactane*, *Sunda*, *Siam*, taking vs for *Chineses*, set vpon vs with two great Iunkes, in which were two hundred fighting men besides Mariners, and grappling with the Iunke of *Mem Taborda*, had almost taken it, when *Quay Panian* came to her succour with such a stroke on her quarter, that both Iunke; the three *Lorchas* which *Faria* brought from *Nonday* comming in, saued most of our men, the enemies being all drowned, and *Mem Taborda* freed. Meane while, *Premata Gundel* had with two hookes and Iron chaines fastned himselfe to *Farias* Iunke, both in the poope and prow, such a cruell battell following, that in lesse then an houre most of *Farias* men and himselfe were wounded, and twice in danger of taking, when the three *Lorchas*, and a little Iunke which *Pero Sylua* had taken at *Nonday*, came in to his succour, so that eightie sixe *Moores* which had entred *Farias* Iunke were slaine, who had cooped our men before in the poop-roome; and thence entering the *Pirates* Iunke, put all therein to the sword.

This victorie cost seuentene of ours their liues, five of them of the best *Portugall* Souldiers, besides three and fortie wounded. The prize was valued at eightie thousand Taies, the most of it *Iapan* Siluer, which the Pirate had taken in three Iunkes, come from *Firando* bound for *Chimcheo*. In the other Iunken Iunkes was said to be as much. With this prize *Faria* went to a little Island, called *Buncalon*, foure leagues off, and stayed there eightene dayes, making Cottages for the wounded, which there recovered health. Thence they departed, *Quay Panian* going in that Iunke of the Pirate, with 20000. Taies ouer and about for his part: in fixe dayes we came to the Ports of *Liampoo*, which are two Iles, in which the *Portugals* made at that time their contraction, and was a Towne of one thousand houses, and sixe or seuen Churches built by them, with Sherifs, an Auditor, Alcaldes, and other Officers; the Notaries vsing to write, *I. N. publike Notarie for the King our Lord, in this Citie of Liampoo*, &c. as if it had bene seated betwixt *Santarem* and *Lisbon*: and such was their forwardnesse, that some houses cost three or foure thousand *Cruzados*, all which were razed afterwards by the *Chinois*; so vncertaine are the things of *China* (which in these parts are so esteemed) so subiect to disastres and disaduentures.

When *Faria* was come to *Portas de Liampoo*, he sent *Mem Taborda*, and *Anriques* first to acquaint the Townes-men what had passed, who sent *Ieronimo do Rego* with two *Lancas*, to thanke him for the bountie shewed in the case of *Coin Acem*, and with refreshings; and for the businesse

businesse at *Nonday*, he need not be afraid there to winter, the King of *China* being as they said, lately dead, and ciull warres succeeding, thirteene competitors being in *Armes* to enforce their pretended right: and that the *Turan Nay*, which was next person to the King in all the Go- uernment, with meere and mixt Empire of Maiestie Regall, was besieged in the Citie of *Quo- anly*, by *Prechan Muan* Emperour of *Cauchinas*; in whose fauour it is holden for certaine, that the King of *Tartaria* is comming with an Armie of nine hundred thousand men; and that in this troubled estate *Nonday* would not be thought of, which was in comparifon of many other Cities in *China*, lesse then *Oeiras* compared with *Lisbon*. He was fixe dayes after with great triumph and glorious shewes, made of his owne Fleet, and of the many Boats, Barkes, and Citi- zens which came to fetch him, there being three hundred men in festiuall apparell, with many Gold Chaines, and gilded Swords, till he came into the Port, in which rode in a rew, twentie six Ships, and eightie Iunks, besides a greater number of smaller vessels, fastned one before another in two wings, making a street betwixt them, adorned with Laurell, and other greene boughes, and sweet herbs, the Ordnance thundring on both sides a congratulation. The *Chinois* wondred, and asked if he were Brother or neere Kinsman to their King, they receited him in such honour: *Nay*, said a conceited *Portugall*, but his father shooed the Kings Horses, and therefore is he wor- thie of this honour. Hereat they were more then amazed, and said, There were great Kings in the World, of which their Authours had made no mention, and the King of *Portugall* seemes one of them, and much to exceed the *Cauchim*, or the *Tartar*, and it were no sinne to say he may hold compare with the Sonne of the Sunne, the Lion crowned in the Throne of the World. Others confirmed the same, alledging the great riches which the bearded men generally posses- sed. A glorious *Lancea* was purposely adorned for his person in which hee went, with many Muscull Instruments of the *Chinas*, *Malayos*, *Champaas*, *Siamites*, *Borneos*, *Lequios*, and other Nations which there secured themselues vnder the *Portugals*, for feare of Routers which filled those Seas.

*I should wearie you to let you see the rest of this pompous spectacle, and more to heare their Orations preferring him before Alexander, Scipio, Annibal, Pompey, Cæsar: Neither will Religion let mee goe with him to their Masse: nor doe I euer dine worse then at solemne Feasts; and others will grudge me a roome at Comedies: all which pompes I will leaue to our Author, enlarged by the Spanish translator, Canon of the Church of Arbas, as dedicated to Manuel Seuerin de Faria. There hee stayed five moneths, spending the time in Hawking, Hunting, Fishing, Feasting. Quia Panian in this time dyed. After hee made ready to goe to the Mines of *Quoangiparu*. Others dissuaded him by reason of warres in those parts, and a famous Pyrat called *Similan*, told him of an Iland called *Calcmpluy*, in which seuentene Kings of *China* were buried with much treasures, in Vests, and Idols of Gold, and other incredible riches; which hee on no other testimonie embraced, (without con- sulting with his friends, who not a little blamed him therefore) and went with *Similan* in search of this Iland, setting out May the fourteenth, 1542.*

Currents in
in the Bay of
Nanquin.

He set forth with two *Panouras*, which are as it were Frigots, but somewhat higher: Iunks he vsed not, both for secrecie, and because of the Currents which set out of the Bay of *Nanquin*, which great ships cannot stemme, by reason of the ouer-flowings from *Tartaria* and *Nixibum Flaon*, in those moneths of May, Iune, and Iuly. He had with him, fixe and fiftie *Portugals*, with a Priest, and fortie eight Mariners of *Patane*, and fortie two Slaues: more our Pilot *Similan* would not admit, fearing suspition in trauersing the Bay of *Nanquin*, and entry of many Riuer much inhabited. That day and night wee cleared the Iles of *Angitur*, and followed our voyage thorow a Sea before neuer sayled by *Portugals*. The first five dayes, we sayled with good winde, in sight of land to the entrie of the Bay of *Nanquins* fishings, and passed a gulfe of fortie leagues, and had sight of a high Hill called *Nangafu*, alongst which we ranne to the North five dayes; at the end whereof, *Similan* put into a small Riuer, the people whereof were white, of good sta- ture, with small eyes like the *Chinois*, but differing in speech and behaiour. After three dayes the tempest ceasing, we set sayle East North-east, seven dayes together in sight of land, and cross- ing another gulfe, there was a straight open to the East, called *Silempaquim*, ten leagues in the mouth, within which we sayled five dayes in sight of many Townes and Cities very faire; and this Riuer or straight was frequented with innumerable shipping; insomuch that *Faria* was a- fraid to bee discovered, and would needs against *Similans* minde turne some other way. Thus out of the Bay of *Nanquin* (*Similan* telling them of a moneths worke of sayling by the Ri- uer *Sumbepadan*, one hundred and seuentie leagues distant thence to the North) wee sayled five dayes, at the end whereof wee saw a very high Hill called *Fanius*, and comming neere it, entred a goodly rode, where one thousand ships might ride at anchor. Wee sayled thence thirteene dayes along the coast, and came to the Bay of *Buxipalem* in 49. degrees, where wee found it som- what cold and saw Fishes of strange shapes, some like Thornbacks, about foure braces or fa- thoms compasse, flat nosed like an Oxe; some like great Lizards, speckled blacke and greene, with three rewes of prickles on the backe, like bristles, three spannes long, very sharpe, the rest of the body full, but of shorter; these Fishes will contract themselues like Hedge-hogs, and looke fearefully; they haue a sharpe blacke snout with tuskes, after the manner of a Bore, two spannes long.

long. Other deformities and diuersities of Fishes we saw. Fiftene leagues further, we came to an another fairer Bay called *Calnidan*, fixe leagues in compasse set round with Hills, diuersified with Woods and Riuer, foure very great.

Similan sayd that the filth of dead Carcasses of creatures, proceeding from the ouerflowings, specially in Nouember, December, and Ianuarie, at the full of the Moone, caused the generation of such diuersitie of Fishes and Serpents in that Bay, and the former, which were not seene in other parts of that Coast. *Faria* asked him whence those Riuer came, and hee said that he knew not, but if it were true which was written, two of them came from a great lake called *Moscumbia*, and the other two from a Prouince of great Mountaines, which all the yeere were couered with snow, called *Alimania*, and in Summer when great part of the snow was melted, they became so impetuous, as wee now saw: and for that Riuer in the mouth whereof we were entred, called *Paatebenam*, wee were now in the name of the Lord of heauen to turne the Prow to the East, and East South-east * to search againe the Bay of *Nanguim*, which we had left behind two hundred and sixtie leagues, all which way we had made higher then *Calempluy*. The second day we came to a high Mountaine called *Botinasau*, stored with diuers kindes of wilde beasts, which continued neere fiftie leagues and fixe dayes sayling: and after came to another Hill as wilde as the former, called *Gangitanou*, and all the way forward was mountainous, and so thicke of trees that the Sunne could not pierce. *Similan* sayd, that in ninetie leagues space there was no habitation, and in the skirts thereof lined a deformed sauage people onely by their Hunting, and some Rice which they got in *China*, by exchange of wilde beasts skinnies, which hee sayd came to aboue a million yeerely. Of these *Gigahos*, wee saw a bearded youth with fixe or seuen Kine before him, to whom *Similan* made a signe, and hee stayed till we came to the Bankes side, and shewing him a piece of Greene Taffata (which hee sayd they much esteemed) with a harsh voyce he sayd, *Quiten paran fausan*, words which none vnderstood. *Faria* commanded to giue him three or foure Couados of the taffata, and fixe Porcelanes, which he receiued with much ioy, saying, *Pur pacam pochy pilaca hunangue doren*, signing with his hand to the place whence hee came, and leauing his Kine, he ranne thither. He was cloathed with a Tygers skin, the hayre outward, his armes, head and legges bare, with a rude pole in his hand; well shaped, seeming ten palmes or spans long, his hayre hanging on his shoulders. Within a quarter of an houre hee returned with a liue Deere on his backe, and thirteene persons with him, eight men and fife women, with three Kine tyed in coards dancing at the sound of a Drum, giuing now and then fife strokes on it, and other fife with their hands, crying aloude, *Cur cur binau falem*. *Antonio de Faria*, caused to shew them fife or fixe pieces and many Porcelanes. All of them were cloathed in like manner, only the women had on their wrists grosse bracelets of Tin, their hayre longer then the men, and full of Flowers, and on their neckes a great neck-lace with coloured Shells, as big as Oyster-shells. The men had great poles in their hands, furred halfe way with such Pelts as they wore; they were strong set, with thicke lippes, flat noses, great open nostrils, bigge faces. *Faria* caused to measure them, and none of them were higher then ten spannes and a halfe, one old man nigh eleuen, the women not ten: but I suppose the most sauage that euer yet were discouered. *Faria* gaue them three corges of Porcelane, a piece of Greene Taffata, and a basket of Pepper; and they fell on the ground, and lifting vp their hands with their fists shut, sayd, *Unanguahilen opomguapan lapau, lapau, lapau*. They gaue vs the three Kine and the Deere, and after many words, in three houres conference returned with like dance as they came.

Wee followed our way fife dayes more vp the Riuer, about fortie leagues, in which we had sight of that people, and sixteene dayes more without sight of any, at the end of which we came to the Bay of *Nanguim*, hoping in fife or fixe dayes to effect our desires. *Similan* willed *Faria* not to let his *Portugals* be seene. And hauing sayled fixe dayes East and East North-east, we had sight of a great Citie called *Sileupamor*, and entred into the Port two houres within night, being a faire Bay almost two leagues in circuit, where abundance of shipping rode at anchor, seeming about three thousand: which made vs so afraid, that out againe we went, and crossing the Riuer (which may bee about fixe or seuen leagues ouer) wee ranne alongst a great Champaine the rest of the day with purpose to get some refreshing, hauing passed thirteene hungry dayes. We came to an old building called *Tanamadel*, and got prouision to our mindes. This place, the *Chinois* which wee found there, told vs, belonged to an Hospitall two leagues thence for entertainment of the Pilgrims, which visited the Kings Sepulcher. Wee continued our voyage seuen dayes more, hauing spent two moneths and a halfe since wee came from *Liamppoo*, and now *Faria* could no longer conceale his discontent, that hee had thus followed *Similans* proiect, and receiuing of him answer little to the purpose, had stabbed him with his Dagger if others had not interposed *Similan*, the night following as wee rode at anchor neere the land, swam a shoare, the watch not perceiuing, which *Faria* hearing was so impatient, that going on shoare to seeke him, hee returned frustrate, and found of his fixe and fortie *Chinois*, two and thirtie fled. Full now of confusion, it was by counsell resolved to seeke *Calempluy*, which could not be farre off: and the next night entred a Barke riding at anchor, and tooke fife men sleeping therein; of whom hee learned

The speech
betwixt *Faria*
and an Hermit

Absolons vowes

Compleat hy-
pocritic.

This Iland was seated in the midst of the Riuer, and seemed to bee a league in Compasse. Hither came *Faria* with trouble and feare, three houres within night, anchoring about a chamber shot from it. In the morning it was agreed, first to goe about it to see what entrances it had, and what impediments might befall their designe. The Iland was all enuironed with a rampire of hewen Marble, fixe and twentie spannes high, so well cut and set together, that all the wall seemed but one piece, the like whereof wee had neuer seene in *India*, or elsewhere: from the bottome of the water to the brim, it containd other fixe and twentie spannes. In the top was a border of the same worke round ingirting it, like a Friers girdle, of the bignesse of a rundlet of twelue gallons, on which were set grates of Latten turned, euery fixe fathoms fastened into holes of the same Latten; in each of which was the Idoll of a woman, with a round ball in her hands, none knowing what it signified. Within these grates, was a row of many Monsters of cast Iron, which in manner of a dance hand in hand, compassed the Ile round. Further inwards from those monstrous Idols, in the same ranke, was another of Arches of rich worke pleasant to behold. And all from hence inward, was a groue of dwarfe Orange-trees thicke set; in the midst whereof were builded three hundred and sixtie Hermitages, dedicated to the Gods of the yeere, whereof those *Paynims* haue many fabulous praises. A quarter of a league higher, on a hill to the East, were seene buildings with seuen fronts of houses like Churches, all from the top to the bottome wrought with gold, with high Towers seeming Bell-steeple; and without, two streets with Arches which encompassed these buildings, of the same worke with the fronts; and all from the highest top of the steeple pinacles to the bottom wrought with gold; whereby we iudged it some sumptuous and rich Temple.

After this view taken, *Faria* resolved (though it were late) to goe on shoare, to see if he could speake with any in those Hermitages; and so (leauing sufficient guard in the Barks) with fortie Souldiers, twentie Slaues, and foure *Chinois*, (which knew the place, and had bene sometimes there, and might serue vs for Interpreters) he committed the two Barks to Father *Diego Lobato*, and entred at one of the eight Entrances; walking thorow the Orangetto-groue to an Hermitage, two Caliuier shots from our landing place, with the greatest silence that might bee, and with the name of *Iesus* in our heart and mouth. Hauing yet seene no person, hee felt at the doore of the Hermitage with his Halberd, and perceiued it locked on the inside: hee bade one of the *Chinois* knocke, which hauing done twice, he heard an answer within answering, *Praised bee the Creator which gilded the beauntious Heauens, goe about and I will know thy businesse*. The *Chinois* went about and entring the backe doore, opened that where *Faria* stood, who with his companie going in, found one man seeming aboue one hundred yeeres old, in a long Russet Damaske garment, by his presence seeming Noble (as after wee learned he was) who seeing such a troupe fell downe, trembling hand and foot. A good while it was before hee could speake, and then asked what wee were, and what we sought. The Interpreter answered by *Farias* command, that hee was the Captaine of these strangers of *Siam*, who bound for the Port of *Liampoo* in trade of Merchandise was wracked at Sea; hee and these escaping miraculously, and therefore vowing to come to that Holy land on Pilgrimage, to praise God for deliuerance from so great a danger, and was now come to fulfill it; and withall to demand somewhat in almes to relieue him for his returne, protesting after three yeeres to restore it double whatsoever hee now tooke. *Hiticon* (that was his name) answered, *I haue well heard what thou hast said, and that damnable designe whereto thy blindness (as the Pilot of Hell) hath drawne thee and thine associates to the bottome of the lake of night. For in stead of thanks for so great a benefit, thou comest to rob: and what I pray thee will the Diuine iustice repay thee at thy last breath! change thou thy euill purpose, and (beleeue me) God will change thy punishment*. *Faria* prayed him, hee would not bee angry, saying, hee had no other remedie of life: whereat the Hermite lifting his hands and eyes to Heauen, sayd, weeping. *Blessed bee thou Lord, which sufferest on earth men, which take for remedie of life thine offences, and for certaintie of glorie will not serue thee one day*. And then turning his eyes to the companie which were rising the Hangings and Chests, taking the siluer from amongst the bones of the deceased therein, hee fell twice from his seate with grieve; and pensuely put *Faria* in minde of his last breath, of restitution, of penance perpetuall to his flesh, and liberall and discreet communicating to the poore, that the seruuant of night should haue nothing to accuse him in the day of account: praying him also to command his companie, to gather vp the bones of the Saints, that they should not lye contemptible on the ground. *Faria* gaue him many good words and complements, professing himselfe (which hee whispered neerer) sorrie of what had passed, but if hee should not doe it, his companie had threatened to kill him. If it bee so, said the Hermit, then shall thy paine bee lesse then these ministers of night, whom as hungry Dogs, it seemes all the siluer of the world would not satisfie.

Thus with many good words hee tooke leaue of the Hermit (hauing taken all they could get) who told him his knowledge might make his sinne more penall. *Nuno Coelho* praying him not to be

So angry for so small a matter, hee replied, *More small is the feare which thou hast of death, when having spent thy life in foule facts, thy soule shall stand as foule at the passage of this dung-hill of thy flesh.* And if thou seekest more Siluer to fill thy infernall appetite, thou mayst finde in the houses adjoining enough to make it split, as well in danger of Hell for this already, saue that more burthened thou shalt descend swifter to the bottome. Pray, sayd Coelbo, take all in patience, for so God hath commanded in his holy Law : the Hermit shaking off his head, sayd, I now see that which I neuer thought to haue heard, *Inbred wickednesse and vertue fauned, the same man stealing and preaching :* and turning to Faria, prayed him that hee would not suffer them to spet on the Altar, being liefer to dye a thousand times then to see it, which he promised. Hee then demanded of Hiti-
 10 con, what persons liued in all those houses ; who answered, three hundred and sixtie Talagre-
 pos onely, and fortie Menigrepos which serued them without, for their prouision, and the care of the Sicke. Hee asked if the Kings vsed to come thither : no sayd he, *The King being sonne of the Sunne, can absolue all and none may condemne him.* Asked of their Armes, hee sayd, *To goe to Heauen, there needed not armes to offend, but patience to suffer.* For the mixture of that Siluer with dead bones in the chests, hee answered, that it was the *Almes which the deceased carryed with them, to provide them of necessities in the heauen of the Moone.* Asked of women with them, hee sayd, that the *Bee stings those which eat the honey, and pleasures of the flesh needed not to the life of the Soule.* And thus parted hee from the Hermit with embraces, with purpose to returne the next day (it being now night) to the other houses, and not taking aboard with him this
 20 Hermit, as hee was aduised, saying, his gowtie legges could carrie no tydings of vs : which yet hee did, creeping to the next, and bidding him goe call the Bonzi.

The Hermitages, Hermits & attendants, as Lay brethren. Papall power.

For an houre after midnight, wee saw fires in a rew, which our Chinois told vs, were signes of our discouerie, and therefore aduised vs to haste away. Faria was awakened, and would needs
 a shoare with fixe men, and ranne like a mad-man from one place to another : his companie requested him to haste away, and he answered, for his honour hee would first see the danger, and
 intreated them to stay one halfe houre, and swearing hereto, away hee goeth, and followes the
 sound of a Bell to an Hermitage, in which were two men in religious habits ; the place was richer then the former wee had beene in. They tooke thence an Idoll of Siluer from the Altar
 with a myter of Gold on his head, and a wheele in his hand, and three Candlesticks of siluer
 30 with long chaynes ; and taking the two Hermits with them, returned aboard the Barkes with great haste. Of one of these, they learned that *Pilan Angiroo* had come to the house of the Sepulchers of the Kings, and cryed out to them to awaken out of their sleepe, telling them of their oath to the Goddesse *Amida*, of Strangers with long beards and Iron bodies, which had robbed the Saints, and would kill them all, whence followed the fires, and sending to giue notice to the Cities *Corpitem*, and *Fumbana* for ayde, their Religion prohibiting them to handle any thing which might draw bloud. Faria now hauing gone downe the Riuer a great way, was much enraged for omitting such oportunitie, plucking his beard, and beating himselfe with anguish, till not long after his heate was cooled.

They are discovered.

§. III.

Their Shipwracke in which Faria and most of them were drowned ; the miserable wandrings of the rest to Nanquin : their Imprisonment, sentence and appeale to Pequín ; rarities obserued in those places and wayes ; of the beginnings of the China Kingdome, and of their admirable Wall.

50 Euen dayes wee sayled thorow the Bay of *Nanquin*, the force of the current carrying vs more speedily, and came all discontent to a Village called *Susoquerim*, and there provided our selues of victuall and instruction, and entred into a straight called *Xalingau*, in which wee ranne in nine dayes one hundred and fortie leagues, and turning to enter the same Bay of *Nanquin*, which was there ten or twelue leagues wide, wee sayled with
 Westerly windes thirteene dayes : and being in the sight of the Mines of *Conxinacan* in 41. degrees and two thirds, there a *Tusan* or tempest from the South, tooke vs with windes and raines
 seeming more then naturall, and the winde chopped into the North North-west, the Sea going so high that (except our prouisions and Chests of plate) we threw all into the Sea, cut both
 our masts ouer-board, and about midnight heard a great cry in the *Panira* of *Antonia de Faria*,
Mercy Lord God, whereby wee imagined shee was cast away ; we seconded the same cry, but
 heard no answer. Our Barke also the next day, split on a Rocke, and of fiew and twentie *Portu-*
 60 *gals*, eleuen were drowned, besides eighteene *Christian* boyes, and seuen *China* Mariners. This hapned the fifth of August, 1542.

cast on shoare, to the renewing of our sorrow, and the next day buried them, that the Tigris (of which there are many) should not eat them. In this, hauing nothing but our hands to doe it, and they thirtie fixe now stinking, wee spent the most part of the day. Thence wee went Northward thorow the Woods three dayes, till wee came at a straight, without sight of any person. In swimming ouer three men and a boy were drowned, being faint, the current strong, and the water somewhat spacious: the men were two brethren *Belchior* and *Gaspar Barbosa*, and *Francisco Borges Caycira*, all of *Ponte de Lima*, and of good account. Wee which remaind (eleuen men and three boyes) passing that obscure nights winds, raines, and cold, imitated by our disconsolate sighs, teares, and feares, saw before day a fire Eastward, and went right towards it, commending our selues to God our only hope. And traueiling along the Riuer, wee came in the euening where five men were making Coles, and casting our selues at their feet, desired them to take pitie on vs, and helpe vs to some place where wee might finde reliefe. They gaue vs a little Rice and warme water, and shewed vs the way to a Village where was an Hospitall, to which wee came an houre within night, and found there foure men appointed to that charge, which vsed vs charitably.

The next day they asked what wee were, and whence: and wee told them, strangers of *Siam*, which came from the Port of *Liampoo* to the fishing at *Nanquim*, where by tempest we lost all but our battered flesh. They asked what wee intended to doe, and wee answered, to goe to *Nanquim*, to get passage to *Cantan*, or *Combay*, where our Countrey-men haue trade by licence of the *Aitao* of *Paquim*, vnder the shadow of *The Sonne of the Sunne, the Lion crowned in the Throne of the World*; for whose sake we desired them to let vs stay there till we had recouered strength to trauell, and to giue vs some clothing to couer vs. They carried vs about the Village, and begged some old clothes and victuals, and two Taeis in money for our reliefe, and gaue vs two Taeis of the House; and with words of much comfort to trust in God, they gaue vs a Letter of commendation to the Hospitall of *Sileyiacau*, which was in a great Towne three leagues thence, and had better maintenance. Thither we went, and shewed our Letter from the Overseers of *Buatendoo*, in the said Village of *Cathoran* to the Officers of this house, which fate then at Table in consultation, and the Scribe reading the Letter, they accommodated vs in a neat room with fourteene Beds, a Table, and many Stooles, and Meate; and next morning examined vs, wee answering as before. They gaue charge to a Physician to cure vs, and wrote our names in a Booke, to which we subscribed. In eightene dayes wee all recouered, and went thence to a place called *Suzanganee*, five leagues off, and sate downe wearie at a Well, where one came to vs with a handful of Wheat eares, which he wetted in the water, and adured vs holding the same in our hands, by these substances of bread and water, which the high Creator had made for the sustenance of man to tell the truth what we were, &c. which we did, answering as before; and he gaue leaue to his neighbours to relieue vs. They layde vs in a Church Porch, and gaue vs victuals, and the next day we begged from doore to doore foure Taeis, which well helped our wants.

Thence we went two leagues to *Xiangulee*, with intent to goe to *Nanquim*, one hundred and fortie leagues distant. Comming thither late, three boyes which were feeding Cattell, ranne into the Towne with an out-crie of *Theeues*; the people running out, and so welcomming vs, that one of the boyes died with the blowes. They kept vs two dayes in a Cisterne of water vp to the waste, full of Horleaches, without victuals, and our hands bound; whence by a man of *Suzanganee*, wee were freed, reporting better things of vs. Thence wee went to *Fingmilan* (in the way finding good reliefe at a Gentlemans house) still auoyding Cities and Townes of note, for feare of stricter iustice, two moneths holding on our way, sometime in, sometimes out, from Village to Village, one of which was *Chautir*, where a woman was then buried which had made the Idoll her Heire, and we were inuited as poore men to eate at her Graue, and had fixe Taeis giuen vs to pray for her soule. At *Taypor* an Officer charged vs to be Rogues, begging against the Law, and therefore layed vs in Prison, where we continued fixe and twentie dayes, in which *Rodrigues Brano*, one of our companie died. Thence wee were sent to *Nanquim*, and there continued fixe weekes in a miserable Prison (in which was said to be foure thousand Prisoners) where two of our companie and a boy died of the whipping, and the rest hardly escaped; being besides sentenced also to haue our thumbs cut off as theeues.

After this bloody whipping, they brought vs to a house within the Prison where wee were cured, being as it were an Hospitall for the sicke, where in eleuen dayes wee were pretily well recouered, but lamenting the cutting off our thumbes according to the rigour of the Sentence which had bene giuen, one morning came in two honourable persons which were Procurers of the poore. These questioned vs of our case, and hearing the same, made a Petition to the *Chæm* on our behalfe, and the eight *Conchacis*, which are as it were Criminall Iudges; and being there delayed, they made another Petition to another Table, called *Xinfan nicor pitau*, where are foure and twentie *Talagrepes* assistants, austere Religious men, as *Capuchines* amongst vs, which reuiue the cases of the poore, which prohibited the *Chæm* to proceed, and granted an appeale to the *Aitau* of *Aitau* in *Pequim* to moderate the Sentence, which the two Procurers brought vs.

Wee

Wee and thirtie others were embarked, chained with long chaines, the two Procurers procuring vs some clothing, and Rice, and commending vs to *Chifu*, the Officer or Capitaine appointed to carrie vs, with a Certificate in our behalfe to procure vs almes. The Riuer being then high swollen hindred our iourney. Three dayes wee stayed at a Village called *Minca: ntem*, where *Chifu* dwelt, and embarked his wife and children; wee were tyed to the seats where wee rowed, and could not haue perfect sight of the Cities, yet thus much wee obserued. *Nanquin* is in 39. degrees and a third, washed by the Riuer *Batampina*, which signifieth *The flower of fish*: which Riuer, as I was then told and after saw, comes from *Tartaria*, out of the Lake *Fanostir*, nine leagues from the Citie *Langame*, where *Tamerlane* King of the *Tartars* resided. This Lake is eight and twentie leagues long, and twelue broad, very deepe, and yeelds fine Riuers; first, this of *Batampina*, running thorow the midst of *China* three hundred and sixtie leagues, and entering the Bay of *Nanquin* in 36. degrees. The second *Lechune* which goeth alongst the Hills of *Pancruum*, & diuiding the Land of *Cauchim*, and *Catebenan*, which within the Countrey confines with the Kingdome of *Champaa* in 16. degrees. The third is *Tauquiday*, that is, *The mother of waters*, passing West North-west by the Kingdome of *Nacataas* (a Land whence *China* was peopled) and falls into the Sea in the Kingdome of *Sornau*, or *Siam*, by the Barre of *Cuy* an hundred and thirtie leagues beneath *Patane*. The fourth Riuer is *Batobasoy*, which passing by the Prouince of *Sansim* (which was drowned *An. 1556.*) goeth into the Sea by the Barre of *Cosmim* in the Kingdome of *Pegu*. *Leysacotay* is the fifth, runneth Eastward to the *Archipelagus* (as the *Chinois* say) of *Xinxinpon*, which confineth the *Mosconites*, entering into a Sea innavigable, as being in 70. degrees of latitude. The *Chinois* affirme, that in *Nanquin* are eight hundred thousand households, foure and twentie thousand houses of *Mandarines*, sixtie two great market places; one hundred and thirtie shambles, each hauing eightie blockes; eight thousand streets, of which the sixe hundred principall haue grates of Latten on both sides all alongst; two thousand three hundred *Pagodes* or Temples, one thousand of which are Monasteries of Religious persons, richly built, with Towres of sixtie or seuentie Bells of Metall and Iron, which make a noise horrible to heare; thirtie Prisons great and strong, each hauing two or three thousand Prisoners, and an Hospitall. The houses of the *Mandarines* are of earth, encompassed with Walls and Ditches, with faire Bridges, and rich Arches. The principall Magistrates haue high Towers with gilded pinacles, where are their Armories and Treasures. The Street-arches with their night shut Gates, their new and full Moone feasts, incredible fishings, their ten thousand Silke-loomes, one hundred and thirtie Gates in the strong wall, with as many Bridges ouer the ditch (a Porter, and two Halbardiers in each to see what goeth in or out) twelue Fortresses with Bulwarkes and Towers, but without Artillerie, the value to the King three thousand Cruzados a day, or two thousand Taeis, I can but touch. The rarities of *China*, compared with the things seene at home, seeme doubtfull or incredible.

In the first two dayes wee saw in our iourney by the Riuer no notable Citie or Towne, but of Villages a great quantitie which seemed to be of Fisher-men and Labourers, and within Land as farre as we saw, appeared woods of Pines and other trees, Orange groues, fields of Wheat, Rice, Millet, Panike, Barley, Rie, Pulse, Flaxe, Cotton, and Gardens with houses for the *Grandes*. Cattell appeared alongst the Riuer as much as in *Prete Johns* Countrey. On the tops of Hills were seene Temples with gilded * Steeples shining farre off. On the fourth day we came to a good Citie called *Pocasser*, twice as big as *Cantan*, well walled with Townes and Bulwarkes, in manner like ours, with a Hauen before the wall of two Falcon shots long, fastned with Iron grates in two rewees, with Gates for the entrance and vnloading of ships, which come thither from all parts. In the end of the Towne on a Mount stood a Castle with three Bulwarkes and five Towers, in one of which the *Chinois* told vs, that the Father of this King held Prisoner nine yeeres a King of *Tartaria*, poisoned at last by his owne vassals, vnwilling to giue so much to redeeme him as was demanded. In this Citie, *Chifu* gaue leaue to three of vs nine, to goe (with foure Halbardiers to guard vs) and begge Almes, which in sixe or seuen streets gat the worth of twentie Cruzados in clothes and money, besides Flesh, Rice, Fruits, and Meale; halfe of which our Guard had according to the custome. They carried vs to a Temple where was great concurse of people that day, being solemne to that Sect of *Tauhinarel* (one of their 32. *Gentile Sects.*) That House they said had bene the Kings, and that this Kings Grand-father was borne there, his Mother dying in child-birth, in honour of whose death and buriall in the same chamber he had dedicated this Temple in that Palace. All the Building with the Offices, Gardens, and all the appurtenances are founded in the aire on three hundred and sixtie Pillars (each of one stone) seuen and twentie spannes high, bearing the names of the three hundred and sixtie dayes of the yeere; and in each of them is a feast with much almes, bloody Sacrifices, and dances to the Idoll of that day and Pillar, which stands therein richly enshrined, with a Siluer Lampe before him. Beneath goe eight streets or wayes enclosed on both sides with Latten grates, with doores for the people which come to those feasts.

Ouer the house where the Queene was buried was a round Chappell all lined with Siluer, seeming richer in the worke then matter. In the midst was a siluer Throne of fifteene steps, round

The Iesuits place this Citie in 32. and in other places they likewise disagree in their calculation. The reason I suppose is, that *Pinto* neuer obserued the height by Instrument, nor perhaps had skill thereby: this he confessed, cap 105. pag. 222. but followed the Maps which at his returne he saw, which haue placed *Nanquin* in that height, falsely, as I conceiue to keep others from the true knowledge of these parts; a thing visuall in the old Maps of the East and West parts of the World; and sometimes they did graduate places falsely of ignorance.

Nanquin described: See of it in *Pantoia*.

Queens siluer Chappell, and the riches and Images therein

to the top encompassed with fixe rewes of siluer grates with the tops gilded. On the highest of them was a great Globe, and thereon a Lion of siluer, bearing vp a chist of Gold three spans square, in which they said were her bones, by the blind people worshipped as great Reliques. There hung on foure bluer tyres which crossed the Houle, fortie three siluer Lampes (so many yeares she liued) and seuen of Gold in memory of her seuen Sonnes. Without at the entry were two hundred fiftie three siluer Lampes great and rich, which the *Chaens* and great mens Wiues presented in her honour. Without the doores were in fixe rewes round about Statues of Giants fiftene spans high, well proportioned of Brasse, with Halberds and Maces in their hands, which the *Chinois* said were twelue hundred. Amongst them were foure and twentie Serpents of Brasse very great, each hauing a woman sitting thereon with a Sword in her hand of the same metall, and a siluer Crowne on the head: *so many had sacrificed themselves at her death to doe her seruice in the next World.* Another compasse enuironed that of the Giants, all of triumphant Arches gilded, with a great quantitie of siluer Bels hanging on siluer chaines, which by the motion of the Aire continually yeilded a strange sound. Without those Arches in the same proportion stand two rankes of Latten grates encircling the whole worke, set in spaces with Pillars of the same, and thereon Lions set on balls, which are the *Armes of the Kings of China.*

The Iesuits say
his armes are
golden Dra-
gons.
Monstrous sta-
tues.

At the foure corners were placed foure Monsters of Brasse, one (which the *Chinois* call the *Denourring Serpent of the deepe Cane of the House of smoke*) in the figure of a dreadfull Serpent, with seuen Serpents comming out of his brest, spotted with greene and blacke with many prickles more then a span long, quite thorow the bodie like Hedge-hogges, each hauing in his mouth a woman ouerthwart, with disheuelled haire, looking deadly. The old or great Serpent holds in his mouth a Lizard halfe out, of about thirty spans in length, as bigge as a Pipe, with nose and lips full of blood, and in his hands he holds a great Elephant so forcibly, that his entrailes seeme to come out of his mouth; all so naturally represented, that it is most dreadful to behold. The folds of his tayle were about twentie fathome long, enfolding therein another Monster, the second of the foure, called *Tarcamparoo*, which they say was the *Sonne of that Serpent*, which stands with both his hands in his mouth, which is as bigge as a gate, the teeth set in order, and the blacke tongue hanging out about two fathomes. Of the two other, one was the *Figure of a woman*, named *Nadelgan*, seuentene fathomes long, and fixe about, from whose waste issued a beake or face about two fathomes, which cast smoake out of the nostrils, and flames of fire out of the mouth, which they make therein continually, saying, shee is the Queene of the Fierie Spheare, and shall burne the Earth at the end of the World. The fourth is *like a man*, set cowering with cheekes puffed like ships sayles, so monstrous that a man could not endure the sight. The *Chinois* call him *Uzanguenaboo*, and say, that it is hee which makes Tempests in the Sea, and throwes downe Houses by Land, to which the people giue much Almes not to hurt their Iunkes.

Xinligau.

The second day we went from *Pocasser*, and came to another Citie called *Xinligau*, very great, well built, walled with Tyles, ditched about; with two Castles at the end, hauing their Towres, Bul-warkes, and Draw-bridges: in the midst of each Castle was a Towre of five Lofts with many workes painted, in which the *Chinois* said, were fiftene thousand Picos of siluer, of the Rents gathered in that *Archipelago*, which this Kings Grand-father there layd vp in memory of his Sonne *Leuquinan*, which signifieth the *ioy of all*, holden for a Saint, because he dyed a Religious man, and lyes there buried in the Temple of *Quia Varatel*, the *God of all the Fishes in the Sea*, of whom they haue large Legends. In that Citie and another five leagues from it is made the greatest part of the Silke of that Kingdome, the waters there giuing quicker colours (they say) then in other parts. The Weauers Loomes of these Silkes, which they affirme thirteene thousand, pay yearely to the King three hundred thousand Taels. Going further vp the Riuer, wee came the next day Euening to a great Champaigne, continuing ten or twelue leagues, in which were many Kine, Horses, and Mares, pastured for the shambles as well as other flesh, and kept by many men on Horle-backe. These Champaignes past, wee came to a Towne, called *Iunquileu*, walled with Tyles, but without Towres or Bul-warkes.

The Spanishe
hath the Palsy,
and it seemes
a kind of Palsie
gotten by
stroke or bla-
sting of the
Aire.

Here wee saw a stone Monument with an Inscription, *Heere lyeth Trannocem Mudeliar, Vncle to the King of Malaca, who dyed before hee was reuenged of Captayne Albuquerque, the Lion of Sea Robberies.* We enquiring hereof, an old *Chinese* said, that about fortie yeares agoe, the man there interred had come Embassadour from a King of *Malaca*, to sue to the *Sonne of the Sunne*, for succour against a Nation of a Land without name, which had come from the end of the World, and taken *Malaca*, with other incredible particularities printed in a Booke which hee made thereof. Hauing spent three yeares in this Suite, and brought it to some maturitie, hee sickned of the *Aire* one night at Supper, dyed in nine dayes, and left this Memoriall.

Wee proceeded on our way the Riuer growing lesse, but the Countrey more peopled, scarcely a stones cast free of some House, eyther of a *Pagode*, or Labourer. And two leagues higher on a Hill compassed with Iron grates were two Brasse Statues standing on their feete, one of a man,

man, the other of a woman, both seuentie foure spans long with their hands in their mouthes, and puffed cheekes; fastned to Cast-Iron Pillars, seuen fathomes high. The Male was named *Quiay Xingatalor*, the woman *Apancapatur*. The *Chinois* told vs that the man was Fire-blower in Hell to torment such as in this life gaue them no Almes: the woman was the Hell-Porter, which suffered the Almes-giues to flye by a Riuer of cold water, called *Ochilenday*, and hid them their from the Deuils hurting them. One of our company laughed at this Tale, whereat a *Bonzo* was so offended, that hee set *Chifus* in rage with vs, who bound vs hand and foot, and gaue vs one hundred stripes a-piece. Twelue Priests were incensing these Monsters when wee were there with Siluer-centsours full of sweet Odours, Saying, *as wee serue thee, helpe thou vs*: another company of Priests answering: *So I promise thee as a good Lord.* And thus went they on Procession about the Hill an houres space founding certayne Bells causing a dreadfull noyse.

Two monstrous statues and their deuotions.

Hence wee passed vp the Riuer eleuen dayes, all peopled with Cities, Townes, Villages, Castles, in many places, scarcely a Calieuer shot distant one from another: and all the Land in compasse of our sight had store of great Houses, and Temples with gilded Steeples, which amazed vs with the sight. Thus wee came to the Citie *Sampitay*, where wee stayed fve dayes by reason of the sicknesse of *Chifus* Wife. There by his leaue wee went thorow the streets, a begging, the people wondering at vs, and giuing vs largely. One woman amongst others which busily questioned with vs, shewed vs a Crosse branded on her left arme, asking if we knew that signe, and wee devoutly answering, yes, shee lifted vp her hands to Heauen, and sayd, *Our Father which art in Heauen, hallowed be thy Name*, in Portugues, and could speake no more, but proceeded in *China* speech, and procured leaue to lodge vs at her House those fve dayes: telling vs she was named *Inez de Leiria*, and was the Daughter of *Thomas Perez*, which came Embassadour to *China*, and by reason of a Rebellious Portugall Captayne, hee was taken as a Spye with twelue others; so beaten that fve dyed, the other seuen hundred to diuers places, where they dyed in misery, only *Vasco Caluo*, being now left alieue. Her Father, she said, was banished to this Towne, and there marryed with her Mother hauing somewhat to mayntaine her, and by him made a Christian. They liued together many yeares like good Catholikes, and conuerted many to the Faith of Christ, in that Citie three hundred assembled on Sundayes to her house to their holies. She shewed vs an Oratorie in which was a Crosse of wood gilded, with a Candlestick and siluer Lampe. Wee asked her what they did, when they came there, and shee said, nothing but kneele before that Crosse, with their hands and eyes lifted to Heauen, and say, *Lord Iesus Christ, as it is true that thou art the true Sonne of God, conceived by the Holy Ghost in the wombe of the Holy Virgin Mary, for the saluation of Sinners, so pardon our sins, that wee may obtayne to see thy face in the glory of thy Kingdome, where thou sittest at the right hand of the Highest. Our Father which art in Heauen, hallowed be thy Name. In the Name of the Father, and of the Sonne, and of the Holy Ghost, Amen.* And so kissing the Crosse, they embraced one another and went home; alway liuing friendly with each other. Her Father (she said) had left other Prayers written, which the *Chinois* had stolne away, so that now they could say no more. Whereupon we promised to leaue her other Prayers, and taught the Christians seuen times there, and *Christopher Borrell* writ in *China* Letters the Lords Prayer, *Aue Mary*, Creed, *Salue Regina*, Tenne Commandements, and other good Prayers. Shee had giuen a Present to *Chifus* Wife to deale with her Husband to giue vs this leaue, and to vse vs kindly, and the Christians there gaue vs fiftie Taeis of Siluer, and *Inez de Leiria* other fiftie closely, desiring vs to remember her in our Prayers.

Frequencie of China people.

Sampitay.

See Mass. l. 6. these Portugall Rebels had possessed *Tamus*, and raised a Fort in the Island, whence followed that out rage to *Perez* after foure months trauell from *Canton* to the Court. *Lopez Soares* which sent *Perez* to *China*, went Vice-roy, A. 1515. *China* Christians and Christianitie.

We continued our journey vp the *Barampina*, to a place called *Lequimpan*, of tenne or twelue thousand Houses. Neere to the wall stood a long house with thirtie Furnaces for the purifying of siluer which was taken out of a Hill fve leagues distant, called *Tuxengum*; in which Mines the *Chinois* told vs, there continually laboured one thousand men, and that it yeelded to the King yearly fve thousand * *Pikes* of siluer. We departed thence in the Euening, and the next Euening anchored betwixt two small Cities standing ouer against one another, one named *Pacan*, the other *Nacan*, both well walled and builded. These two Cities occasion mee to recite what I haue heard often heard read in the thirteenth Chapter of the first Chronicle of the fourescore which they haue of the Kings of *China*; that sixe hundred thirtie nine yeares after the Flood, there was a Land, called *Guantipocau*, in which liued a pettie Prince, called *Turban*, which had by his Concubine *Nancaa*, three Sonnes, refusing to marry, and entring into Religion of the Idoll *Gizom* (still much esteemed in *Iapon*, *China*, *Cauchin-china*, *Camboia*, *Siam*, of which I haue seene many Temples) appointing his eldest Sonne by the said *Nancaa* his heire. His Mother then liuing was against this, and marryed herselfe with *Silan* a Priest, and slue *Turban*; whereupon *Nancaa* and her children fled downe the Riuer seuentie leagues, and fortified a place which she called *Pilaunera*, that is, *the refuge of the poore*. Fve yeares after *Silan* prepared a Fleet of thirtie Barkes to destroy her and all her faction, thinking that her Sons comming of age might dispossesse him. But she hauing Intelligence, hauing of men, women, and children, not aboue one thousand and three hundred persons, and but three or foure Boats not sufficient to conueigh away those few, by common consent and aduice appointed a three dayes Fast therein to begge succour

China Chronicles and Legends.

Beginnings of the Kingdome of *China*.

of God, in all which time none might eate aboue once, in paine of death. This Fast ended they cast Lots and the Lot fell on a Boy of seuen yeares old, which was also named *Silan*, whom after all Ceremonies ended they bid lift vp his hands to Heauen, and tell them some remedie to these dangers. Who prophesied Victory to her ouer the Tyrant *Silan*, commanding her to embarke hers in her Enemies Barkes, and at the sound of the waters to runne along the Land, till God shewed where shee should found a habitation of great name, which through all times should send out his mercy with voyces and bloud of strange Nations: after which words the Boy fell downe dead.

Legend of *Pe-
quim*.

The thirty Barkes came (saith the Storie) five dayes after without any people therein: for at a place called *Catchasoy*, a blacke Cloud arose ouer them, which rayned on them scalding drops, which destroyed them all. *Nancaa* with teares and thankes embarked her three Sonnes and the rest, and went downe the Riuer conducted by the sound fortie seuen dayes, and then came to the place where *Pequim* now stands. Five dayes after they came aland, was the first stone layd thereof by *Pequim*, eldest Sonne of *Nancaa*, and the Citie called by his owne name. And a siluer shield hangeth on the Arch of the chiefe gate *Pommicotay*, and hath this inscribed, in which are fortie Warders, and in the rest ordinarily but foure. The day also of the foundation (beeing the third of August) is kept with great Solemnitie, and thereon the King vseth to shew himselfe to the people. The later Kings also haue made a Law that no Strangers, except Embassadors and Slaues should enter the Kingdome. The two other Brethren founded these two Cities, called by their owne names *Pacan* and *Nacan*, and their Mother founded *Nanquin*, which tooke the name of hers.

No stranger
may enter *Chi-
na*.

IN the fift Booke of the chiefe places of that Empire, is written, that King *Crisnagol* (which reigned as we may accord our computation with theirs) about the yeare of our Lord 528. builded the wall, the people contributing ten thousand Pikes of siluer (which are fiftene Millions of Cruzados) and two hundred and fiftie thousand men (thirtie thousand Officers and the rest Labourers) which was continued seuen and twentie yeares, and then finished, being, saith that Booke the length of seuentie Iaons (euery Iaon is foure leagues and an halfe) which make three hundred and fiftene leagues. The Priests and Iles are said to contribue as many, and the King and Officers another third, so that seuen hundred and fiftie thousand men laboured therein. This wall I haue seene and measured, being generally sixe fathomes high, and fortie spannes thicke: and foure fathomes runneth a kind of Rampire, twice as thicke as the wall strengthened with a Bituminous substance on the out-side like Potters worke; and in stead of Bulwarkes it hath houses of two lofts with beames of blacke wood, called *Cambes*, that is, *Iron-wood*, seeming stronger then if they were of stone-worke. This wall or *Chanfacan* (so they call it, that is, *strong resistance*) runneth with an equall course till it encounters with Hills, which are all Chanfred and made so that it is stronger then the wall it selfe, the wall being only in the spaces twixt Hill and Hill, the Hills themselves making vp the rest.

chaens of the
wall.

In all that way are but five entrances, caused by the *Tartarian* Riuers, which with impetuous force cut the Countrey aboue five hundred leagues entring the Sea of *China*, and *Cauchin-china*: And one of them more forcible then the others enters the Kingdome of *Sornau* (commonly called *Siam*) by the *Barre of Cuy*. At euery of those five entrances the King of *China* hath one Fort and the *Tartar* another: in euery of the *China* Forts there are seuen thousand men, six thousand foot, and one thousand Horse, in continuall pay; most of them Strangers, *Mogors*, *Champaas*, *Pancrus*, *Coracones*, and *Gizares* of *Persia*, the *Chinois* being but meane Souldiers. In all the space of this wall are three hundred and twentie Regiments, each of five hundred men (in all one hundred & sixty thousand) besides Ministers, Commanders, and their retinue which the *Chinois* said, made in all two hundred thousand men, allowed by the King only sustenance, all or most of them being condemned to that seruice, and therefore receiuing no pay. And in *Pequim* is a great and admirable Prison-houle, in which are Prisoners continually for the Fabricke of this wall of three hundred thousand men and vpwards, most of them from eightene to five and fortie yeares old: whereof some are men of good qualitie, which for their ill behauiours and enormities are hither sentenced, expecting to be remoued hence to the seruice of the wall: whence they may haue returne according to the Statutes thereof made, and approoued by the *Chaens*, which therein dispense the Regall power with meere and mixt Empire. There are twelue of them which may pay to the King a Million of Gold for Rent.

§. IIII.

Minde Salt-pits: Mines of Coretumbaga, Copper-workes; Idolatry and Chri-
stianitie; China Trades, and River Faires; their comming to
Pequin, tryall and sentence. Rarities of
Pequin.

Returne to our Voyage, from Pacan and Nacan, wee passed vp the Riuer to *Min-
doo*, a greater Citie then either of the former, which on the Land side had a great
Lake of Salt-water, with great store of Salt-pits therein, which the *Chinois* said,
did ebbe and flow like the Sea, from which it is about two hundred leagues distant;
and that this Citie Rents to the King yearly one hundred thousand Tais, of the thirds of the
Salt, and as much more of the Silkes, Sugars, Porcelane, Camfire, Vermillion, Quick-silver,
which are there in great quantitie. Two leagues about this Citie were twelue long Houses, in
which many men were sounding and purifying Copper, making such a noyse with the Ham-
mers that this place (if any on Earth) may resemble Hell. In each House were fortie Furnaces,
twentie on a side, with fortie great Anvils, on each whereof eight men were hammering round,
with such quicknes as scarce permitted the eyes obseruance; so that in each house there were three
hundred and twentie continuall Labourers, besides Workmen of other kinds. Wee asked how
much Copper they might make yearly, and they answered, betwixt one hundred and ten, and
one hundred and twentie thousand Pikes, of which the King had two parts, because the Mynes
were his; the Hill where the Mine was, is called *Coretumbaga*, that is, *Riuer of Copper*, which in
two hundred yeares (so long was since the Discouery) was not emptied.

About these Houses one league neere the Riuer, wee saw on a Hill encompassed with three
rewes of Iron Grates, thirtie Houses in five ranks, very long, with great Towres of Bels
of Metall, and Cast-Iron, with gilded Pillars and carued workes, and artificiall Frontis-
pieces of stone. Here we went on Land by *Chifus* leaue, because hee had so vowed to that *Pa-
go*, which is called *Bigaypotim*, that is, *the God of one hundred and ten thousand Gods*, *Corchoo*, *Fun-
ganc*, *ginato ginaca*, strong & great (say they) about all the rest: For they hold euery thing hath a
particular God which made it and preserues it in its nature, & that this *Bigaypotim* brought forth
all of them at his arme-pits, and that of him they all hold their being, as of a father by filiall vni-
on, which they call *Byaporentesay*. In *Pegu* where I haue bene sometimes, there is a *Pagode*
like this (there called *Ginocoginana*, the *God of all greatnesse*) whose Temple was built by
the *Chinois* when they ruled in *India*, which was after their Computation accorded with ours
from *Anno Dom. 1013.* till *1072.* conquered by *Oxinagan*, whose Successor seeing how much
bloud was payd for so little good, voluntarily relinquished it. In those thirtie Houses stood a
great quantitie of Idols of gilded wood, and as many more of Tinne, Copper, Latten, Iron,
Porcelane, so many that I dare not mention the number. Wee had not gone thence fixe or seuen

leagues, when we saw a great Citie ruined with the houses and wals on the ground, seeming a
league in circuit. The *Chinois* said, that it had bene called *Cobilouzaa*, that is, *Flowre of the field*,
sometimes prosperous; and that one hundred fortie two yeares since, as is written in a Booke, na-
me *Toxefalem*, there came in company of Merchants from the Port of *Tanagarim*, a man which
wrought Miracles, in a moneths space raising vp five dead persons, the *Bonzos* saying, he was a
Witch, and because they could not hold dispute with him, prouoking the people against him,
saying, that if they did not kill him, God would punish them with fire from Heauen. The in-
raged multitude killed one *John* a Weauer, where he sojourned, and his two Sonnes in Law, and
his Sonne; which sought to defend him, and when they had gone about to burne him, in vaine,
the fire being extinct, the *Bonzos* stoned him, preaching Christ vnto them, which had come
from Heauen to dye for Sinners, and to giue life to all which professed his Law with Faith and
Works. They say, that the bodie was cast into the Riuer, which for the space of five dayes would
not runne lower, and thereby many were moued to professe that Religion: and as wee doubled a
point of Land, we saw a Crosse of stone on a little Hill environed with Trees. *Chifus* Wife fal-
ling into trauell (of which she dyed) we stayed there nine dayes, and did our Deuotions thereto,
prostrate on the Earth. The people of the Village (called *Xifangu*) maruelling, came running to
the place and falling on their knees, kissed the Crosse often, saying, *Christo Iesu, Iesu Christo*,
Maria Mican, late impone *Mondel*, that is, was a Virgin in his Conception, Birth, and after
it. They asked if they were Christians, and we affirming it, had vs to their Houses and vsed vs
kindly, being all of that Weauers Posteritie and Christians. They also confirmed that which

the *Chinois* had told vs, and shewed vs the Booke printed of his Miracles, which they said was
named *Matthew Escandel*, an Hungarian by Nation, an Heremite of Mount *Sinay*, borne at *Bu-
da*. That Booke tels that nine dayes after his death, the Citie *Cobilouzaa* shooke so, that the peo-
ple ranne out into the fields, and abode in Tents; to whom the *Bonzos* came and bid them feare
nothing, for they would beseech *Quay Tiguarew*, *The God of the night*, to command the Earth

to doe so no more, otherwise they would giue him no Almes. Thus went the Priests alone in Procession to that Idols House, and making their night-Sacrifices and Perfumes, the Earth quaked about eleuen of the clocke at night, and ouerthrew the whole Citie (one only of about foure thousand *Bonzos* remayning aliue) into a Lake more then one hundred fathomes deepe, called after this *Fiunganorsee*, that is, *punished from Heauen*.

Moueable Cities on the water.

Beauties and glories of this Riuer-Citie.

Hence we came to a great Citie, called *Iunquilnan*, very rich, with many Iunkes and Barkes, where we stayed five dayes, *Chifu* there celebrating his Wiues Exequies, and giuing vs food and rayment for her soule, freeing vs from the Oare, and giuing vs leaue to goe on Land when wee would, without our * Collers, which was very great ease to vs. Thence we went vp the Riuer, still seeing on both sides many and faire Cities and Townes, and other very great populations, 10 strongly walled, and Fortresses alongst the water with Towres and rich Houses of their Sects, with innumerable cattell in the fields, and shipping in the Riuer, in some places five hundred, six hundred, yea, one thousand sayle, in which were sold all things could be named. Many *Chinois* affirmed, that there were as many liued in that Empire on the water, as in Cities and Townes: so many in both, that were it not for the good gouernment of their Trades, they would eate one an other. As in Duckes, one trades in buying and hatching the Egges, and selling the young; another in breeding them for sale when they are great, others in the Feathers, others in the heads, and in wares, others in the Egges, &c. none interloping the others Trade vnder paine of thirtie stripes. In Hogs, one trades in selling them together aliue, others kill them, and sell them by weight, others in Bacon, others in Pigges, others in Soufe. So in fish, hee which sels fresh 20 may not sell salt, some sell them aliue, &c. and so in Fruits and other things. And none may change his Trade without license. They haue also along this Riuer of *Batampina*, in which wee went from *Nanquin* to *Pequin*, (the distance of one hundred and eightie leagues) such a number of Ingenios for Sugar, and Presses for Wines, and Oyles made of diuers sorts of Pulse and Fruits, that there are streets of them on both sides of the Riuer, of two or three leagues in length. In other parts are many huge store-houses of infinite provisions of all sorts of flesh, in which are salted and smoked Beefe, tame and wilde Hogs, Ducks, Geese, Cranes, Bustards, Emes, Deere, Buffals, Ants, Horfe, Tygres, Dogs, and all flesh which the Earth brings forth, which amuzed and amazed vs exceedingly, it seeming impossible that there should bee people in the World to eate the same. Wee saw also great store of Barkes fenced at Poupe and Prow, with Reedes of Canes full 3 of Ducks to sell, in diuers lofts ouer one another, which goe out at foure strokes of a Drumme; fixe or seuen thousand together to feed, where they set them, at the sound of the Drumme returning againe, with like exceeding crie. In the like sort they let them out to lay on the grasse. They that hatch them haue long houses with twentie Furnaces full of dung, with some hundreds of Egges couered therein, and hatched by that heate, the mouth stopped till they thinke fit time, then putting in a Capon halfe plucked and wounded on the brest, they shut it againe, and after two dayes, the Capon hath drawne them all forth, and they put them into holes provided for them.

We saw along the Riuer in some places store of Swine wild and tame kept by men on Horlebacke, in other places tame Deere kept by Footmen, all maymed in the right foreleg, that they should not runne away, which they doe when they are young. Wee saw Pennes full of little Dogges to sell, Barkes full of Pigges, others of Lizards, Frogs, Snakes, Snailles, all being meate with them. In these (being of small price) they may sell many kinds. Yea, the dung of men is there sold, and not the worse Merchandize, that stinke yeelding sweet wealth to some, who goe tabouring vp and downe the streets to signifie what they would buy. Two or three hundred sayle are seene sometimes freighted with this lading in some Port of the Sea; whence the fatned soyle yeelds three Haruefts in a yeare.

Wee came to a Faire of *China* where on the water 2000. Barkes, besides small Boats which goe vp and downe and small Barkes were assembled in one place, and made a Citie with streets in the water aboue a league long, and a third part of a league broad. These Faires are principally on the Holy day of some *Pagode*, whose Temple is by the waters side. In this *Water-citie*, by the order of the *Aitao* of *Bitampina* (who is chiefe President of the thirtie two Admirals of the thirtie two Kingdomes of this Monarchie) are sixtie Captaynes appointed; thirtie for the gouernment and ordering of the same in matters of Iustice, and other thirtie to guard the Merchants in comming safely secured from Theeues.ouer all these is a *Chaem*, which hath Mere and mixt Rule in Causes Ciuill and Criminall without Appeale. These Faires last from the new Moon to the ful, in which it is a goodly thing to see two thousand streets or ranks strait, enclosed with Barkes, most of them flourishing with Streamers and Banners, and railes painted, whereon are sold all things that can be desired, in others Mechanike Trades, & in the midst Boats going vp and downe with people to trade without any confusion or tumult. As soone as it is night, the streets are enclosed with Cables. In euery street is ten Lanthornes lighted on the Mafts (which yeelds a fairer lustre then the former sight by day) to see who goeth by and what is his businesse. In each of these streets is a Watch-bell, and when that of the *Chaems* sounds, all the rest answer with as strange an Object to the Eare as the former to the Eye. In euery of these Vowes are

Ora-

Oratories built on Barkes with gilded Tents, where the Idoll and Priests receiue the Deuotions and Offerings of the people.

Amongst other remarkable things we saw one row or street of aboue one hundred Barkes laden with Idols of gilded wood of diuers sort, which are sold to be offered in the Pagodes; and besides, feet, legs, armes, and heads, which sicke folkes offered for Deuotion. Other Barkes there are with Tents of Silke, in which Comedies and pastimes are represented. In others are sold Letters of Exchange, the Priests giuing them Bills to receiue in Heauen what their folly lay downe there, with great increase (*Our Scrineners would scarcely grow rich here with this Trade*) others are laden with skulls of dead men, they dreaming that all the Almes of those men, whose skulls these haue beene, shall belong to their soules, and that the Porter of Heauen seeing them come with thus many attending, will open to him as an honourable person: Others haue Cages of Birds, and call to men to set free those Captiues, which are the creatures of God, with their Almes which they which doe, let loose the Bird and bid him tell God what he hath done in his Seruice: others do the like with living fishes, offering their freedome to the charitable Redeemers (*which themselves will not giue them; much like the sale of Indulgences*) saying, they are Innocents which neuer sinned, which freed by Almes are let goe in the Riuer with commendations of this their Redeemers Seruice to the Creator. Other Barkes carry Fiddlers and Musicians to offer their Seruice: Others (the Priests) sell Hornes of sacrificed Beasts, with promise of I know not what Feasts in Heauen: others had Tents of sorrow, Tombes and all Funerall appurtenances with Women-mourners, to be let out for Burials: others laden with Books of all sorts of Historie, and these also haue Scriueners and Proctours; others haue such as offer their seruice to fight in defence of their honour; others haue Mid-wives, others Nurses; others carry graue men and women to comfort those that haue lost Husbands, Wiues, Children, and the like disconsolate persons: others Boyes and Girles for seruice; others offer Counsellors in Cases of Law or Learning; others Physicians: and to conclude, nothing is to bee sought on the Land which is not here to be found in this Water-citie.

Once, the cause of the greatnesse of this Kingdome of China, is this easie concourse of all parts by water and Riuers: some of which in narrow places haue bridges of stone like ours, and some made of one only stone laid ouer, sometimes of eightie, ninetie, or one hundred spannes, long, and fiftene or twentie broad. All the High-wayes haue large Causies made of good stone, with Pillers and Arches fairely wrought inscribed with the Founders names and prayes in golden Letters. In many places they haue Wels to refresh the Trauellers. And in more barren and lesse inhabited places are single women which giue free entertainment to such as haue no monie, which abuse and abomination, they call a worke of Mercie, and is prouided by the deceased for good of their soules, with Rents and mayntenance. Others haue also bequeathed in the like places, houses with Lights to see the way, and fires for Trauellers, water and Lodging. I haue in one and twentie yeares vnfortunate trauels seene a great part of Asia, and the riches of Europe, but if my testimonie be worthy credit, all together is not comparable to China alone: such are the endowments of nature in a wholesome Ayre, Soyle, Riuers, and Seas, with their Policie, Iustice, Riches and State, that they obscure all the lustres of other parts. Yet such is their bestiall and Deuillish Idolatry, and filthy Sodomitry publicly permitted, committed, taught by their Priests as a vertue, that I cannot but grieve at their vngratitude.

Departing from this admirable Citie, we sailed vp the Riuer, till on the ninth of October, on Tuesday we came to the great Citie of Pequim, whither wee were sent by Appeale. Wee went three and three as Prisoners, and were put in a Prison called *Gofania serca*, where for an entrance they gaue each of vs thirtie stripes. *Chifu* which brought vs presented to the *Aitao* our Processe signed with twelue seales from *Nanquin*. The twelue *Conchalis* which are Criminall Iudges, sent one of their company with two Notaries, and fixe or seuen Officers to the Prison where wee were, and examined vs, to whom we answered as before, and hee appointed vs to make petition to the *Tanigores*, of the holy Office by our Proctours, and gaue vs a Taell for almes, with a caueat to beware of the Prisoners that they robbed vs not; and then went into another great Roome, where he heard many Prisoners Causes, three houres together, and then caused execution to be done on seuen and twentie men, sentenced two dayes before, which all dyed with the blowes to our great terrour.

And the next day wee were collared and maniced, being much afraid that our *Calempliys* businesse would come to light. After seuen dayes the *Tanigores* of the Hospitall of that Prison came in, to whom we with pitifull lamentation gaue the Certificate which wee brought from *Nanquin*. By their meanes the *Conchalis* petitioned the *Chaem* to reuoke the Sentence of cutting off our thumbs, seeing there was no testimonie of theft by vs committed, but only our poueritie, we more needed pitie then rogour. He heard the pleading for and against vs for diuers daies, the Prometor or Fiscall laying hard against vs that wee were theues; but being able to proue nothing, the *Chaem* suspended him from his Office, and condemned him in twentie Taels to vs, which was brought vs. And at last we were brought into a great Hall painted with diuers representations of execution of Iustice for seuerall crimes there written, very fearefull to behold: and at the end a fairer gilded roome crossed the same, where was a Tribunall with seuen steps,

Bridges, and high-wayes admirable.

compassed with three rewees of grates, Iron, Latten, and blacke Wood; inlayed with Mother of pearle, hauing a Canopie of Damaske fringed with Gold and greene Silke, and vnderneath a Chaire of Siluer for the *Chiem*, and a little Table before him, with three Boyes attending on their knees richly attired, with chaines of gold on their neckes; the middlemost to giue him his Penne, the other two to receiue Petitions and to present them on the Table; two other Boyes standing at his side in exceeding rich aray, the one representing *Iustice*, the other on the right hand *Mercy*, without which conioyned, the Iudge (they say) becomes a Tyrant. (*The rest of the state and ceremonie I omit*) wee kneeling on our knees, with our hands lifted vp, and our eyes cast downe to the ground, heard gladly our Sentence of absolution. Only we were for one yeere banished to the workes of *Quansy*, and eight moneths of that yeere ended to haue free passport to goe home, or whither we would. After the Sentence pronounced, one of the *Conchals* stood vp, and five times demanded aloud if any could take exception against the Sentence: and all being silent, the two Boyes representing *Iustice*, and *Mercy*, touched each others Ensignes which they had in their hands, and said aloud, *let them be free according to the Sentence*, and presently two *Chumbms* tooke off our Collars and Manicles, and all our bonds. The foure moneths (the *Tanigores* told vs) were taken off the yeere, as the Kings almes in regard of our pouertie; for had wee beene rich, wee must haue serued the whole yeere. They gaue vs foure Tacis of almes, and went to the Captaine which was to goe for *Quansy* to commend vs to his charitie, which vsed vs accordingly.

Pequim may be called the Mother Citie of the Worlds Monarchie for the wealth, gouernment, greatnesse, iustice, prouisions. It stands in the height of 41. degrees to the North; it containeth in circuit, as the *Chinois* (and as I after heard read in a little Booke written of the greatnesse thereof, called *Aquesendoo*, which I brought with mee into this Kingdome) thirtie leagues, ten in length, and five in bredth, all which space is enuironed with two Walls, and innumerable Towers and Bulwarkes. Without is a larger space, which they say, was anciently peopled, which now hath but Hamlets, and scattered Houses, and Garden-houses (of which fixteene hundred are of principall note, in which are the fixteene hundred Proctors for the fixteene hundred Cities and Townes of note, of the two and thirtie Kingdomes of this Monarchie, which reside there three yeeres for the said Townes. Without this circuit or wall, there are in the space of three leagues broad, and seuen long, foure and twentie thousand Sepulchres of *Mandarines*, with their little gilded Chappels, encompassed with grates of Iron and Latten, with rich Arches at their entries. Neere to them are Gardens, Groues, Tankes, Fountaines; the walls lined within with fine Porcelaine, adorned also with Lions and Pinacles of diuers paintings. There are in that space five hundred Lodgings, called Houses of the Sonne of the Sunne, for entertainment of Souldiers maimed in the Kings warres (besides many others for the old and sicke) euery of which receiue their monethly allowance, and haue in them as they said two hundred men, in all one hundred thousand. Wee saw another street very long, where liued foure and twentie thousand Rowers for the Kings shipping: and another about a league long, where liued fourteene thousand Tauerners for prouision for the Court; and another where were infinite Curtesans freed from tribute (which those of the Citie pay) for seruice of the Court, many running from their husbands, and here protected by the *Tuan* of the Court, which is supreme in cases of the Kings house.

In that compasse also liue the Landerers of the Citie, which were, as they told vs, about one hundred thousand, there being many Tankes or Ponds compassed with stone and Riuer. There are therein, as that Booke sayth, thirteene hundred Noble houses of Religious men and women, which professe the foure chiefe Sects of the two and thirtie which are in that Kingdome: some of which, they say, haue about one thousand persons within them besides seruitors. There are other houses store with great walls in which are Gardens, and Groues with game for hunting; and are as it were the Halls of Companies where many resort to see Playes, and the great men make their feasts there with incredible costs. Some of these houses cost about a million, maintayned by Companies of rich Merchants, which are said to gaine much thereby. And when any will make a feast, he goeth to the *Xipatom* of the house, who sheweth him a Booke wherein is containd the order of feasts and seruices (which Booke I haue seene and heard read) of all sorts, and of what prices they are, whether Sacred to their Idols, or Secular, (of which our *Author* hath a large Chapter, here omitted.)

Now for *Pequim*, it hath three hundred and sixtie Gates, each hauing a Castlet with two Towers, and a Draw-bridge, a Notarie, and foure Warders, to take notice of those which goe in and out, and an Idoll proper according to the dayes of the yeere, euery of which is festiual in one of them. The *Chinois* reported that there are therein three thousand eight hundred Temples or Pagodes, in which are continually sacrificed birds and wilde beasts, which they say, are more acceptable then tame: those especially very faire which are of the *Menigrepos*, and *Conquais*, and *Talagrepos*, the Priests of the foure chiefe Sects, of *Xaca*, *Amids*, *Gizon*, and *Canom*. The streets are long and large, the houses faire, of one or two lofts, encompassed with Iron and Lat-

ten

ten grates, and at the streets end are triumphall arches, closed at night; in the chiefe are Watch-bells. Euery street hath a Capitaine and foure Quarter-masters or Corporals, which euery ten dayes acquaint the *Loucheys* or *Chaems* with occurrents. That Booke reports of one hundred and twentie water-passages, fixe fathome deepe of water, and twelue wide, with many stone bridges, which are said to be eightene hundred rich and faire, with arches, pillars, and chaines: it tels also of one hundred and twentie Market-places, each of which haue their monethly Faires, (which make some foure faires a day thorow the yeere) of which we saw ten or twelue in our two moneths free abode, very full of horse-men and foot-men with all commodities to be sold. There are one hundred and sixtie Shambles, each hauing one hundred blockes for Fleish of all sorts, the price set downe on euery blocke, and besides the shop-weights, are weights at euery Gate to examine the weight againe. And besides those generall shambles, euery street hath fise or sixe shops which sell all kinde of Fleish; houses also for Poultrie, and for Bacon, and hanged Beefe.

§. V.

Foure Buildings incredibly admirable in Pequin, and diuers of their Superstitions: their Hospitals and prouisions for the Poore. The Kings reuenues and Court; their Sects.

BVt nothing seemed to me more admirable, then the Prison, called *Xmanguibaleu*, that is, the Prison of the exiled, whose compasse containeth about two leagues square, as well in length as breadth, walled high and ditched deepe, with draw-bridges hanged on Iron cast pillars very great. It hath a high arch with two towers, whereon are six great watch-Bells, at the sound whereof the rest within answer, which are sayd to bee one hundred. In this Prison are continually three hundred thousand men from * sixteene to fiftie yeeres of age, all condemned to banishment, for the fabrike of the wall betwixt *Tartaria* and *China*; whom the King findes maintainance onely, without other pay. After they haue serued sixe yeeres they may goe out freely, the King freely remitting their sentence in satisfaction of their labour. And if in the meane time, they kill an enemy, or haue bene thrice wounded in sallies, or performe any worthy exploit, he is also freed. There are * two hundred & ten thousand employed in that seruice, of which yeerly in those that dye, are maimed or freed, one third part is set off, and supplied from that Prison, which was builded by *Goxiley* the successor of *Crisnagol*, the founder of the wall, brought thither from all parts of the Realme, and sent to the *Chaem* of the wall at his appointment. These prisoners are sent from other prisons, being loose, saue that they weare at their necke, a board of a spanne long and foure fingers broad, inscribed with their name, and sentence of exile, such a time. In this Prison are two Faires yeerly, one of which wee saw, kept in Iuly and Ianuarie, franke and free without payment of tolls; to which are thought to assemble three millions of persons: the Prisoners being meane-while shut vp. The Prison hath three Townes, as it were, with streets and Officers, besides the *Chaems* lodgings, fit to entertaine a King. There are also all necessaries sold. Their are groues, and tankes of water for washing, Hospitals also and twelue Monasteries, with rich houses, wanting nothing that a rich and noble Citie should haue: the Prisoners hauing their Wiues and Children with them, the King allowing a competent house for them.

Huge Faires;

Another building about as great as that, was the *Muxiparan*, or treasure of the Dead, compassed with a strong wall and ditch, with many stone Towers and painted pinacles: the wall on the top in stead of battlements, was compassed with Iron grates, close to which were set great store of Idols of different figures, of Men, Serpents, Horses, Oxen, Elephants, Fishes, Snakes, monstrous formes of Wormes, and creatures neuer seene; all of Brasse and cast Iron, and some of Tinne, and Copper; a sight more admirable to the view, then can be imagined. Passing by a bridge ouer the ditch, wee came to a great Hill, * at the first entrie all enuironed with thicke grates of Latten, floored with stones white and blacke, so shining that a man might see himselfe therein, as in a glasse. In the midst of that Hill stood a marble pillar of fixe and thirtie spannes high, all seeming to bee but one stone; on the top whereof stood an Idoll of siluer with a womans face, with both hands griping a Serpent spotted with blacke and white. And further, before the gate (which stood betwixt two high towers, borne vpon foure and twentie bigge stone pillars) stood two figures of men with Iron maces or battle Axes, in their hands, as guarding the passage, one hundred and fortie spannes high, with dreadfull countenances, called *Xixipitan Xalicau*, that is, the Blowers of the House of Smoake. At the entrie of the gate, stood twelue Halberdiers, and two Notaries at a table, which writ downe all that entred. After wee were entred, we came into a large street set on both sides with rich Arches, with infinite bells of Latten hanging thereon, by latten chaynes, by the moouing of the ayre yeelding a great sound. The street was almost halfe a league

a league long, and within those arches were two ranks of houses, like as it were great Churches with gilded pinacles, and painted inventions, in number as the *Chinois* affirmed three thousand, all from the bottome to the rooffe full of *Skulls of dead men*. Behind those houses was a hill of Bones, reaching to the roofes of the houses, of the same length of halfe a league and very broad. Wee asked the *Chinois*, if any account were kept thereof, and they answered, that the *Talagrepes* which had the government of those houses, had registers for them all, and that euery house yeelded two thousand *Taxis* rent, left thereto by the deceased for their soules discharge, the King hauing therof the fourth part, and the *Talagrepes* the rest for expences of the Fabrike; the Kings fourth part was spent on the exiled Prisoners of *Xnamguibalen*.

Wee walked thorow the street, and in the midst saw a great hill round encompassed, with two rewes of Latten grates; in the midst whereof was a brazen Serpent, aboue thirtie fathoms in her circles, well proportioned, notwithstanding that incredible massinesse. This monstrous Snake which the *Chinois* call the *Serpent deuourer of the House of smoake*, had set in his head, a Ball or Bullet of cast Iron of two and fiftie spannes circumference. Aboue twentie paces further, was the figure of a Man in brasse, of Giantly limbes and proportion, who sustained with both his hands another bullet, which (eying the Serpent with an angry visage) made as though he threw it at him. Round about that figure, were many smal gilded Idols on their knees, with hands lifted vp to him as in admiration: and in foure wyres of Iron enuironing, were one hundred and sixtie two siluer Candlestickes, each hauing fixe, seuen, and ten nosles. This Idoll gaue name to the whole Fabrike, and was called *Muchiparom*, who was, sayth the *Chinois*, the *Treasurer of all the bones of the dead*, and that Serpent comming to rob them, hee threw that bullet in his hands, and made her flee to the darke bottome of the house of smoake, where God had cast her for her badnesse: And that three thousand yeeres before hee made the former throw, and that three thousand yeeres after, he shall make another, and so each three thousand yeeres another, till the fift which shall kill her: after which all these bones shall returne to their bodyes, to remayne alway in the house of the Moone. This their *Bonzos* preach, and that those soules shall bee happie, whose bones are thither brought, so that no day passeth in which two thousand bones are not brought thither. And they which are too farre distant to haue their bones brought, send a Tooth or two, which with their almes will doe as much good as the whole: so that I suppose there are teeth enough in those houses to lade many ships.

A third building wee saw without the walls, sumptuous and rich, named *Nacapiran*, which signifeth, *The Queene of Heaven*; which they meane not of the Virgin *Marie*, but thinke that as temporall Kings are married, so also is the Heauenly, and that the Children which hee getteth of *Nacapiran*, are the *Starres*; and when the starres seeme to shoute or fall in the ayre, that then one of those Children dye, all his brethren weeping so many teares, that the Clouds are therewith filled, and water the earth, and make it fruitfull, as being the almes which God giues for the soule of the deceased. Wee saw heere one hundred and fortie Monasteries, of their wickedly Religious men and women; in euery of which, were sayd to bee foure hundred persons, which come to fixe and fiftie thousand; besides seruitors, which haue not yet vowed the profession, as those within, who goe in sacred habite of red with greene stoles, their beards and heads shauen, with beades about their neckes, for their prayers, but aske no almes, hauing sustenance of their owne proper. In this Edifice of *Nacapiran*, the *Tartarian* King lodged, Anno 1544. when hee layd siege to this Citie, as shall after bee deliuered; wherein for a diuellish and bloudie Sacrifice, he commanded 30000. persons to be slaine: fifteen thousand of which were Women, or girles rather, the Daughters of the chiefe men of the Kingdome, and Religious, professed of the Sects of *Quiay Figrau*, God of the *Motes of the Sunne*, and of *Quiay Nuandel*, God of the *Battells*, and of *Compositan*, and of foure others, *Quiay Murn*, *Quiay Colompom*, *Quiay Mubelee*, and *Mubeec Lacasaa*, whose fise Sects, are the chiefe of the two and thirtie. Within this building wee saw diuers memorable things. One was a Wall against the other, almost a league compasse, borne vp with stone arches, and in stead of battlements, arounded with Latten grates, and at euery fixe fathoms, Iron workes on pillars of Brasse fastened one to another, whereon by chaynes hung innumerable bells, making a continuall strange noyse, with the motion of the ayre.

At the great Gate of this second wall, in terrible shapes, stood the two Porters of Hell (as they call them) *Bacharom* and *Quisau*, with Iron Maces in their hands, terrible to looke on. Passing vnder an Iron chayne, fastened to the breasts of these Diuels, wee came into a faire street long and wide, compassed with painted arches, on the top whereof were two ranks of Idols all that length, in which were aboue fise thousand Images, wee knew not of what matter, being all gilded, with Myters on their heads of diuers inventions. At the end of this street, was a great square Hill set with blacke and white shining stones, the whole square compassed with foure rewes of Giants of mettall, each of fiteene spannes, with Halberds in their hands, and gilded beards. At the end of all stood *Quiay Huiaon*, God of the *Raine*, set vp against a battion or border, seuentie spannes long, and his head so high, that it reached to the battlements of the tower, (which were aboue twelue fathoms) by his mouth, eyes, nostrils, and breasts, casting out water, which the people below gathered as a great relique. This water came from the top of the tower by

by secret pipes. Wee passed vnder his legges, which stood as a great portall, and came to a large house like a Church, with three Iles on marble pillars, and on the walls on both sides, many Idols great and small of diuers figures, all gilded, set on their bases in good order. At the end of this house on a round of fiftene steps, stood an Altar made in fashion of a Throne, and thereon the Image of *Nacipiran*, like a goodly woman, with her hayre loose, and her hands lifted to heauen, all of gold so burnished, that it dazeled the eyes. About that tribunall in the foure first steps, stood twelue Kings of *China* crowned in siluer. And beneath, were three rewes of gilded Idols on their knees, with their hands lifted vp, many siluer Candle-sticks hanging about them. Going thence, wee came to another street of arches like the former; and from thence by two others of rich buildings, to a great hill, in which were eightie two Bells of mettall very great, hanging by chaynes from Iron beames sustained with Iron Columnes. Thence wee went to a strong Gate twixt foure towers, in which stood a *Chifu* with thirtie Halberdiers, and two Notaries, which tooke the names of all passengers, to whom wee gaue thirtie Reis for entrance.

Golden statue of *Nacipiran*

The fourth remarkable and famous building, was in the Riuer of *Batampina*, in an Iland about a league in compasse, walled round with stone eight and thirtie spannes aboue water, within filled with earth, round encompassed with two rewes of Latten grates; the vttermoost sixe spannes high for people to leane on, the inner of nine, holding siluer Lions with balls, the Armes of the *China* Kings. Within these grates in good order, were placed one hundred and thirtene Chappels, in manner of round Bulwarkes; in each of them, was an alabaster Sepulcher seated on the heads of two siluer Serpents, with faces of women and three hornes on their heads. In euery of them were thirtene Candlesticks of siluer, with seuen lights in each burning. In the midst of a spacious place compassed with three rewes of grates, with two rankes of Idols, stood a high Tower with fise steeples of diuers paintings, and on their tops, Lions of siluer; in which tower the *Chinois* sayd, were the bones of the one hundred and thirtene Kings, worshipped by them for great reliques. These bones say they, euery New Moone, feast one with another, whereupon the vulgar at those times, offer to them infinite store of Fowles of all sorts, Rice, Kine, Hogges, Sugar, Honey, and other prouision; which the Priests receiue, and deceiue them in recompence, with as it were Iubilees, of plenarie Indulgences, and remission of sinnes as they beleue.

The fourth glorious Edifice.

113. Chappels, and their contents. 14. 9. Candlesticks.

Indulgences.

In this Tower wee saw a rich house all lined with siluer plates, from the top to the bottome, in which stood those one hundred and thirtene Kings statues, and the bones of each King in his owne statue; and they say, that by night these Kings communicate and passe the time together, which none may see but the *Cabixondos*, (a higher degree of *Bonzos*, as that of *Cardinals* with vs) which fables they beleue for very certaintie. In this great circuit wee told three hundred and fortie Bells of mettall and cast Iron, in seuentene places, by twentie in a place, which all found on those New-moone feasts abouesayd. Neere to that tower, in a rich Chappell built on seuen and thirtie columnes of stone, stood the Image of *Amida* made of siluer, with the hayres of gold, on a Throne of foureteene steps, all wrought with gold, the hands eleuated to Heauen: beneath her shoulders, hung (like lines of beades) many little Idols, as big as the middle finger: and the secret parts were couered with two great Oyfter-pearles, garnished with gold: They being demanded the meaning of this mysterie, sayd, that after the generall Floud in which all mankind was drowned, God sent *Amida* from the Heauen of the Moone, (being great Chamberlaine to *Nacipiran* his wife) to restore the destroyed world; who setting heere teete in *Caltemplay* before mentioned, being lately freed of the waters, shee turned it into gold, and there standing on her feet with her face in heauen, a great quantitie of Creatures issued from downe her arme; downe her right hand Males, and Females downe the left; hauing no other place in her bodie whence to bring them forth, as other women of the world, whom for sinne God hath subiected to filthinesse of corruption, to shew how filthy sinne is. After shee had finished this trauell or child-birth of 33333. Creatures, (as they number) one third part Males, and two parts Females; shee remayned so weake, hauing no bodie to prouide her any thing, that with dizzinesse shee fell to the ground dead without recouerie. Whereat the Moone in condoling her death couered her selfe with sorrow, which are those shadowes wee see from the earth; which say they, shall remaine so many yeers as she produced Creatures (33333) & then the Moone shall put off her maske of sorrow, and the night shall bee after as cleere as the day. Such and other like mad stufte did they tell, which might make one wonder, and more to weepe, that the Deuill should gull them with such manifest lyes, being otherwise so vnderstanding a people.

Rich siluer Temple.

Lady *Amida* Image.

Amida Chamberlaine to *Nacipiran*, as *Iris* to *Iuno*: a tale perhaps deuised from that Raine-bow couenant, Gen. 9. 15. as that which followeth from Gen. 3. 16.

A Nunnerie.

From this Hill we went to another Temple of Nuns, sumptuous and rich, in which they told vs was the Mother of this King, *Nhay Camisama*, but would not let vs enter being strangers. Thence by a street of Arches, wee went to a haue called *Hicharioo Topileu*, where was store of strange shipping of diuers Kingdomes, which come continually to that Temple for a plenarie Iubilee, which the King with many priuiledges hath granted them, and dyet on free cost. To speake of other Temples and matters of *China*, which wee saw in our two moneths libertie were infinite.

Royall revenue how disposed. The Jesuites also say, the King cannot at pleasure dispense it.

Not to compare China with what we see here.

Admiranda Pequini.

* *Minapan* the Kings Palace: the number of Eunuchs perhaps is mistaken by the Printer: the Span. hath 10000. one cipher lesse. Yet *Pantoia* saith, that yeere when hee writ, were chosen 3000. out of 10000. and in the Palace were 16000. Eunuchs.

The King of *China* most resideth at *Pequin*, for so he sweareth at his Coronation. There are certaine streets seuered in this Citie by themselves, wherein are houses called *Laginampur*, that is, *The Schoole of the poore*, in which Orphans which know no father are taught to write and reade, and mechanike trades to earne their livings. Of these Houses they haue about two hundred, and as many more of poore Nurses which giue sucke to Children, exposed or cast forth by their Parents (which are punished if they bee knowne) and after they are weaned, are committed to the former houses. And if any by naturall defect are vnable to learne a Trade, they apply him to that whereto he is able, as those that are blind to Mills, two to grind, and one to sift; and so in other cases. Besides, no Trades-man may keepe shop without licence, which is not granted but with imposing on them some of these poorer. The Miller is to giue meate and drinke to each of those blinde persons, and clothes, and fiftene shillings yeerely, which when hee dieth he may giue for his soule, that no poore should perish, according to the fourth precept of * *Amida*. For Creeples which cannot goe, they place them with makers of Frailes, Baskets, and other handiworkes: and those which cannot vse their hands haue great Hampers giuen them, and Baskets to serue for Porters to carrie what men buy, from the Markets to their houses; such as haue neither hands nor feet to vse, are placed in great houses like Monasteries, where are many mercenary women which pray for the dead, halfe of the Offerings remayning to them, the other halfe to the Priests. If they be dumbe, they place them in a house like an Hospitall, where they are sustayned with the Fines imposed on Reqraters and scolding women. For common women which are diseased they haue other houses, where they are cured and prouided for, at the costs of other common women, each paying a monethly fee. The Dowries or Ioynters of conuicted Adulteresses are bestowed on the Hospitals of female Orphans, that honestie may gaine by dishonesties losse. Other honest poore men are maintayned in other streets, at the charges of Solicitors and Lawyers which maintayne vniust Suits, and of partiall bribed Iudges.

For the provision of the poore I haue further heard read out of their Chronicles that *Chanfiran Punagor*, Great Grandfather of the King now reigning, desiring to doe God seruice (being blinde after a sicknesse which he had) ordayned that in euery Citie there should be store-houses of Wheat and Rice, that if any dearth should happen, there might be a yeeres provision, and the poore should not perish: and to this purpose he applied the tenth part of the Kings Customes. They say, that God recompenced this his charitie with restitution of his sight, which continued fourteene yeeres after till his death. This is still obserued, and the number of those Store-houses is said to be fourteene thousand. At Haruest the old is diuided to the Inhabitants as they haue need, which after two moneths are to lay in as much new, and fixe in the hundred more, that the store be not diminished. But if the yeere proue barren, it is diuided to them without gain: and that which is giuen to the poore which haue not to satisfie, is paid out of the Kings Rents of that place, as the Kings Almes. And all the rest of the Royall reuenues are diuided into three parts; one for maintenance of the Kings estate, and for the gouernment of the Kingdome; the second for the defence of the Countiey, for Ports, Fleets, and the like; the third is put vp in the Treasurie at *Pequin*, with which the King by ordinary power may not meddle, being deputed for defence of the Kingdome against the *Tartars*, and other warres with conuincing Kings; this part of the treasure is called *Chidampur*, that is, *The wall of the Kingdome*. For they say, that if such occasions happen, the King shall not lay tribute whiles that lasteth, nor shall the people be vexed, as in other Countries, where such prouidence is not vsed.

Indeed I feare to particularize all that we saw in this Citie, lest the Reader should doubt or mutter at the raritie, measuring things by that little they haue seene, and iudging by their owne curtailed conceits the truth of those things which mine eyes haue seene. But high capacities, haughtie spirits, and large vnderstandings, that measure not other states by the miseries and meannesse before their eyes, will perhaps be willing to heare things so rare; which I hold the more pardonable in others to doubt of, forasmuch as I verily confesse, that I my selfe which beheld them with mine eyes, am often amazed, when with my selfe I recount the greatnesse of *Pequin*, in the admirable estate of that *Gentile* King, in the splendor of the *Chaens* of Iustice, and of the *Anchacys* of gouernment, in the terror and dread caused in all by their Officers, in the sumptuousnesse of the Houses and Temples of their Idols; and of all the rest therein. For only in the Citie *Minapan* which stands within the wall of the Kings Palace are 100000. * Eunuchs, and 30000. women, 12000. men for his Guard, and 12. *Tutans*, which is the greatest dignitie, and commonly called the Sun-beames, as the King is called, the Sonne of the Sunne, whose person they represent. Beneath these 12. are 40. *Chaens* as Vice-royes, besides the inferiour dignities, as *Anchacys*, *Aytaos*, *Ponchacys*, *Lauteaas*, and *Chumbins*, all which in the Court are about 500. and none of them haue lesse then 200. men depending, the greater part of which are *Mogores*, *Persians*, *Coracons*, *Moens*, *Calaminbans*, *Tartars*, *Cauchins*, and some *Bramaas*; the Naturals being little esteemed as effeminate, and wanting valour, how wittie soeuer in Arts and husbandrie. The women are white, chaste, more giuen to labour then the men.

The earth is fertile, which their ingratitude rather ascribes to the merit of their King, then the prouidence of God. Some Priests also barter with them vpon Bills of exchange to bee re-

payed

payed an hundred for one in Heauen, which Letters they call *Cuchimiocos*. Other Priests are of another Sect, called *Naufolins*, which denye the Soules immortalitie, and therefore teach to take their pleasures in this life. Another Sect is called *Trimécau*, which holds, that a man shall so long lie in his Graue as hee hath liued aboue ground; after which, by the prayers of their Priests, the Soule shall returne into another creature seuen dayes, and then seeke for the old bodie left in the Graue, to carrie it to the Heauen of the Moone, where it shall sleepe many yeeres, till it be conuerted into a Starre, and there remayne fixed for euer. Another beastly Sect, called *Gizom*, holds that Beasts onely shall enioy Heauen, in recompence of their penance and trauels here sustayned, and not Men which follow their lusts, except they leaue to Priests at their death, to pray for them.

Gizom.

§. V I.

Their remoue to Quansy, quarrels, miseries; Tartarian huge Armie, and losse at the siege of Pequim, reported. Quansy taken, and Nixianco: M E N D E Z his exploit. Their entertaynement by the Tartar King, and going to Cauchinchina with his Embassadors, with many Tartarian obseruations.

After we had two moneths and a halfe gone vp and downe in the Citie of *Pequim*, on Saturday the thirteenth of Ianuary, 1544. they carried vs to *Quansy* to fulfill our Sentence, where we were brought before the *Chaem*, who made vs of his Guard of eightie Halbarders allowed him by the King, which made vs thankfull to God, being a place of litle labour and more maintenance and liberty. But after a moneth, the Deuill sowed strife betwixt two of our companie, which in reasoning about the Families of the *Madureyras*, and the *Fonssecas*, whether were more eminent, grew to heate, thence to brauing words, and after to blowes and wounds, not onely of those two, but by part takings of fise of the rest. The *Chaem* and *Anchacys* sentenced vs to thirtie blowes a man, which made vs more bloudy then our wounds. Then they carried vs to a prison, where we lay in Irons sixe and forty dayes. After which we were brought to the Barre, and receiued other thirty stripes, and removed to another prison, where we stayed two moneths, then removed to certaine Iron-works fise moneths, much pinched in backe and belly, and being diseased with a contagious sicknesse, they sent vs forth to begge, which wee did foure moneths. In this miserie wee sware to each other to liue Christianly and louingly, and that each moneth one should bee chiefe, whom all the rest should obey, whereby wee after liued in peace.

** Rhinocerets.*
16000. Barkes.

Christouan Borralho the chiefe for that moneth, distributed vs by couples to take their turnes weekly to begge, two to fetch water, and make ready what we got, two to get wood. I and *Gaspard de Meyrelez* went one morning to the Wood, and *Meyrelez* being Musically played on his Viall, and sung; a thing pleasing to that people, which spend much time in pastime and banquets, and profitable to vs in procuring almes. As wee went, wee met with a Funerall pompe with Musick in the midst: one of which Musicians knowing *Meyrelez*, prayed him to play and sing as loud as he could, that this dead man wee now carrie to buriall may heare thee, to comfort him in leauing his wife and children, whereto he was much affected. Hee modestly refusing, the other angerly answered, and others intreated, and almost forced him to goe with them to the burning Buriall after their custome. I thus left alone, went and got my bundle of wood on my backe. In the way homeward I met in the way an old man, clothed in blacke Damaske furred with white Lambe, who hauing shewed mee a siluer Crosse, told me, that he was a poore *Portugall*, *Vasco Caluo*, which seuen and twentie yeeres since was captiued with *Tomé Pirez*, whom *Lope Soares* had sent Embassador to *China*, which had a miserable successe by reason of a *Portugall* Captaine. Hee brought me to his house, and told me the storie of his and his fellowes adventures, and I ours to him: and at his request I fetched the rest of our companie to his poore house. Hee brought vs to another roome, where his wife was, with her two little sonnes, and two small daughters. Shee entertayned vs louingly, and shewed vs her Closet with an Altar, and a Crosse thereon, secretly kept; shee also and her children said a *Portugall* Prayer, with the *Pater noster*, *Creed*, and *Aue Maria*, to our great ioy.

Eight moneths being spent in this our miserie and beggerie, on Wednesday the thirteenth of Iuly, a great tumult and crie arose amongst the people, by reason of newes of the Tartarian King his coming to *Pequin*, with a greater power then euer any King had in the World; that there were in his Armie 1800000. men, 600000. of which were Horse-men, which had come by Land from *Langame*, and *Famfir*, and *Mecny*, with 80000. Badas* to carrie their prouision. Twelue hundred thousand Foot-men had come in sixteene thousand Laules and Iargas downe the *Batampina*. And because the King of *China* durst not resist so great a power, hee was gone

to Nanquim. Moreouer it was said that in the Pinall of *Manicataron*, a league and halfe off was lodged one *Nauticor*, a *Tartarian* Captaine with 70000. Horse, who within few houres would bee at that Citie. This newes much terrified vs, and the next morning the Enemie appeared with Colours quartered greene and white in seuen battels, neere to a *Pagode* called *Petilan Naimioo*, a little from the walls. From that *Pagode* they came with sound of Instruments of warre in one grosse Squadron like a halfe Moone, and encircled the Citie: and being within Callier shot, they made a shout as if Heauen and Earth would haue gone together, and scaling it with two thousand Ladders which they brought with them, assaulted it in all places they could very resolutely, and at last brake into the gates by certaine deuices of great Iron Presses, and slue the *Chaem* with many *Mandarines*, putting the Citie to the sword, sacke, and fire; killing, as was thought, 60000. persons, and after stay of seuen dayes there, went for *Pequim*, where their King was.

Two dayes after they were gone, they came to a Castle called *Nixiamcoo*, which he besieged. *Nauticor* called the seuentie Captaines to consultation, and agreed to make ready five hundred Ladders that night for the next dayes assault. The next day their *Palinguindoens* (so they call their Martiall Instruments) sounded, and fourteene battalions marched, and gaue assault with great cries, scaling the walls, and fighting furiously; the besieged also defending themselves courageously, and in two houres killing three thousand *Tartars*, the rest fleeing; many wounded with poisoned Arrowes, whereof they died. A Counsell of Warre was hereupon called, one of them being the man which had vs in custodie; who returning with two Captains of his acquaintance to supper, in their discourse of that misfortune they cast eyes vpon vs there prisoners, and questioned of what Nation we were, and whether our Kings vsed to warre, and whether any of vs knew any Stratagem to get that Castle, promising our freedome if we could effect it. To which we answered accordingly, and *George Mendez* vndertooke the designe against our likings fearing his disabilitie, and our further danger. One of these Captaines told the *Mitiquer* (*Nauticor*) hereof, who sent to *Tileymay* the Captaine which had charge of vs, to bring vs to him. He gaue vs a graue welcome (being now in counsell with the seuentie Coronels, two houres after midnight, and first made vs to eate, hauing taken off part of our Irons; and then made large promises to *George Mendez* if he could doe as he had said; to which he answered, that hee could answer nothing till he saw it, and then he would tell him the way to take it. Wee were removed to a Tent adioyning, and there guarded, full of feare lest this vndertaking would cost our liues, with a People so cruell. The next day *George Mendez* and two others of our companie were carried with a band of Horse-men about the Castle to view it, and then brought to the *Mitiquer*, to whom he professeth great facilitie of effecting his purpose: which so contented him, that he sware by the Rice he eate to present vs to the King, and to fulfill his promises, presently taking off the remainder of our Irons. Hee made vs to eate neere him, and did vs other honour. After which, *George Mendez* as Camp-master appointed store of Chifts, Boxes, and materials to fill vp the ditch, and three hundred large scaling Ladders able to hold each three Souldiers, against the next morning to be made ready two hours before day. All this was happily effected, the ditch filled, and *Mendez* with two others of vs first scaled the wall, and set vp the *Tartars* Colours; five thousand *Tartars* gallantly seconding, so that with a hote skirmish the besieged were all slaine, and the Castle taken; the gates opened to the *Mitiquer*, who with great ceremonies tooke thereof possession. He caused *George Mendez* and the rest of vs to eate neere him, razed the Castle, and taking *Mendez* with him on horse-backe returned to his Tent, giuing him 1000. *Tais*, and each of vs 100. the cause of much emulation in some of our companie, who by his meanes had obtayned libertie. Thence the *Mitiquer* marched by places desolate, to a good Towne by the Riuers side, called *Lautimey*, the people whereof were fled; the Towne these barbarians fired, as they did other places where they came. The next day they burned *Bunxay*, a sowne field of aboue fixe leagues circuit, most Wheat; and came to the Hill *Pommitay*, and the next day to the Riuer *Palemzitan*, within two leagues of the Kings Campe. *Guiay Paran* sonne of the King of *Persia*, at the Castle of *Lautir*, by the Kings appointment stayed for him; to whom *Mitiquer* on his knees deliuered his Scimitar, hauing first kissed the ground five times. Hee welcomed him with honourable termes, and after that, stepping backe two or three paces with a new ceremonie, and with a voyce high and seuer (as he which represented the Kings person) said, *He, whose rich border of his garment my mouth continually kisseth, whose great power ruleth ouer others by Land, and on the Iles of the Sea, sends to tell thee by mee his Slaue, that thy honourable comming is as welcome to his presence as the sweet Summer morning, wherein the bathing of cold water most delights the flesh: and that without delay thou hastenest to heare his voice, mounted on this Horse richly furnished out of his Treasurie with mee, that thou mayest be equall in honour with the principall of his Court, and they which see thee thus honoured may know that thou art a strong member, whose valour deserves this reward.*

Thus with great state and pompe they went to the King: and fifteene dayes after he brought vs to the Tents of the King well horied, then in the sumptuous House of *Nacapiran*. When he came to the Trenches, hee descended from his Litter (wee from our Horfes) and asked leaue of

Nauticor

Nantaran to enter, which granted, he againe went to his Litter, and we followed on foot: at the next passage he descended, and went in leauing vs to expect him. An houre after he returned with foure faire Boyes gallantly arayed in greene and white, with their golden Xorcas on their feet, to whom all the people rose vp, and drawing their Scimitars laid them on the ground, saying three times, *A hundred thousand yeeres lue the Lord of our heads.* Wee lying prostrate with our faces on the ground, one of the Boyes said to vs with a loude voice, *Reioyce yee men of the Worlds end, for the houre of your desire is comne, in which the libertie which the Mitaquer promised you in the Castle of Nixianco, shall bee granted you. Lift up your heads from the ground, and your hands to Heauen, giuing thanks to the Lord which made the Stars.* Wee answered as wee were taught, *Let it bee our fortune that his foot tread on our heads:* the Boy answered, *The Lord grant your request.*

State of the
Tartarian
Campe and
Tent Royall.

These foure Boyes with Mitaquer guided vs on thorow a Gallerie standing on fixe and twentie Pillars of Brasse, from which wee entred a great Hall of timber, in which stood *Mogores, Persians, Berdsos, Calaminbans, and Bramas*: thence wee came to another Hall, called *Tighipan*, where were great store of armed men in fixe files quite thorow the Hall, their Swords garnished with Gold. There Mitaquer performed some ceremonies, swearing on the Maces which the foure Boyes carried, kneeling and kissing the ground three times. Then we passed another gate, and came to a square great Hall like the Cloister of a Monasterie, in which stood foure files of brazen Images like Sauages with Maces and Crownes, seuen and twentie spannes high, and fixe broad, which the Tartars said were the three hundred and sixty Gods which made the dayes of the yeere; which the Tartar King had taken out of a Temple, called *Angicamoy*, in the Citie *Xipatom*, in a Chappell of the Sepulchres of the Kings of *China*, to carrie home in triumph. In this Hill was a Garden of strange herbs and flowers, and therein a Tent vpon twelue turned posts of Camphire wood, in which was a Throne all garnished with much curiositie of Gold and Siluer workes, representing very liuely the Sunne, Moone, Starres, Cloudes. In the midst of the Throne stood a siluer great Statue, called *Abicannilancor*, that is, *God of the health of Kings*, (taken also from *Angicamoy*) about which stood foure and thirtie Idols as big as children about fixe yeeres old, in two rankes set on their knees and hands lifted vp as in veneration. At the entrie of the Tent were foure Boyes gorgeously arayed which went about it with Censers, and at the sound of a Bell prostrated themselves on the ground, and censing, said, *Let our crie come vnto thee as a sweet saour that thou mayest heare vs.* That Tent was guarded by sixtie Halbarders, standing a pretie distance from it round about. Beyond that Hill wee entred another place, where were foure rich roomes, in which were many great persons.

The Guards.

Xipatom.

Curious
Throne.

Thence we followed Mitaquer and the Boyes vnto a great Hall like a Church, where stood fixe Porters with Maces, which with new ceremonie let vs in. Here was the King of Tartars, accompanied with his *Grandes*, among which were the Kings of *Pafua, Mecny, Capimper, Raia Benam*, and the *Anchesacotay*, and other Kings to the number of fourteene, all in rich attire, placed at the foot of the Throne, two or three paces distant; and a little further off stood two and thirtie faire women, playing on diuers Instruments. The King sate on the Throne, encompassed with twelue Boyes on their knees, with small Scepters of gold on their shoulders; amongst which was a faire Damsell which euery anone fanned the King. This was the sister of Mitaquer, who by her meanes enioyed that grace and respect in the Armie. The King was about fortie yeeres old, tall, not fleshy, well set; his beard short with Mostachos like the *Turks*, his eyes somewhat small, his countenance seuer; clothed in a shining reddish vesture set with Pearles; on his feet certaine Slippers greene wrought with Gold and Pearles; and on his head a kind of Sallet with a border of Diamonds and Rubies. Before we came at him by ten or twelue paces, we made our courtesie, three times kissing the ground, with other ceremonies which wee were taught. The King commanded the Musike to cease, and bid Mitaquer aske this Nation of the end of the world, if they haue a King, and how their Land is called, and how farre it is from *China*. One of vs answered for the rest, that our Land was called *Portugall*, our King was great and mightie, and from thence to *Pequin* was about three yeeres Voyage; whereat he much marvelled, as not thinking the World so great; and striking on his thigh said aloud with eyes to Heauen, *O Creator of all things, which of vs poore Pismires on the Earth may be able to comprehend the marvels of thy greatnesse?* And signing with his hand he made vs come neerer to the steps of the Throne where the fourteene Kings were placed, and demanded vs againe, how farre? and when we said, three yeeres; he asked, why we came rather by Sea then by Land? wee answered, that the diuersitie of States and Kings in the way hindred. He asked, What doe you seeke with so farre trauels and great troubles? wee gaue as good reason as we could; whereat he shaking his head, said to the King of *Benam*, an old man, that it seemed that our Countrey had much Couetousnesse, and little Iustice; so, said the other, it appeares; for those men which flie on the top of all waters, by wit and industrie to get that which God hath not giuen them, either pouerty forceth to forsake their Countrey, or vanitie and blindness caused by couetousnesse, makes them forget God and their Fathers. After this, the women began againe to play, and the King retired himselfe into a house alone with his women which played, and the Damsell

that fanned. One of the twelve Scepter-boys told *Mitaquer* from his Sister, that the King commanded hee should not goe away, which he tooke for a great grace, and wee returned to our Tents.

Tartars losse.
Consultation.
Fortie and three dayes after we came to the Campe Royall (in which space were many fights betwixt the besiegers and besieged, two assaults by scaling with the *Tartars* losse) the *Tartarian* called a Councell, where were assembled seven and twentie Kings, and many great men and Captaines, which agreed that seeing Winter was now comming, and the waters of both Rivers had risen and filled the Trenches, and many were sicke (four or five thousand dying daily) that it was best to raise the siege. The King therefore embarked the Foot-men with the munitions, fired the Tents, and went away with 300000. Horse by land, and 20000. *Badas*, 450000. men being found by accounts, to have dyed in this expedition, most of sickness, 300000. Horses and 60000. *Badas*, for want of provisions the two last moneths and a halfe of this Siege (which endured sixe moneths and a halfe.) Besides, 300000. had runne to the *Chinois*, wonne by their great pay. Hee lodged the first night of his departure at a River called *Quaytragum*; the next day he came to *Guizampee*, which hee found wholly forsaken; thence to *Liampen*, and after seenteene dayes (eight leagues a day) he came to *Guauxitum*, and forced it, committing therein cruell slaughters, to provide his Armie of necessities by the spoyle thereof. The next day hee came to *Caixilo*, which he medled not with being great and strong, having therein 50000. men, of which 10000. were *Mogores*, *Cauchims*, and *Champaas*, better Souldiers then the *Chinois*. Thence hee passed to the walls of *Singrachiron*, and the next day to *Xipator*, and then sent away 20000. most of his Souldiers, spending seven dayes in the pay, and execution of Iustice on Prisoners. Thence discontent, hee went to *Langame* by water, (with onely one hundred and twentie Laules, in which were some ten or twelve thousand men) where sixe dayes after hee arrived in the night without any pompe.

Langame.
There he stayed sixe and twentie dayes, till all his companie were come both of horse and foot, after which hee went to a greater Citie called *Tuymican*, where he was personally visited by confining Princes and Ambassadors from remoter Kings, *Xatamas* of *Persia*, *Siammom* Emperour of the *Gueos*, which within the Countrey confine with *Brama* of *Tangu*, the *Calaminhan* Lord of the brute force of Elephants, the *Sornau* of *Odias*, (intituled King of *Siam*) whose Segniorie comprehendeth seven hundred leagues of coast, from *Tanaucarim* to *Champaa*, containing seven-teen Kingdomes; the King of the *Mogores* whose Kingdome lyes within land, betwixt *Corazan* neere *Persia*, and the Kingdome of *Dely* and *Chitor*, and an Emperour called *Caran*, whose Segniorie confineth within the Mountaines of *Gencalidan*, with a Nation which the Naturals call *Moscooby*, of whom wee saw some in this Citie, ruddie, of bigge stature, with shooes, and furred cloathes, having some latine words, but seeming rather for ought wee observed *Idolaters* then *Christians*, and much given to vnnaturall lust. To the Ambassadors of that Prince *Caran*, better entertainment was given then to all the rest. Hee brought with him one hundred and twentie men of his guard, with Arrowes and gilded quiuers, all cloathed in *Shamois* skinnies, murrie and greene; and twelve Porters on horsebacke with Maces of Silver, leading twelve Horses in their right hands with rich embroidered Furnitures. After whom followed twelve men of high and Giant-like stature, cloathed Sauage-like in Tygers skinnies, leading great Grey-hounds in chaynes and collers of Silver, muzled. Then came twelve Boyes, faire and well proportioned of equall stature in gallant array, & next them *Leixigan* the Ambassador himselfe, in a Chariot (they call it a *Pirange*) with three wheelles on a side, garnished with Silver and a Chayre of the same, attended with fortie Foot-men in murrie and greene, yeelding a goodly sight, all things manifesting the greatnesse of his Lord. Wee were one day in his lodging with *Mitaquer*, who was sent to visit him, where amongst other strange things, we saw five roomes hanged with Tapestry of Frogges very rich, like that vsed amongst vs, as if they had come from one place; the Canopies, Silver-tables, Furniture and State, all rich. This Ambassador came not only to welcome home the *Tartar*, but to treat also of a Marriage for his Lord, with one of the *Tartars* Sisters, named *Meica Vidau*, a woman of thirtie yeeres, very charitable to the poore, whom wee haue often seene in their Festiuall dayes.

Caran.
A Marriage treated on betwixt the Caran and Tartar.
They depart from *Tartaria*.
Mitaquer at our request mentioned vs to the King, who sayd, he would send vs with his Ambassador shortly to *Cauchenchina*; and caused vs to be brought againe to his presence with great ceremonie of State and Maiestie as before at *Pequim*, where hee questioned vs, if we would serue him, which we excused saying, we had Wiues and Children in our owne Countrey; and asking *George Mendez*, hee accepted. Eight of vs were commended to the Ambassador which was to goe to *Vzanguce* in *Cauchenchina*, & we went in the same Barke. We set forth from *Tuymican* the ninth of May, and came to a Schoole or Vniuersitie called *Guatipamor*, where wee lodged in a Temple (or Monasterie) called *Naypatim*. Next morning wee followed our voyage downe the River, and two houres within night came to *Puxanguim*, a small Citie, well fortified with Towers and Bulwarks after our fashion, with store of Artillerie of wood, like the Pumps of ships, the stocks where the Barrells were fastned being plated with Iron, and carrying a bullet as bigge as a Falcon: which inuention they say, they receiued of a people called *Alimanis*, of a land named

Vzanguce.

An Vniuersitie.

Puxanguim.

Guns of wood.

named *Muscoo*, which by a great and deepe lake of salt water, came thither with nine Barkes of oares, in companie of a Lady, which was sayd to bee exiled out of her Countrey by a King of *Denmarke*. The next day wee came to *Linxan*, and five dayes after we continuing our course downe the Riuer, came to *Singafatur*, a huge Temple, more then a league in compasse; in which space were built one hundred and sixtie foure large and long houses full of Skuls, the other bones lying without in great piles. On a Hill compassed with nine grates of Iron, was standing against a strong stone wall, a monstrous statue of Iron thirtie braces high, and six broad, in both his hands holding a bullet sixe and thirtie spannes about, of cast Iron also. (This to wound the Serpent which came to robbe them) himselfe being hee which should one day restore the flesh to their owne bones, if they gaue Almes, otherwise to the most vnable and putrid: his name *Pachinaran Dubeculem Pinanfaque*, who 74000. yeeres agoe, was borne of a *Tortoyse* named *Migania*, and of a *Sea-horse* one hundred and thirtie braces long, named *Tibremoncan*. The Ambassadors told vs, that of his Confraternities, there arose to him of annuall rents about 200000. Tacis, and as much more of the Sepulchers of the Nobles, which were by themselves; that there belonged to him twelue thousand Priests preying on him, and praying for the dead, who might not without their Superiours licence depart out of that Circuit. These Priests once a yeare may defile themselves in fornication within that Circuit; without, as oft as they will, without sinne, the *Chisangues* permitting egress. There are many women also enclosed, who by their *Libangus* or *Prioresse* leaue, permit themselves to those Priests.

Linxan.
Singafatur
Temple and
superstitions.

The second day after, wee came to a great Citie on the Riuer side called *Quanginan*, where the Ambassadors stayed three dayes for prouision, and by reason of a Feast at the entrance of *Talapicor* of *Lechune*, who is there as a Pope: who had priuiledged these inhabitants to be all Priests, authoris'd to Sacrifice and giue Bills of exchange for money to bee repayed in Heauen. He gaue the Ambassadors grace to legitimate in his Countrey for money, and to giue tytles of Honour; which hee recompenced, giuing to the Priests all that he could make, and two thousand Tacis the King had giuen vs, for which he gaue vs fiftene in the hundred. Foure dayes wee passed downe the Riuer to *Lechune*, the mother Citie of that false Religion of *Gentilitie*, as *Rome* is with vs, wherein is a sumptuous Temple, in which are seuen and twentie *Tartar* Emperours buried in rich Chappels lyned with Siluer, hauing abundance of siluer Idols. On the North-side a little from the Temple, was a notable strong great wall, within which were built two hundred and eightie Monasteries, of men and women; in which were sayd to bee two and fortie thousand religious professed, besides seruitours. In those Houses are many Brazen pillars with Idols of their Saints thereon, so much more gilded as esteemed. In one of them was the Kings Sister a widow, which had bene wife of *Raia Benan*, Prince of *Pafua*, after whose death shee entred Religion with sixe thousand women. The Ambassadors visited her, and kissed her foot as a Saint.

Monasteries.

Departing thence downe the Riuer five dayes, wee came to a great Citie called *Rendacalem*, in the confines of *Tartaria*. And thence forwasds began the Segniorie of *Xinaleygrau*, thorow which wee trauelled foure dayes, and then came to a Towne called *Voulem*, where the Ambassadors were well receiued, and prouided of Pylots for those Riuers; which wee descended seuen dayes without seeing any thing of note, and then came to a straight called *Quatanur*, into which the Pylots entred to escape a Pyrat, which had spoyle the most part of the Countrey. Thus wee came to the Lake *Singapamor*, called by the Naturals *Cunebetee*, and sayd to containe sixe and thirtie leagues in Circuit. Foure Riuers runne thence, *Ventram* Eastward thorow *Siam*, entering the Sea by the barre of *Chiatabu*, in twentie sixe degrees; *Iangumaa* Southwards by the *Laos* and *Gueos*, and part of *Dabambu* enter the Sea at *Martuan*, in the Kingdome of *Pegu*; *Pumfieu* runnes thorow all *Capimper* and *Sacotay*, and all the Empire of *Monginoco*, with part of *Meleytay* and *Sonady*, and so to the barre of *Cosmin*, neere *Arracan*. Of the fourth Riuer the Ambassadors could giue vs no instructions, but some thought it to bee *Ganges*. In seuen dayes more, wee came to a place called *Caleypute*, where they threw stones at vs, and would not suffer vs to land. Thence we sayled by another larger Riuer nine dayes, and came to *Tarem* a good Towne, subiect to the *Cauchim*, where we were well receiued: and in seuen dayes more came to a good Citie called *Xolor*. There were Siluer mines, in which one thousand men were at worke, whence they sayd was yeerely taken sixe thousand Pikes, which makes eight thousand Quintals of ours. Thence wee went other five dayes by that great Riuer, the Countrey being well peopled, and came to the Citie *Manaquileu* at the foot of the Hills *Comhay* in the borders of *China*, and *Cauchim*; thence to *Tinamquaxy*. Thence they sent their foure Barkes to *Huzamguet*, the chiefe Citie of *Cauchim*, and went by Land to *Panangrem*, where the King was.

Their entertainment there and iourney thence to Japan, I omit, with their following long Pilgrimage in that Easterne world; wherein I am afraid to wander in places and affaires so vnconth. We are alreadie of things so strange, and therefore uncertaine, I will passe to other Authors; and first to the Philippina's and Spanish Commerce of China. The Voyage of Legaspi, is taken out of a Latine Manuscript, the rest out of Mendoza, his Spanish discourse of China, and certayne Friars which went thither; the two Letters except, borrowed of an Italian Author.

CHAP. III.

Spanish plantation of the Philippinas, and what entercourse hath thence hapned betwixt them and the Chinois.

§. I.

First discoverie of the Philippinas: written by Frier IVAN

GONZALES DE MENDOSA.

Magelane
straights.**M**

Agalanes, was the first that discovered these Ilands, having passed the straight (which vnto this day beareth the tytle of his name) and came vnto the Iland of *Zubu*, whereas they did Baptise certaine of the Inhabitants, and afterwards in a banquet, the same Ilanders did kill him, and other fortie of his companions, which was the occasion that *Sebastian de Guetaria*, a naturall *Biskin* borne, for to escape with his life, did put himselfe in a ship that remayned of the voyage (which afterwards was named the *Vittorie*) and in her, and with a few people that helped him, with the fauour of God hee came vnto *Sinill*, having compassed the whole world, from the O-
rient vnto the Ponent, a thing which caused vnto all men great admiration, but in particular vnto the Emperour *Charles* the fift of famous memorie, who after he had giuen many gifts and fauours vnto the sayd *Sebastian de Guetaria*, he gaue order that a new Armie should bee made readie, and to returne againe in demand of the sayd Ilands, and to discover that new world.

The second
Voyage.

Villa Lobos.

So when all things were in a readinesse, for to depart on their Voyage (the which was done with great breuitie) they ordayned for Generall of all that fleete, one *Villa Lobos*, commanding him to goe by the *Nuona Espania*, The *Villa Lobos*, arriued at the Ilands of *Malucas*, and at those of *Terrenate*, and at other Ilands joyning vnto them, the which Ilands were layd to gage by the aforesayd Emperour vnto the Crowne of *Portugall*. In these Ilands they had great warres by meanes of the *Portugals*, and seeing themselves with little helpe and small resistance, for to goe forwards with their conquest, they left it off, and went to the most part of them with the aforesayd *Portugals*, vnto the *India* of *Portugall*, from whence afterwards, they sent them as prisoners vnto the sayd King of *Portugall*, as offenders, that had entred his Ilands without his licence: who did not onely leaue to doe them any harme, but did intreate them very well, and sent them vnto their owne Countrey of *Spaine*, and gaue them all things necessarie for their iourney, and that in abundance.

Then certaine yeeres after, *Don Philip* King of *Spaine*, being very willing that the discovering should goe forwards, which the Emperour his father had so earnestly procured, sent and commanded *Don Luys de Velasco*, who was his Vice-roy of the *Nuona Espania*, that hee would ordayne an armie, and people for to returne and discover the sayd Ilands, and to send in the sayd fleete for *Gouernour*, of all that should bee discovered. *Miguel Lopez de Legaspi*, who did accomplish all that his Maiestie had commanded, and made the discoverie thereof as followeth, to bee declared.

When the *Spaniards* came vnto them, they were without Lord or head, or any other to whom they should shew dutie, but hee which had most power and people, did most command: so that this (and that there were so many of equall power) was the occasion that ciuill warres continued, without any respect of nature, kindred, or any other dutie, but like vnto brute Beasts, killing, spoyling, and captiuing one another, the which was a great helpe vnto the *Spaniards*, for to subiect that Country with so great ease vnto the King, and called them the Ilands *Philippinas*, in respect of his name. They did vie amongst them, to make Captiues and Slaues, such as they did take in vnlawfull warres, and for trifling matters, the which God did remedie, by the going thither of the *Spaniards*: for you should haue a man with fortie or fiftie friends in his companie, or seruants, that vpon a sodaine, would goe and set vpon a small Village of poore people and vnprovided, and take and binde them all, and carrie them away for Slaues, without any occasion or reason, and make them to serue them all the dayes of their life, or else sell them to other Ilands. And if it so chanced, that one did lend vnto another, a basket or two of Rice (the which might bee worth a Ryall of plate) with condition, to returne it againe within ten dayes: if the debtor did not pay it the same day, the next day following hee should pay it double, and afterward to double it euery day, so long as he did keepe it, which in conclusion, would grow to bee so great, that to pay the same, hee is forced to yeeld himselfe for Captiue and Slaue.

But vnto all such as were captiued in this order, or in such like, the King of *Spaine* hath commanded to giue libertie, yet this iust commandement is not in euery point fulfilled and accomplished, because such as should execute the same, haue interest therein. All these Ilands were *Gentiles* and *Idolaters*, but now there is amongst them many thousands Baptised, vnto whom the

King

King hath shewed great mercie; in sending vnto them the remedie for their soules in so good time: for if the *Spaniards* had stayed any more yeares, they had bene all *Moors* at this day; for that there were come vnto the Iland of *Borneo*, some of that Sect that did teach them, and lacked little, for to worship that false Prophet *Mahomet*, whose false, peruerse and corrupt memory, was with the Gospel of Christ easily rooted out.

In all these Ilands they did worship the Sunne and Moone, and other second causes, figures of men and women, which are called in their Language *Maganitos*, at whose Feasts (which they doe make very sumptuous, with great Ceremonies and Superstition) they doe call *Magadurais*. But amongst them all, they haue in most veneration an Idoll, whom they called *Batala*, the which reuerence they had for a Tradition, yet can they not say what should be the occasion that he should deserue more then any of the rest, to be had in so great estimation. In certayne Ilands not farre off, called the *Illocos*, they did worship the Deuill, and made vnto him many Sacrifices, in recompence of a great quantitie of Gold he had giuen vnto them, but now by the goodnesse of God, and the great diligence put and done by the Fathers of the Order of Saint *Austin* (who were the first that passed into those parts, and liued worthily) and also by the Friers of Saint *Francis*, which went thither ten yeares after, all these Ilands or the most part of them are baptized, and vnder the Ensigne of Iesus Christ: and the rest which doe remayne and are not, is more for lacke of Ministers and Preachers, then for any obstinacie of their parts. There is now gone thither certayne Fathers of the Order called Iesuits, who will be a helpe vnto them with their accustomed zeale and labour. And now goeth thither many other Religious men, very well learned and Apostolike, of the Order of Saint *Dominicke*, who will doe their endeouour to conuert them vnto Christ, as it behooueth Christians to doe.

They of these Ilands were accustomed to celebrate their Feasts aforesaid, and to make Sacrifices vnto their Idols, by the order of certayne women which were *Witches*, whom they doe call in their Language *Helgoi*, that were had in as great estimation amongst them, as be the Priests amongst *Christians*. These did talke ordinarily with the Deuill, and many times in publike, and doe Deuillish Witch-crafts both in wordes and deedes: into whom it is to bee beleued that that the Deuill did enter, for that straight-ways they did answer vnto all things that were demanded of them, although for the most part they would tell a Lye, or else such words that might be giuen diuers interpretations of, and of diuers vnderstandings. They did also vse to cast Lots, they were great *Agorismers*, or obseruers of times: in so much that if they beginne any Journey, and at the beginning they meete with a *Cayman* or Lizard, or any other sauage Worme, they know it to be a signe of euill fortune, whereupon they would straight-ways leaue off their Journey, although it did import them very much, and returne vnto their Houses, saying, that the Heauen will not that they should goe forward on that Journey: but all these Lyes and falleneffe haue bene taught them, and they perswaded to by the Deuill, are ouerthrowne and taken away by the Law of the Gospel (as aforesaid) and haue now amongst them many Monasteries full of Religious men, of the Order of Saint *Austine*, Saint *Francis*, and of Iesuits. According vnto the common opinion, at this day there is conuerted and baptized more then foure hundred thousand soules, which is a great number: yet in respect of the quantitie that are not as yet conuerted, there are but a few. It is left vndone (as aforesaid) for want of Ministers, for that, although his Majestie doth ordinarily send thither, without any respect of the great charge in doing the same, yet by reason that there are so many Iland, and euery day they doe discouer more and more, and being so farre off, they cannot come vnto them all, as necessitie requireth. Such as are baptized doe receiue the faith with great firmenesse, and are good *Christians*, and would be better, if that they were holpen with good ensamples: as those which haue bene there so long time are bound to doe: that the lacke thereof doth cause some of the Inhabitants so much to abhorre them, that they would not see them once painted vpon a wall. For prooffe whereof (and for to moue such as haue power and authoritie to put remedie in the same, I will declare vnto you here a strange case, the which royally did passe of a truth in one of these Ilands, and is very well knowne amongst them: that is, there chanced to dye an Ilander, a principall man amongst them: a few dayes after that he was baptized, beeing very contrite for his sinnes, the which he had done against God before he was baptized, and after hee dyed. So after by the Diuine permission of God he appeared vnto many of that Iland whom hee did perswade forthwith to receiue the Baptisme, with reasons of great efficacie, and declared vnto them (as one that had experienced the same) the reward of that good deed which without all doubt should be giuen vnto them, if they would receiue the same, and liue after conformable, and according vnto the Commandements of Christ, for the which he told them, and said, that forth-with so soone as he was dead, he was carried by the Angels into glory, there whereas all things were of delight, pleasure, and content, and did communicate onely in the sight of God, and that there was none that entred therein, neither could enter, except he were baptized, according vnto the preaching of the *Spaniards*, of whom and of others that were like vnto them, there was an infinite number. Therefore, if so be that they would goe and enjoy of those benefits and delights, it is necessary that first they should be baptized, and afterwards to obserue and keepe the Com-

mandements that be preached vnto them by the Fathers, that are amongst the *Castillas*, and therewith he vanished away, and they remayned treating amongst themselues, concerning that which they had heard, and was the occasion that some of them forth-with receiued the Baptisme, and that others did delay it, saying, that because there were *Spaniard* Souldiers in glorie, they would not goe thither, because they would not be in their company. All this hurt is done by one peruerse or impious man, and with one euill ensample, the which amongst many good, as you haue in those parts: but especiall amongst them in particular, it ought to bee reprehended and punished seuerely with rigour.

These Ilands at the first discovery of them, had the fame to be *Mal Sanos*, or vnwholesome, but since experience hath shewed and proued it to the contrary: It is a Countrey maruellous fertill, and yeeldeth very much Rice, Wheate, Goates, Hennes, Deere, Buffes, Kine, and great store of Hogges, whose flesh is so sauourie as the Mutton they haue in *Spaine*: there be also many Cats that yeeld Ciuet, great store of fruits which be very good and sauourie: great abundance of Honey, and Fish, and all sold at so small a price, that almost it is sold for nothing. Also there is great store of Cinamom, but no Oyle of Oliues, but that which is carried thither out of the *Nuoma* *Espania*: they haue much Oyle of *Algongols*, and of Flaxe-seed, the which they doe spend ordinarily in that Countrey, so that the Oyle of Oliues is not missed with them.

There is great store of Cloues, Saffron, Pepper, Nutmegs, and many other Drugges: great store of Cotton and Silke of all colours, the which is brought vnto them by Merchants of *China*, euery yeare a great quantitie, from whence cometh more then twentie ships laden with peeces of Silkes of all colours, and with Earthen Vessell, Powder, Salt-peter, Iron, Steele, and much Quick-siluer, Brasse, Copper, Wheate, Flowre, Walnuts, Bisket, Dates, Linnen Cloth, Counting Chests very gallantly wrought, Calls of Net-worke, *Buratos*, *Espumillas*, Basons and Ewres, made of Tinne, Parchment Lace, Silke Fringe, and also of Gold, the which is spunne and twisted after a fashion neuer seene in all Christendome, and many other things of great curiositie, and all this aforesaid is sold very good cheape. Likewise such things as the Ilands doe yeeld, are sold very good cheape, for you shall haue foure Roues of Wine, which cometh of the *Palmetree* for foure Rials of Plate (the which for lacke of that made of Grapes is very good) twelue Haneges of Rice for eight Rials of Plate, three Hens for one Riall, a whole Hogge for eightene Rials, a whole Buffe for foure Rials, a Deere for two Rials, and yet it must bee both great and good, foure Roues of Sugar for fixe Rials, and the like.

Q. II.

First Plantation of the Philippinas, by MICHAEL LOPEZ DE LEGASPI.

* This I translated out of a Manuscript Latine which I found with M. Hak. Natiuity Port. *Islas de los Reyes*

Islas Ladrones.

The Philippinas called also the Ilands of the Poncat or West. *Baia de Sibabas.*

Michael * Lopez de Legaspe, Generall of the *Spanishe* Armada, on Tuesday the one and twentieth of Nouember, Anno Dom. 1565. set forth of the Hauen of Natiuitie in New *Spaine*, and sayled betwixt the South and the West, and after West-ward, till he came in nine degrees; in that height seeking the Ilands *de los Reyes*, thence to make for the *Philippinas*. After eight dayes, the ship called *Saint Luke* was missing, the Captayne whereof was *Alfonso de Arellano*, suspected to haue maliciously with-drawne himselfe. The Fleet continuing their course in nine and ten degrees, after fiftie dayes had sight of an Iland of Fishermen and many other small Ilands not inhabited, which they passed by. It was agreed that they should heighthen their course to thirteene degrees, in which way they came on Monday the seuenteenth of Ianuary, 1566. to one of the Ilands of Theeues, called *Goean*, and sayling toward it, fixe miles off, fiftie or sixtie *Paraos* swift sayling Barkes with eight or ten men quite naked met them and inuited them to their Habitations, where at night they anchored. The next morning, fixe hundred of their *Paraos* came about them with victuals to sell, Rice, Honey, Sugar-canes, Plantans, Fruits of diuers kinds, and Ginger whereof there groweth great store naturally. Their principall desire in barter was Iron Nails, giuing a large sacke of Rice for a Naile; their sackes deceitfully filled with grauell and chaffe, with Rice in the top. These people are well proportioned and strong. They fought with the *Spaniards* which were watering, and in the time of fight would be trucking with the ships, as senselesse of their danger. A Mariner which stayd behind was slaine, whose death they reuenged with many of the Sauages slaine in the night, one of them being taken and sent into New *Spaine*. Their name fits their Theeuish disposition.

Eleuen dayes after the fleet renewed their Voyage, and course in thirteene degrees eleuen dayes longer, and then had sight of the *Philippinas*, hauing sailed from the Port of Natiuitie, eight thousand miles. They anchored in a faire Bay called *Baia de Sibabas*, and there rode seuen dayes; whiles two Boats went to discouer, one to the North, the other Southward..

A Gentleman of one of them was slaine by an *Indian*, rashly leaping on shoare. These *Indians* haue Iron Launces, with a head or tongue a handfull and halfe long. They haue also shields, Bowes and Arrowes. In making peace each man takes two or three drops of bloud of his arme or brest and mixe both in some Vessell together, which is drunke with Wine and Water. Many *Paraos* came to the *Spaniards* with a white flag in the Prow, in token of peace, and the Admiral erected the like in her Poope to signifie their leaue to enter. These *Indians* are clothed, but bare-foot. The *Spaniards* demanded prouision, which the other promised, but gaue only to the Captayne a sucking Pigge and an Egge. These people are very timorous, perfidious, and therefore suspicious. The Ilands beare Hogges, Goats, Hennes, Rice, Millet, Potatoes, Pome-citrons, Frisoles, Cocos, Plantans, and many sorts of Fruits. They weare Bracelets, and Earrings, and Gold Chaines, and whithersoeuer the Fleet went, was shew of Gold in the Land, whereof they digge but for necessary vses: the Land is their Money bagge.

The Fleet departed hence, and two dayes after came to the Port of the Ile *Tandoia*, where a small Riuer enters; vp which they went in Boats, and came to a Towne called *Camungo*. There they were well entertayned, and had victuals set them: which whiles they were eating, an *Indian* spake some *Spanish* words, and asked for *Antonie Baptista Villalobos*, and Captaine *Cabeça de Vaca*: for which the Lord of the place was angrie with him, and hee appeared no more. The next day the *Spaniards* returning found them armed, threatening them if they came on shoare. They minding not to deale cruelly, *Martin de Goyre* was sent to discouer some conuenient harbour, who saw the Citie *Tandaya*, and other Townes of other neere Ilands, and hauing gone fixtie miles found the great Bay where was *Cabalia* a Towne well inhabited. Thither went the Fleet, and the Inhabitants fled. Onely *Camatuan* the sonne of *Malataque* a blind man, chiefe of that place, came to them, whom they detayned thinking thereby to get some prouision; but in vaine. He sent forth Souldiers which brought him fise and fortie Hogs, leauing in lieu somewhat for exchange, and dismissing *Camatuan*, who had taught the Captaine the names of the neighbouring Iles and of their Gouvernours. Hee brought them to *Mesagua* two and thirtie miles off, and then was sent away appalled and ioyfull. The Iland *Mesagua* hath beene frequent, but then had but twentie Inhabitants, which would not see the *Spaniards*. They went to another Iland where the people were fled with their goods. Then went they to *Butuan* which is subiect to the Ile *Vindena* or the Ilands *Corrientes*. The winde draue them to *Bohol*, where they anchored. The next day they saw a Iunke and sent a Boat to it, which wounded some of their men. They had Arrowes and Lances and a Bafe, and two brasse Peeeces. They cryed to the *Spaniards* *abordo, abordo*. The *Spaniards* sent out another Boat better fitted, which tooke eight, the rest were slaine or fled, hauing fought valiantly. In the Iunke they found white sheets painted, Silke, Almayzaree, Callicos, Iron, Tin, Brasse, and some Gold. The Iunke was of *Borneo*, and so were these *Moore*s. All was restored (their intent being to get friends, and the *Burneois* satisfied).

The Captaine sent the *Saint Iohn* to discouer the Coast of *Butuan*, and learne where the Cinamon was gathered, and to find some good Port in fit place to build. The *Burneois* told the Captaine the cause of the *Indians* flight, that about two yeeres before some *Portugals* bearing themselves for *Spaniards*, had comne thither from the *Molucas*, and hauing made peace with them, set on them and slue about a thousand *Indians*, the cause of that depopulation. This the *Portugals* did to make the *Spaniards* odious, that if they came thither, they might not be admitted. The Captaine sent a well furnished ship to search the Coast, which came to a place where the *Borneo* Gouvernour said he had friends; and leaping on shoare hee was slaine of the *Indians*. The *Saint Iohn* returned from *Butuan*, which said, they had seene the King, and two Iunkes of *Moore*s in the Riuer at anker, and that the Iland was great and rich, and exchanged with them fine Gold for Testons, one for six in equall weight. They bought Wax of the *Moore*s but had Earth inclosed in the Cakes; they also incensed the *Indians* against the *Castilians*, which would haue made purchase of them, but were forbidden by the King. They said, they had there seene Wax, Cinamon, Gold, and other precious things.

On Easter Euen the other ship returned to their great ioy, which had thought her lost, hauing staid twentie dayes longer then her limited time. They had sailed about the Iland *Isla* the space of six hundred miles: and in their returne came to *Subo* a well peopled Iland, and plentifull of all things. The Captaine determined to goe thither to buy prouision, or else to force them. For *Magelane* had beene there; and the King, and most of the Inhabitants were baptised; and acknowledged the Catholike King; *Magelane* also dying in their defence; and thirtie other Souldiers in *Maran*. They also had broken league and slaine some of *Magelane* Souldiers. On Friday April twentie seuen, the Fleet arrived at the Port of *Subo*, and one came from King *Tapas* to them, saying, that Hee with ten chiefe men would come to them. The Captaine expected them a whole day and the next, in which space the Ilanders hid their goods in the Woods. The third day the Captaine sent his brother *Andrew* and the Camp-master, to admonish the King in the *Malayan* tongue, to receiue them, as Vassals of the *Spanish* King. Which not succeeding, hee resolved to vse force. The *Indians* out of other Ilands had assembled together to the number of

two thousand, which prouoked our men, but at the report of the Ordnance ran away, and the Spaniards won the Towne. Many signes of Gold and Gemmes appeared in the Iland. And being situate so neere to the richest Regions, the Gouvernour hopeth accesse thereby to the increase and glorie of the Spanish Crowne, if Spanish Colonies be there planted. The Captaine from the Citie of *Subo* sent the Admirall ship with his brother *Andrew de Vrdanera*, to certifie the *L. Lewys de Velasco*, the sonne of the Vice-roy, what had beene done,

This which followeth is taken out of *Fray Iuan Gonzales de Mendoza* his Spanish Relation of *China*, & is here much abbreviated. *Manilla*.

Miguel Lopez de Legaspi, Generall of the Fleet, and Gouvernour of the Countrey which they should discouer, dyed in the said Ilands with the Title of *Adelantado*, hauing first peopled some of them to the vse of His Maestie, especially that of *Manilla*, which is fise hundred leagues in circuit; in which is seated the Citie of *Luson* (called also *Manilla*) as the Metropolitan of all the Iland, where the Gouvernours haue settled their residence euer since the first discouerie. They haue there founded a Cathedrall Church, and Friar *Dom. Domingo de Salachar* was consecrated the first Bishop thereof in *Madrid*, 1579. At this present there be three Monasteries of Religious men in that Iland, the one of the Order of Saint *Austine*, and were the first that by the Commandement of his Maestie did enter into this Ilands, preaching the Law of the Gospell, which was great profit vnto their soules, yet great trauell vnto them, & cost many of them their liues in doing it: the other Monasterie is of barefoot Friers of the Order of *S. Francis* of the Province of *S. Ioseph*, who haue bin great Examples, with great profit vnto them of those Parts. The third are of the Order of *S. Dominicke*, or Preachers, who haue done their dutie in all things so well as the other. These three Orders were alone in those Ilands for certayne yeares, till now of late time haue gone thither Iesuits, which haue bin a great ayde and helpe vnto their Religion.

When these Spaniards were come vnto these Ilands, they had straight-ways notice of the mightie Kingdome of *China*, as well by the relation of them of the Ilands (who told vnto them the maruels thereof) as also within a few dayes after, they did see and vnderstand, by ships that came into those Ports with Merchants, that brought Merchandize and other things of great curiositie from that Kingdome, and did particularly declare the mightinesse and riches thereof. This being knowne vnto the Religious people of Saint *Austin*, who at that time were alone in those Ilands: but in especiall vnto the Prouinciall, Friar *Martin de Herrada*, seeing the great capacitee or towardnesse which the *Chinois* had more then those of the Ilands in all things, but in especiall in their gallantnesse, discretion and wit: hee straight-ways had a great desire to goe thither with his fellow to preach the Gospell vnto those people, of so good a capacitee to receiue the same: who with a pretended purpose to put it in vre and effect, he began with great care and studie to learne that Language, the which he learned in few dayes: and did make thereof a Dictionary. Then afterwards they did giue great entertaynement and Presents vnto the Merchants that came from *China* for to procure them to carrie them thither, and many other things, the which did shew their holy zeale: yea, they did offer themselues to bee slaues vnto the Merchants, thinking by that meanes to enter in to preach: but yet none of these diligences did take effect, till such time as the Diuine Maestie did discouer a better way, as shall bee declared vnto you in this Chapter following.

CH. III.

of *LIMAHON* a China Robber and Rouer, by whose occasion the Spaniards sent into China.

He Spaniards did enjoy their neere habitation of *Manilla* in great quietnesse & in obedience vnto the Christian King *Don Philip*, and in continuall Traffick with the *Chinois*. But being in this securitie and quietnesse, vnlooked for, they were beset with a mightie and great Armada or Fleet of ships, by the Rouer *Limahon*, of whose vocation there are continually on the Coast, the one by reason that the Countrey is full of people, whereas of necessitie must be many idle persons: and the other and principall occasion, by reason of the great tyrannie that the Gouvernours doe vse vnto the Subjects. This *Limahon* came vpon them with intent to doe them harme as you shall vnderstand. This Rouer was borne in the Citie of *Trucheo*, in the Prouince of *Cuytan*, which the Portugals doe call *Catim*. He was of meane Parentage, and brought vp in his youth in libertie and vice, he was by nature Warlike and euill inclined. He would learne no Occupation, but was ginen to rob in the high-ways, and became so expert that many came vnto him and followed that Trade. Hee made himselfe Captaine ouer them which were more then two thousand, and were so strong that they were feared in all that Prouince where as they were. This being knowne vnto the King and to his Councell, they did straight way command the Vice-roy of the Prouince whereas the Rouer was, that with all the haste possible he should gather together all the Garrisons of his Frontiers, to apprehend and take him, and if it were possible to carry him alieue vnto the Citie of *Taybin*, if not his

head.

Limahon a Chinese Rouer.

Where *Limahon* was borne.

head. The Vice-roy incontinent did gather together people necessary, and in great haste to follow him.

The which being knowne vnto *Limahon* the Rouer, who saw, that with the people hee had, he was not able to make resistance against so great a number as they were, and the eminent danger that was therein, hee called together his Companies, and went from thence vnto a Port of the Sea, that was a few leagues from that place: and did it so quickly and in such secret, that before the people that dwelt therein, could make any defence (for that they were not accustomed to any such assaults, but liued in great quietnesse) they were Lords of the Port, and of all such ships as were there: into the which they imbarcked themselves straight-ways, weighed Anchor and departed to the Sea, whereas they thought to be in more securitie then on the Land (as it was true.) Then he seeing himselfe Lord of all those Seas, beganne to rob and spoyle all ships that hee could take, as well strangers as of the naturall people: by which meanes in a small time he was prouided of Mariners, and other things which before hee lacked, requisite for that new Occupation. He sacked, robbed and spoyled all the Townes that were vpon the Coast, and did very much harme. So hee finding himselfe very strong with fortie ships well armed, of those he had out of the Port, and other that hee had taken at the Sea, with much people such as were without shame, their hands imbrued with Robberies and killing of men, he imagined with himselfe to attempt greater matters, and did put it in execution: he assaulted great Townes, and did a thousand cruelties. So he following this trade and exercise, he chanced to meete with another Rouer as himselfe, called *Vintoquian*, likewise naturally borne in *China*, who was in a Port void of any care or mistrust, whereas *Limahon* finding opportunitie, with greater courage did fight with the ships of the other: that although they were threescore ships great and small, and good Souldiers therein, he did ouercome them, and tooke five and fiftie of their ships, so that *Vintoquian* escaped with five ships. Then *Limahon* seeing himselfe with a fleet of ninetie five ships well armed, and with many stout people in them, knowing that if they were taken, they should be all executed to death; setting all feare apart, gaue themselves to attempt new inuentions of euill, not onely in robbing of great Cities, but also in destroying of them.

For the which, commandement was giuen straight-ways vnto the Vice-roy of that Province (whereas he vsed to execute his euill) that with great expedition he might be taken, who in few dayes did set forth to Sea, one hundred and thirtie great ships well appointed, with forty thousand men in them, and one made Generall ouer them all, a Gentleman called *Omoncon*, for to goe seeke and follow this Rouer with expresse commandement to apprehend or kill him. Of all this prouision, *Limahon* had aduertisement by some secret friends, who seeing that his Enemies were many, and he not able to counteruaile them, neither in shippes nor men, determined not to abide their comming, but to retyre and depart from that Coast: so in flying he came vnto an Iland in secret, called *Tonxacaotican*, which was fortie leagues from the firme Land, and is in the right way of Navigation to the Ilands *Philippinas*.

From this Iland they did goe forth with some of their ships robbing and spoyling all such as they met with Merchandize, and other things that they carried from one Iland to another, and from the Iland vnto the firme, and comming from thence amongst them all, they caused to take two ships of *China* which came from *Manilla*, and were bound to their owne Countrey. And hauing them in their power, they searched them vnder hatches, and found that they had rich things of Gold, and *Spanish* Rials, which they had in trucke of their Merchandize, the which they carried to the Ilands. They informed themselves in all points of the State, and fertilitie of that Countrey, but in particular of the *Spaniards*, and how many there were of them in the Citie of *Manilla*, who were not at that present aboue seuentie persons, for that the rest were separated in the discouering and populing of other Ilands newly found, and vnderstanding that these few did liue without any suspicion of Enemies, and had neuer a Fort nor Bulwarke, and the Ordinance which they had (although it was very good) yet was it not in order to defend themselves nor offend their Enemies, hee determined to goe thither with all his fleet and people, for to destroy and kill them, and to make himselfe Lord of the said Iland of *Manilla*, and other adjacent there nigh the same. So with this determination hee departed from those Ilands whereas hee was retyred, and went to Sea, and sayling towards the Ilands *Philippinas*, they passed in sight of the Ilands of the *Illocos*, which had a Towne called *Fernandina*, which was new founded by the Captayne *Iohn de Salzedo*, who at that instant was in the same for Lieutenant to the Gouvernour: Foure leagues from the same they met with a small Galley, which the said *Iohn de Salzedo* had sent for victuals. He cast about towards her, and with great ease did take her, and did burne and kill all that was in her, and pardoned one of them. This being done, hee did prosecute his Voyage according vnto his determination, and passed alongst, but not in such secret but that he was discouered by the Dwellers of the Towne of *Fernandina*, who gaue notice thereof vnto the Lieutenant of the Gouvernour aforesaid, as a wonder to see so many ships together, and a thing neuer seene before at those Ilands. Likewise it caused admiration vnto him, and made him to thinke and to imagine with great care what it might be, he saw that they did beare with the Citie of *Manilla*, and thought with himselfe, that so great a fleet

Vintoquian a Rouer robbed by this Rouer.

One hundred and thirtie great ships of Warre with forty thousand men. *Omoncon*.

Illocos.

Fernandina.

as that was, could not goe to the place which they bare in with, for any goodnesse towards the dwellers therein, who were voide of all care, and a small number of people, as aforesaid: Wherewith he determined with himselfe with so great speed as it was possible, to ioyne together such *Spaniards* as were there, which were to the number of fiftie foure, and to depart and procure to get the fore-hand of them, to aduertise them of *Manilla*, and to aide and helpe them to put their Artillerie in order, and all other things necessarie for their defence.

1574. This *Limahon* was well prouided of prouision, and all other things necessarie, and hauing the wind faire, hee was alwaies in the fore-front, and came in the sight of *Manilla* vpon Saint *Andrewes* Eue, in the yeere 1574. whereas hee came to an anchor that night with all his whole estate.

For all the contradiction of the winde this same night the foure hundred *Chinois* did put themselves within a league of the Citie, vpon Saint *Andrewes* day at eight of the clocke in the morning, whereas they left their Boats and went on land, and in great haste began to march forwards in battel aray diuided in two parts, with two hundred Harquebusses afore, and immediately after them other two hundred Pike-men: and by reason that they were many, and the Countrey very plaine, they were straightwaies discovered by some of the Citie, who entred in with a great noise, crying, *Arme, arme, arme, the Enemies come.* The which aduice did little profit, for that there was none that would beleue them: but beleueed that it was some false alarme done by the people of the Countrey for to mocke them. But in conclusion, the Enemies were come vnto the house of the Generall of the Field, who was called *Martin de Goyti*, which was the first house in all the Citie that way which the Enemies came. And before that the *Spaniards* and Souldiers that were within the Towne could be fully perswaded the rumour to be true, the Enemies had set fire vpon his house, and slue him and all that were within.

Martin de Goyti slaine.
At this time, by the order of his Maiestie was elected for Gouvernour of these Ilands *Philippinas*, *Guido de Labacates*, after the death of *Miguel Lopez de Legaspi*, who vnderstanding the great fleet and power of *Limahon* the Rouer, and the small resistance and defence that was in the Citie of *Manilla*, with as much speed as was possible he did call together all their Captaines and dwellers therein: and with a generall consent they spared no person of what qualitie and degree soeuer he was, but that his hand was to helpe all that was possible, the which endured two

Guido de Labacates Gouvernour.
dayes and two nights, for so long the Rouer kept his ships and came not abroad. In which time of their continuall labour, they made a Fort with Pipes and Boards filled with sand and other necessities thereto belonging, such as the time would permit them: they put in carriages, foure excellent Peeces of Artillerie that were in the Citie. All the which being put in order, they gathered all the people of the Citie into that little Fort. The night before the Enemy did giue assault vnto the Citie, came thither the Captaine *Iohn de Salzedo*, Lieutenant vnto the Gouvernour. The Rouer in the morning following, before the breake of the day (which was the second after he gaue the first assault) was with all his fleet right against the Port, and did put a-

A fort erected.
land fixe hundred Souldiers, who at that instant did set vpon the Citie, the which at their pleasure they did sacke and burne. They did assault the Fort with great cruelty, as men fleshed with the last slaughter, thinking that their resistance was but small. But it fell not out as they did beleue, for hauing continued in the fight almost all the day, with the losse of two hundred men, that were slaine in the assault, and many other hurt, he straightwaies departed from thence, and returned the same way that he came, till they arriued in a mightie Riuer, fortie leagues from the Citie of *Manilla*, that is called *Pangasinan*, the which place or soyle did like him very well, and where he thought he might be sure from them, who by the commandement of the King went for to seeke him. There hee determined to remayne, and to make himselfe Lord ouer all that Countrey, the which he did with little trauell, and built himselfe a Fort one league within the Riuer, whereas he remayned certaine dayes, receiuing tribute of the Inhabitants thereabouts, as though he were their true and naturall Lord: and at times went forth with his ships robbing and spoyling all that he met vpon the coast. And spread abroad, that he had taken to himselfe the Ilands *Philippinas*, and how that all the *Spaniards* that were in them, were either slaine or fled away. With this consideration they entred into counsell, and did determine to ioyne together all the people they could, and being in good order, to follow and seeke the Rouer. Then the Gouvernours commanded to be called together all the people bordering thereabouts, and to come vnto the Citie whereas hee was. Likewise at that time hee did giue aduice vnto such as were Lords and Gouvernours of the Ilands, called *Pintados*, commanding them to come thither, with such ships as they could spare, as well *Spaniards* as the naturall people of the Countrey.

Citie burne.
The Generall of the field with the people aforesaid, did depart from *Manilla* the three and twentieth day of March, Anno 1575. and arriued at the mouth of the Riuer *Pangasinan* vpon tenable Wednesday in the morning next following, without being discovered of any. Then straightwaies at that instant the Generall did put a-land all his people and foure Peeces of Artillerie, leauing the mouth of the Riuer shut vp with his shipping, in chayning the one to the other, in such sort, that none could enter in neither yet goe forth to giue any aduice vnto the Rouer of his arriuall: he commanded some to goe and discouer the fleet of the Enemy, and the

Pangasinan.

place whereas he was fortified, and charged them very much to doe it in such secret sort; that they were not espied: for therein consisted all their whole worke. Hee commanded the Capitaine *Gabriel de Ribera*, that straightwaies he should depart by Land, and that vpon a sudden he should strike alarme vpon the Enemie, with the greatest tumult that was possible. Likewise he commanded the Captaines *Pedro de Cauer* and *Lorenzo Chacon*, that either of them with forty Souldiers should goe vp the Riuer in small ships and light, and to measure the time in such sort, that as well those that went by land, as those that went by water, should at one instant come vpon the Fort, and to giue alarme both together, the better to goe thorow with their pretence: and he himselfe did remayne with all the rest of the people, to watch occasion and time for to aide and succour them if need be required. This their purpose came so well to passe; that both the one and the other came to good effect: for those that went by water, did set fire on all the fleet of the Enemie: and those that went by land at that instant had taken and set fire on a Trench made of timber, that *Limahon* had caused to bee made for the defence of his people and the Fort: and with that furie they slue more then one hundred *Chinos*, and tooke prisoners twenty women which they found in the same Trench, but when that *Limahon* vnderstood the rumour, hee tooke himselfe straightwaies to his Fort which hee had made for to defend himselfe from the Kings Nauie, if they should happen to finde him out.

The next day following, the Generall of the field did bring his Souldiers into a square battell, and beganne to march towards the Fort, with courage to assault it if occasion did serue thereunto: hee did pitch his Campe within two hundred paces of the Fort, and found that the Enemie did all that night fortifie himselfe very well, and in such sort, that it was perillous to assault him, for that he had placed vpon his Fort three Peeces of Artillerie, and many Bases, besides other Engines of fire-worke. Seeing this, and that his Peeces of Artillerie that hee brought were very small for to batter, and little store of munition, for that they had spent all at the assault which the Rouer did giue them at *Manilla*, the Generall of the field, and the Captaines concluded amongst themselves, that seeing the Enemie had no ships to escape by water, neither had he any great store of victuals for that all was burnt in the ships, it was the best and most surest way to besiege the Fort, and to remayne there in quiet vntill that hunger did constraine them either to yeeld or come to some conclusion: which rather they will then to perish with hunger.

This determination was liked well of them all, although it fell out cleane contrarie vnto their expectation; for that in the space of three moneths that siege endured, this *Limahon* did so much that within the Fort he made certaine small Barkes, and trimmed them in the best manner he could, wherewith in one night he and all his people escaped.

It happened vpon a day, that there came to the Campe a ship of *Mignell de Loarcha*, wherein was Friar *Martin de Herrada* Prouinciall of the *Augustine* Friars. Seuen leagues after they were out of the mouth of *Pagasinan*, they met with a ship of *Sangleyes*, who made for the Port, and thinking them to bee Enemies, they bare with them (hauing another ship that followed them for their defence) and had no more in them but the said Prouinciall and five *Spaniards*, besides the Mariners. This ship of *Sangley* seeing that hee did beare with them, would haue fled, but the winde would not permit him, for that it was to him contrary, which was the occasion that the two ships wherein the *Spaniards* were, for that they did both sayle and rowe, in a small time came within Cannon shot. In one of the ships there was a *Chino*, called *Sinsay*. This *Sinsay* went straightwaies into the fore-ships, and demanded what they were, and from whence they came: and being well enformed, hee vnderstood that hee was one of the ships of warre that was sent out by the King of *China*, to seeke the Rouer *Limahon*, who leauing the rest of the fleet behind, came forth to seeke in those Ilands to see if hee could discouer him to bee in any of them: and the better to bee enformed thereof, they were bound into the Port of *Buliano*, from whence they came with their two ships: from whom they would haue fled, thinking they had beene some of the Rouers ships. Being fully perswaded the one of the other, they ioynd together with great peace and friendship: the *Spaniards* straightwaies entred into their Boat, and went vnto the ship of the *Chinos*, and carried with them the aforesaid *Sinsay*, for to be their Interpreter, and to speake vnto the *Chinos*. In the said ship came a man of great authoritie, who was called *Omoncon*, who brought a Commission from their King, and shewed it vnto the *Spaniards*, and vnto the Father Prouinciall: in the which the King and his Counsell did pardon all those Souldiers that were with *Limahon*, if that forthwith they would leaue him and returne vnto the Kings part: and likewise did promise great gifts and fauour vnto him that did either take or kill the aforesaid Rouer. Then did *Sinsay* declare vnto him of the comming of the Rouer vnto the Ilands, and all that happened in the siege of the Citie, as aforesaid: and how they had him besieged in the Riuer of *Pagasinan*, from whence it was not possible for him to escape.

The Capitaine *Omoncon* reioyced very much of these newes, and made many signes of great content, and did embrace the *Spaniards* many times, and gaue other tokens whereby hee did manifest the great pleasure hee receiued, and would therewith straightwaies depart vnto the

Limahon after three moneths siege escaped.

rest of the fleet. And for that they looked euery day for the death or imprisonment of the Rouer, the better to enforme himselfe: hee determined (for that it was so nigh hand) to goe and see the Generall of the field in *Paganfinan*, and carrie with him *Sinsay*, one that was known both of the one and the other: by whose meanes they might treat of such things that best accomplished the confirmation of the peace and friendship betwixt the *Chinois* and the *Spaniards*, as also of the death or imprisonment of *Limabon*. With this resolution, the one departed vnto *Paganfinan*, whereas they arriued the same day, and the others vnto *Manilla*, whither they went for victuals.

Omoncon remayned there certaine dayes, after the which he seeing that the siege did long endure, and that his staying might cause suspicion of his death: and againe, that the whole fleet did tarrie his comming to his intelligence of the Rouer, being fully perswaded and certaine, that he could not escape the *Spaniards* hand: they had him in such a straight, and that they would without all doubt, send him vnto the King alieue or dead (as they promised him) hee was determined to returne vnto *China*, with the good newes that hee had vnderstood, with a determinate intent, to returne againe and carrie the Rouer, after that they had him prisoner. With this resolution in the end of certaine dayes hee went vnto the *Gouernour*, certifying him of his pretence, whereby hee might giue him licence to put it in execution. The *Gouernour* did like well of his pretence, and did promise him the same, the which the Generall of the field did offer vnto him: and which was, so soone as the Rouer should be taken prisoner, or slayne, to send him vnto the King without any delay, or else, to put him whereas he should be forth-comming, and to giue them aduertisement to send for him, or come himselfe: and did offer him more, that for his voyage he should be provided forthwith of all things necessarie, without lacking of any thing. *Omoncon* did giue him great thanks for the same, and in recompence thereof did promise vnto the *Gouernour*, for that he vnderstood, and had intelligence of the Fathers, of Saint *Augustine*, that his Honour, and his Antecessor, and the *Adelantado*, *Miguel Lopez de Legaspi*, had desired many times to send vnto the Kingdome of *China* some Religious men, to treat of the preaching of the Gospell, and to see the wonders of that Kingdome, and how that they neuer could put this their desire in execution, for that those *Chinois* which came thither, although they did offer them whatsoever they would demand, fearing the punishment that should be executed on them according vnto the Lawes of the Kingdome: hee did promise him, that he would carrie them with him vnto *China*, such Religious men as his Honour would command, and some Souldiers, such as would goe with them: hoping with the good newes that hee carried, to runne in no danger of the Law, neither the Vice-roy of *Ancheo* to thinke euill thereof, and for a more securitie that they should not bee euill entreated, hee would leaue with him pledges to their content.

Omoncon promieth to carrie the Friers vnto *China*.

A good pretence.

The Friers names that went to *China*.

A token that fine cloth is esteemed.

Spanish bountie.

The *Gouernour* being very ioyfull of these newes, did therewith send for the Prouinciall of the *Augustine* Friers, who was elected but few dayes past: his name was Frier *Alonso de Aluaredo*, vnto whom hee declared the offer that the Captaine *Omoncon* had made vnto him, whereat he reioyced. They determined that there should goe but two Religious men, by reason that at that time there was but a few of them, and two Souldiers in their companie. The Religious men should be, Frier *Martin de Herrada* of *Pamplona*, who left off the dignitie of Prouinciall: and in companie with him should goe, Frier *Hieronimo Martin*, who also was very well learned, and of the Citie of *Mexico*: the Souldiers that were appointed to beare them companie were called, *Pedro Sarmiento*, chiefe Sergeant of the Citie of *Manilla* of *Vilorado*, and *Miguel de Loarcha*, both principall men, and good *Christians*, as was conuenient for that which they tooke in hand. These Fathers did carrie them for this purpose, that if they did remaine there with the King, preaching of the Gospell, then they should returne with the newes thereof, to giue the *Gouernour* to vnderstand of all that they had seene, and happened vnto them: and likewise vnto the King of *Spain*, if need did so require. And the *Gouernour* in token of gratitude, did giue vnto the Captaine *Omoncon* in the presence of them all, a gallant Chaîne of Gold, and a rich Robe of crimson in graine: a thing that hee esteemed very much, and much more esteemed in *China*, for that it is a thing that they haue not there. Besides this, they did ordayne a reasonable Present for to send vnto the *Gouernour* of *Chincheo*, hee that dispatched *Omoncon* by the commandement of the King, to goe and seeke the Rouer: also another Present for the Vice-roy of the Prouince of *Ochian*, who was at that present in the Citie of *Ancheo*. And for that *Sinsay* should not finde himselfe agreed (who was a Merchant well knowne amongst them, and perhaps might bee the occasion of some euill and disturbance of their pretence) they gaue vnto him also another Chaîne of Gold, as well for this, as also for that hee was euer a true and perfect friend vnto the *Spaniards*. Then straightwaies by the commandement of the *Gouernour* there were brought together all such *Chinois* as were captiue and taken from *Limabon* out of the Fort aforesaid, at *Paganfinan*, and gaue them vnto *Omoncon*, to carrie them free with him: and gaue likewise commandement that the Generall of the field, and all such Captaines and Souldiers that were at the siege of the Fort, should giue vnto him all such as did there remaine: binding himselfe to pay vnto the Souldiers,

Souldiers, to whom they did appertain, all whatsoever they should bee valued to bee worth.

Vpon a Sunday at the break of day, being the five and twentieth of Iune, after they had prayed vnto God to direct their voyage, they set sayle with a prosperous wind: there were with the Friars, Souldiers and men of seruice, twentie persons, besides the *Chinos* that were captiues, and the people of the Captaine *Omoncon*. They were not so soone off from the coast, but the wind abated, and they remayned becalmed certaine dayes: but afterwards they had a lustie gale, that carried them forwards. The *Chinos* doe gouerne their ships by a compasse diuided into twelue parts, and doe vse no Sea Cards, but a brieue description or Ruter, wherewith they sayle: and commonly for the most part they neuer goe out of the sight of Land. They marvelled very much when that it was told them, that comming from *Mexico* vnto *Philippinas*, they were three moneths at the Sea and neuer saw Land. Vpon the Sunday following, we had sight of the Land of *China*: so that wee found all our Voyage from the Port of *Buliano*, from whence wee had last departed, vnto the firme Land to bee one hundred and fortie leagues; and twentie leagues before they came in the sight thereof, they had sounding at threescore and ten and fourescore fathom, and so waxed lesse and lesse vntill they came to the Land: which is the best and surest token they haue to bee nigh the Land. In all the time of their Voyage the Captaine *Omoncon* with his Companie shewed such great courtesie and friendship to our men, as though they had bene the owners of the said ship: and at such time as they did embarke themselves, hee gaue his owne Cabine that was in the sterne to the Friars, and vnto *Pedro Sarmiento*, and to *Miguel de Loarcha*, hee gaue another Cabine that was very good, and commanded his companie in the ship that they should respect them more then himselfe: the which was in such sort, that on a day at the beginning of their Voyage, the Fathers found them making of Sacrifice vnto their Idols, and told them, that all which they did was a kinde of mockage, and that they should worship but onely one God: and willed them to doe so no more. Who onely in respect of them did leaue it off, and not vse it after in all the Voyage: whereas before they did vse it euery day many times. Besides this, they would worship the Images that the Friars did carrie with them, and kneele vpon their knees with great shew of deuotion: who now hauing sight of the firme Land, in so short time, and passed that small Gulfe so quietly, which was wont to bee very perillous and full of stormes: they did attribute it vnto the Prayers of the Friars, their companions and Souldiers. As they drew neerer the Land, they might discover from the Sea, a very gallant and well towred Citie, that was called *Titubul*, whereas the King hath continually in Garrison ten thousand Souldiers, and is vnder the gouernement of the Prouince of *Chincheo*. The next day wee came vnto a Watch-towre, which was situated vpon a Rocke at the entrie into a Bay, who had discovered our ship, and knew the Standard or Flagge to bee the Kings: and made a signe vnto seuen ships which were on the other side of the Point, which was part of a companie ordayned for to keepe and defend the coast, which were more then foure hundred. Straightwayes the Captaine of the seuen ships came forth to know what wee were: Hee issued forth from behind the Point, with three ships that did rowe with Oares very swift: and when he came nigh vnto them, he shot at them to make them to amaine: the which *Omoncon* would not doe, for that he supposed (as afterwards hee did confesse) that he should be some man of little estimation, and not the Generall of the coast. But as he drew nigher vnto him, he did know him by the Flagge hee bare on the sterne, in the Foist wherein he was himselfe with his Souldiers, and straightwayes caused to amaine his sayles, and tarried for him. The Generall did the like, and stayed behind, sending a Boat for to bring the Captaine vnto him, and to declare what hee was, and from whence hee came. *Omoncon* did forthwith embarke himselfe into his Boat without any resistance, but rather with feare that he should be punished for that hee did flee from him. The Generall gaue him good entertainment.

This Generall was a goodly man of person, and was very well apparelled, and did sit in a Chaire in the sterne of his ship, the which was all couered to keepe away the Sunne: he commanded the Captaine *Omoncon* to sit downe by him vpon the hatches, without Chaire or any other thing, who did obey him, although first he did refuse it with great modestie, as not wor-
thie to haue that honour, which was not esteemed a little. After that he was set, hee gaue him to vnderstand in effect of all his voyage and successe, and in what extremitie hee left *Limahon*, and also how that he carried with him the Friars and other *Spaniards*, which went to carrie the newes, and to treat of peace with the Vice-roy of *Aucheo*: vnto whom, and vnto the Gouer-
nour of *Chincheo*, he carried presents, sent from the Gouerneur and Generall of the field of the Ilands *Philippinas*. When the Generall had heard this relation, he commanded the Boat to re-
turne and to bring them before him, that he might see what manner of men they were of per-
son, and the vse of the apparell: and likewise to satisfie himselfe of other desires that came in-
to his mind by that which *Omoncon* had said of them. The Fathers and their companions did
obey the commandement, and did embarke themselves in the Boat, and came vnto the ship
whereas the Generall receiued them with great courtesie after his fashion.

They departed
towards *China*.

§. IIII.

Friar MARTIN DE HERRADA, and other Spaniards entertaynment
in China, and their returne to the Philippinas.Tansuso, or
Tansuso.

Itchin a little while after, Omoncon and his companie arriued at the Port of Tansuso hard by, vpon Wednesday in the euening, being the fift day of Iuly. This Tansuso is a gallant and fresh Towne of foure thousand Housholders, and hath continually a thousand Souldiers in Garrison, and compassed about with a great and strong wall, and the gates fortified with plates of Iron, the foundations of all the houses are of Lime and Stone, and the walls of Lime and Earth, and some of Bricke: their houses within very fairely wrought, with great Courts, their streets faire and broad all paved. Before that Omoncon did come vnto an anchor, they saw all the Souldiers and the people of the Towne were gathered together vpon the Rockes that were ioyning vnto the Port, all armed ready vnto the battell, amongst whom there was a principall Captaine, and three more of his companions, that were sent him by the Gouvernour of Chinchea, whom they doe call in their language, *Insuanto*, who had vnderstanding of the comming of Omoncon, when the ship entred into the Port, Omoncon did salute the Towne with certaine Peeces of Artillrie, and discharged all his Harquebuses sixe times about, and therewithall tooke in her sayle, and let anchor fall. Then straightwaies the Captaine whom the *Insuanto* had sent, came aboard the ship, who had expresse commission, not to leaue the companie of our people after that they were disembarked, till such time as they came whereas he was, but to beare them companie, and to prouide them of all things necessarie: the which he did accomplish.

Ensignes to
know the
Loyties.

All these Captaines and Ministers of the King doe weare certaine ensignes for to be knowne from the common people, to wit, broad Wastes or Girdles embossed after diuers manners: some of Gold and Silver, some of the Tortois shell, and of a sweet wood, and other some of Iuorie, the higher estates hath them embroidered with Pearles and precious stones, and their Bonnets with two long eares, and their Buskins made of Sattin, and vnshorne Veluer.

Board-licence.

Then after, so soone as they were come to an anchor in the Port, the Iustice did send them a Licence in writing for to come forth of the ship, as a thing necessarie, for that without it the Waiters or Guards of the water side, will not suffer them to put foot on land. This Licence was written vpon a boord whited, and signed by the Iustice, whose charge it is to giue the Licence. Then when they came ashoare, there were the Souldiers that were appointed by the *Insuanto* in a readinesse to beare them companie, and did direct and leade them vnto the Kings houses of the said Citie: the like hath euery Citie almost throughout all the Kingdome, and there they bid lodge them. These houses are very great and very well wrought, and gallant, with faire Courts below, and Galleries aboue: they had in them Stanges or Ponds of water full of fish of sundry sorts.

The first lan-
ding of the
Friars.

The people of the Citie did presse very much to see these strangers, so that with the presse, as also with the great heate, they were maruellously afflicted: which being perceiued by the Iustice, he gaue order that they might bee eased of that trouble, and caused Sergeants to keepe the doore, and their Yeomen to make resistance against the people. When night was come, the Iustice of the Citie did make a Banquet according to the fashion of the Countrey: and it was in the fashion following. They were carried into a Hall that was very curiously wrought, wherein were many Torches and waxe Candles light, and in the midst thereof was set for euery one of the Guests a Table by himselfe, as is the vse and fashion of that Countrey: euery Table had his couering of Damaske or Sattin very well made, the Tables were gallantly painted, without any Table-clothes, neither doe they vse any, for they haue no need of them, for that they doe cate all their victuals with two little stickes made of Gold and Silver, and of a marvellous odoriferous wood, and of the length of litle Forkes, as they doe vse in *Italie*, with the which they do feed themselves so cleanly, that although their victuals be neuer so small, yet doe they let nothing fall, neither foule their hands nor faces. They were set downe at these Tables in very good order, and in gallant Chaires, in such sort, that although they were euery one at his Table by himselfe, yet they might see and talke one with another, they were serued with diuers sorts of cates, and very well dressed, both of flesh and fish, as gamons of Bacon, Capons, Geese, whole Hens, and pieces of Beefe, and at the last, many little baskets full of sweet meats made of Sugar, and Marchpanes all wrought very curiously. They gaue them Wine of an indifferent colour and taste, made of the Palm-tree. All the time that the supper lasted, there was in the Hall great store of Musicke of diuers Instruments, whereon they played with great comfort, some one time and some another. The Instruments which they commonly doe vse, are Hoybuckes, Cornets, Trumpets, Lutes, such as be vsed in *Spaine*, although in the fashion there is some difference. There was at this Banquet (which endured a great while) the Captaine that was ordained for their Guard, and the Captaine Omoncon, and *Sinsay*. When Supper was done

The vse of
their banquetsWine of a
Palme tree.

done, they were carryed into very faire Chambers, whereas were faire Beds, where they slept and eated themselves.

The next day in the morning, was brought vnto them their ordinarie victuals, and that in a bundance, as well of Flesh as of Fish, Fruits and Wine, to be dressed vnto their owne content, and according vnto their manner: they would take nothing for the same, for so they were commanded by the *Insuantes*. This was brought vnto them euery day, so long as they were there, & in the way when as they went vnto *Chincheo*. The same day arriued a Captayne of fortie Ships in the same Port, and so soone as hee was alhoare, he went straight-ways vnto the Palace for to see the strangers: who being aduertised of his comming, came forth and receiued him at the Palace gate, whereas was vied betwixt them great courtesie. The Captayne came with great Maiestie, with his guard of Souldiers and Mace-bearers before him, with great musike of Hoy-buckles, Trumpets and Drums, and two Whiffelers, or Typ-staues, that made roome, putting the people aside: also there came with him two executors of Iustice, hauing each of them in their hands a Set made of canes, which is an instrument wherewith they doth whip and punish offenders. When this Captayne came vnto the Palace gate, whereas the father Friars and their companions did receiue him, he was brought on the shoulders of eight men very richly apparelled, in a chayre wrought of Iuorie and Gold, who stayed not till they came into the inner Chamber, whereas he did alight from the chayre, and went straight vnder a Cloath of estate, that was there ordinarily for the same purpose, and a Table before him: there hee sate downe, and straight-ways arose vp, and standing he did receiue the strange ghests, who did courtesie vnto him according vnto their fashion, which is to joyne their hands together, and to stoope with them and their heads downe to the ground: hee gratified them againe, with bowing his head a little, and that with great grauitie. These speeches being finished, there was brought forth certaine pieces of blacke Silke of twelue vares long a piece. And his Officers did put on the Friars shoulders each of them two, which was for either shoulder one, and was brought about their bodies and girt therewith: the like was done in order vnto the *Spanish* Souldiers, and vnto *Omoncon*, and *Sinsay*, and to their Interpreter. But vnto *Omoncon*, and *Sinsay*, was giuen vnto either of them a branch or Nosegay made of Siluer, which was set vpon their heads, which is accustomed honour, that is done vnto such as haue done some great enterprife, or such like. After that this ceremonie was done, they played vpon the Instruments aforesayd, which came with the Captayne. In the meane time of their musike, there was brought forth great store of Conserues, March-panes, and things made of Sugar, and excellent good Wine: and so being on foote standing, hee caused them to eate, and hee himselfe from the Chayre whereas he sate, did giue them to drinke euery one in order, without rising vp, which is a ceremonie and token of great fauour, and of loue.

This being done, hee arose from the chayre vnder the Cloath of state, and went and sate downe in that which was brought on mens backs, and with declyning of his head a little, hee departed out of the Hall and out of the house, and went vnto his owne house, whereas by the counsell of *Omoncon*, and *Sinsay*, within an houre after they should goe and visite him, the which they did: hee receiued them maruellously well and with great courtesie: who maruelled at his great Maiestie and auctoritie, for that *Omoncon* and *Sinsay*, when they did talke with him were vpon their knees, and so did all the rest. Hee gaue them againe in his owne house a gallant banquet, of diuers sorts of Conserues and Fruits, and excellent Wine of the Palme-tree, and did talke and reason with them in good sort, and was more familiar than at his first visitation.

After that the Fathers with their companions had remained two dayes in the Port of *Tansuse*, the thrid day they departed in the morning towards *Chincheo*. At their going forth of the Town, they were accompanied with a great number of Soldiers, both Harquebusses & Pikes, and before them a great noyle of Trumpets, Drums, and Hoy-bucks, till such time as they came vnto the Ri- uers side, whereas was a Brygandine prouided and made readie in all points, to carrie them vp the Riuer: all the streets alongst whereas they went, there followed them so much people that it was innumerable, and all to see them. All alongst the Riuer whereas they went, was seated with Villages very gallant and fresh, both on the one side and on the other.

At the end of the two leagues, they came vnto a great Bay, where was at an Anchor a flete of more then one hundred and fiftie Ships men of warre, whose Generall was this Captaine, whom wee haue spoken of. At such time as the flete did discouer them, they began to salute them, as well with great pieces of Artillerie, as with Harquebusses, and other kinde of pastimes, which commonly they doe vse at such times.

Our *Spaniards* did trauell vp the Riuer more than three leagues, hauing continually both on the one side and on the other, very many and faire Townes, and full of people. In the end of the three leagues, they went aland halfe a league from the Towne of *Tangoa*, whereas straight- ways all such things as they carryed with them, were taken vpon mens backs, and carryed vn- to the Towne before them, whereas they were carrying their comming, for to giue them great entertaynement. At their going alhoare, they found prepared for the two Religious men, little Chayres to carrie them vpon mens backs, and for the Souldiers and the rest of their companions horse. The Fathers did refuse to bee carryed, and would haue gone a foot, but *Omoncon*, and the

other Captayne would not consent thereunto. The Fathers obeyed their reasons, and entred into the Chayres, and were carryed with eight men a piece, and the other their companions with foure men a piece, according vnto the order giuen by the Gouvernour. Those that carryed the Chayres, did it with so good a will, that there was striving who should first lay hands to them. This Towne of *Tangoa*, hath three thousand Souldiers, and is called in their language *Coan*: at the entring in, it hath many Gardens and Orchards and a street where through they carryed the *Spaniards* vnto their lodging, they affirmed to bee halfe a league long, and all the street whereas they went, was full of boards and stalles whereon was layd all kinde of Merchandise very curious, and things to bee eaten, as fresh Fish and salt Fish of diuers sorts, and great abundance of Fowle, and Flesh of all sorts, Fruits and greene Herbes in such quantitie, that it was sufficient to serue such a Citie as *Sinilis*. They were brought vnto the Kings house, which was very great, marueilously well wrought with stone and bricke, and many Halls, Parlours, and Chambers, but none aboue, but all below. So soone as they were a foote, there was brought from the Captayne or Iustice of the Towne, whom they doe call *Ticoan*, a message, bidding them welcome, and therewith a present, which was great store of Capons, Hennes, Teales, Duckes, Geese, Flesh of foure or fise sorts, fresh Fish, Wine, and fruits of diuers sorts, and of so great quantitie, that it was sufficient for two hundreth men. All the which they would haue giuen for a little coole ayre, by reason that it was then very hot weather; and againe, the great number of people that came thither to see them did augment it the more. In the Euening the two *Spanish* Souldiers went forth into the streets to walke abroad, and left the two Friars within their lodging, vnto whom afterwards they did giue intelligence of all things that they had seene, which did cause great admiration: the wall of the Towne was very broad, and wrought with lyme and stone, full of loope-holes and watch-towers. And as they passed through the streets there came forth of a house a very honest man, as it seemed, who was very well apparelled and stayed them, for that in the same house, there were certayne Dames principall personages, that did see them a farre off, and not content therewith, they did request them with great courtesie for to enter into the house, that they might the better see them: the which they did straightwayes accomplish, and entring in, they were brought into a court, whereas was set Chayres for them to sit downe, and the Ladies were there a little from them, beholding them with great honestie and grauitie. Then a little after, they set them a banquet with March-panes and sweet meats made of Sugar, which they did eate without any curiositie, and drunke after the same. The banquet being done, they made signes and tokens vnto them, that they receiued great content with their sight, and that they might depart when that their pleasure was, the which they did, after that they had made great curtellies with thanks, for their friendship receiued of both parts.

china Women. So after they had taken their leaue, they went to see a House of pleasure, that was hard by the Towne-wall, wrought vpon the water, with very faire galleries and open lodges to banquet in, made of Masons worke, and therein many Tables finely painted, and round about it Cisterns of water, wherein was store of Fish, and joyning vnto them Tables of very faire Alabaster, all of one stone, and the least of them was of eight spannes long: and round about them were brookes of running water, that gaue a pleasant sound in the meane time they were banquetting, and nigh thereunto many Gardens full of all sorts of Flowers. And a little from that place they saw a

House of pleasure. Bridge all of Masons worke, and the stones very well wrought and of a mightie bignesse, they measured some of them, that were twentie and two and twentie foote long, and fise foot broad, and seemed vnto them, that it was a thing impossible to bee layd there by mans hands. Of this bignesse, yea and bigger they did see layd vpon many other Bridges, in the discourse of their voyage, going to *Chincheo* and *Ancheo*. The next day in the morning when they were vp and ready, they found in the house all things in a readinesse and in very good order, for their departure, as well their little Chayres, and Horse, as for men to carrie their stuffe and apparell, which did not a litle make them to maruell, how that euery one of them with a waster vpon their shoulders, did diuide their burthen in two parts, fixe rones before and fixe rones behinde, and did trauell with the same with so great ease and swiftnesse, that the Horse could not indure with them. They went vnto the *Ticoan* his house. They found him with great Maiestie, but yet gaue them great and good entertaynement. Hee did likewise put vpon each of them, two pieces of Silke, in the same order as the Gouvernour of *Tansuso* did.

Stone-bridge. From this Towne of *Tangoa* vnto *Chincheo*, is thirteene leagues, and so playne way that it giueth great content to trauell it: in all the way they could not see one spanne of ground but was tilled and occupied. The like they doe say, is of all the ground that is in the whole Kingdome: it is full of people, and the Townes one so neere to another, that almost you can not iudge them to bee many Townes but one, for that there was but a quarter of a league distant, one Towne from another, and it was told vnto them that in all the Prouinces of the Kingdome, it is peopled in the same order. All their ground they till is watred, which is the occasion of the fruitfulness therof, so that they doe gather fruit all the yeere long, and our *Spaniards* did see in all places whereas they came, that they were gathering of Rice, some new sprung vp, some with eares, and some ripe. They doe plough and till their ground with Kine, *Bufalos*, and Bulls, which are

Thrifte tillage

Plowing with Bufalos.

very

very tame, and although they bee very great, yet be their hornes but of a spanne long and turning backwards to the tayle, in such sort that they cannot doe any hurt or harme with them: they doe gouerne them with a coard that is made fast to a ring that is in their nose, and in like sort doe they gouerne the *Bufalos*. They doe feed them commonly in the fields of Rice, for that they haue no other grassings, and all the time that they are feeding, a Boy doth ride on euery one of them to disturbe them, that they doe no harme therein. But to cate the weedes and grasse that doe grow in the Rice.

All the high-ways are couered with the shadow of very faire Orchards, which doe garnish it very much, and they are planted in very good order: and amongst them there are Shops, where-
10 as is sold all manner of Fruits, to the comfort of all such as doe trauell by the way, which is an infinite number, some on foote, some on horse-backe, and others in little chayres. Their waters by the high-ways, are very good and light. The same day when they had trauelled halfe way, they saw a farre off comming marching towards them in very good order, a Squadron of Souldiers, which at the first caused them to maruell, and to bee afrayd, till such time as they drew nigher, it was told vnto them, that it was the Captayne of the guard vnto the *Insuanto*, or Gouverneur of *Chincheo*, who came by his order to receiue them with foure hundred Souldiers, very well armed with Pikes and Harquebusses, and well apparelled. So soone as the Captayne came vnto them, hee was mounted on a bay Horse, but of small stature, as they for the most part bee in all that Prouince, hee alighted and came vnto the Fathers, and his companions (who likewise
20 did alight from their little Chayres) and did salute the one the other with great courtesie.

The Captayne came very well apparelled with a Chayne of gold about his necke, a man of a good audacitie and vnderstanding. Hard vnto his stirrop hee had a Page that went with him, and carried a great *Tira sol*, made of Silke, that did shadow him all ouer. Hee had before him great musicke of Trumpets and Hoybuckles, whereon they played in great concord. This Captayne with his foure hundred Souldiers, did continually guard them for pompe, not necessitie; for the people may not weare weapons but the Souldiers. In this high-way continually there went and came many packe-Horses, laden with Merchandise and other things, but the most part of them were Mules. The high-ways are very broad, that twentie men may ride together
30 on a ranke, and one not hinder another, and are all paved with great stones.

Vpon a Saturday being the eleuenth of Iuly, came our *Spaniards* vnto the Citie of *Chincheo*,
40 feure houres before it was night. This Citie is of the common sort in that Kingdome, and may haue seuentie thousand households. It is of great trafficke and well provided of all things, for that the Sea is but two leagues from it: it hath a mightie Riuer running alongst by it downe into the Sea, by which is brought by water and carryed downe all kinde of merchandise. There is a Bridge ouer the sayd Riuer, which is supposed to bee the fairest that is in all the world: it hath a draw bridge to serue in time of warres, or for any other necessitie: the Bridge is eight hundred paces long, and all wrought with stones of two and twentie foote long, and fise foote broad, a thing greatly to bee maruelled at: at the entrie thereof, there were many armed Souldiers ready to fight, who when they came within Harquebuste shot did salute them in very good order. There was nigh vnto the sayd bridge in the Riuer riding at anchor, more then a thousand Ships
50 of all sorts, and so great a number of Boates and Barkes, that all the Riuer was couered, and euery one full of people that had entred into them for to see the *Castillas*, for so they did call the *Spaniards* in that Countrey, for the streets in the Suburbs, nor in the Citie could not hold them, the number was so great, yet their streets are as broad as our ordinary streets in any Citie in all *Spaine*. This Citie is compassed with a strong Wall made of stone, and is seuen fathom high, and foure fathom broad, & vpon the Gates many towers, wherein is placed their Artillerie, which is all their strength, for that they doe not vse in their Kingdome strong Castles, as they doe in *Europe*. The houses of the Citie are all built after one sort and fashion, but faire, & not very high, by reason of
50 the Earthquakes which are ordinarily in that Country. All the streets (but especially that wherein they passed at their comming thither) haue on the one side and on the other, Sheds, vnder the which are shops, full of rich Merchandise and of great value, and very curious. They haue in equall distance the one from the other, many triumphant Arches which doe set out the streets very much, and is vsed in euery principall street throughout all the Kingdome, in the which they haue excellent Market-places, whereas is to bee bought all things that you will desire to be eaten, as well of Fish, as of Flesh, Fruits, Hearbs, Comfits, Conserues, and all things so good cheape, that it is almost bought for nothing.

The *Insuanto* or Gouverneur of the Citie, did send that forthwith they should goe vnto his House, for that hee had great desire to see them. In the midst of the streete, where was no lesse
60 number of people then in the other, whereby they entred into the Citie, they met with a *Loytia*, that came to entertaine them with great Maiestie, and had carryed before him many Banners, Mace-bearers, and Tipstaues, and others which carryed Sets or Whips, which they did traile after them, made fast vnto long stickes, which were the Executioners, the which doe goe alwayes making of way, parting the people before the *Loytia*, as you haue heard. The Insuanto.

An Assistant.

Serpents knotted the Kings Armes.

and company wherewith he came was so great, that they verily did beleue him to be the *Insuanto*: but being certified, they vnderstood that it was one of his Counsellors that came from the Gouvernours home to his owne house, which was in the same street whereas hee met with them. This Counsellor was carried in a Chaire of Iuorie, garnished with Gold and with Curtaines of Cloth of Gold, and on them the Kings Armes, which are certayne Serpents knotted together (as hath beene told you.) But when he came right against the *Spaniards*, without any staying he made a signe with his head, and commanded that they should returne backe againe vnto his house, which was hard by: the Captaines did straight-ways obey his commandement, and returned with them. The Counsellor entred into his house, which was very faire, hee had in it a faire Court, and therein a gallant Fountaine and a Garden. After him entred the *Spaniards* all alone, the rest remayned without in the street at the *Loytas* commandement, hee entertayned them with very good words of semblance, and commanded a Banquet to be brought forth, and Wine to drinke, he began first both to eate and drinke. Then he commanded to call in the Captaine, vnto whom was giuen the charge to beare them companie, and did chide with him very sharply and seuerely, because he did carrie them on foot (they could not vnderstand whether it were done for a policie, or of a truth, although the effects wherewith hee did chide seemed of a truth) hee straight-ways commanded two rich Chaires to be brought forth to carry the Fathers, and to giue vnto their companions Horses: the which beeing done, hee willed them to goe and visit the Gouvernour, who did tarrie their comming: and that another time at more leisure he would see and visit them.

Goodly sight.

They followed their way all alongst the street, which seemed vnto them to be more fairer then the other wherein they entred, and of more fairer houses and triumphant Arches: and also the shops that were on the one side and on the other, to be better furnished with richer things then the others, in so ample sort, that what therewith, as also the great number of people which they saw, they were so amazed, that they were as people from themselves, thinking it to be a Dreame. To conclude, after they had gone a good while in that street, delighting their eyes with new things neuer seene of them before: they came into a great place, whereas were many Souldiers in good order with their Harquebusses, Pikes and other Armour in a readinesse, apparelled all in a Liury of Silke, with their Ancients displayed. At the end of this place,

The Palace.

was there a very faire and sumptuous Palace, the gate was wrought of Masons worke of stone, very great and full of figures or Personages, and aboue it a great window with an Iron grate all gilt: they were carried within the gates, the Souldiers and the people which were without number, remayned without and could not be atoyded but with great difficultie. When they were within the first Court, there came forth a man very well apparelled and of authoritie, and made signes with his hand vnto them that brought the *Spaniards*, that they should carrie them into a Hall that was vpon the right hand, the which was straight-ways done. The Hall was very great and faire, and at the end thereof there was an Altar, whereon were many Idols, and all did differ the one from the other in their fashion: the Altar was rich and very curiously trimmed with burning Lampes: the Altar-cloth was of cloth of Gold: and the fruntlet of the same.

State-ceremonie.

After awhile that they had beene there whereas the Idols were, there came a Seruant from the Gouvernour and said vnto them in his behalfe, that they should send vnto him the Interpreter; they straight-ways commanded him to goe. And the Gouvernour said vnto him that he should aduise the Fathers and the rest of his companions, that if they would talke and treat of such businesse as they came for, that it must be done with the same ceremonie and respect, as the Nobles of that Prouince doe, vse to talke with him, which is vpon their knees (as afterwards they did see many times vsed) if not that they should depart vnto the House whereas they were lodged, and there to tarrie the order that should be sent from the Vice-roy of *Ancho*.

The *Spaniards* were of diuers judgements, struiuing amongst themselves a good while, but yet in conclusion, the Religious Fathers, whom the Gouvernour of the Ilands had ordayned and sent as principals in this matter, and whose judgement they should follow, said, that they ought to accept the condition, seeing that by no other meanes they could not come vnto that they pretended: and not to leaue it off for matters of small importance, for that therein they make no offence vnto God, and it may be a meane vnto the conuerting of that mightie Kingdome.

When that the *Insuanto* vnderstood that the *Spaniards* would enter with the reuerence accustomed, and in such order as was declared vnto them, hee straight-ways commanded that they should come into the Hall whereas hee was, they entred into another Hall as bigge as the first: whereas were many Souldiers with their weapons in their hands in very good order, and richly apparelled, and next vnto them were many Tipstaues and Sergeants, with different Ensignes or Badges, all apparelled with long Robes of silke, garded and embroydered with Gold, and euery one of them had a Helme on his head, some of siluer and other some of Tinne gilt ouer, which was a gallant thing to see: all had long haire and died yellow, which hung downe behind their eares vpon their backs: they were placed in very good order, and made a lane that the *Spaniards* might passe thorough: then they came into a Gallerie, which was joyning vnto the Chamber where the Gouvernour was, and there they heard such a noyse of Instruments of diuers sorts, which

which endured a good while, and was of so great melodie, that it seemed vnto them that they neuer before heard the like: which caused vnto them great admiration to see so great Majestie amongst *Gentiles*. When the Musicke was ended, they entred into the Hall aforesaid, and had not gone many steps, when as they met with the Counsailler that met with them in the street aforesaid, and with him other two of his companions all on foot and bare-headed before the Gouvernour, and their Ensignes of Majestie left off: which is generally vied in all the Kingdome, the inferiour to make any shew when that he is before his Superiour. Then they made signes vnto them for to kneele downe, for that the *Insuanto* was nigh at hand in a rich Towre, vnder a Canopie of great Riches, and did represent so great Majestie as the King himselfe: hee did enter-
10 tayne them with tokens of great loue, and humanitie, and told them by their Interpreter, that they were very well welcome, and that hee did greatly rejoyce to see them, with many other words of great fauour. This Gouvernour was a man of goodly person, well fauoured, and of a merry countenance, more then any that they had seene in all that Countrey. Hee caused to bee put vpon the shoulders of the Fathers and of the Souldiers that were with him, euery one of them two pieces of silke, which was crossed about them like Skarfes, and likewise to either of them a branch of filuer: the like courtesie he did vnto the Captaine *Omoncon*, and vnto *Sinsay*, and commanded to giue vnto all their Seruants euery one of them a Mantle of Cotton painted. This being done, the Fathers did giue vnto him the Letters which they carried from the Gouvernour and Generall of the field, and a note of the Present that was sent him: crauing pardon for
20 that it was so small, but time and oportunitie would not serue as then to send vnto him a thing of greater price and valour: certifying him, that if the friendship which they pretended did goe forwards, and come to be established, that then all things should be amended and amplified. Hee answered vnto their proffers with words of great fauour, and made signes vnto them to arise, and to goe and take their rests, there whereas they were lodged: the which they did, and found all things in very good order and well furnished, as well of Beds as of all other necessities, which was done by the commandement of the Gouvernour. Before they departed out of the Palace the Captaine of the guard did carrie them vnto his Lodging, which was within the Court, and there he made them a Banquet with Conserues, and Fruits in abundance: the which being done, hee
30 and other Gentlemen of the Palace did beare them company vntil they came to their Lodgings, which they greatly desired, for that they were wearie of their Iourney, and also with the trouble of the great presse of people that pressed on them in the streets, & otherwise for to see them: the which Captaine of the guard did appoint a Company of Souldiers for to guard them both night and day, the which was done more for Maiestie then for necessitie or securitie of their persons. They had a Steward appointed to prouide them and all their company of all things necessary, and that in abundance, and not to take of them any thing, which was giuen by particular commandement by the Gouvernour.

The next day many of the Gentlemen of the Citie did goe vnto the *Spaniards* to visit them, and such as could not goe themselves did send their Seruants, bidding them welcome. The *Spaniards* did make answer, and gratified them all, in the which visitation they spent all the whole
40 day, hauing great admiration to see the good behauiour, nurture, and gallant demeanour of those Gentlemen, and the great discretion they had in the demanding of any thing they would know as also in their Answeres made to our requests. The next day the *Insuanto* sent a commandement wherein he willed the two Fathers to remayne in their Lodgings and take their ease: but the two Souldiers *Pedro Sarmiento*, and *Miguel de Loarcha*, should come and speake with him, and that they should bring with them their Interpreter, for that hee had one there with him (who was a *Chino*, and vnderstood the Language of the *Philippinas*, but so badly, that they could not by his Interpretation talke of any matter of importance. So when they came thither, they were brought whereas he was, but with lesse ceremonie, he requested them to declare vnto him the whole circumstance of the comming of *Limahon* the Rouer, vnto the Ilands, and how the
50 *Spaniards* dealt with him: that although he had beene informed particularly in all things, by the Captaine *Omoncon* and *Sinsay*, yet he was in a ieaousie that they told him not the truth. Hee was nothing deceived in that he suspected, for after that our Souldiers had made a true Relation of the comming of the Rouer vnto *Manilla*, and of all the rest, hee found that they differed very much, the one from the other, for that they did attribute it wholly vnto themselves: to get honour and benefit: but the *Insuanto* like a wiseman straight-ways vnderstood their pretence. But when that he perceiued that *Limahon* was neither dead nor Prisoner, but onely besieged, he offered vnto them that if they would returne againe vnto *Paganfinan* vpon him whereas he was, he would giue vnto them five hundred ships of warre, with people sufficient to serue both by Sea and Land, and more if they would request. They answered him, that all such cost and labour were but in vaine, for that the Generall of the field who hath him in siege, with the people and
60 ships that he hath are sufficient to end that Enterprize, and to send him hither alieue or dead, and that long before that their fleet should come thither. And besides this, their Ilands were poore of victuels, and could not sustaine so great an Armie many dayes. Beeing satisfied with these reasons, he gaue place that the Interpreter which they brought should come in where as they were,

Mortified
Friars.

were, for he remayned at the doore without, for that hee would bee fully certified to auoid the suspicious doubt he had before he come in presence, yet he did helpe them very much. So when their Interpreter was come in, the *Spaniards* seeing good occasion and oportunitie for to declare that which passed the day before, betwixt them and the Fathers, touching the speaking vnto him on their knees: and seeing, as it seemed vnto them, that he was at that time in a good mind for to heare them, they did vtter vnto him all the whole contention (after that they had declared many reasons of great consideration, to giue them to vnderstand that it was not conuenient to doe it, but especially to religious men, who were there as principals ouer the rest, vnto whom the King of *Spaine* (their Lord) himselfe doth stand on foot, when as they doe intreate of any matter, although it be but of small importance: for that they are Priests and Ministers of God, 10 whom he doth worship and reuerence.

The *Infuante* with a merry countenance did answere them, that vnto that time hee vnderstood no more of them, then in that he was informed by the Captaine *Omoncon*, and did not acknowledge them to bee any other but *Castillas*: without knowing wherefore they came, nor from whom, for lacke of the Letters sent from their Gouvernour, and Generall of the field, the first time that hee spake with them: neither had hee any knowledge of the custome of their Countrey: yet notwithstanding, that which hath passed heere, without any exception of person, if they would take it in good part, in that which is to come shall be amended: and from that day forwards, at all times whensoever it were their pleasure to come of themselues, or at such time as they were sent for, for to talke with him as they doe vse in *Castilla* or *Spaine*, vnto such of their dignitie and vocation, the which hee granted with a very good will: although hee not grant vnto any that pre-eminence, no not vnto a Vice-roy, except he were an Ambassador sent from some King.

The Viands.

The next day, the Gouvernour called a Gentleman of his House vnto him, and commanded him to go and visit the *Spaniards*, and to informe himselfe of them if that they lacked any thing. And also that he should in his name inuite them for the next day following to dine with him in his House. This Gentleman went vnto them and accomplished his message: and the *Spaniards* answered, kissing his hand for the great care he had of them: they were carryed into a Hall that was below in the second Court, whereas were many Chaires of Veluet and Tables that were painted with their frontals before. In the first Chaires they caused the Friars to sit downe, euery one at a Table by himselfe, and each of them other sixe Tables, placed in order, compassing round like a Circle: then were the *Spanish* Souldiers set in the same manner, and each of them had five Tables, and next vnto them the Captaine of the guard belonging vnto the Gouvernour, and two other Captaines: and euery one of them had three Tables. For that it is the custome of that Countrey to make a difference in the qualitie of the guests, by the number of the Tables. All these were placed in circle or compasse (as aforesaid) that they might see one another. In the midst betwixt them there was a round compasse, whereas was represented a Comedie with much pastime, and indured all the Dinner time, and a good while after. There was also great store of very good and excellent Musicke, accompanied with gallant voyces, also Iesters with Puppets, and other things of great pastime, to driue the time away. On the first Table was set to euery one of the guests, little Baskets wrought with Gold and Siluer wyre, full of sweet meates made of Sugar, as March-panes, Castles, Pitchers, Pots, Dishes, Dogges, Bulls, Elephants, and other things very curious, and all gilt: besides this there were many Dishes full of flesh, as Capons, Hennes, Geese, Teales, Gamons of Bacon, pieces of Beeffe, and other sorts of flesh wherewith all the Tables were replenished, sauing that whereat they did sit to dine, which was replenished with victuals that was dressed (for all the other was raw) and was of so great abundance, that there was at times more then fiftie dishes, and they were serued with great curiositie. They had Wine of diuers sorts, and of that which they doe make in that Countrey of the Palme-tree, but of so great excellencie, that they found no lacke of that which was made of Grapes. The Dinner endured foure houres, in so good order that it might haue bene giuen vnto any Prince in the World.

Their Seruants and Slaues that they brought with them at the same time, did dine in another Hall nigh vnto the same, with so great abundance as their Masters. When Dinner was done, the Gouvernour commanded the people to come vnto him, with whom hee did talke and common with great friendship, and good conuersation, and would not consent that they should kneele downe, neither to be bare headed. So after that he had made vnto them tokens of friendship, and detayned them a while, in demanding of many things, lastly, he told them that there was an order come from the Vice-roy of *Aucheo*, that they should goe thither with great speed. So hee tooke his leaue of vs with great friendship and courtesie. At their going forth out of the Hall, they found the Captaine that did dine with them, and with him many other Gentlemen that tarried their coming for to beare them company vnto their Lodging: going before them many Seruants, that did carrie the raw meate, that was vpon the other Tables ouer and aboue that which they did eate on, the which was done for great Maiestie, and a Ceremonie very much vsed in that Kingdome, so many times as they doe make any Banquet.

When

When they came vnto their Lodging they found that the *Insuanto* had sent them a very good Present, in the which was for euery one of them foure pieces of silke, and counting chifts with other things, and certayne painted Mantles for the Seruants and Slaues. After they had taken their leaue of the Captaines and Gentlemen that did beare them company home, they beganne with great ioy to put all things in order for their Iourney the next day following.

THe next day in the morning, before that the *Spaniards* were stirring, there was within the House all things necessary for their Iourney, as well of Litter chaires, as of Horses and Men for to carrie them, and their stufte, the which they did with so good a will (as aforesaid) that they did fall out and strue amongst themselves, who should be the first that should receiue their burthen. So all things beeing in good order, they departed, hauing in their company the same Captaine and Souldiers, that vnto that time had beene their guard, vntill they came vnto the Citie of *Ancheo*, whereas the Vice-roy was. This day by reason they vnderstood that they should depart, the prease and multitude of the people was so great, that although they had Tip-staues before them, to beate the people away and to make roome, yet was it almost night before they could get out of the Citie: so that they were constrained to remaine in a Towne there hard by all that night, whereas by the commandement of the Gouvernour they were very well lodged, and their Supper made readie in very good order, as it was in seuen dayes together; till such time as they came vnto *Ancheo*, without taking for the same, or for any other thing necessarie for their sustentaion, any price or value. There went continually before them a Post with a prouision from the Gouvernour, written in a great board wherein was declared who they were, and from whence they came, and commanding that there should be prouided for them all things necessarie in abundance, vpon the Kings cost, which was the occasion that so much people came for to see them, that in the high-waies they were many times disturbed with great trouble, the third day they came vnto a Citie which was called *Megoa*, which was sometimes the head gouernment, the which was of forty thousand households, but a great part thereof was dispeopled: the occasion thereof they told vs (and was) that about thirtie yeares past, the *Iapones*, who brought for their Guides three *Chinois*, came vpon that Citie (to reuenge themselves of an injurie that was done vnto them) the which they put in execution with so great secrecie and policie, that they made themselves Lords of the Citie without any danger or hurt vnto themselves: for that fiftie *Iapones*, men fit for that purpose, did apparell themselves in *Chinois* apparell without being knowne, and came vnto a Gate of the Citie, whereas the Souldiers that had the charge thereof were void of all suspicion. And within a little while after that, followed two thousand that did dis-imbarke themselves in a secret and vnknowne place, and came in very secret order, because they would not be discouered, and did beset that gate of the Citie, whereas their companions were, which they sent before: who so soone as they saw them nigh at hand, drew out their weapons, the which they carried hid vnder their apparell, & set vpon the Soldiers (that were void of feare and vnarmed) with so great furie and force, that they being amazed wert easily slain, so that they were Lords of the Gate, whereas they left very good guard, and followed their victorie, and made themselves Lords of the Citie, without any danger vnto their persons, and did possesse the same certaine daies, and did sacke the same in spite of them all, with great harme and losse vnto the Inhabitants thereof, vntill such time as the Vice-roy of *Ancheo* did leaue an Armie together of threescore and ten thousand men, but they seeing that they could not defend themselves against so many, in one night they left the Citie and went vnto their ships; whereas they had left them in very good order, and carried with them the spoile of the Citie, leauing it beaten downe.

So soone as they came thither, the Friers remayned in their Lodgings, but *Pedro Sarmiento* and *Miguel de Loarcha* went to visit the Gouvernour, vsing the *Spanish* courtesie with him: and he receiued them with great ioy and courtesie. After they had taken their leaue and returned vnto their Lodgings, the Gouvernour sent to visit them *El Tju*, who is the ancientest of his Council. At their departure from this Citie, traouelling towards *Ancheo*, they passed ouer a mightie great Riuer, by a Bridge all made of stone: the goodliest and greatest that euer they had seene, whose greatnesse did cause wonderfull admiration, so that they stayed and did measure it from one end to another, that it might be put amongst the wonders of that Countrey, which they tooke a note of. They found that it was one thousand and three hundred foot long, and that the least stone wherewith it was built, was of seuentene foot, and many of two and twentie foot long, and eight foote broad, and seemed vnto them a thing impossible to bee brought thither by mans art, for that all round about so farre as they could see, was plaine ground without any Mountaines: by which they judged them to be brought from farre. When they were passed that Bridge, they trauelled all the rest of the day till night vpon a Cawfie that was very broad and plaine, and on both sides many Victualling Houses, and the fields sowed with Rice, wheate, and other Seeds: and so full of people as in the streets of a good Towne or Citie.

After they had trauelled more then halfe a league in the Suburbs of the Citie of *Ancheo*, they met with a Post that came from the Vice-roy: who brought order that they should remaine

Ancheo.

Suburbs of
Aucheo.

mayne in a house that was appointed for them in the sayd Suburbs. So soone as they were alighted, there came a Gentleman to visite them, sent from the Vice-roy to bid them welcome, and to know how they did with their iourney, and also to see that they were well prouided for that night, of all things necessarie, and that in abundance. After this Gentleman, came other Captaynes to visite them, and brought with them great store of Conserues, Wine and Fruit: which is a common custome amongst them, when that they goe in the like visitation, and it is carried by their seruants in little Baskets very curiously wrought, or else in Barrels made of earth all gilt. Within two houres after their coming thither, there came another messenger from the Vice-roy, with many men laden with Capons, Hennes, Geese, Teales, gamons of Bacon, and Conserues of diuers sorts, and of great abundance, sufficient for one hundred men to suppe that night, and for their dinner the next day. The next day in the morning very earely, there came much people vnto their lodging, sent by the Vice-roy, and brought with them two rich Chayres, for to carrie the Fathers in, and the Curtaines tyed vp, that they might the better bee seene, and for their companions very good Horses, saddled after the fashion which they doe vse. They forthwith made haste for to depart, and although they made great speed, yet were they a good houre and a halfe, before they could come vnto the gates of the Citie, and seemed vnto them that they had trauelled two leagues in the Suburbs: well peopled, faire houses, and many shops full of Merchandise.

Palace open
once a day.

State.

Before they came vnto the Gates, they passed a mightie Riuer three times ouer Bridges, that were great and very faire, and the Riuer so deepe, that great Ships came vp the same, but their mastes stooping downe, to passe vnder the bridges. This Citie is the head Citie of all the Province, verie rich and fertile, and many Townes belonging vnto it, and but eight leagues from the Sea. They had no leasure to tell the Souldiers, but they saw that from the Gate vntill they came vnto the Vice-royes Palace on both sides, which was a good way, to bee full of them, and all richly apparelled and of one colour. The people that were at the windowes and in the street, betwixt the houses and the Souldiers were so great a number, that it seemed to be doomes day, and that all the people in the world were there ioyned together in that street. When they came vnto the Palace which was two houres after day, the Gentlemen that were their guides, did cause the *Spaniards* to enter into a roome which was hard by, till such time as the Gate was open, for that it is open but once a day, and so continue no longer time then the audience endureth, which is done by the Vice-roy once euery day, and that is but a small time. But first, before he doth enter into audience, there is shot off foure peeces of Artillerie, with a great noyse of Trumpets, Drums and Waytes. And there is no day that passeth without audience, as our people did see by experience so long as they were there, and were likewise informed of others. The houre being come, and the ceremonie done as aforesayd, the Gates were opened, and there was in the Court many Souldiers, apparelled in the same luerie that those were of in the street. From the midst amongst them came forth a Gentleman, who was as it was told them, the Captayne of the guard of the Vice-roy, who came with great grauitie and authoritie, towards the place whereas our people were, and after they had saluted the one the other, hee made signes vnto them, that they should goe towards the gates of the Palace. When they were within the first Court, which was great and wrought with mightie pillars, there was a great number of Souldiers, and many Sergeants, that entred into another great court, and mounted vp a payre of stayres that was on the one side, whereas all the people were with great silence, sauing the Captayne of the guard, who went with our people till they came to the gates of the Hall, where was the Vice-roy, at which gate hee stayed with his head discouered, and made signes vnto ours that they should doe the like.

Ceremonie.

Vice-royes
state.

Then straight-ways came forth of the Hall a man apparelled in a long Robe, of good personage, and asked of the *Spaniards*, if they would speake with the Vice-roy, and they answered, yea: then asked hee againe from whom they came, and by whom they were sent, they answered, that they were sent by the Gouvernour of *Philippinas*, who was seruant vnto the mightiest King in all Christendome. When he had this answer, he returned againe into the Hall, and within a little while after he came forth, and bad them come in, but gaue them to vnderstand, that in entring into the hall whereas the Vice-roy was, that they should kneele downe, and talke with him in that order, till hee commanded to the contrarie, if they would vse this Ceremonie, that then they should come in, if not, that they should returne backe againe. They sayd, that they would obserue the order giuen vnto them. Therewith hee went in, who seemed to bee the Master of ceremonies, making a signe that they should follow after him, and doe that which hee willed them to doe. At the entring in at the doore, they stayed a little, and then kneeled downe right ouer against there whereas the Vice-roy sate, in a Chayre very high like vnto a Throne, with a Table before him, and was in so darke a place that almost they could not see his face very well. On the one side of him, there were some like vnto Heralds of Armes, with Scepters in their hands, and on the other side, two men of a gallant comlineffe armed with Corslets, made of scales of Gold downe to the calfe of their legges, with Bowes in their hands of gold, and Quiuers at their backs of the same. Both the one and the other were vpon their knees. There was

vpon

vpon the Table before him, paper and all things necessarie to write : which is an ordinarie vse amongst them at all times, when there is any publike audience, and on the one side of the board a Lion made of blacke wood, which was (as after they vnderstood) the Armes of that Prouince. So straight-ways hee made signes vnto them to draw neere, which they did, and kneeled downe a little from the Table which was whereas the Master of Ceremonies did will them; In this sort they began to talke with him by their Interpreter, and told them the occasion of their comming into that Citie and Kingdome, and from whom and vnto whom they were sent. But hee made signes vnto them that they should arise, the which they did with a very good will, and did perseuer in their intent. But the Vice-roy did cut them off before they could make an end, and asked if they had brought any Letter from their King, vnto the King his Lord, whom they would goe to see and talke with : but when they answered no, hee straight-ways tooke his leaue of them, saying, that they were welcome, and that they should depart vnto their lodgings and to take their ease, for that afterwards they should haue occasion to declare their mindes vnto him, and hee would giue them their answer, for that the King was farre off, and it requi- reth a long time to come whereas hee is, but he would write vnto him, and according vnto his commandement, he would make them answer. And therewith hee tooke the Letter, and the memoriall of the present, and commanded in his presence, to put about the neckes of the Friars in manner of a scarfe, to either of them sixe pieces of Silke, and vnto the Soldiers their compani- ons, and vnto *Omoncon*, and *Sinsay*, each of them foure pieces, and to euery one of their seruants two a piece, and to giue vnto the two Friars and the Souldiers, *Omoncon*, and *Sinsay*, euery one of them two branches of Siluer.

With the Silke about their neckes, and with the branches in their hands, they returned out of the Hall and downe the stayres the way they came, and so through the court into the streets, from whence they saw them shut the Court gate with so great a noyse, as when they did open it. From thence at the request of *Omoncon*, and *Sinsay*, they went vnto the house of *Totoc*, who is the Captayne generall of all the men of Warre, and vnto the house of *Cagnitoc*, who is the chiefe Standard-bearer : their houses were nigh the one the other, very faire and great. They found them with as great Maiestie as the Vice-roy, and in the same order, with a Table before them, and had on each side of them armed Souldiers, kneeling on their knees. Yet did they not vse our men with the courtesie that the Vice-roy vsed, to cause them to stand vp, which was the occasion, that straight-ways they made a show that they would depart and bee gone, complain- ing of *Omoncon*, and *Sinsay*, for that they did carrie them thither, and told them with anger, that the Gouverneur of *Manilla*, did intreat them in a different sort, who was there resident for the mightiest Prince in all the world, and they but easie Merchants, neither was their going thither to bee equalled, vnto the benefite that they came thither for. This discontent the which they receiued, was the occasion that they would not goe to make any more visitations, although the sayd *Omoncon*, and *Sinsay*, for their owne interest, would haue carryed them to the houses of other Officers, and Gentlemen of the Court.

At their comming thither, they found all their stufte in good order, and their dinner maruei- lous well provided, and the whole house hanged and trimmed, as though it had beene for the Kings owne person, with many wayting men and Souldiers, those which did guard them both day and night, and hanging at the doore two tables or boards (commanded by the Vice-roy) whereon was written who they were, that were there lodged, and from whence they came, and wherefore, and that none whofoeuer, should bee so hardie as to offer them any wrong or dis- turbance, vpon payne to bee for the same offence seuerely punished. In this house they were more in quiet, then in any other place; whereas they had beene, neither did the people giue them so much trouble, by reason of the great care which the Iudges had in putting order for the same, by the commandement of the Vice-roy, yet was it the greatest Towne and most populed, of all that Prouince (although in other Prouinces there bee that be much bigger) and is affirmed that the Citie of *Taybin*, or *Suntiem*, (there whereas the King and his Court is resident) hath three hundred thousand households, and yet there is a bigger Citie in the Kingdome cal- led *Lanchin*.

This Citie of *Auchee*, hath a very faire and strong Wall made of stone, which is siue fathom high, and foure fathom broad, the which was measured many times by our people, for that they had a gate out of their lodging that did open to the same. This wall is all couered ouer with tyles to defend the rayne-water for hurting of it, which could not to the contrarie but re- ceiue damage, for that there is no lyme vsed in the whole wall. They haue not one Castle in all this Citie, neither is there any vsed in all that Kingdome, for all their force and strength is in their Gates, the which bee made very strong, with a double wall, within very broad, betwixt the which are continually many Souldiers, such as doe keepe watch and ward both day and night. Vpon these gates they haue much Ordnance, but very ill wrought. The whole wall is full of battlements, and thereon written the names of such Souldiers as are bound to repayre thi- ther in the time of necessitie. At euery hundred paces they haue lodgings, the which are very huge and great : there whereas in the time of necessitie doe remayne and dwell their Captaynes,

Lions the Armes of that Prouince, per- haps this de- ceived *Pinto*, who mistooke them (seeing them common on pillars, &c.) to be the Kings Armes, which were but of some places.

so long as their troubles doe indure, all the wall is fortified with two great motes or ditches, the one within and the other without, the which they doe fill at all times when they please, by sluices which they haue from the Riuer for the same purpose, and doe serue of water almost all the houses in the Citie, whereas they haue their stanges for the most part full of Fish. This mightie Citie is situated in a great playne, and compassed round about with mightie Rockes and Mountaines, which is the occasion that it is not so healthfull, and the Inhabitants say, that it is by reason of the Mountaines, and many times it is ouer-flownen in the winter, by spring-tydes from the Riuer. And in that yeere that this doth happen, it doth destroy and ruinate a great part of the Citie, as it was at that time when our people did see it, for that in the winter before they were troubled with these great tydes, which did them much harme.

The next day after that our people came into the Citie, the Vice-roy did send to inuite them to dinner to his owne house, whereas he made them a great banquet in the forme following. At their comming vnto the Palace there came forth a great number of Gentlemen, seruants vnto the Vice-roy, to bid them welcome, with great store of musicke and tokens of mirth. Being entered into the first Court, they brought them into a mightie Hall that was maruellously well trimmed, wherein was a great number of Tables set in such order, as they were in the banquet that was made them by the Gouverneur of *Chincheo*, (as hath bene told you) although the number and furniture did farre excell the other. But before they did sit downe, there came vnto them two Captaynes principall men, vnto whom the Vice-roy had committed the charge of the banquet, to doe all things in his name, for that it is a custome in that Kingdome, that Noble men must not be present in their banquets they make. So the charge was giuen vnto them, to make them be merrie, & to bid his ghests welcome. When they came vnto them they vsed great courtesie, and passed away the time in gallant discourses, till it was time to go to dinner, and that they began to bring in their victuals. Then before they did sit downe, the Captaynes did take each of them a cup in his hand, in manner of a *Sorlus*, as they doe vse, and being full of Wine, they went together whereas they might discouer the Heauen and offered it vnto the Sunne, and vnto the Saints of heauen, adding thereunto many words of prayers: but principally they did request that the comming of their new ghests might be profitable vnto them all, and that the friendship which they did pretend to establish, might be for good both vnto the one and to the other. This their prayer being done, they did spill out the Wine making a great courtesie, then were they straight-ways filled againe, and making reuerence vnto their ghests euery one by himselfe, they set the Cups downe vpon the Tables whereas the Fathers should dine, whereas they were set euery one by himselfe. This being done, the first seruice was set vpon the boards, and the Captaynes were set at other Tables. The time which the banquet indured (which was very late) there was great store of musicke of diuers Instruments, as of Vials, Gitterns, and Rebuckes, and with them many lesters did make them merrie at their dinner. The which being done, the sayd Captaynes did beare their ghests companie out of the Palace, whereas they did anew inuite them to dinner for the next day, in the same Hall: they obeying their request did come, whereas was made vnto them a banquet more notable than the first. This day at the banquet was present the *Totoc*. In this second banquet they had as the day before, very much musicke, and a Comedie that indured long, with many prettie and merrie iests: there was also a Tumbler, who did his feates very artificially, as well in vaulting in the ayre, as vpon a staffe that two men did hold on their shoulders. Before the Comedie did begin, by their Interpreter the signification thereof was told them, that the better they might content themselves in the conceiuing.

The next day they sent the present, and those who carryed it in, did afterward giue our people to vnderstand that in opening the present, there was a note thereof taken before a Notarie, and straight-ways put in againe where it was taken out, before the sayd Notarie and other witnesses, the which being done, hee sealed it vp, and sent it vnto the Citie of *Taybin*, vnto the King and his Counsell, for that they haue a rigorous Law in that Kingdome, that doth prohibite all such as haue any office of Gouvernement, to receiue any present of what qualitie soeuer it bee, without licence of the King or of his Counsell. This is conformable vnto that, which the Gouverneur of *Chincheo* did in the presence of our people.

The next day following, the Vice-roy did send to visite them, and to aske of them a Sword, a Harquebuss and a Flaske: for that hee would cause others to bee made by them, the which they did send, and afterwards vnderstood, that they had counterfeited the same, although not in so perfect manner.

Then after a time our people seeing, that their being in that Citie seemed to be long and like to be longer, they did procure to driue away the time in the best manner they could, and went abroad into the Citie, and did by either of them that which they thought best. Whereof they found great abundance, and of so small price, that they bought it almost for nothing. They bought many Bookes that did intreat of diuers matters, which they brought with them to the Ilands. The next day they went to see the Gates of the Citie, and all such curious things as were to be scene, so farre as they could learne or vnderstand, which were many. But amongst them all, they saw a sumptuous Temple of their Idols, in whose chiefe Chappell they counted, one hundred and

and eleuen Idols, besides a great number more that were in other particular Chappels, all were of carued worke, very well proportioned and gilded: but in especiall three of them that were placed in the midst of all the rest, the one had three heads proceeding out of one bodie, the one looking on the other in full face, the second was the forme of a Woman with a Child in her armes, the third of a Man appparelled after the forme and fashion, that the *Christians* doe paynt the Apostles. Of all the rest some had foure armes, and some had sixe, and other eight, and other some maruellous deformed monsters. Before them they had burning Lamps, and many sweet perfumes and smels, but in especiall, before the three aboue specified.

Three headed Image.
A woman with childe.

But when that the Vice-roy did vnderstand, that our people did goe viewing the Citie gates and Temples (and perceiue that they that gaue him the notice did suspect it, that it was to some ill intent) therewith hee straight-wayes commanded, that they should not goe forth of their lodging, without his licence: and likewise commanded the Captayne that was their guard not to consent thereunto, as he had done, and likewise that none should carrie them any thing for to sell, for he that did it should be punished with whipping. Yet notwithstanding, they had euery day very sufficient necessaries for their personages in such ample wise, that there did always remayne, and not lacke. In this closenesse and keeping in, they suffered many dayes with much sadnesse, and oppressed with melancholicke humours, to see that their purpose wherefore they went thither seemed to be long, and euery day was worse and worse. Yet notwithstanding they did passe it ouer in the best wile they could, in committing it with heartie zeale vnto God, for whose honour and glory they did attempt that voyage, and prayed vnto him for to mooue their hearts to consent, that the religious Fathers might remayne in that Countrey, for to learne the language (as they had begun many dayes before) by which meanes their soules might be saued, and clearely deliuered from the tyrannie of the Deuill, who of truth had them in possession. So after many dayes, that they had remayned in that close estate, as aforesayd, they determined for to goe and talke with the Vice-roy, and to bee fully resolu'd, either to tarry or returne from whence they came, but were not permitted.

Vice roy's iealousie.

In this order they remayned in the Citie certayne dayes, and for to conclude, either to stay there, or depart the Kingdome, they were resolute, and determined to write a Letter vnto the Vice-roy. They could finde none that would write this letter for them, although they would haue payed them very well for their paines. Till in the end, by great request and prayings, the Captayne *Omoncon* did write it for them, and straight-wayes departed vnto the Citie of *Ampin*, that was not farre off, to put away the suspition they might conceiue, that hee did write the letter, if that peraduenture the Vice-roy would take it in ill part. Their letter being written, they found great difficultie in sending the same, for that there was none that would carrie it, neither would they consent, that our men should enter into the Palace to deliuer it. But in conclusion, what with requests and gifts, they perswaded their Captayne of their guard to carrie it, who did deliuer the same vnto the Vice-roy, in name of the *Castillo*, saying, that he tooke it of them to bring it vnto him, for that they did certifie him, that it was a thing that did import very much. Hauing read the letter, he answered, that he would giue the King to vnderstand thereof, as hee said at the first time. And in that, touching the Friars remaining in that Countrey to preach, at that time he could make them no answer, for that in such matters, it was first requisite to haue the good-will of the Royall Counsell. Yet would hee make answer vnto the Letter they brought from the Gouverneur of *Manilla*, and that they might depart, and returne againe, at such time as they brought *Limahon* prisoner or dead, the which being done, then shall the friendship be concluded which they doe pretend, and to remayne and preach at their will. With this answer they remayned without all hope to remaine there, and did incontinent prepare themselves for to depart from *Manilla*, and bought many bookes to carrie with them, wherein was comprehended all the secrets of that Kingdome. By reason whereof, they might giue large notice vnto the royall Maiestie of King *Philip*. The which being vnderstood by the Vice-roy, who had set spies to watch their doings, he did send them word that they should not trouble themselves in the buying of bookes, for that he would giue them freely, all such bookes as they would desire to haue: the which afterwards hee did not accomplish.

Ampin.

People in great subiection.

In the meane time that they stayed in this Citie, amongst all other things that they vnderstood, to driue away the time was one, it was giuen them to vnderstand that in one of the Prisons, there was a *Portugall* prisoner, who was taken in a ship of the *Iapones*, with others of his Nation, who were all dead in the Prison, and none left aliue but hee alone. Our people being very desirous for to see him, and to learne of him some secrets of that Countrey, for that hee had bene there a great while, they did procure to talke with him, asking licence of the supreme Iudge and Lieutenant vnto the Vice-roy, who did not onely refuse to grant it them, but did make diligent inquirie who they were, that did giue them to vnderstand thereof, for to punish them.

A Portugall prisoner.

Vpon a sodaine there came newes vnto the Citie, that the Rouer *Limahon*, was vpon the coast of *Chincho*, vsing his old accustomed cruelties, and how that he had spoyled and robbed a Towne vpon the sea coast. This newes was throughout all the Citie, and appeared to bee true, touching

Taocay another
Pirat, taken to
bee Limahon.
Suspicion of
euill.

Omoncon and
Sinsay, at vari-
ance.

Generall con-
sultation.

the effect of the deed : yet false touching the person, for that the Rouer was called *Taocay*, an enemy, and contrarie vnto *Limahon* : but a friend vnto *Vintoquian*, of whom wee haue spoken of. But thereupon the Vice-roy, and all of the Citie, were comfortable in the suspicion that they had receiued, which was that our people were come into that Kingdome vpon some euill pretence, and to see the secrets thereof, to some euill end, which was the occasion that from that time forwards, they shewed them not so good countenance as they did before. These newes was not so soone come, but straight-ways the Vice-roy did send for *Omoncon*, (who was then returned from his visiting) and *Sinsay*, vnto whom he had done courtesie, and giuen them the tytle of *Loyties* and Captaynes, and hee did reprehend them very sharply for that they had brought ouer people thither, and sayd, that they had told him a lye, in saying that *Limahon* was besieged, in such sort that hee could not escape, neither had the *Castillos* burnt his Ships, and that all was but a made matter amongst themselves, and how that the Captiues which they brought, and sayd that they had taken from *Limahon*, they had robbed from other places, and sayd that the *Spaniards*, were spies that came to discover the secrets, and strength of the Kingdome, and that they had brought them thither, by force of gifts that they had giuen them. They answered him with great humilitie, in saying, that in all that which they had sayd they did speake the truth, and that it should appeare at such time, as the newes of the Rouer should bee better knowne, the which if it shall appeare to be contrarie, they were there readie for to suffer whatsoever punishment that should bee giuen them. The Vice-roy being somewhat satisfied with this their iustification, bad them to depart, remitting all things vnto time for the true declaration thereof. Then *Omoncon*, and *Sinsay*, came straight-ways to giue the *Spaniards* to vnderstand of all that had passed with the Vice-roy, and what they vnderstood of him, which caused in them so great feare, that for the time which it indured (which was till such time as they vnderstood the truth as afore sayd) they payed very well for their feasts and banquets the which they had made them. All this happened in the time that *Omoncon*, and *Sinsay*, were at variance, and spake many iniurious words the one of the other, discovering their intents and deuises, whereby it plainly appeared, that in all that which they had told vnto the Vice-roy, they lyed, but in especiall *Omoncon*. *Sinsay* did dissemble, for hee sayd and told vnto all people, that by his order and industrie, our people did fire the Ships of *Limahon*, and besieged him, with other speeches in the like sort, yet twentie dayes before his comming thither, all was ended and done as appeared. The occasion of their enmitie and falling out, was for that the Vice-roy had giuen vnto *Omoncon*, a tytle and charge of more honour, then vnto *Sinsay*, hauing made betwixt them a consort, that the reward or dignitie should bee equally diuided betwixt them, and that the one should speake of the other the best they could, because the Vice-roy should doe them friendship. This condition and consort (as appeareth) was euill performed by *Omoncon*, being addicted vnto selfe-loue, and seemed vnto him that *Sinsay*, did not deserue so much as hee did, for that he was a base man, and of the Sea, and hee of the more nobilitie, and had the office of a Captayne.

With this griefe and care remayned the *Spaniards* certaine dayes kept close in their lodgings, and were not visited so often as they were when they first came thither, which did augment very much their feare, till such time as they vnderstood, that the Vice-roy either of his owne good-will, or else by some particular order from the King and his Counsell, had called together all the *Gouernours* of that Prouince of *Aucheo*, to intreat of matters touching *Limahon*, as also in particular, why and wherefore the *Spaniards* came thither, and to resolute themselves wholly in all things requisite for the same. So when that they were all come together, which was in a short time, and amongst them the *Gouernour* of *Chimcheo*, who by another name was called *Insuanto*, they had particular meetings together with the Vice-roy, in the which they were all agreed to haue a generall meeting, whereunto should bee called the *Castillos*, and to demand of them in publike audience, the cause of their comming and being heard, to giue them their answer according as they had determined : for the which vpon a day appointed they met all together (but not the Vice-roy) in the house of the *Cagontoc*, and commanded to come before the *Castillos*, who did accomplish their request with a great good-will, for that they vnderstood that they were called to entreat of their matter, either to tarrie or depart. So when they came thither, they were commanded to enter into a mightie Hall, whereas they were all set in verie rich Chayres with great grauitie and maiestie. The *Insuanto* seemed to bee the chiefest amongst them, but whether it was for that hee was the principallest next vnto the Vice-roy (or as it was told them) for that it was hee that sent *Omoncon*, in the chase of the Rouer *Limahon*, they knew not, but so soone as they were entred into the Hall, they were commanded to draw nigh, there, whereas they were all placed, without bidding them to sit downe, neither did they vse any particular circumstances or courtesie. The *Insuanto* tooke vpon him the charge, and demanded of the *Spaniards* (by meanes of the Interpreters) what was the occasion of their comming into that Countrey. The *Spaniards* answered as they thought : and supposed, that at that time it could not bee, but that *Limahon* was either taken prisoner or slaine. Then did the *Insuanto*

con-

conclude his speech, in saying vnto them that they should returne vnto their owne Countrey to the Ilands, and at such time as they did bring *Limabon*, they would conclude all things touching the friendship they requested, and also for the Preaching of the Gospell.

So from that day forwards, they did procure with all haste for to depart, and gaue the Vice-roy to vnderstand thereof, who answered them and sayd, that they should comfort themselves and receiue joy and pleasure, and that hee would dispatch them, so soone as the Visitor of that Prouince was come to *Ancheo*, which would bee within ten dayes, for that hee had written vnto him, that he should not dispatch them vntill his comming, for that he would see them. From that day forwards, he commanded that sometimes they should let them goe forth abroad to recreate themselves, and that they should shew vnto them some particular pleasure or friend-
 10 ship. So one of them was carryed to see the Mustering of their men of warre, which they haue in a common custome throughout all the Kingdome, to doe it the first day of the New-moone, and is sure a thing to bee seene: and they doe it in the field which is joyning vnto the walls of the Citie, in this manner following. There were joyned together little more or lesse then twen-
 30 tie thousand Souldiers, Pike-men and Harquebussie shot, who were so expert, that at the sound of the Drum or Trumpet, they straight-ways put themselves in battle aray, and at another sound in a Squadron, and at another the shot doe diuide themselves from the rest, and discharge their Pieces with very gallant and good order, and with a trice put themselves againe into their places or standings: this being done, the Pike-men came forth and gaue the assault all toge-
 30 ther, with so good order and consort, that it seemed vnto the *Spaniards*, that they did exceed all the warlike orders vsed in all the world: and if it were so, that their stomacks and hardinesse were equall vnto their dexteritie, and number of people, it were an easie thing for them to con-
 30 quer the dominion of all the world. If it so chance, that any Souldier should lacke in his Office, and not repayre to his place appointed, hee is straight-ways punished very cruelly, which is the occasion, that euery one of them hath a care vnto his charge. This their Muster indured foure houres, and it was certified vnto the *Spaniards*, that the same day and houre it is done in all Cities and Townes, throughout the whole Kingdome, although they are without suspicion of enemies.

Five and twentie dayes after that the *Insuanto* had giuen the resolute answer vnto the *Spani-*
 30 *ards*, came the Visitor thither: and the whole Citie went forth to receiue him, who entred in with so great Maestie, that if they had not knowne who hee was, they could not haue beene perswaded, but that he had beene the King. The next day following, the *Spaniards* went to vi-
 30 lite him, for duties sake, as also for that hee had a desire to see them. They found him in his lod-
 30 ging, where he began to make visitation of the Citie. In their Courts were an infinite number of people, which came thither with Petitions and complaynts, but in the Halls within, there was none but his Seruants and Sergeants. When that any came for to present his Petition, the Porter that was at the entrie made a great noyse, in manner of an *O est*, for that it was a good way from the place whereas the Visitor did sit, then cometh forth straight-ways one of his Pages, and taketh the Petition, and carryeth it vnto him. At this time it was told him how
 30 that the *Castillas* were there: hee commanded that they should enter, and talked with them a few words, but with great courtesie, and all was touching the Imprisonment of *Limabon*, with-
 30 out making any mention of their departure or tarrying. So after a while that hee had beheld them and their apparell, he tooke his leaue of them, saying, that by reason of the great businesse hee had in that visitation, he could not shew them any courtesie, neither to vnderstand of them what their request and desire was, but gaue them great thanks for their courtesie shewed, in that they would come to visite him.

Three dayes after the Visitor was come thither, the *Insuanto* departed for his owne house, with order that with all speed possible, hee should ordayne Ships wherein the *Castillas* should re-
 30 turne vnto the *Philippinas*. Likewise the same day, all those that were there assembled by the order of the Vice-roy, departed vnto their owne houses. And the *Spaniards* were commanded for to stay vntill the full of the Moone, which should bee the twentieth of August, and that day they should take their leaue of them: for on that day amongst them, it is holden for good to be-
 30 gin any thing whatsoever. Wherein they doe vse great superstition, and doe make many ban-
 30 quets, as vpon New-yeeres day.

The day before the departure of the *Spaniards*, there came some in behalfe of the Vice-roy to inuite them, and made them banquet in the order and fashion as at the first: although this (for that it was at their departure) was more sumptuous, wherein was represented a Comedie, which was very excellent and good, whose argument was first declared vnto them. All the which they did represent so naturally, and with so good apparell and personages, that it seemed a thing to
 30 passe in Act. There was not in this banquet the Vice-roy, but those Captaynes which were there the first time: and another Captayne, vnto whom was giuen the charge to bring the *Spaniards* vnto *Manilla*, who was called *Chautalay*, a principall Captayne of that Prouince. When the banquet was ended, they were carryed with great companie from the Hall whereas the banquet was made, vnto the house of the *Cogontoc*, who was the Kings Treasurer, & dwelt there hard by,

of whom they were marvellously well received with louing words and great courtesie: in saying that he hoped very shortly to see them againe, at such time as they shall returne with *Limahon*, and that as then their friendship should be fully concluded, and would intreat with them in particular of other matters. This being done, he gaue vnto them a Present for to carrie vnto the Gouvernour of *Manilla* in recompence of that which was sent vnto the Vice-roy: the Present was forty pieces of Silke and twentie pieces of *Burato*, a Litter Chaire and gilt, and two *Quitafoles* of Silke, and a Horse. Likewise hee sent the like Present vnto the *Generall of the field*, and to either of them a Letter in particular: these things were put in Chists which were very faire and gilt. Besides this he gaue other forty pieces of Silke of all colours for to bee parted amongst the Captaines and other Officers that were at the siege of *Limahon*, with three hundred blacke Mantles and as many *Quitafoles* to be parted amongst the Souldiers. Besides all these, he gaue vnto the Friers each of them eight pieces of Silke, and vnto the Souldiers their companions foure pieces of each of them, and to euery one his Horse and a *Quitafol* of Silke; their Horses were very good to trauell by the way. This being done, the *Cogonro* tooke his leaue of them, and willed them to goe and take leaue and licence of the Vice-roy and the *Vistor*, that they might depart, for that all things were in a readinesse for their Voyage: the which commandement they did straight wayes accomplish, being very well content and satisfied of the great fauours and courtesies, the which they receiued both of the one and the other: Likewise of the *Tocor*, i *Captaine Generall*, whom they also did visit and tooke their leaue.

To keepe away the Sun.

The *Spaniards* departed from the Citie of *Ancheo*, vpon a Tuesday, beeing the three and twentieth of August in the sight of all the people of the Citie, who came forth to see them with so great presse and throng, as they did when they first came thither into the Countrey: they were all carried in Litter Chaires, yea, their very slaues, for that it was so commanded by the Vice-roy: the Friers were carried by eight men a piece, and the Souldiers by foure men a piece, and all their Seruants and Slaues were carried by two men a piece. Looke so many men as was to carrie them, there went so many more to helpe them when they waxed wearie, besides foure and twentie that carried their Stuffle. There went alwayes before them a Harbinger for to prouide their Lodgings, and with him went a Pay-master, whose charge was to ordaine and prouide men for to carrie their Litter Chaires, and to giue them for their trauell that which is accustomed, and to pay all costs and charges spent by the *Spaniard*.

After that they departed from *Ancheo*, they made of two dayes Iourney one, which was the occasion that they came to *Chincheo* in foure dayes. At their entring into the Citie they found a Seruant of the *Insuanto*, with order and commandement, that they should proceed forwards on their Iourney, and not to stay in the Citie, but to goe vnto the Port of *Tansuso*, whither he will come the next day following. They obeyed his commandement, and made so much haste that in two dayes they came vnto the Village of *Tangoa*, whereas they had beene before, and particular mention made thereof. In the same Village they were lodged, well entertayned and had great good cheere: from thence they went in one day to *Tansuso*, which was the first Port whereas they did dis-imbarke themselves, when as they came from the Ilands vnto that firme Land: the Iustice of the Towne did lodge them in the same House whereas they were first lodged, and did prouide for them of all things necessary and needfull, and that in abundance, till the coming of the *Insuanto*, which was within foure dayes after, for that hee could not come any sooner (although his desire was) for that it was very foule weather.

Superstition.

The third of September, the *Insuanto* sent and commanded the *Spaniards* that they should imbarke themselves, for that it was that day the conjunction of the Moone (although at that time the ships were not fully in a readinesse.) They obeyed his commandement, and the *Insuanto* himselfe went to the water side, in whose presence came thither certaine Religious men of their manner, and after their fashon they made Sacrifice with certaine *Prayers*, in the which they craued of the Heauens to giue good and faire weather, and a sure Voyage and fauourable Seas vnto all those that saile in those ships. This Ceremony, being done (which is a thing very much vsed in that Countrey) the *Spaniards* went vnto the *Insuanto*, who was there with great company and Maiestie: he entertayned them very friendly and with cheerefull words making an outward shew that he bare them great loue, and that their departure was vnto him a great griefe. Then he requested them to giue him a remembrance of such things as was necessary and needfull for their prouisiou for the Sea, for that he would giue order for the prouiding of the same, the which hee did, and was with so great abundance that they had for the Voyage, and remayned a great deale to spare. He then commanded to be brought thither Cates to eate and drinke, and gaue it them with his owne hands, as well the one as the other: he himselfe did eate and drinke with them, which is the greatest fauour that can be shewed amongst them. The Banquet being ended, he commanded them in his presence to goe aboard their ships, because that was a luckie day, and also to accomplish that which the Vice-roy had comanded, which was that he should not depart from thence, vntill they had first seene them imbarked. The *Spaniards* obeyed the commandement, and tooke their leaue of the *Insuanto*, with great courtesie and reuerence, and with outward shewes that they remayned indebted for the great courtesie & good will that they had receiued:

Plentifull provision.

Luckie day.

and

and therewith they departed to the waters side, towards the Boat which was tarrying for them.

As they passed by the Religious men (that before we spake of) they saw a great Table set, and vpon it a whole Oxe with his throat cut, and hard by the same a Hogge and a Goate, and other things to be eaten: the which they had ordained for to make Sacrifice, which they doe vse in the like Affaires.

They being imbarcked in the Boate, they were carried aboard the Admirall, which was the ship appointed for them to goe in: then presently they beganne to stirre the ship, from one place vnto another with certaine Boats and Cables which they had there readie for the same purpose. The ship did not so soone begin to mooue, but the Religious men ashore did beginne their Sacrifice, the which did indure vntill night, ending their Feasts and Triumphs in putting forth of the Citie, and vpon their Gates many Cressets and Lights. The Souldiers shot off all their Harquabusses, and the shippes that were in the Port shot off all their Artillerie, and on the shoare a great noyse of Drummes and Bels: all the which being ended and done, the Spaniards went ashore againe vnto their Lodging: but first the *Insuanto* was departed vnto his owne House, with all the company that he brought with him.

The next day the said *Insuanto* did inuite them vnto a Banket, which was as famous as any which had beene made them vnto that time. He was at the Banket himselfe, and the Capitaine Generall of all that Prouince. There was abundance of meates and many pretie deuises to passe away the time, which made the Banket to indure more then foure houres: the which being done, there was brought forth the Present which the *Insuanto* did send vnto the Gouvernour of *Manilla* in returne of that which was sent to him. The Present was fourteene pieces of silke for the Gouvernour of *Manilla*, and ten pieces for the Generall of the field: he also commanded to be giuen vnto the Friers each of them foure pieces, and vnto the Souldiers each of them two pieces, and vnto their Seruants and Slaues certaine painted Mantels, and therewith hee tooke his leaue of them very friendly, and gaue vnto them Letters, the which he had wrote vnto the Gouvernour, and vnto the Generall of the field, answere vnto those, the which they had wrote vnto him, and said that all things necessary for their departure was in a readinesse, with victuals for tenne moneths put aboard their ships, so that when as wind and weather did serue they might depart. Also that if in their Voyage it should so fall out, that any of the *Chinois* that went in their ships, should doe vnto them any euill, either abroad or at the Ilands: that the Gouvernour thereof should punish them at his pleasure, and how that the Vice-roy will thinke well thereof: In conclusion, he said vnto them, that he hoped to see them there againe very shortly, and to returne againe with *Limabon*, and then he would supply the wants which now they lacked. The Spaniards did kisse his hands, and said, that they had receiued in courtesie more then they deserued, and that in all things, there did abound and not lack, that they remained greatly indebted vnto him for their friendship, and would giue their King notice thereof, that whensoever occasion should be offered, to repay them with the like: and therewith the *Insuanto* departed to his owne House, leauing in the company of the Spaniards five Captains, those which should go with them in their company to Sea, and also *Omoncon* and *Sinsay* who were that day in the Banket, with the Habit and Ensigne of *Loytias*, for that the day before it was giuen vnto them by the *Insuanto*.

Vpon Wednesday which was the fourteenth of September, the wind came faire, wherewith they hoysed vp their Sayles and went to Sea: at their departure there was at the waters side the *Insuanto* and the Iustice of *Chincheo* to see them sayle, they sayled forwards directing their course towards a small Iland that was not farre off, with determination there to take water for their ships, for that it had in it many Riuer of very sweet water. Within a small space they arriued there, and it had a very faire and sure Port, wherein might ride in securitie a great Nauy of ships. All Thursday they were there recreating and sporting themselves, for that it was a pleasant Iland, and full of fresh Riuer. Vpon Friday being the sixteenth of September, the day being somewhat spent, they made saile and tooke Port foure leagues from that place in another Iland called *Laulo*, for to put themselves in a new course, different and contrary vnto that which they tooke when they came vnto that Kingdome, for that the *Chinois* had by experience proued, that in those monethes the winds were more fauourable then in other monethes, and for the most part North and North-east winds: all that night they remained in that Iland, and the next day following they sayled vnto another Iland which was called *Chautubo*, not farre distant from that of *Laulo*. This Iland was full of little Townes, one of them was called *Gautin*, which had five Forts or Towers made of Lime and stone, very thicke and strongly wrought: they were all foure square, and sixe fathome high, and were made of purpose for to receiue into them all the people of those little Townes, to defend themselves from Routers and Theeues that daily come on that Coast.

They very much noted, that although this Iland were rockie and sandie, yet was it tilled and sowed full of Rice, Wheate, and other Seeds and Graine. There was in it great store of Kine and Horse, and they vnderstood that they were gouerned, not by one particular man, to whom they were subiect, neither by any other amongst themselves, nor of *China*, but in common: yet notwithstanding they liued in great peace and quietnesse, for that euery one did content himselfe with

with his owne. Vpon Sunday in the afternoone they departed from this Iland, and sayled their course all that night, at the next morning they arriued at another Iland, called *Corchu*, which was twentie leagues from the Port of *Tansuso*, from whence they departed. The *Spaniards* seeing what leisure they tooke in this their Voyage, they requested the Captaines to command the Mariners that they should not enter into so many Ports or Harbours. The Captaines answered, and requested them to haue patience, for that in making their Iournies as they did, they doe accomplish and follow the order set downe by the Vice-roy and *Insuanto*, the *Chinois* are very fearefull of the Sea, and men that are not accustomed to ingulfe themselues too farre, neither to passe any stormes.

Ancon.

Neere vnto this Iland there was another somewhat bigger, which is called *Ancon*, wholly dispeopled and without any dwellers, yet a better Countrey and more profitable for to sow and reape then that of *Corchu*. The *Spaniards* being at an Anchor there, vnderstood by the *Chinois* that in times past it was very well inhabited, vnto the which arriued a great Fleet belonging to the King of *China*, and by a great storme were all cast away vpon the same: the which losse and destruction being vnderstood by another Generall that had the Guard of that Coast, Ysuspecting that the dwellers thereof had done that slaughter, hee came to the shoare and slue many of the Inhabitants, and carried all the rest in their ships vnto the firme Land, who afterwards would neuer returne thither againe, although they gaue them licence after that they vnderstood the truth of that successe: so that vnto that time it remained dispeopled, and full of wilde Swine, of the brood that remained there at such time as they were slaine and carried away as you haue heard.

A straight.

This Iland and the rest adjoyning thereunto (which are very many) haue very excellent and sure Ports and Hauens, with great store of fish. These Ilands endured vntill they came vnto a little Gulfe, which is five and fortie leagues ouer, and is sayled in one day, and at the end thereof is the Port of *Cabite*, which is neere vnto *Manilla*. So when that winde and weather serued their turne, they departed from the Iland of *Ancon*, and sailed till they came vnto another Iland called *Plon*, where they vnderstood by a ship that was there a fishing, how that the Rouer *Lima-hon* was escaped in certaine Barkes, which he caused to bee made very secretly within his Fort, of such Timber and Boards as remained of his ships that were burnt, the which was brought in by night by his Souldiers, on that side of the Fort which was next vnto the Riuer, and were not discovered by the *Castillas*, which were put there with all care and diligence to keepe the mouth that come in to helpe them. And towards the Land there whereas he might escape, they were without all suspicion (they were so strong) and did not mistrust that any such thing should be put in vre, as afterwards did fall out, the which was executed with so great policie and craft, that when they came to vnderstand it, the Rouer was cleane gone, and in safeguard, calking his Barkes at the Iland of *Tocaotican*, the better for to escape and saue himselfe, and they said, that it was but eight dayes past that he fled. With this newes they all receiued great alteration, but in especiall *Omoncon* and *Sinsay*.

From the Phil-
ippinas to the
China is 200.
leagues

After they had remained three weeks in that Harbour detayned with a mighty North-wind, that neuer calmed night nor day in all that time. The eleuenth day of October, two houres before day, they set sayle and went to Sea. Sixteene leagues from the Port, sailing towards the South, they discovered a mightie Iland very high Land, which was called *Tangarruan*, and was of three score leagues about, all inhabited with people like vnto those of the Ilands *Philippinas*. Vpon Sunday in the morning being the seuenteenth day of October, they discovered the Iland of *Manilla*, of them greatly desired, they sayled towards the Iland that they so long desired to see, and came thither the twentie eight day of October, as aforesaid. So that from the Port of *Tansuso*, which is the first Port of *China*, till they came vnto the Iland of *Manilla*, they were five and fortie dayes, and is not in all full two hundred leagues, which may be made with reasonable weather in ten dayes at the most.

A Tempest.

I could haue here added two other Voyages of Franciscans, to China, the one by Peter de Alfaro, and other three of his Order, 1579. the other 1582. by Ignatio, &c. both written at large by Mendoza. But I hasten to our Iesuites exacter Relations. Only I will conclude this Storie with Alfaro's returne from China to the Philippinas, and his Relation of their Witch-crafts used in a Tempest then happening: after that two Letters mentioning English ships on that Coast.

But it so fell out, as they were going alongst the Coast of the Iland for to enter into the Port of *Manilla*, and being within five leagues of the entry thereof, vpon a sudden there arose the North-wind with so great furie, and caused so great a Sea, that they found themselues in a great deale more danger then in the other storme past, in such sort that they sponed before the winde with their fore-sayle halfe Mast high, shaking it selfe all to pieces, and in euery minute of an houre readie to be drowned. The *Chinois* for that they are Superstitious and Witches, beganne to inuocate and call vpon the Deuill, for to bring them out of that trouble (which is a thing commonly vsed amongst them, at all times when they find themselues in the like perplexitie) also they doe request of him to shew them what they should do to bring themselues out of trouble. But when the *Spaniards* vnderstood their dealings, they did disturbe them that they should

not

not perseuer in their Lots and Inuocations, and beganne to conjure the Deuils, which was the occasion that they would not answere vnto the Inuocation of the *Chinois*, who did call them after diuers manners, yet they heard a Deuill say, that they should not blame them because they did not answere vnto their demand, for they could not doe it for that they were disturbed by the conjuration of those *Spanish* Fathers, which they carried with them in their ship.

Coniuring against coniu-
ring.

So presently when the night was come, God was so pleased that the storme ceased, and became in few houres very calme, although it endured but a while, for as they began to set sayle to nauigate towards the Port, and almost at the point to enter into the same, a new storme seized on them, and with so great force, that they were constrained to returne vnto the Sea, for feare to bee broken in pieces vpon the shoare. The *Chinos* began anew to inuocate the Deuils by writing, which is a way that they neuer let but doe answere them, as they did at this instant, and were not disturbed by the coniuations of the Fathers, yet notwithstanding they lyed in their answer, for that they said, that within three dayes they should be within the Citie of *Manilla*, and after it was more then foure dayes.

Inuocation by
writing.

In conclusion, hauing by the fauour of almighty God overcome all their trauels by the Sea, and the necessitie of the lacke of water and victuals, they arriued at the desired Port the second day of February, *Anno* 1580. whereas they were receiued by the Gouverneur, and of all the rest with great ioy, &c.

Two Letters taken out of BARTOLOME LEONARDO DE ARGENSOLA his Treatise, called *Conquista de las Islas Malucas*, Printed at *Madrid*, 1609. pagg. 336.

337. mentioning the comming of two English ships to China: which seeme to bee two ships of the fleet of * BENIAMIN WOOD:

* See sup. l. 3.
c. 1. §. 2.

The former written by the Visitor of *Chincheo* in China,
vnto the Gouverneur of the *Philippinas*, Don
PEDRO DE ACUNNA.

TO the grand Captaine of Luzon. Because wee haue understood, that the Chineses, which went to trade and trafficke into the Kingdome of Luzon, haue bene slaine by the Spaniards, wee haue made inquisition of the cause of these slaughters, and haue besought the King to doe iustice on him, that hath bene the cause of so great mischiefe, to procure a remedie for the time to come, and that the Merchants may liue in peace and safety. In the yeeres past, before I came hither to be Visitor, a certaine Sangley, called Tioneg, with three Mandarinnes or Iudges hauing the Kings Passe, came to Cabit in Luzon, to seeke Gold and Silver: which was all lyes: because he found neither Gold nor Silver. And therefore I besought the King, that he would punish this deceiver Tioneg, that the good iustice that is vsed in China might be knowne. In the time of the former Vice-roy, and Capado, Tioneg and his companion Yanlion deliuered this vnto the King, that hee would cause all the Papers of the cause of Tioneg to be coppied out, and that he would send for the said Tioneg with his processe before himselfe: And I my selfe saw the said Papers, and caused it to appeare that all was but lyes which the said Tioneg had said. I wrote vnto the King, saying, That by reason of the lyes which Tioneg had made, the Castillians suspected that wee sought to make warre vpon them: and that therefore they had slayne aboue thirtie thousand Chineses in Luzon. The King did that which I besought him. And so he chastised the said Yanlion, commanding him to bee put to death. And hee commanded Tionegs head to be cut off, and to be put in a Cage. The people of China which were slayne in Luzon, were in no fault. And I with others negotiated this businesse with the King, that I might know his pleasure in this affaire: and in another matter, which was this: That there came two English ships to these coasts of Chincheo; a thing very dangerous for China: That the King might consider what was to bee done in these two matters of so great importance. Likewise wee wrote vnto the King, that he would command the two Sangleys to be punished, which shewed the Hauens to the Englishmen. And after wee had written these things aforesaid to the King, he answered vs that wee should learne, wherefore the English ships came vnto China: whether they came to robbe or no? That they should dispatch from thence a Messenger immediatly to Luzon: and that they should signifie to them of Luzon, that they should not giue credite to the base and lying people of China: And that forthwith they should put to death those two Sangleyes, which shewed the Hauens to the Englishmen. And touching the rest that wee wrote vnto him, wee should doe as wee thought best. After wee had receiued this order, the Vice-roy, the Capado, and I sent this message to the Gouverneur of Luzon: That his Lordship might know the greatnesse of the King of China. Seeing hee is so mightie, that hee governeth all that the Moone and Sunne doe shine vpon. And also that the Gouverneur of Luzon may know the great wisdome wherewith this mighty Kingdome is governed. Which Kingdome this long while none durst attempt to offend. And albeit the Japonians haue pretended to disquiet Corea, which is vnder the Government of China: yet they could not obtayne their purpose: but they were driven out of it: And Corea hath remayned in great peace and safety, as at this day they of Luzon doe well understand.

The

The Answer of Don PEDRO DE ACUNNA, Gouvernour of the Philippines,
to the Visitour of Chincheo in China.

THe Gouvernour answered these Letters by the same Messengers that brought them: using termes full of courtesie and authoritie. Hee rehearsed the rebellion of the Sangleyes, from the beginning: Hee iustified the defense of the Spaniards, and the punishment that was executed upon the Offenders. Hee said, that no Common-wealth can be governed without chastising the bad, nor without rewarding the good. And therefore that he did not repent him of that execution: because it was done for representing of them that thought to destroy vs. That the Visitour should bee Judge, what hee would doe, if the like case should happen in China. That the griefe that he had was, that he could not saue certaine Sangleyes Merchants Anhayes, which died among the offenders: But that this was vnpossible to be remedied; because the furie of warre doth not giue leaue to kill some, and to saue others, especially being not knowne of the Souldiers in the heate of battell. That using mercy to those that remayned aline, condemned them to rowe in the Gallies: which is the punishment, which is ordained among the Castillians for those that haue deserued death. Yet if it seeme in China that it ought to be moderated, hee would grant them libertie. But let it be considered, said Don Pedro, that this may be a cause, that in not chastising so great an offence, they may hereafter fall againe into the same. A thing that would shut vp all accesse vnto fauour. That the goods of the Chineses that were slayne are in safe custodie. And that it may be seene, that no other affection moueth mee then that of iustice, I will shortly send them to be deliuered to the right Heires, or vnto such persons as of right they belong vnto. None other respect moueth mee to any of these things, but that of reason. Whereas you tell mee, That if I will not set at libertie those prisoners, licence will be granted in China to the kinsfolke of those which died in the Rebellion, to come with an Armie to Manila, it breedeth no feare in mee. For I hold the Chineses to be so wise, that they will not be moued to such things vpon so weake a ground: especially none occasion thereof being giuen them on our part. And in case they should be of another minde, wee Spaniards are a People which know very well how to defend our Right, Religion, and Territories. And let not the Chineses thinke, that they are Lords of all the World, as they would haue vs thinke. For wee Castillians, which haue measured the World with spannes, know perfectly the Countreyes of China. Wherefore they shall doe well to take knowledge, that the King of Spaine hath continuall warres with as mighty Kings as theirs is, and doth suppress them, and putteth them to great troubles. And it is no new case, that when our enemies thinke that they haue vanquished vs, they finde vs marching and destroying the Confines of their Land, and not to cease, untill wee haue cast them out of their Thrones, and taken their Scepters from them. I would be much grieved with the change of the commerce: But I beleene also that the Chineses would not willingly lose it, since that thereby they obtayne so great profit, carrying to their Kingdome our Silver, which neuer faileth in trucke of their merchandise, which are slight things, and soone worne out.

* The English
ships spoken of
by Spaniards
according to
the mutuall
hostilitie of
those times.

The ships of the Englishmen, which arrived on the coast of China, it was determined not to receive: because they be no Spaniards, but rather their enemies, and Pirats. Wherefore if they come to Manila, they shall be punished. Finally, because wee Spaniards doe alwaies iustifie our causes, and doe boast our selues, that it cannot bee said in the world, that wee vsurpe other mens possessions, nor innade our friends, that shall be fulfilled which is here promised. And from hence forward let them know in China, that wee neuer doe any thing for feare, nor for threats of our enemies. Don Pedro concludeth, offering continuance of amitie by new bonds of peace with the Kingdomes of China: and that he will set at libertie in due time the Prisoners which he held in the Gallies: albeit he thought to vse them, as he did, in the voyage of Maluco; which he put in execution with speed. And all this he precisely performed.

CHAP. IIII.

The report of a Mahometan Merchant which had beene in Cambalu: and the
troublesome trauell of BENEDICTVS GOES, a Portugall Ie-
suite, from Lahor to China by land, thorow the
Tartars Countreyes.

Epist. Eman.

Xatai and Xam-
balu, for Catai
and Cambalu.

Caygar.

Erome Xauere a Iesuite, in a Letter from Lahor in India, subiect to the Mogol, dated, August, 1598, relateth that an old man there knowne to haue distributed 100000. Peeces of Gold at Mecca, affirmed to the Prince that he had liued in Xatai thirteene yeeres, in Xambalu the chiefe Citie; that the King thereof was mighty, and had in his Empire one thousand and fiftie Cities, some very populous; that he had often seene the King, with whom no man speaks but by a Supplication, nor is answered but by an Eunuch. And asked how hee had accesse thither, he said, he being a Merchant sustayned also the person of the Embassadour of the King of Caygar, and

and being detained in the first Citie by the Magistrate, he shewed his Commission, and Poste was presently sent to the King, who returned in a moneth, riding ninety or an hundred courses a day, with change of Horses; bringing him Letters of admission. Hee said that they punish theeues severely: that these *Xaitians* are white, long bearded, personable, and comely, therein to be preferred before the *Rumes* or *Turkes*; in Religion *Isauites* (*Christians*, so called of *Iesus*) some *Musauites* or *Iewes*, and many *Mahumetans*, insomuch that they hoped to bring the *Christian* King to that Sect. They had (he said to the *Iesuite* in another conference) many Temples, and Images painted and grauen, and Crucifixes which they with great deuotion worshipped; many Priests, much reuerenced, each hauing his owne Church; to whom they offer their gifts; they liued single and kept Schooles; one supereminent: at the Kings charge were the Churches built and repaired; they wore blacke clothes, and on holidayes red, with Caps like the *Iesuites*, but greater; many Monasteries of both Sexes, and some in their owne houses, obseruing a single life; the Countrey rich, hauing many siluer Mines; and that the King had foure hundred Elephants, which they said were brought from *Malaca*, and that Merchants resorted thither; the Voyage sixe moneths. *Xauerius* addeth, that in *Caximir* he heard of many *Christians* in *Rebat*, a Kingdome adioyning to *Catai*, with Churches, Priests, and Bishops. These reports (sayth *Trigantius*) the *Saracens* made, either of purpose to deceiue, after their wont; or were deceiued by like shew of Holies in Images, Lamps, Altars, Priests vestments, Processions, Singings, and the like, which the *Deuill* hath imitated among the *Chinois* like to our (*Romish*) Rites.

These reports caused the *Iesuites* in *India* to thinke of sending one of their Society into those parts. *Pimenta* the Father Visitour sent notice thereof to the Pope, and to the King of *Spain*, who tooke Order with the Vice-roy to be aduised herein by *Pimenta*. *Benedictus Goez*, a brother of that Society and Coadjutor to *Xauerius*, was thought fit for that designe, hauing the *Persian* tongue. And hauing come from *Echebar* (father of the present *Mogol*) who had lately taken *Brampor*, with his Legat, to *Goa*; hee was sent backe to *Labor*, to accompanie the Merchants; which euery fifth yeere, as that *Saracen* related, with title of Legats of the King of *Persia*, and other Easterne Kings (not otherwise admitted) went thither. In the yeere therefore 1602. he went to *Agra*, where *Echebar* applauded his purpose, and gaue him foure hundred Crownes for his journey, besides a thousand Rupias hee had already spent. He changed his habite, and disguised himselfe like an *Armenian* Merchant, and so went to *Labor*, calling himselfe *Branda Abedula*, whither he came on the eight of December. He went to the house of *Iohn Galisco* a *Venetian*, and there provided himselfe of necessaries, wearing his haire and beard long, and *Leo Griemone* a *Greeke*, well skilled in *Turkish* and *Persian*, vndertaking to be his companion, with *Demetrius* another *Greeke*, and *Isaac* an *Armenian*. Furnished with diuers writings and a Catalogue of moueable Feasts till *An. 1610*. he set forth *An. 1603*, the sixth of Ianuarie from his Superiour, and in Lent after from *Labor*, with the companie of Merchants which goe from the *Mogols* to *Cascar*, almost fise hundred men, with many Camels and cariages.

In a moneths journey they came to a Citie called *Athee*, in the Prouince of *Labor*; and after fiteene dayes, passed a Riuer, a slight shot broad, where they stayed fise dayes, being told of theeues in great number at hand. Two moneths after they came to another Citie called *Passaur*, where they rested twentie dayes. Thence they going to another small Towne, met with a certaine Anchorite a stranger, by whom they vnderstood that thirtie dayes off was a Citie named *Capherstam*, into which the *Saracens* are not permitted entrance, and if they enter are put to death. But *Ethiopic* Merchants are admitted their Citie, yet not their Temples. Hee said, that the Inhabitants of that Region goe to Church all of them in blacke; their Countrey fertile, and plentifull of Grapes. Hereby *Goes* supposed that they were *Christians*. In the place where they found this stranger, they stayed other twentie dayes. And because the way was infested with Theeues they received of the Lord of the place a Conuoy of foure hundred Souldiers. In fise and twentie dayes they came from hence to a place called *Ghideli*, all which way their cariages went at the foot of a Hill. The Merchants with Armes on the tops of the Hill made search for Theeues, which vse to throw stones from thence on the Passengers, except thus preuented. In this place the Merchants pay Tribute. Being assaulted by Theeues many were wounded, and they had much adoe to saue their liues and goods. *Benedict* escaped by flight into the Woods. At night they came againe together, and auoyded the Theeues. After other twentie dayes journey they came to *Cabul*, a Citie and Mart frequent, not yet hauing passed the *Mogols* Dominions. Here they stayed eight dayes: for some of the Merchants would goe no further, and others durst not, being so few. In this Mart the Sister of the King of *Cascar*, by whose Dominion they were to passe to *Catai*, happened on the Carauan. The Kings name was *Maffamet Can*; this his Sister was Mother to the King of *Cotan*, and called *Agebanem* (*Age* is a title giuen by the *Saracens* to those which haue beene on Pilgrimage at *Mecca*, whence she now returned.) Being destitute of prouision for her journey, shee demanded aide of the Merchants, promising to restore all faithfully with encrease when they were comne to her Kingdome.

Goes thought it a fit occasion to procure the friendship of another King, his *Mogoll* Patents now wearing out. Hee lent her therefore on sale of some goods sixe hundred Crownes, refusing any

any contract of interest, which shee bountifully repayed in pieces of Marble much esteemed in China, the best merchandise for such as goe to Catay. *Leo Grimane* the Priest, wearied with the tediousnesse of the iourney, went no further, and *Demetrius* stayed in this Citie on merchandising affaires. *Goes* held on with *Isaac* the Armenian, in the companie of other Merchants, which gaue likelihood of better securitie. The first Citie they came at was called *Ciaracar*, in which place is great store of Iron. Here *Goes* was not a little troubled, the *Mogols* Scale in these his borders being neglected, which all this way hitherto had freed him from payment of Customes. Ten dayes after they came to a small Towne, called *Parnam*, the vtmost of the *Mogoll* confines.

After five dayes stay, they had twentie dayes iourney ouer high Mountaines into a Region named *Aingharan*. In fifteene dayes more they came to *Calcia*. The people of this Region hath yellow haire on head and beard like the *Low-Country-men*, and dwell in diuers Villages. Ten dayes after, they came to a place called *Gialalabath*, where the *Bramanes* exact Customes granted them by the King *Bruarate*. After other fifteene dayes they came to *Talhan*, where Ciuill broiles detayned them a moneth; the *Calcians* rebelling and endangering the wayes. Hence they passed to *Chemam*. Vnder *Abdulahan* King of *Samarhan*, *Burgania*, and *Bacharate*, and of other neighbouring Kingdomes, is a small Towne, the Captaine whereof sent to the Merchants to containe themselues within the walls, the *Calcians* infesting all without. They answered, that they would pay their Customes, and pursue their iourney by night. But hee forbad them, saying, that the Rebels had no Horses as yet, which if they could take from the Carauan, they would proue more mischieuous: much better it were, if they would ioine with him to repell them. Scarcely were they comne to the walls, when the rumour came of the *Calcians* coming: at which newes the Captaine and his ranne away. The Merchants erected a sudden fortification of their packes, and carried into the same great store of stones to serue their turnes if Arrowes failed. The *Calcians* perceiuing that, sent a message to the Merchants, that they should feare nothing, for they would accompanie and defend them. They durst not trust them, but resolved to flee to the next Wood, the Theeues taking out of the packes what they pleased, and then calling them forth, and permitting them with their emptied packes to enter the emptie walls. *Benedict* lost nothing but a Horse, for which also hee after receiued Cotton clothes. They liued within the walls in great feare. But at that time a great Captaine, named *Olobet Ebadascan*, sent his Brother out of the *Bucharate* Region to the Rebels, which caused them to permit the Merchants to goe freely: in all which iourney the Rere was vexed with Pilferers. Foure of them set vpon *Goes*, to escape whom hee threw amongst them his Persian Turbant, whereof they making a foot-ball, hee meane while set spurres to his Horse and ouertooke his companie.

Eight dayes after with a tedious passage they came to *Badascian*, called *Tengi*, which signifieth *Atroublesome way*: for there is space but for one to passe, and that on the high banke of a great Riuer. The Inhabitants with a companie of Souldiers set vpon the Merchants, and tooke from *Goes* three Horses, which hee after redeemed with gifts. Here they stayed ten dayes, and thence in one day came to *Ciarciunav*, where they were five dayes detayned with raines in the open field, and were besides assaulted by Theeues. Ten dayes after they arriued at *Serpanil*, a place quite forsaken. They climbed into a high Hill, called *Sacrubma*, whither the strongest Horses were only able to passe, the rest going about. Two of *Goes* his Horses halted, and had much adoe to ouertake their fellowes. In twentie dayes iourney comming to the Prouince *Sarcil*, they there found many neighbouring Villages. After two dayes stay for refreshing, they in two dayes more came to the foot of a Hill, termed *Ciecialith*, which they ascended, thicke couered with Snow, wherewith many were frozen, and *Goes* was in great danger. For the Snow held them fixe dayes; after which they came to *Tangbetar*, which belongs to the Kingdome of *Cascar*. There *Isaac* the Armenian fell from the banke of a great Riuer into the water, and was eight houres space halfe dead. In fifteene dayes more they attayned the Towne *Iaconich*, such an ill way that *Goes* lost fixe Horses with the trauell. In five dayes he got (hasting before the companie) to the chiefe Citie named *Hiarchan*, whence hee prouided his companions of necessaries, who soone after arriued there in Nouember, 1603.

Hiarchan the Seat Royall of the Kingdome of *Cascar*, hath great resort of Merchants, and is also well stored with variety of merchandise. The Carauan of *Cabul* here ends their Voyage: and from thence to *Catay* is a new one furnished, the Captainship whereof the King selleth at a great price, and conferreth on the Captaine Regall power ouer the Merchants thorow all that way. It was a yeeres space before they could all bee ready to so long and dangerous a iourney, which required many persons. Neither is it performed euery yeere, but by them onely which know they shall be admitted into *Catay*. There is no better merchandise (as before is said) then a certaine shining Marble, which wee are wont to call *Iasper*, for want of a fitter word; which the King of *Catay* buyeth at a great price; and what hee leaueth they may sell to others at exceeding rates. Of it they make diuers ornaments for Vessels, Garments, Girdles, with leaues and flowers artificially engrauen. The *Chinois* call it *Tuscè*; and of it are two kinds, one more precious

precious which is taken out of the Riuer *Cotan*, not farre from the Citie Royall, in manner as the Divers fish for Pearles, and is brought out like thicke flints; the other meaner is digged out of Hills, and is sawed into broad stones about two Ells wide, after fitted to the Voyage. This Hill is twentie dayes Iourney from that Citie Royall, and is stiled *Carsangui Cascio*, that is, *The stonie Mountayne*. They are thence taken with incredible labour, both for the desertnesse of the place, and the inexorable hardnesse of the Marble, which they say is forced with fire made thereon to yeeld: the license also to take it, is deere sold by the King to some one Merchant, who purchaseth the Monopoly; and when they goe thither they carrie a yeares prouision for the Labourers, which in that space returne not.

Goez visited the King, whose name is *Mahamethin*, and presented him with a Watch, a Glasse and other *European* Commodities, which made him very welcome. Hee would not at first tell him of going to *Catay*, but only spake of the Kingdome of *Cialis* East-ward from thence, and procured his grant thereto, assisted by the Sonne of his Sister the Pilgrime Queene before mentioned. Sixe moneths passed, and *Demetrius* one of his old Societie which staid at *Cabul*, came thither. At that time by the Kings License one of the Merchants was stiled Emperour as in jest, to whom the other Merchants after the custome gaue Presents, which *Demetrius* refusing, was in danger to be imprisoned and beaten (for so large is his power) had not *Benedict* interceded and by a gift compounded the businesse. Theeues also brake into the House and setting a Sword to the *Armenians* breist terrified him from crying; but our Brother *Demetrius* hearing, cried out and scared them away. *Benedict* was gone to the King of *Quotans* Mother for payment of his Debt: his Residence was ten dayes Iourney thence, so that he spent a moneth therein before his returne. In this space the *Saracens* raised a report that he was dead, slaine by their Priests for refusing their holies. Now because he dyed intestate, they sought to seize on his goods, which was very troublesome to *Isaac* and *Demetrius*, both for defence of the goods, and losse of their Friend, which redoubled their joy at his returne with plentie of that Marble, and hee in thankfulness gaue much Almes.

On a day as he was eating with other *Saracens*, one came in armed, and setting his Sword to his breist, charged him to inuoke * *Mahomet*. He answered, that in his Law there was no such name inuoked, and therefore refused: and by the company that mad fellow was extruded. The like zeale oft endangered him on like termes of *Mahumetan* profession. On another day he was called by the King of *Cascar* in the presence of his *Cacises*, the Priests, & the *Mullas* or learned men, and asked what Law he professed, whether that of *Moses*, of *Dauid*, or *Mahumet*, and which way he turned himselfe in praying. Hee answered, that hee professed the Law of Iesus, whom they call *Isai*, and turned any way when he prayed, beleeuing that God was euery where: about which rose amongst them great controuersie, they vsing to turne to the * West: yet they concluded that our Law also might seeme good.

Meane-whiles one *Agias* of that Countrey was named Captaine of the future Carauan, who inuited our Brother to his House (hauing heard well of him) to a Feast, wherein they had Musicke after their manner. At the end, hee desired his company to *Catay*, which he much desired, but had learned by experience how to deale with the *Saracens*, and would be intreated, that he might seeme to doe, rather then receiue, a Fauour. The Captaine vseth the Kings mediation, who desired him to accompany the *Carnuan Bassa*, which he accepted vpon condition of his Letters Patents for all that way. His *Cabul* companions were herewith offended, as loth to lose his company, and much dissuaded him; but hee made shew as though hee were loth herein to displease the King, and for his sake had promised the *Caranan Bassa*, which now hee might not reuoke. They said that these people were perfidious, and would deuoure him and his: nor was their feare causelesse, for many of the Natiues had told them, that those three *Armenians* (so they called all these three Christians) as soone as they were out of the walles would bee slaine. This terrified *Demetrius* from going further, who also dissuaded *Goez* but in vaine, saying, he would not disappoint the hopes of so many, the Archbishop of *Goa*, and the Vice-roy to lose his expences, but would aduenture his life in the Designe.

Hee prouided ten Horses for his Carriages, and for his fellow, hauing another at home. The *Bassa* was gone to his house five dayes Iourney thence to make all readie, and thence sent to *Goez* to halten.

Anno 1604. about the midst of Nouember, they came to a place called *Iolci*, where they vse to pay Customes, and their Commissions are examined. Hence they went to *Hancialix Alceghet*, to *Hagabateh*, to *Egriar*, to *Mesetelec*, to *Thalec*, to *Horma*, to *Thoantac*, to *Mingieda*, to *Capetalcol Zilan*, to *Sare Guebedal*, to *Canbasai*, to *Aconsersec*, to *Ciacor*, to *Actu*: in this way they spent five, and twentie dayes, the way troublesome, both with store of Stones or Rockes, and with Sands. *Actu* is a Towne of the Kingdome of *Cascar*, the Gouernour whereof was Nephew to the King, then twelue yeares old. Hee would needs see *Goez*, who went and gaue him childish Presents, Sugar and the like, and was gently entertayned of him. There being then a solemn dancing before him, he requested our Brother to dance, which to satisfie him, he did.

Mahamet Can King of Cascar. Cialis.

* To vse (as it seemes) those words *La illah illalah, Mehu-med resullalah*, the Characteristical note of *Mahumetan* profession. * To Mecca ward.

Voyage to *Catay* from *Hianchan*. Places in the way.

Goez danceth.

He visited also his Mother and shewed her his Patent, which was with great reuerence admitted: to her he gaue a Chrystall glasse, a Calico cloth of *India*, and the like. The Childs Gouvernour also, or Protector, which swayd the publike Affaires, sent for him. In this way one of *Goez* his Horses fell into a swift Riuer, and escaped to the other side; and came againe of himselfe, the Name of *Iesus* being inuoked.

Caracathai, the first place of the *Tartars* Conquest. See before in *F. Bacon*, *Rubr.* *Cas* *Ac* *Cialis*.

In this way the Desert is passed called *Caracathai*, that is, *The blacke Land of the Cathayans*, in which they say the *Cathayans* stayed long. In this Towne they stayed fiftene dayes for other Merchants, and then departing went to *Onograch Gazo*, to *Casciani*, to *Dellai*, to *Saregabedall*, to *Vgan*, and after to *Cucia*, a small Towne where they stayed a whole moneth to refresh their bealts, which by the irksomnesse of the wayes, and weight of the Marble, and want of Barley were almost spent. Here the Priests demanded of *Goez*, why in their Solemne Fast (*Lent*) he fasted not, and almost forced him in hope of some Largesse or Fine. After they were gone hence in five and twentie dayes they came to the Citie *Cialis*, which was little, but well fortified. This Countrey was gouerned by a base Sonne of the King of *Cascar*, who hearing that *Goez* professed another Religion, began to terrifie him, saying, it was a bold part for a man of another profession to enter those parts: for he might lawfully take from him his life and goods. But when he read his Letters Patents he was pacified, and with a Present was made also a friend. One night disputing about their Law, with the Priests and Learned men, he sent for *Benedict* into the Palace (whereupon suspicion arose of some ill intent being at so vnseasonable a time) hee went and being commanded to dispute, with force of Arguments silenced the Aduersaries. The Vice-roy alway protected him, approving his Sayings, and concluding that the *Christians* were the true *Misfermans*, saying, that his Progenitors had professed the same Law. After the Disputation hee made him a Banquet, and caused him to lye that night in the Palace, so that *Isaac* was weeping at his returne, and almost in despaire to see him. In this Citie they stayed three moneths. For the *Carauan Bassa* would not depart without a great company (it being so much more gaine to him) nor suffer any man to goe before. *Goez* wearied with this tedious stay and chargeable expence, with a Gift obtayned leaue of the Viceroy, the *Carauan* and Captaine being against it.

Tartars customs in the borders.

He then intended to proceed from *Cialis*, when the Merchants of the former *Carauan* returned from *Catay*. These faining an Embassage (after their wont) had pierced into the Royall Seat of *Catay*, and hauing conuersed in the same Palace of Strangers with our (*Iesuits*) reported strange and certaine newes of Father *Matthew* and the *Companie*, to *Goez*, who wondred that *Catay* was become *China*. These *Saracens* were the same hereafter reported * of, which liued three moneths with ours, and told him that the Fathers had presented to the King, Watches, Pictures and other *European* Presents, and were much respected in the Palace, of the greatest, and (adding some lies) said that they had often spoken with the King. They reasonable well painted their faces, but knew not their names: by reason that after the *China* manner they had taken other names. And for further Argument they shewed a Paper written in *Portugall*, which they had taken out of the dust, when the Seruant swept the Chamber, to shew in their owne Countrey. This cheared *Goez* hearing that *Catay* was *China*, and that *Pequin* the Royall Citie was *Cambalu*.

The Vice-roy gaue him his Letters for securitie, and demanding whether he would be inscribed a Christian, he answered yea; for all this way he had comne, called by the Name of *Isai*, and so would hold out to the end. An old *Saracen* Priest hearing this, cast his Cap on the ground, applauding his resolute Zeale, saying, that theirs are reported to dissemble and alter their Religion with the Region. *Goez* went on with his companion, and a few others, and in twentie dayes came to *Pucian* a Towne of the same Kingdome, where the Gouvernour vsed him kindly and amply prouided him out of his owne House. Thence they proceeded to *Turphan*, and staid a whole moneth in that fortified Citie. Thence they passed to *Aramuth*, and after to *Camul*, a fortified place where they refreshed themselves another moneth, because they were well vsed in all the Kingdome of *Cialis*, which ends at this Towne. From *Camul* in nine dayes they came to the Northerne wals of *China*, to a place called *Chiaicuon*, where they staid five and twentie dayes for the Answer of the Vice-roy of that Prouince.

After this they were admitted entrance within the walles, and in one day came to *Socien* a Citie, where they heard much of *Pequin*, and other names knowne; so that now hee was out of all doubt that *Catay* and *China* differed only in name. All the way from *Cialis* to the borders of *China*, is infamous with incursions of the *Tartars*: and therefore Merchants passe these places with great feare, searching by day from the Neighbour Hills whether there bee any out-rode of *Tartars*, and if they judge the wayes secure they trauell by night with silence. In the way they found many *Saracens* miserably slaine, hauing aduentured to goe alone: although the *Tartars* seldome kill the Natiues, saying, they are their Slaues and Herdmen, from whom they take away their flocks of Sheepe, and Herds of Bullocks. They eat no Wheate, Barley, nor Pulle, saying, it is food for bealts, not men. They feed only on flesh, not sparing Horses, Mules, Camels, and yet are said to liue one hundred yeares.

The

The *Saracen* Nations bordering on these parts of *China*, might easily by the *Chinois* bee subdued, as being not warlike men, if the *Chinois* cared to enlarge their Dominions. In this way one night *Benedict* fell from his Horse, his company going on and not missing him till they came to their Lodging, and then *Isaac* went backe to seeke him and found him by the sound of the Name *Iesus*, almost despairing to see his company any more.

These walls were built on the West of *China*, as it trends North-wards, about the space of two hundred miles, where the *Tartarian* out-roads are now lesse dangerous. Against them are builded two fortified Cities with choise Garrisons. They haue a peculiar Vice-roy and other Magistrates ouer them, which are commanded only from *Pequin*. In one of these (*Cancen* in the Prouince of *Scensi*) the Vice-roy resideth with other chiefe Magistrates. The other (named *Socen*) hath a speciall Gouvernour, and is distributed into two parts; in one of which the *Chinois* (whom the *Saracens* here call *Carayans*) in the other the *Saracens*, haue their Habitation, which come from *Cascar*, and the like Westerne Kingdomes for Merchandizing Affaires. Some of them, as the *Portugals* at *Amacao*, in the Prouince of *Canton*, settle their abodes and haue wites and children, accounted as Native subjects. But those *Portugals* liue according to their owne Lawes, and haue Magistrates of their owne; whereas these *Saracens* are gouerned by the *Chinois*, and euery night are shut vp by them within their owne Citie, inclosed with peculiar walls. The Law is, that he which hath stayed there nine yeares, may not returne to his Countrey. The Merchants come vsually from the West to this Citie, which with fayned Embassage, by ancient leagues of tenen or eight Kingdomes with that of *China*, haue obtayned, that euery sixth yeare seuentie two in name of Legats should pay Tribute to the King, that shining Marble, pieces of Diamonds, blue colour and other things; thence they goe to the Court at publike charge, and likewise returne. Their Tribute is rather by way of honour or homage then any way profitable; for no man payes dearer for this Marble then the King himselfe, who esteemes it a dishonour to take any thing of Strangers for nothing. And they are so entertayned at the Kings cost, that all things reckoned, they get euery day about their necessarie charges a Duckett a man. Hence are many ambitious of this Embassage and purchase it of the *Caranan Bassa* (who hath the nomination) at great price: at that time counterfeiting their Kings Letters, acknowledging vassallage to the King of *China*. The like Embassages the *Chinois* admit from diuers Kingdomes, from *Canchin-china*, *Siam*, *Leuchien*, *Corea*, and some of the *Tartars* Kingdomes, not without incredible expenses of the publike treasure: of which fraud the *Chinois* are not ignorant, but flatter with their King, as if all the World paid Tribute ynto him, when as rather the *Chinois* in this manner pay Tributes to them.

At the end of the yeere 1605. Our *Benedict* came to *Socen*, growne wealthy by his long Journey; hauing thirteene Horses, five hired Seruants, two Boyes which hee bought, and the most precious Marble of the rest, all valued at 2500. Duckets. Hee also and *Isaac* were well in health. In this Citie he lighted vpon other *Saracens* returned from *Pequin*, which confirmed the former Reports of the Fathers, with other things beyond all measure of Faith, that the King of *China* paid them money daily by a certaine measure and not by weight. Hee writ presently to Father *Matthew* to *Pequin*, to acquaint him with his coming, and gaue the Letters to certaine *Chinois*: but because he knew not the *China* name wherewith Ours were called, and the Region where they resided, and writ in *European* Characters, those *Chinois* could not deliuer them. The next yeare at Easter, he sent againe by a *Saracen* Fugitiue (for they may neither goe in nor out without the Magistrates leaue) and writ to them of his Voyage and state, desiring them to take some course to free him from that Prison, that he might returne by Sea into *India*, the *Portugall* way. The Father had long before learned by Letters from *India*, of this intended Journey, and yeerely expected him, and made much enquire of those counterfeit Embassadors, but could not till now heare of him. They were now therefore much joyed to read his Letters, which in Nouember following came to their hands, and one was presently sent, to bring him by some meanes to *Pequin*, not one of the Societie lest one stranger should hinder another, but a Pupill which lately admitted, had not yet entred his probation, named *John Fernandes* a wise young man, with a companion, a new Conuert, skilled in those parts. And if hee could not bring him thence by the Magistrates leaue or by other Arts, he should stay there with him, and write to the Company, who by their friends would procure him passage.

This Journey was vnreasonable in the hardest of Winter, being almost foure moneths Journey from *Pequin*. Yet would not Father *Matthew* deferre any longer, which if he had done, *Goez* would haue beene dead before his coming. Hee and two others of the Societie writ to him. Meane-while *Goez* suffers more wrongs of the *Saracens* in this place then hee had done in the way, and was faine to sell his Marble halfe vnder the price for prouisions, whence he made 1200. Duckets and paid his Debts, and sustained his Family a yeere. Meane-while, the *Caravan* came with their Captaine, and he with entertainments was againe forced to borrow, and because hee was chosen into the number of the seuentie two, he prouided him of some Marble pieces, without which had beene no going to *Pequin*. Hee hid one hundred pounds in the ground, that the *Saracens* should not know thereof. *Ferdinandus* went from *Pequin* the eleuenth of December,

* This 200. is to bee vnderstood of the Westerne parts or perhaps all but so much is naturall of rockes or hills or Trigantius a Dutchman might meane Dutch miles. The Map expresseth about 1000. miles. The reports are diuers as from reports: for who could see it all? and what good would 200. miles doe, which horsemen in few dayes might passe. Diuers Embassages counterfeited.

Reports of travellers to bee weighed.

Nouem. 1606

Caravan cometh.

Singhan.

and his Seruant ranne from him at *Singhan*, the Mother Citie of the Prouince of *Scianfi*, carrying away halfe their prouision. At the end of March, 1607. he yet made shift to get to *Socen*, and found *Goez* lying on his Death-bed, who had dreamed that one of our company would come thither the next day, and sent *Isaac* into the Market who brought *Ferdinandus* to him. Having received the Letters, he brak into a *Nunc dimittis*, as seeming to haue ended his Pilgrimage. Eleuen dayes after *Goez* dyeth, not without suspicion of Poyson from the *Saracens*. They had perpetuall Spies to watch and catch what he left, which they did most barbarously execute, and amongst the rest his Iournall was lost which he had written in very small Letters. They sought for it to prevent payment of Debts there entred. They would haue buried him like a *Saracen*; but *Isaac* and *Ferdinand* excluded them and buried him, with a recitall of the *Rosarie*, in defect of other Bookes. Thus died *Benedict Goez*, a man of great parts, which had after his admission done great seruice to the Societie (howsoever he was not a Priest) much esteemed by the Great *Mogoll*, whom he auerted from the Warre of *India*. He dissuaded before his death that Ours should not trust the *Saracens*, nor aduenture this way, as vnprofitable and dangerous. And although he dyed without Confession in so many yeeres, yet he was cheerefull in the mercie of God, and professed that his conscience did not accuse him of matters of any moment.

Goez dyeth.

Tartarian Tartars.

By a *Tartarian* custome they diuide the goods of the deceased amongst them all, and therefore bound *Isaac* threatening to kill him if he turned not *Mahometan*; but *Ferdinand* put vp a Supplication to the Vice-roy at *Cancun*, who subscribed that the Gouverneur of *Socen* should examine the businesse. He first was fauourable, but corrupted by bribes threatned to whip him, and held him in Prison three dayes. But he sold his Garments for want of Money, and continued the Suit six moneths, not being able at first to conferre with *Isaac* for want of Language. *Isaac* only vttered a few *Portugall* words, and the Iudge had thought they had spoken in the *Canton* Tongue. At last, *Ferdinand* learned to speake *Persian*, and was able to conferre with him. The *Saracens* pleaded that *Ferdinand* was a *Chinese* by his countenance, the other a *Saracen*: he answered that his Mother was a *Chinese*, whom he resembled. But nothing moued the Iudge more then that he was an enemy to their Religion, and pulling a peece of Porke out of his sleue, they both did eate it; whereupon with laughter of the Assembly, the *Saracens* abominated both, spitting at the *Armenian*, and leauing the Suit, saying, that the *Armenian* was deluded by the *China-coozener*. For in all the way to prevent offence, *Benedict* and *Isaac* had abstained from Porke. And thus all was by the Iudges sentence restored to *Ferdinand* which had bene *Benedict's*: but nothing was found, saue Marble pieces which had bene hidden in the ground, which was sold, and yeilded to pay their Debts and prouision for their Iourney to *Pekin*, whither both of them came. They brought a faire gilded Crosse Picture and the Charters of three Kings, *Cascar*, *Quoran* and *Cialis*, which are reuered at *Pekin* for a memoriall. *Isaac* related all this Storie to Father *Matthem* vpon credit of his memorie, and hauing staid a moneth, was sent the wonted way to *Amacao*; where being well enterctayned, hee in sayling thence to *India*, was taken by *Hollanders*, and lost both goods and libertie: But the *Portugals* of *Malacca* redeemed him, and he held on his course to *India*, and hearing of his Wifes death, went not to the *Mogoll* Countrey, but staid at *Chaul*, and is now at the writing hereof aliue.

Chaul.
1615.

CHAP. V.

A Generall Collection and Historiall representation of the Iesuites
entrance into Iapon and China, vntill their admission in
the Royall Citie of Nankin.

OF FRANCIS XAVIER, MELCHIOR NUNNES, VALIGNANVS,
RUGGERIVS and PASIVS.

Orasmuch as we haue sailed so lately from the *Philippinas* to *China*, and backe againe with our Friers, and haue given you a Iesuits Land Iourney, we thought it worthy our labour also to launch into the deepe of their Navigations, and to honour the Iesuits, (to whom in the following parts of this Historie we are so indebted) with obseruing their Obseruations of *Iapon*, and the intercourse thereof with *China*; and from it (as the greatest and most glorious Easterne Iesuiticall Conquest) to ship our selues in their Barge to *China*. How *Francis Xanier* (now Sainted at *Rome*, together with *Ignatius Loiola*, first Founder of that Order) laboured the Conversions of

Gentiles

Gentiles and Pagans to Chriſtianitie, as in other parts of the Indies, ſo heere in Iapan I willingly acknowledge; yea, ſo farre am I from enuying either him or his Order, or any other Order titled Religious, their Trophees of Conuerſions, that I could wiſh the Pope ſeated in *Miaco*, and all the Ieſuits, & Friars, yea, all his Ieſuited Clergie fully poſſeſſed of the *Bonzian* Colledges & Temples in Iapon; whence a double good might iſſue; to the *Ethnikes* ſome light in ſtead of a totall darkneſſe, a diſeaſed life being better then death; and to *Europe*, to be lightned of their burthen, where profeſſing themſelues Lights, they proue Lightnings, and raiſe ſo manifold combuſtions. And moſteſpecially could I wiſh this honour to my Countrey-men the *Engliſh* Ieſuites, and Priests, Populi Emiſſaries of whatſoeuer Order, that they were there ordered, or (which firſt their ambition better) ordering that Eaſterne World, rather then here diſordered and diſordering, playing the *Lords of Miſ-rule* in the Weſt. The very Name of Chriſt is ſweet to mee, euen in Iapan, yea, from a Ieſuites mouth, or a Ieſuites Conuert; and would God they taught them Ieſus more, and leſſe Ieſuitiſh fancies of exchanged worſhip of Creatures, howſoeuer gilded with Chriſtian Names, that the *Iaponians* might learne to acknowledge Ieſus and *Maria* truly, and not with Names and Images of *they know not what*, to worſhip *Venus* and her Sonne *Cupid*, in ſtead of the Bleſſed Virgin, and that incarnate Bleſſedneſſe her bleſſed Sonne, who is God ouer all bleſſed for euer.

This happened in Capt. *Saris* his ſhip. See to. 1. 4. c. 1. p. 367.

One told *Cortez* the *Mexican* Conqueror then ſpeaking great words, that there is much difference in conquering Neighbours at home, and naked *Americans*, I adde, that a man may be Chriſtened, and yet farre ſhort of Chriſtianitie, (euen by Ieſuites * teſtimonies) and that ſomewhat more is required to a Chriſtian then Chriſtian Names, giuen in Baptiſme to hundreds at once, as ſome haue done without further inſtruction. Deuotion is rather to be prized by weight and worth, then by tale and numbers, as happens in their Beades here, and too often in their Conuerſions there: which were they indeed ſo much to be magnified and gloried in, would aſwell preuaile in men of capaciti to ouerthrow ſtrong holds and high imaginations, as here to worke on our ſilly women laden with finnes, hoping for their Confeſſion-cure; and there, with ſillineſſe it ſelfe, or ſuch as Reason turnes Chriſtians becauſe they will not runne madde with their owne to ſuch Monſters as their *Bonzi* teach them. Themſelues confeſſe, that it is not much, they can preuaile with *Muſlimetans* any where; or here in *China*: and Ours haue found them to ſay more then they had done in that little.

* See ſup. l. 9. c. 12. §. 5. and the laſt Chapter of my Pilgrimage

2. Cor. 10. 4.

See Sir T. Roe and M. Terry, ſup. p. 1482. and 586.

This ſtorie ſhewes that with *Mogols* & *Chinois* gifts are beſt Conuerſers. * Adol. Schulgenius. Colon. Ad. 1622. l. 1. n. 26.

I ſhould much reioyce that their Reports were true, and that as an Orator * of theirs hath ſolemnized the Canonization of *Loiola*, their Patriarke, and *Xauier* the *Indian* Apoſtle (ſo hee ſtileth them) this *Saint Francis* had conuerted three hundred thouſand Soules, of innumerable Nations; yea, all Heretikes in neere ſixteene hundred yeeres, had not conuerted ſo many, nay, had not peruerſed ſo many not Chriſtians, to all their Hereties together, as he alone adioyned to Chriſt in eleuen yeeres. I am glad to heare it, and that which hee addeth, that all Heretickes whatſoeuer had not infected ſo many Languages and peoples, as thoſe of which hee had illuſtrated many with Chriſtian Truth and Pietie. Doth this man conſider how much of the World hath bene Chriſtian, and how much after that Hereticall? How many more Nations the *Neftorian* Heretic hath infected then *Xauier* ſaw, leaueing, in manner, all *Aſia* from *Conſtantinople* where it began, vnto *Tartaria*, *Cathay*, or *China*, and the *Indies*, and hath not the *Iacobite* Heretic preuailed ouer *Africa*? and before that the *Arrian*; ouer all the World, which as *Saint Hierome* ſaith, groned and wondred to ſee it ſelfe growne *Arrian*? But theſe perhaps rather peruerſed Chriſtians then any way conuerted *Ethnikes*! Yet the great Nations of the *Gothes* and *Vandales* were of *Ethnikes* made *Arrians*, the great Nations of the *Lithuanians*, *Muſcouites*, *Ruſſes*, &c. haue not many hundred yeeres ſince of *Ethnikes* bene conuerted to the *Greeke* Church, which they hold not Catholike (that I mention not the *Armenians*, *Georgians*, and others) one of which numbred many times three hundred thouſand.

See before in *Polo*, *Conti*, &c. the truth hereof.

And that one Impietie of *Mahumet* hath more Followers many, then all whatſoeuer profeſſions of Chriſtianitie in all Languages, Nations, Rites whatſoeuer (I greeue to tell it) and that from peruerſe *Ethnikes* and peruerſed Chriſtians. And although *Luther* and *Caluin* went not out of *Germanie* and *France* (which he objects) yet their ſound, the Goſpell which they preached hath gone ouer all the Earth; (as theſe our Relations ſhew in the Voyages of *Engliſh*, *Dutch*, *French*, yea, the Apoſtles themſelues) and they haue ſhaken the Towres of *Babylon* in *Europe*, where they were ſtrongeſt (where Antichriſt hath his Throne, a Conqueſt more then *Indian* or *Iaponian*) and when the Prophesie of *Babylons* vtter ruine is fulfilled, the ſame word ſhall conquer (I hope) both *Iewes* and *Gentiles*; yea, theſe Ieſuites and their Preachings, may, by Diuine Diſpenſation become Harbengers to the Goſpell hereafter, as the *Iewiſh* Diſperſions in the Tranſlations of the Scripture and profeſſion of the true God, were fore-runners of the Apoſtles preaching. Meane-while they find vs worke at home to watch ouer our Flockes, leſt ſuch grieuous Wolves enter, and make vs to leaue the *Phariſies* glorie of compaſſing Sea and Land to winne Proſelutes to theſe their Heires and Succeſſors in this, as in many other things. But I will leaue them glorying of their Conuerſions, grieuing that they are not herein better then their reports. I will follow them to theſe parts of *China*, and here for *Chinas* ſake to *Iapon*, and with that Rule of

Apo. 18.

Act. 10.

Cic. pro Milone. Caſſin

Cassius (*Cui bono*) obserue them, in things not gainefull to their Religion, approue and applaud their industrie, yea, accept and thankfully acknowledge their authoritie. In their Conuerfions to the Faith, I suspend my faith in the qualitie, if I admit their quantitie. For how could one man well instruct so many in so little time, except hee could haue giuen the Holy Ghost, as the Apostles in their conuerfions did.

How little in
comparifon
was Paul, from
Ierusalem to Il-
lyricum?

Francis Xauier, in the yeere 1541. sayled from *Lisbon*, wintred at *Mosambique*, whence hee passed into *India*, after that to *Malaca*, and to *Iaponia*, *Et Cunctas oras* (sayth the former Au-
thor) *quas Oceanus ab Indico mari vsque ad extremos Sinas, id est totius Orbis dimidinum, circum-*
fluit, Euangelica pradicatone illustrant & impleuit, (*Iapon* was first discovered and knowne to the
Portugals by *Mota*, carried out of his course to *China* thither by tempest, 1542.) Hee dyed, Anno 1552. the five and fiftieth of his Age, of his *Indian* peregrination the eleuenth, in the Ile
Sancian, on the Coast of *China*. This was the *Indian* Standrad-bearer to all of that Societie (be-
ginning his trauell to *Lisbon* the first yeere of their Confirmation 1540.) and now deified or
Canonized, and inuoked by Doctor *Schulchenius*, Chancellor of *Colen* his Orator, *Ignati & Fran-*
cisco vestris succurrite precibus, &c. A Letter of his written from *Iapon*, in Nouember, 1549.
thus relateth.

Letter of Xau-
ier.

Wee came by Gods grace in August to *Iapon*, on the Feast day of the Assumption of the Virgin Marie,
having set forth from *Malaca* on Midsummer day. The Master of the Ship was a *Chinefe*, which had
undertaken that office to the Captayne of *Malaca*, and sayled prosperously till the Master altered his
minde (as those Barbarians are usually inconstant) and lingred long amongst the Islands in the way. This
troubled vs in two respects principally, both for the losse of the season which God offered, and which
being past, wee were compelled to winter on the Coast of *China*; and againe, because in the same Ship
was carryed an Idoll of the Deuill, to which the Mariners in sight and spight of vs, sacrificed after the
manner of their Countrey. They also by lots demanded answers thereof, touching their Voyage; which (as
they sayd and belceued) were sometimes good, sometimes bad. A hundred leagues from *Malaca*, holding
our course to *China*, wee stayed at an Island, where after many Ceremonies the Deuill was consulted,
what fortune wee should haue, who answered, very prosperous: Whereupon with great alacritie wee set
sayle: they worshipped the Idoll placed in the poepe, with Candles burning and incense of sweet Wood;
wee trusted in God the Creator of Heauen and Earth, and in his Sonne our Lord Iesus Christ, desiring
to carrie his Religion into those parts. When wee were under sayle, they demanded of the Deuill, whether
this Ship should retorne from *Iapon* to *Malaca*: the answer was made by the lot-casters, that it should
goe to *Iapon*, but not retorne to *Malaca*; which made them alter their mindes, thinking it better to win-
ter in *China*, and to deferre the voyage to *Iapon* till the next yeere. You may well thinke how it grieved
vs, that the Deuill must bee consulted touching our course. After this we came to *Cauchinchina*, where
two aduerse things happened, *Emanuel Sina* our companion, by the rolling of the Ship in the troubled
Sea fell into the sinke, almost dead with the bruise and water, but in few dayes recovered: which before it
was ended, the Masters Daughter with the like rolling of the Ship fell into the Sea, and in all our sight
was drowned, and much lamentation followed. The Barbarians presently sought to pacifie the Deuill,
and without rest all the day and night, tooke paines to kill Birds to the Idoll, and to set dishes (of meate
before it,) and by lots consulted to know the cause of that misfortune. The answer was, that if *Emanuel*
which first fell in, had dyed, the Gire had not fallen into the Sea. You see in what danger the Deuill here-
by had cast vs, if our Lord had not restrayned his rage, &c.

Deuill wor-
shipped by the
Chinois.

Canton.

The tempest being asswaged, wee came in few dayes to the Port of *Canton* in *China*. And there
they purposed to Winter, notwithstanding all our intreaties and expostulations: but I know not how on a
sudden they would goe to *Chincheo*, on the same Coast. And when wee were almost there, the Master
was certified by some which sayled by, that there was store of Pirats at *Chincheo*; whereupon the winde
being faire for *Iapon*, and crosse for *Canton*, they brought vs to *Cangoxuma*, the Countrey of our
friend Paul, whose friends vsed vs unkindly. There wee spent some dayes in learning the Elements of
the *Iaponian* tongue with great labour, and began to publish the Decalogue, and other heads of Christian
learning, which Paul had accurately conueried into his owne Language; and wee purposed speedily to
Print them, whereby the knowledge of Christ is further and more easily founded, &c. The occasion of
his journey thither, hee sheweth in another Letter, that some Portugals being lodged in a House
possessed by Deuils, compassed the sayd house with Crosses, and that there was great hope of good to bee
done in those parts: whereupon, notwithstanding those Seas are very tempestuous, and much infested
with Pirats, hee resolved to goe thither.

Seas tempestu-
ous and Pira-
tical.

Ricinus and *Trigantius*, adde that the *Iaponian* Priests alledged in defence of their Idolatries, the
Chinois wisdome against him, whereupon hee returned to *India*, to aduise with the Vice-roy to
send an Ambassage into *China*, without which there was no entrance, and obtayned that *James*
Pereira was named Legate, with whom he had before conferred about the businesse at *Sancian*,
where the Portugals at that time vsed to trade with the *Chinois*, (*Amacao* not yet established) but
Aluarnus Taidius the Captayne of *Malaca* opposed. Xauier loath herein to bee crossed, vsed
the Popes Bull, which constituted him Apostolicall Nuncio, and grievously Cursed all that
should hinder his proceedings in promoting Religion. And when *Aluarnus* would not otherwise
relent, hee interdicted him and his followers. Soone after *Aluarnus* was possessed with a Lepro-
sic,

he, and further contemning the Vice-roy, was taken and cast in Irons, and dyed miserably: Xauier burning with zeale of his China expedition, sought to get some Chinois by fauour or reward, to conueigh him by stealth into China, and to expose him some-where on the Continent, although hee knew that imprisonment attended such strangers, as came into China without licence. Being admonished to take leaue of the Captayne, What, sayd hee, should I goe to salute an Excommunicate person? I shall neuer see him, nor see me, in his life, nor after, but when in the Vale of Iosaphat I shall accuse him before the Iudge, Christ. And praying for him, after with a countenance full of Maieftie, hee put off his shooes, and shooke off the dust, according to the Euangelicall precept. Thus he came to Sancian a Desert Island, where the Portugals vsed to make Bootches of boughes or straw, (for the time of their Trading with the Chinois) with whom hee consulted about some way to effect his desires, though with losse of libertie or life. At last he agreeth with a China Merchant, for as much Pepper (giuen him of the Portugall Merchants in almes) as was worth about two hundred Duckets, to set him and his Interpreter on shoare secretly. Hee undertooke it, but either secretly terrified by other Portugals, or with his owne danger, his Interpreter forsooke him: and after that, the Merchant also vanished. He stayed yet wayting for him, till a Feuer tooke him out of the world, in December, 1552. His corps was after translated to India.

The Portugals of those times, were very desirous of Trade with the Chinois, who on the other side were very suspitious of them, both by that which they saw of their Ships and Ordnance, and by that which the Moores at Canton reported of these Franks, (so the Mahumetans call Europeans) that they were warlike and victorious, as appeared in Malaca and all India, vnder colour of Merchandise subiected to the Portugals. The Chinois at Canton call them still Falanks: for they want the R, and pronounce not two consonants without a vowel interposed. By the same name they call also the Portugals Ordnance. Yet desire of gaine preuayled, that they were admitted to such a trade as ye haue heard, so as the Mart ended, they must away with their goods to India. That course continued diuers yeeres, till the Chinois growing lesse fearefull, granted them in the greater Island a little Peninsula to dwell in. In that place was an Idoll, which still remayneth to bee seene, called Ama, whence the Peninsula was called Amacao, that is, Amas Bay. This Rocke indeed rather then Peninsula, began to bee inhabited not onely of Portugals, but of the confluence of all neighbouring Nations, in regard of the commerce of Commodities of Europe, India, and the Moluccas, brought in Portugals Ships, and especially loue of the Silver Coynes, brought the Chinois thither to dwell. In continuance of time, a Citie began by degrees to bee built, and the Portugals made not onely contracts of Merchandise, but of Marriage, with the Chinois, and so the Peninsula was filled with priuate houses, and out of a barren Rocke arose a noble Mart. And as gayne brought Merchants thither, so the care to keepe and to get foules, brought thither Priests and Religious men, and the Portugall Kings priuiledged the place with the tittle of a Citie, and made it a Bishops See. There the Iesuites fixed a residence, and first erected a Church to our Ladie, and after that diuers others. For it seemed conuenient to their designs, the world of China lying to the North, the Moluccas to the South, Iapon, and the Philip-
40 pinas to the East, to the West Cochinchina, Camboia, Siam, and others.

From hence, many intended the China employment without successe, those fields not then white to the harvest. Melchior Nunnes, (Anno 1555.) from Canton, writes of his accidentall going a shoare on China, in his voyage to Iapan, occasioned by a terrible tempest whereto those Seas are much subiect. They came in Iuly to Sancian an Island, thirtie leagues from Canton, being much endangered by the Rockes in the way, and there hee sayd Masse ouer the place where Xauier had bene buryed; and easily obtayned admission into Canton. This is reported to bee the least of all the Mother Cities of the Provinces, yet seeming to exceed Lisbon, in frequencie. The buildings are good, the walls strong: a thousand Arches with inscriptions are seene therein, which the Magistrates vsually leaue as Memorials at their departures. The people are giuen to their bellies, and to
50 pleasure. The Government is admirable. The Chiefe Iustice they call Hexah, the Treasurer Ponchali, the Admirall and Gouernour of Strangers, Aitan. The Chaens Ensignes, are a Hand and an Eye; his office is to see the Execution of the Kings Sentences, to order or deprive Magistrates. The Tutan is Vice-roy, conspicuous by his Cap and his Garments, wrought with a gilded Lion, which is the Kings Armes: in State hee excelleth European Kings. The Portugall Captaynes and wee speake not to him, but aloofe on our knees. If any will speake with him, at enery Gate of his sumptuous Palace, hee must aloud utter his businesse, before the Porter admits him. Hee hath many for his Guard. And one hundred thousand men are sayd to bee maintayned at the Kings cost, for the keeping of this Province. His Officers goe two and two and make way with great cries. Their Cane-whippings are terrible, the Canes burned at the end, a cubite long, foure fingers broad, &c. The Chinois are wittie and indiciou,
60 in matters of the world: but haue little care of the soule, ignorant of its immortalitie, of one God, and of eternall rewards and punishments. Their Priests haue a kinde of Myter on the head, are shauen head and beard, otherwise contemptible. I could not with great diligence finde any that could shew mee their Ceremonies, and the lawes of their Holies. The Inhabitants all haue Idols, which they incense, and diuine by lots, beating the Idols if the Lots prove unluckie. I was twice at Canton, and spent two

moneths there to redeeme Portugall prisoners. The Chinois kill or captivate the Portugals, which are wracked on that Coast, which yet they cease to doe, since they pay their Customes. I went thence in May to Japon.

Valignanus.

Admiranda regi-
ni Sinenfis ex-
tant with the
Iesuites Epistles
published by
Io. Hayus.
Plaut.

Alexander Valignanus, was sent by the Iesuiticall Generall into India as Visitor, and having visited other parts, came to Amacao, in his way to Japon, forced to stay there ten moneths with the Iesuites. There hee more fully informed himselfe of the state of China, and raised the embers of the almost extinguished zeale of that expedition. Hee is thought to bee the Author of that treatise called *Admiranda Regni Sinenfis*, contayning a summarie of the wonders in China, worthy heere to have beene inserted, but that wee rather rayme at things seene then heard, as having better certaintie. *Oculus testis unus prestat auritis decem.* Vpon the consideration of their wits, Peace, Pollicie, studies of Learning, hee conceived that if any were skilfull of their Language and Letters, he might doe some good for their Conversion. Hereupon hee resolved to imploy some that way, although many others of the companie which had experience of the China affayres, held it labour in vayne. Yet hee went on and because of the paucitie of ours at Amacao, and none so fit for that designe, hee sent into India to the Prouinciall, to send thither at least one Priest for that purpose. And he going to Japon, left order what hee which was sent should doe.

Mich. Ruggeri-
us.

Mich. Ruggeri-
us.

Michael Ruggerius, an Italian of the Kingdome of Naples, was sent, and came to Amacao, in July, Anno 1579. and applyed himselfe to learne the language which the Courtiers in China vse, and is common thorow all China, (the Prouinces having otherwise peculiar languages) also to learne to reade and write their Characters, which are as many as words. That language was verie hard both in it selfe, and for the want of teachers. For those Christian Chinois which liued at Amacao, in habit of Europeans, & those which came thither in Merchandise, were almost as ignorant of the Court tongue, as of the Portugall: and though they vnderstood it, yet they could not well pronounce it. And for the Characters, they know those which belonged to their Merchandising and common vse. *Labon improbus omnia vincit.* With pictures his teacher was often forced to supply characters. And whereas the Portugals twice a yeere in the Mart season haue access to Canton, about Ianuarie and Iune, he went with them thither. For in time they obtayned this libertie, that not in a desert Island, as first, nor in the Amacao Haue, but in the Metropolitan Citie two dayes vpon the Riuer, they might haue trading by day, but lye aboard at night, with so many eyes and watches on them, as it is manifest they are not altogether free of their former feares.

Portugall trade
at Canton by a
day, and exten-
sion at night.

Portugall trade
at Canton by a
day, and exten-
sion at night.

Rugg. first en-
trance.

These Marts continue two moneths each of them, or longer, and haue beene the onely meane of admitting the Iesuites into China by the industrie and pietie of other Portugals. Ruggerius therefore with his merchandise also ventured with them, and found an impediment a first. Another Iesuite which before had gone thither had converted a youth, Disciple to a Priest, and closely conueyed him to Amacao. His Master made complaint and procured the Magistrate to fetch him backe by force, to the great trouble of Ours, and seeming discredit as it by ill arts they had seduced Children from their Parents, which is a thing at Canton, both vsuall and Capitall. Ruggerius enterposed himselfe with great care and discretion, and appeased the Admirall or

Hai-tao which hath the command of Strangers, who hereby had an opinion of his vercue, and delighted to see him studious of the China bookes. He therefore permitted him to stand at his side when others kneeled, and freed him also from the going aboard at night, and allowed him a place in the Palace, where the Ambassadors of the King of Siam were vsuallly entertayned, bringing their present or tribute (such as you haue heard in Goex) to the King. There hee studied night and day the China bookes, and on Sundayes and Holy dayes, the Portugals came thither to him to Masse and to receiue the Sacraments. This continued while they continued, for when the Mart ended, hee was commanded to returne with them. The Father procured acquaintance also with the chiefe Caprayne of the Souldiers of that Prouince (the Chinois call him Zumpim) to whom hee gaue a watch. By this meanes many of those which came to Amacao, began to shake off their Ethnike darknesse, and the deuout Portugals erected a House for the *Catechumens* (new Conuersts to bee instructed in Christian mysteries before Baptisme) where hee instructed them, and more freely followed his China studies, by helpe of Interpreters. One business hindered another, and his Marts absence (which tooke vp neere halfe the yeere) this Catechising, and a tongue is hardly learned by studie without vse; and therefore the Visitor sent for Martho Ricinus out of India, (which had come out of Europe with Ruggerius, and now had finished his Diuinitie course at Goa) to bee his yoke fellow, one to whom the China expedition is most indebted.

governed by one of those Fathers which should bee assigned to the *China* Expedition, called, *The Father of the new Conuerts*, taking care not onely of their saluation, but their other affaires and pouerty.

The Vice-roy of *Canton* Prouince is one of the chiefe Vice-royes, because his Prouince is farre from *Pequin*, and coasting on the Sea; infested therefore with often Piracies, especially *Iaponian*. Hereupon the *Canton* Vice-roy exerciseth iurisdiction also in the adioyning Prouince *Quamsi*, if occasion require to leuie more Souldiers, although *Quamsi* hath also a Vice-roy of her owne. For this cause the *Canton* Vice-roy resideth not at *Canton*, but at *Scianguin*, a Citie bordering on both Prouinces. At this time *Cinsui* borne in the Prouince of *Fuquien*, was Vice-roy, a courteous man, who to get money of the *Amacans* sent thither his Writ for the Bishop and Captaine to come to his Court, vnderstanding that they commanded all there. They thought it not agreeing to the *Portugall* honour to goe, nor to their safety to neglect his summons, and therefore by *Valignanus* his aduise, *Ruggerius* was sent in the name of the Bishop, to see if hee could get a perpetuall Station in that Kingdome, and *Penella* the Auditor, in place of the Captaine. And to obtaine his fauour, that he should not disturbe their merchandising, a Present was sent him at publike charge, of such things as the *Chinois* most regard, as waued garments of silke *Damaske* (which the *Chinois* then knew not how to make) *Crystall* Glasses, and other things valued at 1000. Duckets. The Vice-roy receiued them in great pompe, more to terrifie then honour them; but at the sight of the Presents (the scope of his purpose) hee became gentle and courteous, and decreed that they might lye in his Port in manner as hitherto they had done, obeying the Lawes of the *China* Magistrates: which words seeme formall, the *Portugals* living there after their owne Lawes; and other Nations, yea the *Chinois* themselues which are *Christians* in habite and religion, being subiect to them. The other *Chinois* are subiect to common Officers sent thither from *Canton*. The Vice-roy would haue nothing, but hee would pay for it, which hee did because bribes and gifts are there seuerely punished: but priuily hee sent to them, that money was giuen them to procure him as many other like.

Ruggerius desired that which he came for, saying, he learned the *China* Tongue and read their Bookes, which he seemed much to like, and gaue him hopes at his next returne to obtayne it. And hauing giuen them weight of Siluer; with promise, great attendance of Magistrates and Souldiers, much Musicke of Hoybuckes and other Instruments, hee sent them pompously thorow the publike streets of the Citie to their shipping. So weighty is hope of gaine. In August had come (as they vse) *Portugall* ships to *Amacao*, in them of our Society not a few, and amongst others, Father *Matthew Ricius*, who brought with him an artificiall Watch from the Prouinciall for the aduancing this *China* businesse. About that time the Captaine of *Amacao* hauing made readie those things which the Vice-roy prescribed, sent backe the Auditor to *Scianguin*, but *Ruggerius* vnseasonably (or seasonably rather as the euent manifested) fell sicke; yet sent word to the Vice-roy that he could not come to him as he had promised: and withall, that he had a Clocke-watch which did without any striker sound the houres, a thing euen still of much wonder to the *Chinois*. Hearing of his sicknesse, hee seemed sorrowfull, but this Watch awaked him, and caused him to make his Secretarie presently write a Licence for the Father to come to him with that admirable worke, as soone as he should bee able. When this Charter was read at *Amacao*, it contayned more; for the Fathers were inuited by publike Authoritie to erect a publike and priuate house in that Citie, which caused great ioy. But the Visitor was afraid as yet to send *Ruggerius*, as not furnished fully for that deligne; the beginning of a thing being the greatest part. The other *Iesuites* perswaded, and Father *Francis Pasius* bound for *Iapon*, a man well qualified for governing was sent, and *Ruggerius* adioyning his Colleague. *Ricius* was made Gouvernour of the Colledge of the *Catechumens*, and appointed to follow the other two, if occasion serued. And if the businesse proceeded not, *Pasius* was to proceed to *Iapon*, and the other two to attend better opportunitie in their *China* businesse.

Those two *Iesuites* went to *Scianguin*, and offered their Watch with a triangle Glasse presenting variety of colours, a thing admired of the *Chinois* as a precious Iewell: both which were exceeding welcome to the Vice-roy, who assigned them a conuenient station in a Suburban Temple, called *Thien-min-zu*, whither he often sent them diuers viands, and often admitted them in Visitation to his Palace. There they abode foure or fve moneths, often visited in that Temple by principall men and Magistrates of the Citie, and were in hope of their perpetuall continuance, hauing obtayned licence of the Secretarie also for *Ricius* to come, who was preparing for the Voyage, when all was disturbed on a sudden, the Vice-roy being I know not for what fault, deprived of his place. He fearing least in the chiefe Citie the presence of Strangers might further hurt him, dismissed the *Iesuites* so, as hee permitted them to stay at *Canton*, commanding the Magistrate there to prouide them a house and ground. The *Chinois* call that Citie *Quam-chen* which the *Portugals* (by the name of the Prouince deluded) call *Canton*. They well knew that his commission was of no force, yet they went, and the *Haitan*, to whom the Charter was directed was absent, and no regard being had thereof, they were not permitted to ascend the bankes, and therefore with griefe returned to *Amacao*. *Pasius* presently sayled according

¶ I I:
Iaponian Embassage to the Pope; Of Nabunanga and Quabacondono their
gouernment; Corai inuaded, Embassage from China, TAICOSAMAS
Temple, and OGOSHAMAS succession.

Asing mentioned that Embassage of Iaponian Kings sent to the Pope by procurement
of the Iesuites, out of their writings I haue heere added for further illustration, the
acts of the publike Consistorie in this forme of words.

Iaponian Em-
bassage to the
Pope.
Edit Hen.
Cuiusius

Pope Gregorie the thirteenth, sitting in the Hall designed for entertaynement of
Kings, and their Embassages on the three and twentieth of March, 1585. in the morning, in a
most ample Session of the Cardinals of the Holy Romane Church, and in a great assembly of
Princes and Prelates with greatest industry, and most frequent attendance of all Orders: Man-
tius and Michael (who was also of the Prince of Omur) two Legates of Iaponian Kings, were
brought in, and one of the two Iaponian companions of the same Embassage, of principall Nobil-
itie, to wit, Martine, for Iulian the other of them was withholden by sicknesse. After solemne
adoration of the Pope, and the kisses of his blessed feet, receiued of him with great demonstra-
tion of beneuolence and charitie, they went aside into a place appointed them with great mo-
destie. Afterwards, the Letters of the Kings which they had brought are publicly read, being
translated out of the Iaponian Tongue into the Italian, and thence into the Latine. First, that
of Francis King of Bungo, who therein professeth the Diuine bountie in sending the Iesuites foure
and thirte yeeres before into those parts, whose seed had taken some rooting in his breast, which hee a-
scribes to the Popes prayers and merits. And had it not bene for his age, warres, and sicknesse, hee
would haue visited those holy places, and haue kissed his holy feet, and set them on his head, and receiued
his blessing, his breast crossed by his most holy hand: but so detayned, had thought to haue sent his sisters
sonne, the Lord Ierome, Sonne of the King of Fiunga his Embassadour, whose Cousin-german Man-
tius in his absence he now sent; thanks him for the Reliques sent him, &c. Ian. II. 1582. Inscribed,
To the great and most holy Pope to be adored, and holding on Earth the place of the King of Heaven.
Subscribed, Francis King of Bungo, prostrate at your Blessednesse most holy feet. Not much vnlike
was the tenour of the second Letter, sent from Protasius King of Arima, who detayned by di-
uers lets, had sent his Cousin-german in his roome, to his Holinesse, which with sincere and humble
munde hee adoreth. Inscribed, To the great and holy Lord whom I adore, holding the roome of God.
The Prince of Omur sent also the said Michael his Brothers Sonne with a Letter of like import,
inscribed, With lifted up hands adoring I offer these to the most holy Lord the Pope, Vicar of the
great God. Subscribed in substance as the first.

King of Bungo
Letter.

* But that Hor-
tus deliciarum
Anglia was
more worth
then both In-
dies to the
Pope. See sup.
lib. 8. c. 6. & c.

This the most
acceptable
mysterie of
Papall Faith.

After this, silence was commanded; and in the name of the said Kings and Legates, Gaspar
Gonsaluas a Portugall Iesuite made an Oration vnto the Pope, comparing and preferring this
Embassage with that of certaine Indians to Augustus, and the conuersion of Britaine by the first
Gregorie with this of Iapon, and other Ilands by the Thirteenth, succeeding * and exceeding that,
now fallen from the Pope; applying Esays Prophecies of the Churches encrease to this Iesuits-
call Haruest, and magnifying the great glories of that Pope, founder of Seminaries, and magni-
fied extra anni Solisq. vias. Antonio Buccapadulo answered in the name of the Pope, That Francis
King of Bungo, Protasius King of the Arimans, and Bartholmew his Uncle, Prince of Omur,
hath sent you their kinsmen to him from the remote Iaponian Ilands to the veneration of that power in
presence, which by Gods bounty he holdeth, they haue done godly and wisely. For there is one Faith, one
Catholike Church, one made Gouvernour over the said Church, and Pastor of Christs Flocke, that is,
of all Catholikes thorow the World, in the succession of Peter, the Roman Bishop. That they acknow-
ledge and professe this, together with the mysteries of the orthodoxe Faith, our most holy Lord reioyceth,
and giueth immortall thanks to the Diuine bounty, and iudges this to be the most true ioy which procee-
deth from the studie of Gods glorie, and the saluation of Soules. Therefore most willingly, together
with these his venerable Brethren, Cardinals of the Roman Church, hee embraceth the testification of
their Faith, Obedience, Denotion. He wisheth and prayeth that by their example other Kings and Prin-
ces also of those Iles, and of the whole World, reiecting the worship and error of Idols, may know the
true God, and whom he hath sent Iesus Christ; for this is life eternall.

This done, the Consistorie was dismissed. The Legates when they had attended the Pope,
after the custome, into the inner roomes, were first entertayned of the Popes brothers sonne,
the Cardinall of Saint Sixtus, with a Banket; after that admitted to the Popes priuate and fa-
miliar

miliar conference, they discoursed by Interpreters with him of many things, touching the Iourney and Religion: then went to Saint Peters Church, and the holy Thresholds of the Apostles piously saluted, at night were honourably brought to their lodging.

This was prepared and furnished in the *Iesuites* Colledge by the Popes appointment at their first coming to Rome, the two and twentieth of March, who also sent two troops of Horse to guard them. They went from their Charet to the Temple, and whiles they praised God, and worshipped at the greatest Altar, the Students of the *German* Colledge in a double Quire sang, *Te Deum laudamus*. The Legates next day had audience as yee haue heard; their Vestment was parti-coloured and embroidered, a short Sword on the left hand, an Arab Dagger on the right, the other part of their habite *Iaponian*. The pompe of all sorts, and the Ordnance attended them to the *Vatican*, & there the *Italian* Garrison, and *Heluetian* Guard with their Peees and military Musicke receiued them. Then were they lead into the Hall, and after all things there finished, the Legates carried the Popes traine at his departure. And on the five and twentieth day, festiuall for the Annuntiation, the Pope going on solempne Procession, these Legates rode in the last place. What should I say more? (sayth our Authour) it cannot be told, how all magnifie the mercy of God which brings farre more at this time from the East and West to the Catholike Church, then the Deuill hath seduced in the North.

Extract, & listeria
Roma missis.

These *Iaponian* Lords returned into India, 1586. as *Valignanus* writeth, and were much endangered by a tempest. Their returne into *Iapon* is signified by the Letters of *Michael* to the Archbishop of *Ebora*, testifying their arriual the one and twentieth of Iuly, 1590. at *Nangasack* with the said *Valignanus*; and by the Letter of *Don Sancius*, Sonne and Successour to *Bartholmew* Prince of *Omur* to Pope *Xistus* the fifth, with thanks for the wood of the Crosse, and the Sword sent his Father which should be kept amongst his principall Iewels. *Protasius* also the King of *Arima* wrote to the Great and most holy Pope *Xistus* or *Sixtus* in this manner.

See the last
chap. of my
Pilg. l. 9.

On the sixteenth of the sixth Moone, which was the one and twentieth of Iuly, 1690. heere arriued the Father *Vistour* of the Societie of Iesus, with Cingua Don *Michael* my kins-man, Don *Mancius*, and other companions which I had sent to Rome to put their heads vnder your Holinesse feet. Whose coming did as much reioyce me, as if a thousand Autumnes had come to me, and ten thousand yeeres had bene added to my life. Don *Michael* related with what honour and fauour hee was entertayned of your Holinesse, of King *Philip*, and other Catholike Princes, for which I render those thanks which Pen and Paper cannot expresse. He deliuered me Letters also which your Holinesse vouchsafed mee, fauourably reckoning mee amongst the Christian Kings. Hee brought me also part of the holy Wood of the true Crosse, a Hat, and a Sword, which your Holinesse is wont to send to Christian Kings and Princes. Which fauour and studies are such, and so esteemed of mee, that I haue determined to consecrate them to eternall memory, and to place them amongst my chiefe Treasures, and the Ornaments and Monuments of my posteritie. And this honour conferred on mee is such, that greater cannot be in this life, and it redounds vnto a future good life. I had determined (according to the order prescribed of your H. in his Letters, and as the fauour, and so great benefits bestowed on mee deserved) to haue receined the said Presents with all the celebritie and pompe that might be in my Kingdome: but the Father *Vistour* shewed mee that respect was to be had of the tyrannie and great hatred wherewith *Quabacondono* the Lord of all *Iapon*, persecuteth the Fathers and Christians these three yeeres together; and this feast to be deferred till he returneth from *Meaco*, whither hee is going in Embassage from the Vice-roy of India to *Quabacondono*, &c. The ninth yeere of the Era called *Tenscio*, the tenth of the eighth Moone, which is the two and twentieth of September, An. 1590.

Popes presents

Papall fauours,
with little cost
buying much
esteeme.

Pompe pre-
scribed.

At your Highnesse feet,

Arimano, *Sciurino*, *Daibu* Don *Protasius*.

This *Quabacondono* (as *L. Froes* writeth) was now growne the greatest Monarch that euer *Iapon* had, hauing ascended thereunto from a base estate, which was (as hee hath diuers times with his owne mouth confessed) to cut wood, and to carrie it to the Market to sell for his daily food. *Nobunanga* his Predecessor had growne to great height, such as many ages had not there scene. In *Frenoiama* eight hundred yeeres before, a King of *Iapon* had builded 3800. Temples, with houses adioyned for the *Bonzis*, which employed themselues in the studie of the Lawes and Sects: for whose quietnesse he remoued the Husbandmen, and builded them two streets, allowing to their maintenance about the third part of the Customes (or Rents) of the *Vomen* Kingdome. Thus became it a fountaine of their superstitions. In time those Temples dispersed in sixteene Vallies were lessened to 800. and the *Bonzian* discipline, and studies melted into pleasures, hardned into Armes, and ranged into robberies, so that they fired *Meaco* with great slaughter, and opposed *Nobunanga*: who hauing destroyed the Militarie *Bonzi* (called *Icoxos*) and taken away their Castles, invaded *Frenoiama*, professing he feared not their Gods. On the top of a Hill was the Temple of *Quanon*, to whom prayers and pilgrimages were made for health, wealth, and long life; and yeerely solemnities and Playes with huge pompe and cost were made in his honour (to which the *Gibon* feast at *Meaco* succeeded) with frequency of men, deuices

deuices of work-men, and such order, that it may appeare that Satan there imitates the anniuersary solemnitie of *Corpus Christi* amongst vs. Thither the *Bonzi* had gotten, but it, and they, and their streets were destroyed, and foure hundred Temples with their furniture burned. At *Facusangin* also were a thousand houses of the *Bonzi* by themselves, besides Monasteries, which he destroyed. *Xingnea* the King of *Cainochum* had forced his Father to exile, and imprisoned his elder Brother, and then seized on the Kingdome: after which he shaued his beard and haire, and became a *Bonzo*, and would needs repaire *Frenoiama*, and stiling himselfe, *Chiefe in the house of the Kings and of Religions*, gathered an Armie. *Nabunanga* wrote to him, calling himselfe, *Tamer of Devils, and enemy of Sects*. Hee proceeded first against the *Bonzi* with these terrours; and after would needs himselfe be worshipped, but eightene dayes after in a conspiracy of his owne against him, he was slaine, and his dispersed. *Quabacondono* succeeded, and in greatnesse of attempts and ambition exceeded.

This *Quabacondono* is a title which *Faxiba* assumed, and is as much, as *Treasurer*. These titles are giuen by the *Vo*, or *Dairi*, descended of the ancient Kings, and now enioying a strange Empire, which is to giue titles of honour, (for which all great men haue their Factors with him) and is esteemed as a God, not suffered to tread on the ground (that were deposition) nor often seene, and gets much treasure out of those *Tules*, which he so often changeth, that the King of *Bungo* was by the *Iesuites* obserued foure and thirty times to haue altered his appellations. There is a high Priest, who with Papall power authorizeth Sects, confirmeth and consecrateth the *Tundi* or Bishops which are nominated by the Kings, and enioyeth Royall reuenues. The *Quin-2* gue is the third person, and hath power ouer Iudgements and Warres. But the *Lords of Tensa*, that is, such as haue power to get into their hands *Meaco*, and the Region adioyning, are really chiefe Lords, and command the State, though in seeming ceremonie (as the *Turkes* to their *Musli*, and more manifestly the *Soldans* of *Egypt* to their *Califas*) they yeeld a seeming subiection; the *Dairi* not daring to crosse them.

Faxiba Cingendono obtayned that title of *Quabacondono* (*Dono* is a generall title of honour) the next to the *Dairi*, and hauing subiected *Iapon*, minded to conquer *China*, by the way of *Corai*. The King of *Corai* sent his Embassadour to him with three hundred attendants in vaine, he minding to send and place in those new Conquests all the suspected Princes of *Iapon*, and to eternize his owne name, being exceeding vain-glorious. He tooke from the *Bonzi* their Lands: and after that, making ditches round about *Meaco*, hee forced them all to dwell together neere the said ditches: which reducing their discrepant Sects to an vnformed *Chaos* together, made many of them forsake their profession. Hee enioyed euery foot of Land in *Iapon*, gaue, or removed, or depriued Kings at pleasure, tooke away all Armes from the Rustikes; forbad all contentions and fights vpon paine of death, if any guilty hereof fled, punishing the kindred, or seruants, or neighbours, crucifying them. Hee administrd iustice very severely without partiality, or pardoning any man: and had almost put to death the *Meacon Bonzi* for their Concubines if the *Gouernour* of *Meaco* had not interposed and vnderaken their amendment. Hee neuer suffered the Souldiers to be idle, but vsed them in warres or buildings. The Vice-roy sent him an Embassage and Presents; the foure *Iaponian* Lords which had beene in Europe attending *Valignu-4* nus the Embassadour. *Quabacondono* would needs heare these *Iaponians* play *European* Musicke, which they had there learned: and made great shewes of kindnesse to them all, and sent this Letter with Presents to the Vice-roy.

Sir, I haue receiued Letters which your Lordship from so remote Regions sent mee, in opening and reading whereof I seemed to see the length of the leagues by land and sea. This Kingdome of *Iapon* as you wrote, containeth aboue sixtie States or Iurisdictions, in which before haue beene great disorders and warres, no peace nor quiet. For many wicked men, Traitors to their Countrey conspired to denye obedience to their * King, a thing which from my youth hath vexed me. And long since I bethought mee of a course to subiect this People, and to pacifie the whole Kingdome: and layed for a foundation three vertues, to wit, Gentlenesse and affabilitie of speech in conuersing with men; Prudence in considerate iudging of things, and egreious fortitude and courage of minde: by the aide whereof I haue subdued all this Nation, and haue brought all the Kingdomes into this forme of one Empire, wicked men being extinct, and worke-men which labour in the fields promoted. And I haue so restored peace and quietnesse to these Kingdomes, and in few yeeres haue so settled and stablished the Monarchie of *Iapon*, that it is now like a great Rocke which cannot be removed. Whence it is come to passe that in all foure parts of the Kingdome they haue a King eminent in much wisdom; and the King likewise hath all of them obedient. And in this order I haue declared and exercised the power of a good Captaine, to whom these Kingdomes are subiect; by taking away the wicked, and rooting out all Robbers by sea and land. So the people, families, and all places of the Kingdome enioy marvellous quiet. I haue also determined to inuade the Kingdome of *China*, and in few dayes I will take ship and doubt not of victorie. When I shall possesse it, your Lordship may more easily communicate with mee in all things.

Now concerning the Fathers, * *Iapon* is the Kingdome of *Chamis*, whom wee hold to be the same with *Scin*, which is the beginning of all things. This *Scin* is the substance and the very being of all things; and all things are one and the same with *Scin*, and into *Scin* are resolved. Who in *Scina* is called

called Iutto, and in Tescincu Buppo. Further, in the obseruation of the Lawes of this Chamis consisteth all the Politicall gouernment of Iapon, which being neglected, there is no difference betwixt Lords and Subjects: if it be kept, the vnion and concord is perfected which ought to bee twixt the Father and Sonne, the Husband and wife. Therefore the whole, both internall and externall gouernment of Men and Kingdomes is placed in the conseruation of this vnion and policie. Now the Fathers formerly haue entred these Kingdomes to preach another Law for the sauing of men: but because wee are instructed and settled in the Lawes of Chamis, we desire no other Law: for the diuersities of Lawes and opinions are hurtfull and preiudiciall to the Kingdomes. Wherefore I commanded the Fathers to depart out of Iapon; and haue forbidden them to preach their Law, nor will I that hereafter they preach any new Law in this Kingdome. Although these things be so, yet I greatly desire that a stable communication may remayne betwixt vs: for so this Kingdome shall bee free from Theeues, by Land and Sea. And I giue leaue to all Merchants which bring merchandise, to sell them all without lee. I desire your Lordship to approue the same. I receiued all the gifts which you sent out of those Southerne parts, as it is written in your Letters. I likewise send some others out of these Kingdomes, with a memoriall of the gifts, and the names of them which haue giuen. The Legate will declare the rest, wherefore I will bee no longer. Dated 20. yeere of Tenscy, 25. of the seventh Moone.

In the end was the Seale and Subscription. It was written in a leafe eight palmes long, foure broad, painted with golden Flowers, and put in a red silke bagge wrought with Gold and siluer; and that inclosed after the Iapon manner in a Boxe, which for the price and workmanship was so admirable, that the subtiltie and excellence of the worke might amaze all Europeans. Within it was couered and without, with Vrosci (made of Gold beaten into powder) distinguished with Flowers of Gold and Siluer, so inserted in the Vrosci that none could discern the conjunction, but he which knew the making of the Boxe. It had also Roses, and gold Chaires to tie the Boxe; which Boxe was put into another Bag, and that into another Boxe very artificiall. The gifts were Armour, Armes, and other things very precious.

He assembled his Lords about this China Warre, which durst not expresse any other opinion, hee hauing protested, that hee would not heare his Sonne disswade him, if he were alieue againe, and if any should hinder him, it should cost him his life. Thus for some moneths space nothing might be scene else, but prouision for Ships, Armes, Munitions, and necessaries for the Warre. Hee made a Catalogue of all his Lords, exempting none from the expedition, and setting euery one his number of followers. To Augustine a Christian Lord hee gaue the fauour of first impression into Corai, other Lords staying still at Susima eigheteene leagues distant. Corai is adioyning to the Continent of China at one end, diuided by a great Riuer from China, and tributarie to the King of China; it is in length about an hundred leagues, and sixtie broad: the people vnlike the Chinois in language and bodily strength, but following their lawes, customes, and gouernement. They are better Archers then at any other weapons: and not comparable to the Iaponians, except in shipping, wherein they and the Chinois exceed. Yet at this time they were destitute of that defence, and Augustine gaue them a great ouerthrow. Before Quabacondono would goe, he made his Brothers Sonne by the Dairi to be entituled Quabacondono, as his Heire and Successour, contenting himselfe with the title of Taicosama, that is, Great Lord. All the Iaponian Princes were commanded to be present at the translation, to giue him obedience; to whom the Dairi gaue the Fortresse of Meaco, and the Palaces of Quabacondono, making him Lord of Tensa. But his Vncle held the sway of all in his owne hands, and after hauing a Sonne of his own, caused this his Nephew with some others to crosse himselfe (that is, to cut his breast

acrosse, his bowels falling out, and some one of those which died with him, cutting off his head. Augustine with a Fleet of eight hundred sayles entred Corai, and tooke two Fortresses, the Coraians being driuen from the walls by the Iaponders Gunnes, vnkowne to the other, and five thousand of them slayne. This wanne him great credite with Taicosama, who promised him much, yet performed little. Hee defeated also an Armie of twenty thousand, and after another of fourescore thousand, and the King fleeing into China tooke the Meaco, or Royall Citie of Corai. Taicosama sent him a Horse, and a Sword, the honour that Nabunanga was wont after any great Victorie to doe to him. The Coraians seeing their King with his troops in safety, fled with their prouisions into Woods and Hills, and would not thence bee brought by any promises. The Iaponian possessed of the Fortresses wanted men to till the ground, and therefore must needs want necessaries: the wayes also were by the Coraians vpon all occasions assaulted. There are two hundred thousand Iaponians at this present in Corai, and Augustine is in the extreme borders adioyning to China, separated notwithstanding by a Riuer three leagues broad, abounding in ships, and the shores fortified with multitudes of men, so that the successe is doubtfull.

Froes in his Epistle, 1595. writeth that there were then an hundred and ninety Iesuites in Iapon and China: that Taicosama not succeeding in his Coraian expedition, returned to Meaco, and quarrelled the new Quabacondono out of his life, who with five others at Taicos command executed themselves after the Iaponian manner. Augustine meane while endeauoured an Embassage to bee sent from the King of China, who thinking himselfe Lord of the World, sent to

Taicofama, that it was an vnmeet thing that He, whose industrie and valour had subdued three-score and sixe Kingdomes of *Iapon* to his Empire, should permit the *Dairi* a priuate man, and Subiect to the King of *Iapon* to hold his former place of dignitie. And if hee would depriue him thereof, hee promised to send him a Crowne, and the title of King, and by the same Legates to treat further about the *Iaponians* forsaking *Corai*. Two Embassadors were sent from *Pequin* to *Augustine* to *Corai*: who presently sent word to *Taico*, the Embassadors abiding with him, because of the solemne entertaynement which *Taico* intended for the renoume of his name to all posteritie. The Nobles exhaust in the former expedition were yet now enforced to new braueries and expences. Hee caused at *Ozaca* a Hall to bee erected, with a thousand *Tatami* (very elegant Mats) the timber costly, and gilding incredible. Yet by store of raynes a great part thereof fell downe, which hee intended soone to repaire, hauing an hundred thousand men at worke there both night and day in great miserie, standing with their feet in the water. If any runne away they are killed. Before this Hall hee erected a Theatre for Comedies, exceeding stately and costly with artificiall paintings of *Vrusci*. Hee repaired the Tower of *Ozaca* seuen stories high. The gilded Plates or Tiles, the Bridge called, *The Bridge of Paradise*, the new Citie of *Fuscimo* which he builded, and other his immane expences (the Offerings to his Idoll of Fame,) I omit. Hee caused his little Sonne to goe with great State to *Sandai* to the *Dairi*, that is, to bow his head thrice before him downe to the Mats, who entertayned him with a solemne feast, with great Iubilee in alteration of names and titles of honour to the Nobles.

Taico had settled peace thorow all *Iapon* from Warres, from Robbers by land, and from Routers by sea, which before continually infested all with Piracies (one of which *Noximandono* is mentioned by the *Iesuites* in this time to haue had a great Fleet of ships, and to haue forced a great part of the Coast to yeerely tribute vnto him, to bee freed from his Robberies) onely the *Dairi* had higher title: and a Crowne and Scepter seemed wanting to his realitie of Regalitie and Soueraigntie already possessed. And now whiles hee intended to exceed himselfe in his entertaynement of the Embassadors, one of them hating this long detention or imprisonment in *Corai*, fled; which newes *Augustine* sent to both Courts. From *China* the Legacy was renewed, the Delinquents kindred punished. Meane while the two and twentieth of Iuly, 1596. at *Meaco* it rayned ashes, wherewith the houses, hills, and trees were couered as with snow, and a great myst accompanied it. At the same time at *Ozaca* and *Sacai* it rayned sands. At *Meaco* after the showre of ashes came another of haire, long and white like the hoary haire of an old womans head, but softer, and not so smelling when cast into the fire. In the Northerne Kingdomes of *Iechu*, *Iechingo*, *Scimano*, and *Nota*, the land and houses were couered with them. A Comet appeared in August: on the thirtieth whereof followed an Earthquake as a warning to a greater on the fourth of September, which threw downe *Taicos* magnificent Hall with a thousand *Tatamos*, in which hee had purposed to entertayne the *China* Legates; and the Tower of seuen lofts, and another Tower, and almost all the buildings of the Fortresse, and the Store-houses, which were very large, and stored with Corne, and halfe the houses of *Ozaca*, all in halfe an houre, sixe hundred people being buried in the ruines. It made a noise like Thunder, and like the waues beating on the shoare. The Earth opened in many places. A great new Temple and a Monastery fell downe, and the same day in which the *Iesuite* had heard a *Bonzi* in the same Temple inuiting to call vpon *Amida*, and much depredicating his mercies. The next day at *Meaco* was a noise greater then of the greatest Cannons that ever were heard, dreadfull to man and beast, and wee said the Letanies on our knees, but scarcely could keepe on our knees for the Earth-quake. Others forsooke their houses, lamented their dead (five hundred being ouerwhelmed; and fifteene or twenty Temples) called on their *Amida*: and some ranne to *Fuscimo* (*Taicos* new Citie for him and his Nobles) whereof the best part was ruined, and much harme happened in many other places. *Taicos* Palace at *Fuscimo* fell downe, and oppressed seuentie women, himselfe escaped into the Kitchen vtouched: and the relations of that Earth-quake would yeeld a booke alone. *Taico* yet would seeme to dominere ouer Nature, and leuell a very huge Hill with the Valley, to erect new Palaces. And because hee could not entertayne at *Fuscimo* the *China* Embassadors, hee receiued them at *Ozaca*. The solemne state and pompe I omit. They had audience the twentieth of October.

The Kings Letter was written in a plate of Gold very great and ponderous, inclosed in a golden Coffer, wherein also was the Vest, and royall Crowne for *Taico*, and in another was a Crown for *Mandocorasama* his Wife with title of *Queene*. Hee sent also twenty Vests of *Quingui* with title and dignity of *China* for twenty Lords (the first of which was *Augustine*) by him named, and as many for those whom *Taico* should name. In the Epistle of the King were these words, *Futatabi cioscen vocasu cotonacare*, that is, *Thou shalt not returne againe into Corai, and if thou returnest, thy dignitie shall no longer aduantage thee*, words importing their vassallage to the *Chinois*. The Embassador and *Taico* were equall in sitting on the *Tatamis*; the chiete Lords of *Iapon* were present; and after the taste of their *Chia*, *Taico* receiued the Epistle or golden plate, and layd it on his head, and the Vests, going in to put them on. At his returne the *Chinois* adored him,

him, and a feast followed with pompous plenty: which was continued other dayes. But when the Legates moued him to pull downe his Forts in *Corai*, and to pardon the *Coraians*; hee brake into exceeding furie, and commanded them backe to *Corai*, and extruded them in great haste out of the Countrey with inhumane vsage.

About this time *Peter Martines* first Bishop of *Iapon* came thither. *Taico* died Sept. 16. 1598. hauing taken politike order for the State, and as foolish for himselfe to be made a God, prescribing the forme of his Temple: One was crucified for speaking of his death. Word was sent by the Gouvernours which *Taico* had appointed as protectors for his Sonne, to the *Iaponian* Lords in *Corai*, to returne, and so after seuen yeeres that warre had end. What euents followed after in *Iapon*, you may see in my *Pilgrimage*, and somewhat also before in *Captayne Saris*, and Master *Cocks* relations: *Taicofamas* posteritie rooted out, and *Ogasba Sama* seizing the Soueraigntie to himselfe. So much harder is it to be a Man then a God, and easier to bequeath a Temple and tytle of *Camus*, and diuine worship as to a new *Faciman* or *Mars* (all which his Executors performed and caused to be effected; his body not burned after the wont, but as he had prescribed, put in a Chest and translated to that sumptuous Temple, where he is worshipped as the principall of all the *Camis*) with an Image erected to him, (seene by *Cap. Saris*) then to bequeath long life to himselfe, accomplishment to his *Coraians* desires, or sure succession to his posteritie, in all which hee fayled. But we will with our persecuted *Iesuites* leaue *Iapon*, and ship our selues for *China*.

§. III.

RUGGERIVS enters againe into China with *Ricivs*, and is forced backe to *Amacao*; thence sent for againe by the Vice-roy. *Sande* and *Almeida* are sent to them, and enter the Countrey as farre as *Cequion*, and returne to *Scauchin*.

Tis a custome in *China*, that of all Charters granted by the Magistrates a copie is kept in the Registrie, and the execution, or what hath therein beene done, subscribed at the end. The succeeding Vice-roy finding the copie of that Charter granted to the *Iesuites* at their departure, without such subscription (because nothing had beene done therein) wrote to *Canton*, to the *Aitao*; he (which then was absent) to the *Ansam* or *Hiam-xan*, the Gouvernour of the Citie, and he being ignorant thereof, to the Port-gouvernours at *Amacao*. They went to the Bishop, and by him were sent to our Colledge where they were shewed the sealed Charter: but there being then *Melchior Carnerus* Patriarch of *Ethiopia* (which expedition was dissolued) *Capralis*, *Gomez*, *Pasius*, and other principall *Iesuites*; it was thought fit, that it should not be deliuered to the Souldiers, but carried by two *Iesuites* to the *Aitao*: and *Ruggerius* with *Ricivs* were therein employed, the *China* Captaines also consenting that they should goe to *Ansam*, thence by the *Ci-hien* or Gouvernour, to be sent to *Canton*. This *Ci-hien* when they came thither would haue sent it and not them, which they refused; whereupon he grew angry, cast it on the ground, and commanded them to returne backe; saying, that a deposed Vice-royes grant could no way benefit them. They went to their Inne, and there consulted to goe without his leaue, deceiuing a Ship-master with sight of the said Charter, who tooke them into his ship; but terrified by others, cast them out againe with their goods. At this time came a message to the *Ci-hien* of his Fathers death, whereupon (according to the *China* Custome) he lost his office and returned home during his three yeeres mourning. They by this occasion, and a weightier cause, (money giuen to the Successour) and the Notaries subtiltie in a seeming seruice to the Common-wealth, were sent in manner as prisoners to *Canton*, as strangers found there.

The *Aitao* notwithstanding gaue them kinde entertaynement. They petitioned, shewing, that they were Religious men which had passed so many Seas allured by the fame of *China*, there to spend their dayes: and desired nothing but a small piece of ground to raise thereon a little house to the Lord of Heauen, and they would be further burthensome to none, but procure livelihood of their owne mens beneuolence. They mentioned nothing of *Christian* Religion, lest it might cause suspicion, and bee a let to them; the *Chinois* thinking too well of themselves, that strangers should teach them any thing, which they haue not already more complete in their owne Bookes. Rebellions haue also begunne vnder colour of new Sects. The *Aitao* or high Admirall commended their desires, but said, it belonged to higher Magistrates, and could onely bee granted by the *Cia-yuen* (the Visiteur of the Prouince) or the Vice-roy. They desired that hee would at least let them stay there in the Palace of the King of *Siams* Legates, till the *Portugals* Mart. came, and in meane time they would trye what they could doe with the Visiteur or Vice-roy. This hee granted, but the same day repeated, professing that he feared the Visiteur (if out of Mart-time he should finde strangers there) whose censure is dreadfull to euery Magistrate. He therefore commanded them presently to packe for *Amacao*. They were come backe to *Ansam*, and found things in worse case then before. For at the gates of the Citie they found an Ediēt set vp by Co the

new Vice-roy, blaming the *China* Interpreters which had put into the heads of Stranger-priests to learne the *China* language and Characters, and to desire some place for to erect a sacred and priuate house, threatening those interpreters if they persisted. In this dispayre of proceeding, they had not beene a weeke gone, when from *Scianguin*, the seate of the Vice-roy, one of his guard came to *Amacao* and brought the *Ci-fu*, (so they call the Gouvernour of that Prouince) his Letters Patents by the Vice-royes authoritie, inuiting the Fathers to *Scianguin*, there to receiue a piece of ground for a Church and dwelling house. The cause hereof was an offer made by the Fathers (when they were sent away from *Scianguin*, by the deposed Vice-roy to *Canton*) of a summe of money to any which should procure of the New Vice-roy license for their returne. One of the meaneft Souldiers in name of Interpreter to the Societie had put vp a Petition to the Vice-roy, who sent it to the Gouvernour of the Region called *Guan-puon*, of *Cequion* Prouince) to bee dispatched, who gaue the former Letters Patents to the Souldier, which brought them himsele to *Macao*. They with great ioy, as seeing the Diuine hand herein, made ready for the journey, which the former expenses and late Ship-wracks (especially of the *Japon* Ship in the *Ile Leuqueco*, which alone hath most of the wealth of the Citie in it) made difficult; but *Gaspar Viegas* charitably bestowed the expense, seconded also by others.

Thus full of hope they set sayle, and in *Canton*, both now and when before they were dismissed from *Scianguin*, they found Spaniards. Then, a Ship which from the *Philippinas* was bound for New Spaine, was wracked at the *Ile Nan-tan*, on the *Canton* coast; the men which escaped were kept in durance: And now, seuen or eight *Franciscan* Friars, which had gone from the same *Philippinas* for *Cauchinchina*, hearing the King was become a *Christian*, and in their returne were wracked on the *Ile Hainan*, and taken and spoyled, and presented to the Magistrates for Pirates, whose libertie these *Iesuites* procured, promising all recompence at *Amacao*. Hence they had set forth in the beginning of September, 1583. and in the same moneth came to *Scianguin*, in that Souldiers companie, by whom they were conveyed to the Gouvernours Palace, and kneeling before him made request as in the Souldiers mentioned Petition had beene containd, and were kindly answered, that they should goe about the Citie and spye out some conuenient place for their purpose, which hee doubted not to procure of the Vice-roy for them.

At the same time at *Scianguin*, they were erecting by the common charge of the Eleuen Cities of that Iurisdiction, a Tower (whereof one floore was now rayfed, to which they intended to adde nine others aboue it) in a pleasant place by the Riuer side, a myle and more from the Citie, the Suburbs continuing further then it. In the same place they set forth a Temple, and therein erected a Statue to the Gouvernour, whose sixe yeeres gouernment had well deserued of the learned, and of the vulgar. A piece of that field in which the flourishing Tower (so they called it) was building, they desired, which hee liked well, and promised to further them with the Vice-roy. The *Iesuites* at their former departure, had left an Altar with one *Ciu Nico*, who had placed the same in a conuenient place, for want of Images inscribing aboue, it *Thien Chu* in Cubicall letters, that is, *To the Lord of Heauen*. Hee made also thereunto diuers Incenses, and at set times yeelded diuine honors before it; which much reioyced the Fathers, seeing that there was one found which inuoked the true God. And this man gaue them entertaynement, till they had receiued the Vice-royes answer, approving their request; and the next day the Gouvernour set forth a plot of ground for them with straight caution to obserue the Lawes of *China*, and to admit no Strangers companions to dwell with them; which they promised. Much was the concourse and admiration of people, much the wonder at their triangle Glasse, the Image of our Ladie, a wrought Handkerchiffe, with which they presented the Gouvernour; but hee returned all afterward, fearefull of Bribe-imputation. Much trouble arose about that place, and another was assigned them, where they began to build and were forced to pawne their precious triangle Glasse, to fit it for their vse; they obtayned also an ample Charter from the Vice-roy, and two Patents from the Gouvernour which protected them from wrongs.

In these beginnings they made little mention of the Gospell, but imployed their spare time in learning the Language and Characters, by a Holy life seeking to insinuate themselues into the peoples good liking. Their habite was like the modestest of the *Chinois*, a long Gowne with large sleeues: Their house had two Cells, and betwixt them a Hall with an Altar in the midst, on which they set the Image of the Blessed Virgin, carrying her Sonne. They called their God, *Thien-cui*, Lord of Heauen; for the *Chinois* want the *D.* which caused that they could not give any name more fit: and this name continueth to this day, although they vse others also, as *Highest Ruler of all*, *First beginning of all*, and the like. The blessed Virgin is called the *Great Mother of God*. This Image on the Altar, all which visited them both Magistrates, Students, Priests, and common people, did religiously worship, kneeling and (after their rite) knocking lightly the ground with their fore-heads. They admired the excellencie of the Picture and colours without ceasing. But when it began to bee rumoured, that they worshipped a Woman for God, they tooke away that Picture and substituted the Image of *Christ*. After this, they painted the ten Commandements in the *China* language, which many approued. Some brought them Incense for holy vses, and some bestowed their Almes; others also Oyle for the Lampe which burn-

ned before the Altar; and the Fathers commended their Law, as agreeing to the light of Nature.

The first which was Baptised, was a poore diseased man cast forth by his parents, whom they instructed, and a little before his death baptised. The reliefe which they bestowed on him before, caused a rumour amongst the vulgar, that those Strangers knew by the mans complexion, that hee had a precious stone in his head, the cause of all that beneficence. The *Chinois* much admired the Bookes, of which the Fathers had store, the artificiall binding, gilding, cost; goodliness of the Print, and their studiousness in the *China* bookes; and received with great applause a Booke of *Christian* learning which they printed. Yea, the Gouvernour after the *China* rite would needs doe them publike honour, which is done by sending a goodly Table with Cubitall letters in praise of them, with the Magistrates name, and the date inscribed in lesse letters. Two of these with great pompe hee sent vnto them, the one to bee set ouer the entrance with inscription, *The house of the flowre of Divine men*; the other to bee placed in the Hall, inscribed, *The holy Nation of the West*: which wanne them great reputation, this Magistrate being much reputed for learning and vertue.

Our wants caused *Ruggerius* to intreat leave to goe to *Amacao* for supply, which hee obtained with a faire Ship and thirtie Rowers. The Gouvernour requested also, that a Clocke might bee made for him. But the pouertie of the *Amacaons*, their Ship not being come from *Iapon*, and the Colledge enjoying no Rents, caused him to send the workman to *Scianguin*, to make it there; which hee tooke in good part. Now the *Chinois* are a people suspicious of Strangers, especially those ruder parts of the Prouince of *Canton*, and much muttered at the *Portugals* Commerce, saying, they made all things dearer, and the profit came but to few. They gaue an odious appellation to the *Portugals*, calling them *Deuils*. To this, Fame had added a spur, reporting that their famous Tower was the worke of Strangers (which had no ground but that their house was building at the same time) and the *Flourishing Tower*, was stiled the *Strangers Tower*. They therefore in *Ruggerius* absence offered great abuses by throwing stones, being angrie that they kept their house shut, which they would haue had made an *Idoll Temple*, alway open to all. One boy in throwing stones, was taken by the seruant and brought in, but at others request soone dismissed. Hereupon two neighbours conspired, to set a fellow on worke to accuse these strangers for seducing Children, as they had done this youth his brother, (so they agreed) and kept him three dayes, with intent to sell him for a Slaue at *Amacao*. The two neighbours offered to bee witnesses hereof. The accusation was put vp in pittifull manner, and the Gouvernour much moued, the Father fetched into Court by an Officer, before hee could haue leasure to write his answer. The Interpreter had filled his sleeves with stones, which hee powred out in Court as witnesses of their abuses. The Iudge smelt the businesse, and by examination of the Tower workman which had seene it, found out the knauerie, and rewarded it with terrible whipping; and forbad all abuses to bee offered to them.

Ricinus his skill in the Mathematickes which hee had learned, being an Auditor of *Claninus* at *Rome*, was no small helpe to them. They had a Cosmographickall Map in *European* Characters, hanging in their Hall, which the learned beheld with great pleasure, much desiring to see it in *China* characters, little knowing, as little hauing to doe with the rest of the world. They had Maps pretending a Description of the world, but presented onely their fifteene Prouinces, with the Sea and a few Islands, and the names of such Kingdomes as they had heard of, all which Kingdomes scarcely equalled one Prouince of *China*. They now wondred much to see themselves straightned in an Easterne corner of the world, and *Ricinus* at the Gouvernours request, published it in *China* characters: and inserted, as hee saw cause, the rites of the world and the *Christian* holies. They haue a conceit, that the Heauens are round, the Earth square, and their Empire to bee seated in the midst thereof; hee therefore so projected his Description, that he presented *China* in the midst. They that before thought basely of all other men, as if else-where were no King, nor Republike, began to be better conceited of *Europeans*, and to bee better prepared for the seed of the Gospell: and might hereby also lesse feare *European* forces so remote from them. This worke hee often reuised and corrected, till it came at last both to the two Royall Cities, and to the Kings house. The workman at the same time finished the Clocke, and both were together presented to the Gouvernour, who at his owne cost published the Map, and soone after restored the Clocke, because hee had none which knew how to order it.

The Ship comming from *Iapon*, *Ruggerius* well releued returned, whereby the house was finished, their debts payed, and the building with stories, the disposition of the windowes, furniture, faire situation on the Riuer with goodly prospect, and *European* rarities, brought many, euen great Magistrates, to behold it. *Ricinus* proceeded to make Spheares of Brasse and Iron; hee Printed also Globes, and made Sunne-dyals, which hee gaue to the Magistrates. And by his lectures on these subiects, he got reputation of the best Astrologer in the world, they esteeming others by themselves. The Gouvernour was about this time aduanced to a higher Dignitie, called *Lin-si-tau*, hauing the rule of two or three Regions and all the Townes therein, not remoouing from *Scianguin*: and as the *Chinois* are superstitious obseruers of Auguries, he conceived that he

In the *Philippinas* the newes of the *Iesuites* successe caused the *Gouernour* to send the *Treasurer* *John Baptista Romanus* to *Amacao*, with *Father Alfonso Sancius* a *Spanish Iesuite*, with a *Watch* and other presents and letters to the *Iesuites*, to procure an *Ambassage* from the *King of Spaine* to *China*. The *Iesuites* had with petitioning brought the businesse to good forwardnesse, when they receiued contrary mandates from *Amacao*, it being likely to prooue the destruction of that *Citie*, if the *Spaniards* with their plentie of *Siluer* from *Peru* and *New Spaine*, should haue trade in *China*; neither did this belong to the *Spaniards*, but to the *Portugals*, according to the *Com- position* betwixt the two *Kings* made by *Alexander* the sixth: and although they are both sub- iect now to one *Crown*, yet their priuiledges remayne distinct without confusion. Thus both the *Magistrate* aduised, and their superiour the *Rector* prohibited them to proceed. Yet the for- mer working was not ceased by Silence, till the *Amacaon* *Magistrates* laboured with diuers reasons to diuert the *Ambassage*. *Capralis* the *Rector* was desirous to see their house, and they procured the *Linsitans* leave, so that hee came thither, viewed all, and Baptised both the young- man before mentioned which kept the *Altar*, and a learned man which read the *China* *Bookes* to the *Fathers*, this called *Paul*, the other *John*, the first *China* *Conuerts*. *Valignanus* made *Pro- uinciall* of *India*, hearing of this successe, sent thither *Father Edward Sande*, and *Father Antonie Almeida*: and obtained of the *Vice-roy Edward Menese*, an annuall stipend for this mission. They came to *Amacao* in *July*, 1585.

F. Edw: Sande.

At the same time it seasonably hapned, that *Linsitan* was commanded from the *Court*, to pro- cure of the *Strangers* at *Amacao*, certaine goodly feathers for the *King*. He furnished a faire ship and sent *Ruggerius* thither, and brought with him *Father Edward Sande*, who went to salute *Linsitan*, and gaue him no meane gift of our *Commodities* to procure abode, whereof nothing so pleased him as a triangle *Glasse*. Hee giues him leave to stay, on condition that they admit no other companion. In *Linsitans* place had succeeded another of *Cequian* *Prouince*, a great friend of the *Fathers*, who being to goe to *Pequin* about some affayres of his *Office* every third yeere, was feasted at our house (where the *Magistrates* were often solemnly entertayned) and then of- fered to carrie one of ours with him in his iourney, at least as farre as *Cequian* his owne *Coun- trey*. They willing to erect some new seat, least some disafter might in a moment strip them easily of one and all, agreed that *Ruggerius* and *Sande* should goe, and receiued licence for entring the *Prouinces* of *Cequian* and *Huguan*, and places adioyning. This was the Mart time whither *Ruggerius* went, and found *Almeida* come thither with the *Portugals*. Thither also a *Brother* of *Linsitan* was gone with much *Merchandise* of *Silke*, (the most whereof is made in the *Cequian* *Prouince*) which the *Portugals* bought at his price by the *Fathers* intreatie, who therefore tooke the *Fathers*, his brothers friends, to his *Citie* in *Cequian*, called *Sciabin*, (a name some- what neere the other, but in *China* a little difference prooueth great) the native place of both the *Gouernours*.

Strange course
for names.
Iesuites change
their names.

The *Chinois* haue a custome to be called by many names, and no man calls them by their pro- per name, (but themselves in naming or writing themselves, or sometimes their superiours) with- out iniurie: they taking a greater name, which others giue them for more honour. Now the *Fa- thers* had yet assumed no other name, but their seruants called them by their proper name, a thing amongst the *Chinois* reputed barbarous. They therefore (to become all things to all, to winne all to *Christ*) then followed that fashion, and euer since at their first entrance assume a new Name. Their *Journey* is thus written by *Almeida*.

Almeidas Let-
ter to Ed. Sande.
Rector at Xau-
abin or Sciabu-
chin, contra-
cted.

On the eleventh of the *Kalends* of *December*, 1585. wee departed from *Canton*. The third day the *Ship* happened to bee on fire, some imputing that unluckinesse to vs: but without much harme it was quenched. Whiles wee sayled through the *Canton* *Prouince*, wee seldome came in sight and neuer went out of the *Ship* till wee came to *Moylimpor*. I can therefore relate nothing of that *Prouince*, but that there were very many *Cities*, and *Townes* very frequent, and steepe high *Mountaines*, betwixt which that *Riuer* slideth to diuers tracts of the *Prouince* stored with waters, *Wares* and *Shipping*. Euery where wee beheld sumptuous *Edifices* dedicated to the worship of *Deuils*, and of *Ships* almost infinite multitude, and of water-Fowle innumerable store, and herds of *Goats* feeding by the *Woods*, to the seventh of the *Ides* of *December*. Then wee arrived at *Moilim* a *Citie*, neere which is the beginning of that *Riuer*, whose course being swift, wee were drawne by ropes and rowed with *Oares* against it. Into this *Citie* wee should hardly haue found admission, the passage being by a *Bridge* with two *Iron chaynes*, opened onely and shut at the will of the *Gouernour*. But our *Conduktor* hauing acquaintance with the *Linsitan*, wee had present entrance, hardly able to passe for the multitude of *Ships*, there waiting. Wee were there well enter- tayned, and on *Sunday* and *Munday* sayd Masse. On *Tuesday* wee went to a *Citie* eight miles distant, there regaining the commoditie of another *Riuer*. All that way was paved with stones; in which we passe 60 a *Mountaine*, on the top whereof was an arch with an inscription of his name, who had facilitated that way, otherwise difficult. The weather was vnseasonable, rainie and cold, perhaps because the whole way in manner was *Mountainous*. I doe not remember that euer I saw way so frequented, not then when *Mer- chants* resort to publike *Faires*: for all the *Merchandise* from *Nanquin*, and the places adioyning are brought

Moilim.

brother afore-
sayd.
Another riuer.

Way paved
and populous.

brought hither. Also the Merchants which inhabit the remotest Cities in that way, on both sides had Partners for the conveying of their Wares, very sily; for our Conductor had nothing to doe but to deliver one hundred and fiftie Packes of Wares with other provisions for the way, to his Hoast, which all hee should find in his Inne in the next Towne. These Partners also provide Horses for the Servants and Seats for the Masters to be carried in by two Porters defended from the Raine by Sumbremos, or Shadowes which they carrie in their hands. When hee had passed halfe the way, wee changed our Seats and Porters, and had others to the Inne; to these nothing is due but some small gratuitie, the Hoast being paid for all: and a Seat is at as easie a rate here, as a Horse in our Countrey, with great commoditie and frequency of Innes. In the Evening we came to the Towne Faquen, and staid there two dayes, such concourse of Citizens comming to see us, that we were almost over-whelmed, and were glad to get a ship-board on Friday. On Saturday we sailed downe the streame, fiftene dayes continuing our course, in which wee hired three Barkes, in one of which we only were carried. On both Bankes many and faire Townes walled about, present themselves to the view of Passengers, seeming as bigge as Canton, which made mee meditate of the facilitie of conveying the Gospel in these parts, we making all this way with as great tranquillitie of bodie and minde, that wee might in the ship pray or studie and doe other things as commodiously, as at home.

Seats and Porters in the high-ways.

Faquen.

Great Cities thicke.

On the sixteenth of the Kalends of Ianuary, we came to a most frequent Citie far greater then Canton, where the Tutan or Vice-roy of the Prouince Chianli resideth. It is high walled divided into three parts, a River flowing thorow with a Bridge of Barkes, ioyning two parts of the Citie. On this Bridge customes are paid, but our Conductor being the Lancitans Brother passed without search. And although we feared to be examined by the Magistrate, yet no man troubled us, they being not so inquisitive in other parts as in Canton Prouince, about strangers: yea, they entertayne them more honourably every where then your Worship at Xauchin. About halfe a mile from this Bridge another River ioyneith with this, which runneth by the other side of the Citie, and makes the third part of the Citie. I wished the Fathers a Colledge in this place both for the fertilitie of the soyle and holsonnesse of the Aire. Having provided necessaries for the rest of our Iourney in this Citie, wee went aboard and in the space of fixe or seven dayes going downe the streame, we beheld on both sides very goodly Woods, and many Poles of wood on the Bankes necessary for those cold Regions, and holding on our course passed by seven Cities, or more, famous for greatnesse and Merchandise: and on Christmas Euen came to the greatest Citie of all Chianli, where wee staid that night for that Solemnitie. But hee which then was borne exercised our patience with a grienous North-wind, whereby the River water (otherwise cleere) was so troubled that on Christmas day wee could not drinke it. For the Rivers course is North-ward, which therefore by a North-wind is so moved.

Metropolitan Citie of Chianli.

All this way is apparent in the new Map.

The next day sailing by a Citie which by the sight we iudged greater then Lisbon, in one dayes passage further, we came to the way which leads to Nanquin, where diuers Rivers ioyning together make a kind of Crosse with great commoditie for Trade and passage. For a Barke well defended against wind and weather, convenient for two Gentlemen with their Servants and baggage, may here be hired for twenty or thirtie dayes, at an easier rate then a man shall pay for Horses from Coimbra to Lisbon. For from Canton to Moilin fiftene dayes Iourney, for a ship which carried two hundred Packes of Merchandise of diuers kinds, we paid but nine laes, and seven for those three which wee hired for twenty dayes more. After that, leaving the Northerne way which goeth to Nanquin or Lanquin, wee turned West-ward against the streame, yet with benefit of the wind favoring us, we went fiftene and sometimes twenty * miles a day: in which space sailing by very large fields we arrived at a Citie where faire Porcelane is made, thence carried into India and Europe. Wee passed by many Woods also and some Cities. The cold meane-while was so great, that one day all was covered with Snow. The River decreased, and on the third of the Nones of Ianuarie, they unladed the Merchandise into ten lesse Boates, and sailed two dayes, wee came to a large Citie, to which wee had entry by a Bridge borne up with fiftie painted Barkes.

New Rivers.

Nine Tacis.

* These miles seeme to be intended Spanish leagues. Cold Region.

On the Nones of Ianuary wee came to Gouli, a Citie at the end of our Navigation by that River. Here in celebrating Masse, wee were thronged by the multitude. And a Priest of the Idols invited us, which then performed to his Idols Ceremonies at his House, Altars there erected, & Priests invited, & Hymnes used, where he and those Bonzi used us kindly. Here wee observed that the Denill counterfeit the Ceremonies of the Catholike Church. We went thence by the foot way carried in portable seats as before fixe or seven miles: and then entred the Prouince of Ciquion, at the Sun-set entring the Citie Cuixion. On the Ides of Ianuarie we againe went a ship-board holding our course by another River which in that Citie first beginneth to be Navigable, the slow streame lingring with us three dayes, in which yet we saw eight Cities, about which we found unmeasurable quantitie of Oranges, very high Hills abounding with Trees and under-woods, betwixt which that pleasant River sweetly slides, receiving from every place new Tributes of waters that it prooueth now as large as that of Canton Prouince. And although China haue name of fertilitie, yet here appeared some prints of Iaponian sterilitie. For in five dayes space we could get nothing but Rapes and Rice, and a little fish. On the eleuenth of the Kalends of February, we passed by a large Citie twice as great as Canton, as those which knew the Region affirmed: for we by reason of Snowes and Mists could see nothing but some high Towres. At Sunne going downe wee came to a Towne, against which a Bow-shot distant on the other side of the River, wee

Papists and Paynims Ceremonies alike.

were forced to take a new ship, and causing our ship to bee drawne (a light hanged out at the Mast) the next morning we came to the Citie Ciquion, the end of our journey. In this Citie, which as Father Rogers (or Ruggerius) is wont to say, is a type and representation of Venice, God hath provided vs of a good House, on one side hauing the Citie, on the other the Riuer for prospect, with conuenient Roomes and a Garden, and a fit place for a Chappell. On both sides of vs dwell Idolatrous Priests, which yet vse vs kindly, and daily come to heare our Doctrines, as doe others in great multitudes, that we cannot yet auoide their frequent concourse to heare and see vs. To the chiefe of them we shewed our Altar erected to the Immortall God, which they beheld with great reuerence, worshipping the Image of our Saviour. And the greatest Magistrates were so affected with our Christian Ceremonies, that they said they would not suffer vs to depart. Some of them inuited and entertayned Father Rogers : one of them of farre greater ranke then the Gouvernour of the Citie, who then mourned for his Mother, and inuited vs by his Steward to her Funerall Solemnitie; whom we answered that our Prayers auayled not but to the worshippers of the true God. He used the Father with very great respect, giuing him the higher place at table, and accompanying him at the parting to the utmost gate of his Palace, seeming much delighted with the Mysteries of our Faith. Three others greater then the Gouvernour haue come to visit vs, and others come so frequent that it is troublesome. The Priests also giue vs good looks, whatsoeuer they thinke. The Edifices both publike and priuate, the streets and Lanes of the Citie are larger and fairer then in the Citie of Canton. The Citizens also in granitie of manners, and ciuilitie of Habit, differ not a little from the Inhabitants of Canton and Sciauchin. There is no Citie in Portugall, Lisbone except, that is any way for greatnesse comparable, The singularities I shall write at another time. Ciquion the fourth of the Ides of Februarie, 1586.

Prouincials
Letter. Fortie

Vutan a holy
place haunted
by Pilgrimes.

New Conuert,
a false Knaue.

Relcius calls that Citie where they resided Sciaubin, and saith, it is a principall Citie, though not the Metropolitan of the Prouince, noble in commerce, in situation (in the midst of a fresh water Lake) in wits and learned men. They baptized there *Linsitans* Father and two or three Infants, which then dying they thrust into Heauen at vnwares. *Sixtus* the Pope granted a great Indulgence to the Societie, to further the Iaponian and Chinese business : and *Aquaviva* the Generall sent them three Watches and an artificiall Clock, which was great, yet moued by wheelles without waights, and stricke also the quarters to the great admiration of the Chinois. Others sent Pictures, one the worke of *Gaspar Coelius* who first taught the Iaponians and Chinois the European Painting to the great good of both Churches. But the Kinsmen of *Linsitan* seeing such flocking to the Fathers grew suspicious of danger, and caused them to bee recalled, and *Linsitan* also to be estranged from them. Also one *Tansiao-hu* a great acquaintance of *Linsitan*, with purpose to get somewhat from the Fathers, questioned *Ruggerius* why hee had not seene Mount *Vu-tan* in the Prouince of *Hu-quam*, a famous resort of Pilgrimes; who answered that hee durst not without the Magistrates leaue : I will procure it, saith hee, and did so. In the way *Ruggerius* went to the Mother Citie of *Quam-si*, where hee visited one of the Royall bloud, not knowing that such haue nothing to doe with the State, and was not admitted, but bidden first to goe to the Vice-roy, to whom he went and had no injury, nor yet wonted humanitie, but was bidden to prosecute his Pilgrimage and not to stay there. *Linsitan* hearing of this, sought to shift his hands of them, and with much adoe they obtayned that two might bee permitted to stay in their house.

Another danger happened by one *Martin* a new Conuert which had made two other Conuerts beleue that the Fathers could by a certaine herbe turne Quick-siluer into siluer, and by that meanes maintayned themselues. Now the Chinois being exceedingly affected to that Alchymisticall vanitie, these gaue money to buy a Wife, and other costs to that false brother who vnderooke to learne of Father *Ruggerius* and to teach the other two that Science. And hauing gotten what he could of them, he also borrowed the Triangle Glasse of the Fathers, with which hee ranne away. The Gouvernour one day desiring to see it, they told him who had stolne it, and he sent an Officer which found him out and brought him bound. Hee, to bee reuenged of the Fathers, accused one of them of Adultery; and the Husband of the pretended Adulteresse (partner in

in the Conspiracie) put vp a Petition against *Ruggerius*, who vpon inquisition was found at the time named to haue bene in *Quam-si*, two moneths journey thence. The Accuser hoped to get some-what, being poore, to stop his mouth, which they refused vterly, and hee for feare fled, together with his Wife. The Father was iudicially cleered, and *Martin* in his presence receiued twentie cruell stripes, and condemned to the Gallies, was sent to *Linsitan* who had first committed him to confirme the sentence; who added sixtie stripes more, and being beggered and cast in bonds he was forsaken of all his Friends, and (the Fathers meane-while releeuing him) dyed within few dayes of the wounds. He which had gotten the Glasse from *Martin*, another Conuert, came and restored it to them, lest it might breed him danger being found with him.

Martin whip-
ped to death.

Linsitan was preferred to a higher dignitie in the Prouince of *Hu-quam*. To him the Citie had erected a Temple, and on the Altar had set his Statue; before the Altar a great Harth for burning incense: Candlestickes were also magnificently placed; and at his departure the whole Citie there visited him, and after their rite, pulled off his old Boots (Bootes are the ensignes of Magistracy) and put on new, putting the old in a Chist, and locking them vp to bee reserved for a monument of his worth. *Ruggerius* went to *Amacao*, and *Matthew* got leaue for Father *Edward* the Superiour to returne to *Sciauguin*. The new Conuerts which had lost their moneys by *Martin*'s death, deuised new tumults against the Fathers; the Riuer (which is a mile broad) ouerflowing, dammed the houses of the Citie, whence grew occasions of new abuses to Ours. The Visiour endeauoured to procure Legation from the Pope to *China*, and *Ruggerius* was sent to *Europe* on that businesse, which tooke little effect by the death of diuers Popes; hee spending the rest of his life at *Salerno* in the Kingdome of Naples.

Manner of ho-
nouring good
Magistrates.

R. goeth into
Europe.

Ricini was alone a good while, till *Almeida* came to him. His Clocke, by the Diall to the eyes, and by selfe-striking to the eares, caused no little wonder. But a new calumnie much endan- gered them made to the *Ciai-men*. For certaine old men of *Canton*, which are honoured for that in their whole liues they neuer haue accused any, nor bene accused of any, enioying therefore a yeerely feast out of the publike treasure, a peculiar Vest, and diuers other immunities, put vp a Petition, admonishing of the danger of the *Amacaons*, and especially those Spies which had builded houses of diuers stories, and euery day proceed with new arts, giuing money toward the building of *Sciauguin* Tower to get entrance into that Citie, sayling to and fro without im- pediment, dangerous to the State. This is that which our Bookes fore-tell, *See haue sowne thornes and nettles in a gentle soyle, yee haue brought in Serpents and Dragons into your houses. That of Ama-cao is like a sore on the hands or feet easily cured at leasure, but this of Sciauguin, an vlcere seizing on the breast and heart timely to be remedied, &c.* The Visiour reputed a seuerer man committed it to the *Haitu*, and at last it came to the Gouvernour of *Sciauchin*, who then being at *Pequin* to per- forme the customary trienniall visitation to the King, *Phan* his colleague (our friend, then Lieute- nant) assisted vs with his Counsell, and they gaue their Glasse to the new *Linsitan*, who ended the quarrell with the Visiour, as being a false calumnie.

Priuledged
old men.
Their elegant
Petition is
whole in *Ricini*,
too long for
this place.

The two Marts prouided them of exhibitions and *European* Presents from *Canton*, and their Clocke, Mathematicke Instruments, Geographical Maps, Pictures, and Bookes, with Muscull Instruments, had procured them much visitation, and much estimation of *Europe*, and some fruit thereof in Conversions. Neither was this Station vnprofitable to *Amacao*, helping their af- faires with the Magistrates, in busineses with the Vice-roy, in cases of shipwrackes, in redu- cing fugitiue slaues. It happened at that time the Vice-roy dying, his Successour would not through superstition enter his Palace till hee had pulled it quite downe and built it anew at the Kings charge. Meanewhile spending his time in *Canton* Prouince, he was made against vs and banished vs. But the Magistrates being our friends, and order comne then from *Pequin* to buy Scarlets of the *Portugals*, F. Mat. *Ricini* was employed, and got their good liking, but not leaue by any meanes of the Vice-roy to stay at *Sciauchin*. Yea, hee forced vpon the Gouvernour the execution of his Mandate to packe them away, offering money for the house, which they refused to take, saying, a house built for Gods seruice might not be sold, and it were ill merchan- dise to take sixtie pieces of Gold for fixe hundred which it had cost them.

Nanbium.
Xauceum.

1589.

When they came at *Canton* the Admirall was absent, and whiles they waited for him the Vice-roy sent a Barke for them to returne, and then permitted them to chuse any other place of residence. *Ricini* chose *Nanbium* in the Prouince of *Quiansi* (or *Quamsi*, or *Chiansi*) which hee refused not, but wished them first to trye at *Nanboa*, or at *Xauceum*, commending them to the Assistant of the Gouvernour thereof, then present, and gaue *Ricini* a bundle of bookes of his owne acts in token of good will, who thanked him with his fore-head to the ground, after their fashion. They departed from *Sciauchin* on the Assumption day, 1589. They came to the place called *Sanceni*, or Three-waters, where the Riuer of *Xauceum* from the North falls into a great Riuer: there they vse to change ships, to haue others fitted in other fashion to sayle against the streame. In eight dayes sayling to the North, they came to the place where the Gouvernours seruant stayed for them to bring them to the Temple or Monasterie of *Nanboa*, part of which the Vice-roy had given them if they liked it. This Monasterie they found in a goodly Plaine, enuironed with pleasant Hills, enriched with hand-set fruit-bearing trees, watered with a

sterie of 1000.
Monkes.

Riueret

Riuer in the midst: the goodliest Hill, graced with a plentifull Fountaine, was the Seat of the Temple, a great pile; nigh which was the Monasterie wherein a thousand Priests (by the impious piety of the Ancestrie, Lords of that ground) had their abode.

Lusus Legend.

The originall thereof was a man which liued about eight hundred yeeres since, called *Lusu*, who is reported to haue flourished in great reputation of holinesse, by reason of his austere course of life; with a chaine girded to his bare flesh, wonted to lift Rice, and to beate it lightly after their manner, as much as serued for the daily food of a thousand Monasteries. With that chaine his flesh putrified, so that wormes bred therein: of which if any happened to fall to the ground, he placed it there againe, saying, *Hast thou nothing to eate? why dost thou runne away?* There is his carkasse preserved and that famous Temple built to his worship, to which is concourse of Pilgrimes out of all the Kingdome, euery-where he and all his being much reputed. These Ministers of the Deuill are diuided into twelue Stations, each hauing his Superiours, and ouer all an Abbot. When the Father came thither sent by the Vice-roy, they supposed hee had come to be their Abbot and to reforme their abuses; for they not only had their Concubines and Bastards, but robbed by the high-ways. Now all the Idoll Priests are as subject to the Magistrates as other men; perhaps because their Learned esteeme not Idols, nor account these their Priests. Yet with *China* dissimulation they gaue the Fathers faire entertainment with much pretended joy, and officiously offered all at their Seruice, making them also a Solemne Feast, and then shewing them the chiefe places of their Monastery. They were full of great Idols of Brasse and other Metals, and of wood gilded. In one Station were told five hundred. There were also many Steeples and Bels of Metall cast, one such as they had neuer seene in *Europe* to their remembrance.

China hypocrisie.

Monstrous Idolatry. Bels.

Lusus Shrine.

The bodie also of their Saint, *Lusu*, was shewed, all shining with that their *China* bituminous Vernish (so vulgarly thought, and preserved with incredible veneration, though many deny it to be his bodie.) In the midst of the Temple is an eminent place to which they ascend by neate steps, in which hang about fifty Lampes, but not all burning except on set dayes. The *Chinois* marvelled at the Fathers doing no worship, a thing vsually performed by those *Chinois*, which otherwise repose no confidence in those Idols. They both agreed; the *Chinois* Monkes to bee rid of their feare, and the Fathers to goe to the Citie.

Folly of Self-pleasing.

At their departure, Father *Almeida* went by water, and *F. Matthew* by Land with the Gouvernours Seruant, the Abbot bearing him companie. He there told the Magistrate that he liked not of the Temple, because the men had an ill report as vn safe Neighbours, and hee worshipped one God, and not Idols. This amazed the Gouvernour perswaded before, that there was in the World no other Law nor Characters then theirs, till Father *Matthew* pulled forth his Prayer-booke. The Abbot also testified that hee had worshipped none of the Idols, no not *Lusu* selfe. At last, the Gouvernour was perswaded by him, that that of Idol-worship was a later Sect amongst them; yea, the Abbot affirmed, that they deserued no worship, but that former Magistrates had obserued that without Idols the vulgar would not keepe Religion, and therefore set vp these to be worshipped. They visited all the Citie Magistrates which vsed them with more courtesie then those of *Sciachin*. They went also to another Temple or Monasterie called *Quambiao*, on the other Westerne side of the Riuer, and carried their goods thither till they were provided of a House.

Apply to Images. Originall of Idols. Confesse and be hanged. Xaucum described. Naphium.

The Citie *Xaucum* is seated betwixt two Nauigable Riuer which here met: the one which passeth by *Naphium* on the East, the other running out of the Prouince of *Vquam* on the West. But the Citie wals and Houses are builded in the midst of the field, but they are forced by the straitnesse to build also on the other-side the Riuer, joyned with a Bridge on Barkes. It containeth five thousand Households is fertile but vnholysome, the third or fourth part of the Inhabitants being sicke of a Tertian from October to December, which takes away many, and leaues a pale Impression on the rest. Strangers also are no lesse arrested by it, when they come thither on businesse. And the Iesuites had almost lost themselves in this new purchase, where being recovered they had a Charter from the Vice-roy to build their House in ground belonging to the Monasterie. Thither the Visitor sent them *Sebastian Fernandez* and *Francis Martinez* which had beene joyned vp in the Schoole of *Amacao*, the first Probationers in *China*. They to auoid expence, built this House of one Storie after the *China* manner: and soone liked better of this then their former Residence.

Iesuits new Seat.

Chintaiso Scholer of Ricinus.

Chintaiso (the sonne of one of the second ranke of Magistrates called *Sciainsin*, a man famous, as being the first named of the three hundred Doctors made euery third yeare, and Author of Learned Workes) had spent his Patrimony after his Fathers death with Prodigalitie and experiments of Alchymie: and now was forced to shift, with his Wife and Seruants wandering thorow the Kingdome to his Fathers Friends, and becoming a Sollicitor for other men to the Magistrates of his acquaintance. Hee hauing obtayned of the Vice-roy a Roome in that Monasterie became Neighbour to the Fathers; and one day with set Pompe (after the *China* custome) and precious Gifts came to Father *Matthew*, and chose him for his Master. It was not safe for the Father to refuse (though he requited his gifts, lest he should seeme to haue beene brought thither

ther by couetousnesse) and first taught him Arithmeticke. For that which the *Chinois* haue is with a Linnen Instrument whereon Beads are put by wires, and shifted hither and thither to reckon their numbers: certayne, but subiect to Error, and vnprofitable to high Sciences. He read to him also the *Sphere of Clavius*, and the first Booke of *Euclides Elements*, and taught him to make Sun-dials of many sorts, and Geometricall Rules to measure Altitudes. He being of subtile wit, committed these things to writing in elegant stile, and shewed them to Magistrates of his Acquaintance, so procuring great opinion and admiration to the Iesuits. His wit and exceeding industry brought him to great skill, that hee made Spheres, Astrolabes, Quadrants, Compasses, Dials and other like, very artificially, and some of siluer: withall so setting forth his Matter and the *European Learning*, that it proued of no small consequence. By his meanes the Fathers had acquaintance with *Pimpithan* a Military Commander, with the *Gouernours* of the Citie and diuers other Magistrates. *Almeida* fell sicke and was sent to *Macao*, to see if Physicke might recouer him, and there dyed.

Ricinus set forth a goodly Image hitherto vnseene, on the Altar adorned with Waxe Lights, which brought such concourse to see it, that their enuious Neighbours stoned the House and Seruants by night: whereat *Chiutaiso* offended acquainted the *Gouernour*, which had before set his Decree ouer their doore prohibiting all wrongs. He called the Street *Gouernours* (as Constables with vs) and was likely there to haue scourged them, pretending their ignorance, and putting chaines about their neckes after the fashion, sent them to seeke out the wrong doers, and bring them to his Tribunall. They fearing to anger their Parents, durst not name them, till he commanded to whip the one and send the other to Prison, whereupon they named two, whose punishment with much intreatie of the Father was pardoned. Father *Francis de Petris*, was sent (by the Magistrates License obtayned) to succeed in *Almeidas* place. The Vice-roy was then preferred by his Friends procurement and Bribes to a higher place, but the Prouinciall *Vistor* had so complained of his wrongs, that by the way hee was acquainted that hee was deprived of all Office, and fined at forty thousand pieces of Gold to the King. Besides, a filthy Vicer brake out of him, and soone after he miserably dyed. Thus did God punish his pride, which to erect a Temple to himselfe at *Sciachin*, had deprived the Iesuits of their House. The same at *Sciachin* was that the Iesuits were expelled for refusing to teach the Vice-roy the Arte of Alchymie.

One *Cosunbon* a Merchant of the Citie *Taicho* in *Chiansi*, abode in *Nanhiun*, and had some fortie persons in his Family, a very Superstitious Idol-worshipper, in whose seruice hee macerated his whole life in that *China* abstinence from Flesh, Fish, Egges, and Milke, liuing only of Pulse, Rice, Herbs, and certaine Cakes, industrious for his saluation in another life, but not satisfied with any of the *China* Sects. He had learned by *Chiutaiso* of the Iesuits, and came to *Xauccum* and acquainting Father *Ricinus* with his purpose, he was instructed and baptized *Ioseph*. He stayed with them a moneth, and after *Ricinus* went to *Nanhiun* to him, and preached and baptized ten others. Theeues by night assailing their House, the *Gouernour* was made acquainted, who would haue them indited by the Fathers (which they did very sparingly, whereas the *China* manner is to adde excessively) and he put them to torture; and forced them to confesse: one whose Hat or head covering falling off had bewrayed him, he condemned in Capital sentence; the other to be sent to the Gallies, or amongst the Kings Slaues: which sentence was to passe to Superiour *Gouernours*, and so to *Sciachin*, and Father *Ricinus* must goe thither about it, which happened well for the new Conuerts which had for the most part growne wild. From thence he went to *Amacao* to speake with the Visitor, and returned to *Sciachin*, where the Parents of the theeues procured him their Aduocate which should haue beene the Plaintiffe. Amongst the *China* Magistrates is one which hath his name of *Pardoning punishments*: Hee is sent in the Name of the *Queene Mother*, into each Prouince one. Their Office is to visit Prisons, to exempt the smaller offenders and to mitigate Sentences; for which the Magistrates hold them in great esteem. But hee would not succour these men, though the Father intreated. The Prouinciall *Vistor* only remayned, who alone doth last of all reuise the Sentences, and they despaired that hee would reuoke the judgement of seuen or eight Magistrates. Hereupon they conspired ffitie of them conioyning in an impious Sacrifice in a certayne Temple to expell ours from *Xauccum*. But none of the Magistrates of the Citie subscribing (except one, who did it, to offend the Fathers greatest friend) they better bethought themselves, and intreated *Ricinus* to be their Intercessor; where-by the Visitor was perswaded to pronounce them Dicers and not Theeues, and to exchange their sentence into twentie stripes apiece. For the name of Theeues would haue beene an ignominious brand to them and to their Kindred for euer. Yet would they haue renewed their accusation to the Visitor, but he would not heare them. About that time the *President of the Court of Ritos* at *Pequin*, passed that way towards *Haman* his Native Countrey, who hearing of Ours (which he did not to the Visitors) visited them with gifts, and spent a whole day with them, promising at his returne to carry Father *Matthew* to *Pequin* with him to correct their Kalendars.

In November 1594. Father *Francis de Petris* dyed, and Father *Lazarus Cataneus* succeeded, *Ricinus* bethought him of another course: for howsoeuer they had shaken off the name of *Bonzi*, yet

yet because they shaued their beards like the *Portugall* Priests, and cut their hayre, and liued single, had their Temple and set prayers, they could not free themselves of that infamous title which made them vnfit for greater Designs. Hee aduised the Visitor, that by this meanes they were accounted as the *Idoll* Priests, and that it were fitter to let their hayre and beards grow, and to weare the habite of the Learned men, each of them hauing a garment of Silke to visit the Magistrates, without which they might on equall tearmes amongst the *Chinois*, conferre with them: also that it was fit to remoue their residence from this vnwholsome ayre of *Xanccum*, or to diuide it. To all these the Visitor yeelded, vndertaking to acquaint the Generall of the Order and the Pope. For howsoeuer for vertue and learning (wanting to their *Bonzi*) the Magistrates had alway shewed countenance to Ours, yet the vulgar held them in that vulgar respect; neither might the Magistrates breake their custome, to giue them equall entertaynement. Nor did they now beare themselves for Learned men of *China*, but for *Europæan Learned*, imitating the habite of that Countrey.

The next yeere, 1595. the Chiefe Iudge of the *Councell of Warre*, by the *Chinois* called *Scilan*, which is farre aboue the dignitie of Vice-roy, (who before had after diuers Dignities betaken himselfe to a priuate life) vpon occasion of the inuasion of *Corai*, was by the King of *China* (which sent in defence thereof an Armie of eightie thousand) called backe to the Royall Citie. Hee had a Sonne of twentie yeeres old, who for griefe that he had lost the first degree of their Students, lost his wits. Hee sent a Captayne for the Fathers, thinking they could recouer his Sonne which he had with him, and gaue them such entertaynement, that the Magistrates were amazed. Hee caused a Charter to bee giuen to *Ricini* for going to *Nanguan*, chiefe Citie in *Chiansi*, where hee hoped to doe good on his Sonne. He passed Mount *Molin*, which lyeth betwixt the two Prouinces and the two Riuer, a dayes iourney, and the most notable thorow-fare in the whole Kingdome. For at the foot thereof to the South, the Riuer of *Nanchin* becomes nauigable, which runneth into *Canton* and the South Sea. On the other side of the Hill at the Citie *Nanguan*, ariseth another great Riuer, which visiteth the Prouinces of *Chiansi* and *Nanquin*, and many Citie before hee enters the Sea Eastward. Thus what comes from forraigne Kingdomes to *Canton*, is this way conueyed to the in-land Kingdomes, as also from those hither: Horses and seates, or Chayres for carriage on mens shoulders, Beasts for carriage and Porters, being almost innumerable euery day, yet all in good order. The Mountayne is common to both Prouinces, which are distinguished by a Gate erected among the stonie precipices. All the way is set with Trees, paved with stones, frequent with Hostries, as secure by night as by day, both by the guards of Souldiers, and frequencie of Trauellers: neither are their ouer-flowings by raynes. On the Hill top is a neate Temple, and therein a Garrison, both Prouinces thence offered to the view. *Naughan* signifieth the *Southerne Inne*. Hee went in one of the Presidents Ships, till hee came to the Citie *Cancu*; by the way often entring into his owne Ship and discoursing with him of *Europæan* affayres, Sciences, and Religion. But so many visitations for Magistrates hindred all dealing with his Sonne in this iourney, so that by his Father it was deferred.

In this Citie *Cancu*, resideth a Vice-roy greater then the Vice-roy of that Prouince, they call him the Vice-roy of foure Prouinces, *Chiansi*, *Fuchien*, *Canton* and *Yquian*: not that all those Prouinces are subiect to him, but because hee gouerneth two adioyning Regions, or lesse Prouinces out of each of them. The cause of appointing this Vice-roy extraordinarie was, the multitude of Theeues in those parts, which bordering on so many Prouinces, could not easily by ordinarie course of Iustice bee apprehended; whence two Regions out of each were committed to one, who by Militarie forces repressed those insolences. And because the militarie Magistrates are subiect to that Councell of Warre at *Pequin*, the President was heere receiued with greater State: aboue three thousand men were sent to meete him a league off, with their Captaines, Colours and Armes, many with Hand-gunnies mixed, shooting off as he passed, making a faire show on both sides the Riuer, which there is not very large. When hee was come into the Citie, the Vice-roy with other Magistrates visited him with Gifts, Prouisions, Banquets; and some companies were set to guard the Ships: which was also done euery where, such is the *China* veneration of such Magistrates by their inferiours. Heere was a Bridge of Boates, opened but once a day for Ships passage which haue payd their customes.

After they were past this Citie, another Riuer addes it selfe to this, whence they come into a place called *Sciepathau*, about chirtie miles long, in which are many Rockes dispersed, on which the impetuous force of the water causeth many ship-wracks, goods lost, and men drowned; and requireth expert Ship-men; a strange thing to see a Riuer full of shelues and sharpe rockes, in the midst of the continent. In the entrance of this dangerous passage is an *Idoll* Temple, wherein the passengers deuoutly commend the safetie of their fortunes to these vanities, which *Scilan* also heere did in vaine: for although with multitude and industrie of Saylers his Ship auoyded the Rockes, yet was that broken in which his Wife and Children were carryed, though they escaped drowning, by reason of her high building, euery one getting vp into the highest decke, which lifted vp it selfe aboue those shallower waters. They cryed pittifully, and Father *Mas-*

thew

threw having then gotten a Boate for himselfe came first and received them, going himselfe into another lesse, which went before to conduct the way. Scilan sent for another Ship presently to Cancen. Father Matthew was taken into another Ship of burthen, which was in a gust overthrowne, John Barradas his boy was drowned, and hee hardly recovered: the Commodities by dying were gotten againe, though much hurt by the water. They came to a noble and populous Citie called *Chiengan*, where the winde by night was so violent, that it dispersed all the Fleet, which hardly escaped wracke.
